SEC. 3. That all civil process issued against persons resident in the said counties of Jefferson, Orange, Newton, Jasper, Hardin, Liberty, Tyler, San Augustine, Sabine, Polk, and San Jacinto, and cognizable before the United States courts shall be made returnable to the courts, respectively, to be held at the city of Beaumont; and all prosecutions for offenses committed in either of said counties shall be tried in the appropriate United States court at the city of Beaumont: *Provided*, That no process issued or prosecution commenced or suit instituted before the passage of this act shall be in any way affected by the provisions hereof.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

GEORGE W. FREEMAN.

Mr. BURROWS. I ask unanimous consent for the present consideration of the bill (H. R. 5280) for the relief of George W. Freeman.

Mr. HALE. I do not make the suggestion, Mr. President, but I am afraid there is not a quorum.

Mr. BURROWS. This is a very brief bill, and there will be no objection to it.

Mr. HALE. We ought to adjourn.

Mr. BURROWS. We can adjourn after the passage of this bill. It will give rise to no discussion.

Mr. HALE. Very well.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 5280) for the relief of George W. Freeman. It directs the Secretary of War to amend the military record of George W. Freeman for the removal therefrom of the charge of desertion, and that he issue to him an honorable certificate of discharge from the military service of the United States, to date July 12, 1868, but no back pay, bounty, or other emoluments shall become due and payable by virtue of its passage.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

UNIFORM STANDARD OF CLASSIFICATION OF GRAIN.

Mr. GEAR. I ask unanimous consent for the present consideration of Senate bill 353.

I wish to state in advance that if the bill creates any debate I shall withdraw it. It is the same as a bill introduced by the senior Senator from Ohio [Mr. SHERMAN] two years ago, which then passed the Senate unanimously. It is indorsed by the late Secretary of Agriculture, General Rusk, and also by the present Secretary, Hon. Sterling J. Morton.

The VICE-PRESIDENT. The bill will be read for information, subject to objection.

The Secretary read the bill (S. 353) to provide for fixing a uniform standard of classification and grading of wheat, corn, oats, barley, and rye, and for other purposes.

Mr. HALE. That is a very important bill. It ought not to pass without debate.

Mr. GEAR. I do not consider it a very important bill. It is a bill that provides for a standard measure for oats and all kinds of grain, provided it does not conflict with the Chicago or New York or any other standard for the measure of grain that is established.

Mr. HAWLEY. It can not agree with them all.

Mr. GEAR. It does not propose to. In the absence of an agreement, if you buy a carload of grain——

Mr. HAWLEY. Let me make a suggestion——

Mr. TURPIE. I object to the consideration of the bill, Mr. President.

The VICE-PRESIDENT. The Senator from Indiana objects.

Mr. HALE. I move that the Senate adjourn.

Mr. MITCHELL of Oregon. Let me pass one bill.

Mr. HALE. No; I move that the Senate adjourn.

Mr. SHOUP. Will the Senator yield to me?

Mr. PLATT. If the Senator from Maine does not insist upon his motion I shall.

The VICE-PRESIDENT. The Chair submits the motion of the Senator from Maine, that the Senate do now adjourn. [Putting the question.] The ayes appear to have it. The ayes have it.

Mr. HAWLEY. Ought we not, if we now adjourn, to adjourn until 11 o'clock on Monday?

Mr. HALE. It is too late now, and we have committees to meet on Monday morning.

The VICE-PRESIDENT (at 5 o'clock and 15 minutes p. m.). The motion is agreed to; and the Senate stands adjourned until Monday, June 8, 1896, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate June 6, 1896.

APPOINTMENT IN REVENUE-CUTTER SERVICE.

William E. Atlee, of New York, to be a third lieutenant in the Revenue-Cutter Service of the United States, to succeed A. L. Gamble, promoted.

PROMOTIONS IN THE ARMY.

Artillery arm.

Lieut. Col. Francis Luther Guenther, Fifth Artillery, to be colonel, June 6, 1896, vice Closson, Fourth Artillery, retired from active service.

Maj. William Sinclair, Second Artillery, to be lieutenant-colonel, June 6, 1896, vice Guenther, Fifth Artillery, promoted.

Capt. Edward Field, Fourth Artillery, to be major, June 6, 1896, vice Sinclair, Second Artillery, promoted.

First Lieut. Harry Reuben Anderson, Fourth Artillery, to be captain, June 6, 1896, vice Field, Fourth Artillery, promoted.

Second Lieut. Wilmot Edward Ellis, Fifth Artillery, to be first lieutenant, June 6, 1896, vice Anderson, Fourth Artillery, promoted.

POSTMASTER.

Frank Boynton, to be postmaster at Fayetteville, in the county of Onondaga and State of New York, in the place of John A. Ecker, whose commission expires June 20, 1896.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 6, 1896.

CONSUL-GENERAL.

David N. Burke, of New York, to be consul-general of the United States at Tangier, Morocco.

CONSUL.

George F. Smithers, of Delaware, to be consul of the United States at Chungking, China.

SPECIAL EXAMINER OF DRUGS, ETC.

Alexander G. Maylie, of Louisiana, to be special examiner of drugs, medicines, and chemicals in the district of New Orleans, in the State of Louisiana.

CHIEF EXAMINER, CIVIL SERVICE COMMISSION.

Abram R. Serven, of New York, to be chief examiner of the Civil Service Commission.

APPOINTMENTS IN THE NAVY.

Samuel B. Palmer, a citizen of Georgia, to be an assistant surgeon in the Navy.

Harry W. Jones, a resident of New Jersey, to be a chaplain in the Navy.

PROMOTION IN THE REVENUE-CUTTER SERVICE.

Third Lieut. Aaron L. Gamble, of Indiana, to be a second lieutenant in the Revenue-Cutter Service of the United States.

APPOINTMENT IN THE REVENUE-CUTTER SERVICE.

William E. Atlee, of New York, to be a third lieutenant in the Revenue-Cutter Service of the United States.

POSTMASTERS.

Frank Boynton, to be postmaster at Fayetteville, in the county of Onondaga and State of New York.

James McCloskey, to be postmaster at Johnsonburg, in the county of Elk and State of Pennsylvania.

Jennie T. Dessert, to be postmaster at Macon, in the county of Macon and State of Missouri.

B. O. Guthrie, to be postmaster at Burlington, in the county of Alamance and State of North Carolina.

Henry G. Walter, to be postmaster at Lebanon, in the county of Lebanon and State of Pennsylvania.

Boyce Rankin, to be postmaster at McDonald, in the county of Washington and State of Pennsylvania.

HOUSE OF REPRESENTATIVES.

SATURDAY, *June 6, 1896.*

The House met at 11 o'clock a. m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

THE JOURNAL.

The SPEAKER. The Clerk will read the Journal of the proceedings of yesterday.

The Clerk proceeded to read the Journal.

Mr. KEM. Mr. Speaker, I make the point of no quorum.

The SPEAKER. The Clerk will suspend. [After a pause, during which the Speaker counted the House.] The Chair hopes the members of the House will remember that it is their duty to be here at 11 o'clock promptly, and that we have been delayed this morning for fifteen minutes by the neglect of members to attend to their duty.

A quorum being now present, the Clerk will read the Journal.

The Journal of the proceedings of yesterday was read and approved.

ORDER OF BUSINESS.

The SPEAKER. The unfinished business first in order this morning is the matter which was under consideration on the last suspension day.

RECIPROCITY AND COMMERCIAL TREATIES.

Mr. HOPKINS. Mr. Speaker, I have a privileged report which I desire to submit from the Committee on Ways and Means. This is a report of the hearings of the committee on reciprocity and commercial treaties, a matter which was referred to the committee for consideration. I am directed by the Ways and Means Committee to submit that report, and ask to have it printed.

Mr. TURNER of Georgia. Mr. Speaker——

The SPEAKER. The gentleman from Illinois submits the following privileged report from the Committee on Ways and Means, concerning reciprocity and commercial treaties, which will be printed.

Mr. HOPKINS. Mr. Speaker, a moment. The gentleman from Georgia [Mr. TURNER] has a minority report which he desires to submit.

Mr. TURNER of Georgia. Mr. Speaker, may I be recognized?

The SPEAKER. The gentleman from Georgia will submit the minority views, and the report of the committee, together with the views of the minority, will be printed.

PROPOSED ADMISSION OF NEW MEXICO.

Mr. CATRON. Mr. Speaker, I present a privileged report from the Committee on the Territories on the bill (H. R. 7909) to enable the people of New Mexico to form a constitution and State government, and ask that it be printed and recommitted to the committee.

Mr. KNOX. Mr. Speaker, the minority of the committee desire to submit their views in connection with the matter.

The SPEAKER. Unless the views are submitted now, it can only be done by unanimous consent.

Mr. KNOX. I am ready to submit them now.

The SPEAKER. Then the gentleman moves that the report of the committee, together with the views of the minority on this subject, be printed and recommitted to the committee.

The motion was agreed to.

ISSUANCE OF INTEREST-BEARING BONDS.

Mr. CHICKERING. Mr. Speaker, I desire to submit a privileged report from the Committee on Printing.

The SPEAKER. The report will be read.

The Clerk read as follows:

The Committee on Printing have considered House resolution 410, to print 10,000 additional copies of the majority and minority reports of the Committee on Ways and Means on Senate bill 1341, and beg leave to report the following resolution, and recommend its passage.

The SPEAKER. The resolution will be read.

The Clerk read as follows:

Resolved, That there be printed 10,000 additional copies of the majority and minority reports of the Committee on Ways and Means on Senate bill 1341, for the use of the House.

The resolution was agreed to.

PAY OF OFFICERS OF HOUSE AND SENATE FOR JUNE.

Mr. ALDRICH of Illinois. Mr. Speaker, I desire to submit a privileged report from the Committee on Accounts.

The SPEAKER. The report will be read.

The Clerk read as follows:

The Committee on Accounts, to whom was referred the accompanying joint resolution (H. Res. 195) to pay the officers and employees of the House and Senate for the month of June on the day following the adjournment of Congress, report back and recommend the passage of the same.

The SPEAKER. The joint resolution will be read.

The joint resolution was read, as follows:

Resolved, etc., That the Secretary of the Senate and the Clerk of the House of Representatives be, and they are hereby, authorized and directed to pay the officers and employees of the Senate and House of Representatives their respective salaries for the month of June, 1896, on the day of said month next following adjournment.

Mr. ALDRICH of Illinois. I move the adoption of the resolution.

The joint resolution was read a first and second time, ordered to be engrossed and read a third time; and it was accordingly read the third time, and passed.

THE INDIAN TERRITORY.

The SPEAKER. The matter before the House first in order is the unfinished business coming over from the last suspension day, being the motion of the gentleman from New York [Mr. SHERMAN] to suspend the rules and pass the bill (H. R. 7907) the title of which the Clerk will read.

The Clerk read as follows:

A bill (H. R. 7907) for the protection of the people of the Indian Territory, extending the jurisdiction of the United States courts, providing for the laying out of towns, the leasing of coal and other mineral, timber, farming, and grazing lands, and for other purposes.

The question being taken on the motion to suspend the rules and pass the bill, two-thirds voting in favor thereof, the rules were suspended and the bill passed.

MESSAGE FROM THE PRESIDENT.

A message in writing from the President of the United States was communicated to the House of Representatives, by Mr. PRUDEN, one of his secretaries, who also announced that the President had approved and signed bills of the following titles:

On June 3, 1896:

An act (H. R. 5731) to regulate the practice of medicine and surgery, to license physicians and surgeons, and to punish persons violating the provisions thereof in the District of Columbia;

An act (H. R. 1436) relating to commutations of homestead entries, and to confirm such entries when commutation proofs were received by local land officers prematurely;

An act (H. R. 3689) increasing the pension of Jefferson Fueston, of Company M, Tenth Ohio Volunteer Cavalry;

An act (H. R. 75) granting a pension to Mary F. Davenport;

An act (H. R. 2605) granting pension to Henry V. Andrews, of Fulton County, Ill., a survivor of the Black Hawk war;

An act (H. R. 3932) granting a pension to Mrs. Elizabeth Richardson;

An act (H. R. 4475) granting a pension to Mrs. Catherine Gaffney;

An act (H. R. 3001) granting a pension to Cynthia A. Lapham, widow of William B. Lapham;

An act (H. R. 3221) granting a pension to John Dalton;

An act (H. R. 3234) granting a pension to William Durley;

An act (H. R. 4395) for the relief of Miss Juliette Betts;

An act (H. R. 4122) granting an increase of pension to James H. Jones;

An act (H. R. 3216) granting an increase of pension to James P. Hurley;

An act (H. R. 7983) to pension Frances E. Wickware; and

An act (H. R. 5999) to correct the military record of Elbridge McFadden.

FOURTH-CLASS MAIL MATTER.

Mr. LOUD. Mr. Speaker, I move to suspend the rules and pass the bill (S. 2159) to regulate mail matter of the fourth class.

The bill was read, as follows:

Be it enacted, etc., That mailable matter of the fourth class shall embrace all matter not embraced in the first, second, or third class which is not in its form or nature liable to destroy, deface, or otherwise damage the contents of the mail bag or harm the person of anyone engaged in the postal service, and is not above the weight provided by law, which is hereby declared to be not exceeding 4 pounds for each package thereof, except in case of single books weighing in excess of that amount, and except for books and documents published or circulated by order of Congress, or printed or written official matter emanating from any of the Departments of the Government or from the Smithsonian Institution, or which is not declared nonmailable under the provisions of section 3893 of the Revised Statutes as amended by the act of July 12, 1876, or matter appertaining to lotteries, gift concerts, or fraudulent schemes or devices.

The SPEAKER. The gentleman from California moves to suspend the rules and pass the bill which has just been read.

Mr. RICHARDSON. Mr. Speaker, I demand a second. I am willing to agree that it be considered as ordered.

Mr. CANNON. Is it proposed to pass this bill under a suspension of the rules?

The SPEAKER. The Chair thinks that is the proposition.

Mr. CANNON. Who makes the motion?

The SPEAKER. The gentleman from California [Mr. LOUD].

Mr. LOUD. I will say to the gentleman from Illinois that he need not get frightened. This is not the bill he thinks it is.

Mr. CANNON. I think this is the bill touching packages.

Mr. LOUD. Oh, no; this is perfectly harmless.

The SPEAKER. A second is demanded. The gentleman from Tennessee asks that a second be considered as ordered.

Mr. KEM. I object.

The SPEAKER. Objection is made. The gentleman from California [Mr. LOUD] and the gentleman from Tennessee [Mr. RICHARDSON] will please take their places as tellers.

The House divided; and the tellers reported—ayes 125, noes 4.

Accordingly a second was ordered.

The SPEAKER. The gentleman from California [Mr. LOUD] has the floor for twenty minutes, and the gentleman from Tennessee [Mr. RICHARDSON] for the same time. Matters will be presented to-day under suspension of the rules which are of serious public importance, and the Chair hopes that particular attention will be given by the House to their consideration, and that proper order will be maintained.

Mr. LOUD. Mr. Speaker, this is a simpler matter than members of the House probably suppose. Alarm may have been unnecessarily aroused in relation to a bill which I have introduced—H. R. 4566. This bill—S. 2169—passed the Senate unanimously and I trust that it will pass the House unanimously. I do not believe there is a person in the House who can raise any possible objection to it. We reenact the law relating to fourth-class matter, adding to it just two words. I will read that portion of it that you may know the object of the insertion of these two words. The old law allows the Government to send through the mails anything that may be termed official matter under this reading:

And except for books and documents published or circulated by order of Congress, or official matter emanating from any of the Departments of the Government.

We amend that law by inserting the words "printed or written" so that if this bill shall pass it will confine mailable matter of the fourth class—and this does not apply to anything beyond free matter—it will confine mailable matter of the fourth class to its original intent, of printed and written matter. I will say to the members of this House that it will not disturb you in any of your documents or matter that you are now in the habit of franking, because any written or printed matter can be sent under this law as under the present law.

Mr. CANNON. What does it cut out?

Mr. LOUD. I will read a portion of the report of the Postmaster at Washington, and then the gentleman from Illinois will understand what we intend to cut out. This is in reply to a letter addressed to the Postmaster-General by Senator WOLCOTT, the chairman of the Post-Office Committee in the Senate. He says:

WASHINGTON CITY POST-OFFICE, OFFICE OF THE POSTMASTER,
Washington, D. C., February 8, 1896.

SIR: In reply to your reference slip "C. V. 7631," February 5, 1896, transmitting letter of Senator E. O. WOLCOTT, chairman Committee on Post-Offices and Post-Roads, United States Senate, respecting the class of Government matter passing through the Washington City post-office, I would refer you to section 1037, Postal Laws and Regulations, which has been stretched to cover the articles enumerated below.

During the past year there have been dispatched from this office from the—

Stationery division of the Treasury Department: 3,302 cases and packages, an average of 200 pounds each	660,400
73 bales of carpet, an average of 90 pounds each	6,570
Stationery division, Interior Department, 2,638 cases, packages, and sacks, 125 pounds each	330,750
Document division, Interior Department, 1,576 sacks, 125 pounds each	197,000
Agricultural Department, 300 sacks, at 75 pounds each	22,500
War Department, 467 sacks, at 110 pounds each	51,370
Total	1,268,590

This is all registered matter. It consists of supplies for the various Departments. Under this, the act of 1879, which put in the words "official matter," all of the supplies of the various Departments have been dumped upon the Post-Office Department and sent through as mail.

Mr. CANNON. I ask my friend, why not? These are Government supplies for the Government service. Why drive all this matter to the express companies at a much higher rate?

Mr. LOUD. I am very glad my friend has asked that question.

Mr. CANNON. I want an answer to it. Perhaps it is all right.

Mr. LOUD. I wish I had more than twenty minutes in which to go over this subject, but I think I can explain it in two. It costs the Government to transmit its mail matter double the price that it ought to cost, and it costs the Government to-day more than four times as much as it would cost to transmit the same matter by express. Now, that is one of the principal reasons.

Mr. CANNON. Is not that a good argument for the abolition of the whole mail service, and the doing of it all by express?

Mr. LOUD. Oh, well; I do not propose to enter now upon that subject. Mr. Speaker, I want to say to the House that packages weighing three, four, five hundred, a thousand, fifteen hundred, and as high as eighteen hundred pounds are frequently brought to the post-office for mailing. That matter costs the Post-Office Department on an average 8 cents a pound to transmit, not taking into consideration the question of handling. This matter is all registered. It is handled with great care. It must go through from city to city and be transmitted by contract wagon service, and must be delivered. You will find that this matter is costing the Government on an average more than 12 cents a pound to transmit and handle, where it could be transmitted by express companies and delivered at an average of less than 2 cents a pound. And this is not express; it is simply freight matter.

Mr. WILSON of Idaho. May I ask the gentleman a question?

Mr. LOUD. Certainly.

Mr. WILSON of Idaho. Will the Government have to lessen the facilities for doing postal business; and if this matter is transferred to the express companies would not the Government lose exactly what it pays the express companies, the Government having to pay the expenses of shipping these supplies?

Mr. LOUD. If the gentleman understood the working of the Post-Office Department he would know that mail is carried by weight, and while the representatives of the railroad companies before our committee, in discussing this bill, said that the Government had withheld heavy matter during the weighing, any gentleman who has read the exposé made by our Postmaster-General with reference to the Coast or Seaboard Air Line here he will see that the facts exist, as I stated here, that the mails are stuffed during the weighings; and we must not forget that 1,000 pounds of this Government matter transmitted during the weighing has to be paid for every day for four years.

Mr. CANNON. May I ask the gentleman right at that point this question? The weighing is once in four years, as I understand it?

Mr. LOUD. That is right.

Mr. CANNON (continuing). But it is entirely discretionary on the part of the Department to weigh as often as it chooses. Now, then, is it possible that the Postmaster-General will allow a fraud of that kind knowingly to exist and allow it to run four years instead of reweighing and discharging every employee who had anything to do with the perpetration of such a fraud?

Mr. LOUD. Oh, well, permit me to say further that the Postmaster-General can not put himself in every nook and corner of the United States and examine the weighing. He can and probably will order a new weighing of the line mentioned, but a weighing or reweighing costs a good deal of money and is an expensive

luxury. I want to say to the House that this matter is only technically mailable matter. It has no business in the Post-Office Department. We have no business to flood the Post-Office Department with the supplies of the various Departments.

Mr. LONG. Will the gentleman allow me to ask him a question?

Mr. LOUD. Certainly.

Mr. LONG. Will this bill prohibit the sending of garden seeds through the mail?

Mr. LOUD. If in packages under 4 pounds—no.

Mr. LONG. It says "printed and written official matter."

Mr. DOCKERY. This does not affect the franking privilege, does it?

Mr. LOUD. It would confine all mailable matter, outside of printed and written matter, just the same as we confine it to every individual in the country, to 4 pounds weight.

Mr. LONG. It affects that kind of matter only.

Mr. ARNOLD of Pennsylvania. Will the gentleman allow me to ask him a question?

Mr. LOUD. Certainly.

Mr. ARNOLD of Pennsylvania. Suppose I were to mail a sack of garden seeds, a large mail sack, to my home, to have its contents addressed there to my constituents. Would that affect it?

Mr. LOUD. If in packages of over 4 pounds they would be affected; but I assume that put up in packages as they are usually sent it would not affect them.

Mr. ARNOLD of Pennsylvania. Suppose the sack, with all included, should weigh over 4 pounds.

Mr. LOUD. Why, no. The Post-Office Department have urged and continued to urge Congress for the last ten years to pass a law of this character. The gentleman on my right [Mr. SHAFROTH] asked me what character of matter has been going through the mails. During the last fall, in the city of Baton Rouge, there was offered for mailing the camp equipage of a Coast Survey party. It was refused mailing, and the correspondence is here in this report. In an appeal to the Department the Chief of the Coast Survey stated that this was the first time that the supplies of the Coast Survey had ever been refused mailing. These supplies contained tents, tent poles, saddles, and everything that a party of that character would have.

I want to say to the House, in all candor, that there is nothing in this bill that will affect any privilege now exercised by any member of Congress. There is nothing except what is right, just, and proper; and it will save the Government at least a million dollars a year.

Mr. TRACEY. Does it affect the sending of garden seeds?

Mr. LOUD. Not at all, under 4-pound packages. If I had it in my power I would do so; but this bill does not affect that.

Mr. WILSON of Idaho. Will the gentleman allow me to ask him a question?

Mr. LOUD. How much time have I, Mr. Speaker?

The SPEAKER. The gentleman from California has eleven minutes remaining.

Mr. LOUD. I yield to the gentleman for a question.

Mr. WILSON of Idaho. If this bill passes, you contemplate the discharge of postal employees sufficient to make this million dollars?

Mr. LOUD. Oh, no; we do not contemplate the discharge of any employees.

Mr. WILSON of Idaho. How are you going to save the million dollars?

Mr. LOUD. Now, one moment. The full effect of this will not be felt for three or four years. It will be felt in the next annual weight of the transmittals; it will gradually affect the railway postal clerks, and the clerks in the post-office, because there will be no increase of business.

Mr. WILSON of Idaho. If this bill passes, will not the business immediately go to the express companies instead of being carried through the mails?

Mr. LOUD. Certainly it will go by express or freight, where it properly belongs.

Mr. WILSON of Idaho. And then we shall have the burden of an expensive organization for the handling of this matter without having the business to do.

Mr. LOUD. Possibly, if the gentleman wants it that way.

Mr. MILLIKEN. Let me ask the gentleman where is the saving to be effected if we have to pay the same amount for mailing this matter and at the same time pay for sending it by express?

Mr. LOUD. Permit me to say, Mr. Speaker, that if gentlemen come in every three or four minutes and ask me the same questions that I have already answered, I can not make much progress. I have stated that it costs the Government to transmit and handle this matter 12 cents per pound, and that the same matter can be sent by express at an average cost of 2½ cents per pound, and by freight at 1½ cents per pound, and really it is nothing but freight—it is not even express matter.

Mr. MILLIKEN. Since the gentleman professes to know so much and thinks that I know so little about that, I should like to hear an explanation from him as to why it costs the Government 12 cents a pound to do this business while it can be done by express for 2 cents a pound?

Mr. LOUD. I explained that a few moments ago, and if the gentleman had been here he would have heard my explanation.

Mr. MILLIKEN. I am always unfortunate when I fail to hear the gentleman from California.

Mr. LOUD. I will put one point to the gentleman now, if he will give me his attention. All of the Western roads which are land-grant roads are carrying the mails at 40 per cent less than the Eastern great trunk lines receive, and they are so anxious to secure the carriage of the mails that they are bidding against one another for the privilege. All of the Western roads starting out from these great trunk lines are very anxious to carry this mail matter at a reduction of 40 per cent below what the Eastern roads receive, although the Eastern roads get the large concentration of mails. Does that satisfy the gentleman?

Mr. MILLIKEN. I do not know whether it satisfies me or not. I do not think I have got much information out of that answer.

Mr. LOUD. I have stated that we are paying for the transmission of the mails more than double what any corporation or individual would pay for like service. Is that satisfactory?

Mr. ARNOLD of Pennsylvania. As the law now exists, why can not the heads of Departments direct that this matter be sent not by mail but in some other way?

Mr. LOUD. Because the law prohibits it. The law permits the Departments of the Government to send any official matter by mail.

Mr. ARNOLD of Pennsylvania. That is simply permissive; but the heads of Departments can direct that the matter be sent otherwise, can they not?

Mr. LOUD. If that portion of the law is permissive, then the whole law relating to fourth-class matter is permissive.

Mr. ARNOLD of Pennsylvania. Not necessarily.

Mr. LOUD. Well, it is all in the same section and reads right along, and if the gentleman is right, the head of the Department might refuse to accept any fourth-class matter.

Mr. MITCHELL. Is not the real difference this, that this matter, being carried by weight, is carried at a much less rate by express than by post-office rates?

Mr. LOUD. Of course it is. I have said so several times.

Mr. DOCKERY. I understand that this proposition was recommended by Postmaster-General Wanamaker and is also recommended by the present head of the Department?

Mr. LOUD. Yes, sir; it has been recommended by Mr. Wanamaker, by Mr. VILAS, by Mr. Bissell, and by the present Postmaster-General. The Department has been begging Congress to make this enactment.

Mr. BRUMM. Is not this more a question of antagonism between the different Departments than a question of merit?

Mr. LOUD. I have never heard of any such antagonism. Can the gentleman advance any reason why the Post-Office Department should be required to carry the freight matter of the War Department?

Mr. BRUMM. It does seem that the other Departments, if they chose, could prevent this evil which the gentleman describes.

Mr. LOUD. But they do not choose to do so. They get a certain allowance for the transmission of their matter and then they force this class of matter on the Post-Office, and thereby save the funds of their own Department.

Mr. MILLIKEN. Then is there really any loss to the Government? Does it make any difference to us whether we pay the same amount of taxes for the benefit of one Department or of another?

Mr. LOUD. It costs us 12 cents a pound to transmit this matter by mail, while it can be transmitted for 2½ cents by express.

Mr. RICHARDSON. If this War Department matter were to be sent by express rather than by mail, that Department would have to pay the cost of transmittal, would it not?

Mr. LOUD. Certainly. Each Department would pay out of its own funds.

Mr. DOCKERY. Of course the saving would apply to matter transmitted by the Government, but as it stands now individuals get the benefit of this cheap mail transportation. Does this bill apply to individuals or does it relate entirely to the Department?

Mr. LOUD. It relates to departmental matter wholly.

Mr. Speaker, I reserve the balance of my time.

Mr. RICHARDSON. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Speaker, I differ with the gentleman from California [Mr. LOUD] with great diffidence. It may be that he is right in his contention that the law on this subject ought to be amended; but I am not prepared to say that he is. This whole question is in a nutshell, as I understand it. The private citizen can send through the mail packages not exceeding 4 pounds in weight. That has been a very great benefit to the country, because

it has kept down the express rates and has yielded revenue to the Government.

Now, some years ago I had this matter called to my attention. The practice of the Government touching supplies for the public service has been changed. Reforms have been brought about through appropriations and limitations upon appropriation bills. This reform commenced many years ago, was followed up by Mr. Randall, and right or wrong has been followed since. Formerly postmasters, registers and receivers of land offices, and various Government officers throughout the country bought, each one for himself, the supplies necessary for his office, getting poor supplies at high rates. Under our system the supplies are furnished under contract by the various Departments and shipped on requisition to the various postmasters and other officers.

Now, the Government has all the machinery for doing this work. It has its thousands of postal clerks. It has its 67,000 or 70,000 postmasters. It has its mail service over 175,000 miles of railway. Now, why should not the Government utilize its own machinery to transmit these supplies? Suppose we do not do it. The result is that all the post-office supplies—the postal cards, the envelopes, etc.—and all the Treasury supplies will have to go by express instead of by mail.

Mr. HEMENWAY. A railroad company that has just had its weighing gets for three years and eleven months the rate of pay called for by that weighing, while at the same time every express company would be paid for this same service if this bill becomes law.

Mr. CANNON. Certainly. Now, the gentleman from California says that it costs 12 cents a pound to transmit these supplies.

Mr. LOUD. To transmit and handle them; 8 cents a pound to transmit them.

Mr. CANNON. I do not agree with the gentleman. I think that the cost of sending out these supplies through the post-office is largely inappreciable, because we have all the machinery; and to make now the change proposed will not cut down the service to the extent of a single employee.

Mr. LOUD. Will the gentleman allow me a moment?

Mr. CANNON. Certainly.

Mr. LOUD. The gentleman must know that this matter of transportation is not a question as to the number of Government employees at all. We contract with the railroad companies for carrying the mails at so much per pound.

Mr. CANNON. I know that.

Mr. LOUD. And it costs us in a single year $38,000,000, in round numbers, for transportation. Now, dividing that by 450 any child can estimate what this transmission costs us per pound.

Mr. CANNON. And so does it cost you to transmit by the express companies. The moment you throw these packages of matter required in the Government service out of the mails that moment you are at the mercy of the express companies. That is all there is of it. And I undertake to say that your bills for transportation by express will amount to more than the present cost of the service through the postal system. At least I am afraid that would be the case.

The mails are weighed once in four years. The gentleman says that when they are weighed the cost is cheapened; that these officers of the Government—the Postmaster-General, the Secretary of the Treasury, and the Secretary of the Interior—take this bulky stuff sent out and weigh it for thirty successive days. I do not believe it.

The SPEAKER. The time of the gentleman from Illinois [Mr. CANNON] has expired.

Mr. CANNON. I ask the gentleman from Tennessee [Mr. RICHARDSON] to give me a minute or two more.

Mr. RICHARDSON. I yield the gentleman two minutes more.

Mr. CANNON. If it should be found that the Departments permit the kind of fraud which is suggested, it would be an impeachable offense. And here is a safeguard: If frauds are committed in the way suggested, there is a discretion on the part of the Postmaster-General under the law to have the weighing once every year or once every six months.

Some gentlemen say that this proposed change will cut our seeds from the advantage of mail transportation. I do not know whether it will or not. The gentleman from California says it will not, and if he has examined the matter I have great respect for his opinion, for he is a most competent man.

Mr. LOUD. The gentleman has misquoted me. I hope he wants to be fair. Let us settle this question now.

Mr. CANNON. I can not yield to the gentleman. He has some time left and can answer me in his own time.

Mr. LOUD. I will yield you a minute additional.

Mr. CANNON. All right.

Mr. LOUD. The gentleman misquotes the statement I made. I did not say or intimate that the heads of the Departments were stuffing the mails. I have not time in twenty minutes to show how the mails have been stuffed; but in this instance it was done not by the heads of Departments, but upon certain matter sent South by gentlemen who have the franking privilege.

Mr. CANNON. Well, sir, if anybody stuffs the mails—if any member of Congress or anybody else who has the franking privilege does it—turn on the "X rays" and let the whole thing be exposed. If such frauds have been committed, somebody ought to be expelled.

Oh, gentleman, I have been long enough in Congress to see great popular waves against the franking privilege. I have seen statistics upon the subject piled up mountain high to influence Congressional action against its continuance. But the amount of matter—governmental matter—transmitted through the mails in comparison with the great private service of the Department—that that is sent throughout the mails by private citizens—is in my judgment insignificant.

That is all I desire to say upon the subject.

Mr. RICHARDSON. Mr. Speaker, I yield now five minutes to the gentleman from Mississippi [Mr. KYLE].

Mr. KYLE. Mr. Speaker, I want to state to the House, briefly, my reasons, or some of the reasons at least, why in my opinion this bill ought to pass. I can not in the brief time allotted to me discuss it fully.

In the first place, it is in the interest of economy and better postal service to pass the bill. According to the best information the Committee on the Post-Office and Post-Roads has been able to obtain, it will result in a saving of about $1,000,000 a year to the Government. In the next place, it is in accordance with good business principles to pass it. Why? Because the chief in control of this Department of the Government, not only the present Postmaster-General, but that Department year after year for a long time past, has exhibited a desire for the passage of such a law as this. Why do they want it passed? In order to keep out of the mail matter not proper to put there.

Now let us examine for a moment what they have been carrying through the mails. According to a letter written by the Postmaster-General which is embodied in this report, tent poles and I do not know what else—every sort of stuff—have been dumped into the mails to be transported instead of sending it by freight or express, as it should have been sent. Now, how is the postal service of the Government affected by this condition? In the first place, it must be remembered that it costs the Government more, in dollars and cents, to transport matter of this character through the mails, under present conditions, than to send it in any other way that you can think of by any transportation company in the country. It has been suggested by the gentleman from California [Mr. LOUD] that it costs about 12 cents a pound to transmit such matter through the mails and to handle it. But let us put it at only one-half of that, and say it costs but 6 cents a pound to transmit it, I ask whether, in the range of your imagination, you can imagine any transportation company that is charging at the rate of 6 cents a mile for transporting tent poles or camp equipage or any such matter?

In this Louisiana case, to which reference has been made in the report, there were put into the mails at Baton Rouge for transportation, as we are informed by the Department, four parcels which had a penalty label, as follows: One sack weighing 68 pounds, one box weighing 200 pounds, one trunk weighing 78 pounds, and one set of tent poles weighing 34 pounds, all addressed to the United States Coast and Geodetic Survey, Baton Rouge, La.

Now, the gentleman from Illinois says that this is a matter the Postmaster-General can control; and that he has the discretion now to weigh the mails, if he deems proper, every six months or every year. That may be true; he may have the discretion; but it is very expensive to weigh the mails every six months.

Mr. ADAMS. Will the gentleman allow an interruption for a suggestion?

Mr. KYLE. Well, if it be a very brief one.

Mr. ADAMS. I was five years on the Geological Survey of the United States; and I wish to suggest to the gentleman that the time that would be saved in transporting the tent poles and camp equipage through the mails, rather than by freight or otherwise, might save to the Government a month's wages of thirty or forty men engaged in these expeditions. They can get them by mail much faster than by freight.

Mr. KYLE. Why, you can purchase tent poles for less than the amount it costs to transport them from point to point through the mails.

Now, why is it that the Government is to be burdened with this sort of thing? The gentleman said, and I started to reply to him, that the Government might weigh the mails every six months, and get rid of it in that way. I am at a loss to conceive how you are to get rid of it in that way, even if it were possible for the Postmaster-General to weigh the mails so frequently. He can not do it, to begin with.

As I said before, there is no reason why this bill should not pass.

The Postmaster-General, after careful investigation of the question, and not only the present one, but his predecessors, have been anxious, as I am informed, for the passage of such a bill, because they say it would be in the interest of the best business principles and the most economic management of the office. I hope, therefore, the motion of the gentleman from California will prevail.

Mr. RICHARDSON. I yield three minutes to the gentleman from Missouri [Mr. HALL].

Mr. HALL. Mr. Speaker, I wish to state to the House that this matter has been carefully considered by the Committee on the Post-Office and Post-Roads of the House; and it is unnecessary to say that we can not discuss in the brief time allotted to us under the rule the merits of the matter. I will state, however, that the seventeen members of the Committee on the Post-Office and Post-Roads, after hearing all of the testimony in the case on both sides, are unanimous in their opinion on this question and are in favor of this bill.

Under the present law it costs $10,000,000 a year more to run the Post-Office Department than the receipts of the postal business produce to the Government. The result of it is that whenever we ask for an extension of mail privileges we are met constantly on the threshold by this immense deficit of $10,000,000 with regard to mail transportation.

The testimony is undisputed and indisputable before our committee that it costs 12 cents per pound to handle this matter as it is at present handled. Now, just consider for a moment what they are mailing under this franking privilege. They are mailing such things as saddles, blankets, harness, and thousands of yards of carpet, and not carpet in the original bulk as it comes from the manufacturing department, but these carpets are sent here and made up, and put up in bulky bundles, after being made to fit the rooms for which they are intended. They are then shipped by mail. Desks and things of that kind are mailed, in spite of the fact that the same matter could be sent by the express companies at the rate of 2 cents a pound, which would save the Government 10 cents a pound, and decrease the deficit with which we are constantly faced when we ask for an extension of mail privileges. I wish to state that there is no division in the committee on this question. After a careful investigation we are all united in favor of the proposition.

Mr. WILSON of Idaho. Do you say this matter could be sent by express for 2 cents a pound?

Mr. HALL. That is the testimony before the committee.

Mr. WILSON of Idaho. You do not mean to say it could be sent across the continent for 2 cents a pound, or for 6 cents a pound, by express? It would cost more than that to ship it across the continent. It might go from here to Baltimore at the rate you mention, but these charges are made according to the distance.

Mr. HALL. I understand from the statement of the Department that 2 cents a pound is the average cost of transportation by express, as compared with 12 cents a pound, the average cost of transportation through the mail under the law.

Mr. WILSON of Idaho. That certainly is not 2 cents a pound.

Mr. HALL. I do not believe there is any lawyer in this House who would have thought that anyone would have attempted to send saddles and harness and desks through the mail under the words "official matter." All the amendment we ask to the law is to put in the words "printed or written," not abridging the right of any member of Congress, but to allow the Government to save this sum, so that when we who live in the West especially come forward and ask an extension of mail privileges, we shall not be met constantly with a ten-million-dollar deficit.

Mr. RICHARDSON. I do not desire to use any time myself in opposition to this measure; but if any member of the House desires time, inasmuch as I control the remainder of the time in opposition, I will cheerfully yield to him. If not, I have nothing further to say.

Mr. LOUD. I ask for a vote, Mr. Speaker, unless some gentleman wants to ask some question.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and on a division there were—ayes 102, noes 32.

Accordingly, two-thirds voting in favor thereof, the rules were suspended and the bill passed.

ATLANTIC AND PACIFIC RAILROAD COMPANY.

Mr. POWERS. Mr. Speaker, I move to suspend the rules and pass the bill S. 1832, which I send to the Clerk's desk.

The bill was read, as follows:

An act (S. 1832) to define the rights of purchasers under mortgages authorized by an act of Congress approved April 20, 1871, concerning the Atlantic and Pacific Railroad Company.

Be it enacted, etc., That whenever any mortgage made by the Atlantic and Pacific Railroad Company under and by virtue of acts of Congress is foreclosed in any court of the United States, or of any State or Territory thereof, and any sale of the road, equipment, lands, franchises, privileges, and other rights and property covered by said mortgage is made under a decree or decrees of such courts, the purchaser at any such sale or sales, and their associates or assigns, shall constitute a new company, which shall have and shall be entitled to hold and possess the franchises and property so sold, and to exercise the same rights, powers, privileges, grants, and franchises, including the franchise to be a corporation, granted by the act of Congress approved July 27, 1866, incorporating the Atlantic and Pacific Railroad Company, and by acts amendatory thereof and supplemental thereto, which were owned and possessed by said Atlantic and Pacific Railroad Company, or said mortgagees at the time of such decree of foreclosure; and the incorporation as hereby provided shall be completed and become effective whenever the said purchasers and their associates or assigns shall file with the Secretary of the Interior a certificate of incorporation hereunder, duly acknowledged, specifying the name of such new corporation, its president, and the names of its directors, the amount of its proposed capital stock and bonds, together with certified copy of the decree or decrees ratifying such sale; but nothing in this act shall make such purchasers and their associates or such new corporation liable for any debts or claims or contracts of the old corporation not expressly assumed in their contract of purchase at said judicial sale: *Provided*, That the amount of the proposed issue of stock of such new corporation shall not exceed the aggregate amount which the Atlantic and Pacific Railroad Company has already issued and is now outstanding, except that said corporation may issue an additional amount of stock which, with the stock heretofore issued, shall not exceed the aggregate amount heretofore authorized by Congress, and such additional stock shall not be issued except for money, labor, or property, estimated at its actual cost value, in exchange for such stock at its full or par value: *Provided further*, That nothing herein contained shall be construed as making any additional grant of lands or other franchises to such successor corporation, or as a waiver of any rights of the United States now existing to enforce any forfeiture of lands heretofore granted to the said Atlantic and Pacific Railroad Company, or as in any manner affecting the vested rights of any settler or settlers on any of the lands heretofore granted to the Atlantic and Pacific Railroad Company or of any purchaser or purchasers of said lands from said company.

SEC. 2. That Congress shall at all times have the power to alter, amend, or repeal this act.

Mr. HOPKINS. Mr. Speaker, I demand a second on that.

The SPEAKER. Does the gentleman desire to consider a second as ordered?

Mr. HOPKINS. Yes, Mr. Speaker.

The SPEAKER. Without objection, a second will be considered as ordered.

Mr. TERRY and Mr. KEM objected.

Mr. POWERS and Mr. HOPKINS were appointed tellers.

The House divided; and the tellers reported—ayes 55, noes 15.

Accordingly a second was ordered.

Mr. POWERS. Mr. Speaker, this is a bill to enable the bondholders of two several mortgages of sections of the Atlantic and Pacific Railroad to organize themselves into a corporation upon the completion of foreclosure proceedings which are now pending upon these two mortgages.

The history of the road, briefly stated, is this: In 1866 Congress passed an act chartering the Atlantic and Pacific Railroad Company, with authority to build a railroad from Springfield, in the State of Missouri, through the Indian Territory and one or two other Territories, to California and the Pacific Coast. Certain land grants were made to enable that road to complete its line. It was then supposed that the need for a railroad was urgent enough to call out popular subscriptions to the capital stock of $100,000,000, fixed by the original act, and that thereby the road would be completed; but like most other projectors of railroad enterprises, these gentlemen were disappointed in their expectations, and found themselves under the necessity of obtaining authority to mortgage their road, which authority did not exist under the original act. Accordingly, in 1871, they came to Congress, and on the 20th of April in that year Congress authorized them to mortgage their property under a section which has been held by the court to be too narrow to enable them to mortgage the franchise, to become corporations.

Now the holders of those mortgages are in just this plight: They have a valid mortgage, covering the property of the company, but they have no mortgage that would enable them, under it, to reorganize into a corporation with the power to be a corporation. It becomes necessary, therefore, to confer this additional franchise upon them. I am sure that no gentleman who has read the report in this case, that was made in the Senate, and which has been duplicated in the House, can fail to see that the measure is one entirely just to the owners of these two mortgages. The road was built from Springfield to the east line of the Indian Territory some years ago, and has passed out of the hands of the original company and now forms a part of the St. Louis and San Francisco Railway. The central division was that line from the line of the Indian Territory to Albuquerque, N. Mex., and this mortgage on that division is in controversy in this matter. The western division runs from Albuquerque west to California, and the mortgage of that division is also in question.

Now, then, the bondholders of the two mortgages last named, on the central and western divisions, have foreclosed their mortgages, and very soon the property under those foreclosures will be sold and the bondholders are probably the only persons who will bid for the property. It is of no interest to anybody else. It is mortgaged for probably far more than it is worth. They desire this additional legislation to enable them to become a corporation and operate their line under their corporate existence.

This bill was unanimously reported by the Committee on the Judiciary of the Senate, passed the Senate unanimously, came to the House, and has been unanimously reported by the committee

of this House. I am not conscious that there can be any objection to this matter at all. I once attempted to get it up before the House and asked unanimous consent for that purpose, but objection was made by two or three gentlemen, with whom I have since conversed, and upon examination of it since with them I am authorized to say that they have no personal objection whatever to the bill.

Mr. CONNOLLY. Will the gentleman allow me to ask him a question?

Mr. POWERS. Certainly.

Mr. CONNOLLY. Was there any provision in the original land grant requiring that the lands should be sold in any particular time to settlers, or at any particular price?

Mr. POWERS. I am very glad my friend called out that matter. I meant to state it. The land grant to this road under act of Congress has been forfeited. The company resisted the forfeiture, and the case is now pending in the Supreme Court; but this bill reserves whatever rights the United States may have in that case in the event the decision is made against us; but the lands are actually forfeited by act of Congress.

Mr. HENDERSON. Then this is for the purpose of enabling the purchasers under the foreclosure sale to become a corporation?

Mr. POWERS. Yes; to become a corporation.

Mr. HENDERSON. Under State or Federal law?

Mr. POWERS. Under Federal law, because the line runs through the Indian Territory.

Mr. HENDERSON. Does the gentleman say they can not organize and incorporate under a State law?

Mr. POWERS. The road does not run through States altogether. It runs through the Indian Territory; and there is no way for it to be incorporated through State law.

Mr. HENDERSON. Except by act of Congress?

Mr. POWERS. Exactly. So that it becomes necessary to have a Federal charter.

Mr. CONNOLLY. Are there not several roads running through the Indian Territory under State charters?

Mr. POWERS. That may be. But my friend will see the awkwardness of the situation which this would be in. This charter was originally granted by Congress, and you are simply extending this provision to the new corporation. The gentleman will see how awkward it would be to have it incorporated by a different jurisdiction.

Mr. CONNOLLY. Why not have a general provision? Notwithstanding the Federal charter, it should, for the purpose of giving judicial jurisdiction, be regarded as a citizen of each State or Territory through which it runs.

Mr. POWERS. I will say to my friend there is a general bill pending, and I hope it will pass, applying to all such corporations.

Mr. CONNOLLY. If that bill should pass, that would not affect this.

Mr. POWERS. If there is a general law, of course it would be applicable to all Federal corporations, because the right to alter and amend remains.

Mr. HENDERSON. Now, what provision is made for judgments and claims against the old company, and damage suits, and all that sort of thing.

Mr. POWERS. Of course any judgment against the old company is a valid judgment that no legislation of ours can affect. It will be a vested right that could not be disturbed by the granting of a new charter.

Mr. HENDERSON. Do you make any provision for the preservation of the rights of judgment holders?

Mr. POWERS. We do not, any more than the general law.

Mr. MITCHELL. Will the gentleman kindly define a little more fully what is meant by lines 28 to 32?—

But nothing in this act shall make such purchasers or their associates or such new corporation liable for any debt or claims, or contracts of the old corporation not expressly assumed in their contract of purchase at said judicial sale.

Mr. POWERS. It means, as to the rights of the mortgagee, he shall not be compelled to pay any debt except such as his mortgage is subject to. You can not compel the mortgagee of a farm to pay the mortgagor's debts unless those debts are paramount to the mortgage.

Mr. CONNOLLY. We could refuse to give him any new rights unless he did that.

Mr. POWERS. My friend from Illinois is too good a lawyer not to know that he could not have any new rights better than those which he has.

Mr. CONNOLLY. But we could refuse to give him a charter which would put him beyond the reach of the State courts.

Mr. POWERS. My friend would not ask us to legislate for a thing that the law protects everybody in already.

Mr. CONNOLLY. We have reported from the Judiciary Committee a measure providing for the reorganization of the Northern Pacific, and containing a requirement that they shall pay the debts of the old company.

Mr. POWERS. I understand that in the resolution relating to the reorganization of the Northern Pacific Railroad a specific regulation was made with reference to that matter, but it is wholly unimportant in this case, because these mortgages all antedate any debts created against this corporation.

Mr. BURTON of Missouri. Did not the original charter exempt the property, or certain property, of this road from taxation?

Mr. POWERS. I have not seen the original charter in full, but I think I can with perfect safety say that Congress never passed such a charter.

Mr. BURTON of Missouri. I know that at one time the road contested the right to levy a certain tax upon its property, but I can not now recall the result of the contest.

Mr. POWERS. Well, I think I can say, in answer to my friend, that Congress never has chartered a corporation of this kind and exempted it from taxation.

Mr. BURTON of Missouri. I may be confused in regard to the road. It may have been a road which was merged into this.

Mr. POWERS. States have sometimes passed such laws, but Congress never has, according to my recollection. Mr. Speaker, I reserve the balance of my time.

Mr. CONNOLLY. Before the gentleman sits down I wish to ask him another question. Has not this Atlantic and Pacific Railroad been running for some years as a part of the Southern Pacific system?

Mr. POWERS. Not at all.

Mr. CONNOLLY. To what system does it belong?

Mr. POWERS. To the Santa Fe system. The western division, from Albuquerque westward, is now a part of the Santa Fe system. It has no relation whatever to the Southern Pacific Railroad.

Mr. BRUMM. I understood the gentleman from Vermont to say that the provision here exempting these parties from liability for debts, etc., is inserted because the law would exempt them at any rate—that this being a first mortgage, and being basic, it could not be held liable for debts subsequently incurred. Now, that being the law, and the gentleman knowing it to be the law, what is the use of having such a provision in this bill?

Mr. POWERS. I will be perfectly frank with the gentleman and say that I do not know why that provision is in the bill. This bill came over from the Senate containing that provision.

Mr. BRUMM. But should it not be stricken out if there is no reason for having it in the bill?

Mr. POWERS. I think not, because it is entirely harmless; and if it is stricken out, my friend can see what will be the probable fate of the bill at this stage in the session.

Mr. BRUMM. The only question is whether there is not something hidden here.

Mr. POWERS. Oh, no. My friend will understand that this is a very important matter to the mortgagees below, and the bill having come to us from the Senate in this form, containing this provision, about which I feel as the gentleman does, we did not wish, at this late hour of the session, to run the risk of its failing, so we made no point about that.

Mr. HOPKINS. Mr. Speaker, I opposed this bill when the gentleman brought it up some time ago and asked unanimous consent for its consideration. My purpose in doing so was to force him to have the bill go to a committee, where it could be considered and amended if, in the judgment of the members of the House, amendments should be made. This is a bill for the reincorporation of an organization that first received its corporate authority in 1866, at a time when the Congress of the United States was giving extravagant donations to railroad companies, or proposed railroad companies, extending over different parts of the country. Gentlemen will remember that the date of this charter was only a year or two after the grants were made to the Central Pacific and the Union Pacific railroads. The termini of this road were to be Springfield, Mo., on the east and the Pacific Ocean on the west, and the capital stock was to be $100,000,000. The road was never built in accordance with the terms of the charter granted in 1866; neither was it completed under the terms of the amendment adopted in 1871. Mortgages were given, and it is claimed that those mortgages have been foreclosed.

Now, this bill proposes to give the purchasers under the foreclosure decree all the powers, rights, and authority that were granted to the original incorporators, including the land that was granted in aid of the construction of the road. A number of years ago the members of the House and of the Senate agreed upon a bill forfeiting a large portion of the lands granted to this road, but the company resisted that act, and has taken the question into the courts and is litigating it and undertaking to defeat the will of Congress in the matter of restoring these great tracts of land to the Government. Now, it seems to me that if this road is to be allowed to be incorporated under this bill, as proposed here, the corporation ought not to have the rights granted to the original incorporators. They do not pay for those rights. They get this road at a minimum price. The chartered rights, the rolling stock,

and the other interests which they get under the decree will be a full equivalent for all that they pay, even if the lands are permitted to revert to the United States. But under this bill they have, as I have just suggested, the same rights that the original corporators had. At the same time, all the obligations of those original corporators outside of these mortgage obligations are cut off by the decree; and the persons who purchase under that decree take the road, stripped from the obligations to which the original corporators would be subjected. I think, Mr. Speaker, that in this matter rights and obligations should be reciprocal. If the new company is to have the same rights that the original company enjoyed, it ought to assume the same obligations. Another reason why I oppose this bill is that under the motion to suspend the rules no amendment can be made to the measure.

Mr. POWERS. Will the gentleman yield a moment?

Mr. HOPKINS. I will.

Mr. POWERS. I think my friend has failed to notice the proviso in this bill.

Mr. HOPKINS. If I have failed to notice anything important as bearing on this question I shall be pleased to be corrected.

Mr. POWERS. The last proviso is—

That nothing herein contained shall be construed as making any additional grant of lands or other franchises to such successor corporation, or as a waiver of any rights of the United States now existing to enforce any forfeiture of lands heretofore granted to the said Atlantic and Pacific Railroad Company, or as in any manner affecting the vested rights of any settler or settlers on any of the lands heretofore granted to the Atlantic and Pacific Railroad Company or of any purchaser or purchasers of said lands from said company.

Mr. HOPKINS. Does not the gentleman see that by the very provision he has just read the right which belonged to the original corporators to resist forfeiture by the Government of the United States is conveyed to the new corporation? That is the effect of the express language of the clause which the gentleman has just read.

Mr. POWERS. Why should they not have that right?

Mr. HOPKINS. The point I am making is that there ought to be a provision here prohibiting this new company from prosecuting a proceeding in the courts to take those lands from the United States.

Mr. POWERS. Does the gentleman as a legislator on this floor propose to interfere with the right of people to go into the courts and establish their rights?

Mr. HOPKINS. These people are here asking for privileges which they claim are necessary.

Mr. POWERS. Suppose they are; does that give us the right to exact from them something which they are under no obligation to surrender—to practically levy blackmail?

Mr. HOPKINS. The persons constituting this new company have bought this road at a merely nominal figure; and there is no reason on earth why, acquiring the property in that way, they should have the same right that the original corporators had to litigate the question of forfeiture in the courts. The question is whether this vast territory which was granted to the original corporators should be given to this new company.

Now, Mr. Speaker, I yield seven minutes to the gentleman from Arkansas [Mr. TERRY].

Mr. TERRY. Mr. Speaker, this is a very important matter and one which really ought to have been considered by the Committee on the Judiciary. It involves questions which, as suggested by the distinguished gentleman from Illinois [Mr. HOPKINS], may gravely affect important rights of the United States Government. By this bill it is proposed to grant to the purchasers under foreclosure proceedings the right to take all the lands originally granted to the Atlantic and Pacific Railroad, and to use them in such way as the purchasers may deem proper. Under this bill all the coal and mineral lands (if there be such) along the right of way embraced in the great empire originally given to this company for nothing will become the property of this new company, which may organize itself virtually into a coal company and obtain a monopoly on the coal business and supply by furnishing discriminating facilities to themselves or those they may designate, and shutting out all others. In the great West—in Colorado and other Western States—this is one of the crying evils of the present day. Where the railroad company obtains possession of a coal mine and is allowed to operate the same, it can discriminate in favor of its own mines and against those owned by others so as to destroy competition, thus raising the price of this great necessity of civilization to whatever point the monopolists may please.

In the bill for the reorganization of the Northern Pacific Railroad Company which was referred to the Committee on the Judiciary that committee after careful consideration adopted amendment after amendment to protect the people against things of that kind. It was also provided that the company should pay its debts. Under this bill you permit this reorganized company to take all the benefits of the Government's bounty and to assume none of the burdens which should accompany the gift. This is not a measure which this House can afford to pass under suspension of the rules. Furthermore, in the Northern Pacific Railroad bill there was inserted by the Judiciary Committee a proviso requiring that company to submit itself to the jurisdiction of the State courts in the States through which the roads might pass. There is nothing of that kind in this bill. Under the pending measure this reorganized corporation, when sued by a citizen of any of the States or Territories, can drag him hundreds of miles to a Federal court in order to maintain his suit. Do gentlemen suppose that the people of that part of the country will look with any degree of toleration upon an act of Congress permitting an outrage of that sort upon their rights? What will they say to a House that is responsible for legislation of this character? I think the majority of this Congress, on that side of the House, should heed the warning given to them by the gentleman from Illinois and go slowly, considering well before passing such a bill.

I might go further, Mr. Speaker, but there are other gentlemen from the States specially interested in this matter who may wish to say something, and I will yield back to the gentleman from Illinois the time I have not consumed.

Mr. HALL. I wish to direct the attention of my friend from Arkansas, before he takes his seat, to page 2 of the bill, line 28, beginning with the word "but." I will read the paragraph to which I refer:

But nothing in this act shall make such purchasers and their associates, or such new corporation, liable for any debts or claims or contracts of the old corporation not expressly assumed in their contract of purchase in said judicial sale.

Now, if this is the common law, why should that clause be put into the bill?

Mr. TERRY. That is an express provision evidently put in to give them the rights and privileges which the old company possessed without requiring them to assume any of the obligations. It is simply emphasizing the point I was trying to make.

Mr. HOPKINS. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has seven minutes.

Mr. HOPKINS. Before concluding——

Mr. DOCKERY. If the gentleman will permit me, I desire to ask whether this bill has been submitted to the gentlemen representing any part of the State of Missouri through which the line of road runs?

Mr. HOPKINS. I am informed by one of the members from Missouri that it has not been.

Mr. DOCKERY. I have an impression that some of the Representatives from that State are opposed to the passage of the bill.

Mr. HOPKINS. Mr. Speaker, I think the objection I originally made comes with additional force to-day, that this bill ought not to go through under a suspension of the rule.

The gentleman from Arkansas [Mr. TERRY] has pointed out the fact that under the original act, if this bill becomes a law, this company will succeed to all of the rights and privileges of the old organization—the new company taking the place of the other organization—with a view to assuming charge and control of that great empire which the United States Government forfeited in 1886 and which is being resisted by this very company in the United States court to-day.

I desire to emphasize the fact that if these gentlemen seek to have a bill passed and are to be exempted from all of the obligations expressly as they are exempted from the obligations in this bill, as appears by reference to lines 28, 29, 30, 31, and 32 of the bill, that they should also be excluded from the great benefits that inured to the original corporation by reason of the land grants made by the Government.

Every person familiar with the condition of legislation relating to the great continental lines knows that that legislation went through the House without very great care, or such care as the importance of the subject seems now that it should have demanded, and that it gave millions upon millions of acres of land to these incorporators. And I see no reason at this late date, when we have plenty of lines of railroad between this and the Pacific Coast, to reincorporate the old company, reviving and giving new life to it, and give it the privilege of contesting in the courts the right to take these lands.

I trust the members of the House will defeat the bill to-day, and let the gentleman bring it up at the next session of Congress, where we can go into it fully, where it can be considered in the Committee of the Whole and amended so as to properly protect the interests of the United States. If it passes to-day it passes without amendment, with all these objectionable features embodied in it, precisely as it is presented here.

We have seen enough even in this desultory debate here to-day to know that the interests of the United States are not properly guarded and protected by the pending bill.

Mr. MITCHELL. Will the gentleman yield to me for a question?

Mr. HOPKINS. Yes, sir.

Mr. MITCHELL. I would like to ask the gentleman if he can

explain how it is that this provision embraced in lines 28, 29, 30, and 31 got into the bill? It seems to be a most extraordinary provision.

Mr. HOPKINS. I do not know, but I can understand, of course, that it was put in for the benefit of the company, or the proposed company.

Mr. WELLINGTON. Will the gentleman allow me to ask him a question?

Mr. HOPKINS. Certainly.

Mr. WELLINGTON. If this bill passes, would it not give to this corporation the powers and privileges which were conferred upon the old corporation, while at the same time it relieves them of all of the debts and obligations?

Mr. HOPKINS. That is contained in express terms in the bill.

Mr. WELLINGTON. I have so understood.

Mr. MCMILLIN. If the gentleman from Illinois will yield to me for a moment, I desire to submit a suggestion to the gentleman in charge of this bill. This bill relieves the new company from the obligations of the old company and gives it all of the rights of the old company. It seems to be a measure of vast importance, involving many interests; and it is proposed by the gentleman from Vermont to pass it under a suspension of the rules, when there is no opportunity for amendment. Neither is there an opportunity for an adequate explanation of the bill.

I ask the gentleman whether he is not willing to change the motion for a suspension of the rules and passage of the bill to a motion to fix the time for the consideration of the bill, so that it may be subject to amendment when it is taken up for consideration? That insures to him consideration of the bill. That insures to the House an opportunity to fully understand it, and insures to the country such a consideration as can not be had here now.

Mr. DOCKERY. Will the gentleman allow me just one word?

Mr. HOPKINS. I yield to the gentleman from Missouri.

Mr. DOCKERY. I only desire to say that I have not had an opportunity to examine the provisions of this bill. I do not know whether they are wise or unwise, but I do know there is no right of amendment under a motion to suspend the rules, and inasmuch as this bill affects, perhaps, the people of Missouri, I hope the House will vote down the motion, if it is insisted upon, to suspend the rules and pass this bill. I quite agree with the suggestion of the gentleman from Tennessee [Mr. MCMILLIN] that the motion should be changed so as to fix a time for consideration.

Mr. HOPKINS. I yield three minutes to the gentleman from Missouri [Mr. TRACEY].

Mr. POWERS. In view of the suggestion just made, I have no objection myself to the bill being postponed until Monday, immediately after the reading of the Journal, and that it be considered at that time, subject to such amendment as is proper to be made. I do not want to have it drop out. There is nothing in this bill, I can assure the House, but what is perfectly proper when it is understood, and for that reason I am entirely willing that the House should have all the opportunity that is desired to consider it.

Mr. MCMILLIN. It strikes me that would be the better course to pursue.

Mr. TRACEY. I believe I am entitled to the floor.

The SPEAKER. The gentleman from Missouri [Mr. TRACEY] is entitled to the floor, if he claims it.

Mr. TRACEY. Mr. Speaker, I desire to say to the members of the House that this bill affects my own district, or at least I believe it does. The road to which the land grant was originally given, and which this bill affects, runs through my district. The people whom I represent are interested. It would certainly be wrong and unjust, it seems to me, to pass a bill of this kind in this way, which gives no member——

Mr. POWERS. Will the gentleman yield to me for a moment? He is entirely mistaken in supposing this road runs through his district. No part of it which is affected by this bill is in Missouri. It is simply the central and western divisions of the road, running through the Indian Territory and west, which are affected.

Mr. TRACEY. This affects the Atlantic and Pacific Railroad?

Mr. POWERS. Very good; but if you will read the bill——

Mr. TRACEY. The Atlantic and Pacific Railroad begins at my town.

Mr. POWERS. I know, but this bill does not affect any part of the road in your town nor in your State.

Mr. BRUMM. It touches the road, however.

Mr. POWERS. No; it does not touch the road. That has gone into other hands. I want to say that this mortgage is not on the Missouri portion of the road.

Mr. TRACEY. The purchasers under the foreclosures and sales that have heretofore taken place are affected by this bill, and I want time, as a representative of those who I think are affected by the bill, to investigate it and to amend it if necessary, so as to protect the interests that I believe I represent; or I want to have an opportunity to convince myself that the interests I represent are not affected by the bill. I think I am entitled to that, and I trust the bill will be postponed until I can have that opportunity.

Mr. HENDERSON. Will the gentleman from Illinois [Mr. HOPKINS] yield to me for a minute?

Mr. HOPKINS. I yield to the gentleman from Iowa [Mr. HENDERSON].

Mr. HENDERSON. Mr. Speaker, I do not want to discuss this bill, but I should like to say to the membership of this House that if we want to get away at an early date we should all stay here to-day and attend to the business that will be brought before the House. We have conference reports and other matters coming in which are of great importance, and if we keep together and attend to our work we are going to get away very soon. Otherwise we shall be here for several days.

Mr. HOPKINS. What would be your suggestion about this bill?

Mr. HENDERSON. I am not discussing that now.

Mr. POWERS. I yield two minutes to the gentleman from Kansas [Mr. BLUE].

Mr. BLUE. Mr. Speaker, I am convinced from this discussion that very many gentlemen on the floor of the House are not conversant with this bill or its features. They evidently have not examined either the bill or the report of the committee. I apprehend, sir, that no gentleman here desires to do any injustice. Neither, as I understand it, is it the desire of those interested in having this bill become a law to take any undue advantage. There may be some omissions that ought to be supplied. If this original charter does not provide for making this corporation a citizen of each of the States and Territories through which it passes, that amendment should go on this bill. Gentlemen are mistaken when they say that this bill provides for the bondholders to reorganize. It provides that the purchasers under this mortgage foreclosure may reorganize. It is entirely likely, I suppose, that the bondholders may become the purchasers, but that is not necessarily so. I think that the provisions of the latter part of this bill are amply sufficient to protect the rights of all parties. I do not apprehend that any gentleman here, when he considers this matter fully, will wish to compel a reprisal by saying that the rights which are claimed by the original corporation must all be surrendered, and that a suit now pending in the courts for the purpose of determining the meaning of a law shall be dismissed before this bill becomes a law.

It may be doing injustice to defeat this bill, because this is for the purpose, as I understand it, of reorganization, and it is an imperative necessity; but in the interest of fairness, so that all may understand it, I trust that the suggestion of the gentleman from Tennessee will be followed. In that way the defeat of the bill may be prevented, and it can be modified to suit all parties.

Mr. BRUMM. Will the gentleman permit me to ask him a question?

Mr. BLUE. Certainly.

The SPEAKER. The time has expired upon both sides.

Mr. FARIS. Mr. Speaker, I would like to suggest to my colleague in charge of the bill that he withdraw it, and let it go over until next session.

Mr. POWERS. In accordance with the suggestion that has been made, I will move that the bill be postponed until Monday, immediately after the reading of the Journal.

The SPEAKER. The difficulty about that is that it would disarrange the whole proceedings of the House.

Mr. DINGLEY. Such a motion would not be in order—to postpone further consideration of a bill under an order for suspension of the rules that continues only to-day.

Mr. POWERS. My desire is to substitute for the original motion an understanding that the bill be considered on Monday.

Mr. MCMILLIN. That is what I would do.

Mr. DINGLEY. I hope that will not be done, and that no assent of that kind will be given on a bill of that character.

Mr. DOCKERY. Let it go over until next session.

Mr. POWERS. Mr. Speaker, I withdraw the bill from consideration.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Vice-President had appointed, in compliance with the act approved June 3, 1896, entitled "An act to repeal section 61 of an act to reduce taxation, to provide revenue for the Government, and for other purposes, which became a law August 28, 1894," Mr. PLATT, Mr. ALDRICH, and Mr. JONES of Arkansas members of the joint select committee on the part of the Senate to consider all questions relating to the use of alcohol in manufactures and arts free of tax, etc.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes; had further insisted upon its amendments numbered 2,

3, 4, 6, 7, 8, 13, 15, 16, 17, 32, 61, 97, 109, 122, 123, 124, 146, 147, and 161, disagreed to by the House of Representatives; had asked a further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. ALLISON, Mr. HALE, and Mr. GORMAN as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposee.

A further message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed without amendment bills of the following titles:

A bill (H. R. 6826) granting a pension to Rhoda Augusta Thompson, daughter of the late Thaddeus Thompson, a private in the Revolutionary war;

A bill (H. R. 6603) to pension the minor children of Patrick F. Reynolds; and

A bill (H. R. 1826) granting a pension to Henry Prince.

A further message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed with amendments the bill (H. R. 6259) to expedite the delivery of imported parcels and packages not exceeding $500 in value, asked a conference with the House on the bill and amendments, and had appointed Mr. ALDRICH, Mr. ALLISON, and Mr. VEST as the conferees on the part of the Senate.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, the following Senate bills were taken from the Speaker's table and referred by the Speaker as follows:

A bill (S. 1501) granting an increase of pension to Mrs. Lucy Alexander Payne, widow of Capt. J. Scott Payne, Fifth United States Cavalry—to the Committee on Pensions.

A bill (S. 2989) to increase the pension of Caroline S. Baker—to the Committee on Pensions.

ENROLLED BILLS SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

A bill (H. R. 4020) granting an increase of pension to Mrs. William Loring Spencer;

A bill (H. R. 4888) for the relief of George Hager;

A bill (H. R. 8469) to authorize the Baltimore and Washington Transit Company of Maryland to enter the District of Columbia;

A bill (H. R. 7919) granting a site for the erection and maintenance of a charity hospital by the city of Biloxi, Miss.;

A bill (H. R. 8248) to increase the pension of Mrs. Emily E. Cash;

A bill (H. R. 2143) granting a pension to Mrs. Emily M. Van Derveer, widow of the late Brig. Gen. Ferdinand Van Derveer;

A bill (H. R. 9275) approving certain acts of the legislative assembly of the Territory of New Mexico, authorizing the issue of certain bonds of said Territory, and for other purposes;

A bill (H. R. 5258) granting an honorable discharge to John B. Besler;

A bill (H. R. 5279) granting a pension to Jerusha H. Brown;

A bill (H. R. 6607) for the relief of Helen Larned; and

A bill (H. R. 4921) to relieve the North Georgia Agricultural College from the payment of $450 for damaged gun.

VETO MESSAGE.

The SPEAKER. The Chair desires to lay before the House the following message of the President of the United States.

The Clerk read as follows:

To the House of Representatives:

I hereby return without my approval House bill No. 8293, entitled "An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes."

To the extent that the Constitution has devolved upon the President a participation in legislation, I suppose his action on bills presented to him for approval involves a duty to be performed, like others pertaining to his office, with care and circumspection, and in full view of his responsibility to the people and his obligation to subserve the public welfare. It is difficult to understand why, under the Constitution, it should be necessary to submit proposed legislation to Executive scrutiny and approval except to invoke the exercise of Executive judgment and invite independent Executive action.

The unpleasant incidents which accompany the use of the veto power would tempt its avoidance if such a course did not involve an abandonment of constitutional duty and an assent to legislation for which the Executive is not willing to share the responsibility.

I regret that I am constrained to disapprove an important appropriation bill so near the close of the present session of Congress. I have, however, by immediate action after the receipt of the bill endeavored to delay as little as possible a reconsideration of this proposed legislation, though I am thus obliged to content myself with a less complete explanation of my objections than would otherwise be submitted.

This bill is, in many of its features, far removed from a legitimate deficiency bill, and it contains a number of appropriations which seem to me to be exceedingly questionable. Without noticing in detail many of these items, I shall refer to two of them which in my judgment justify my action in the premises.

The bill appropriates $1,027,314.09 for a partial payment upon claims which originated in depredations upon our commerce by French cruisers and vessels during the closing years of the last century. They have become quite familiar to those having Congressional experience, as they have been pressed for recognition and payment, with occasional intervals of repose, for nearly one hundred years.

These claims are based upon the allegations that France, being at war with England, seized and condemned many American vessels and cargoes in violation of the rules of international law and treaty provisions, and contrary to the duty she owed to our country as a neutral power and to our citizens; that by reason of these acts claims arose, in favor of such of our citizens as were damnified, against the French nation, which claims our Government attempted to enforce, and that in concluding a treaty with France in the year 1800 these claims were abandoned or relinquished in consideration of the relinquishment of certain claims which France charged against us.

Upon these statements it is insisted by those interested that we as a nation having reaped a benefit in our escape from these French demands against us through the abandonment of the claims of our citizens against France, the Government became equitably bound as between itself and its citizens to pay the claims thus relinquished.

I do not understand it to be asserted that there exists any legal liability against the Government on account of its relation to these claims. At the term of the Supreme Court just finished the Chief Justice, in an opinion concerning them and the action of Congress in appropriating for their payment, said: "We think that payments thus prescribed to be made were purposely brought within the category of payments by way of gratuity—payments of grace and not of right."

From the time the plan was conceived to charge the Government with the payment of these claims they have abided in the atmosphere of controversy. Every proposition presented in their support has been stoutly disputed and every inference suggested in their favor has been promptly challenged.

Thus, inasmuch as it must, I think, be conceded that if a state of war existed between our country and France at the time these depredations were committed, our Government was not justified in claiming indemnity for our citizens, it is asserted that we were at the time actually engaged in war with the French nation. This position seems to be sustained by an opinion of the Attorney-General of the United States, written in 1798, and by a number of decisions of the Supreme Court delivered soon after that time.

We had certainly abrogated treaties with France, and our cruisers and armed ships were roaming the seas capturing her vessels and property.

So, also, when it is asserted that the validity of these claims was acknowledged in the treaty negotiations by the representatives of France, their declarations to a contrary purport are exhibited.

And when it is alleged that the abandonment of these claims against France was in consideration of great benefits to the Government, it is as confidently alleged that they were in point of fact abandoned because their enforcement was hopeless and that even if any benefit really accrued to us by insistence upon their settlement in the course of diplomatic negotiation, such result gave no pretext for taxing the Government with liability to the claimants.

Without noticing other considerations and contentions arising from the alleged origin of these claims, a brief reference to their treatment in the past and the development of their presentation may be useful and pertinent.

It is, I believe, somewhat the fashion in interested quarters to speak of the failure by the Government to pay these claims as such neglect as amounts to repudiation and a denial of justice to citizens who have suffered. Of course the original claimants have for years been beyond the reach of relief; but as their descendants in each generation become more numerous the volume of advocacy, importunity, and accusation correspondingly increases. If injustice has been done in the refusal of these claims, it began early in the present century and may be charged against men then in public life more conversant than we can be with the facts involved, and whose honesty and sense of right ought to be secure from suspicion.

As early as 1802 a committee of the House of Representatives reported the facts connected with these claims, but apparently without recommendation. No action was taken on the report. In 1803 a resolution declaring that indemnity ought to be paid was negatived by a vote of the same body. A favorable committee report was made in 1807, but it seems that no legislative action resulted. In 1818 an adverse report was made to the Senate, followed by the passage of a resolution declaring "that the relief asked by the memorialists and petitioners ought not to be granted." In 1822 and again in 1824 adverse committee reports on the subject were made to the House, concluding with similar resolutions.

The presumption against these claims arising from such unfavorable reports and resolutions and from the failure of Congress to provide for their payment at a time so near the events upon which they are based, can not be destroyed by the interested cry of injustice and neglect of the rights of our citizens.

Until 1846 these claims were from time to time pressed upon the attention of Congress with varying fortunes, but never with favorable legislative action. In that year, however, a bill was passed for their ascertainment and satisfaction, and $5,000,000 were appropriated for their payment. This bill was vetoed by President Polk, who declared that he could "perceive no legal or equitable ground upon which this appropriation can rest." This veto was sustained by the House of Representatives.

Nine years afterwards and in 1855 another bill was passed similar to the one last mentioned, and appropriating for the settlement of these claims a like sum of money. This bill was also vetoed, President Pierce concluding a thorough discussion of its demerits with these words: "In view of what has been said, there would seem to be no ground on which to raise a liability of the United States unless it be the assumption that the United States are to be considered the insurer and the guarantor of all claims of whatever nature which any individual citizen may have against a foreign nation." This veto was also sustained by the House of Representatives.

I think it will be found that in all bills proposed in former times for the payment of these claims, the sum to be appropriated for that purpose did not exceed $5,000,000. It is now estimated that those already passed upon, with those still pending for examination in the Court of Claims, may amount to $25,000,000. This indicates either that the actual sufferers or those nearer to them in time and blood than the present claimants underestimated their losses or that there has been a great development in the manner of their presentation.

Notwithstanding persistent efforts to secure payment from the Government and the importunity of those interested, no appropriation has ever been made for that purpose, except a little more than $1,300,000, which was placed in the general deficiency bill in the very last hours of the session of Congress on March 3, 1891.

In the long list of beneficiaries who are provided for in the bill now before me on account of these claims, 152 represent the owners of ships and their cargoes and 186 those who lost as insurers of such vessels or cargoes.

These insurers by the terms of their policies undertook and agreed "to bear and take upon themselves all risks and perils of the seas, men-of-war, fire, enemies, rovers, thieves, jettison, letters of mart and counter mart, surprisals, takings at sea, arrests, restraints, and detainments of all kings, princes, or people of what nation, condition, or quality whatsoever."

The premiums received on these policies were large, and the losses were precisely those within the contemplation of the insurers. It is well known that the business of insurance is entered upon with the expectation that the premiums received will pay all losses and yield a profit to the insurance in addition; and yet without any showing that the business did not result in a profit to these insurance claimants, it is proposed that the Government shall indemnify them against the precise risks they undertook, notwithstanding the fact that the money appropriated is not to be paid except "by way of gratuity—payments as of grace and not of right."

The appropriations to indemnify against insurance losses rest upon weaker grounds, it seems to me, than those of owners; but in the light of all the facts and circumstances surrounding these spoliation claims, as they are called, none of them, in my opinion, should be paid by the Government.

Another item in this bill which seems to me especially objectionable is an appropriation in favor of Charles P. Chouteau, survivor, etc., of $174,445.75 in full satisfaction of all claims arising out of the construction of the ironclad steam battery *Etlah*.

The contract for the construction of this battery was made by the Government with Charles W. McCord during the war, and he was to be paid therefor the sum of $386,000. He was paid this sum and $210,991 for extras, and in May, 1866, gave his receipt in full. The assignee of McCord in bankruptcy assigned to Chouteau and his associates in 1868 all claims of McCord against the United States for the precise extras for which he had receipted in full two years before. Chouteau brought suit in the Court of Claims for such extras and was defeated. I can not gather from the facts I have been able to collect concerning this appropriation that it is justified on any ground.

In 1891 my immediate predecessor vetoed a bill allowing the matter to be examined again by the Court of Claims.

If the additional payment proposed in this bill was made, the cost of the battery in question would be almost double that of the contract price.

I have determined to submit this incomplete presentation of my objections to this bill at once in order that the Congress may act thereon without embarrassment, or the interruption of plans for an early adjournment.

GROVER CLEVELAND.

EXECUTIVE MANSION, *June 6, 1896.*

[Applause.]

Mr. CANNON. Mr. Speaker, I would be glad, after a minute of observation, to have a vote that will dispose of the veto. I want to say that, in my judgment, if amendment numbered 233 on the general deficiency bill, covering 700 items, aggregating in round numbers $2,000,000, had been fully understood by any and all members of the House in all its provisions the House would not have concurred in that amendment. I did the best I possibly could, along with other gentlemen, against concurrence, as gentlemen will recollect. I do not now expect to discuss the merits of the 700 provisions. I have neither the knowledge nor the time. That amendment could not get in on any House bill except by unanimous consent. The Senate picked them out, put them in an omnibus, and sent the matter here with their compliments.

Now, I do not believe that any member on the floor of this House would have voted to concur, whatever he might think of the French spoliations claims, whatever he might think of the claims under the Bowman Act, if he had known that, fastened as a leech, under false pretenses, that Chouteau claim was on. The Chouteau claim is there. A brief statement will cover it. I have had occasion to examine into it since. It was paid in full. Full receipt given by the contractors; suit in the Court of Claims in 1873, and the contractor or his assignees defeated. A well-considered opinion was rendered. It was sent by the Committee on Claims of the House under the Bowman Act to the Court of Claims and turned down, the Court of Claims refusing to take jurisdiction, saying that the Committee on Claims had no power to send it to them. Now, then, so much for that—$174,000! It is not necessary for me to discuss it. I will not take time.

There are others, some of which I hold in my hand, and I have examined them. They are not under the Bowman Act and are without merit and without equity.

Now, the President, a coordinate branch of the Government, vetoed it, refuses to concur; and it is for us to pass the bill over the veto or to ratify the veto. And in the event it fails to get the two-thirds, then to take up a deficiency bill that will provide for the ordinary expenses of the Government for the remainder of the year.

I want to say to the House that I have here in my hands, prepared with great care, a bill concerning which, if the Speaker will recognize me and this bill should not pass over the President's veto, I will move to suspend the rules and pass a deficiency bill that is precisely as the deficiency bill that is vetoed, except that it is freed of these 700 items contained in amendment numbered 233, in which the House concurred.

Mr. SAYERS. Will the gentleman allow me?

Mr. CANNON. Certainly.

Mr. SAYERS. In other words, I understand the gentleman from Illinois to say that he has in his hand, if the Speaker will recognize him, a deficiency bill, word for word and figure for figure, as passed both Houses of Congress, leaving out the Senate amendment which includes the French spoliation claims, the Southern war claims, the Chouteau claim, and about $11,000 of another claim. In other words——

Mr. WALKER of Massachusetts. What other claim?

Mr. SAYERS (continuing). There are four distinct classes of claims in this single Senate amendment.

Mr. CANNON. I will answer. I believe I have the floor.

Mr. RICHARDSON. I would like to ask the gentleman a question.

Mr. CANNON. One moment. Gentlemen ask what other. To Fish & Co., assignees; Sutro & Co., assignees; and then to Charles W. Roberts, not Southern war claims, and without merit, and all large amounts; but I do not expect to go into that matter. There is not time during the remainder of this session to discuss the merits of these claims. I say to the gentleman, in reply to his question, the bill which I hold in my hand is the deficiency bill as it passed the House without that amendment 233 that he refers to.

Mr. SAYERS. My question was asked in order that members might have exact information as to what they would be called upon to vote on in case the veto should be sustained and the Speaker should then recognize the gentleman from Illinois to move to suspend the rules and pass another deficiency bill.

Mr. ADAMS. Will the gentleman from Illinois permit a question?

Mr. CANNON. In a minute. Mr. Speaker, if the House concurs with the President in his veto or refuses to pass the deficiency bill over his veto—a question on which, as I understand, we shall vote in the near future—then, under a motion to suspend the rules, this bill, which, as I have said, has been prepared with great care and which provides for the necessary deficiencies to carry on the Government, can be passed here inside of sixty minutes, and, if the Senate is equally prompt, it can be sent to the White House before the sun goes down.

Mr. ADAMS. It takes a two-thirds vote to suspend the rules. Now, suppose you do not get that, what position will you be in then?

Mr. CANNON. Oh, suppose that Congress fails to appropriate the money to pay the ordinary expenses of the Government!

Mr. ADAMS. We have appropriated it.

Mr. CANNON. If Congress fails to appropriate the money necessary to carry on the Government unless by attaching to the bill 700 items of claims, then there is nothing on the Lord's earth but a wholesome, honest, public sentiment to fall back upon. [Applause.]

Mr. WILLIAMS. Will the gentleman permit a question?

Mr. CANNON. I will hear the gentleman from Tennessee first, who first asked me to yield.

Mr. RICHARDSON. The question I desire to ask the gentleman from Illinois is this: The President having vetoed this bill, which has passed both Houses of Congress, does not the gentleman think that it is but fair to report his new deficiency bill from his committee containing every item in the first bill to which the President has not objected?

Mr. CANNON. No.

Mr. RICHARDSON. In other words, the President has made no objection to the appropriation to pay the claims of loyal people in the South, and I insist that the gentleman from Illinois ought not to come in here now and undertake to exclude those claims, inasmuch as the President has made no objection to them.

Mr. CANNON. The President expressly says that he has not had time to examine all the matters in the bill, nor have any of us had time to do it, and if the Committee on Appropriations should accept the suggestion of the gentleman from Tennessee and report a bill covering the Southern war claims, a single point of order would strike every one of them out.

Mr. RICHARDSON. Not upon a motion to suspend the rules.

Mr. CANNON. Well, the Speaker would have to recognize somebody other than myself to move to suspend the rules to pass a bill covering any of the claims embraced in amendment numbered 233 sent here from the Senate. [Applause.]

Mr. RICHARDSON. The President does call attention to other claims in the bill, and it is obvious that he did not intend to object to these Southern war claims, because, while they amount to some $548,000, he does not mention them, but does call attention to a claim which amounts only to a little over $170,000, a much less sum.

Mr. CANNON. Now, Mr. Speaker, I will yield to the gentleman from Mississippi.

Mr. WILLIAMS. The question I desired to ask would have been pertinent to what the gentleman had just been saying when I asked him to yield, but it would not be pertinent or interesting now.

Mr. CANNON. Very well. I yield five minutes to the gentleman from Pennsylvania [Mr. MAHON].

Mr. MAHON. Mr. Speaker, am I recognized in my own right?

The SPEAKER. The gentleman is recognized for five minutes.

Mr. MAHON. I want ten.

Mr. CANNON. I can not yield the gentleman more than five minutes.

Mr. MAHON. Mr. Speaker, I do not propose to discuss over again at this time the merits of the French spoliation claims. I simply say that I will put against the gentleman at the other end

of the Avenue men like Calhoun and Webster and Clay, men who were among the greatest lawyers that ever graced the bar of this nation, and who went upon record without hesitation over and over again to the effect that this Government, not as a matter of charity, not as a gratuity, but as a bounden duty, ought to pay those claims. I am willing to take my teaching on all legal questions from men like Webster and Calhoun rather than from the gentleman who now occupies the Presidential chair. [Applause.] But, Mr. Speaker, as I have said, I have not time now to discuss again the merits of the French spoliation claims. I simply want to call attention to the fact that these claims to the amount of $1,085,240.43 were passed by the Fifty-first Congress, a Republican Congress presided over by the present Speaker, and were signed by a Republican President, a man who has always held and will hold the highest esteem of the people of this country as a lawyer and as a statesman.

Mr. HENDERSON. And they were beaten at the next session out of sight.

Mr. MAHON. Not on this question. Then, again, Mr. Speaker, in the deficiency bill for 1892 these claims to the amount of $102,440.74 were contained, and the bill was duly approved by President Harrison. In the deficiency bill for 1893 I find French spoliation claims to the amount of $19,776, and Mr. Cleveland himself did not object to them at that time. In the deficiency bill for 1894, which he signed, there were claims of this character to the amount of $4,190.16. In the deficiency bill for 1895, which he signed, there were claims of this character, French spoliation claims, to the amount of $21,830—the amount that had been passed upon by the court up to that time. I have thrown this statement into tabular form, as follows:

Statement showing amount of money appropriated by Congress for the payment of "French spoliation claims."

For the fiscal year—	Approved by—	Amount.
1891	President Harrison	$1,085,240.43
1892	do	102,440.74
1893	President Cleveland	19,776.00
1894	do	4,190.16
1895	do	21,830.00
Total		1,233,477.32

This bill which the President has vetoed also contains appropriations to pay claims arising under the Bowman Act. Appropriations for the payment of such claims have been heretofore made by Congress and approved by President Harrison and President Cleveland as follows. Congress has appropriated the following amounts to pay claims allowed under the provisions of the Bowman Act, to wit:

Congress.	Approved by—	Amount.
Forty-ninth	President Cleveland	$8,627.98
Fiftieth	do	119,510.75
Fifty-first	President Harrison	573,763.30
Fifty-second	do	597.00
Fifty-third	President Cleveland	48,528.38
Total		751,027.41

Claims arising under the terms of the Tucker Act have been approved by the court and paid by Congress to the amount of $4,525. The total amount paid under these acts is $11,934,721.69.

In the present Congress bills have been passed and approved by President Cleveland to pay the claims of John G. Shipman, $17,811.96; Sarah Case, administratrix, $475, and John Biglow, $284.66.

The total amount of French spoliation claims approved by President Cleveland is $56,000. The total amount of claims arising under the Bowman Act approved by him is $187,207.75.

Now, Mr. Speaker, the Senate of the United States and this House have by a majority vote decided to pay a certain amount of these claims. This is not a question for the President of the United States to settle. He has not only repudiated his own party, he has repudiated the courts of this Government; he is now repudiating the Congress of the United States and his own action.

Mr. Speaker, even if I had voted against this amendment when acted on in the House, I would, after a majority of the House and the Senate had put it upon the bill, stand by the dignity of this House and teach the occupant of the White House that Congress has its function to perform and he has his. If we propose to allow him to dictate to us what bills we should pass and what we should not pass we might as well surrender the whole business to him and go home.

The gentleman from Illinois has a bill prepared as a substitute for the one now returned by the President. I do not know what may finally have been done in committee of conference upon some of the amendments of the Senate, but I know in the deficiency bill as it came from the Senate there were, outside of the amendment we are now discussing, war claims to the amount of $200,000 carried by that bill. Whether they are in it to-day or not I can not say; I do not know whether they were stricken out in conference.

Mr. CANNON. To what does the gentleman refer?

Mr. MAHON. I refer to war claims that were on this bill as it came from the Senate, and as it went to the committee of conference—war claims outside of those embraced in the amendment we are discussing.

Mr. CANNON. I do not know of any war claim such as the gentleman refers to that is in the bill.

Mr. MAHON. I say they were among the amendments to the bill when it came from the Senate.

Mr. CANNON. I was a member of the conference committee, and I think there is no such war claim upon the bill.

Mr. MAHON. Well, they were in the bill as it came from the Senate.

Mr. CANNON. Has the gentleman read the bill since the conference committee agreed to it?

Mr. MAHON. No, sir; I have not had time to do so, and I do not propose, if my vote can prevent it, to allow you to pass through this House under a suspension of the rules a bill which no one else has had an opportunity to lay his hands on. [Applause.]

Mr. CANNON. I did not expect to get the gentleman's vote.

Mr. MAHON. The bill of the gentleman has not been printed and I have had no chance to examine it. I ask him whether there are in the bill any items covering claims growing out of the war?

Mr. CANNON. As I understand, not.

Mr. MAHON. Is the Grant case?

Mr. CANNON. No. Now ask about another case.

Mr. MAHON. I will recall other cases in a moment. Claims of that kind were on the bill as it came from the Senate.

Mr. CANNON. They are not in the bill as passed by the conference committee.

Mr. MAHON. I say to the gentleman that in the bill as it came from the Senate there were war claims outside of the big Senate amendment. I have not had opportunity to examine the bill that the gentleman proposes to present. I simply wanted to know as a matter of information whether such claims are in the bill now.

Mr. CANNON. Does the gentleman from Ohio [Mr. GROSVENOR] desire some time?

Mr. GROSVENOR. Yes, sir.

Mr. CANNON. I yield five minutes to the gentleman.

Mr. GROSVENOR. Mr. Speaker, I do not know which to admire most—the enormous capacity of the President of the United States in being able to write such a message as that in the few brief hours that have passed since the delivery to him of the deficiency appropriation bill, or the wonderful resources of the Appropriations Committee, who can under this new system of illumination—these rays that penetrate the minds of other people——

A MEMBER. "X rays."

Mr. GROSVENOR. X rays—who can thus be prepared on this very brief notice with a bill which just fits into the veto message of the distinguished President of the United States. [Laughter.] That shows that we have a mighty country.

A MEMBER. And mighty men in it.

Mr. GROSVENOR. It shows that we are capable of meeting almost any possible emergency that can happen. We are told by the public prints—and I suppose we have a right to rely on them—that this bill had not been signed by the Vice-President of the United States until some time during the hours of darkness last night.

Mr. MAHON. It was signed this morning at the depot.

Mr. GROSVENOR. I understand that the bill was signed by the Vice-President at the depot this morning; and in the short space of time that has elapsed between the arrival of that distinguished functionary and the appearance in this body of the genial messenger from the White House the President of the United States, having acquired information in the public way that he has, has sent here a rehashing of all the stale old repudiated arguments upon this question. He has gone back to his Democratic predecessors of nearly half a century ago; but he has failed to state how often the greater men of this country, in the Senate and the House, have approved of these French spoliation claims. He has made two distinct mistakes of fact. In the first place, he cites the decision of the Attorney-General of the United States, made, as he says, in 1798, before this treaty had been made between France and the United States, giving his opinion as to the legal efficacy of it. Then again he says there are in this bill 180 claims of insurance companies for losses upon vessels caused by these spoliations; and there is not one such claim.

We have a President of the United States who, in vetoing a bill, makes against it allegations of that character, not one word of which is justified by the facts of the case. He points out that there are 180 claims for insurance losses on these vessels, and then uses the old, stale, stock argument that these insurances were put at a rate that justified the extra hazard of the service in those

times. And yet the Senate has carefully excluded every one of them, and in the debate on this floor the question was put directly to the gentleman from Pennsylvania [Mr. ADAMS]; and when, in great triumph, one member pointed out that some insurance company had a claim, it was discovered to be a company organized nearly a hundred years after the claims originated, and was simply the guarantor on the administration of an estate in which the claim, or one of the claims, was involved. And the President comes here and repeats that statement.

Mr. Speaker, I have only this to say: This particular occupant of the Executive chair has done more to bring into disrepute and unpopularity in the United States the power conferred on the President to veto bills than all of his predecessors combined, because he has defied public opinion; he has defied the opinion of the lawmaking branch of the Government; he has defied the power to which has been assigned, under the Constitution, the sole power to originate money bills, and he has done it so often that the people of this country are delighted to think that they may count on the fingers of their two hands, and with a surplus left over, the length of time that he can thus tyrannize over the people's wishes in this regard. [Applause on the Republican side.] He has made more vetoes, ten to one, than all of his predecessors combined; and I suppose he justifies it under his statement in the message sent here a few days ago in which he says that patriotism is at a low ebb. But it will be news to the country that this President is now upholding the flag of patriotism. [Applause on the Republican side.]

We have been unable to supply the demands of the country for money. The fact might as well be recognized one time as another that the advent of the Democratic party into power has placed the country into a substantial condition of bankruptcy. Labor is unemployed because we are buying our goods abroad. Money is piling up in the great money centers, but lying idle for want of employment.

I append here a statement from official sources showing the imports of merchandise into the United States during the fiscal year 1894 and the calendar year 1895. This statement will show where our money goes and why our producers are idle:

Comparative statement of the imports of merchandise into the United States during the fiscal year 1894, and the calendar year 1895.

Fiscal year ended June 30, 1894; Wilson law began operation August 28, 1894; calendar year began January 1, 1895. Compiled by O. P. Austin, from official records.]

Articles.	Fiscal year 1894, last full official year under McKinley law.		Calendar year 1895, first full official year under Wilson law.

Mr. DOCKERY. Will the gentleman from Illinois yield to me for a few moments?

Mr. CANNON. I will yield two minutes to the gentleman from Missouri [Mr. DOCKERY], then to my colleague on the committee [Mr. SAYERS], and will follow that by two minutes to the gentleman from Pennsylvania [Mr. BRUMM], after which I will occupy two minutes myself, and then I will take the sense of the House on the demand for the previous question.

Mr. DOCKERY. Mr. Speaker, I want to say but one thing; that is, to emphasize the suggestion of the President that bills carrying appropriations for the necessary support of the Government should not be permitted to degenerate into general claims bills. And on that ground, if for no other reason, I shall sustain the veto of the President. [Applause.]

This general deficiency bill, providing appropriations for the collection of customs dues and for maintaining the various branches of the public service, is loaded down with an amendment carrying 700 items in all of claims put on the bill by a coordinate branch of the legislative department. Against such a policy I earnestly protest, and will sustain the veto of the President, and I believe and trust the House will. [Renewed applause.]

Mr. CANNON. I yield now two minutes to the gentleman from Texas [Mr. SAYERS].

Mr. SAYERS. Mr. Speaker, I sustain the veto of the President on two grounds. One is that the claims—four classes of them, one class of which has never appeared on a general appropriation bill before, at least since I have been a member of Congress—are involved in a single amendment, and I believe that such action is altogether unjustifiable.

In the second place, I think that his objections to the French

spoliation claims and to the Chouteau claim stand upon substantial grounds; for which reasons, if for none other, I will vote to sustain the veto. [Applause.]

Mr. CANNON. I yield two minutes to the gentleman from Pennsylvania [Mr. BRUMM].

Mr. BRUMM. Mr. Speaker, I simply want to say that on general principles I have grave doubts, and had all along, whether it was a proper policy to put the French spoliation claims and the other claims to which reference has been made by the gentleman from Illinois on this bill. As chairman of the Committee on Claims of this House I questioned it all along, and I question it now.

But I rose more especially to say that the assertions of the President with reference to the French spoliation claims are not errors. Setting aside the billingsgate he indulges in——

Mr. SAYERS. Mr. Speaker, I call the gentleman to order. He has no right to refer to the President of the United States in such manner.

Mr. BRUMM. I am entirely responsible for what I assert.

Mr. SAYERS. Oh, your responsibility amounts to nothing.

Mr. BRUMM. And I repeat my assertion, with a full sense of my responsibility.

Mr. SAYERS. A responsibility which does not amount to anything.

Mr. BRUMM (continuing). And his declaration as to the existence of war between this country and England at that time is absolutely false; and when he cites the decision of a Chief Justice he cites one that was rendered, as already stated, before the treaty negotiations were entered into——

Mr. GROSVENOR. You mean the Attorney-General, not the Chief Justice?

Mr. BRUMM. The Attorney-General; but the decision of the court was before the correspondence between this country and France was unearthed, and before we had possession of it. Therefore I say that it is deceptive; it was intended as a cheat and a fraud and a falsehood, to go before this country. That is all I have got to say about it.

Mr. SAYERS. I desire a minute or two now. The language of the gentleman from Pennsylvania [Mr. BRUMM] is not only unparliamentary but it is absolutely indecent. [Applause on the Democratic side.] The President of the United States, in his reference to the French spoliation claims, has quoted the opinion of an Attorney-General who was Attorney-General at the very time——

Mr. BRUMM. Before the facts were known.

Mr. SAYERS (continuing). At the very time when these claims were accruing, and the question is whether the Attorney-General in the year 1798 or the gentleman from Pennsylvania is the better qualified to judge. I must protest, Mr. Speaker, against the gentleman from Pennsylvania or any other member upon this floor using such language with reference to a coordinate branch of the Government, and especially since that language is unparliamentary and discourteous.

Mr. WILLIS. I ask this question in good faith and in cool blood: Why does the gentleman not protest against the moral lectures that the President sees fit to administer to this Congress, and the insinuations which he incorporates into his veto messages?

Mr. SAYERS. I do not see that the President has delivered any moral lecture. The President has simply exercised a constitutional duty imposed upon him.

Mr. CANNON. I desire just a minute or two in conclusion. It is well enough to proceed in a matter of this kind in the light of judgment, and not of abuse or partisanship. Let us find out what is right, what is our duty under the peculiar circumstances that we have now before us. I desire the attention of the gentleman from Ohio [Mr. GROSVENOR]. I have no desire to go with him into an argument touching the French spoliation claims. It is not necessary for me to condemn or to indorse them; nor touching the Bowman claims. It is not necessary for me to condemn or indorse them. The question is, under the Constitution, what is our duty as American Representatives? As this matter is presented—an omnibus provision put on by the Senate, with so much in it that everybody will condemn it as improper, whatever views he may have about the French spoliation claims—we have to turn it down or swallow it all. I am for turning it down and then passing a proper bill. [Applause.] The gentleman from Ohio [Mr. GROSVENOR] says there are no insurance claims in this bill.

Mr. MAHON. Not one.

Mr. CANNON. Yet it is stated, and I believe it to be true——

Mr. MAHON. The President alone has stated it, and it is not true.

Mr. CANNON (continuing). That there are over a hundred insurance claims.

Mr. MAHON. They are not in it.

Mr. CANNON. I say, from reliable information, they are in it.

Mr. MAHON. And if the President had taken time to examine it, in place of having had an hour to examine it, he would have found out that fact.

Mr. CANNON. The gentleman now seeks to muddy the water, following the example of the gentleman from Ohio [Mr. GROSVENOR] by saying that the President had only a short time——

Mr. MAHON. Ten or fifteen minutes.

Mr. CANNON. Ten or fifteen minutes to consider this bill, when the bill, with all its provisions printed, containing information such as the gentleman and I had about it, has been for days, if not weeks, accessible to the whole country, the President included!

Now, a word in conclusion. Generally I have differed from the President of the United States. He is my President and your President. I have differed radically, but always respectfully, and I do not differ from him touching this veto. I believe it is well conceived and patriotic. I believe this omnibus amendment never ought to have gone on the bill, that it is a vicious method of legislation; and while it may contain some good things, it is a whited sepulcher, filled with dead men's bones. [Applause.] Now, Mr. Speaker, I move the previous question.

Mr. MAHON. Will the gentleman allow me to ask him a question?

Mr. CANNON. I can not.

The previous question was ordered.

The SPEAKER. The question is, Will the House, on reconsideration, pass the bill, the objections of the President to the contrary notwithstanding? Under the Constitution the vote must be taken by yeas and nays.

The question was taken; and there were—yeas 39, nays 171, not voting 144; as follows:

YEAS—39.

Mr. BERRY. Mr. Speaker, I desire to withdraw my vote. I am paired with the gentleman from Michigan, Mr. SMITH.

Mr. WILLIAMS. Mr. Speaker, my colleague, Mr. KYLE, voted upon the roll call. He was called from the House by a conference committee meeting, and requested me to ask that his vote be withdrawn, because he is paired with the gentleman from California, Mr. BARHAM.

Mr. TRACEY. Mr. Speaker, I voted inadvertently. I am paired with the gentleman from Arkansas, Mr. MCRAE, and desire to withdraw my vote. Were he present, I would vote "nay." I would like at the same time, if I am in order, to ask that the RECORD of yesterday be corrected so as to show the same thing.

The SPEAKER. It will not be in order.

Mr. TRACEY. At present?

Mr. DINGLEY. I am paired, and withdraw my vote.

The following pairs were announced:

Until further notice:

Mr. GILLETT of Massachusetts with Mr. COWEN.

Mr. STEPHENSON with Mr. NEILL.

Mr. SPALDING with Mr. SPENCER.

Mr. STEELE with Mr. MCCLELLAN.

Mr. HEATWOLE with Mr. DINSMORE.

Mr. BARTHOLDT with Mr. DENNY.

Mr. FOSS with Mr. MCLAURIN.

Mr. NORTHWAY with Mr. PRICE.

Mr. COUSINS with Mr. LIVINGSTON.

Mr. BOWERS with Mr. MINER of New York.

Mr. SNOVER with Mr. MADDOX.

Mr. TOWNE with Mr. WILSON of South Carolina.

Mr. SMITH of Michigan with Mr. BERRY.

Mr. TRACEY with Mr. MCRAE.

Mr. CORLISS with Mr. MOSES.

Mr. JOHNSON of INDIANA with Mr. COX.

Mr. BARHAM with Mr. KYLE.

Mr. MEIKLEJOHN with Mr. CROWLEY.

Mr. FOOTE with Mr. HUTCHESON.

Mr. COLSON with Mr. KENDALL.

Mr. WILLIAM A. STONE with Mr. LAWSON.

Mr. HITT with Mr. WASHINGTON, except on election contest of Aldrich *vs.* Underwood.

Mr. ROYSE with Mr. TURNER of Virginia, except on Tucker-Yost election case.

For this day:

Mr. MCCLEARY of Minnesota with Mr. RUSK.

Mr. KULP with Mr. MAGUIRE.

Mr. HADLEY with Mr. COOPER of Texas.

Mr. JENKINS with Mr. DE ARMOND.

Mr. PICKLER with Mr. CATCHINGS.

Mr. DINGLEY with Mr. WHEELER.

Mr. WOOMER with Mr. SULZER.

On this question:

Mr. ROBINSON of Pennsylvania with Mr. CRISP.

Mr. SPARKMAN with Mr. LESTER.

Mr. CHARLES W. STONE with Mr. OTJEN.

The SPEAKER. On this question the yeas are 39, the nays are 171; and accordingly the House, upon reconsideration, refuses to pass the bill.

DEFICIENCY APPROPRIATION BILL.

Mr. CANNON. Mr. Speaker, I move to suspend the rules and pass the following bill.

The SPEAKER. The gentleman moves to suspend the rules and pass the following bill.

The Clerk read as follows:

A bill making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896.

Mr. CANNON. Mr. Speaker, I ask unanimous consent that the reading of this bill may be dispensed with, and I would state in that connection that this is an exact copy of the bill that passed the House and the Senate and went to the President——

Mr. RICHARDSON. I object to debate, Mr. Speaker.

Mr. CANNON. I ask unanimous consent to dispense with the reading of the bill.

The SPEAKER. Unanimous consent is asked to dispense with the reading of the bill.

Mr. RICHARDSON. I object; because I do not know what is in the bill.

The SPEAKER. Objection is made by the gentleman from Tennessee.

The Clerk proceeded to read the bill.

Mr. RICHARDSON (interrupting the reading). Mr. Speaker, I think that the bill which the Clerk is reading can not be the original bill, or else parts of it are being omitted in the reading, as it does not correspond to the one I have here.

The SPEAKER. The Chair understands that the Clerk is reading the proper bill.

The Clerk resumed and continued the reading.

Mr. RICHARDSON (during the reading). Mr. Speaker, I rise to a question of order. I desire to call the attention of the gentleman from Illinois [Mr. CANNON] to the fact that the bill the Clerk is reading is not the bill which I understood the gentleman to say he had reported from his committee.

Mr. CANNON. Mr. Speaker, I will take this opportunity to say to the gentleman again that the bill the Clerk is reading is precisely the bill that went to the President, minus the items covered by amendment No. 233, put upon the bill by the Senate.

Mr. RICHARDSON. That is what I understood; but the Clerk is reading a list of names of claimants and omitting some names that are in the copy of the bill that I have here.

Mr. CANNON (inspecting Mr. RICHARDSON'S copy). This is not a copy of the bill as it went to the President. This is the first print of the bill in the House, with the Senate amendments. Let the gentleman send to the document room and get a copy of the bill as it passed when the conference report was adopted. Of course the copy he has here does not correspond to the bill at the desk.

Mr. RICHARDSON. I should not have thought that the list of the claimants for the Ford's Theater disaster would have been changed.

Mr. CANNON. It is changed, Mr. Speaker. Now that the gentleman knows exactly what the bill contains, I appeal to him again to withdraw his objection to dispensing with the first reading of the bill. I ask unanimous consent that the further reading of the bill be dispensed with.

Mr. SAYERS. I will say to the gentleman from Tennessee that there is no question as to this bill being the same as the deficiency bill which passed the House, with the exceptions stated by the gentleman from Illinois.

Mr. RICHARDSON. Mr. Speaker, I do not think that a bill carrying thirty or forty millions——

Mr. CANNON. Oh, no. It was only eleven millions, and now it is only nine millions.

Mr. RICHARDSON. Well, I do not think that a bill carrying $9,000,000 ought to be passed without being read to the House.

The SPEAKER. Does the gentleman object?

Mr. RICHARDSON. I think we ought not to pass the bill without reading it.

The SPEAKER. The Chair hears no objection.

Mr. RICHARDSON. I object.

The SPEAKER. Objection is made. The Clerk will resume the reading of the bill.

The Clerk continued the reading of the bill.

Mr. RICHARDSON (during the reading). Mr. Speaker, I desire to call the attention of the gentleman from Illinois to Senate amendment No. 89 and to ask him whether it is omitted from his bill. It appears in the bill that I have before me, but it has not been read by the Clerk in the bill at the desk. It is the amendment relating to the pay of the Mexican Boundary Commission.

Mr. CANNON. The gentleman will find that that amendment went out in conference.

Mr. RICHARDSON. Just before this there was an omission of about half a page, although I understood the gentleman from Illinois to say that, with certain exceptions, this new bill was identical with the one passed here a few days ago.

The SPEAKER. The Chair desires to say that this discussion of a bill while it is being read is somewhat irregular. He does not object to it if it facilitates the passage of the bill, but would be unwilling that it should be drawn into a precedent. [Laughter.]

Mr. CANNON. The gentleman from Tennessee has not the proper bill at all.

Mr. RICHARDSON. This is the bill which the messenger brought me after the gentleman from Illinois suggested that the one I had first was not the proper bill.

Mr. CANNON. Neither one is the proper bill.

Mr. RICHARDSON. Well, I will ask the gentleman whether there are any printed copies of the bill which is now being read?

Mr. CANNON. The gentleman should know that better than I. Whether an act that has been passed by the House and by the Senate and signed by the Speaker of the House and by the Vice-President of the United States is usually printed or not I do not know. I ask that the Clerk proceed with the reading of the bill.

The Clerk proceeded and completed the reading of the bill.

The SPEAKER. The question is on the motion of the gentleman from Illinois to suspend the rules and pass this bill.

Mr. MAHON. I demand a second.

Mr. CANNON. I ask unanimous consent that a second be ordered.

Mr. MAHON and Mr. KEM objected.

The House divided on the question of ordering a second; and there were—ayes 166, noes 18.

So a second was ordered.

Mr. CANNON. Does the gentleman from Tennessee desire to say anything upon the bill? If not, I am ready for a vote. [Cries of "Vote!" "Vote!"]

Mr. RICHARDSON (to Mr. MAHON). Do you want to debate this?

Mr. MAHON. Yes.

Mr. CANNON. I think the House understands it.

Mr. RICHARDSON. The gentleman from Pennsylvania [Mr. MAHON] controls the time in opposition.

Mr. ATWOOD. Mr. Speaker, I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ATWOOD. Do I understand that if the rules of this House are now suspended upon the motion of the gentleman from Illinois no amendment to this bill will be in order?

The SPEAKER. That is correct.

Mr. ATWOOD. I hope the House fully understands that point at least.

The SPEAKER. If no debate is desired, the Chair will put the question on the motion of the gentleman from Illinois to suspend the rules.

Mr. MAHON. I desire to debate it, Mr. Speaker.

Mr. RICHARDSON. I wish to speak.

Mr. MAHON. We want to occupy our twenty minutes. I yield five minutes of the time to the gentleman from Tennessee.

Mr. RICHARDSON. Mr. Speaker, as I have only five minutes, I must necessarily speak rapidly. The proposition here is to pass this bill under a motion to suspend the rules—a bill which has not been considered by any committee of this House, a bill of which the gentleman from Illinois himself could not tell the contents when the inquiry was propounded to him by the gentleman from Pennsylvania [Mr. MAHON]. This bill is not even open to amendment. The President of the United States vetoed the deficiency appropriation bill, because, as he stated, it contained appropriations for the payment of the French spoliation claims, and for a claim that is known as the Chouteau claim. Now, if the gentleman from Illinois had presented the vetoed bill, with those items eliminated, there would have been no possible objection or word of dissent to its passage. But after the President exercised his constitutional right to veto the bill, on account of these two, and no other objections, the gentleman from Illinois interposes his veto, and says you must take the bill now with not only those items eliminated which the President vetoed, but also with the additional claims stricken out which the gentleman from Illinois vetoes. [Laughter and applause.]

Now, Mr. Speaker, I say we ought to vote down the proposition to pass the bill by a two-thirds vote, and if two-thirds of the members should fail to vote for it we will defeat the motion and defeat the bill. Then if the gentleman desires to prepare it, with the Southern claims embodied in it—the claims voted on by this House for payment of the loyal citizens of the border States, the States of Pennsylvania, Maryland, and other States—we can pass it in five minutes. The gentleman from Illinois sees fit, however, to go even beyond what the President did, and says he would not be willing to allow the House even to vote upon a proposition for the payment of these war claims. He will not even allow an amendment to the bill. He will not allow the House to do what it has already done by a yea-and-nay vote. They decided on a yea-and-nay vote to pay the claims to the loyal citizens in my section and in the other border States of the Union. The House decided by a yea-and-nay vote that it would pay them, but the gentleman from Illinois comes and says, "You must take the bill as I present it without these claims embodied in it"; and will not even permit a vote of the House, in the shape of an amendment, to put them back in the bill.

Mr. Speaker, I say this is not right. We ought to vote down the motion of the gentleman and refuse to pass the bill by a two-thirds vote. Let the gentleman place back in it the claims he has eliminated but which the House decided should go into the bill, which the Senate decided should go into the bill, and to which the President interposes no objection. [Applause.]

This $550,000 of claims goes to the loyal people of the South—the border States. It does not come to my district, except $450 of it. In the Fifty-first Congress we passed a bill through the House and Senate appropriating $550,000 for the payment of such claims without objection. What has come over the gentleman from Illinois since that time that has caused him to object to the payment of the claims now? He says that they ought not to go on the deficiency bill; but this bill has now in it claims standing precisely on the same basis. There are claims in it involving the same conditions. I call the attention of the gentleman to the Quartermaster's findings on page 53 of the printed bill.

Mr. CANNON. I challenge the gentleman's statement as incorrect.

Mr. RICHARDSON. Well, I undertake to say that I am correct, and in this respect the gentleman from Pennsylvania [Mr. MAHON] will concur with me, that I am accurate in that statement.

Mr. CANNON. I challenge the statement of both gentlemen as being absolutely incorrect.

Mr. RICHARDSON. Well, I have the floor, I believe. You confessed this morning, when the gentleman from Pennsylvania asked if these claims were in the bill, you admitted that you did not know whether they were or not. [Laughter and applause.] And I certify here and now that you paid no attention to the reading of the bill at the Clerk's desk, so that you do not know now what is in it. The gentleman has not read the bill himself, that is the trouble. He has had it made up for him, but does not know what is in it, I venture to say.

Now, that is a question of fact. The gentleman from Pennsylvania [Mr. MAHON] is a very intelligent gentleman, the chairman of the War Claims Committee, and he says these claims are exactly like this.

The SPEAKER. The time of the gentleman has expired.

Mr. RICHARDSON. Well, I am very sorry, I would like to have had a little more time.

Mr. MAHON. I yield five minutes to the gentleman from Kentucky [Mr. EVANS].

Mr. EVANS. Mr. Speaker, I had an opportunity a short time ago to express to the House the very earnest views that I entertained upon the subject of the war claims which had been adjudicated by the Court of Claims, a tribunal to which Congress had submitted their consideration. These claims were passed upon by the House; they were passed upon by the Senate, and if any consideration is to be given to these acts of the House and Senate it would seem to require that the Committee on Appropriations of this House, if they considered this bill at all, which I doubt, should have included all of these claims in this measure when they proposed to suspend the rules and pass it.

I have not an objection to a single item in the proposed bill, so far as I know; probably all of them should be paid, and probably all are proper subjects for appropriation in this manner. But this House, after the most mature consideration, expressed its judgment, its decision—I might say its order—to the committee with reference to these particular claims; and the President of the United States, in the exercise of those functions that he is constitutionally entitled to exercise, has not in his veto of the former bill objected to the claims now sought to be included in the new bill by those who are opposed to it in its present shape. It seems to me that if there can be any instruction or command of the House which should be obeyed by the Committee on Appropriations or its chairman it is our instruction to include these claims in the measure now brought before the House for passage. I do sincerely hope for one that Congress will not adjourn until this measure of justice has been done to a number of long-suffering creditors of the United States, whose claims are as just, whose demands are as meritorious, as the most highly lithographed evidence of indebtedness could make a claim in favor of any creditor of the United States. These claims have been ascertained perfectly well. We all understand them. The Committee on Claims of this House has considered and reported them, whether the Appropriations Committee has done so or not; and I do most earnestly hope that Congress will continue in session, that it will not finally adjourn, until these claims are provided for and the persons entitled to this money paid.

Mr. EVANS. Mr. Speaker, I ask the House to consider now whether there is any reason given by the President of the United States, the chairman of the Committee on Appropriations, or anybody else why we should reverse our action of a week or two ago and say now that because some one or two men do not want these claims inserted in the general deficiency bill the House will not order them to be put there. Let us not suspend the rules, but leave this matter open until we can get them in. Let us vote down this proposed measure and see whether the Committee on Appropriations will not obey the will of the House as heretofore expressed frequently, clearly, and unequivocally.

If the gentleman from Illinois representing the Committee on Appropriations had, as remarked by the gentleman from Tennessee [Mr. RICHARDSON], brought before us a bill which left in every item except those which the President had objected to in the vetoed bill there would have been no objection whatever interposed by anybody to such a bill. It does seem to me—and I respectfully submit it to members who shall vote on this question—that that was the proper, the right, the just thing for the gentleman from Illinois to do. He should have brought before us a bill on which we could vote this afternoon, embracing every item except those the President of the United States objected to; for these war claims, resting upon findings of the Court of Claims, are just as good debts against the United States—I mean they have as much

merit in them—as any item provided for in this bill from beginning to end. For one I think these items stand on stronger ground than many others in the bill, because they are supported by the solemn judgment of a court that they are just claims against the United States. That very fact, it seems to me, should induce us to make the appropriation to pay them. I hold the doctrine that the Government ought to pay every honest debt as soon as it is ascertained to be honestly due and the amount properly fixed.

For these reasons I hope, gentlemen, that you will consider whether we should allow this bill to pass until these claims which were left in the former bill pursuant to our judgment and order have been embraced in this bill. [Applause.]

I yield back any time I may have to the gentleman from Pennsylvania [Mr. MAHON].

Mr. MAHON. I yield five minutes to the gentleman from Maryland [Mr. WELLINGTON].

Mr. WELLINGTON. Mr. Speaker, I voted the other day for the passage of this general deficiency bill, including every line, as it was sent to us from the Senate. I believed it right to pass the bill in that way; and if I thought so then I believe so now. I voted this afternoon to pass the bill over the veto of the President, and I shall vote now against the bill as proposed by the chairman of the Appropriations Committee [applause]; and I call upon members of this House to stand by us in this matter.

The claims that gentlemen are attempting to strike out here are as much claims against the Government of the United States as any other debt or demand embraced in the bill. The other day we passed in this House a bill which would drive into bankruptcy individuals who refuse to pay their honest debts. I believe that governments and individuals should stand upon the same moral plane in this matter. If the Government owes a debt, it should as well pay it as an individual. [Applause.]

These claims are war claims. A part of these claims that members have to-day stricken out or attempted to strike out arose in the State from whence I come; several pages of this bill were devoted to claims due the citizens of the State of Maryland. When the great war began, our State, bordering on the two sections, was wedged in between them. One day the Confederates would be on our soil; the next the Federals would be with us. The property of citizens of Maryland was taken by the Government. They have waited year by year for reimbursement. They have proven their claims again and again. Under an act of Congress known as the Bowman Act those claims have been taken before the Court of Claims. Every claimant stood upon his trial; every man proved his claim. And then these claims were sent to your Committee on War Claims. Every one of them was passed upon by that committee as an honest claim against the Government.

Those claims have been included by the House and the Senate in this bill, and I stand here to-day to appeal to this House not to strike out these claims because the chairman of the Committee on Appropriations says that you must do so. It has been intimated that the chairman of that committee and a leading Democratic member of the committee gave the President the assurance that if he would veto this bill—if he would strike it down and send it back to the House—they would see that this House would pass such a bill as he wanted. They go one step further. They propose not only to pass a bill such as the President wanted, but to cut out a great many things to which the President in his message has made no allusion. The President said not one word against the war claims in that bill. He said not one word against the honest claims of the citizens of Maryland for goods taken from them by the soldiers of the Army during the war. Therefore I say these gentlemen go one step further, and they strike out these claims, and they come to this House and say, "Under a suspension of the rules to-day during the latter hours of this session of Congress you must pass just such a bill as we offer to you or you can have no bill at all."

Now, if that is the question, then I say, let us have no bill until we can get some consideration for these honest claims of the Government. [Applause.] I for one, as I say, believe that this Government if it owes an honest debt should pay it. I contend here to-day that these claims are honest. They have been proven again and again. These men are loyal. This money belongs to them, and why should you say that it shall not go to them?

So far as the other claims are concerned, so far as the French spoliation claims are concerned, I believe that they ought to be paid, and I will again vote for a bill that will say that they should be paid. But if there is any division of opinion, if they must go out, very well; I am satisfied. But I say here to-day, I want to emphasize it again, that the Republican party owes it to itself, this House owes it to itself, not to strike down these claims. What did you do the other day when the President vetoed the river and harbor bill? I am sure that there were claims in that bill which were more objectionable than the war claims for which we are asking payment to-day. Yet this House passed that bill over the veto of the President. I voted for that, and am willing to stand upon that vote, but in what position——

[Here the hammer fell.]

Mr. MAHON. I think the other side ought to use a little of their time before we exhaust ours.

Mr. CANNON. Does the gentleman desire to say anything more?

Mr. MAHON. Yes.

The SPEAKER. The question is on suspending the rules——

Mr. MAHON. Mr. Speaker, I am not through. I simply asked the gentleman whether he would consume some of his time.

Mr. RICHARDSON. I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RICHARDSON. Will the gentleman from Illinois have twenty minutes after the gentleman from Pennsylvania has used his remaining five?

The SPEAKER. He will have twenty minutes.

Mr. RICHARDSON. I ask, Mr. Speaker, if it is not usual and customary, under the rules of the House, for each side to alternate?

The SPEAKER. The Chair thinks it is usual and customary, under the rules of the House, to alternate the time; but if a gentleman chooses to have a vote taken without saying anything, and does not desire to use his twenty minutes, and if the other gentleman does not use his five, why, that is his right.

Mr. RICHARDSON. I have never known a case in which one side consumed the entire time without the other side alternating.

Mr. CANNON. I want to be entirely fair. I expect to use, probably, from three to five minutes. That is my present intention. I was quite willing that a vote should be taken without discussion. Now, in complete fairness, as I do not expect to consume my time, I ask the gentleman from Pennsylvania [Mr. MAHON] if he desires to go ahead?

Mr. MAHON. Mr. Speaker, I do not desire to say anything more about the French spoliation claims or the Chouteau claim. The President of the United States has exercised his right to veto this bill on the ground that these two items were in it, and he has objected to these two items alone. Now, Mr. Speaker, that bill was not signed by the Vice-President until this morning at 10 o'clock. This bill which the gentleman has introduced here to-day was in the Public Printing Office last night. If the gentleman from Illinois [Mr. CANNON] and the gentleman who assisted in making up that bill had stricken from the bill the items that the President indicated to them that he would veto there would be no contest here to-day. But pray, sir, after the Senate and the House have passed upon another item in this bill, upon which the President makes no objection, I say why should the gentleman from Illinois or any other two or three gentlemen, in a star chamber, in the dark hours of the night, strike out a portion of this bill that has been passed by both Houses and that was not objected to by the President? Mr. Speaker, we have one man in this country who is using the veto power to excess, about as much as this country can stand, and we do not want to introduce any other gentleman into the legislation of this country to use the veto power too. [Applause.]

Mr. CANNON. Will you nominate him?

Mr. MAHON. The gentleman from Illinois [Mr. CANNON] and the gentleman who assisted him did not strike out from this bill the Bowman Act cases because the President objected to them, but they put this House in this position to-day. You have passed the Bowman Act claims, which are right and just, and the Senate passed them; but the gentleman from Illinois [Mr. CANNON] and the gentleman from Texas [Mr. SAYERS] say: "We have got you. You have got to pass the deficiency bill under a suspension of the rules, and we will make you pass it with certain items stricken out to which the President has no objection."

I want to say to members of this House that I know what I am talking about; and if this House will pass the bill with the Bowman claims on it, the Senate will pass it and the President will sign it; and I simply plead here, not because I have a few people in my State who are interested in this matter, because they are scattered all over the country—I say, as chairman of the Committee on War Claims, that every Bowman Act case included in that amendment was for three months carefully scrutinized and passed upon by the Committee on War Claims. The Court of Claims has passed upon them, and declared that those people were loyal people; that they furnished the property to the Government of the United States; that the Government of the United States used it, and that the Government owes these people for it.

Mr. GIBSON. And the Government has been owing them for thirty years. [Laughter and loud applause.]

Mr. MAHON. I plead the cause of the poor people of this country who had their property taken. I come from Franklin County, where 280,000 men tramped over the ground during the war, and when the last bluecoat left you could not see a blade of grass, and there was not a particle of wheat or a fence rail or a chicken coop left, for the county was stripped. The gentleman from Illinois was safe with his constituents on the Illinois prairies. He knows nothing about the character of the troubles that befell the people who lived in the border States. These are not claims for devastations of war. They are for stores, corn and oats, cattle, and other

stuff of that kind furnished to the Army of the United States to feed her soldiers and her cavalry and artillery horses. In the name of Heaven, do you propose to repudiate these debts? I want to say that they are as honest as any that are contained in this bill. In this very bill I find claims allowed for Indian depredations on findings by the Court of Claims, put in by the gentleman from Illinois himself. There are judgments for Indian depredations committed by the Indians during Indian wars. If there is a place in the deficiency bill for such claims, the Bowman Act claims stand upon as high ground and should have the same place. I say to members who are interested in these claims, you have been struggling here for four years to get the payment of these claims. The Senate has decided in your favor. You will have to stand by yourselves. Refuse to suspend the rules, and keep on refusing until these gentlemen do what is right for these people. [Loud applause.]

I yield the remainder of my time to the gentleman from Massachusetts [Mr. WALKER].

The SPEAKER. The time of the gentleman has expired.

Mr. CANNON. Now, Mr. Speaker, if I can have special attention for a minute or two I can cover practically the situation. The deficiency bill that the House and Senate passed was vetoed. It is as dead as Julius Cæsar. [Laughter.] We all want to get away from here.

Mr. WELLINGTON. We do not want to get away until we settle this matter [applause], and I will stay here all summer for that purpose.

Mr. CANNON. "And still the villain pursues." [Laughter.]

Mr. WELLINGTON. And I will keep on pursuing.

Mr. CANNON. That is all right. We all want to get away. [Cries of "Oh, no!"] Well, then, stay!

The SPEAKER. The House will be in order.

Mr. CANNON. This is not the first time. It is possible by great industry, if we can keep a quorum, we may get away from here Wednesday next.

Now, the Speaker of the House recognized me to move to suspend the rules and pass the bill which has been read. I have stated to the House what it contains—appropriations of judgments of the Court of Claims, audited claims, adjudicated by the Departments, such as invariably go upon the bill. Then for the current service of the Government, including the contingent fund of the House, for the payment of members' clerks in vacation, and so forth, and so on. Now, then, I did this for the reason that there is not now time to originate a new bill in the Committee on Appropriations and report it regularly to the House, have it go to Committee of the Whole on the state of the Union, and pass it as such bills usually pass; and the gentlemen now cry out, "Let us rebuke Mr. CANNON, because he has dared to move to suspend the rules without putting on the Bowman claims!" Well, suppose you do. Suppose you clap your hands——

Mr. MAHON. Let me ask you a question.

Mr. CANNON. Suppose you clap your hands and rebuke Mr. CANNON for proposing to pass this bill under suspension of the rules. Let us see what you gain.

Mr. MAHON. I want to ask you a short question.

Mr. CANNON. Oh, well, now—say, who is making this speech anyhow? [Laughter.]

Mr. Speaker, I ask attention. I only want a minute.

The SPEAKER. The gentleman asks for order, and the members of the House will please take their seats. The Chair must insist upon it.

Mr. CANNON. I did not move to suspend the rules and include the claims under the Bowman Act, because under the rules of this House they have no place upon a general appropriation bill. Let me say to gentlemen one of two things must happen: You have either to change the rules of this House or I have got to be out of the House before those claims can go upon a general appropriation bill originating in the House of Representatives under the rules of the House. [Applause.] Therefore if you take the course that is suggested here you will gain nothing. You can follow the gentleman from Pennsylvania [Mr. MAHON] and the gentleman from Maryland [Mr. WELLINGTON] and the eloquent gentleman from Tennessee [Mr. RICHARDSON] if you choose. If you do, you are without any deficiency bill, and you can not adjourn this Congress without very seriously embarrassing yourselves and all the Departments of the Government by a failure to provide for the current expenses of the Government.

Now, I will tell you what I think is wise. I think it is wise to vote two-thirds to pass this bill and send it to the Senate. If you think not, if you see proper to say that the Committee on Appropriations shall go to work and originate a new deficiency bill, we will do it and bring the bill in here; but I notify the gentleman from Pennsylvania now that when he moves to put the Bowman Act claims upon that bill by way of amendment, I will stand here and make the point of order under Rule XX, and he knows as well as I do that they will not go on the bill.

Mr. MAHON. They will "get there."

Mr. HENDERSON. Let me ask the gentleman from Illinois a question. If this bill goes through in its present shape, will not gentlemen who are interested in these claims under the Bowman Act have the same rights at the other end of the Capitol that they had in the first instance?

Mr. CANNON. Certainly.

Mr. MAHON. We want to hold on to them while we have got them.

Mr. HENDERSON. You can not do it in the House under the rules.

Mr. WELLINGTON. We can prevent the consideration of this bill until you gentlemen do right. This House has the right to do that.

Mr. HENDERSON. Not under the rules.

Mr. WELLINGTON. Under the rules it has that right.

Mr. CANNON. Let us keep our judgment, gentlemen. I do not believe that the American House of Representatives stands ready to follow the lead of the gentleman from Maryland and the distinguished gentleman from Pennsylvania——

Mr. WELLINGTON (interrupting). I tell you that the House of Representatives can not go wrong in following the lead of Maryland in this particular.

Mr. CANNON. The gentleman is soon to be transferred to another body, but I hope he will observe the rules of this body while he remains here. [Laughter.]

Mr. WELLINGTON. I have not been transferred yet, and I have a right——

The SPEAKER. The gentleman from Illinois has the floor. The gentleman from Maryland is out of order.

Mr. WELLINGTON. I bow to the decision of the Chair.

Mr. CANNON. I do not believe, Mr. Speaker, that the American House of Representatives stands ready, out of all rule, to follow the lead of these two eminent gentlemen and to say that the appropriations for the ordinary expenses of the Government shall not be made unless we submit to having them carry through these 30-year-old claims. I ask for a vote.

The question being taken on the motion to suspend the rules and pass the bill, the Speaker declared that the ayes seemed to have it.

Mr. MAHON and Mr. RICHARDSON demanded the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 172, nays 44, not voting 138; as follows:

YEAS—172.

Aldrich, Ala.	Crump,	Howe,	Phillips,
Aldrich, Ill.	Culberson,	Howell,	Pitney,

So (two-thirds voting in favor thereof) the motion of Mr. CANNON was agreed to, and the bill was passed.

The following additional pairs were announced:

For this day:

Mr. LOUDENSLAGER with Mr. ABBOTT.

Mr. LEISENRING with Mr. TUCKER.

On this vote:

Mr. CHARLES W. STONE with Mr. OTJEN.

Mr. KYLE. I am paired with the gentleman from California, Mr. BARHAM. I desire to be noted as present.

Mr. TATE. Mr. Speaker, I wish to inquire how I am recorded.

The SPEAKER. The Clerk informs the Chair that the gentleman is not recorded.

Mr. TATE. I was present during the roll call and did not hear my name.

The SPEAKER. Was the gentleman listening?

Mr. TATE. I was here in my seat during the roll call.

The SPEAKER. Was the gentleman listening at the time when his name should have been called, and did he fail to hear it?

Mr. TATE. I was present and failed to hear my name called.

The SPEAKER. The Chair desires to say that in matters of this kind he simply enforces the rule of the House. The exception under which gentlemen are allowed to have their votes recorded after the roll call rests upon the idea that by some mistake the name was not called. The object of the rule is to command the attention of members during the vote. The gentleman, understanding now the state of the case, can answer as he thinks correct.

Mr. TATE. I did not hear my name. I was in my seat and attending all the time.

The SPEAKER. The Chair thinks that the gentleman can not vote under the rule.

Mr. TRACEY. I should like to vote.

The SPEAKER. Was the gentleman present and listening at the time when his name should have been called, and did he fail to hear it?

Mr. TRACEY. I was listening and did not hear it. A member sitting close to me heard it and called my attention to the fact after my name had been passed. I did not hear it myself.

The SPEAKER. The gentleman's name having been called, the Chair can not entertain his request to vote now.

Mr. TRACEY. I was listening for my name and did not hear it.

The result of the vote was announced as above stated.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. CANNON. I rise to present a conference report, which I send to the desk.

The Clerk proceeded to read the report, but was interrupted by

Mr. CANNON. I ask that the accompanying statement of the conferees be read in lieu of the report.

The Clerk read the following statement of the House conferees:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the sundry civil bill submit the following written statement in explanation of the action recommended in the accompanying conference report on each of said amendments, namely:

On No. 96: Appropriates $325,000, instead of $250,000 as proposed by the House and $400,000 as proposed by the Senate, for surveying public lands.

On Nos. 140 and 141: Makes the appropriation for improving the canal at the cascades of the Columbia River available for continuing the work, as proposed by the Senate, instead of completing, as proposed by the House, and strikes out the provision proposed by the Senate requiring that $20,000 of said appropriation be applied to certain work proposed in the modified project of October 18, 1894.

The committee of conference have been unable to agree on the following amendments, namely:

On Nos. 2, 3, 4, 6, 7, 8, 13, 15, 16, and 17, relating to public buildings, as follows:

Boise City, Idaho, increasing limit of cost from $150,000 to $200,000, and appropriating $50,000;

Camden, N. J., increasing limit and appropriating $25,000;

Cheyenne, Wyo., increasing limit from $150,000 to $250,000, and appropriating $50,000;

Fortress Monroe, Va., for post-office building, $15,000;

Helena, Mont., increasing limit from $150,000 to $300,000, and appropriating $50,000;

Kansas City, Mo., increasing limit from $1,200,000 to $1,316,000;

Omaha, Nebr., appropriating $100,000, instead of $70,000, as proposed by the House;

St. Paul, appropriating $125,000, instead of $60,000, as proposed by the House;

Savannah, Ga., increasing limit $100,000, and appropriating $25,000; and

Salt Lake City, Utah, appropriating $75,000 for site and commencement of building.

On amendment numbered 32, appropriating $15,000 for a light-house on Swan Island, in the Caribbean Sea.

On amendment numbered 61, appropriating $250,000 for an additional fireproof building for the use of the National Museum.

On amendment numbered 97, relating to the reclamation of arid lands.

On amendment numbered 109, appropriating $35,000 to enable the Government to take part in the International Exposition at Brussels, Belgium.

On amendments numbered 122, 123, and 124, relating to the price to be paid for gas lamps in the public grounds.

On amendments numbered 146 and 147, relating to the support and medical treatment of destitute patients and to the Providence and Garfield hospitals.

On amendment numbered 161, relating to the disbursement of appropriations for the National Home for Disabled Volunteer Soldiers.

J. G. CANNON,
E. J. HAINER,
JOSEPH D. SAYERS,
Managers on the part of the House.

Mr. CANNON. I move the adoption of the conference report.

Mr. RICHARDSON. I do not think the report has been read. We ought to hear it, if there is any. It has not been read.

Mr. CANNON. I understood that the reading was waived. I asked that the statement might be read.

The SPEAKER. As the Chair is informed at the Clerk's desk, the gentleman from Illinois requested that the reading of the conference report be omitted.

Mr. RICHARDSON. Did the Chair submit the request?

The SPEAKER. The Chair did not submit it. The conference report must be read if objection is made.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as fo lows:

That the Senate recede from its amendment numbered 141.

That the House recede from its disagreement to the amendment of the Senate numbered 140, and agree to the same.

Amendment numbered 96: That the House recede from its disagreement to the amendment of the Senate numbered 96, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$325,000"; and the Senate agree to the same.

The committee of conference have been unable to agree upon the amendments of the Senate numbered 2, 3, 4, 6, 7, 8, 13, 15, 16, 17, 32, 61, 97, 109, 122, 123, 124, 146, 147, and 161.

J. G. CANNON,
E. J. HAINER,
JOSEPH D. SAYERS,
Managers on the part of the House.

W. B. ALLISON,
EUGENE HALE,
A. P. GORMAN,
Managers on the part of the Senate.

The SPEAKER. The question is on agreeing to the report.

Mr. LESTER. I wish to know whether the adoption of the report will cut off other questions that may arise as to amendments not agreed to.

Mr. CANNON. Let us close up the matter by adopting the conference report on the matters on which we have agreed.

Mr. LESTER. I wish to ask the Speaker——

Mr. CANNON. I will say to the gentleman from Georgia [Mr. LESTER] that there has been no agreement in regard to the public building at Savannah, Ga., and that will not be affected by the vote on the adoption of the report.

Mr. LESTER. I wish to ask the Speaker what will be the effect of agreeing to the conference report—whether the amendment to which the gentleman from Illinois has referred will go back immediately to conference, or whether I can ask a vote of the House upon concurring in that amendment?

The SPEAKER. Agreeing to the conference report will not send back to conference amendments still in controversy without a further order of the House.

The question being taken, the report of the committee of conference was agreed to.

Mr. CANNON. Mr. Speaker, I move that the House further insist on its disagreement to the amendments of the Senate, as specified in the report, and agree to the conference asked by the Senate.

Mr. LACEY. Mr. Speaker, I move to recede from the disagreement to No. 97——

The SPEAKER. Does the gentleman yield?

Mr. CANNON. The gentleman from Iowa, I understand, desires a separate vote on one of the amendments, and wishes to make a motion, and I suppose the gentleman from Georgia [Mr. LESTER] also desires to make a motion to recede from the disagreement to another amendment.

Mr. LACEY. I wish to call the attention of the House to amendment 97, and propose to move to concur in that amendment.

Mr. LESTER. I move to concur in amendment 16, on the Savannah post-office building.

Mr. HARTMAN. Mr. Speaker, I move that the House recede from its disagreement to the Senate amendments numbered 2, 3, 4, 6, 7, 8, 13, 15, 16, and 17, being the public building amendments.

Mr. CANNON. Does the gentleman want a separate vote on each amendment?

Mr. HARTMAN. No; let it be in bulk.

Mr. CANNON. Oh, well, I guess we will possibly get along better by letting each case stand on its own merits. We must have a separate vote.

The SPEAKER. The Chair understands a separate vote is asked on the amendments named by the gentleman from Montana, and also on amendments 97 and 16. The Chair will submit the question on the other amendments.

The question being submitted, the House insisted on its disagreement to the other amendments.

The SPEAKER. The Clerk will now read amendment numbered 2, on which a separate vote is demanded.

Mr HARTMAN. Are we not entitled to have a vote on my motion as a whole?

The SPEAKER. The Chair thinks, the gentleman from Illinois having demanded a separate vote on the amendments, that they must be voted on in detail, each one of the amendments standing by itself. The Clerk will read amendment numbered 2.

The Clerk read as follows:

On page 2, after line 8, insert:
"For public building at Boise City, Idaho: For continuation of building, $50,000; and the limit of cost of said building and site is increased from $150,000 to $200,000."

The question being taken on the motion of Mr. HARTMAN to recede from disagreement, it was rejected.

So the House insisted upon its disagreement.

Mr. HARTMAN. In order to save the time of the House, the temper of the House being evidenced by the vote just taken, I will withdraw the demand for a separate vote on the other amendments.

The SPEAKER. The gentleman from Montana withdraws the demand for a separate vote, and as the Chair understands it, separate votes are only asked on amendments 16 and 97.

Mr. KEM. Do I understand, Mr. Speaker, that unanimous consent is asked to withdraw the demand for a separate vote?

The SPEAKER. Unless the gentleman from Nebraska demands a separate vote, it will not be taken on any of them.

Mr. KEM. I shall object to unanimous consent to withdraw.

Mr. CANNON. The gentleman has a right to withdraw the demand.

The SPEAKER. It is withdrawn; and the disagreement to these amendments, except 16 and 97, will be considered as insisted upon.

There was no objection.

Mr. LESTER. Now, Mr. Speaker, I ask a separate vote on amendment numbered 16, the other amendments having been nonconcurred in.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

On page 3, after line 14, insert:
"For court-house at Savannah, Ga.: For completion of building, $25,000; and the limit of cost of said building is increased $100,000."

Mr. CANNON. I yield to the gentleman from Georgia for five minutes.

Mr. LESTER. Mr. Speaker, I move that the House concur in this amendment.

In reference to this matter I have stated to the House on a former occasion the situation of that public building. Ten years ago this building was provided for, and shortly afterwards the erection was begun. Last year the foundation of the building—the first story, as it is called—was completed. Bids were then called for for the completion of the building, and also for finishing the face of it in marble to correspond with the ideas of the structure that ought to have been erected at that place, and for the purpose for which it is intended, namely, a court-house, post-office, and public building of the United States.

It turned out during the progress of the work that a site had been purchased and the building commenced, which was unsatisfactory. Afterwards an exchange was made for another site, and in the exchange the appropriation lost about $100,000. The consequence of this is that, instead of being able, so the Secretary of the Treasury informs me, to finish the building in marble or stone, they can finish it only in brick, as the limit of cost will not permit the other material to be used. That, however, is a fault lying in the fact that a loss was made on account of the $400,000 provided for in the first instance, because of the reason I have already stated, and unless the limit is extended to give to the Secretary the amount of money sufficient to complete the building in marble it will have to be completed in brick.

Now, we think, Mr. Speaker and gentlemen, that such a building ought not to be completed in that way. We do not think a Government building of that kind, in such a place, should be limited in cost so as to require the structure to be completed of brick, which is not suitable for the purpose. In order, however, that that shall be done this limit of cost must be extended. I will say to the House that bids were submitted both for brick and marble. It turned out that the bid for marble was more than the limit would allow, and the consequence was that the bid for brick was accepted. Afterwards it was discovered that the brick would not be suitable, and the contractor, at the instance of the Secretary of the Treasury, suspended his right to proceed with the contract until June 1, in order to give Congress an opportunity to extend the limit of cost of this building, so as to permit it to be built as it ought to be built. That time is now up. The Secretary of the Treasury has made an arrangement with the contractor to wait for two or three days more. At the end of that time he will go on with the construction of brick, because he has a right to insist upon his contract. He is willing to complete the contract in marble, provided the amount allowed by Congress is sufficient to pay him for doing it. That is the situation of affairs.

I ask that the Senate amendment which provides for the extension of the limit of cost for that purpose, and that purpose alone, be concurred in. I ask that the House recede from its disagreement and concur in the amendment of the Senate to that effect.

Mr. CANNON. Mr. Speaker——

Mr. GROSVENOR. I should like to know from the gentleman from Illinois [Mr. CANNON] how much is involved in all this disagreement between the two Houses.

Mr. CANNON. About $125,000 for a National Museum down here, and, I suppose, a matter of about five or six hundred thousand dollars on other buildings.

Mr. GROSVENOR. Somebody, in the end, will have to get down, of course.

Mr. CANNON. Yes.

Mr. GROSVENOR. Would it not be better for us to get down here, and let the other fellows get down part way?

Mr. CANNON. If the gentleman can reconcile this House to getting down on the public-building propositions, I have no objection.

Mr. GROSVENOR. I should like to aid the committee in reaching a conclusion.

Mr. CANNON. I want to be entirely frank. I think the gentleman from Ohio [Mr. GROSVENOR] could not have been present during all the time of the contest about this bill. The limit is broken for public buildings at Savannah, Camden, Kansas City, and three points in the Western States. A new building is authorized at Salt Lake. Now, there is no Senate amendment breaking the limit at Omaha or St. Paul, or any one of probably twenty or twenty-five other places where there are public buildings authorized and where gentlemen desire increases. There is no amendment for the public building in my district, nor any at Akron, Ohio; and so with reference to other places all over the country.

Mr. GROSVENOR. There is also a lack at Chillicothe, in my district, too.

Mr. CANNON. Yes. Now I want to say to the gentleman that I have no opinion about this contrary to the wishes of the House. I have said to the House time and again that if these public-building matters were receded upon, the House must do it; that as long as I was a conferee I would not assent to making a report that receded——

Mr. GROSVENOR. Without a vote of the House.

Mr. CANNON. Certainly. Now, let me say to the gentleman that the Senate, through its courtesy to various Senators, is standing pat, if I may use that word.

Mr. GROSVENOR. I do not understand that.

Mr. CANNON. Well, I will educate the gentleman if he will come around and see me this evening. [Laughter.]

Mr. MILLIKEN. How much will the gentleman's education probably cost him? [Laughter.]

Mr. CANNON. Now, a word. The Senate proposes legislation as well as appropriation in every one of these amendments. The rule between the House and the Senate has always been that where one body, on a general appropriation bill, proposes legislation and the other body will not agree to it, the body proposing the legislation recedes. Now, by that rule, if the House is stubborn and does not recede on this legislation authorizing these buildings, why, the Senate will have to recede. If, however, the House desires to recede, I hope it will do so at once.

Mr. GROSVENOR. I understand there is one of these buildings at Camden, one at Savannah, one at Kansas City, and one at Salt Lake City.

Mr. CANNON. Yes; and one at Boise City, one in Montana, and one at Cheyenne. There is also one at Salt Lake City, and the National Museum down here.

Mr. GROSVENOR. Well, the National Museum can wait.

Several MEMBERS. They can all wait.

Mr. CANNON. The Senate says it can not wait. I want the House to understand fully what the situation is, now that we all want to go home. If the House does not recede, then the other body, proposing the legislation, will recede, if it follows the unvarying rule. If, however, the House wants to recede, amen. So far as I am individually concerned, it is immaterial to me.

Mr. HENDERSON. Will the gentleman permit me to ask him a question?

Mr. CANNON. Yes.

Mr. HENDERSON. I understand that no public-building bills have been reported to the House at this session because of the condition of the Treasury.

Mr. CANNON. I know they have not reported one for Joliet, and none other.

Mr. HENDERSON. And no other bills have been reported on the part of the House.

Mr. CANNON. That is correct.

Mr. HENDERSON. If we recede, then the Senate accomplishes what we have refused to members of the House.

Mr. CANNON. Yes, sir.

Mr. GROSVENOR. Have not they accomplished their purpose on the naval bill?

Mr. CANNON. Not yet.

Mr. BOUTELLE. Oh, no; I hope not.

Mr. GROSVENOR. And do not they accomplish their purpose generally? Do not they insist; and usually do not they hold on and hold on, and after wearying ourselves out we finally yield to the Senate?

Mr. HENDERSON. Let us hold them down until we can take care of ourselves.

Mr. CANNON. I ask for a vote.

Mr. LESTER. I would like to have a few minutes more.

Mr. CANNON. I will yield the gentleman a minute. We have yet amendments where there is a real contest.

Mr. LESTER. Mr. Speaker, as I understand the question it is simply on this amendment, numbered 16, providing for a building at Savannah. I do not understand, Mr. Speaker, that this House has committed itself in any manner or shape to the proposition that it will not vote for a public-building bill at this session. The Committee on Public Buildings and Grounds agree to this very bill. They agreed, I understand, that they would not bring bills into this House for consideration; but the House has never committed itself; the House has said nothing; the House has done nothing on that subject whatever; and if the Committee on Public Buildings and Grounds has at any time objected to the way in which these public buildings have been placed upon this bill, I think I can say to the gentleman from Illinois that the Committee on Public Buildings and Grounds, since ten, at least, public-building bills have been put on in Senate amendments, they are not now so opposed to them as they were before. The only idea for not reporting these bills, as I understand it, is this, that inasmuch as the temper of the House was such that they could not get through their public-building bills, and could not get a day for their consideration, they had best not report back any bills on account of the opposition in this House. But I beg to state that the House itself here has already receded from its disagreement to the amendments in a number of cases. [Cries of "Vote!"]

The SPEAKER pro tempore. The time of the gentleman has expired. [Cries of "Vote!" "Vote!"] The question is on the motion of the gentleman from Georgia that the House recede from its disagreement to the Senate amendment and concur.

The question was taken; and the Speaker pro tempore announced that the noes seemed to have it.

Mr. LESTER. I call for a division, Mr. Speaker.

The House divided; and there were—ayes 67, noes 90.

So the House refused to concur, and insisted upon its disagreement.

The SPEAKER pro tempore. The Clerk will report amendment numbered 97.

The Clerk read as follows:

That under any law heretofore or hereafter enacted by any State, providing for the reclamation of arid lands, in pursuance and acceptance of the terms of the grant made in section 4 of an act entitled "An act making appropriations for the sundry civil expenses of the Government for the fiscal year ending June 30, 1895," approved August 18, 1894, a lien or liens is hereby authorized and shall be valid on and against the separate legal subdivisions of land reclaimed, for the actual cost and necessary expenses of reclamation and reasonable interest thereon from the date of reclamation until disposed of to actual settlers; and when an ample supply of water is actually furnished in a substantial ditch or canal, or by artesian wells or reservoirs, to reclaim a particular tract or tracts of such lands, then patents shall issue for the same to such State without regard to settlement or cultivation: *Provided*, That in no event, in no contingency, and under no circumstances shall the United States be in any manner directly or indirectly liable for any amount of any such lien or liability, in whole or in part.

Mr. LACEY. Mr. Speaker, I move to concur in this amendment with an amendment which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Concur in amendment numbered 97 with an amendment as follows: Strike out the word "and," in line 11, page 65, and insert the following: "To be created by the State to which said lands are granted, and by no other authority whatever, and when created."

Mr. CANNON. I yield the gentleman five minutes.

Mr. LACEY. Mr. Speaker, I do not know whether I can make this matter clear to the House in five minutes or not. This is a very important amendment, and one which, in my judgment, ought not to have been inserted in an appropriation bill; but we find it here, and it has been in repeated conferences. The Committee on Appropriations were desirous to obtain the views of the House upon this particular amendment. What was known as the Carey Act was passed in 1894, giving each of the States that had arid lands a million acres of land, with the requirement that the State should irrigate that land, make the necessary ditches, prepare the land for cultivation, and dispose of the land to actual settlers, and when the actual settlers occupied the land that then the patents should issue to the purchasers.

It has been found impracticable and impossible under that law for States such as Wyoming and Montana and others to comply with the terms of the law. They have constitutional provisions forbidding them to incur indebtedness exceeding $100,000, the most of which has already been exhausted. The limit has been either reached or so nearly reached that they are unable to borrow the money on the credit of the State so as to construct the necessary irrigating ditches. It is proposed now by this amendment to authorize those States to provide means by which liens can be created upon the land to be irrigated, and that those liens shall be enforced up to the time that the land is patented to the settler; and also to modify the Carey Act to the extent of providing that when the water and the irrigating ditches have been arranged so as to irrigate the land properly then patents to the land may issue at once.

Mr. HENDERSON. Is there not danger that large syndicates may get in there and monopolize the water?

Mr. LACEY. That would be within the control of the States; but that, I suppose, might be the result of this system. In fact it is impracticable to irrigate these very large tracts of land in a body without extensive and expensive reservoirs and ditches. It takes a large amount of capital to construct those reservoirs and ditches, and when the capital is put in, of course it involves combinations of capital. The proposition here is to make extensive reservoirs and ditches, and I repeat it is impossible to do that without combinations of capital. So that on the one hand we invite combinations of capital and on the other we say that we do not desire that they shall be made. The result has been that this barren land has remained unoccupied, and it will continue to be so and the States will be unable to avail themselves of the benefits of the Carey Act unless there is some such legislation as this.

Mr. HERMANN. If the gentleman will permit me, I will say that the experience of the arid land regions demonstrates the fact that money can not be obtained for purposes of irrigation until the General Government has given its assent to the creation of these liens, and I will add that this legislation is in accord with the general desire of the people of those States.

Mr. BRUMM. What is to prevent the States themselves from doing this?

Mr. LACEY. The States have constitutional provisions limiting their indebtedness, and it is impossible for them to borrow the necessary money. This land at present is utterly worthless. Nothing will grow upon it but sagebrush, and no living thing but lizards; but when the water is turned upon it, it blossoms like the rose. We have instances in Utah, in Montana, in Wyoming, in Arizona, and in New Mexico, where the most beautiful and fertile fields in the world have been reclaimed from this condition, and the States wish to have the experiment tried on a large scale.

My friend the chairman of the Committee on Appropriations [Mr. CANNON] has been unwilling to take up this matter. He has objected to this legislation, not because he thought it was bad legislation or because he was dissatisfied with the form in which it was proposed by the Senate, but because he thought that land legislation ought not to be incorporated in a general appropriation bill. He has, therefore, invited gentlemen connected with the Public Lands Committee to give this matter investigation so that he might have the benefit of their labors in that direction and might be aided in determining whether the proposed legislation would be beneficial or whether it would be wise to enact it. I have taken pains in this irregular way to confer with the representatives of those States and Territories——

The SPEAKER. The time of the gentleman has expired.

Mr. CANNON. I yield the gentleman from Iowa three minutes more.

Mr. LACEY. I have taken pains to confer with the Delegates and Representatives from these States in regard to this proposed amendment and also with gentlemen connected with the Committee on Arid Lands, and I think the amendment is a good one. The original Carey bill was a part of the sundry civil bill of 1894, and that was the difficulty about it. Having been put hastily into an appropriation bill, it was left in a crude form. I believe that this amendment of the Senate, with the amendment which I have just sent to the Clerk's desk, and which does not create the liens, but authorizes the States to enact laws by which liens can be created, will accomplish the desired result and enable these States to take these great bodies of land and try the experiment in good faith. If it should succeed, no doubt it will be deemed wise to convey to them further tracts of this land for the same purpose, and if it fails the Government will have lost nothing, because the land in its present condition is worth nothing.

A MEMBER. And this carries no appropriation?

Mr. LACEY. It carries no appropriation.

Mr. GROSVENOR. I wish to ask the gentleman from Illinois a question. Was this amendment put into this bill by the Senate?

Mr. CANNON. Certainly.

Mr. GROSVENOR. Is it not in the nature of new legislation?

Mr. CANNON. Certainly.

Mr. GROSVENOR. Is it competent, under our rules, on an appropriation bill?

Mr. CANNON. If it originated in the House it would not be; but, unfortunately, we can not get rid of a Senate amendment by a point of order under our rules.

Mr. GROSVENOR. Is it competent to have this Senate amendment put on the bill, and then to have new legislation added in the form of an amendment to that Senate amendment?

Mr. CANNON. If you consider it at all, it is competent to amend it.

Mr. GROSVENOR. Then this question of the Appropriations Committee standing firm in its opposition to new legislation depends upon the character of the new legislation?

Mr. CANNON. Not at all; and the gentleman is not just to himself or me when he makes that suggestion. I did not invite, nor did the House invite, this amendment. It is here. It is far reaching and important, covering the whole arid section. The Senate insists on this amendment being considered by the House. I went to the chairman of the Committee on Public Lands [Mr. LACEY] two or three days ago and told him I knew nothing about the matter, and asked him to consider it. I have gone to other gentlemen and said: "If this thing is to go, it ought to go in safe form." And the gentleman from Iowa [Mr. LACEY], exercising now his right as a member, moves that the House agree to the Senate proposition with an amendment. I can not help it. If the House wants the amendment of the Senate to go off the bill, let it say so, and I will insist that it go off so long as I may be continued as its servant. If the House wants to perfect the amendment, well and good. It is only along that line—obeying the will of the House so far as I can—that I am exercising all the patience I can in the premises.

Mr. GROSVENOR. I am in favor of the amendment and will vote for it, but I wanted to point out the fact that it makes considerable difference what the "new legislation" is.

Mr. CANNON. Oh, the gentleman is too old a legislator to show his resentment because an amendment that he was attached to has been "turned down."

Mr. GROSVENOR. I am an old enough member to know that it is just as incompetent to amend with "new legislation" an amendment of the Senate as it is to originate "new legislation" in the House.

Mr. CANNON. On the contrary, the gentleman when he makes that statement betrays his utter lack of parliamentary knowledge. On this proposition anything that is germane is in order as an amendment, the original amendment being before the House for consideration.

Mr. LACEY. The gentleman from Ohio could have made a point of order, if he thought it well taken.

Mr. GROSVENOR. I did not want to do so. I am in favor of the amendment.

Mr. CANNON. I now yield for a moment to the gentleman from Colorado [Mr. SHAFROTH].

Mr. SHAFROTH. Mr. Speaker, under the Carey Act each State, upon making certain improvements, is entitled to certain arid lands. That law has been found to be inoperative on account of the fact that large capital is required to undertake the reclamation of the arid lands. The amendment now proposed by the chairman of the Committee on Public Lands proposes to allow the legislatures of the States to authorize liens to be made so that capital can undertake the construction of these canals for the purpose of reclaiming the arid lands. This amendment offered by the chairman of the Committee on Public Lands proposes to perfect the Carey law and make it operative. It seems to me it should be adopted unanimously.

Mr. CANNON. I now yield five minutes to the gentleman from Nebraska [Mr. HAINER].

Mr. HAINER of Nebraska. Mr. Speaker, I think the legislation contemplated by these amendments is exceedingly dangerous, and that the House should be very slow in adopting it. I recognize the fact that the Carey Act as it now stands is inoperative. I also recognize the fact that these arid lands are practically of no avail without irrigation. I also recognize the very strong desire on the part of the people of the arid States that substantially this amendment be incorporated into law. Yet the constant policy of the Government in the past has been—and I think wisely so—to prevent the accumulation of vast bodies of lands in single holdings; in other words, it has been our policy that land monopolies should as far as possible be prevented.

The Carey Act cedes practically a million acres of land to each of the arid States for the purpose of reclaiming arid lands. The amendment proposed by the gentleman from Iowa would allow the legislatures of the States to make contracts with syndicates for such reclamation. This authority, I ask gentlemen to recollect, is to be given by the State legislatures. These legislative bodies are made up of gentlemen from various parts of the Commonwealth having no special interest in any particular tract of land, so that logrolling is practically invited. Even the Congress of the United States is not free from logrolling, as I have observed in the last few days. In the provision now pending you in effect place a special premium upon logrolling.

The argument is made that these lands are worth nothing without water. But the right to the water is given to the first appropriator of the lands under the law of these States. It follows that you give a practical monopoly of the water to the first company that may build the ditch. You give such company a lien on the land for the contract price, which may be fixed by the act of the legislature, and you make that a perpetual lien running at interest. I submit if we wanted to place these lands in single holdings in tracts of a million acres each we could not devise a better method than this. I simply point out this fact, and reenforce the suggestion already made that it is bad policy, fraught with great danger, to legislate on a matter of so much importance, involving millions of acres of land, on an appropriation bill under circumstances which do not permit the proposed legislation to be carefully considered and properly guarded. The greatest and most obnoxious monopolies of the past have been land monopolies. We should not in this hasty manner give life to the most stupendous land monopolies of the age.

I trust that the House will not pass this legislation here and now. It is a dangerous matter to deal with in this way. We will return here in December. There is no special hurry about it. There is no special demand at this time for any increased output of agricultural products in this country. Their prices are all low enough now, God knows. There is no crying need for this legislation. We can wait until next winter, then formulate legislation which will be safe and well guarded in the ordinary and business manner. I trust, therefore, that the amendment will be promptly voted down by the House.

Mr. HENDERSON. Have you any objection to the amendment proposed to the amendments of the Senate?

Mr. HAINER of Nebraska. Certainly.

Mr. HARTMAN. If the gentleman will permit me, I understand him to say that rather than take the chances of having the legislatures of the States make a proper contract with parties with reference to these irrigation matters, he will be entirely willing to let the waters still run to waste and continue on their way down to the sea without being utilized at all.

Mr. HAINER of Nebraska. What I say is that this is not a proper way to enact legislation of such an important character. I say further it is most dangerous to delegate to any legislative body the creation of such stupendous liens.

Mr. HARTMAN. Let me say to the gentleman that the failure now to adopt such a proposition as this will result in the suspension of the operations of four or five State enterprises—enterprises of magnitude in my own State, which will be precluded from further working during this entire summer.

Mr. HAINER of Nebraska. I make no question but that it would be temporarily hard on some such enterprises. But in the end I claim that it is for the interest of the people of this country.

Mr. OWENS. Does the gentleman think there is a good chance to get irrigation in that region without a combination of capital to produce that result?

Mr. HAINER of Nebraska. I hope so.

Mr. HARTMAN. It is impossible, let me say to the gentleman, for a man owning 160 acres of land to build an irrigating ditch 12, 15, 20, or even 30 miles long, as he must do in some cases, to take the water to his land and be able to make it a paying investment. The expense is too great for any man owning so small a tract of land.

Mr. HAINER of Nebraska. Well, the gentleman from Montana, like myself, is a lawyer, and not a practical irrigator. He probably knows very little about that subject.

Mr. HARTMAN. I beg the gentleman's pardon. I am also a lawyer, but I have had a great deal of experience in this matter, and I would state to the gentleman that I have probably tried more irrigating suits than the gentleman has ever had any connection with.

Mr. HAINER of Nebraska. That is probably true, for I have never tried any.

Mr. HARTMAN. And I am now the attorney for three large irrigating companies that are engaged in business out there. I have been all over that region and I know the difficulties that surround this subject.

Mr. HENDERSON. Do the laws of the State endeavor to protect their own citizens against unjust discriminations in this matter?

Mr. HAINER of Nebraska. They do as far as they can.

Mr. LACEY. I would ask the gentleman from Nebraska if he would not leave this subject to the State, to which he seems to object, where would he leave it?

Mr. WILLIAMS. And does not the objection go to the right of popular action in that matter?

Mr. HAINER of Nebraska. My point is simply this: You propose to put a vast body of land, millions of acres of land, in the hands of the legislatures of the States to be disposed of by contract, and you start out on the theory that the land is worthless. Now, I am combating that theory. That has been our theory in the past, under which we have made grants of immense bodies of our public lands which we afterwards regretted—grants made in haste and repented at leisure. We ought to go slow in this matter, in the light of our experience in the past, and not act ill advisedly, or without consideration on the part of the House, or on the part of its committees, and without taking the testimony of experts; but in this hurried manner, in the closing days of the session, place such legislation as this on the statute books—legislation that is not wholly or properly matured.

Mr. SHAFROTH. Have you any plan by which this can be accomplished other than that suggested by the gentleman from Iowa?

Mr. HAINER of Nebraska. No; I have not a plan, and I want time—that is the very essence of the matter—I want time in which the House may perfect a plan in order to meet the very difficulties that I apprehend will arise if action of this hurried and inconsiderate nature is taken.

Mr. LACEY. There is no other way than this, as far as I am able to understand.

Mr. WILLIAMS. None whatever.

Mr. CANNON. I yield now a few minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, I have much more confidence in the legislatures and the people of the arid States than the gentleman from Nebraska [Mr. HAINER] seems to have. I believe it is entirely safe to provide that the legislatures of the arid-land States shall pass such laws as may tend to the irrigation, cultivation, reclamation, and settlement of the lands within their borders.

The question of the irrigation of lands in the Western States and Territories is a paramount issue, perhaps the most important of all the questions that come before our people in that region for solution at the present time. These matters have been discussed for years. Our people fully understand the conditions that surround us and the difficulties of irrigating those tracts of arid lands still left to be irrigated. I know that in my own State and in all the Western States, so far as the legislatures have acted upon the question of irrigation of the arid lands and the distribution of water, there can be no question about the laws passed having been such as to absolutely protect the citizen holding small tracts of land in his water rights.

The Carey land act, passed by the last Congress, was intended to provide for the irrigation of large tracts of land in the various States and Territories that could not be irrigated by small holders in small tracts. The time has passed, in most of the Western States, when the individual holder, the small farmer, can extend further the irrigation systems. The tracts of land lying along the mountain streams have long since been filed upon, and where ditches could be taken out at a moderate cost, that has been done. There remain vast tracts of bench lands, back some distance from the larger streams, requiring the expenditure of a vast amount of capital for their irrigation. It is absolutely necessary that, in inviting capital to the irrigation of these vast tracts, we shall make such provision as shall absolutely insure to capital a fair return on the investment made. We simply provide in this amendment that the State shall pass such laws as will adequately protect both the capitalists and the small holders of land.

Now, in regard to the water laws, the gentleman from Nebraska says that the prior appropriator has the use of the water, and that thereby we create a monopoly. Not at all; the water, when diverted to the land, becomes appurtenant thereto. The land can be patented only to actual settlers, in tracts not exceeding 160 acres each. The settler is absolutely protected, and there is no possibility of monopolistic holdings.

Mr. HAINER of Nebraska. This very amendment proposes a perpetual lien——

Mr. LACEY. Not a perpetual lien; a lien until patents issue.

Mr. WILLIAMS. A lien until payment.

Mr. MONDELL. It is but reasonable when capitalists undertake to irrigate vast areas of desert land, which, without irrigation, will absolutely not sustain animal or vegetable life, that they should expect to be reasonably protected in the investment they make. It is only by providing for this protection that we can ever hope to have our country developed. It is true there is no particular need at this time for an increase of the agricultural output, but we of the Western States do not care to be held back by the same argument that for a long time was made with a view of retarding the development of the great interior valley of our country, namely, that there was enough produce raised in the East to supply the nation. This country is developing rapidly; our population is increasing rapidly. It may be that to-day we do not need any more agricultural lands, but shall we say that the time has now come when the magnificent development of this country in an agricultural direction shall cease, because forsooth the Mississippi Valley raises a large quantity of agricultural produce? [Applause.]

Mr. CANNON. Mr. Speaker, I should be glad to have a vote, but before it is taken I want to see if I am correct. The gentleman from Montana [Mr. HARTMAN], the gentleman from Colorado [Mr. SHAFROTH], the gentleman from Wyoming [Mr. MONDELL], who has just spoken, and the gentleman from Utah [Mr. ALLEN]——

Mr. LACEY. And the gentleman from Idaho [Mr. WILSON]——

Mr. CANNON. And the gentleman from Idaho [Mr. WILSON], who represent these arid regions, as I understand it, indorse this Senate amendment with the proposed House amendment. Am I correct?

Mr. HARTMAN. That is correct.

Mr. CANNON. Because in the future, if it breeds evil, I want to wash my hands of it. I do not know anything about it.

Mr. HENDERSON. I want to say to the House that there are two other conference reports ready and that a third will be ready by the time they are disposed of, and if members will stay right here and keep together and keep on with the work we shall get along pretty well this evening. [Applause.]

Mr. SHAFROTH. The Committee on Arid Lands have had this matter under consideration, and we have practically indorsed this same proposition. [Cries of "Vote!" "Vote!"]

Mr. CANNON. With the understanding that these gentlemen indorse this proposition, I ask for a vote.

The SPEAKER. The question is on concurring in the amendment of the Senate numbered 97, with the amendment which has been reported to the House.

The motion was agreed to.

Accordingly, the House concurred in amendment of the Senate numbered 97, with an amendment.

Mr. CANNON. I believe that completes the amendments to that bill.

The SPEAKER appointed as conferees Mr. CANNON, Mr. HAINER of Nebraska, and Mr. SAYERS.

RETURN OF A BILL TO THE SENATE.

The SPEAKER. The Senate has sent to the House the following resolution:

Resolved, That the Secretary request the House to return to the Senate the bill (H. R. 1189) granting a pension to Eliza Standford.

Mr. PARKER. I offer the resolution which I send to the Clerk's desk.

The Clerk read as follows:

Resolved, That the Committee on Pensions be discharged from the further consideration of Senate bill (S. 1189) granting a pension to Eliza Sandford, and that the same be returned to the Senate in accordance with their request.

The resolution was agreed to.

NAVAL APPROPRIATION BILL.

Mr. BOUTELLE. Mr. Speaker, I call up the conference report on the naval appropriation bill.

The Clerk proceeded to read the report.

Mr. BOUTELLE. Mr. Speaker, I would suggest, if it is in order, that a brief statement might save the time of the House.

The SPEAKER. If there be no objection, the gentleman can make a statement.

Mr. KEM. I object, Mr. Speaker.

Mr. BOUTELLE. I reckoned without the gentleman from Nebraska.

The Clerk resumed the reading of the report.

The SPEAKER. The Chair would like the attention of the gentleman from Maine. This is a conference report which has been disagreed to by the Senate.

Mr. BOUTELLE. Yes, sir; it has been disagreed to.

The SPEAKER. What motion does the gentleman make?

Mr. BOUTELLE. The Senate desire the return of the conference report, and request a further conference.

The SPEAKER. Then, the gentleman can reach that by moving that the House agree to the Senate's request.

Mr. BOUTELLE. I desire to make that motion, but I also feel that it is due to the House to state the situation of this bill.

Mr. Speaker, the committees of conference of the House and Senate at the time of the last disagreement had finished the consideration of the bill with the exception of the portion relating to the construction of new ships, and also including the provision in regard to the price of armor plate, some amendments of the Senate in regard to the number of ships that should be built in certain localities, and various other minor provisions. The bill as it came back to the House from the Senate contained an amendment providing that the Secretary of the Navy, in making separate contracts for armor plate, should not make a contract to pay more than $350 per ton, and that if he failed to make contracts at that price he should report the fact to Congress at the next session.

I stated to the House on a previous occasion that the Secretary of the Navy, in an official communication, had called attention to some of the provisions of the amendment which it is thought would lead to confusion, and attention was called to that point by the House conferees, with the purpose of having the difficulties removed. This morning, at a conference on this bill, an agreement was reached between the conferees of the two Houses, based upon a proposition made to your conferees in the nature of a compromise. The compromise consisted in a reduction of the House requirement for the construction of four ships, and an increase over the Senate vote for two ships, to a provision for three battle ships; and accompanying that proposition was a modification of the clause in relation to the purchase of armor, raising the limit of price from $350 to $425 per ton.

It also provided for the contingency to which the Secretary of the Navy had referred in his official letter to the chairman of the Committee on Naval Affairs of this House in regard to the possibility of contractors making bids for the construction not only of the hulls of the ships, but of the armor also, in which case the Secretary thought that a construction of the amendment might be made that would remove entirely the limit of price to be paid for armor to the contractor for the full ship, while the limitation would still be held applicable to any contract made separately for the manufacture of that material. The original amendment provided that the Secretary should not contract at above $350 per ton, and, failing in that, should report the fact to Congress. The compromise amendment included a provision that the Secretary of the Navy be authorized to contract for the armor required for the ships to be authorized this year at a price not exceeding $425 per ton, and also required him to cause an investigation of the whole subject of the cost of armor plates to be made, and to report to Congress at its next session, not later than the 1st day of January.

In view of all the circumstances, especially including and giving prominence to the lateness of the session, in view of the fact that this bill had passed the House of Representatives on the 26th day of March, seventy-two days ago, during nearly all of which time this great public measure has been in the possession of another branch of Congress than that which I am now addressing, your conferees felt that they would be justified, if they could thereby report to the House a final agreement upon this bill, in making concessions to the Senate conferees, and they therefore agreed to the compromise, with such an understanding, however, as could be had under the circumstances that there was no considerable doubt that the compromise would be acceptable to and promptly accepted by the Senate.

I may be permitted to state that the rejection of the conference report was, as I am informed, by only 2 majority, and it seems to have been based entirely upon dissatisfaction with the clause in regard to the price of armor plate. I do not think there is any probability that the conference report would have been disapproved by the Senate on account of the number of battle ships authorized, but a controversy arose over the provisions in regard to armor plate, the limit of price of which had been raised in conference from $350 to $425, and the result is a disagreement to the report and the return of the papers to this House. I feel it my duty, not only to myself and my colleagues on the conference committee, but to the House of Representatives itself, to say, in reply to very serious statements which have been made elsewhere and which are likely to find their way to the public, that neither the House of Representatives nor the conferees whom it has appointed have been in any way responsible for delaying this bill or for insisting upon the fixing of a price to be paid for this war material.

I am entirely frank in saying that, this House having sent to the Senate a naval appropriation bill framed along the customary lines and, in accordance with previous bills, providing an extreme limit for the cost of a ship, beyond which the Secretary of the Navy should not be permitted to make contracts, but within which he is permitted under the law—a very specific and carefully guarded law passed as long ago as 1886—to make contracts with the lowest bidder, after public advertisement, for the construction of vessels and the furnishing of materials, the conferees on the part of the House had no information, and they have not at present any information, such as would justify them in assuming to fix the price that should be paid for armor plate.

Mr. McMILLIN. Does my friend think that the amount fixed by the Senate would not be a fair compensation for the plate?

Mr. BOUTELLE. I will repeat to the gentleman my last sentence, that the conferees on the part of the House, or the Committee on Naval Affairs of the House, have not had and have not now in their possession any such information as would enable them to determine that question. Up to this time it has been regarded as a matter entirely of executive administration. It has been one of those things that Congress has deputed to the executive administration of the Government, just as it has deputed the purchase of the supplies used for the Government service. The only information of which I have even incidental knowledge is in the nature of reports that have reached the public press, and of which I have personal cognizance, that a committee of the other branch of Congress—not the committee from which the conferees on this bill were appointed, but the Committee on Naval Affairs—have made during the present session an investigation in regard to matters connected with the furnishing of armor and cognate matters, and that this amendment which was put upon the naval bill in the Senate was the result of that investigation, or that it represented to a certain degree the conclusions of that committee.

How full their investigation was, how complete their information may have been, I have no means of ascertaining, because I have not known anything about the evidence adduced before them until within a few days, when I was furnished a copy which had been printed for the use of the committee solely. Neither Congress nor the public has had access to the information upon which the Senate amendment was based. For these reasons, Mr. Speaker, your conferees have, throughout the consideration of this measure, simply held the position that they were not sufficiently informed to feel justified in attempting to fix the price at which the Secretary should be permitted to contract for this armor plate.

Mr. McMILLIN. What would be the cost of the armor of one of these battle ships according to the usual contracts?

Mr. BOUTELLE. The armor for the hull—what is known as the hull armor—on the *Kentucky* and *Kearsarge* was estimated by the Bureau to cost about six hundred thousand and odd dollars.

Mr. McMILLIN. And how much for the armor for the other portions of the vessel?

Mr. BOUTELLE. I can not give the figures exactly without consulting papers.

Mr. McMILLIN. Approximately?

Mr. BOUTELLE. Well, the contract price for those two ships for the hulls and machinery, without the armor, was $2,250,000 each. The hull armor was estimated to cost about $600,000, and the armament, which included all of the guns and such portions of the armor as are used for gun defense, was to cost about $2,400,000 more, making a total of $5,300,000.

Mr. McMILLIN. Then it is safe to estimate that the armor cost of one of these vessels is not under a million dollars?

Mr. BOUTELLE. Possibly so. But before I enter into that detail I would like to complete my statement as to the attitude assumed by the conferees of the House. I want to say again that we did not undertake to determine the question of the proper price for armor plate, because we had no data before us to enable us to determine it. Not only have we never had any official communication from the Department requesting us to investigate the matter, but we actually never did investigate it. Therefore, we simply insisted that the whole responsibility for fixing a price for the armor should be assumed by others than ourselves. We were not ready to say that the Secretary should pay a certain price or should not pay a certain price. I desire to say, as a matter of fact, that the original amendment fixing the price of armor at $350 per ton and the amendment made to the bill as reported to the Senate to-day, raising that price from $350 to $425 per ton, were entirely the work of others than the House conferees. We had nothing whatever to do with fixing those terms. But when that proposition came to us coupled with a request that we yield one of the vessels for the sake of an agreement, we yielded to the proposition that came to us from the other body; and that report was made to the Senate.

So I desire, Mr. Speaker, with all the explicitness and all the emphasis that it is possible for me to use, to correct and refute the statement which I must assume was inadvertently made in another place, that the House, through its conferees, has been

throughout these conferences holding the Secretary of the Navy at the mercy of the contractors for furnishing armor plate. We have had nothing whatever to do with that matter, except that when a final proposition comprising two or three factors of compromise and agreement was presented to us we agreed to that compromise, and it was reported to the Senate.

That brings the matter back here with the request for the appointment of a new conference committee. I desire to say that the House conferees have almost exhausted industry and patience, and have drawn unlimited drafts on their good nature, in the endeavor to discharge their duty to this House and to bring about legislation. Under the conditions which obtain here with regard to all these bills, and with which we are all familiar, that is a very difficult task. I ask the House to repose further confidence in its conferees—to accept this report and further insist on its disagreement. I yield for a moment to my colleague on the committee, the gentleman from New York [Mr. CUMMINGS].

Mr. CUMMINGS. Mr. Speaker, in the Fifty-third Congress an investigation into this armor-plate business was made by the Naval Committee of the House. That committee reported a resolution or resolutions asking for the removal of certain plates upon certain battle ships and testing them for the purpose of continuing the investigation. This House unanimously passed that resolution and sent it to the Senate. The Senate put it to sleep. They thus virtually refused the continuance of the investigation. Now the Senate Committee on Naval Affairs has held an investigation on its own hook, and instead of asking a vote of the House on it or anything of that kind, they inject into this naval appropriation bill a provision which, if placed there in this House, would have gone out on a point of order, and they attempt to force that, through the Senate Committee on Appropriations, upon the conferees of the House.

There is hardly an item in this naval appropriation bill placed there by the Senate to which the House conferees have not agreed for the purpose of closing up the business of this session and getting home. The only important item left was the provision in regard to the four battle ships. We have promptly attended the conferences. They have been always delayed on the Senate side. On this side the instant anything was done in the conference committee the House acted promptly. The matter has been held over, just as the matter was held over in the short session of the last Congress, when this House was forced to vote on the naval appropriation bill as it came from the Senate and to accept all their items without even the courtesy of a conference committee. The same pressure, through this shrewd delay, is being placed upon this House to-day.

In a spirit of fairness, in a spirit of justice to the House, and with a due regard to the safety of the country, we to-day accepted a proposition made by the Senate conferees. It was not our proposition. We stood on instructions from the House by 60 majority. We accepted it with the assurance that the Senate would pass it—that there was no doubt about it. But we accepted it with this reservation, that in case the Senate did not accept it the whole matter should stand where it was when we went into conference again this morning—four battle ships under the usual provisions.

I feel that the House should know these facts before voting upon the bill, so as to know where it is standing and whether it is a coordinate branch of this Government or whether we are the satraps and servants of another branch. No more now, Mr. Speaker.

Mr. BOUTELLE. I desire only to add that the naval bill was passed last year under a suspension of the rules at 2 o'clock in the morning, without even being read in this House; that we have in this bill yielded to nearly every amendment that was originally put upon it by the Senate. Many of those amendments were not specially important. But we have exhausted every possible means of extending all parliamentary courtesy to that body. Now, I ask that the House further insist on its disagreement and agree to the further conference asked by the Senate.

The motion of Mr. BOUTELLE was agreed to.

The SPEAKER announced the appointment of Mr. BOUTELLE, Mr. ROBINSON of Pennsylvania, and Mr. CUMMINGS as conferees on the part of the House at the further conference.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had disagreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes, had further insisted upon its amendments numbered 32, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 51, and 52, disagreed to by the House of Representatives, had asked a further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HALE, Mr. QUAY, and Mr. GORMAN as the conferees on the part of the Senate.

The message also announced that the Senate had passed the bill (S. 3059) granting a pension to William Soden; in which the concurrence of the House was requested.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, the bill (S. 3059) granting a pension to William Soden was taken from the Speaker's table and referred to the Committee on Invalid Pensions.

ENROLLED BILLS SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles:

A bill (H. R. 1826) granting a pension to Henry Prince;

A bill (H. R. 6826) granting a pension to Rhoda Augusta Thompson, daughter of the late Thaddeus Thompson, a private in the Revolutionary war;

A bill (H. R. 6603) to pension the minor children of Patrick F. Reynolds; and

A bill (S. 2169) to regulate mail matter of the fourth class.

POST-OFFICE APPROPRIATION BILL.

Mr. LOUD. Mr. Speaker, I present a conference report on the Post-Office bill.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6614) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 3.

That the House recede from its disagreement to the amendments of the Senate numbered 5, 6, 7, 9, 10, 11, 12, 13, and 14, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$10,500,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For pay of letter carriers, $12,243,000; for marine free-delivery service, $3,500; for horse hire allowance, $344,000; for car fare and bicycle allowance, $170,000; for street letter boxes, posts, and pedestals, $15,400; for package boxes, $10,250; twelve mechanics in the six largest cities, exclusively employed in repairing boxes and locks, and erecting boxes, planting posts and pedestals, at $900 per annum, $10,800; incidental expenses, including repairs, painting, freight, straps, time cards, maps, directories, furniture, etc., $24,000; in all, $12,818,250: *Provided*, That 10 per cent of the foregoing amount for free-delivery service may be available interchangeably for expenditure in the objects named, but no one item of appropriation shall thereby be increased more than 10 per cent: *Provided further*, That $10,000 of this amount may be used to defray the expenses of experiments in rural free delivery, under the direction of the Postmaster-General, and that the amount heretofore appropriated for this purpose and still unexpended be available for said experiments."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$28,000,000"; and the Senate agree to the same.

On the amendment of the Senate numbered 1 the committee of conference have been unable to agree.

E. F. LOUD,
GEO. W. SMITH,
J. C. KYLE,
Managers on the part of the House.

W. B. ALLISON,
R. F. PETTIGREW,
CHAS. J. FAULKNER,
Managers on the part of the Senate.

Mr. LOUD. I ask that the statement accompanying the report be inserted in the RECORD.

The SPEAKER. The statement will be incorporated in the RECORD.

The statement of the House conferees is as follows:

The managers on the part of the House submit the following statement in writing, showing the nature and effect of the Senate amendments retained in the bill, and also those stricken out by the action of the conferees in the report herewith submitted:

Amendment 1. Conferees report a disagreement. It provides that no consolidation of post-offices shall hereafter be made when such office to be consolidated is beyond the corporate limits of the city or town into which said office is to be consolidated, and further, when such consolidation has included a county seat the post-office shall be reestablished and the consolidation cease.

(2) The effect of which is to reduce the amount by $100,000 as carried by Senate and an increase of $50,000 as provided by House for compensation to post-office clerks.

(3) Senate recedes, leaving amount to be expended for clerk hire in third and fourth class offices discretionary instead of mandatory.

(4) Senate recedes and allows the segregation in free-delivery service to stand as it passed the House with the following amendment: *Provided*, That 10 per cent of the foregoing amounts for free-delivery service may be available interchangeably for expenditure on the object named, but no one item of appropriation shall thereby be increased more than 10 per cent. Also provides for amount of $10,000 and any unexpended balance now remaining for rural free delivery; strikes out proposition relating to employment of post-office inspectors to be paid out of money appropriated for support of free-delivery service, and makes 10 per cent of each item available for use in any other item, provided said item is not increased thereby more than 10 per cent.

(5) The House recedes and agrees to amendment of Senate increasing amount for "postmarking" and "rating stamps," $2,500.

(6) The House recedes and agrees to increase proposed by Senate of $20,000 for mail bags, catchers, repairing, equipment, etc.

(7) The House recedes and agrees to amendment of Senate which increases amount to be expended for mail locks, keys, etc., $5,000.

(8) Increases amount as provided by House $500,000, and reduces by $500,000 amount provided by Senate for inland transportation by railroad routes.

(9) Increases by amount of $100,000, as provided by House, for pay of railway post-office clerks.
(10) Provides that $10,000 of amount for transportation of "foreign mails" may be used for transferring of such mails between steamboat piers in New York City and Jersey City and the post-office and railroad stations.
(11) Is a new item of $80,000 for pay of carrying mails by Oceanic Steamship Company from San Francisco to Hawaiian Islands and Australian colonies, and is agreed to on part of House conferees.
(12) Is for rent of office for use of agent of Post-Office Department for distribution of stamps, $600; and is agreed to by House conferees.
(13) Accepts the consolidation in one amount of money provided for mail depredations and post-office inspectors, as has been provided in appropriation bills heretofore, and discards segregation of items as provided by House bill; increases amount above House bill $3,906.34, and is same as provided in estimate of Post-Office Department for said service.
(14) Reduces amount for detection and arrest of post-office burglars, highway mail robbers, etc., $10,000 below amount carried in House bill.
Senate recedes $600,000.
House recedes $762,006.34.
The bill as it left the House carried $91,904,257.88.
The bill as it left the Senate carried $93,256,264.22.
And as agreed to by the conferees, $92,656,264.22.

E. F. LOUD,
J. C. KYLE,
GEO. W. SMITH,
Managers on the part of the House.

The conference report was adopted.

Mr. LOUD. Mr. Speaker, I move that the House further insist on its disagreement to the remaining amendment of the Senate and agree to the conference asked by the Senate on the disagreeing votes thereon.

The motion was agreed to.

The SPEAKER announced the appointment of Mr. LOUD, Mr. SMITH of Illinois, and Mr. KYLE as managers of the conference on the part of the House.

INDIAN APPROPRIATION BILL.

Mr. SHERMAN. Mr. Speaker, I submit the following report on the Indian appropriation bill.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 64, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That the Secretary of the Interior be and is hereby directed to withhold any further distribution and payment out of the money derived from 35 per cent of the judgment in favor of the Old Settler or Western Cherokee Indians against the United States in the sum of $800,386.31, set apart for the payment of expenses and for legal services justly and equitably payable on account of the prosecution of said claim until otherwise authorized by law."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: Strike out, in line 9, in the matter inserted by said amendment, the word "ninety-eight" and insert in lieu thereof the word "ninety-seven."

J. S. SHERMAN,
CHARLES CURTIS,
GEO. C. PENDLETON,
Managers on the part of the House.

R. F. PETTIGREW,
H. M. TELLER,
F. M. COCKRELL,
Managers on the part of the Senate.

The statement of the House conferees is as follows:

Statement of House conferees to accompany conference report No. 5 on Indian appropriation bill.

The Senate recedes from its amendment numbered 64, being the so-called Old Settlers claims, with an amendment. The amendment simply directs the retention of the funds in the hands of the Secretary of the Interior until disposed of by direction of Congress.

The House concurs in Senate amendments 69 and 70, being the so-called sectarian schools amendments, with an amendment limiting the time within which contracts can be made with such schools to July 1, 1897, instead of July 1, 1898. The declaration as to the policy of the Government to not longer contract with such schools remains unchanged.

J. S. SHERMAN.
CHARLES CURTIS.
GEO. C. PENDLETON.

Mr. SHERMAN. Mr. Speaker, this is the final report on the Indian appropriation bill. Amendment numbered 64 relates to the so-called Old Settlers claim. Upon that the Senate conferees were very insistent. The House conferees were equally insistent upon striking it out. That amendment has been discussed at every one of our numerous meetings, as many as six or eight, I think. The House conferees finally announced to the Senate conferees as an ultimatum that they never would agree to the amendment, but did offer to refer all the claims therein contained to the Court of Claims. This suggestion did not meet with the approval of the Senate conferees, so we could not meet on that proposition. Finally the Senate conferees, at our last meeting, made the offer which the conferees accepted, to wit, to strike out all the claims enumerated, amounting in all to about $80,000, but to insert a provision prohibiting the Secretary of the Interior from paying out this money, keeping it in his hands, so that that matter might be disposed of in the appropriation bill next session. The House conferees were loath to accept this, but, as gentlemen in the House understand, where there are radical differences, there must be some concessions on both sides, and as it seemed to us absolutely essential to go thus far, we have done it.

Amendment numbered 70 is simply a formal amendment, in connection with the so-called sectarian schools, adding simply the word "further," in case the modified Senate amendment 69 is agreed to, and in that we concur.

Amendment numbered 69 is the one in reference to sectarian schools. On that question the House a week ago instructed its conferees to insist upon its disagreement and insist upon the House provision. We followed that instruction during several meetings. We insisted upon this section as passed by the House. The Senate instructed its conferees to insist upon their provision, and during half a dozen meetings we have deadlocked right there. Finally, at the last meeting, we reached a middle ground, and that middle ground is contained in this report. The House provision of this bill put a stop to all contracts for so-called sectarian schools at once, at the end of the fiscal year, and declared it to be the policy of the Government to expend no money for sectarian schools hereafter.

The Senate amendment made the same declaration with reference to sectarian schools, and provided that no appropriation should be expended for this purpose after July 1, 1898, or the second fiscal year in advance. The proposition as finally agreed to substitutes the words "ninety-seven" for "ninety-eight." The section provides further that during the next fiscal year the Secretary of the Interior may contract for the education of children in these schools but to an amount not exceeding 50 per cent of the amount contracted for in the fiscal year ending June 30, 1896; with the further provision that the Secretary shall only make such contracts at places where nonsectarian schools can not be provided for. So if the House accepts the amendment that the conferees propose no sectarian schools will be supported after July 1, 1897, anyway, and during the next fiscal year there can be expended not to exceed 50 per cent of the amount expended in the present fiscal year.

Now, it does seem to me, Mr. Speaker, that the House being decidedly one way and the Senate decidedly another, that this provision is fair and reasonable, and ought to meet the demands of each side; that upon that ground we ought to agree without any further difficulty, whether the members of the House believe in the continuation of sectarian schools or not. It seems to me that is a fair ground on which they can meet. The next appropriation bill will be framed by this same House. The matter will be finally disposed of by the same gentlemen who dispose of this bill. The Secretary of the Interior can not expend to exceed one-half of what he expended during the last fiscal year, and he can not expend anything, where it is possible for him to make other provisions, under the wording of this section. That is reasonable, and I hope that the report will be adopted.

Mr. ALLEN of Mississippi. I understand the gentleman to say that the whole business is concluded in 1897.

Mr. SHERMAN. That is right. At the end of the next fiscal year the whole business is concluded under the terms of the amendment which we have agreed upon. July 1, 1897, terminates the whole business of contracts for sectarian schools.

Now I will yield five minutes to the gentleman from Massachusetts [Mr. FITZGERALD] if he desires it.

Mr. FITZGERALD. Mr. Speaker, it seems to me that the proposition which has been submitted by the conferees and accepted by the Senate is a very fair one, and ought to meet with the approval of a majority of the members of this House. It provides—

That the Secretary of the Interior may make contracts with the present contract schools for the education of Indian pupils during the fiscal year 1897, but shall only make such contracts at places where nonsectarian schools can not be provided for such Indian children, and to an amount not exceeding 50 per cent of the amount so used for the fiscal year 1895.

The subject of appropriations for these schools has lead to a great deal of ill-tempered criticism by many of the advocates of extreme Americanism; and I think it is due the American people at this time to make a plain statement of the exact condition of affairs. The contract system for the education of Indian children was first established in 1870 at the suggestion of President Grant, and increased rapidly after the year 1885. No single church and no single creed was conspicuously prominent in trying to obtain contracts for the education of Indian children. The Government importuned the various sects to establish these schools and encouraged them to spend very large sums of money in the construction of buildings to properly educate the Indian youth. It so happened that the Catholic Church took more interest in reclaiming the Indians from infidelity than the other denominations and spent more than $1,500,000 throughout the States and Territories. She was encouraged in this from time to time by the Commissioners of Indian Affairs and the Secretaries of the Interior.

Mr. Oberly, in his report as Commissioner of Indian Affairs in 1888, said:

The Indian Office avails itself of every suitable means for the education of Indian youth, and since Government appropriations are insufficient to support the pupils who are anxious to enter schools, and since, also, Government school buildings will accommodate but little more than one-fourth of the number of children of school age, it has become the policy of the office to make contracts for the education of the Indian children with religious organizations that agree to train the pupils properly and to furnish buildings suitable for their accommodation.

Acting upon liberal invitations like these, the Catholic Church entered actively into the work of Indian education, and thus the contract system was extended from year to year until it has assumed its present proportions.

The contract schools, while supplying equally as good education and facilities for education for the Indian youth as the Government schools, are much more economical, as will be seen from the following statement:

For the fiscal year 1896 the average per capita cost to the Government of contract schools is, for boarding pupils, $114, and for day pupils $30, while the Government schools cost $161 per capita for boarding pupils and $37 per capita for day pupils, making the expense of the Government boarding schools 44 per cent more and the day schools 23 per cent more than the contract schools. It follows that, if all the contract schools were abolished and their pupils placed in Government schools, the Government, in addition to the amount that would be required in erecting and equipping the schools, surely not less than $1,500,000, would be put to an annual expense of at least 44 per cent more for boarding and 23 per cent more for day schools than is now necessary for the care and tuition of pupils in such schools.

It is a well-known fact that money appropriated is for food, lodging, clothing, tuition, and medical attendance.

About $310,000 is now needed for contract boarding pupils and $8,000 for day pupils. If these pupils were placed in Government schools, the annual cost to the Government would be about $450,000 for boarding and $10,000 for day pupils; that is, an additional cost of $142,000. In every item in the present Indian bill in aid of Government schools an appropriation of $167 per head is allowed for the education of every Indian pupil.

Those very gentlemen who argue against the Senate amendment on the ground of sectarianism within a very short period in this very bill voted for an appropriation for the Lincoln School at Philadelphia, which is under the control of the Episcopalian Church, and for the Hampton (Va.) school, under the control of the Congregationalist denomination. Indian children are educated in both these schools.

To prove that these schools are sectarian I wish to quote the following:

An act to incorporate the Lincoln Institute.

SEC. 3. The affairs and concerns of the said Lincoln Institute shall be conducted by a board of managers consisting of 30 ladies and a board of council consisting of 30 gentlemen, of which board the bishop of the Protestant Episcopal Church of the diocese, together with the rectors of the churches which shall be represented in the board of managers, shall be ex officio members.

SEC. 4. Applicants may be admitted without regard to their religious belief, but the inmates shall in all cases have respect for the faith of the Protestant Episcopal Church of the United States and submit to the religious exercises of the household, which shall always be in accordance with the belief of that church; and all children received under 12 years of age shall be trained in that faith.

The report of superintendent of Hampton Institute says:

Almost every teacher in the institute is also a teacher in the Sunday school, those who lead colored classes during the week meeting with the colored school on the Sabbath and the Indian teachers with the Indians. In order to give unity to the religious teachings of the week, the subject for study in the international series of Sunday school lessons has been made the subject of the prayer meeting during the week.

The Sunday school is the center of the religious work of the school and the teachers representing five different denominations become responsible for the religious training of the students, a large portion of whom are Baptists and Methodists.

It is submitted that the foregoing extracts prove clearly that the Hampton Institute and Lincoln Institution are religious schools. Does it not follow that an appropriation, such as is made yearly by Congress for the education of Indian youth at these schools, is an appropriation of money for the propagation of religion? And is this not just as much union of church and state as would be the appropriation of money for the education of Indians in Catholic schools? [Applause.]

Sectarianism is only seen by these worthy gentlemen when it can be used as a club against the Catholic Church.

The Senate amendment simply makes provision for the education in the contract schools of those pupils who can not be provided with instruction in the Government schools, and the simple alternative presents itself of putting the Indian pupils out on the prairies without education and without restraint, or allowing them to receive instruction in the contract schools until such time as the Government can make suitable provisions for them. This proposition ought to meet with the approval of every person not guided by bigotry or prejudice. I am aware, however, that a large number of the members of the House either belong to or are largely influenced by that nefarious organization known as the A. P. A., and this matter is not the only instance of the interference of this organization during this session.

I think it might be well at this time, in order to show how far back the members of this organization can trace their American ancestry, to note the fact that a certain Mr. Palmer, who was elected supreme secretary of the association at its national convention held here three weeks ago, took out his naturalization papers in the State of Montana one year ago last October.

And yet this man dares to tell native-born Americans what rights and privileges are justly theirs in the United States of America!

Read what two famous Americans say about such organizations as the A. P. A.:

All secret, oath-bound political parties are dangerous to any nation, no matter how pure or how patriotic the motives and principles which first bring them together. No political party can or ought to exist when one of its corner stones is opposition to freedom of thought and to the right to worship God according to the dictates of one's own conscience, or according to the creed of any religious denomination whatever.—*U. S. Grant.*

Secret society politics—Knownothingism—had about as many elements of persistence as an anticholera or antipotato-rot party would have.—*Horace Greeley.*

In October, 1893, the following joint resolution authorizing the State of Wisconsin to place in Statuary Hall, at the Capitol, the statue of Père Marquette was unanimously adopted by Congress:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the State of Wisconsin be, and is hereby, authorized and granted the privilege of placing in Statuary Hall, at the Capitol, the statue of Père Marquette, the faithful missionary whose work among the Indians and explorations within the borders of said State in early days are recognized all over the civilized world, the same to be received as one of the two statues furnished and provided by said State in accordance with the provisions of section 1814 of the Revised Statutes of the United States.

In accordance with that vote, almost six weeks ago the Senate of the United States adopted a resolution thanking the people of Wisconsin for the statue of James Marquette, and that resolution was sent to this House for concurrent action. I have repeatedly urged the Republican members of the Committee on the Library to report the resolution favorably to the House, so that suitable action would be taken by this body. Father Marquette was one of the noblest men that ever lived. The record of his great achievement in the discovery of the Mississippi is the honest pride of every true American. He was a loyal soldier in the army of Christ, and he spread the gospel of Christianity in regions hitherto unknown and undiscovered by the white man. For six years he endured every sort of privation and hardship, sustaining himself on frozen fish and rock moss, and finally sacrificing his life by his strict devotion to duty among the Indians he labored for so hard.

Parkman, in speaking of Marquette, said:

A subtle element of romance was blended with the fervor of his worship and hung like an illumined cloud over the harsh and hard realities of his daily lot; kindled by the smile of his celestial mistress, his gentle and noble nature knew no fear. For her he burned to dare and to suffer, discover new lands, and conquer new realms to her sway.

And Parkman thus describes the closing scenes of his life:

At night, seeing that they were fatigued, he told them to take rest, saying that he would call them when he felt his time approaching. Two or three hours after they heard a feeble voice, and hastening to his side found him at the point of death. He expired calmly, murmuring the names of Jesus and Mary, with his eyes fixed on the crucifix which one of his followers held before him. They dug a grave beside the hut, according to the directions which he had given them; then reembarking they made their way to Michillimackinac, to bear the tidings to the priests at the mission of St. Ignace.

To show the love and devotion with which he was regarded, a band of Ottawas, seven years before his pupils at La Pointe de St. Esprit—

washed and dried the bones and placed them carefully in a box of birch bark. Then, in a procession of 30 canoes, they bore it, singing their funeral songs, to St. Ignace of Michillimackinac. As they approached priests, Indians, and traders all thronged to the shore. The relics of Marquette were received with solemn ceremony and buried beneath the floor of the little chapel of the mission.

The governor of Wisconsin has sent a memorial to this body, the present session, asking that recognition be given this saint and martyr, and yet this Republican House on the eve of adjournment stands convicted of willful and deliberate neglect in refusing to take action on the resolution sent here by the Senate.

This is the first time in the annals of Congress that official recognition has been denied when statues have been presented by any of the numerous States, and the Republican party must take the responsibility. This neglect is particularly to be deplored for the reason that there is no body of men to whom the people of these United States are more deeply obligated than to the early missionaries who carried the lamp of the Christian faith amongst the savages.

It is a well-known historical fact that the first heralds of Christianity in savage climes have been immolated, and the spark of Divine faith was not permitted to ignite in the soul of the savage breast until the wilderness had been profusely watered with the blood of those who had been commissioned to plant it. I am confident, however, that when the conscience of the American people is aroused, their opinions crystallized into speech, they will make a demand upon this Republican House for the official recognition of Father Marquette that it will not dare refuse.

I want to call attention that the Republican members of this

House are responsible for the failure to pay proper respect to this saint and martyr; that the French nation, of which Father Marquette was an illustrious son, rendered too valuable and too great services in the struggle for independence to allow such an indignity to be placed upon her, and I shall be surprised if his countrymen in the United States do not resent it at the polls.

The Catholic people of this country have borne persecution and tyranny with the same meekness and the same spirit that animated our dear Saviour when, pale, bruised, and blood-stained, mocked and goaded by the brutal guard and fiendish mob, the rough Roman soldiery nailed Him to the cross, His lips murmuring, "Father, forgive them, for they know not what they do." Those words have rung in the ears of all mankind through all the ages, and have been the guiding star for persecuted Catholics in every part of the world. [Applause.]

In Ireland for more than two centuries the members of the Catholic faith were subjected to every form of persecution, and yet her people stand to-day as they have always stood, the noblest specimens of Catholic Christianity in the world.

The civil oppression of Ireland would have terminated the moment she embraced the Protestant religion.

The fact that they were deprived of every privilege and denied every right, refused, under penalty of imprisonment, the opportunity to hear mass, not allowed to vote, not allowed to serve in the militia, compelled to attend Protestant services, deprived of their property, their priests scourged and hounded and every form of indignity heaped upon them, only served to strengthen the ties that bound them to the mother church and kindled a stronger flame for Catholicism in their hearts.

In Ireland, too, in all her movements for religious and political freedom, the Catholic people idolized the Protestant leaders of the time in the persons of Lord Edward Fitzgerald, Henry Grattan, Robert Emmet, Wolfe Tone, and Charles Stewart Parnell with a devotion as remarkable as it was strong and lasting.

But I seriously question, Mr. Speaker, whether in the future in this country it will be the part of wisdom to continue this forgiving spirit. I am glad to say, however, on the floor of this House that the great body of the Protestant people have no sympathy with the attack that is being made upon the members of the Catholic Church. They believe, as the Catholics do, in the inspiration of the Bible, in the divine origin of the Ten Commandments, in the divinity of Christ, in the necessity of Christian faith and morality for the salvation of mankind. They know that national prosperity depends on respect for the law, for the rights of persons and property, and the sanctity of oaths. They feel that if there should be general disregard of the law, anarchy and communism in their worst forms would follow. The progress of crime is in direct proportion with irreligion, and every true Christian recognizes the fact that whatever tends to diminish crime makes an additional safeguard to the family and the State.

It is to the fair-minded spirit of this class of the members of this House that I ask for an honest and fair settlement of the contract-school system.

Mr. Speaker, to-day in this country there are in round numbers 12,000,000 Catholics in a total population of 70,000,000, or 20 per cent of the whole, and yet in this House of Representatives, composed of more than 350 persons, I know of but three members who are communicants of that body. I make this statement to the people of the United States in answer to the charge that has been made that the Catholic Church is engaged in an organized attempt to control the political machinery of this Government.

The Catholic Church in this country has grown tremendously in the past century, and to-day has more communicants than any other denomination. From 40,000 in the time of the Revolution, they have now reached 12,000,000, with property valued at $118,000,000, and have made themselves felt in every branch and avenue of intellect and industry. In every village, steeple or tower tipped with the cross tells where Catholics pray, and thousands, aye, hundreds of thousands, gather in these edifices each day to render homage to Almighty God. They are proud of the history of their church, and persecution and tyranny only add to their zeal. [Applause.]

For fifteen hundred years the Catholic Church preserved faithfully for all mankind the teachings of God concerning faith and morals, and during all that time she has remained the same, guarding with unremitting care the same deposits of faith and morals, and dispensing the same sacraments for the spiritual nourishment of souls. During all that period she has taught her children the faith which raises human life above mere animal existence, and has scattered the treasures of her enlightened intellect into every corner of the globe.

She is here to-day in America, in the closing days of the nineteenth century, not in weakness or decay, but in the full prime and vigor of her immortality and strength, towering in the consciousness of her own rectitude, scorning to tamper with the rights of other denominations, but brooking no interference with her own.

In closing, Mr. Speaker, I wish to impress upon the members of this House that in voting for the Senate provision they are only acting in accordance with the equities and justice of this whole matter. The Indians are wards of the nation, and we are under the deepest obligations to educate them.

At the suggestion of the Government, the different denominations erected school buildings, and in this work the Catholic Church spent about $1,500,000, a great deal more than all the other denominations combined. They went on building, in this way reclaiming the Indian youth from ignorance and infidelity, until a short time ago, when hostile legislation warned them to desist.

The first opposition to these appropriations came some few years ago, and it was agreed that the appropriation should be cut down 20 per cent every year until wiped out. These terms were accepted by the different denominations, and in the last Congress another 20 per cent reduction was made. Now there are members of this House who wish this Congress to break faith with the people who control these schools, and rather than allow the children to continue in the schools for another year would prefer them to go uneducated and untaught. This result would surely follow, as it is admitted, even by the opponents of this measure, that school buildings can not be erected in the short space of time allowed, and that no money has been appropriated to build them.

In the name of justice, standing in the full glare of American public opinion, I ask for fair treatment for these contract schools. [Loud applause.]

Mr. SHERMAN. I yield five minutes to the gentleman from Wisconsin [Mr. COOPER].

Mr. COOPER of Wisconsin. Mr. Speaker, I desire to say only a few words in reply to the gentleman from Massachusetts. He has said that during the present session of Congress this House has voted appropriations to institutions purely sectarian. I am greatly misinformed, Mr. Speaker, if that be a true statement. I do not know that this House has voted appropriations to any sectarian institution at the present session. My vote has not been cast for any such appropriation, and it never will be.

The gentleman says that we attack the Catholic religion. I deny it. No such proposition has been made here; nor any proposition that in any proper sense could be construed as an attack upon the Catholic religion or upon any other religion. What we do demur to is the proposition of the gentleman from Massachusetts (who announced himself the other day and to-day as a Catholic) that he shall take the public money to teach his religion to Indians. I deny that he has a right to vote one penny of my money—and I have an equal undivided share with every other citizen of the Republic in the public money—to teach Catholicism to a Comanche or Methodism to a Modoc. [Laughter and applause.]

It is no part of the functions of the Government of the United States to teach an Indian that the Pope is infallible, to teach him that or any other purely religious tenet up to the end of the fiscal year ending June 30, 1897, nor for any other length of time, however short. I am not saying that it is true or that it is false; but there are millions of people in this country just as good as the distinguished Representative from Massachusetts, who says here that he represents a Catholic constituency in the city of Boston——

Mr. FITZGERALD. I never made any such statement, although I should be proud if it were the fact. My constituency is part Protestant and part Catholic.

Mr. COOPER of Wisconsin. Well, a constituency largely Catholic, he said. He did not say it to-day; he said it the other day when he addressed the House.

Mr. FITZGERALD. I correct the gentleman again. I never made any such statement.

Mr. COOPER of Wisconsin. Very well; I so understood him. The gentleman has said that we have a right to use the public money to teach the Catholic religion to Indians because, forsooth, Congress has given that right in the past. I deny it. I deny that the wrong act of another Congress is binding upon this Congress. If that was done, as we know it was, it was plainly in violation of a principle that lies at the foundation of this Republic. Jefferson and Madison, the founders and leaders of the party of which the gentleman from Massachusetts proudly announced himself to be a member, both declared that this nation, the last hope of free government on this earth, could not exist if the principle were to obtain which the gentleman so earnestly champions. The union of church and state would ruin the Republic. The slightest step in the direction of accomplishing such a union ought to be opposed by every man who recognizes the binding obligation upon him to obey and revere the Constitution of the United States; because, while that instrument does not in express terms say that we shall not appropriate money for sectarian purposes, it does say that Congress shall do nothing respecting an establishment of religion, and if voting my money and your money to teach Indians the Catholic religion or any other religion is not doing something to propagate and establish that religion, what is it doing?

Mr. FITZGERALD. May I ask the gentleman a question?

Mr. COOPER of Wisconsin. I prefer to proceed.

Upon the practical side of this question there is this to be said: There is no necessity for this appropriation. The gentleman was guilty of what logicians call a petitio principii—a begging of the whole question—when he said these children would be thrown upon the mercy of the cold world unless this appropriation were voted. Nothing of that kind is true. As I stated when this matter was up before, the Catholic Church in this country has more than 6,000,000 communicants, and the total proposed appropriations to aid in carrying on these schools as they are now carried on is less that $300,000; only about 5 cents a year—less than half a cent a month—to every one of these communicants.

No other church in this country asks this appropriation to-day. Other churches did ask it, but they have voluntarily relinquished their claim to it. If the Catholic Church be the patriotic institution which its cardinal in a recent letter said it is; if it be the patriotic institution which the gentleman from Massachusetts has announced it to be; if, as he says, Catholics are as good, loyal citizens as everybody else in this country ought to be—and I make no attack upon their patriotism—then it is time for them as a church to stop demanding that public money be paid to propagate the Catholic religion among Indians or anywhere else. [Applause.] Profession is one thing; action is another. They say that they wish nothing done inimical to the Republic. They know that a union of church and state would be fatal to it.

The gentleman from New York [Mr. SHERMAN], the chairman of this committee, has suggested that the pending proposition is a compromise. I wish to inform the gentleman that Congress can compromise questions concerning potatoes or corn or hominy or wheat—questions of the tariff. It can not compromise, and ought not to attempt to compromise, questions of conscience. This is a question of the abstract right of the citizen not to have his money appropriated to teach a religion in which he does not believe.

Mr. WALKER of Massachusetts. Or believes.

Mr. COOPER of Wisconsin. Yes, or in which he believes. I accept the suggestion. If you have a right to take the public money, I will say to the gentleman from New York, to teach the Catholic religion, then you have the same right to give it to Robert G. Ingersoll to teach infidelity, or to a rabbi to teach the Jewish faith.

[Here the hammer fell.]

Mr. SHERMAN. Does the gentleman wish further time?

Mr. COOPER of Wisconsin. I should like about two minutes more.

Mr. SHERMAN. I yield to the gentleman.

Mr. FITZGERALD. I should like to ask the gentleman a question.

Mr. COOPER of Wisconsin. Wait a moment. I want to say a word more in reply to the suggestion already made by the gentleman from Massachusetts. He said they wanted money to carry on these schools; that unless we make this appropriation the children would be turned adrift, etc. The gentleman from New York, in a speech which he made when this matter was originally brought before the House, said that he had learned from unofficial sources which he considered credible that the Catholic Church would not sell those school buildings which they now use for sectarian schools for Indian children.

Now, if the Catholic Church proposes to keep those school buildings, pray for what purpose does it intend to keep them? Simply for the purpose of educating the Indians. If public appropriations are withheld from those schools, what will be done with them? They will be continued at a nominal expenditure of 5 cents per capita per annum, contributed voluntarily by the communicants of that church.

Another thing. This House, if it wants school buildings erected, can stay here and vote an appropriation of a million and a half or two million dollars for that purpose. It is suggested to me that for this purpose there is now an appropriation of $200,000 in the bill. These buildings can be constructed without loss of time. In the city of Chicago they run up a 10-story building in a very few months. If it should be absolutely necessary to erect these buildings—I do not think it is—the Secretary of the Treasury can, with an appropriation of a million and a half or two millions, go on and have school buildings put up in very short time. Teachers can also be readily employed, and in a very few months the system could be in complete operation. But I do not think that is at all necessary. The Catholic Church will support its own schools; it will support its own schools without public money; it will support them just as the Congregationalists, the Baptists, the Methodists, the Lutherans, the Presbyterians, and all the other denominations support the schools in which they teach the Indians—that is, by means of the voluntary contributions of their respective communicants.

[Here the hammer fell.]

Mr. FITZGERALD. May I have a few moments?

Mr. COOPER of Wisconsin. What is the gentleman's question?

Mr. SHERMAN. I am sorry I can not yield to the gentleman from Massachusetts. I yield three minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. COOPER of Wisconsin. The gentleman from Massachusetts desired to ask me a question.

Mr. SHERMAN. I can not yield for that purpose. Everybody is pressing for a vote.

Mr. MONDELL. Mr. Speaker, I feel some hesitancy in occupying the attention of the House at this late day of the session, when important measures are crowding for recognition, but I trust the House will bear with me in a brief statement of one phase of the Indian question, in view of the interest felt in the subject I wish to discuss by my constituents, and the interest which the country at large should have in a statement as to the real nature of the occurrences in one of the most widely heralded and bloodless Indian troubles that has occurred on our Western frontier in late years. I refer, Mr. Speaker, to the so-called Jacksons Hole Indian troubles, which occurred during the summer of 1895, south of the Yellowstone National Park, in the State of Wyoming. I believe I am entirely within the bounds of truth when I say that no occurrence of late years on our frontier has been so thoroughly misunderstood, either as to the causes which led to the troubles between the settlers and the Indians or as to the actual occurrences in the region referred to last summer.

I have felt that justice to my constituents, who were especially affected by the false statements which were made, not only through the press of the country, but in some cases through official and semiofficial sources, as well as justice to the fair name of the settlers of the West in general who are brought in contact with the Indian tribes, demand that a statement should be made giving the facts, fairly and honestly, as they occurred. We can not as a people expect to retain respect for each other, nor can we expect there shall be that cordial sympathy between the peoples of far separate portions of the country, which the future peace of the nation demands, unless an effort be made to disabuse the public mind as to the actions and motives of the people of one section, which actions and motives may have been misconstrued and misunderstood, and this misconstruction and misunderstanding heralded broadcast over the nation to create a false impression as to the character of the residents of one section throughout the nation.

I fear the people of the Eastern and Middle States are sometimes inclined to forget that the men who are developing the far West, who are braving the dangers and difficulties of frontier life, are in the main the same class of men who have extended the frontier from its original outpost on the summits of the Alleghanies until it has become almost a thing of the past, its hardships and privations and its isolation from the outer world being now confined to comparatively few districts of the Northwest, notable among which is the region in which the trouble occurred last summer to which I refer. The people of my State, while restless under the false accusations and the flippant quips and flings of our Eastern brethren in regard to the occurrences in Jackson's Hole last summer, deemed it best to make no loud and noisy demonstration of our disapproval of the unwarranted verdict of a large portion of the Eastern press against our officials or our citizens, until the highest tribunal of the land had passed upon the question as to our right to police our territory, but now that the Supreme Court of the United States has declared that Wyoming is, indeed, a sovereign State, endowed with all the rights and privileges vested in the original States, as a representative of that State I feel bold in craving a few moments' attention of the House in a recital of the circumstances and conditions which led up to and culminated in the friction between roving bands of Indian hunters and the officers of Uinta County, Wyo., last summer.

I ask the gentlemen to bear in mind the fact that these troubles all arose from the wanton and indiscriminate slaughter of game by bands of Indians off of their reservations in violation of the game laws of the State of Wyoming, laws which our citizens are bound to respect and against whom they are enforced. The Indians claimed that by treaty rights they were superior to any law that might be passed by our State for the protection of game. Troubles between Indians and settlers on the frontier of our country on account of the indiscriminate hunting and slaughter of game by the Indians is no new condition. There is scarcely a district in the Northwest where at some time in the past there have not been troubles of this character.

At various times treaties have been made with Indian tribes giving them the right to hunt on any unoccupied lands of the United States or in certain districts outside of their reservation limits. As the country in the vicinity of the reservations becomes settled, as the ever onward march of civilization locates homes and builds schoolhouses upon the broad plains and in the mountain valleys, there is constantly increasing friction between the Indian, accustomed to ride over the country at will and hunt game at all seasons of the year, and the settlers, who do not particularly enjoy seeing all of the game in their vicinity slaughtered, and who do not take kindly to the continuation of the savage chase in the vicinity of their ranches and homes.

As State governments were set up, game laws were enacted for

the purpose of protecting game from ultimate extinction, and in order that citizens might enjoy the pleasures and profits of hunting to a reasonable extent during certain seasons of the year and under proper restrictions. In many instances Indian agents and others in charge of tribes and bands of Indians have accepted the conditions of these State laws without question, and have even hailed their enactment with satisfaction as tending in their enforcement to wean the Indian from the savage pleasures of the chase, and by confining him more closely to the reservation render him more susceptible to those influences calculated to educate him in the arts of peaceful industry, in the practice of which lay his only hope of becoming self-supporting and thereby self-respecting and open to all the influences that tend to civilization. Unfortunately, both for the Indians and the settlers, those having the responsibility of looking after these wards of the nation have not always received in a friendly spirit these wholesome regulations, but have resented them as an infringement upon the rights of the Indians, to be resisted, even to the extent of encouraging their savage wards to resist the legally constituted authorities of the States in the performance of what they considered to be their plain duty under the law, thereby fostering and encouraging that feeling of contempt for the white man's law which is so marked a characteristic of the North American Indian.

In order to give a clear understanding of the causes that led up to the troubles in the Jacksons Lake country in the summer of 1895 I shall be compelled to go somewhat into detail.

On the 3d day of July, 1868, a treaty was signed at Fort Bridger, Utah, between the Bannack and Shoshone Indians and a commission acting for the United States Government, which treaty contained the following provision:

ARTICLE 4. The Indians herein named agree, when the agency house and other buildings shall be constructed on their reservations named, that they will make said reservations their permanent home, and they will make no permanent settlement elsewhere; but they shall have the right to hunt on the unoccupied lands of the United States so long as game may be found thereon and so long as peace subsists among the whites and Indians on the borders of the hunting districts.

In the course of time these Indians were located upon two reservations, the Bannacks and a part of the Shoshones in the vicinity of Fort Hall, Idaho, upon what is known as the Fort Hall Reservation. The remainder of the Shoshones were located on the Shoshone Reservation, at the head of Wind River, in Wyoming. At the time this treaty was made and for a long time thereafter Wyoming and Idaho were Territories. The region in which the recent trouble occurred had not even been penetrated by the hardy prospector and was not visited to any considerable extent by the Indians themselves, being accessible only by long journeys over rough mountain trails. Not a great many years elapsed, however, before there began to be friction between the settlers in the vicinity of the Fort Hall Reservation in Idaho and the Indians over the indiscriminate slaughter of game by the Indians. In order to overcome the irritation thus produced, a commission, consisting of J. P. C. Shanks, Henry W. Reed, and T. W. Bennett, was appointed to treat with the Bannack and other Indians in southern Idaho for the relinquishment of their right to hunt on the unoccupied lands of the United States.

This commission concluded an agreement with the said Indians on the 7th day of November, 1873, whereby the said Indians agreed as follows:

And whereas, owing to the increase in the country of the white population and the scarcity of game for the support of the Indians, it has, in the judgment of the United States Government, become important and necessary that the provision of article 4 of said treaty of July 3, 1868, shall become the subject of a new agreement between said parties:

Article 1. It is hereby agreed upon the part of all the Indians interested in said Fort Hall Reservation, under the provisions of said treaty of 1868, that a portion of said fourth article of said treaty shall, upon the conditions hereinafter stated, be amended as follows:

The right as secured to said Indians by said fourth article of said treaty of 1868 to hunt on the unoccupied lands of the United States shall be relinquished, and hereafter the privilege of said Indians to hunt off the reservation shall be under the written permission of the agent.

This treaty was duly signed and ratified by the commissioners and over 200 of the Indians, and upon the 3d day of February, 1874, the agreement was duly transmitted to Congress for action thereon, by the Secretary of the Interior. No action was ever taken by Congress on this treaty. Had the treaty then signed been ratified by Congress, the late Jacksons Hole Indian trouble would never have occurred.

As time went on settlements were extended in northern Idaho and western Wyoming, and the big game continued each year to become scarcer. Numerous protests from the settlers were made from time to time against the killing by the Indians, at all seasons of the year, of vast quantities of game, thereby depriving the settlers of an opportunity of partly supplying their larders from the game of the country and compelling them to make distant trips into the mountain regions in order to secure even a limited quantity of meat for themselves and families. These complaints led to the issuance in 1889 of a circular letter from the Interior Department to Indian agents in the Northwest, as follows:

[Circular.]

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, D. C., November 1, 1889.

To United States Indian Agents:

Frequent complaints have been made to this Department that Indians are in the habit of leaving their reservations for the purpose of hunting; that they slaughter game in large quantities, in violation of the law of the State or Territory in which they reside, and that in many instances large numbers of wild animals are killed simply for their hides.

In some cases Indians, by treaty stipulations, have the guaranteed right to hunt, upon specified conditions, outside their existing reservations. The Secretary of the Interior has decided that the privilege of hunting under such treaty provisions is the right to merely kill such game as may be necessary to supply the needs of the Indians, and that the slaughter of wild animals in vast numbers for their hides only and the abandonment of the carcasses without attempting to make use of them is as much a violation of the treaty as an absolute prohibition upon the part of the United States against the exercise of such privilege would be. This fact should be impressed upon the minds of the Indians who have such treaty rights, and they will be given to understand that the wanton destruction of game will not be permitted. And those not having the reserved treaty privilege of hunting outside of their existing reservation should be warned against leaving their reservation for hunting, as they are liable to arrest and prosecution for violation of the laws of the State or Territory in which offenses may be committed.

In view of the settlement of the country and the consequent disappearance of the game, the time has long since gone by when the Indians can live by the chase. They should abandon their idle and nomadic ways and endeavor to cultivate habits of industry and adopt civilized pursuits to secure the means for self-support.

Very respectfully, (Signed by the Commissioner.)

The opposition upon the part of the settlers to Indians hunting was largely due to the fact of the absolute disregard of the Indians for sex or condition of the game when hunting.

As early as 1890 frequent complaints were made to State and county authorities by settlers on the Green and Snake rivers and their tributaries in Wyoming against the slaughter of game by the Indians. These protests each year became more vigorous as the settlements increased and extended, and as the annually recurring hunting trips of the Indians rendered the game scarcer.

In the year 1890 the Territory of Wyoming was admitted into the Union of States in the following words:

Be it enacted, etc., That the State of Wyoming is hereby declared to be a State of the United States of America, and is hereby declared admitted into the Union on an equal footing with the original States in all respects whatever; and that the constitution which the people of Wyoming have formed for themselves be, and the same is hereby, accepted, ratified, and confirmed.

For the protection of large game within the State the following provision was made:

SEC. 1251. It shall be unlawful to pursue, hunt, or kill any deer, elk, moose, mountain sheep, mountain goat, antelope, or buffalo, save only from September 1 to January 1, inclusive, in each year, or kill or capture by means of any pit, pitfall, or trap any of the above-named animals at any time; no nonresident of this State shall pursue, hunt, or kill any deer, elk, moose, mountain sheep, mountain goat, antelope, deer, or buffalo by any means whatever: *Provided*, During the time aforesaid the actual and bona fide residents of this State may pursue, hunt, and kill said animals, but not by means of any pit, pitfall, or trap.

Certainly the Indians of Idaho could scarcely be considered bona fide residents of the State, while it seemed that by common consent there was no disposition to deprive Indians living on reservations within the State of all privileges accorded to other residents. It soon became evident, however, that this law was inadequate to prevent the game from threatened annihilation, both from white and Indian hunters. The simple mind of the Indian had not readily grasped the idea of State lines, and the Shoshone Indian living on the Fort Hall Reservation could not understand why he could not enjoy all the privileges enjoyed by his brother in Wyoming. The clause of the law giving bona fide residents of Wyoming the right to kill game at all seasons of the year was intended to enable our own citizens to procure game when absolutely necessary for consumption, but the clause left a loophole for the killing of large quantities of game in violation of its spirit rather than its letter.

In the meantime constant complaints were being made of the wanton destruction of game life by the Indians from many portions of northern and western Wyoming. The citizens in that region became thoroughly aroused to the necessity of immediate and vigorous action if the large game was to be preserved for any considerable length of time. The killing of game by residents or those claiming to be residents of the State in excessive quantities or during the breeding season could be remedied by a State law. The question as to the prevention of the indiscriminate slaughter of game by the Indians was a more serious one, and its solution depended on whether or not the Indians had, by reason of their treaty, a right to hunt within the confines of Wyoming in violation of her game laws; in short, whether the savage, who added nothing to the wealth of the State, whose residence even was beyond the confines of the State, was entitled to rights and privileges denied the men who, braving all the hardships and difficulties incident to pioneer life, were opening a path for civilization in the wilderness.

Among those of our people who gave the question any study there seems never to have been a doubt in regard to the matter. It was quite taken for granted that the act of admission of Wyoming to the Union of States, giving her all the rights and privileges accorded to the original thirteen States, certainly conferred upon the State the first essential of sovereignty, the right to exercise police power over her territory. We held that no State was enjoying the rights reserved by the thirteen original States, if a horde of savages were to be permitted to ride at random over her territory and slaughter her game, while the State was absolutely powerless to prevent the total destruction by these marauders and invaders of game life within her borders. This must have been the view taken of the matter by the Department of the Interior on May 2, 1894, when the following letter was addressed to sixteen Indian agents in the Northwest:

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, D. C., May 2, 1894.

SIR: Inclosed herewith you will find copy of office circular of November 1, 1889, relative to Indians leaving their reservations for the purpose of hunting.

This office has recently received a great many complaints to the effect that numerous parties of Indians are continually leaving their reservations, with passes from their agents, to make social visits to other reservations; that they slaughter game in large quantities, merely for the sake of killing and for the hides; that their wanton destruction of wild animals is particularly noticeable in the country adjacent to the Yellowstone National Park and the Shoshone Reservation, Wyo.; and that if these depredations are allowed to continue during the coming season it will probably result in a serious conflict between the white settlers and the Indians and end in bloodshed.

Upon the receipt of this letter you will call a council of your Indians, again inform them as to the purport of this circular, and tell them that the restrictions as to hunting contained therein must be strictly complied with; also that should they in the future obtain passes from you for the ostensible purpose of making a friendly visit to other reservations and then engage in hunting while en route, such passes will all be recalled and they will not be allowed to leave their reservations again. Further, that they will be liable to arrest and punishment by State officers for violating the game laws of the State or Territory in which they may be found hunting.

Hereafter no passes should be granted to Indians when you have reason to believe they intend to go on hunting expeditions; and where permission is given to leave the reservation for other purposes, it should be only upon condition that they will not engage in hunting while absent.

In granting such passes in the future to make visits or to leave the reservations for other purposes which would enable them to hunt while absent, you should be careful to impress upon them the consequences of violating their agreement.

When such pass has been granted, the Indian agent in charge of the reservations which they intend to visit should be notified of the time of their departure, their names, and the route they intend to travel, so they may be on the lookout for them.

Your hearty cooperation in this matter is requested, in order that the evils complained of may be corrected, and the threatened danger of trouble between the Indians and whites averted.

Very respectfully,

(Signed by the Acting Commissioner.)

It will be noticed that in this letter the Department calls attention to the fact that Indians hunting off their reservations "will be liable to arrest and punishment" for the violation of the game laws of the State or Territory in which they may be found hunting.

On the 28th of August, 1894, the following telegram was received by the Commissioner of Indian Affairs:

ROSS FORK, IDAHO, *August 27* (via Pocatello, Idaho, August 28, 1894).

To COMMISSIONER OF INDIAN AFFAIRS, *Washington, D. C.:*

Following telegram received:

"Complaint has been made in Silver City by C. M. Hays, district attorney, that a number of Indians are slaughtering game and have threatened resistance to officers of that county. Troops have been asked for. Can you settle the difficulty?

"J. F. CURTIS, *Secretary of State.*"

I think Indians are from Western Shoshone Agency, Nev. Have I authority to proceed to investigate and direct return of Indians to proper reservations?

VANORSDALE, *Acting Agent.*

On the 29th of August, 1894, the county and prosecuting attorney of Fremont County, Wyo., in which county is situated the Shoshone Reservation, addressed the following letter to the Commissioner of Indian Affairs:

LANDER, WYO., *August 29, 1894.*

SIR: I inclose you herewith a certified copy of a pass issued Indians by the agent of the Shoshone Indian Agency. Under the orders of the Department to agents, a copy of which has been kindly sent me, I am unable to see how such passes can be issued, and therefore desire to call attention upon the part of the Department to the neglect of the agent to obey the injunctions of his superior officer.

The numerous complaints lately made to this office warrant me in saying that never before have the Indians been allowed such privileges, as at present over 500 Bannack and Blackfeet Indians are in the Jackson's Hole country, along the line of the Yellowstone National Park, burning forests of timber to better aid them in the indiscriminate slaughter of the few remaining wild game in the country. The attention of the Department has been called to these depredations and an effort made to enlist the services of the agents in the protection of the game now rapidly being exterminated. The State authorities are powerless to do anything under existing conditions, as the Indians are protected in their depredations by the agents at all the Western reservations.

Captain Ray, of the Shoshone Indian Reservation, has instructed the Indians absent upon passes furnished them, to kill all the game they desire and he will protect them from State interference. The local authorities are powerless to cope with the bands of Indians now absent from their reservations, and owing to the sparsely settled communities and the insolence of the Indians, the settlers are becoming greatly alarmed for their property and personal safety. Under conditions that now exist the game which during the winter season makes its home in the Yellowstone National Park is rapidly being killed out of the park, where it goes in the summer season seeking the higher mountain ranges and the alkaline deposits south and east of the park.

Trusting that a full investigation of these matters will be proceeded with, I have the honor to remain,

Respectfully,

WILL L. SIMPSON,
County Attorney, Fremont County.

To the honorable COMMISSIONER OF INDIAN AFFAIRS,
Washington, D. C.

Upon the 5th of September following the same gentleman addressed a letter to Hon. John E. Osborne, governor of Wyoming, the substance of which is as follows:

LANDER, WYO., *September 5, 1894.*

MY DEAR SIR: Late advices from the northwestern part of the State confirm the rumors prevalent that a large area of fine forest lands have been maliciously destroyed by Shoshone Indians absent from the Shoshone Indian Reservation with passes from the agent, Captain Ray. These Indians are at present engaged in the indiscriminate and wanton destruction of wild game in the vast game reserve south and east of the national park in this State. The local authorities are powerless to prevent the Indians from violating the laws. Complaint upon complaint has been made to the Department to allay these rapidly increasing depredations, and no attention has been paid to them, or its orders have been pigeonholed by the agents in charge of the reservations.

The increasing alarm among the settlers of the remote localities in the path of these destroyers is evident from the complaints made daily to my office. The insulting demeanor of these Indians, their refusal to submit to arrest by the duly constituted authorities, will certainly bring about serious trouble between the Indians and whites at no remote date.

What action the chief executive of a State can take in these premises is not quite clear to my mind, but I am almost sure you can further aid the people of Fremont and Uinta counties in keeping these Indians upon the vast areas of land set apart for their individual use, by asking of the Department an order for the agents to keep their Indians on their reservations and thus keep down the trouble, which is surely becoming apparent to any who have knowledge of the situation.

This summer's devilish work has been accomplished. Nothing can undo the immense damage to our natural resources. Our forests destroyed means our streams going dry in the early season of the year. Our game destroyed for its hide alone, a chief glory of our State forever gone.

Yours, very truly,

WILL L. SIMPSON,
County Attorney.

JOHN E. OSBORNE,
Governor of Wyoming, Cheyenne.

This letter was transmitted by Governor Osborne to the Secretary of the Interior on the 8th day of September, accompanied by the following communication:

SIR: Inclosed herewith I transmit a letter from the prosecuting attorney of Fremont County, this State, complaining of the depredations now being committed by the Shoshone Indians in the northern part of Wyoming, and of the failure of Captain Ray, the agent at Fort Washakie, to perform the duties of his important position satisfactorily to our people.

A great many complaints have come to my office, since Captain Ray's appointment, setting forth his incompetency and extreme lack of judgment. I have taken occasion to make careful inquiry concerning him, and I again desire to inform the Department that, unless he changes his method of conducting the affairs of his office, there will be bloodshed in the near future.

The people of Fremont County have for months been in constant fear of the Indians, and it would not surprise me at any time to hear that the home builders and settlers had united in a war of extermination. I can not too strongly urge the removal of the present agent, and the appointment in his place of a citizen of Fremont County.

Very respectfully,

JOHN E. OSBORNE,
Governor of Wyoming.

Hon. HOKE SMITH,
Secretary of the Interior, Washington, D. C.

In reply to this communication by Governor Osborne, the following answer was made on the 22d of September:

DEPARTMENT OF THE INTERIOR, OFFICE OF INDIAN AFFAIRS,
Washington, D. C., September 22, 1894.

SIR: I have the honor to acknowledge the receipt of your favors of the 5th and 8th instants, respectively, relating to the depredations which you state are being committed by Indians from the Shoshone and Fort Hall reservations, who are now roaming in the vicinity of the national park, setting destructive forest fires and wantonly killing game for hides.

You further say that many complaints have come to your office of the failure of Captain Ray, acting Indian agent, to perform his duties satisfactorily to your people: and that unless he changes his methods of conducting the affairs of his office there may be bloodshed in the near future, owing to the depredations of the Shoshone Indians.

In reply I have to respectfully inform you that under date of the 12th instant this office telegraphed Captain Ray as follows:

"Call in all absent Indians. Report at once by wire how many are absent from the reservation. Governor of Wyoming complains of depredations by them in northern Wyoming."

On August 29 I telegraphed Captain Van Orsdale, acting Indian agent of the Fort Hall Agency, Idaho, to at once have his absent Indians return to their reservation.

Under date of the 3d instant he reported that he had sent his Indian police and runners to order absent Indians back to the reservation.

Captain Ray reported, September 13, that in compliance with office instructions he has sent out his Indian police to order all Indians absent from his reservation to return.

Further, Captain Ray has asked authority from the War Department for an escort of soldiers, in order that he may scout the territory adjoining his reservation and compel the Indians to return to their respective reservations; and that he be allowed to invite the county authorities to send a civil officer with him. It is expected the War Department will soon take action on the above request.

Trusting that these depredations by Indians will soon cease, and assuring you that this office is willing and anxious to do everything in its power to attain that end, I remain,

Very respectfully,

FRANK ARMSTRONG,
Acting Commissioner.

Hon. JOHN E. OSBORNE,
Governor of Wyoming, Cheyenne, Wyo.

On the 6th day of August, 1894, the county and prosecuting attorney of Uinta County, Wyo., sent the following telegram to the Commissioner of Indian Affairs:

EVANSTON, WYO., *August 6, 1894.*

D. M. BROWNING,
Commissioner of Indian Affairs, Washington, D. C.:

I have reliable information that 100 Bannack Indians are in this county killing game for hides. Will you send soldiers to take them back or let them take the consequences?

JOHN C. HAMM,
Attorney Uinta County.

On November 30 the county attorney of Fremont County again addressed the Commissioner of Indian Affairs, as follows:

LANDER, WYO., *November 30, 1894.*

DEAR SIR: I enclose you a letter from a justice of the peace (Tappan) concerning depredations upon game by Shoshone Indians, under authority of Agent Ray, also original passes.

I trust that this explanation will result in the Department taking other steps in the continued violation of its orders by the acting agent of the Shoshone Agency.

Very respectfully, WILL L. SIMPSON.

Hon. COMMISSIONER OF INDIAN AFFAIRS,
Washington, D. C.

The letter referred to by Justice of the Peace Tappan is as follows:

DUBOIS, WYO., *October 13, 1894.*

DEAR SIR: Information of a number of elk having been killed for their hides on the Denore by Indians and their carcasses having been left to spoil determined me to organize a party and investigate the matter.

We have this day overhauled and searched the packs of four hunting parties, and the result will be explained by the accompanying affidavit. I found two passes expired and took them up, also one pass for five persons, with eight Indians in the party, and took it up. You will notice that two of the passes are so drawn that there is no limit to the number which may travel on them.

We had to make a gun play to search one outfit, but trust that under the circumstances we have not overstepped the law. We found this outfit had 41 hides and no pass, or at least they denied having one. We did not find fresh hides enough to locate the parties who had been killing for hides, and under the circumstances made no arrests, but turned every Indian toward the agency. It being late in the day we did not count the hides of another party on Long Creek, but told them to pull for the agency at once.

If we are off wrong please advise us. We have an exact tally of the hides in each outfit, and if required will send you affidavits and you can put them in shape and send them up, and I will have them sworn to and returned to you.

Yours, truly, JAMES H. TAPPAN,
Justice of the Peace.

P. S.—You will notice there were 41 hides with no pass.

W. L. SIMPSON, Esq.,
Lander, Wyo.

Captain Ray referred, in his communication to the Department in reference to this matter, to Justice Tappan and his men as "an armed body of lawless whites," although his superior officer, the honorable Commissioner of Indian Affairs, had, under date of May 2, notified him that Indians violating the game laws of the State or Territory in which they are found hunting are liable to arrest and punishment.

I also append hereto a certified copy of one of the passes referred to by Justice Tappan as being issued by the agent of the Shoshone Agency, and it will be noted that the pass had expired by limitation for three months at the time it was taken up:

UNITED STATES INDIAN SERVICE,
Shoshone Agency, May 14, 1894.

No. 8.]

Permission is given Peoutze and family of three persons to be absent from this agency for the period of sixty days, for the purpose of visiting Green River.

Object of visiting friends.
On arrival will report to —— ——.
Reported to ——— ———, 188—.

P. H. RAY,
Captain, Acting United States Indian Agent.

[District clerk's certificate.]

STATE OF WYOMING, *County of Fremont, ss:*

I, Ben Sheldon, clerk of the third judicial district court, within and for said county and State aforesaid, do hereby certify the foregoing to be a full, true, and complete copy of a certain piece of writing this day presented to me for comparison, and that the above is a full, true, and correct copy thereof; being so full and complete as the same now appears before me.

In testimony whereof I have hereunto subscribed my hand and affixed the official seal of said court, at my office in Lander, Wyo., this 22d day of June, A. D. 1894.

BEN SHELDON,
Clerk Third Judicial District, Fremont County, Wyo.

On November 14, 1894, the honorable Commissioner of Indian Affairs addressed the following letter to the Indian agent at Fort Hall Agency:

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, D. C., November 14, 1894.

SIR: Referring to office letter to your predecessor of May 2, 1894, relative to the Indians under his charge wantonly slaughtering game, particularly in the country adjacent to the Yellowstone National Park, in which he was instructed to call a council of the Indians and inform them that such depredations should be stopped, and that they should not be granted passes when he had reason to think they intended to go on hunting expeditions, etc., I have to inform you that a further complaint has reached this office from Mr. G. G. Shields, editor of Recreation, New York City, who states that Mr. B. M. Webster, of Omaha, Nebr., who has recently returned from a hunting trip in the Rocky Mountains, writes him that the Shoshone and Bannack Indians have been hunting all through the country south and east of the National Park, killing thousands of elk, deer, and antelope, and taking only their skins, leaving the carcasses to rot. Mr. Shields further states that these Indians have been making a practice of this reckless slaughtering of game every summer, in open violation of law, but that the people of the Territories dislike to prosecute them on account of depredations which they fear might be committed by the Indians in retaliation.

While this office believes that United States Indian agents have endeavored to prevent the Indians from wantonly destroying game in the Western country, and that in many instances where complaints have been made against the Indians careful investigation has shown that the charges against them were either altogether false or greatly exaggerated, sometimes willfully so, yet I would request that you be watchful of the Indians under your charge, to the end that they give no further cause for complaint in this matter. You can say to them that further complaints have been made about their killing game and that such depredations must cease.

Very respectfully,

D. M. BROWNING, *Commissioner.*

THOMAS B. TETER, Esq.,
United States Indian Agent,
Fort Hall Agency, Ross Fork, Idaho.

It will be noticed that in this letter to Mr. Teter the Commissioner of Indian Affairs does not take exceptions to the statement made by Mr. Shields that the Indians were killing game in violation of State laws, and the inference would be that they are amenable to State laws, and he does not make any reference to any treaty rights which hold the Indians superior to the laws of the State.

On the 20th of February, 1895, the State legislature of Wyoming, in response to an almost unanimous public sentiment and the continued and repeated violations of the spirit of the game laws, passed an act of which the following has especial reference to large game:

SEC. 14. It shall be unlawful to pursue, hunt, or kill any deer, elk, moose, mountain sheep, mountain goat, or antelope at any time except during the months of September, October, and November in each year, during which months the males only of such animals may be killed or hunted under conditions and restrictions imposed by this section. It shall be unlawful at any time whatever to kill or capture any of the above-named animals mentioned in this section by means of any pit, pitfall, or trap. Any person may, during the period permitted and prescribed by this section, pursue, hunt, and kill any of the males of the animals mentioned in this section for the purpose only of supplying himself with food, but not for speculative purposes or wantonly. In order to prevent more effectively the hunting and slaughter of the animals mentioned in this section for speculative purposes, it is hereby declared to be unlawful for any nonresident of this State to hunt, kill, or pursue any of the male animals permitted by this section to be hunted, killed, or pursued herein without having first procured a license therefor so to do from a justice of the peace of the county wherein said animals are to be hunted. The justices of the peace of this State are hereby authorized and directed to issue such licenses upon the payment of $20 for each license, which shall be good in their county. Such license shall permit such nonresident to pursue, hunt, or kill any of the males of the animals mentioned in this section during the months of September, October, and November of the current year for the purpose of supplying himself or his family with food during such period.

On January 21 the following letter in regard to the slaughter of game by Indians was addressed to the honorable Secretary of War:

BROOKDALE, RED BANK, MONMOUTH COUNTY, N. J.,
January 21, 1895.

SIR: I desire to call your attention to a violation of the laws which I believe come under the charge of your Department. The section of the country known as Jacksons Hole, the post of which is now Marysvale, Uinta County, Wyo., has been overrun by Indians for the past few years. Last September and October there were upward of 200 bucks, with their squaws, horses, and outfits, in that neighborhood. They were of the Shoshone and Lemhi tribes from the agencies at Fort Hall and the Lemhi Reservation. Their purpose was hunting and the destruction of elk, antelope, and deer was enormous. The settlers are indignant at having their meat supply cut off and are growing perceptibly hostile to the invasions of these Indians. I own some property in that vicinity, and having induced others to acquire land there for the purpose of rest, recreation, and the shooting and fishing the country affords, they have suggested that I appeal to you to have the existing state of affairs remedied. As the game supply has decreased 20 per cent in the last three years and will decrease far more rapidly in the future, I trust you may prevent it.

Very respectfully, yours, L. S. THOMPSON.

Hon. DANIEL LAMONT,
Secretary of War, Washington, D. C.

The above letter was duly transmitted by the honorable Secretary of War to the Department of the Interior, and on the 7th of February it was answered as follows by the honorable Commissioner of Indian Affairs:

DEPARTMENT OF THE INTERIOR,
Office of Indian Affairs.

SIR: By reference from the War Department, I am in receipt of your communication of the 21st ultimo, addressed to the honorable Secretary of War, in which you state that the section of country known as "Jacksons Hole, the post of which is now Marysvale, Uinta County, Wyo.," has been overrun by Indians for the past few years; that last September and October there were upward of 200 bucks, with their squaws, etc., in that neighborhood; that they were of the Shoshone and Lemhi tribes, from the Fort Hall and Lemhi agencies; that their purpose was hunting, and the destruction of elk, antelope, and deer was enormous; that the settlers are indignant at having their meat supply cut off, and are growing perceptibly hostile to invasions by these Indians; that you own some property in that vicinity, and having induced others to acquire land there for the purpose of rest, recreation, and the shooting and fishing the country affords, they have appealed to you to have the existing state of affairs remedied. You therefore ask that the further destruction of game by the Indians be prevented.

In reply you are informed that I have this day written the United States Indian agents of the Fort Hall and Lemhi agencies, forwarding a copy of your letter and calling their attention to previous communications of this office, in which they were instructed to prevent, so far as possible, the wanton destruction of game by the Indians of their respective agencies.

In this connection, you are further informed that some of the replies received from Indian agents in Wyoming, Idaho, and Montana relative to Indians killing game would seem to indicate that the Indians are not altogether to blame in the matter complained of; that many of the charges against them have been found upon investigation to be altogether false or grossly exaggerated, and sometimes willfully so; and that many white hunters infest the country entirely unmolested and slaughter game for the market, curio shops, and taxidermists.

I inclose you copies of my letters above referred to.

Very respectfully,

D. M. BROWNING, *Commissioner.*

MR. L. S. THOMPSON,
Brookdale, Red Bank, Monmouth County, N. J.

On the same date the following letter was addressed to the agent of the Fort Hall Agency:

SIR: Inclosed herewith find copy of a letter dated the 21st ultimo, from Mr. L. S. Thompson, of Brookdale, N. J., who complains of the Indians of your agency committing depredations on game in Uinta County, Wyo.

Your attention is invited to office circular of May 2, 1894, addressed to your predecessor in office, in which he was fully instructed relative to such depredations by Indians.

I have again to request that you be watchful of the Indians under your charge, to the end that they give no further cause for complaint in this matter. You can say to them that further complaints have been made about their unlawfully killing game, and that such depredations, if true, must cease.

Very respectfully,

D. M. BROWNING, *Commissioner.*

THOS. E. TETER, Esq.,
United States Indian Agent, Fort Hall Agency, Ross Fork, Idaho.

It will again be noted that the Commissioner invites the attention of the agent to the circular of May 2, 1894, which circular, as before stated, refers to the fact that the Indians will be liable to arrest and punishment by the State authorities in the State or Territory in which they may be found hunting.

From the latter part of November until late in the spring the country from which these complaints came is covered with a heavy mantle of snow and is accessible only on snowshoes over the rugged mountain passes. During these months the Indians are snugly located upon their respective reservations, enjoying the bounties of Uncle Sam's hospitality.

Immediately after the passage of the game law heretofore referred to, 2,500 copies were distributed over the State in order that the provisions of the act might be thoroughly understood by the people and that there might not be any misunderstanding as to the provisions of the law by either citizens or nonresidents of the State, white man or red man. The passage of this game law gave very general satisfaction in our State and preparations were made for its strict enforcement. In view of the fact that the Commissioner of Indian Affairs notified his agents that the Indians were amenable to the game laws of the State, it was hoped that there would be no serious difficulty with them in the strict enforcement of the law, but in this hope we were to be sadly disappointed.

The early spring found the red man crossing the mountains from Idaho into the valleys of Wyoming in search of his favorite delicacy, the unborn young of elk, deer, and antelope. The following letter from the governor of Wyoming to the honorable Secretary of the Interior, under date of June 17, 1895, states very tersely the situation and clearly indicated the necessity for prompt action, although he could not have foreseen the events which were so soon to transpire in the region in question and which might have resulted in a more serious conflict between the settlers and Indians:

CHEYENNE, WYO., *June 17, 1895.*

SIR: I am informed that Indians are now hunting and killing large game, especially elk, in the northern part of Uinta County and the western part of Fremont County, Wyo., in open violation of law. These Indians come from the Shoshone and Arapahoe Reservation in this State and from Idaho, mostly from the latter State. The country spoken of lies south and east of the Yellowstone National Park. It is generally lower in altitude than the park and is a favorite winter range for animals that spend the summer and autumn in the park. In the winter, as the snow becomes deep in the park, the animals seek a lower altitude, which they find in the localities named, and as the spring comes earlier there, they remain until the heat of summer drives them into the higher and cooler country. In these lower altitudes their young are brought forth, and it is at this season, when the females are unable to escape from the hunter or unwilling to abandon their young, even to save their own lives, that the Indians accomplish the greatest slaughter. It is not want that leads to this destruction so much as a depraved appetite. They consider an unborn calf the greatest of delicacies and wantonly kill the mother to obtain it, leaving her carcass to the less fastidious coyote. I know this to be true, because I have seen it in the very locality of which I speak.

Every year this matter comes up. The Indians come into part of the State in June, and there are Indians there until the snows of winter drive them out. I was in that part of the State the latter part of last October, and was given positive proof of the killing of more than 100 elk in one place by Indians for the hides alone, the bodies being left untouched. During the summer, when game is somewhat scarce, the Indians do not hesitate to kill cattle, and a conflict between the settlers and the Indians may take place at any time, and has been narrowly averted several times. I have seen large numbers of Indians encamped for several weeks in the northern part of Uinta County, on Horse Creek, and other tributaries of Green River, on the western side of that stream. These Indians came from Idaho to hold at these places some of their annual dances, and while so engaged killed cattle and took and used horses owned by settlers. Upon one occasion the latter congregated to the number of a hundred, armed and mounted, and for a time a conflict was imminent, but wise counsel prevailed and the peace was preserved.

To be sure we have laws for the protection of live stock and game to which Indians are amenable, and the agents say that if the Indians violate the law arrest and punish them as you would white men. The difficulty about doing this is that the offenses are necessarily committed in places remote from the seat of county government, and these counties being sparsely settled and financially poor, with the limit of their expenditures fixed by law, they are unable to prosecute these offenders, with no possibility of collecting a fine from them if convicted, and to whom a short imprisonment with plenty to eat is no punishment. I inclose a copy of our game laws, a perusal of which will convince you that it is hard to make them fit an Indian in the way of restraint or punishment. I would most respectfully suggest that the agents at the several agencies be instructed to not allow the Indians under their control to hunt off their reservations and to not give them passes to visit distant points, which they obtain ostensibly for social purposes but in reality to afford them an opportunity to hunt upon the way.

The agents can control them while at home, but when they get away into the mountains they feel free from restraint, become very independent and insolent, and have no regard for the law, even if they know it, or for the rights of others. It is not right to impose upon the county or the State the duty of teaching the Indian the laws of the land and compelling him to respect and obey them. He is the ward of the nation, and the General Government feeds and clothes him, reserves large bodies of the best of the land for his use, and should see to it that he be not allowed to encroach upon the rights and privileges and work to the loss and detriment of the white people, who not only support themselves, but contribute from their hard-earned savings to the support of these idle vagabonds.

I feel very much interested in this matter because of my personal knowledge of the facts, and I trust that you will give it consideration and accord us the desired relief.

Very respectfully,

W. A. RICHARDS, *Governor.*

Hon. HOKE SMITH,
Secretary of the Interior, Washington, D. C.

In the early part of July the entire country was startled by the reports of a conflict between the settlers and Indians in Jacksons Hole, and for days thereafter the press of the country carried startling headlines and wildly exaggerated reports of the occurrences in that locality. The region that has become so widely known throughout the country as "Jacksons Hole" is situated immediately south of the Yellowstone National Park. At the north end of this basin lies the beautiful Jacksons Lake, a body of water about 18 miles long by 4 or 5 miles in width. Below the lake for some 30 miles extends a valley of rare beauty, the lower part of which, watered by the Big and Little Gros Ventre rivers, is as fair and fertile a spot as can be found upon earth. To the westward of this valley, and rising from its level surface and from the placid bosom of the lake, ascend the mighty heights of the Teton Range, whose peaks rising from 6,000 to 8,000 feet above the valley, covered with perpetual snow, rival if they do not surpass in grandeur the Swiss Alps.

Over this mighty range, at an elevation of 10,000 feet above the sea level, is the only pass from the west. On the east and south the valley is shut off from the outside world by numerous ranges of the Rocky Mountain belt. Into this valley, far from the conveniences and comforts of older settlements, have come pioneers of the type of those who have laid the foundations of American communities and carried forward the banner of civilization from the Alleghanies to the westward sea. They have diverted the waters of the mountain streams from their channels and, carrying it over the fair valleys, have made them to "blossom as the rose." From the forests on the mountain sides they have obtained the material to fence their farms and the logs with which they have constructed comfortable homes. The heavy snows of winter compel careful attention to the wants of the live stock, and to provide food for them the once sparsely grassed valleys have been converted into rich fields and luxuriant meadows by irrigation.

The present settlement in this region was begun less than six years ago, and although separated from the nearest railway station by a distance of 130 miles over a mountain pass, 2 miles above sea level, in this short time sawmills have been brought into the settlement, the log houses are already giving way to those of board, lath, and plaster, and in these homes you will find many evidences not only of comfort, but of refinement. Schools have been established and in all the time in which this valley has been settled there never has been a criminal case brought before the county authorities.

The mountainous region surrounding this valley is to-day the best hunting ground for large game in the Union. In fact, it is almost the only region of any considerable extent in the United States in which large game are found in considerable numbers. If only hunted in a sportsmanlike way, at proper seasons of the year, parts of this territory will for many years to come continue to be the home of the elk, moose, and deer, affording recreation for the sportsman and adding variety to the larder of the settler. The people of that region, as of all other portions of our State, are thoroughly alive to the importance of enforcing our new game law, and there, as well as in other portions of the State, arrangements were made early in the season by constables and game wardens to see that the law was strictly enforced against all comers.

Early in May word was brought to the authorities in Jackson's Hole, by prospectors, that Indians from the Fort Hall Reservation had passed in over the snow crust to the vicinity of the head waters of the Big Gros Ventre River and were lying upon the trails and killing elk for their hides. Contrary to their usual custom, and plainly indicating that they felt that they were trespassers, these Indians had avoided the settlements and passed directly from their reservation to the hunting grounds. Not even

the most insistent Indian apologist could claim that these Indians were hunting for the purpose of obtaining meat, as at that season of the year and for a month afterward, elk are so poor that their meat is of no value and the only portion that was used by the Indians was the unborn elk calves, which is considered by them to be a great delicacy.

William Manning, constable at Marysvale, made a tour of inspection into the region in which the Indians were hunting, and having located them, on the 7th day of June, with a few men and warrants for the Indians of two lodges, proceeded to the vicinity where the Indians had been located, only to find that they had moved to the head of Green River, where one Indian (One-Eyed George) was arrested. This Indian had in his possession 50 elk hides and about 50 pounds of meat. This Indian was taken to the settlement and fined $15 and costs, which costs were afterwards waived. At the time this Indian was arrested word of his capture was sent by his squaw to the agent who wrote to Mr. Manning, asking him to be lenient with the Indian, as he (the agent) desired to keep the Indians on their reservation, and the Indians hunting at that time were away without permission.

Mr. Manning having learned of other bands of hunting Indians, procured warrants for their arrest, and on the 24th day of June, with two men, he attempted to arrest five Indians about 20 miles from Jackson's Hole. These Indians promptly drew their guns on the posse and held them up, and gave them to understand that they (the Indians) would not be arrested. The Indians had in their possession at that time about 25 hides, the result of the day's hunt, and had evidently saved no meat whatever. All of these Indians understood English thoroughly, and the warrants were read to them and the law fully explained. They said to the constable and his deputies that they would kill any man who tried to arrest them. The posse went to the camp with the Indians and there found a party of about 30 Indian hunters and their squaws. The constable again read the warrants to them and explained the law fully. The Indians again informed the officers that any attempt to arrest them for killing game would result disastrously for the whites. They twitted Mr. Manning and his deputies on their inability to arrest them, ridiculed their attempts to enforce the law, and their evident intentions were well stated by one of the Indians who said, "Elk, all Indian elk. Kill 'em all this year." Constable Manning and his deputies estimated that this party had no less than 500 hides of elk and at the utmost not enough meat to last them over a day or two.

This repulse, however, did not prevent Constable Manning from making another attempt to enforce the game laws. On his return to Marysvale he organized a posse of 37 men, all of whom were sworn in as deputies. On the 4th of July the party overtook a camp of 10 Indians with their squaws. In this camp there were upward of 90 elk hides and not over 100 pounds of dried meat. These Indians were arrested, taken to the settlement, and fined $75 each. The hides captured with the party were turned over to their squaws. The Indians not being able to pay their fines, were turned over to a posse to be taken to the county seat. On their way there they escaped from their guards.

On the 7th day of July Constable Manning and a posse of 27 men, armed with warrants, started for the Hoback Basin, south of Jacksons Hole, where the Indians were known to be violating the game laws. In that region on the 12th a party of 9 Indians were arrested. The squaws belonging to the party were instructed to either go to the agency or follow the party to the settlements. This party had in the neighborhood of 200 elk, moose, and antelope hides, and very little dried meat.

There have been so many flagrant and gross misrepresentations of what followed this arrest that I feel justified in digressing from the thread of my story for a moment to discuss the character and condition of the men under arrest. With this party of 9 Indians was the mother-in-law of "Beaver Dick," a white man, owning a well-improved ranch in Jacksons Hole. This woman speaks and understands English thoroughly. With the party were a number of Indians who had been educated at the agency schools, and who had had better advantages for securing an education than had many of the men who composed the posse. The idea that these Indians did not understand that they were perfectly safe in the hands of a constable's posse is preposterous, and could only emanate from the fertile brain of a newspaper correspondent whose only acquaintance with the Indians was from dime-museum specimens and the perusal of Fenimore Cooper's works. It is in all probability true that these vagabonds, after the manner of their race, would not speak English, though they understood it thoroughly.

Those who have seen well-educated Indians from the best schools in the land gaze stolidly at a questioner and answer in a savage grunt respectful interrogatories addressed to them within three months after they had returned to the reservation can readily understand how these people would pass for simple and unsophisticated children of nature with men who did not understand their habits and dispositions. The statement has been made, absolutely without foundation, that the members of the posse attempted to incite the Indians to escape by arousing their fears. No one understands better than an agency Indian that he is never so safe as when in the charge of white men. But their sullen and overbearing disposition can not brook restraint.

Mr. Manning and his posse could not have had any possible motive for inciting their prisoners to escape. On the contrary, it was only natural that they should make every effort to prevent an escape on the part of the Indians, for should they escape, without an effort being made to restrain them, that fact would soon become known to every band of Indians in the country, and it would be useless to attempt to bring any of them to justice. They also understood thoroughly that if in the attempt to prevent the escape of the Indians there should be bloodshed the condition would be even worse, for not only would it be impossible to arrest any other bands except by force, but, further, the Indians then hunting in the mountains would be very likely to unite and sweep down on the settlements before the settlers could get together for mutual protection.

To return to the thread of our story. When Constable Manning and his party halted for dinner, they noticed that the Indians were rearranging their packs; that they were dividing their rations in such a way that each Indian carried some provisions, and that there were consultations between the bucks and the squaws, who were following the party on the trail. This led Mr. Manning to believe that an attempt would be made by the Indians to escape, and in order to impress them with the fact that they intended to take them to the settlement, Mr. Manning, when the march was taken up again, led, and alternated each Indian on the trail with an armed guard. Nothing could have been stronger evidence to the Indians of the determination of the men to take them to the settlement for trial, than this disposition of them. But the same reckless spirit that prompted the Sioux at Wounded Knee to fire on the soldiers drawn up in line to receive their weapons, prompted these Indians to escape at all hazards, and they no doubt relied upon the fact that in former times they had committed acts of insubordination and escaped punishment therefor.

About the middle of the afternoon, on reaching a part of the trail where there was a heavy growth of young timber, one of the Indians gave a signal, and the entire party swung their horses from the trail and plunged into the thicket. There were but a few seconds in which to take any action. These men had traveled hundreds of miles without pay through an almost trackless forest, subsisting upon the meanest fare and sleeping on the stony ground at night, to bring these savages to justice, and now they were about to escape. It must have occurred to them and their leader that the escape of the Indians would render the enforcement of the law well-nigh impossible, or, what was worse, excited and encouraged by their temporary triumph, the Indians were liable to unite with other bands and in their savage desperation fall upon the outskirts of the settlement before the alarm could be given and the settlers called to a place of safety.

In this moment of time the thought no doubt occurred to them that this party of savage vagabonds were attempting to escape punishment for the violation of laws which they were compelled to respect. They had informed the Indians that they would not be allowed to escape under any circumstances. Was it strange that they made some attempt to keep their word? Was it strange that as the red rovers rushed into the forest they were fired upon? The only remarkable feature of the incident was that under the deadly aim of men used to rapid firing only one Indian was killed and one other wounded, and this of itself is sufficient evidence that there was no disposition to wantonly shed blood, for armed and equipped as they were, if there was any disposition to do so upon the part of the deputies, the entire Indian band might have been wiped out.

After the Indians had escaped it was discovered that the squaws, who were following behind, evidently by prearrangement, had left the trail before the bucks did, and at the first whoop had gone dashing through the wood at a headlong gait, and in traversing the trail over which they had ridden, a papoose was discovered, which had evidently been dropped in the wild scamper. This papoose was picked up, carried safely to the settlement, and afterwards sent to the reservation. A riderless pony having been discovered, the posse hunted thoroughly for another wounded Indian, but were unable to find him, and he was not discovered until some fifteen days later.

The posse then hastily returned to Marysvale, and fearing an attack from the combined forces of the various bands of Indians known to be hunting in the mountains, the settlers were hurriedly collected at the farm of Mr. Wilson in the Gros Ventre Valley. Breastworks were thrown up and arrangements made to repel any attack that might be made. In the Upper Valley, on Snake River, at Cunningham's, substantial stockades were built. At these points nearly the entire population of the valley—men, women,

and children—were gathered for about three weeks, with no shelter but a few tents, during the hottest weather of the summer, hourly expecting to be attacked.

In the meantime couriers were dispatched to Market Lake, Idaho, where the following telegram was sent, on July 16, to the governor of Wyoming:

Nine Indians arrested, one killed, others escaped. Many bands here. Threaten lives and property. Action on your part is absolutely necessary.

This telegram was transmitted to the Secretary of the Interior on the same day by Governor Richards, with the following additions:

I have received other advices by mail reporting the situation is serious. The Indians are Bannacks from Fort Hall, Idaho, arrested for the illegal and wanton killing of game. My letter to you dated June 17 relates to this matter in detail. Can you take immediate action for the protection of our settlers?

No reply having been received from the Interior Department on the 23d of July, Governor Richards sent the following message to the Secretary of the Interior:

Dispatches from my adjutant-general, who is on the ground at Jacksons Hole, reported to you to-day. Will the Federal Government take the matter in hand of returning the Bannacks to their reservation, or will Wyoming be expected to do so? Please wire reply.

On the 24th of July the following telegram was sent to Governor Richards:

Your telegram and one from Agent Teter transmitted to War Department, with request that United States troops be sent to protect settlers and return Indians to their reservations.

JOHN M. REYNOLDS, *Acting Secretary.*

On the same day the following telegram was sent to Governor Richards:

The Secretary of War has ordered Brigadier-General Coppinger to proceed at once to the scene of the trouble and to order such movement of troops as may be necessary to prevent a conflict between the Indians and settlers.

JOHN M. REYNOLDS, *Acting Secretary.*

It is not necessary for me to go into the history of the army operations which followed. The people of this country, through the columns of the sensational press, had reports of this matter ad nauseam. Each callow youth who misrepresented some Eastern newspaper, and who penetrated as near the seat of war as the nearest railway station, felt called upon to outdo his brother correspondent in wild and blood-curdling accounts of what was transpiring, and there being an intense scarcity of foundation for these wild tales, some one of them, with less regard for truth than the rest, after having undoubtedly met Agent Teter, of the Fort Hall Reservation, hit upon the happy expedient of abusing the settlers in lieu of giving war news. These willfully malicious tales were gladly hailed by the Indian lovers down East as the true cause for the outbreak, and for months thereafter the people were treated, through the columns of the Eastern press, to editorials full of as delectable a lot of rot and folderol on the Indian question in general and Jacksons Hole and the atrocious character of the settlers therein in particular as ever a nauseated and long-suffering people were called upon to endure.

In his report of the trouble the Commissioner of Indian Affairs seems to hold a grudge against the settlers for the senseless and alarming tales of slaughter which emanated from the fertile brains of newspaper correspondents at Market Lake and other points in Idaho. In all conscience, these people have had enough to answer for without charging them with the crimes originating in the minds of sensational newspaper reporters. The early sensational reports, charging the settlers with having been guilty of all sorts of crimes, seems to have been so popular in certain circles that even the United States attorney for Wyoming, who never got within 500 miles of the scene of the trouble, felt called upon to "cuckoo" in the same strain. Whatever information he had from the scene of the difficulty seems to have been obtained from a man who went into Jacksons Hole, ostensibly as a newspaper correspondent, but who was really a deputy United States marshal. This individual, who never left the main traveled roads and scarcely got outside the barbed-wire fences, reported that there were no evidences of the wanton slaughter of game by the Indians in that region. Without a single particle of evidence, without an attempt to secure the facts in the case, the United States attorney declares, in his report to the Department in regard to this matter, that the killing of the Indian Se wa a gat was an "atrocious, outrageous, and cold-blooded murder." It has been reported that after this report of the district attorney of Wyoming was made public that gentleman was much exercised over the fact and stated that he thought his report would be treated as confidential and not published.

In the report of the Commissioner of Indian Affairs in regard to the matter is the report of Thomas Teter, agent of the Fort Hall Reservation, which is full of the most glaring misrepresentations; and this report is printed in spite of the fact that it states that from four to seven Indians were killed, and no explanation is made, though at the time it was published it was known that only one Indian was killed.

This report further states that the governor of Wyoming assured the settlers that they would be backed by him in their attempt to drive the Indians out of Wyoming. This is an absolute falsehood, as no communication which by any perversion could be so construed passed between the governor and the people of Jacksons Hole; and the officers in that region only did their plain duty in attempting to enforce the game laws.

Mr. Speaker, the facts in the case are simply these: For years past the Indians have been roaming and hunting at will over a large part of Wyoming and adjoining States. The Indian has absolutely no regard for game life. A being so thoroughly shiftless and improvident that his life is a continuation of feasts and famines has no care for the preservation of game. The greatest delicacy known to an Indian is the unborn young of large game. The number of these animals which are annually slaughtered is eloquently portrayed by the long strings of dewclaws, hundreds in number, which are worn as necklaces by the squaws.

The country which is inhabited by this large game is heavily timbered and mountainous in character. The passes through the mountains are well known by the Indians, and to make it an easy matter to secure the game in large quantities the Indians set fire to thousands of acres of forests and then station themselves at the passes to shoot the frightened animals as they rush past to escape the conflagration. In the month of October of this year I traveled over a week along the crest of the range and in the valleys east and south of the National Park, and during this time the air was dense with the smoke of thousands of acres of magnificent forests, fired by the Shoshones on a hunting trip. I know from personal knowledge and not from hearsay that the Indians had slaughtered a vast amount of game in the mountains surrounding Jacksons Hole during the last summer. The number of hides in the possession of the different parties which were arrested is absolute and unquestionable proof of the waste of a vast amount of meat.

The legislature of Wyoming, as before stated, passed a game law providing for an absolute close season, and this game law was in force last summer for the first time, and it was enforced strictly against white hunters. An attempt to compel the Indians to comply with its provisions led to the Jacksons Hole trouble. An officer of the United States Army, in a report in regard to this matter, stated that he believed that the settlers were responsible for the trouble in Jacksons Hole; and indeed they were responsible in the same way that you would be responsible were you to have trouble with a housebreaker, if, after having discovered him in his unlawful work, you attempted to have him brought to justice. I spent a considerable portion of the past summer in the game regions of northern Wyoming, and I know from personal knowledge that the game laws were enforced, as near as it was possible to do so, against all classes of white hunters, and I know it is the intention of our people to strictly enforce them in the future. But what will it avail if our own citizens and those from abroad, seeking recreation in legitimate hunting, shall be compelled to comply with the law, if bands of 500 or 600 Indian bucks from reservations both sides of this district are to be allowed to hunt absolutely without restriction? How useless it is to attempt to preserve the forests in these mountains at the head waters of streams that flow into both the Pacific and the Gulf, if bands of Indians are to be allowed to pursue their favorite mode of hunting by setting fire to forests to drive the game out.

This trouble is only a repetition of the old story that has been repeated time after time since the white man first landed on the Atlantic Coast. Year by year and decade by decade the vanguard of civilization has driven back the hordes of barbarism. Those who live where years ago similar scenes were enacted can afford to theorize and philosophize as to the Indian, but to the hardy settler on the frontier it is not a "theory but a condition" that confronts him. The Indian has never given up his nomadic ways unless forced to do so, and every onward step of empire has been accomplished in the face of his opposition. But it was not until the past year that the brave people who, foregoing the comforts and privileges of older communities, pushed forward into the mountain valleys to subdue the wilderness encountered not only the savage, but had brought down upon them the unreasoning and unreasonable condemnation in their efforts to found homes of those of their own race. There lives not to-day within the borders of the Republic, and I say it with personal knowledge, a community of people more intelligent or more capable of establishing and maintaining all of the beneficial institutions of civilization and free government than the people living within the shadow of the Grand Teton.

Up to the time the last party of Indians was arrested no authority had ever declared that the Indians were not amenable to the game laws of Wyoming. Every attempt to have this matter thoroughly understood and settled had failed. The Indian Bureau itself in 1894 had declared that the Indian was subject to the game laws of the State in which they were found hunting. No later declaration contrary to this had ever been made by those in charge of the conduct of Indian affairs. The people of Wyoming believed that the State was sovereign in its power to police its territory,

and had the authority to punish all who violated its laws, without regard to race or color.

The highest judicial tribunal in the land has now declared that the view of this matter held by our governor and our county officials was eminently right and lawful, and it is with a vast amount of satisfaction that we who have held that our State was sovereign in its police authority have read the decision of the Supreme Court in the case relating thereto. One of the Indians, Race Horse by name, who had flagrantly violated the State game laws of Wyoming by killing game during the close season, as provided in the State law, was arrested by John Ward, the sheriff of Uinta County, Wyo., on October 3, 1895, charged with having killed seven elk in the State of Wyoming in the vicinity of Mount Hoback on or about the 1st day of July, 1895. This Indian on October 7, 1895, filed in the circuit court of the United States a petition for writ of habeas corpus, and the case was tried in the circuit court of the United States, sitting in the city of Cheyenne, Wyo., and on November 21, 1895, the court held that the Indian was held in custody for an act done in pursuance of the treaty between the United States and the tribe of which he was a member, and was in custody in violation of the Constitution and the laws of the United States. Thereupon the case was appealed to the Supreme Court of the United States and a decision was rendered on the 25th day of May, 1896, as follows:

SUPREME COURT OF THE UNITED STATES.

No. 841.—October term, 1895.

John H. Ward, sheriff of the county of Uinta, in the State of Wyoming, Appellant, *vs.* Race Horse. Appeal from the circuit court of the United States for the district of Wyoming.

[May 25, 1896.]

This appeal was taken from an order of the court below, rendered in a habeas corpus proceeding, discharging the appellee from custody. (70 Fed. Rep., 598.) The petition for the writ based the right to the relief which it prayed and which the court below granted, on the ground that the detention complained of was in violation of the Constitution and laws of the United States, and in disregard of a right arising from and guaranteed by a treaty made by the United States with the Bannack Indians. Because of these grounds the jurisdiction below existed, and the right to review here obtains. (Revised Statutes, section 753; act of March 3, 1891, 36 Stat., 826.)

The record shows the following material facts: The appellee, the plaintiff below, was a member of the Bannack tribe of Indians, retaining his tribal relations and residing with it in the Fort Hall Indian Reservation. This reservation was created by the United States in compliance with a treaty entered into between the United States and the Eastern Band of Shoshones and the Bannack tribe of Indians, which took effect February 24, 1869. (15 Stat., 673.) Article 2 of this treaty, besides setting apart a reservation for the use of the Shoshones, provided:

"It is agreed that whenever the Bannacks desire a reservation to be set apart for their use, or whenever the President of the United States shall deem it advisable for them to be put upon a reservation, he shall cause a suitable one to be selected for them in their present country, which shall embrace reasonable portions of the 'Port Neuf' and 'Kansas Prairie' countries."

In pursuance of the foregoing stipulation the Fort Hall Indian Reservation was set apart for the use of the Bannack tribe.

Article 4 of the treaty provided as follows:

"The Indians herein named agree, when the agency house and other buildings shall be constructed on their reservations named, they will make said reservations their permanent home, and they will make no permanent settlement elsewhere; but they shall have the right to hunt upon the unoccupied lands of the United States so long as game may be found thereon, and so long as peace subsists among the whites and Indians on the borders of the hunting districts."

In July, 1868, an act had been passed erecting a temporary government for the Territory of Wyoming (15 Stat., 178), and in this act it was provided as follows:

"That nothing in this act shall be construed to impair the rights of persons or property now pertaining to the Indians in said Territory, so long as such rights shall remain unextinguished by treaty between the United States and such Indians."

Wyoming was admitted into the Union on July 10, 1890. (26 Stat., 222.) Section 1 of that act provides as follows:

"That the State of Wyoming is hereby declared to be a State of the United States of America, and is hereby declared admitted into the Union on an equal footing with the original States in all respects whatever; and that the constitution which the people of Wyoming have formed for themselves be, and the same is hereby, accepted, ratified, and confirmed."

The act contains no exception or reservation in favor of or for the benefit of Indians.

The legislature of Wyoming on February 20, 1895 (Laws of Wyoming, 1895, chapter 98, page 225), passed an act regulating the killing of game within the State. In October, 1895, the district attorney of Uinta County, State of Wyoming, filed an information against the appellee (Race Horse) for having killed in that county seven elk in violation of the law of the State. He was taken into custody by the sheriff, and it was to obtain a release from imprisonment authorized by a commitment issued under these proceedings that the writ of habeas corpus was sued out.

The following facts are unquestioned: 1st. That the elk were killed in Uinta County, Wyo., at a point about 100 miles from the Fort Hall Indian Reservation, which is situated in the State of Idaho; 2d, that the killing was in violation of the laws of the State of Wyoming; 3d, that the place where the killing took place was unoccupied public land of the United States, in the sense that the United States was the owner of the fee of the land; 4th, that the place where the elk were killed was in a mountainous region some distance removed from settlements, but was used by the settlers as a range for cattle, and was within election and school districts of the State of Wyoming.

Mr. Justice White, after stating the case, delivered the opinion of the court.

"It is wholly immaterial, for the purpose of the legal issue here presented, to consider whether the place where the elk were killed is in the vicinage of white settlements. It is also equally irrelevant to ascertain how far the land was used for a cattle range, since the sole question which the case presents is whether the treaty made by the United States with the Bannack Indians gave them the right to exercise the hunting privilege, therein referred to, within the limits of the State of Wyoming in violation of its laws. If it gave such right, the mere fact that the State had created school districts or election districts, and had provided for pasturage on the lands, could no more efficaciously operate to destroy the right of the Indian to hunt on the lands than could the passage of the game law. If, on the other hand, the terms of the treaty did not refer to lands within a State, which were subject to the legislative power of the State, then it is equally clear that, although the lands were not in school and election districts and were not near settlements, the right conferred on the Indians by the treaty would be of no avail to justify a violation of the State law.

"The power of a State to control and regulate the taking of game can not be questioned. (Geer *vs.* Connecticut, 161 U. S., 519.) The text of article 4 of the treaty, relied on as giving the right to kill game within the State of Wyoming in violation of its laws, is as follows:

"'But they shall have the right to hunt on the unoccupied lands of the United States, so long as game may be found thereon, and so long as peace subsists among the whites and Indians on the borders of the hunting districts.'"

It may at once be conceded that the words "unoccupied lands of the United States" if they stood alone and were detached from the other provisions of the treaty on the same subject, would convey the meaning of lands owned by the United States, and the title to or occupancy of which had not been disposed of. But in interpreting these words in the treaty they can not be considered alone, but must be construed with reference to the context in which they are found. Adopting this elementary method, it becomes at once clear that the unoccupied lands contemplated were not all such lands of the United States wherever situated, but were only lands of that character embraced within what the treaty denominates as hunting districts.

This view follows as a necessary result from the provision which says that the right to hunt on the unoccupied lands shall only be availed of as long as peace subsists on the borders of the hunting districts. Unless the districts thus referred to be taken as controlling the words "unoccupied lands," then the reference to the hunting districts would become wholly meaningless, and the cardinal rule of interpretation would be violated, which ordains that such construction be adopted as gives effect to all the language of the statute. Nor can this consequence be avoided by saying that the words "hunting districts" simply signified places where game was to found, for this would read out of the treaty the provision as "to peace on the borders" of such districts, which clearly pointed to the fact that the territory referred to was one beyond the borders of the white settlements. The unoccupied lands referred to, being therefore contained within the hunting districts, by the ascertainment of the latter the former will be necessarily determined, as the less is contained in the greater. The elucidation of this issue will be made plain by an appreciation of the situation existing at the time of the adoption of the treaty, of the necessities which brought it into being, and of the purposes intended to be by it accomplished.

When in 1868 the treaty was framed the progress of the white settlements westward had hardly, except in a very scattered way, reached the confines of the place selected for the Indian reservation. While this was true, the march of advancing civilization foreshadowed the fact that the wilderness, which lay on all sides of the point selected for the reservation, was destined to be occupied and settled by the white man, hence interfering with the hitherto untrammeled right of occupancy of the Indian. For this reason, to protect his rights and to preserve for him a home where his tribal relations might be enjoyed under the shelter of the authority of the United States, the reservation was created.

Whilst confining him to the reservation, and in order to give him the privilege of hunting in the designated districts, so long as the necessities of civilization did not require otherwise, the provision in question was doubtless adopted, care being, however, taken to make the whole enjoyment in this regard dependent absolutely upon the will of Congress. To prevent this privilege from becoming dangerous to the peace of the new settlements as they advanced, the provision allowing the Indian to avail himself of it only whilst peace reigned on the borders was inserted.

To suppose that the words of the treaty intended to give to the Indian the right to enter into already established States and seek out every portion of unoccupied Government land and there exercise the right of hunting, in violation of the municipal law, would be to presume that the treaty was so drawn as to frustrate the very object it had in view. It would also render necessary the assumption that Congress while preparing the way, by the treaty, for new settlements and new States, yet created a provision not only detrimental to their future well being, but also irreconcilably in conflict with the powers of the States already existing.

It is undoubted that the place in the State of Wyoming where the game in question was killed was, at the time of the treaty in 1868, embraced within the hunting districts therein referred to. But this fact does not justify the implication that the treaty authorized the continued enjoyment of the right of killing game therein, when the territory ceased to be a part of the hunting districts and came within the authority and jurisdiction of a State. The right to hunt given by the treaty clearly contemplated the disappearance of the conditions therein specified. Indeed, it made the right depend on whether the land in the hunting districts was unoccupied public land of the United States. This, as we have said, left the whole question subject entirely to the will of the United States, since it provided, in effect, that the right to hunt should cease the moment the United States parted with the title to its land in the hunting districts.

No restraint was imposed by the treaty on the power of the United States to sell, although such sale, under the settled policy of the Government, was a result naturally to come from the advance of the white settlements in the hunting districts to which the treaty referred. And this view of the temporary and precarious nature of the right reserved in the hunting districts is manifest by the act of Congress creating the Yellowstone Park Reservation, for it was subsequently carved out of what constituted the hunting districts at the time of the adoption of the treaty, and is a clear indication of the sense of Congress on the subject. (17 Stat., 32; 28 Stat., 73.) The construction which would affix to the language of the treaty any other meaning than that which we have above indicated would necessarily imply that Congress had violated the faith of the Government and defrauded the Indians by proceeding immediately to forbid hunting in a large portion of the Territory, where it is now asserted there was a contract right to kill game, created by the treaty in favor of the Indians.

The argument now advanced in favor of the continued existence of the right to hunt over the land mentioned in the treaty after it had become subject to State authority admits that the privilege would cease by the mere fact that the United States disposed of its title to any of the land, although such disposition, when made to an individual, would give him no authority over game, and yet that the privilege continued when the United States had called into being a sovereign State, a necessary incident of whose authority was the complete power to regulate the killing of game within its borders. This argument indicates at once the conflict between the right to hunt in the unoccupied lands within the hunting districts and the assertion of the power to continue the exercise of the privilege in question in the State of Wyoming in defiance of its laws. That "a treaty may supersede a prior act of Congress, and an act of Congress supersede a prior treaty," is elementary. (Tong Yue Ting *vs.* United States, 149 U. S., 698; The Cherokee Tobacco, 11 Wall., 621.)

In the last case it was held that a law of Congress imposing a tax on tobacco, if in conflict with a prior treaty with the Cherokees, was paramount to the treaty. Of course the settled rule undoubtedly is that repeals by implication are not favored, and will not be held to exist if there be any reasonable construction. (Cope *vs.* Cope, 137 U. S., 682, and authorities there cited.) But in ascertaining whether both statutes can be maintained it is not to be considered that any possible theory by which both can be enforced must be adopted, but only that repeal by implication must be held not to have taken place if there be a reasonable construction by which both laws can coexist consistently with the intention of Congress. (United States *vs.* Sixty-seven Packages Dry Goods, 17 How., 87; District of Columbia *vs.* Hutten, 143 U. S., 18; Frost *vs.* Wenie, 157 U. S., 46.)

The act which admitted Wyoming into the Union, as we have said, expressly declared that that State should have all the powers of the other States of the Union, and made no reservation whatever in favor of the Indians. These provisions alone considered would be in conflict with the treaty, if it was so construed as to allow the Indians to seek out every unoccupied piece of Government land and thereon disregard and violate the State law, passed in the undoubted exercise of its municipal authority. But the language of the act admitting Wyoming into the Union, which recognized her coequal rights, was merely declaratory of the general rule.

In Pollard *vs.* Hagan (3 How., 212; 1845) the controversy was as to the validity of a patent from the United States to lands situate in Alabama, which at the date of the formation of that State were part of the shore of the Mobile River between high and low water mark. It was held that the shores of navigable waters and the soil under them were not granted by the Constitution to the United States, and hence the jurisdiction exercised thereover by the Federal Government, before the formation of the new State, was held temporarily and in trust for the new State to be thereafter created, and that such State when created, by virtue of its being, possessed the same rights and jurisdiction as had the original States. And, replying to an argument based upon the assumption that the United States had acquired the whole of Alabama from Spain, the court observed that the United States would then have held it subject to the Constitution and laws of its own Government. The court declared, page 229, that to refuse to concede to Alabama sovereignty and jurisdiction over all the territory within her limits would be to "deny that Alabama has been admitted into the Union on an equal footing with the original States." The same principles were applied in Louisiana *vs.* First Municipality (3 How., 589).

In Withers *vs.* Buckley (20 How., 84; 1857) it was held that a statute of Mississippi creating commissioners for a river within the State and prescribing their powers and duties was within the legitimate and essential powers of the State. In answer to the contention that the statute conflicted with the act of Congress which authorized the people of Mississippi Territory to form a constitution in that it was inconsistent with the provision in the act that "the navigable rivers and waters leading into the same shall be common highways, and forever free, as well to the inhabitants of the State of Mississippi as to other citizens of the United States," the court said (page 92):

"In considering this act of Congress of March 1, 1817, it is unnecessary to institute any examination or criticism as to its legitimate meaning, or operation, or binding authority, further than to affirm that it could have no effect to restrict the new State in any of its necessary attributes as an independent sovereign government, nor to inhibit or diminish its perfect equality with the other members of the Confederacy with which it was to be associated. These conclusions follow from the very nature and objects of the Confederacy, from the language of the Constitution adopted by the States, and from the rule of interpretation pronounced by this court in the case of Pollard's Lessee *vs.* Hagan (3 How., 223)."

A like ruling was made in Escanaba Co. *vs.* Chicago (107 U. S., 678; 1882), where provisions of the ordinance of 1787 were claimed to operate to deprive the State of Illinois of the power to authorize the construction of bridges over navigable rivers within the State. The court, through Mr. Justice Field, said (page 683):

"But the States have full power to regulate within their limits matters of internal police, including in that general designation whatever will promote the peace, comfort, convenience, and prosperity of their people."

And it was further added (page 688):

"Whatever the limitation upon her powers as a government whilst in a territorial condition, whether from the ordinance of 1787 or the legislation of Congress, it ceased to have any operative force, except as voluntarily adopted by her, after she became a State of the Union. On her admission she at once became entitled to and possessed of all the rights of dominion and sovereignty which belonged to the original States. She was admitted, and could be admitted, only on the same footing with them. * * * Equality of the constitutional right and power is the condition of all the States of the Union, old and new."

In Cardwell *vs.* American Bridge Company (113 U. S., 205, 1884), Escanaba Company *vs.* Chicago, supra, was followed, and it was held that a clause in the act admitting California into the Union which provided that the navigable waters within the State shall be free to citizens of the United States, in no way impaired the power which the State could exercise over the subject if the clause in question had no existence. Mr. Justice Field concluded the opinion of the court as follows (page 212):

"The act admitting California declares that she is 'admitted into the Union on an equal footing with the original States in all respects whatever.' She was not, therefore, shorn by the clause as to navigable water within her limits of any of the powers which the original States possessed over such waters within their limits."

A like conclusion was applied in the case of Willamette Iron Bridge Company *vs.* Hatch (125 U. S., 1), where the act admitting the State of Oregon into the Union was construed.

Determining by the light of these principles, the question whether the provision of the treaty giving the right to hunt on unoccupied lands of the United States in the hunting districts is repealed, in so far as the lands in such districts are now embraced within the limits of the State of Wyoming, it becomes plain that the repeal results from the conflict between the treaty and the act admitting that State into the Union. The two facts, the privilege conferred and the act of admission, are irreconcilable in the sense that the two under no reasonable hypothesis can be construed as coexisting.

The power of all the States to regulate the killing of game within their border will not be gainsaid; yet, if the treaty applies to the unoccupied land of the United States in the State of Wyoming, that State would be bereft of such power, since every isolated piece of land belonging to the United States as a private owner, so long as it continued to be unoccupied land, would be exempt in this regard from the authority of the State. Wyoming, then, will have been admitted into the Union, not as an equal member, but as one shorn of a legislative power vested in all the other States of the Union, a power resulting from the fact of statehood and incident to its plenary existence. Nor need we stop to consider the argument advanced at bar, that as the United States, under the authority delegated to it by the Constitution in relation to Indian tribes, has a right to deal with that subject, therefore it has the power to exempt from the operation of State game laws each particular piece of land owned by it in private ownership within a State, for nothing in this case shows that this power has been exerted by Congress.

The enabling act declares that the State of Wyoming is admitted on equal terms with the other States, and this declaration, which is simply an expression of the general rule, which presupposes that States, when admitted into the Union, are endowed with powers and attributes equal in scope to those enjoyed by the States already admitted, repels any presumption that in this particular case Congress intended to admit the State of Wyoming with diminished governmental authority. The silence of the act admitting Wyoming into the Union as to the reservation of rights in favor of the Indians is given increased significance by the fact that Congress in creating the Territory expressly reserved such rights. Nor would this case be affected by conceding that Congress, during the existence of the Territory, had full authority in the exercise of its treaty-making power to charge the Territory, or the land therein, with such contractual burdens as were deemed best, and that when they were imposed on a Territory it would be also within the power of Congress to continue them in the State on its admission into the Union. Here the enabling act not only contains no expression of the intention of Congress to continue the burdens in question to the State, but, on the contrary, its intention not to do so is conveyed by the express terms of the act of admission.

Indeed, it may be further, for the sake of the argument, conceded that where there are rights created by Congress during the existence of a Territory which are of such a nature as to imply their perpetuity, and the consequent purpose of Congress to continue them in the State after its admission, such continuation will, as a matter of construction, be upheld, although the enabling act does not expressly so direct. Here the nature of the right created gives rise to no such implication of continuance, since by its terms it shows that the burden imposed on the Territory was essentially perishable and intended to be of a limited duration. Indeed, the whole argument of the defendant in error rests on the assumption that there was a perpetual right conveyed by the treaty, when in fact the privilege given was temporary and precarious.

But the argument goes further than this, since it insists that, although by the treaty the hunting privilege was to cease whenever the United States parted merely with the title to any of its lands, yet that privilege was to continue although the United States parted with its entire authority over the capture and killing of game. Nor is there force in the suggestion that the cases of the Kansas Indians (5 Wall., 737) and the New York Indians (5 Wall., 761) are in conflict with these views.

The first case (that of the Kansas Indians) involved the right of the State to tax the land of Indians owned under patents issued to them in consequence of treaties made with their respective tribes. The court held that the power of the State to tax was expressly excluded by the enabling act. The second case (that of the New York Indians) involved the right of the State to tax land embraced in an Indian reservation which existed prior to the adoption of the Constitution of the United States.

Thus these two cases involved the authority of the State to exert its taxing power on lands embraced within an Indian reservation, that is to say, the authority of the State to extend its powers to lands not within the scope of its jurisdiction, whilst this case involves a question of whether where no reservation exists a State can be stripped by implication and deduction of an essential attribute of its governmental existence. Doubtless the rule that treaties should be so construed as to uphold the sanctity of the public faith ought not to be departed from. But that salutary rule should not be made an instrument for violating the public faith by distorting the words of a treaty, in order to imply that it conveyed rights wholly inconsistent with its language and in conflict with an act of Congress, and also destructive of the rights of one of the States. To refer to the limitation contained in the Territorial act and disregard the terms of the enabling act would be to destroy and obliterate the express will of Congress.

For these reasons the judgment below was erroneous, and must therefore be reversed, and the case must be remanded to the court below with directions to discharge the writ and remand the prisoner to the custody of the sheriff.

And it is so ordered,

Mr. Justice Brewer, not having heard the argument, takes no part in this decision.

Mr. Speaker, my constituents, living in the fairest land upon the American continent, men and women who have carried the advance guard of civilization into the wilderness, have been maligned and misrepresented, but we had no fear of the final verdict of the opinion of the country when the facts are fully known. No Indian agent, profiting by the present unprogressive and utterly dependent condition of the Indian, and no time-serving officeholders, much as they may temporarily prejudice the public mind, could prevent the settlement of this question in a way that will open up the country to development. The onward march of civilization can not be arrested, and the puny efforts of those whose misdirected sympathies have gotten the better of their judgment, have not resulted in fastening upon my State to run riot, superior to all law, a horde of greasy, lecherous, savage vagabonds, or the turning loose on our farms and ranches of an irresponsible horde of outlaws who can not be held responsible for the violation of our police regulations.

You can not if you would turn back the hands upon the dial of progress, or chain the wheels of the chariot of advancement. "Westward the star of empire takes its way." No mountain is so high, no valley so inaccessible, that it will not be conquered by the indomitable energy of American pioneers. Before the resistless onslaught of civilization savagery must vanish.

There is another aspect of this question that I wish to discuss for a moment. In times past races have been civilized in two ways—by slavery, which taught the savage habits of industry, which, well learned, made him the master, or by war, which, driving the weaker tribes upon bleak and inhospitable regions, where life could not be supported by the chase, compelled them to resort to agriculture to sustain life, and as means of self-defense against powerful peoples, labored to make new discoveries in mining and manufacture, that a superiority of weapons and appliances of war might win for them against the physical force of numbers.

But we have attempted to civilize a race by a new and unheard of method, by moral suasion, and even the most enthusiastic admirers of the system can not, in view of its results after decades and generations of trial, look upon it with any great amount of satisfaction. If the Indian is ever to be civilized he must not only be persuaded but compelled to give up the chase. As long as he

can spend his summers aimlessly roaming through the woods in search of game, he not only will never acquire habits of industry, but his absence from the reservation precludes the possibility of teaching him the arts of agriculture and useful trades. During all of the years since the Bannack and Shoshone Indians were placed upon their present reservations their progress in civilized ways has been very slight. They are almost as entirely dependent on Government rations now as they were thirty years ago. What is the remedy? If the Indian is to be civilized at all he must be kept upon the reservation and compelled to labor.

If the agent in charge of the Fort Hall Reservation had displayed the energy in teaching his Indians the arts of peaceful industry which he did in inciting them to violate the game laws of a neighboring State, there would have been more evidences of progress by the Indians upon that reservation than there now are. Those who understand the methods that have at times been in vogue at Indian agencies can, perhaps, appreciate that it might be to the pecuniary interest of the agent to have his Indians spend a large portion of the year off the reservation while Uncle Sam's monthly ration roll continued undiminished by such absence of those who are supposed to be the recipients of the rations. It is but natural that, having been derelict in his duty to those under his charge, the agent at the Fort Hall Reservation should resort to prevarication and misrepresentation to poison and color the mind of everyone who approached the scene of the trouble as to the character of the settlers in Jacksons Hole and as to their motives, in order to divert public attention from his own violation of the orders of the Indian Department and his lax and incompetent management of the affairs of the Indians under his charge.

I recommend to my friends of the Indian Rights Association, instead of becoming excited over the prospective loss by the Indian of the privilege of indiscriminate slaughter, if they have the true interest of the aborigine at heart, that they insist on his being compelled to work, not in continuing an idle vagabond. Instead of the Indian being the sufferer by this decision of the Supreme Court, I believe its effect in the long run will be immeasurably to his advantage. A weaning from the savage pleasures of the chase is the first step to be taken by the Indian on the road to progress. Neither will the Indians affected necessarily suffer by the loss of the hunting privilege. Their early hunting excursions into the hunting districts yielded them but very slender returns for the skins and hides secured, and a precarious existence while occupied in taking them, while it resulted in the slaughter of vast numbers of young animals, this too at a time when the Indians were most needed upon the reservations if they were to be taught agriculture. There still remains for the Indian limited hunting privilege, equal to that enjoyed by any citizens, and while the red man is being furnished agricultural implements on the reservation and furnished rations by the Government he has no cause to complain if he is governed by the same laws and regulations as govern the white citizens of the States.

Mr. SHERMAN. Mr. Speaker, I shall occupy the time of the House but a moment in calling its attention back from a consideration of the Pope and Thomas Jefferson and other distinguished persons living and dead, and from the discussion of oats, potatoes, and other commodities and conscience generously mingled together by the gentleman from Wisconsin [Mr. COOPER] to the question before the House embodied in the proposed amendment.

There is no difference in any of the propositions submitted either by the House, the Senate, or by the conferees in one respect, to wit, they all embody a declaration that there shall be no further appropriations of public money in aid of sectarian schools. That is in all of the amendments. There is no difference in this regard. This same declaration is contained in each. The difference is that the conference report provides that there shall not be expended more for the next fiscal year than 50 per cent of the amount appropriated for the fiscal year ending June 30, 1896, in continuing these schools, and then only where it is impossible for the Department to secure any other means to educate the Indian children.

It is all very well for the gentleman to talk of building a seven-story structure in Chicago in a very short time. Chicago is one place and the deserts of Idaho quite another, and the erection of buildings in the two places present widely different problems—the one easy of solution, the other difficult. The only question for us now is not whether we shall declare that we are opposed to all aid to sectarian schools—for in this regard all provisions are identical—but whether the Secretary of the Interior shall expend anything for one year more on such schools.

Mr. LINTON. Will the gentleman allow me a question?

Mr. SHERMAN. Certainly.

Mr. LINTON. I would like to ask the gentleman the exact amount that will be appropriated for sectarian schools in case this bill passes in its present form?

Mr. SHERMAN. It can not in any event exceed $145,000 or $150,000.

Mr. LINTON. Then $145,000 will go to sectarian schools, under the report, if it is adopted?

Mr. SHERMAN. Not necessarily, by any means. Let me say to the gentleman that not a cent will be thus expended, if the Secretary lives up to the wording of the section, if he can provide any any other means for educating them. We have no doubt—the members of the Indian Committee, and I think my friend himself has not any doubt—that the Secretary and the Commissioner, so far as in their power, will live up to the spirit and letter of this declaration by Congress. That is, the expenditure is limited to 50 per cent of the amount thus expended in the fiscal year 1894–95, but no amount can be expended where provision can be otherwise made for the education of these Indian children.

Mr. LINTON. He may pay that amount to sectarian schools?

Mr. SHERMAN. If it is possible for him to make provision for educating them otherwise, there will not be an expenditure of one dollar under the wording and the spirit of this amendment.

Mr. HAINER of Nebraska. Will the gentleman allow me?

Mr. SHERMAN. Certainly I will.

Mr. HAINER of Nebraska. Is it not true that the Commissioner of Indian Affairs stated to the Senate committee that they could take care of all these Indian children, at some inconvenience, but still could do it?

Mr. SHERMAN. I understand he has so said. He did not say it in my presence; and if he did say it, then, under the wording of this very amendment, he will not expend one cent on sectarian schools.

Mr. HAINER of Nebraska. Then you do not need the amendment?

Mr. SHERMAN. Then the amendment does no harm, even from the gentleman's point of view.

Mr. HAINER of Nebraska. It does no good.

Mr. SHERMAN. I desire to read this amendment, Mr. Speaker, so there can be no mistake about the wording of it. I wish the attention of the House, so that everybody may have an understanding of it:

And it is hereby declared to be the settled policy of the Government to make no appropriation whatever for the education of Indian children in any sectarian school, just as soon as it is possible for provision to be made for their education otherwise, and the Secretary of the Interior is hereby authorized and directed to make such provision at the earliest practicable day, not later than July 1, 1897: *Provided*, That the Secretary of the Interior may make contracts with present contract schools for the education of Indian pupils during fiscal year 1897, but shall only make such contracts at places where non-sectarian schools can not be provided for such Indian children and to an amount not exceeding 50 per cent of the amount so used for the fiscal year 1895.

This declaration and that originally passed by the House are identical. The difference in the sections is that the Secretary may, under the conference amendment, contract to a limited amount for one more year, if he can not otherwise educate these children; whereas, under the House provision, he can not. I think the report fair and reasonable, even from the opposition standpoint, and the report ought to be adopted. I ask for a vote.

Mr. TRACEY. Will it not be good policy to emphasize that declaration by voting down all possibility of expending money in that direction?

Mr. SHERMAN. There is no possibility now, provided the Indian children can be educated otherwise.

Now, Mr. Speaker, I ask for a vote.

The question was taken on agreeing to the conference report; and on a division there were—ayes 58, noes 65.

Accordingly the conference report was rejected.

Mr. SHERMAN. I move that a further conference be ordered.

The motion was agreed to.

The SPEAKER appointed as conferees on the part of the House Mr. SHERMAN, Mr. CURTIS of Kansas, and Mr. PENDLETON.

ALCOHOL IN THE ARTS.

The SPEAKER. Under the act of June 3, 1896, entitled "An act to repeal section 61 of an act to reduce taxation, to provide revenue for the Government, and for other purposes," which became a law August 28, 1894, the Chair appoints as members of the joint select committee on the part of the House "to consider all questions relating to the use of alcohol in the manufactures and arts, free of tax," etc., the gentleman from Kentucky, Mr. EVANS, the gentleman from Connecticut, Mr. RUSSELL, and the gentleman from Tennessee, Mr. MCMILLIN.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. GROUT. Mr. Speaker, I desire to present a conference report on the District of Columbia appropriation bill.

The conference report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 40 and 105.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"*Provided*, That the fifth section of the act of Congress approved August 2, 1894, relating to reciprocal trackage arrangements by the Metropolitan and

other railroad companies, be, and the same is hereby, amended by adding the following thereto:

"'*Provided*, That any suburban street railroad company in the District of Columbia intersecting or connecting with any urban street railroad may have such reasonable number of its trail cars drawn by such urban railroad company, over the route of such urban railroad for the transportation of through passengers, as shall not, in the judgment of the supreme court of the District of Columbia, be to the undue detriment of such urban railroad company. The schedule, kind, and number of cars to be drawn, compensation therefor, and all other matters relating thereto in the event of said railroad companies being unable to agree between themselves shall, from time to time, on petition of either railroad company, be decided by said supreme court.

"'*Provided further*, That in no event shall any railroad company be entitled under said law providing for trackage arrangements or under the provisions of this act to collect fares except from such passengers as board the cars upon their own line.

"'*Provided further*, That this provision shall not be construed to affect rights heretofore acquired either by contract or under any order of court made under authority of law.'"

And the Senate agree to the same.

Amendment numbered 69: That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That the Commissioners of the District of Columbia be, and they are hereby, required to examine into the proposed extension of Connecticut avenue from Florida avenue to the District line, and report to Congress on or before the first Monday of December next, the comparative advantages and disadvantages and comparative cost of opening said Connecticut avenue on a straight extension of the line thereof as now established in the city of Washington, instead of opening the same on the deflected line heretofore adopted and now on file; and that from and after the passage of this act no building permits shall be granted upon ground which would be covered by either extension of said Connecticut avenue, until otherwise provided by law."

And the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$90,500"; and the Senate agree to the same.

Amendment numbered 154: That the House recede from its disagreement to the amendment of the Senate numbered 154, and agree to the same with amendments as follows: In lieu of the matter inserted by said amendment, insert the following:

"The Commissioners of the District of Columbia are hereby directed to report to Congress, at its next regular session, what charges are made in the District of Columbia to the public and to the Government for the use of telephones, and the relative charges made for the use of telephones in other cities, operated by underground and by overhead wires."

And on page 31 of the bill, after line 4, insert the following:

"That any balance of the appropriation for the collection and removal of garbage in the District of Columbia remaining unexpended June 30, 1896, shall be available for the service of the fiscal year 1897."

And the Senate agree to the same.

The committee of conference have been unable to agree upon the amendments of the Senate numbered 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, 195, and 201.

H. M. TELLER,
W. B. ALLISON,
Managers on the part of the Senate.

WILLIAM W. GROUT,
MAHLON PITNEY,
ALEX. M. DOCKERY,
Managers on the part of the House.

The statement of the House conferees was read, as follows:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5210) making appropriations for the expenses of the government of the District of Columbia submit the following written statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report, namely:

On amendment No. 40: Strikes out the appropriation of $203,380.56 proposed by the Senate to pay for lots condemned for the extension of Sixteenth street.

On amendment No. 61, relating to reciprocal trackage arrangements between street railways: Inserts the provision which is fully set forth in the conference report.

On Nos. 69 and 87: Strikes out the provision proposed by the Senate appropriating $6,000 for paving Connecticut avenue and Columbia road; and the provision requiring that Connecticut avenue be extended straight from Le Roy place to the District line, on the line of Connecticut avenue as now established; inserts in lieu of said provision another, requiring the Commissioners of the District to report to Congress at its next session as to the proposed extension of Connecticut avenue, the comparative advantages and disadvantages, and the comparative cost of opening said avenue on a straight extension of the line as now established instead of opening same on the deflected line heretofore adopted and now on file, and prohibiting the granting of building permits upon ground which would be covered by either extension of said avenue, until otherwise provided by law.

On No. 105: Strikes out the appropriation of $266,546.38 proposed by the Senate for the Washington Aqueduct tunnel,

On No. 154: In lieu of the provision inserted by the House regulating telephone charges in the District of Columbia, inserts a provision requiring the Commissioners of the District to report to Congress at its next session what charges are made in the District for the use of telephones and the relative charges made in other cities for telephones operated by underground and overhead wires.

The committee of conference have been unable to agree on the following amendments:

On Nos. 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, and 100, relating to the rates to be paid for gas and electric street lighting in Washington;

On Nos. 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, and 195, relating to appropriations for charities in the District of Columbia; and

On No. 201, striking out the provision proposed by the House requiring the application of not exceeding $300,000 out of the surplus revenues to the satisfaction of the water debt of the District.

WILLIAM W. GROUT,
MAHLON PITNEY,
ALEX. M. DOCKERY,
Managers on the part of the House.

Mr. GROUT. Mr. Speaker, those who have followed the statement will see that this is only a partial agreement; but all the subjects in the bill are disposed of excepting the gas and electric lighting, several amendments relating to those subjects, and charities, and an amendment which relates to the application of the water fund in extinguishment of the water debt, which is of no significance. I want to say as to the three subjects that we are disagreeing about, we hope when next together to be able to come to an understanding.

Now, Mr. Speaker, I ask for a vote on the adoption of the conference report.

The report of the committee of conference was agreed to.

Mr. GROUT. Now I move that the House further insist on its disagreement to the amendments of the Senate and ask a further conference.

The SPEAKER. The gentleman moves that the House further insist on its disagreement to the amendments of the Senate and ask a further conference.

The motion was agreed to.

The SPEAKER. The Chair will appoint as conferees on the part of the House the gentleman from Vermont, Mr. GROUT, the gentleman from New Jersey, Mr. PITNEY, and the gentleman from Missouri, Mr. DOCKERY.

Mr. DINGLEY. Mr. Speaker, in order that this legislative day may be continued for an hour longer for motions to suspend the rules, I move that the House take a recess until 10 o'clock on Monday morning.

The motion was agreed to.

And accordingly (at 7 o'clock and 25 minutes p. m.) the House was declared in recess until 10 o'clock a. m., Monday, June 8.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Acting Secretary of the Treasury, transmitting a statement of the expenditures in the United States Coast and Geodetic Survey for the fiscal year ended June 30, 1895—to the Committee on Appropriations, and ordered to be printed.

A letter from the Acting Secretary of the Treasury, transmitting with favorable recommendations a draft of a joint resolution to authorize the use of certain moneys for the expenses of the Revenue-Cutter Service for 1896—to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. POWERS, from the Committee on Pacific Railroads, to which was referred the bill of the Senate (S. 1832) entitled "An act to define the rights of purchasers under mortgages authorized by an act of Congress approved April 20, 1871, concerning the Atlantic and Pacific Railroad Company," reported the same without amendment, accompanied by a report (No. 2264); which said bill and report were referred to the House Calendar.

Mr. CATRON, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 3206) entitled "An act to grant a right of way through the new Fort Bliss Military Reservation to the El Paso and Northeastern Railroad Company," reported the same without amendment, accompanied by a report (No. 2265); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HILBORN, from the Committee on Naval Affairs, to which was referred House resolution No. 216, reported in lieu thereof a resolution (House Res. No. 417) to authorize the Committee on Naval Affairs to investigate the charge that mechanics employed at the New York Navy-Yard who obtained their places by competitive examination have been discharged by the constructor, in violation of law, accompanied by a report (No. 2270); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

By Mr. BAKER of Kansas, from the Committee on Invalid Pensions: The bill (H. R. 6755) granting an increase of pension to James S. Chapman. (Report No. 2248.)

By Mr. CROWTHER, from the Committee on Invalid Pensions:

The bill (H. R. 3328) granting a pension to Mrs. Nancy M. Daniels. (Report No. 2249.)

The bill (H. R. 8388) for the relief of William G. Buck. (Report No. 2250.)

By Mr. KIRKPATRICK, from the Committee on Invalid Pensions:

The bill (H. R. 7105) increasing the pension of Augustus Schulz, of Salina, Kans. (Report No. 2251.)

The bill (H. R. 7787) granting a pension to Angelina Welden, of Media, Kans., as army nurse. (Report No. 2252.)

By Mr. PICKLER, from the Committee on Invalid Pensions:

The bill (H. R. 1543) to increase the pension of Carey H. Russell. (Report No. 2253.)

The bill (H. R. 9314) granting a pension to Newman C. Nash. (Report No. 2254.)

The bill (H. R. 9212) granting an increase of pension to John R. Lumbert, of Preston, Iowa. (Report No. 2268.)

By Mr. THOMAS, from the Committee on Invalid Pensions:

The bill (H. R. 8454) granting an increase of pension to Frank Rockwith. (Report No. 2255.)

The bill (H. R. 2329) for the relief of Mrs. Matilda G. Higbee. (Report No. 2256.)

The bill (H. R. 571) granting a pension to Margaret Davis. (Report No. 2257.)

The bill (H. R. 619) granting a pension to Martin V. Shears. (Report No. 2258.)

The bill (H. R. 5954) for the relief of Adolphus D. Hopkins. (Report No. 2269.)

By Mr. FENTON, from the Committee on Military Affairs: The bill (H. R. 6199) for the relief of Francis S. Davidson, late first lieutenant, Ninth United States Cavalry. (Report No. 2262.)

By Mr. GRAFF, from the Committee on Claims:

The bill (H. R. 3106) for the relief of John Breen, lately postmaster at Gladwyne, Pa. (Report No. 2266.)

The bill (H. R. 2806) for the relief of the assistant treasurer of the United States at New York, N. Y. (Report No. 2267.)

PUBLIC BILLS, MEMORIALS, AND RESOLUTIONS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. FAIRCHILD: A bill (H. R. 9401) to provide for celebrating the opening of a new century by holding an international exhibition of arts, industries, manufactures, and the product of the soil, mine, and sea, in the city of New York, in the State of New York—to the Committee on Ways and Means.

By Mr. McLACHLAN: A bill (H. R. 9405) to set apart a tract of land in the State of California for a public park—to the Committee on the Public Lands.

By Mr. MONEY: A bill (H. R. 9406) to amend an act entitled "An act to incorporate the Capital Railway Company," approved March 2, 1895—to the Committee on the District of Columbia.

By Mr. PAYNE: A resolution (House Res. No. 414) to amend the rules of the House so that when unanimous consent is asked for the consideration of a measure it shall require the objection of at least 10 members to defeat it—to the Committee on Rules.

By Mr. SHERMAN: A resolution (House Res. No. 415) for the printing of 10,000 copies of the hearings before the Interstate and Foreign Commerce Committee upon the Nicaragua Canal—to the Committee on Printing.

By Mr. FITZGERALD: A resolution (House Res. No. 416) asking information of the Secretary of the Navy as to the probable cost of fitting up a suitable plant for the manufacture of armor plate at the Charlestown Navy-Yard—to the Committee on Naval Affairs.

PRIVATE BILLS, ETC.

Under clause 1 of Rule XXII, private bills of the following titles were presented and referred as follows:

By Mr. ANDREWS: A bill (H. R. 9382) granting an increase of pension to John L. Sanders—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9383) granting an increase of pension to George W. Howard—to the Committee on Invalid Pensions.

By Mr. CALDERHEAD: A bill (H. R. 9384) for the relief of Mrs. Sarah C. Brooks, of Jamestown, Cloud County, Kans.—to the Committee on Indian Affairs.

By Mr. FENTON: A bill (H. R. 9385) granting a pension to Robert Erwin—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9386) for the relief of William Davis, of Omega, Ohio—to the Committee an Military Affairs.

By Mr. GRIFFIN: A bill (H. R. 9387) to remove the charge of desertion from the military record of John Faulds—to the Committee on Military Affairs.

By Mr. HARRIS: A bill (H. R. 9388) granting a pension to Joel W. Gibson—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9389) to reimburse William Crawford—to the Committee on War Claims.

By Mr. HERMANN: A bill (H. R. 9390) to remove the charge of desertion against Peter Kenney—to the Committee on Military Affairs.

By Mr. HULING: A bill (H. R. 9391) granting an honorable discharge to Samuel G. Stotzenberg—to the Committee on Military Affairs.

By Mr. JOHNSON of North Dakota: A bill (H. R. 9392) to increase the pension of Daniel Phillips, of Company D, Thirteenth Regiment Wisconsin Infantry—to the Committee on Invalid Pensions.

By Mr. LONG: A bill (H. R. 9393) granting a pension to John S. Barnhart—to the Committee on Invalid Pensions.

By Mr. McCALL of Tennessee: A bill (H. R. 9394) to pension Mrs. Martha Sanders—to the Committee on Invalid Pensions.

By Mr. McCREARY of Kentucky: A bill (H. R. 9395) for the relief of George Price—to the Committee on War Claims.

By Mr. SOUTHARD: A bill (H. R. 9396) granting increase of pension to Francis L. Danford, Ninth Michigan Cavalry—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9397) granting a pension to William H. Taylor, an army nurse—to the Committee on Invalid Pensions.

By Mr. SULLOWAY: A bill (H. R. 9398) granting a pension to Lizzie B. Burrows—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9399) granting a pension to James Killoran, alias James Smith—to the Committee on Invalid Pensions.

By Mr. WATSON of Ohio: A bill (H. R. 9400) to correct the military record of George W. Little—to the Committee on Military Affairs.

By Mr. EVANS: A bill (H. R. 9402) granting a pension to Mary D. Griffiths—to the Committee on Invalid Pensions.

By Mr. McLACHLAN: A bill (H. R. 9403) for the relief of A. W. Weighbors—to the Committee on Pensions.

By Mr. MAGUIRE: A bill (H. R. 9407) granting a pension to Mary E. Dollard—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9408) to authorize the United States Court of Private Land Claims to hear, try, and determine the issues as to the extent and boundaries of the Las Animas grant—to the Committee on Private Land Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. DALZELL: Two petitions of sundry citizens of Allegheny County, Pa., in favor of House bill No. 260, to increase the pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. ELLIS: Petition of 22 citizens of Astoria, Oreg., in behalf of the metric system—to the Committee on Coinage, Weights, and Measures.

By Mr. FARIS: Affidavit of Alfred Helms, to accompany House bill No. 6733, for the relief of George W. Winters—to the Committee on Military Affairs.

Also, petition and papers to accompany House bill No. 9080, to relieve William H. Wood—to the Committee on Military Affairs.

Also, paper to accompany House bill No. 7228, to increase the pension of William A. Rhoderick—to the Committee on Invalid Pensions.

By Mr. FENTON: Petition of J. W. Hayslip and others, of Manchester, Ohio, for the relief of Robert Erwin—to the Committee on Invalid Pensions.

By Mr. HERMANN: Petition of citizens of Linn County, Oreg., requesting the passage of House bill No. 2626, for the protection of agricultural staples by an export bounty—to the Committee on Ways and Means.

By. Mr. McLACHLAN: Petitions of citizens of San Luis Obispo, Santa Monica, and Santa Barbara, of the State of California, praying for favorable action on House bill No. 838, to reduce letter postage, and bill No. 4566, to amend the postal laws relating to second-class matter—to the Committee on the Post-Office and Post-Roads.

Also, petition of residents of the county of Santa Barbara, Cal., asking for the creation of a national public park in said county—to the Committee on the Public Lands.

By Mr. SORG: Petition of Cotterill, Fenner & Co., of Dayton, Ohio, protesting against a certain amendment to the revenue laws, relating to gifts or premiums to accompany the sale of chewing and smoking tobacco—to the Committee on Ways and Means.

Also, resolution of the Toledo Produce Exchange, protesting against the passage of House bill No. 8536 and Senate bill No. 2967, to amend the interstate-commerce act—to the Committee on Interstate and Foreign Commerce.

By Mr. SOUTHARD: Petition of citizens of Swanton, Ohio, in favor of House bills Nos. 4566 and 838, amending the postal laws—to the Committee on the Post-Office and Post-Roads.

By Mr. SULLOWAY: Petition of citizens of Lakeport, N. H., for favorable action on House bills Nos. 4566 and 838, proposing amendments to the postal laws—to the Committee on the Post-Office and Post-Roads.

By Mr. WATSON of Ohio: Paper to accompany House bill to correct the military record of George W. Little—to the Committee on Military Affairs.

SENATE.

MONDAY, *June 8, 1896.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

On motion of Mr. HALE, and by unanimous consent, the reading of the Journal of the proceedings of Saturday last was dispensed with.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had disagreed to the report of the committee of conference on certain amendments of the Senate to the bill (H. R. 6249) making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, for the fiscal year ending June 30, 1897, and for other purposes; further insisted upon its disagreement to the amendments of the Senate numbered 64, 69, and 70; asked a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SHERMAN, Mr. CURTIS of Kansas, and Mr. PENDLETON managers at the conference on the part of the House.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6614) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897; insisted upon its disagreement to the amendment of the Senate to the bill numbered 1; agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. LOUD, Mr. SMITH of Illinois, and Mr. KYLE managers at the conference on the part of the House.

The message further announced that the House further insisted upon its disagreement to the amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes, numbered 32, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 51, and 52; agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. BOUTELLE, Mr. ROBINSON of Pennsylvania, and Mr. CUMMINGS managers at the conference on the part of the House.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes; further insisted upon its disagreement to the amendments of the Senate numbered 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, 195, and 201 to the bill; asked a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. GROUT, Mr. PITNEY, and Mr. DOCKERY managers at the conference on the part of the House.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes; agreed to the amendment of the Senate numbered 97 to the bill with an amendment, in which it requested the concurrence of the Senate; further insisted upon its disagreement to the residue of the amendments numbered 2, 3, 4, 6, 7, 8, 13, 15, 16, 17, 32, 61, 109, 122, 123, 124, 146, 147, and 161; agrees to the further conference asked for by the Senate on the disagreeing votes of the Houses thereon, and had appointed Mr. CANNON, Mr. HAINER of Nebraska, and Mr. SAYERS managers at the conference on the part of the House.

The message also announced that the House had passed the following bills and joint resolution; in which it requested the concurrence of the Senate:

A bill (H. R. 7907) for the protection of the people of the Indian Territory, extending the jurisdiction of the United States courts, providing for the laying out of towns, the leasing of coal and other mineral, timber, farming, and grazing lands, and for other purposes;

A bill (H. R. 9404) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes; and

A joint resolution (H. Res. 195) to pay the officers and employees of the Senate and House of Representatives on the day following adjournment.

The message further announced that the House had passed the following bill and joint resolution:

A bill (S. 2022) to amend an act entitled "An act to provide for the protection of the salmon fisheries of Alaska;" and

A joint resolution (S. R. 155) to authorize a scientific investigation of the fur-seal fisheries.

The message also announced that the Speaker of the House of Representatives had appointed, in compliance with the act approved June 3, 1896, entitled "An act to repeal section 61 of an act to reduce taxation, to provide revenue for the Government, and for other purposes," which became a law August 28, 1894, Mr. EVANS of Kentucky, Mr. RUSSELL of Connecticut, and Mr. MCMILLIN of Tennessee members of the joint special committee on the part of the House to consider all questions relating to the use of alcohol in the manufactures and arts free of tax, etc.

The message further returned to the Senate, in compliance with its request, the bill (S. 1189) granting a pension to Eliza Sandford.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

A bill (S. 2169) to regulate mail matter of the fourth class;

A bill (H. R. 1826) granting a pension to Henry Prince;

A bill (H. R. 6603) to pension the minor children of Patrick F. Reynolds; and

A bill (H. R. 6826) granting a pension to Rhoda Augusta Thompson, daughter of the late Thaddeus Thompson, a private in the Revolutionary war.

CHICKASAW TRUST FUNDS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting an application of the Chickasaw Nation through their delegates for the withdrawal of $100,000 of their trust funds, to be placed to the credit of the nation with the assistant treasurer of the United States at St. Louis, Mo., subject to the order of the treasurer of the nation, for the payment of national warrants issued by the auditor of public accounts of the nation, and requesting early and favorable action by Congress; which was read.

Mr. JONES of Arkansas. In connection with this communication from the Secretary of the Interior I submit the resolution which I send to the desk, which I ask may be read and acted on at this time.

The resolution was read, considered by unanimous consent, and agreed to, as follows:

The President of the United States having on this 8th day of June, 1896, given his consent, in writing, authorizing the Chickasaw Nation of Indians in the Indian Territory to withdraw from their trust funds now in the Treasury of the United States $100,000, to be placed in the subtreasury of the United States to their credit, as provided by the eleventh article of the treaty of October 20, 1832, with said Indians: Therefore

Be it resolved, That the Senate of the United States of America, now in session, concurs in the recommendation of the President, and hereby consents that $100,000 of the trust funds of the Chickasaw Nation of Indians in the Indian Territory may be withdrawn from the Treasury of the United States, in accordance with the provisions of article 11 of the treaty of October 20, 1832, with said Indians, and placed to the credit of said Chickasaw Nation in the subtreasury of the United States at Louis, Mo.

DEFICIENCY APPROPRIATION BILL.

Mr. HALE. I ask the Chair to lay before the Senate the deficiency appropriation bill which has come from the House.

The bill (H. R. 9404) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes, was read twice by its title.

Mr. HALE. I ask unanimous consent that the Senate proceed to the consideration of the bill.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and the bill is before the Senate as in Committee of the Whole.

Mr. QUAY. I trust the Senator from Maine will yield to me in order that I may procure an order for the withdrawal of certain papers.

Mr. HALE. The deficiency appropriation bill is before the Senate for consideration, and therefore, as that will not in any manner be taken out of the way, I yield the floor for morning business.

INDIAN APPROPRIATION BILL.

Mr. PETTIGREW. I ask the Chair to lay before the Senate the action of the House of Representatives on the Indian appropriation bill.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the report of the committee of conference on the amendments of the Senate to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, and requesting a further conference on the disagreeing votes of the two Houses.

Mr. PETTIGREW. I move that the Senate further insist upon its amendments and agree to the further conference asked by the House of Representatives.

The motion was agreed to.

By unanimous consent, the Vice-President was authorized to

appoint the conferees on the part of the Senate at the further conference; and Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL were appointed.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a memorial of the Academy of Natural Sciences of Philadelphia, Pa., remonstrating against the passage of Senate bill No. 1552, for the further prevention of cruelty to animals in the District of Columbia; which was ordered to lie on the table.

Mr. CANNON presented the petition of Gen. R. H. G. Minty and 17 other citizens of Ogam, Utah, praying for the enactment of legislation to correct the military record of Temple Short; which was referred to the Committee on Military Affairs.

REPORTS OF COMMITTEES.

Mr. HILL, from the Committee on the Judiciary, to whom was referred the bill (S. 3229) for the relief of William H. Scofield, Jacob Brady, James Ketcham, Annie Booth as administratrix of the goods, chattels, and credits of George W. Booth, deceased; Wilson P. Billar, Ezra L. Waterhouse, Moses C. Bell, George W. Byles, and George A. Scofield, reported it with an amendment.

Mr. GALLINGER, from the Committee on Pensions, to whom was referred the bill (H. R. 1874) to place the name of Robert Smalls on the pension rolls, reported it without amendment, and submitted a report thereon.

Mr. PRITCHARD, from the Committee on Pensions, to whom was referred the bill (H. R. 1890) granting a pension to Mary Martin, reported it without amendment, and submitted a report thereon.

Mr. CAFFERY, from the Committee on Claims, to whom was referred the bill (S. 2054) for the relief of Rinaldo P. Smith, of Baltimore, Md., reported it with amendments, and submitted a report thereon.

Mr. HAWLEY. I report back from the Military Affairs Committee several bills which may be indefinitely postponed, as the subject has been considered in another bill previously reported.

The bills were postponed indefinitely, as follows:

A bill (S. 538) to provide a modern organization for the line of the Army;

A bill (S. 1472) to reorganize the line of the Army;

A bill (S. 2004) to increase the efficiency of the infantry of the Army of the United States; and

A bill (S. 2130) to provide for a military peace establishment.

BILLS INTRODUCED.

Mr. GALLINGER introduced a bill (S. 3267) to authorize the acquisition of certain real estate for the purpose of a site for a hospital for the treatment of contagious diseases; which was read twice by its title.

Mr. GALLINGER. In connection with the bill I submit certain papers and a map showing the proposed site. I move that the map be printed at the end of the bill, and that the bill and accompanying papers be referred to the Committee on the District of Columbia.

The motion was agreed to.

Mr. PASCO (by request) introduced a bill (S. 3268) for the relief of the legal representatives of Alison J. Tinsley; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Claims.

Mr. CHANDLER introduced a bill (S. 3270) to pay Eliza R. Crawford the amount of United States loan certificate issued in 1779; which was read twice by its title, and referred to the Committee on Claims.

NORTHERN PACIFIC RAILROAD.

Mr. PETTIGREW submitted an amendment intended to be proposed by him to the joint resolution (S. R. 124) to facilitate the reorganization of the Northern Pacific Railroad Company, etc.; which was ordered to lie on the table and be printed.

WITHDRAWAL OF PAPERS.

On motion of Mr. QUAY, it was

Ordered, That leave be granted for the withdrawal of the papers filed with Senate joint resolution 104, Fifty-third Congress, second session, relating to the disallowed war claims of the State of Pennsylvania.

IMPORTED PARCELS AND PACKAGES.

Mr. GIBSON. I submit a resolution, and ask for its present consideration.

The resolution was read, as follows:

Resolved, That the bill (H. R. 6259) as amended and passed the Senate June 6, 1896, be referred to the Committee on the Judiciary, with instructions to examine the same and report to the Senate whether any of its provisions are in violation of existing treaty stipulations between the United States and foreign nations.

Mr. PLATT. What is the bill to which the resolution refers?

Mr. GIBSON. I have a copy of the bill here. It is——

Mr. QUAY. I object to the present consideration of the resolution.

The VICE-PRESIDENT. Objection is made, and the resolution goes over.

EQUESTRIAN STATUE OF GENERAL SHERMAN.

Mr. WOLCOTT. I submit a resolution, and ask for its immediate consideration.

The resolution was read, as follows:

Resolved, That the Committee on the Library be directed to inquire into all the facts and circumstances connected with the late award of a contract for the erection, at the city of Washington, of an equestrian statue of Gen. William T. Sherman, and to make report thereon to the Senate at the next session of Congress, with such recommendation as the committee may deem necessary or proper; and the Secretary of War is hereby requested to suspend the execution of the contract for the construction of said monument until such report is received.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. ALLISON. I ask that it may go over until to-morrow.

Mr. WOLCOTT. Does the Senator from Iowa understand that to-morrow will be a legislative day?

Mr. ALLISON. I have no doubt of it.

Mr. WOLCOTT. I have something to say upon the resolution, and I desire that it shall be voted upon; that is all.

Mr. HAWLEY. I wish to ask the Senator whether he can not in some way or other reach the object he is seeking without postponing this matter until to-morrow?

Mr. WOLCOTT. I do not exactly see how it can be accomplished. The facts connected with the award are such that I should be very glad to state them to the Senate at any time when it is patient enough to hear them and there is a possibility for the resolution to be voted upon, and I can state them very briefly. I do not want to press the resolution now, but I should like to know that it can be voted upon at the present session, and I would not like to have it go over on objection if I could help it. However, there are very many things done in the Senate that we can not help. I do not want it to go over unless it can be acted upon before the Senate adjourns.

Mr. HAWLEY. There are two sides to the question.

Mr. WOLCOTT. Oh, certainly; there are two sides to almost every question.

Mr. ALLISON. Of course it requires unanimous consent for the resolution to be considered this morning.

Mr. WOLCOTT. Yes, sir.

Mr. ALLISON. I can very well see why some of us, at least, would be glad to read the resolution and consider it a little more before it is acted upon. Therefore I simply object, in order that it may go over, as resolutions usually do when they are objected to.

Mr. WOLCOTT. Do I understand the Senator from Iowa to say that he thinks there is to be a legislative day to-morrow?

Mr. ALLISON. Of course it is impossible for me to state positively; but I think so.

The VICE-PRESIDENT. Objection being made, the resolution will go over until the next legislative day under the rule.

UNIFORM SYSTEM OF BANKRUPTCY.

Mr. MITCHELL of Oregon submitted the following resolution; which was referred to the Committee on Printing:

Resolved, That 5,000 additional copies each of bill S. 742 and amendment thereto, reported from the Senate Committee on the Judiciary, be printed for the use of the Senate.

NANCY G. ALLABACH—VETO MESSAGE.

Mr. PALMER. I ask the unanimous consent of the Senate to take up for consideration——

Mr. HALE. Mr. President——

Mr. PALMER. A bill——

Mr. HALE. I must call for the regular order. I can not consent to the taking up of any bill.

Mr. PALMER. If the Senator from Maine will allow me to state what I wish to call up, that would seem to be my right.

Mr. HALE. I do not, of course, object to the Senator making a statement.

Mr. PALMER. I ask unanimous consent to call up the bill (S. 894) granting a pension to Nancy G. Allabach, found on page 24 of the Calendar.

Mr. HALE. I must object, if it gives rise to any debate.

Mr. HILL. I suggest that the regular order be proceeded with. That is more important than these bills.

The VICE-PRESIDENT. The Chair will submit to the Senate the request of the Senator from Illinois. If there is no objection——

Mr. HALE. The regular order being called for, it disposes of all things except the appropriation bill.

The VICE-PRESIDENT. There is objection to the present consideration of the bill.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. TELLER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of

Columbia for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 40 and 105.

That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"*Provided*, That the fifth section of the act of Congress approved August 2, 1894, relating to reciprocal trackage arrangements by the Metropolitan and other railroad companies, be, and the same is hereby, amended by adding the following thereto:

"'*Provided*, That any suburban street railroad company in the District of Columbia intersecting or connecting with any urban street railroad may have such reasonable number of its trail cars drawn by such urban railroad company, over the route of such urban railroad, for the transportation of through passengers, as shall not, in the judgment of the supreme court of the District of Columbia, be to the undue detriment of such urban railroad company. The schedule, kind, and number of cars to be drawn, compensation therefor, and all other matters relating thereto, in the event of said railroad companies being unable to agree between themselves, shall, from time to time, on petition of either railroad company, be decided by said supreme court.

"'*Provided further*, That in no event shall any railroad company be entitled, under said law providing for trackage arrangements or under the provisions of this act, to collect fares except from such passengers as board the cars upon their own line.

"'*Provided further*, That this provision shall not be construed to affect rights heretofore acquired either by contract or under any order of court made under authority of law.'"

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That the Commissioners of the District of Columbia be, and they are hereby, required to examine into the proposed extension of Connecticut avenue from Florida avenue to the District line, and report to Congress on or before the first Monday of December next, the comparative advantages and disadvantages and comparative cost of opening said Connecticut avenue on a straight extension of the line thereof as now established in the city of Washington, instead of opening the same on the deflected line heretofore adopted and now on file; and that from and after the passage of this act no building permits shall be granted upon ground which would be covered by either extension of said Connecticut avenue, until otherwise provided by law."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$90,500"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 154, and agree to the same with amendments as follows: In lieu of the matter inserted by said amendment insert the following:

"The Commissioners of the District of Columbia are hereby directed to report to Congress, at its next regular session, what charges are made in the District of Columbia to the public and to the Government for the use of telephones, and the relative charges made for the use of telephones in other cities, operated by underground and by overhead wires."

And on page 31 of the bill, after line 4, insert the following:

"That any balance of the appropriation for the collection and removal of garbage in the District of Columbia remaining unexpended June 30, 1896, shall be available for the service of the fiscal year 1897."

And the Senate agree to the same.

The committee of conference have been unable to agree upon the amendments of the Senate numbered 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, 195, and 201.

H. M. TELLER,
W. B. ALLISON,
Managers on the part of the Senate.
WILLIAM W. GROUT,
MAHLON PITNEY,
ALEX. M. DOCKERY,
Managers on the part of the House.

The VICE-PRESIDENT. The question is on concurring in the report.

The report was concurred in.

Mr. TELLER. I move that the Senate further insist upon its amendments and agree to the further conference asked by the House of Representatives.

The motion was agreed to.

By unanimous consent, the Vice-President was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. TELLER, Mr. ALLISON, and Mr. COCKRELL were appointed.

DEFICIENCY APPROPRIATION BILL.

Mr. HALE. I ask that the deficiency appropriation bill may be proceeded with.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 9404) making appropriations to supply deficiencies in appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes.

Mr. CHANDLER. I ask the Senator from Maine if he can not state the difference between this bill and the bill as it went to the President, and whether there can not be an agreement by which the bill may be passed one or two readings without being read at length? Can the Senator tell us what the difference is between this bill and the one that passed before?

Mr. HALE. Senators about me say that the rule is so imperative that there should be a reading of every bill at length that they can not consent that the reading shall be dispensed with.

Mr. CHANDLER. May I ask the Senator, then, whether, as a matter of fact, the bill is exactly the bill as it went to the President except the Bowman Act claims and the spoliation claims and the Chouteau claims?

Mr. HALE. With the exception of that single amendment, which was put on in the Senate, the bill is precisely as it passed and went to the President.

Mr. CHANDLER. There is no doubt on that point?

Mr. HALE. There is no doubt of it. I ask that the Secretary proceed to read the bill.

Mr. BACON. It is impossible for us on this side of the Chamber to hear anything said on the other side.

Mr. HALE. I simply asked that the Secretary might proceed with the reading of the bill.

Mr. BACON. That is all right.

The Secretary read the bill.

Mr. HARRIS. I offer the amendment which I send to the desk as an additional section to the bill. I will state to the Senate that it embraces what are known as the Bowman Act claims, item by item, as they were incorporated in the deficiency bill; but they were then connected with the French spoliation claims and as an amendment to that amendment. I offer them now as an independent section.

The VICE-PRESIDENT. The amendment submitted by the Senator from Tennessee will be stated.

Mr. HARRIS. I will say that the amendment is somewhat voluminous. It contains appropriations to pay a large number of claims which aggregate something like a half million dollars. They have been considered and reported favorably by the Court of Claims. They have been considered by the Committee on Claims of the Senate and favorably reported. The amendment may be read or not, as the Senate chooses. They are exactly the claims that were presented when the original deficiency bill was under consideration. The amendment is a precise copy of what was then incorporated.

Mr. BURROWS. May I make an inquiry of the Senator from Tennessee?

Mr. HARRIS. Will the Senator from Michigan indulge me for a single moment further?

Mr. BURROWS. Certainly.

Mr. HARRIS. It is upon a matter slightly personal to myself, and those are things to which I have very rarely had occasion to allude.

I see, however, in the Post of this morning the announcement that I am resolved to have a yea-and-nay vote upon the French spoliation claims before they can be rejected or not attached to the bill. I simply desire to say that I have never yet examined the French spoliation claims. I have never had any interest in them pro or con. I have stated to two or three different persons that I would offer this amendment to the bill, as I now do. These claims have undergone the scrutiny of judicial investigation. The claims have been long due. The claims ought to be paid if any debt of the Government is to be paid by an appropriation made in this bill. Now I yield to the Senator from Michigan.

Mr. BURROWS. I wish to inquire of the Senator from Tennessee whether the amendment he now proposes contains the modification I suggested when the matter was before the Senate heretofore?

Mr. HARRIS. I must answer that I have not examined it, but I take it for granted and am sure that it does, for the reason that I asked Mr. Cleaves, the very accomplished and competent clerk of the Committee on Appropriations, to give me the exact amendment that was agreed to in the Senate and concurred in by the other House. I take it for granted the amendment is accurate and just as it was passed in the Senate before.

Mr. HALE. I make no question that the amendment is the same amendment that has already been twice before the Senate. It contains a long list of the Bowman Act claims as found in the last part of the bill as it originally passed the Senate and went to the House, and I wish to make the same point of order that was made on April 25 by the Senator from Iowa [Mr. ALLISON]. When the amendment was offered by the Senator from Tennessee [Mr. BATE], in the absence of his colleague, he said:

On behalf of my colleague [Mr. HARRIS], who is unable to be in the Chamber to-day, I offer an amendment.

Then the amendment was read. The Senator from Iowa [Mr. ALLISON] made a point of order, in which he said:

This is a very long amendment. I make the point of order against the amendment that it is not in order on the pending bill. It is not for service in the fiscal year ending in 1897. It is a collection of claims, which are not in order upon an appropriation bill. I hope the Senator from Tennessee will not press the amendment, as it is clearly out of order. I have the amendment before me, and I have also before me the reports relating to the claims. They have always been considered in this body in separate bills; they have never appeared on any of the regular appropriation bills. They are not audited accounts—

That is the point of order—

they are not estimated for—

That is another point—

they are not judgments, and in no sense can they be considered as applicable to a bill of this character.

Mr. HAWLEY. What claims are they?

Mr. ALLISON. They are the individual claims referred to the Court of Claims under the Bowman Act.

I make the point of order.

Mr. HARRIS. I beg to suggest to the Senator, in respect to the point that they are not estimated for, that they are sent here by the Secretary of the Treasury.

Mr. HALE. They are not sent as regular estimates, as the Treasury Department always does when it recommends the adoption of an item upon an appropriation bill. They are not audited accounts nor estimated for by the Secretary. Under the limitation of the act the court has simply found certain amounts, but they do not come, of course, with the force with which ordinary judgments of the Court of Claims do, which we pay unless the Government or the other party appeals. It is the same point of order that was made at that time.

Mr. HARRIS. They are the findings of the Court of Claims, with all the sanctity that a judgment of the Court of Claims can give them; but they are not technical judgments, I grant. They are claims. But they have stood the scrutiny of judicial investigation, with a right to examine and cross-examine witnesses and develop every fact pertinent to each and every claim. They have been long due. They are now long overdue. They ought to be paid. I do not care to enter into a discussion of the question.

Mr. HALE. The matter was discussed when the point of order was made before, and the decision was made at that time after discussion. The claims, not being audited and not being estimated for, stand as all private claims do.

Mr. CULLOM. They are not judgments.

Mr. HALE. They are not judgments; they are not audited; they are not estimated for. They are private claims, which clause 4 of Rule XVI declares specifically shall not be in order on an appropriation bill. No matter whether they have been reported by a committee or have passed the body, they are still claims as the decision left them when the point of order was made before, and I renew the same point of order.

Mr. BATE. Mr. President, in the absence of my colleague [Mr. HARRIS] who was sick at the time and unable to be in the Chamber, I called up this amendment which he had before offered to the sundry civil bill; and it was acted upon under that motion, as has been said by the Senator from Maine [Mr. HALE]. But it was suggested—I do not know that it appears in the RECORD—that the deficiency bill would be a more appropriate place for it than the sundry civil bill, and especially so as these are cases that, if they have not, technically, received judicial determination, have certainly undergone investigation, and quite a thorough one. The bad has been sifted from the good. They are brought in here, not as a mere claim, but as a debt of the Government, which has been passed upon by the court created for that purpose. They are just and unpaid debts, and therefore their relation to the deficiency bill is a little different from what it would be to the sundry civil bill. They are claims, some of which have been here for twenty years or more. These claimants have been knocking at the doors of the House and Senate for time out of mind to do them justice and to have the claims paid. The claims have been adjusted now by a court set apart for the purpose, and they come in here at last not only as claims but as semijudicial claims; that is, they have been before the Court of Claims and passed that crucial test. They are just. They are a long time due. They stand upon a higher plane than the ordinary claims to which the Senator from Maine alludes, for the reason that they have gone through the mill and the bad has been sifted from the good. All that is objectionable in the claims has been thrown out. The amounts of many of them have been cut down. I understand some of them were twice as large as they are now, and it has been truly said that they are just and proper, that the claimants were loyal, and they are referred to Congress through the Treasury Department, and payment is asked. That is the situation of the matter, and I think the relationship that the amendment bears to the bill under consideration, the deficiency appropriation bill, is quite different to that which it bore to the sundry civil bill.

Mr. CULLOM. Not at all.

Mr. HALE. The main point does not touch whether or not it is a deficiency. That was referred to, but was not in any way insisted upon. The main point applies to one appropriation bill as much as to another. It is not claimed, the Senator from Tennessee himself does not claim, that they have the force of judgments. They undoubtedly do not. They are not technically judgments.

Mr. CULLOM. They are not audited.

Mr. HALE. They are not audited. They are not estimated for. This amendment does not even have the force of having been reported from a committee as an amendment to the pending bill, although I do not think that point needs to be invoked. Fundamentally the questions that were considered before as to these amendments going upon an appropriation bill are exactly the same now as they were then, it makes no difference what the appropriation bill is.

Mr. VEST. Mr. President, in a decision recently made by the Supreme Court of the United States in what is known as the sugar-bounty cases that tribunal declared unanimously that where an equitable claim exists against the Government of the United States it is of the highest validity, and that Congress unquestionably under the Constitution has the right to appropriate money for its payment when it rested in equity alone without any law.

But the real question in this case—and I call attention to it, not because I have any respect for the rule as it has been observed, but simply to point a moral—is whether, under the rules of the Senate, these claims were ever in order. We decided here solemnly that they were.

Mr. ALLISON. I will state to the Senator that no point of order was made against the Bowman claims amendment when it was offered to the deficiency appropriation bill.

Mr. BATE. The point was made when it was proposed as an amendment to the sundry civil bill.

Mr. ALLISON. I understand that it was then ruled out; but when these claims were put upon the deficiency bill no point of order was made against them.

Mr. HARRIS. I am greatly mistaken unless the point of order was made upon the French spoliation claims; and it was decided by the Senate that they were in order.

Mr. ALLISON. Undoubtedly.

Mr. HARRIS. And on this amendment, when offered, no question of order was raised.

Mr. ALLISON. That is what I mean.

Mr. HARRIS. But it was an amendment to the French spoliation claims amendment; and if the one was in order I should be glad to find the mind with sufficient ingenuity to show why the other was not.

Mr. ALLISON. The Senator does not seem to get clearly the point I make, which is, that when this amendment was offered to the sundry civil bill it was decided by the Chair to be out of order; and when it was offered as an amendment to the French spoliation claims amendment no point of order was made against it.

Mr. VEST. The point of order was made upon the French spoliation claims, and they were contained in the same amendment, and that point of order was just as pertinent to the Bowman claims as to the French spoliation claims.

Mr. ALLISON. That may be.

Mr. VEST. It is useless to fence about this matter. We know the Senate always does what it wants to do, and if the rule is in the way the Senate wipes it out. We put the French spoliation claims on the deficiency bill in spite of the rule, and the Bowman claims and Chouteau claim besides, when the rule itself provides that no claim, unless it is created by law, shall be put upon an appropriation bill.

Mr. CULLOM. If I understand the Senator, then, he regards the proposed amendment as not in order.

Mr. VEST. I never express my opinion about points of order.

Mr. CULLOM. Oh!

Mr. VEST. With me that is a nebulous and uncertain subject, and I leave such things to the action of the Senate.

What I am saying is that whenever the Senate wants to ignore a rule it does it, and whenever it does not want to do anything, then it becomes very technical and parliamentary and insists upon the rule. Every Senator here knows that is true, whether he chooses to put it in the RECORD or not.

The facts about these claims are that they are of the highest equitable character. If there is any claim upon this Government that ought to be paid in order to preserve the national honor, these Bowman Act claims constitute that character of obligation. It is true, as the Senator from Maine in charge of this bill says, that technically they are not judgments, and yet in every attribute of a judgment they constitute a judgment of the highest validity. They were passed upon by a tribunal, a court of record, established for the very purpose of adjudicating the validity of claims of this kind, and that court has declared that the Government of the United States owes them, and that they are of such a character that no equity could be created higher than that which exists in their favor.

I know personally claimants who have spent more money now than the amount of their claims in lawyers' fees, interest upon the money, and hotel bills, and who, if they were paid to-day, would be losers in this transaction. They have come here year after year in order to have these honest claims paid by the Government, and finally, after they have been sent to the Court of Claims, in order that Congress might get rid of them, when they have succeeded in getting an adjudication in their favor, they are now told that they can not be paid because they are not judgments. They are judgments in everything except the right to issue execution. That is all the difference. They have been adjudicated upon evidence before judges of a court of record, and while a writ of levy can not be issued, they are still judgments in every other attribute of an equitable character.

Mr. GEORGE. No execution can ever be issued against the United States on any kind of judgment.

Mr. VEST. Of course not.

Mr. CULLOM. I suppose these classes of claims are private

claims, and my recollection is that it has been customary to pass an independent bill appropriating for these several claims, which are called the Bowman Act claims, entirely apart from the ordinary appropriation bills.

Mr. VEST. We put such things in every appropriation bill. We have put in appropriation bills the same class of claims against the Government.

Mr. CULLOM. What I am saying is that ordinarily, as I recollect, the Bowman claims have been provided for in separate bills.

Mr. ALLISON. And never in appropriation bills.

Mr. CULLOM. And never in an appropriation bill.

Mr. HARRIS. I wish to suggest to the Senator from Illinois that for the last six years the custom has been to avoid passing a separate bill at all.

Mr. CULLOM. That may be.

Mr. HARRIS. They have been provided for by separate bills in some instances.

Mr. CULLOM. Whenever we have passed such a bill it has been separate from an appropriation bill.

Mr. BATE. Every claim which has been passsed under the Bowman Act, as I recollect, has always been before the Court of Claims, and such claims stand upon a higher plane than others.

Mr. CULLOM. That does not change the rule about the amendment being in order at all.

Mr. ALLISON. The rule uniformly has been to keep from the general appropriation bills, the deficiency bill as well as all others, any of the claims under the Bowman Act. They have never been considered upon the regular appropriation bills. Once or twice bills similar in character to the amendment offered by the Senator from Tennessee have been passed here in bulk as separate and distinct bills, but never have they emanated from the Appropriations Committee, nor have they ever been put upon a general appropriation bill.

Mr. MILLS. I want to ask if this amendment has been reported favorably from the Committee on Claims or any committee of the body?

Mr. HARRIS. It was reported by the Committee on Claims of the Senate favorably and referred to the Committee on Appropriations.

Mr. VEST. These claims are known as war claims. I do not pretend to say that these particular Bowman claims, or any of them, have been put on appropriation bills; but I do say—and I will undertake to prove by the CONGRESSIONAL RECORD—that we have put claims against the Government—not war claims, but claims arising upon other grounds—in appropriation bills, and the Senate has declared them to be in order, and passed them.

I have so little respect for this point of order or any other that I do not propose to discuss it.

Mr. HALE. In response to the inquiry of the Senator from Texas [Mr. MILLS], I will state that to this bill no amendment has been offered and referred to the Committee on Appropriations. This is a new bill.

Mr. VEST. It is the same amendment as was offered to the other deficiency bill.

Mr. MILLS. Will the Senator from Maine be kind enough to repeat his statement?

Mr. HALE. No amendment has been moved by a committee and referred to the Committee on Appropriations as an amendment to this bill; for this is a new bill.

Mr. HARRIS. Mr. President, I regret that the Senator should have resorted to a point so very severely technical as the one he now makes. I hardly thought the Senator from Maine would have resorted to a line of suggestion such as that.

There was a deficiency appropriation bill pending here; there was an amendment regularly offered in the Senate and referred to the Committee on Claims, regularly reported back, regularly referred to the Committee on Appropriations, and considered or not by that committee, I can not answer as to that. But we all know how this bill happens to be here by telegraphic rapidity in point of time, and even now no Senator here has a copy of the bill on his desk.

Mr. MORGAN. And it has not been read, either.

Mr. HARRIS. The bill came here this morning, and we have but a single copy of it, and that the desk copy; which is visible to the naked eye; and the Senator from Maine suggests that to this particular piece of paper no amendment has been offered.

Mr. HALE. Will the Senator allow me?

Mr. HARRIS. If the Senator can place himself upon a point so extremely refined and technical as that, he may enjoy all the comforts that are derivable from it. I do not envy him.

Mr. HALE. I want the Senator to keep good-natured. I did not make this point of order. The other points are so strong that I did not make this point, and did not propose to make it, and have not made it; but when the Senator from Texas [Mr. MILLS] raised the question pointedly in terms, and asked whether any committee had reported this proposition as an amendment to this bill, there was but one answer that could be given. I did not suggest it, the Senator from Tennessee will bear in mind, and do not consider now that it is at all needed. The objections are more fundamental and larger than that. I care nothing at all about the point of order made by the Senator from Texas and not by me.

The VICE-PRESIDENT. The Chair submits the question to the Senate. Is the pending amendment in order? [Putting the question.] The noes have it; the point of order is sustained, and the amendment is not in order.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EMPLOYMENT OF ALIENS IN EXECUTIVE DEPARTMENTS.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, with the accompanying paper, was ordered to lie on the table and be printed:

To the Senate:

I transmit herewith a report of the Secretary of State in answer to the resolution of the Senate of May 9, 1896, directing that "the Secretary of State, the Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, the Secretary of Agriculture, the Postmaster-General, and the Attorney-General cause a careful and thorough inquiry to be made regarding the number of aliens employed in their respective Departments, and to communicate the result of said inquiry to the Senate at the earliest practicable day.

GROVER CLEVELAND.

EXECUTIVE MANSION, *June 8, 1896.*

RICHMOND LOCOMOTIVE AND MACHINE WORKS.

Mr. HALE. I am directed by the Committee on Naval Affairs, to whom the subject was referred, to report the bill which I send to the desk.

The bill (S. 3269) to pay the Richmond Locomotive and Machine Works its claim for damages and losses incurred in the construction of the armored battle ship *Texas* was read twice by its title.

Mr. DANIEL. Mr. President, I beg leave to state as to the bill which has just been reported by the Senator from Maine [Mr. HALE] that it embodies an amendment which was passed by the Senate to the deficiency appropriation bill, and has been passed on in the most scrutinizing way by both the Committee on Naval Affairs and the Committee on Appropriations, and was so clear and just that the conferees representing the Committee on Appropriations and the Senate insisted on it as conferees of the Senate.

I ask unanimous consent, since it has now been reported in the form of a bill by the Committee on Naval Affairs, that it may be taken up and passed to-day.

Mr. CULLOM. I hope that request will be granted.

Mr. HALE. The committee has considered the case very carefully, and I hope the request will be granted.

The PRESIDING OFFICER (Mr. FAULKNER in the chair). Is there objection to the present consideration of the bill which has just been reported by the Senator from Maine?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to the Richmond Locomotive and Machine Works the sum of $69,550.39, in full of its claim for damages and losses incurred in the construction of the armored battle ship *Texas*.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HOUSE BILL REFERRED.

The bill (H. R. 7907) for the protection of the people of the Indian Territory, extending the jurisdiction of the United States courts, providing for the laying out of towns, the leasing of coal and other mineral, timber, farming, and grazing lands, and for other purposes, was read twice by its title, and referred to the Committee on the Judiciary.

PAYMENT OF EMPLOYEES.

The PRESIDING OFFICER laid before the Senate the joint resolution (H. Res. 195) to pay the officers and employees of the Senate and House of Representatives on the day following adjournment; which was read twice by its title.

Mr. HILL. I ask unanimous consent that that resolution may be now considered.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed,

AVERY D. BABCOCK AND WIFE.

Mr. MITCHELL of Oregon. I ask unanimous consent for the present consideration of the bill (S. 524) for the relief of Avery D. Babcock and wife, of Oregon.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to Avery D. Babcock, of Polk County, Oreg., and to Margaret I. Babcock, his wife, the sum of $2,000, to be equally divided between them, in full payment of their claim against the Government of the United States for the use and occupation by the United States

of their donation claim, No. 58, in section 8, in township 6 south, range 7 west of the Willamette meridian, in the State of Oregon.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDING AT OAKLAND, CAL.

Mr. PERKINS. I ask unanimous consent for the present consideration of the bill (S. 286) to provide for the purchase of a site for and the erection of a public building at Oakland, in the State of California.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to appropriate $350,000 for the purchase of a site and the erection of a building thereon, for the use and accommodation of the United States post-office and other Government offices, in the city of Oakland and State of California.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, and read the third time.

Mr. LINDSAY. I rise to inquire whether or not there is a Federal court held at Oakland?

Mr. PERKINS. There is not.

Mr. LINDSAY. I ask whether it is a port of entry?

Mr. PERKINS. It is a port of entry.

Mr. LINDSAY. What population has it?

Mr. PERKINS. About 70,000. It is the third largest city in the State of California.

Mr. LINDSAY. On Saturday last we had under consideration a conference report in which the policy of making appropriations for the erection of public buildings at the seats of government in four or five of the States was contested by the House of Representatives. My recollection is that not over $250,000 was proposed to be appropriated for any one of those public buildings. Now, it occurs to me that $350,000 is greatly more than ought to be appropriated for a public building at Oakland, and that any such sum as that would be an extravagant appropriation.

Mr. PERKINS. I will furnish to my friend a report in regard to this case, and, after reading the report of the committee, if he thinks the amount named in the bill should be reduced, I will see to it that the committee in the House of Representatives, which will have the subject-matter presented to it for their consideration, shall properly adjust the matter. I will take pleasure in sending my friend from Kentucky a copy of the report, and I am sure he will become so interested in reading it that he will be convinced I have not placed the figure for the public building at Oakland sufficiently high.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The bill was passed.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. ALLISON. I ask to take from the Secretary's desk the sundry civil appropriation bill, in order that I may ask the Senate to concur in the amendment of the House of Representatives to amendment numbered 97 of the Senate.

The PRESIDING OFFICER. The Secretary will read the action of the House of Representatives on the amendment of the Senate.

The Secretary read the amendment of the House of Representatives, which was to agree to the amendment of the Senate numbered 97 with an amendment, striking out the word "and," in line 11 of the amendment, and inserting "to be created by the State to which such lands are granted, and by no other authority whatever, and when created."

Mr. ALLISON. I move that the Senate concur in the amendment of the House of Representatives to the amendment of the Senate.

The motion was agreed to.

Mr. ALLISON. That is all I desire. The conference report has already been agreed to as to the remainder of the bill.

LIEUT. ROBERT PLATT.

Mr. DUBOIS. I ask unanimous consent for the consideration of the bill (S. 3150) authorizing the President to appoint Lieut. Robert Platt, United States Navy, to the rank of commander.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

TAXATION OF ALLOTTED INDIAN LANDS.

Mr. PETTIGREW. I ask unanimous consent for the consideration of the bill (S. 265) extending relief to Indian citizens, and for other purposes. The bill has been read.

Mr. JONES of Arkansas. I should like to have the bill read for the information of the Senate.

The Secretary proceeded to read the bill.

Mr. JONES of Arkansas. I withdraw the request for the reading of the bill.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill, which had been reported from the Committee on Indian Affairs with an amendment, to add at the end of the bill the following as an additional section:

SEC. 3. That all agreements hereafter made for the purchase of the unallotted lands in any Indian reservation shall provide a fund for the payment of taxes upon inalienable allotments in the manner provided by this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JAMES P. VEACH.

Mr. TURPIE. I ask unanimous consent for the present consideration of the joint resolution (S. R. 138) for the relief of James P. Veach.

There being no objection, the joint resolution was considered as in Committee of the Whole. It directs the Secretary of War to cause record to be made in the military history of James P. Veach, a private of Company I, of the One hundred and nineteenth (Seventh Cavalry) Regiment of Indiana Volunteers, in the service of the United States, that having received from the President of the United States a full and unconditional pardon of all military offenses for which he was tried and convicted by court-martial, he is thereby absolved from the offenses and from all the penalties of such offense and sentence, and is therefore entitled to an honorable discharge, to be issued as of the date October 8, 1865.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FRAUDULENT BOTTLING OF LIQUORS.

Mr. VEST. I ask the Senate to consider the bill (H. R. 4580) to amend section 3449 of the Revised Statutes.

The PRESIDING OFFICER. The bill will be read for information.

The Secretary read the bill, as follows:

Be it enacted, etc., That section 3449 of the Revised Statutes be amended so as to read as follows:

"SEC. 3449. Whenever any person sells or keeps on hand for sale, ships, transports, or removes any spirituous or fermented liquors or wines, whether foreign or domestic, in bottles, casks, or other packages, under any other than the proper name or brand known to the trade as designating the kind and quality of the contents of the bottles, casks, or other packages containing the same, or causes such act to be done, he shall forfeit said liquors or wines and bottles, casks, or other packages, and be subject to pay a fine of $500, and to be imprisoned six months for the first offense; and to pay a fine of $1,000 and be imprisoned one year for the second offense."

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. CHANDLER. Is it proposed to put in the words "knowingly and willfully"?

Mr. VEST. That is an amendment of the Committee on Finance.

Mr. PETTIGREW. I object to the consideration of the bill.

The PRESIDING OFFICER. The Senator from South Dakota objects to the consideration of the bill.

Mr. VEST. Then I shall object to the consideration of any other bill. This bill is unanimously reported by the Committee on Finance. It has passed the House unanimously and is insisted upon by the Revenue Department. If the Senate can not stop long enough to attend to a bill of general importance I shall object to any private bills going through at this session.

Mr. PETTIGREW. I wish to submit a conference report on the Indian appropriation bill.

Mr. VEST. I move that the Senate proceed to the consideration of the bill, notwithstanding the objection of the Senator from South Dakota.

The motion was agreed to.

INDIAN APPROPRIATION BILL.

Mr. PETTIGREW submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate numbered 64, 69, and 70 to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 64, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That the Secretary of the Interior be, and he is hereby, directed to withhold any further distribution and payment out of the money derived from 35 per cent of the judgment in favor of the Old Settler or Western Cherokee Indians against the United States, in the sum of $800,386.31 set apart for the

payment of expenses and for legal services justly and equitably payable on account of the prosecution of said claim, until otherwise authorized by law."

And the Senate agree to the same.

On the amendments of the Senate numbered 69 and 70 the committee of conference have been unable to agree.

R. F. PETTIGREW,
H. M. TELLER,
F. M. COCKRELL,
Managers on the part of the Senate.

J. S. SHERMAN,
CHARLES CURTIS,
GEORGE C. PENDLETON,
Managers on the part of the House.

Mr. CHANDLER. I feel obliged to call upon the Senator from South Dakota in charge of the bill to make an explanation as to what the effect of the conference report is.

Mr. PETTIGREW. The conferees report a disagreement on the amendment in regard to sectarian schools, and agree with an amendment to the Old Settler attorneys' fees; that is, that the Senate recede from its amendment with regard to the Old Settler attorneys' fees and that they remain for future distribution on the part of Congress.

Mr. BATE. We can not hear the Senator on this side.

Mr. CHANDLER. Then the only thing left is the question as to sectarian schools.

Mr. PETTIGREW. There is nothing left for further conference except the question as to sectarian schools.

Mr. BACON. We have had to take on faith what is going on. We could not hear a word the Senator from South Dakota said.

Mr. PETTIGREW. The Senate conferees agree to recede from the amendment in regard to the Old Settler attorneys' fees and leave that matter to be disposed of in the future. The conferees could not agree with regard to the Indian schools amendment, and report a further disagreement on that subject.

The PRESIDING OFFICER. The question is on concurring in the report of the committee of conference.

The report was concurred in.

Mr. PETTIGREW. I move that the Senate further insist upon its amendments still in disagreement and ask for a further conference.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL were appointed.

FRAUDULENT BOTTLING OF LIQUORS.

The PRESIDING OFFICER. The bill (H. R. 4580) to amend section 3449 of the Revised Statutes, called up by the Senator from Missouri, is before the Senate as in Committee of the Whole.

Mr. PETTIGREW. I should like to have the bill read in full.

The PRESIDING OFFICER. It has been read in full.

Mr. PETTIGREW. I should like to have it read again.

Mr. CHANDLER. Let the committee amendment be acted upon first.

The PRESIDING OFFICER. The bill will be read.

The Secretary again read the bill.

The bill was reported from the Committee on Finance with an amendment, in line 5, after the word "person," to insert "who, knowingly and willfully."

Mr. VEST. The committee amendment should be modified by striking out the word "who." That is a clerical error. It should read "whenever any person, knowingly and willfully."

The PRESIDING OFFICER. The amendment will be so modified.

The amendment as modified was agreed to.

Mr. HILL. Have the committee taken into consideration the question of the propriety of having the punishment of imprisonment inflicted for the first offense?

Mr. VEST. That question was fully considered in the committee. This bill, I will say to the Senator, was drawn in the Internal Revenue Department and submitted to the House committee. They made a report upon it, which I have here. The question of the degree of punishment was fully considered. This was deemed necessary in order to prevent these frauds upon the revenue.

Mr. HILL. It strikes me that it is rather harsh in a bill of this character that it is capable of being construed so that there shall be punishment for the first offense by imprisonment.

Mr. BATE. Does it say "shall," or is it discretionary with the court?

Mr. HILL. It is only by a strained construction of the bill that it affects the collection of revenue. It is more of a bill to regulate the shipment of these articles than for the protection of revenue, it strikes me. Therefore I do not quite see the propriety of imposing for the first offense both a fine of $500 and imprisonment for six months, not leaving it to the discretion of the court. I move to amend by striking out, in line 14, the word "and" and inserting "or"; so as to read—

or to be imprisoned six months for the first offense.

Mr. VEST. All I can say in regard to this matter is that it was fully considered by the committees of both Houses and that the internal-revenue officers stated that this abuse upon the revenue had come to such a pass that dealers were willing to pay the fine of $500 in order to carry on this fraudulent and really illicit business. It was thought by the Internal Revenue Department that nothing would stop it except the imposition of imprisonment as a penalty. The first offense is a fine of $500 and imprisonment for six months. For the second offense, when conviction ensues, the punishment is to be a fine of $1,000 and one year's imprisonment.

The observation of the Senator from New York that this is really an act in regard to the removal of liquors is, I think, a mistake. If he will read the testimony that was brought before the committees of the two Houses he will find that this sort of fraudulent business has grown to very large proportions, and it is an absolute fraud upon the revenue. For instance, liquor is put into bottles and fraudulently branded, and pays a tax one-fifth or one-tenth and sometimes one-twentieth of what it ought really to pay to the tax collector. If we have not jurisdiction under the Constitution in regard to a case of this sort we have not got it at all. It is not an indirect exercise of jurisdiction, but it is a case where the internal-revenue officers testify and the head of the Internal Revenue Bureau reports that it is absolutely impossible to collect the revenue unless this fraud is stopped; that the dealers constantly escape the payment of the taxes which are imposed by an act of Congress by putting into their bottles and packages a different liquor from what is purported upon the outside to be there. If it were not for detaining the Senate I would ask to have read the report, with the communication from the Internal Revenue Department, for it substantiates fully what I have stated.

The PRESIDING OFFICER. Is there objection to the amendment of the Senator from New York? The Chair hears none.

Mr. PETTIGREW. I should like to hear the report read.

Mr. MILLS. The Presiding Officer has declared the amendment agreed to.

Mr. VEST. I object to that amendment, of course.

The PRESIDING OFFICER. The Senator from South Dakota demands the reading of the report.

The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (H. R. 7864) to amend the immigration laws of the United States.

The PRESIDING OFFICER. The Senator from New York——

Mr. VEST. I ask the Chair to correct the statement that the amendment submitted by the Senator from New York was agreed to. I opposed that amendment.

The PRESIDING OFFICER. The Chair asked whether there was any objection to the amendment, and hearing none, stated that it was agreed to.

Mr. VEST. I rose and spoke some five minutes in opposition to it, and supposed that was sufficient to indicate that I objected to it.

The PRESIDING OFFICER. If there be no objection, the record will be amended so as to show the amendment of the Senator from New York to be pending.

ENROLLED BILLS SIGNED.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled bills and joint resolution; and they were thereupon signed by the Vice-President:

A bill (H. R. 5280) for the relief of George W. Freeman;

A bill (H. R. 6259) to expedite the delivery of imported parcels and packages not exceeding $500 in value;

A bill (H. R. 9404) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes; and

A joint resolution (S. R. 155) to authorize a scientific investigation of the fur-seal fisheries.

PROPOSED RESTRICTION OF IMMIGRATION.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7864) to amend the immigration laws of the United States.

Mr. HILL. Mr. President, the other day the immigration bill was made the unfinished business. While it was pending, by the consent of the Senator from Massachusetts [Mr. LODGE], the contempt bill was taken up and for that day it was substituted as the unfinished business, and then it was not reached by reason of yielding to other bills. The Senator from Massachusetts has gone away, I believe, and I understand that it is not the intention to press this bill. I will ask the Senator from New Hampshire if that is the case?

Mr. CHANDLER. Not exactly that. I am in charge of the bill to-day, and the Senator from Alabama [Mr. MORGAN] wishes to address the Senate in connection with an amendment which he

will move. After that I will yield to the bill in reference to contempts which the Senator from New York desires to call up.

Mr. HILL. That is satisfactory.

Mr. CHANDLER. I shall not ask for any action upon the bill to-day.

Mr. MORGAN. I send to the desk the amendment that I propose to offer to the bill. I offer it now.

The PRESIDING OFFICER. The amendment will be read.

The SECRETARY. Add to the bill the following proviso:

Provided, That this act shall not apply to persons arriving in the United States from any port or place in the Island of Cuba.

Mr. MORGAN. That amendment does not indicate at all that I am in favor of the bill or the principle upon which it is based.

Mr. PLATT. Will the Senator from Alabama yield to me a moment?

Mr. MORGAN. Certainly.

Mr. PLATT. I wish the attention of the Senator from New York. The Senator from New York spoke about the contempt bill having been substituted in some way for this bill, as if it was before the Senate, and some suggestion in regard to the order of business was made by the Senator from New Hampshire. I do not wish to be considered as assenting to the taking up of the contempt bill at any time.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Alabama.

Mr. MORGAN. Mr. President, the inquiry or the question which is raised by the amendment which I offer relates to the condition of the people of Cuba and the implied obligation, to say the least of it, that we are under to extend a peculiar hospitality to those people.

Under the treaty of 1795 we placed ourselves upon terms of very close intimacy with Cuba through the negotiation that we then conducted with Spain, making various exceptions in favor of our commerce even during times of war. We also made exceptions in favor of the right of search upon American ships in time of war even between Spain and the United States. So that that treaty may be considered as a very liberal one between both Governments, extending to each Government favors and advantages that are not found in the ordinary run of the treaties of a commercial sort with any of the great powers.

In 1877 the Government of the United States negotiated and ratified with Spain a treaty in regard to extradition. I will not stop now to quote the language of that treaty, but will state generally that extradition is not permissible as between Spain and the United States, in respect of any offenses that are political in their character or any offenses that are connected with political offenses. That extradition treaty came at the close of the ten years war in Cuba, and it was intended to protect them, and thereafter all of those persons who were escaping from Cuba and coming to the United States to seek shelter against Spanish persecution. So we threw wide open the door of invitation to the Cubans to come to our coast, and they have come here in great numbers. I am glad to say that the people who have arrived in the United States from Cuba are, as a rule, an excellent class of people. They are all devoted to legitimate industry, and some of them stand very high in scientific information, and have conferred really great honor upon their native land and also upon the United States, of which they have become citizens.

It is very rare that anyone comes over here from Cuba, driven out by Spanish persecution of a political sort, who does not become a citizen of the United States, and I think that the records of our police courts and of the country at large can be safely appealed to to show that we have not received from any country a better, more orderly, or more patriotic set of men and women than we have received from Cuba.

At the present moment, as heretofore, and as the case will stand hereafter, unless there is a very great change in the relation between Spain and Cuba, is it not perfectly obvious that we can not now afford to close this gate to the admission of the people from that island and exclude all persons over 14 years of age who may not be able to read the Constitution of the United States either in the Spanish or in the English language? The reason of their coming here is so obvious, and we understand it so well, that we can not afford to apply the ordinary rules of exclusion to those people without doing injustice to all of those sympathies which influence American hearts in respect of the rights of people, who are seeking to be relieved from persecution and from the tyranny of monarchical institutions, and who are seeking to establish for themselves at home free government, republican in form. When they find that they can not obtain that boon at home they naturally come to the United States. That one fact will be an inducement, I think, quite sufficient to draw a great number of them here. But when to that fact is added the other great and monstrous fact of the persecutions that have taken place during many years in the Island of Cuba, there can be no reason why we should exclude them from coming to our coasts and becoming naturalized under our laws. A great many of the young Cubans come to the United States now in preference to going to Europe for the purpose of obtaining an education. Our colleges and schools have been largely patronized by them, and I suppose from this time forward that influx will greatly increase, unless their native land should become a home to those people in which they can afford to live.

In order to bring before the country and the Senate a proper knowledge of the reasons that have influenced these people in their migration to the United States, as to which there has been some complaint made by some of our wise statesmen, I desire to review the facts, at least to some extent, that have occurred in regard to this migration from Cuba to the United States, and to bring to the attention of the American people the justification that exists for their coming here and seeking shelter under our extradition laws and under our flag and under the ægis of this great and splendid Republic.

There has been a good deal said in American oratory, in almost every place where that high trait has been exercised at all, upon the subject of this being the hospitable home of all the refugees who flee from tyranny and oppression in all the countries of the world. That is a very great fact. It is a beautiful reality. It is something of which we have a right to boast; and it is one of the fruits of our republican institutions than which none are better for the advancement of civilization and for the liberty which belongs naturally and justly to every human being in the world.

The complications between the Government of the United States and Spain resulting from the nearness of Cuba to our shores and from the hospitable invitation which we have given to their people to come here have saddled upon us very heavy troubles in times that are past, and are continuing now to do so. The result of the ten years war which occurred between 1868 and 1878 was as to our people, not including the *Virginius* case, the *Mora* case, and others that were subjects of special agreements, as follows: A Spanish commission, as it was called, was organized for the purpose of considering the claims mutually between the people of the United States and the people of Spain. That commission had very protracted sessions and went over the whole field of claims that had been presented to either Government against the other. There were presented on the part of citizens of the United States 131 claims, amounting to $26,702,810.28 in the aggregate as they were presented. As I remarked, there were other exceptional cases like that of the *Virginius* which were not included in this list. Of these claims 16 were allowed out of 131, and the amount of the award was $958,928.75. The largest claim allowed was $748,180 and the smallest one was $175. The amount of the claims that were rejected is not stated. But that is a case where the large claims were followed up by the proper proof and the smaller claimants were excluded because they did not have the money or the time or the opportunity to present the evidence upon which their claims were based. And so it results in nearly all of the cases of claims that follow civil war.

It looks as if our people were extravagant in their demands upon Spain for reimbursement when they charged in 131 claims $26,702,810.28 as the aggregate of their losses; but I think any reasoning man is bound to know in his own judgment and in his own conscience that even that sum of money is below the reality as to the losses and damages sustained by the people of the United States in the ten-years war.

Judging from our success at the close of that war as to what will probably be our success at the close of the present war in the demands we are making upon Spain for the losses sustained in Cuba, we find there is little inducement of a monetary character for us to abstain from doing our duty toward ourselves and toward Cuba in the expectation that at the close of the present war indemnity will be granted to our people in any degree at all adequate to the losses which they are sustaining in Cuba.

There seems to be a very false impression as to the liability of the Spanish Government to the people of the United States in respect of these claims that are now accumulating as is supposed in consequence of the interruption of peace in that island. There seems to be an impression that Spain stands sponsor for all the damages done in this war to American property and American citizens who may be resident in Cuba or who may happen to be there at any time. That is a great mistake, and the influence of that error ought to be dissipated now, because it is enthralling the spirit of our people, and, I think, preventing many of them from insisting upon the rights of the people of the United States, and the rights of the people of Cuba, not connected with financial affairs, which seem to be put in the background when they are contrasted with the rights of those who have claims there or property there.

It is known that in some portions of the United States the owners of railroads in Cuba reside, and they are very much concerned about what may become of their property in the event of the success of Cuban arms as against the Spanish Government. The owners of sugar plantations are also found in some portions of our country, and they are making a good deal of outcry against our

expression of any sympathy for Cuba or doing anything for the purpose of assisting those people or for the purpose of protecting even the lives of our own people when those lives come in competition with possible losses which they may sustain in their sugar estates.

It ought to be remembered, upon the experience of our own Government with our own people under similar circumstances, that for the injuries which are inflicted by the march of armies and by necessary military operations, of whatever character they may be, whether the soldiery may come and tear a man's house down around his family and build the timbers into fortifications and breastworks to defend against the enemy, or whether it may be the burning up of fences or the destruction of crops of corn or cotton, or the destruction of property of any kind, robberies by soldiers and all that, the Government of the United States has never thought that it was its duty to recompense even the loyal men of this country. It is one of the circumstances which attend war, and is inseparable from it, and it compels every person, whether a citizen of a country or an alien, where war is existing in the land, to submit to whatever extremities it may impose upon him in the loss of property or even of life, and that without any hope of compensation from the successful government. It is a sacrifice which a man must make to the condition of affairs in the country where he happens to be resident, and it is only in those cases where the successful government has made some appropriation of property which has been immediately useful in the conduct of war, such as corn or wheat or provisions or the like of that, that any government has felt itself obligated to pay for such losses.

I know also that it is said that there are numbers of gentlemen in this country with great influence and power who have private understandings with the Spanish minister that in the event of the success of the Spanish arms in crushing out the Cuban rebellion they will receive favoritism in the acknowledgment and payment of their claims. If those statements be true—I do not vouch for them; I have them from common report—those gentlemen will find in the end that they are reckoning without their hosts, and that their contracts made with Mr. De Lôme, if they are contracts, or their understandings had with him, if there are understandings, will prove to be entirely disappointing and futile. We find here that we got out of the last ten years war in Cuba for the $26,000,000 of claims, which we are to suppose were honestly made, $958,928.75. How much will we get after this war is over? Spain itself would be a heavy loser if it had to compensate every American citizen for all the losses that have been sustained there in the course of this war; and whatever they may say about this, whatever they may suppose about it, in the outcome there will be great disappointment in realizing these expectations of reimbursement in damages for the losses that our people are sustaining in Cuba now.

The war in Cuba is a great affliction to our people, and it is one that is entirely remediless so far as we are concerned, unless we choose to interpose a strong hand there to stop it. There would be very good reason for doing that under existing circumstances, and I think I can cite very high authority in support of that proposition upon the facts that are existing now, upon the facts that have been already developed in the course of the last fifteen or eighteen months, when the war has prevailed.

President Jackson, in his seventh annual message, in 1835, speaking upon this general subject, said:

> Unfortunately, many of the nations of this hemisphere are still self-tortured by domestic dissensions. Revolution succeeds revolution; injuries are committed upon foreigners engaged in lawful pursuits. Much time elapses before a government sufficiently stable is erected to justify expectation of redress. Ministers are sent and received, and before the discussions of past injuries are fairly begun fresh troubles arise; but too frequently new injuries are added to the old, to be discussed together with the existing Government, after it has proved its ability to sustain the assaults made upon it, or with its successor, if overthrown. If this unhappy condition of things continue much longer, other nations will be under the painful necessity of deciding whether justice to their suffering citizens does not require a prompt redress of injuries by their own power, without waiting for the establishment of a government competent and enduring enough to discuss and make satisfaction for them.

That is the utterance of a man of great wisdom and great courage. He looked at the rights and interests of his country with a direct and penetrating eye, and he defended them with an arm that was nerved with great courage, strength, energy, and patriotism. The doctrine contained in that message of President Jackson applied to the present condition would justify the attitude taken in this case from the beginning by the honorable Senator from Texas [Mr. MILLS] who is now listening to me, that it is the duty of this Government to our own people, under all the surrounding circumstances and in view of the history of the past and the expectations of the future, to interfere and stop this war, and prohibit the destruction of life and property that is being carried on there in such a ruthless way. We have ample excuse and reason now for taking that course in respect to Cuba if the Government of the United States choose to take it. The justification in the eyes of nations and under the international law would be perfect, and that justification is predicated upon the thoughts which are expressed in the seventh annual message of that great soldier of the revolution, of the war of 1812, that great man who was President of the United States, and whose memory will stay with us to fortify our resolution in our weaker moments through generation after generation of Americans yet unborn.

I am not advocating that such a course ought now to be taken by the Executive of the United States. I suppose it would be entirely vain to make the suggestion at the present moment of time, but I am speaking now in regard to what has been done and what has been suffered by our people. I am speaking in respect to the rights that belong to our people based upon that predicate of fact. I do not know but that we are arriving at a period, if we have not already reached it, when the rights of the American citizen, even in respect to his life and his liberty, are to be considered as a minor matter when weighed against the interests of business people of the country or the interests of some men who have large holdings in Cuba or elsewhere. But after a while something will occur in this country that will bring the Government of the United States back to the consideration of the question, "What are the rights of the individual man who is a citizen of the United States who claims the protection of our flag?"

Some of the greatest rulers in this world, the most successful and most beloved by their subjects, have won their hold upon the affection of those people by their fidelity to the personal individual rights of the citizenship of their country. They have not stopped to make a calculation as to whether more dollars will be made to their people by allowing a war to proceed or by stopping it. When life and liberty were at stake, when their citizens were incarcerated in foul dungeons without having committed any crime, they did not stop for considerations like those, and the result of it is that there is not a heart that beats in the bosom of one of their subjects that is not true and loyal to the crown.

You may take the Russians, many of whom are said to be scarcely a civilized people. Take them as a mass and observe their fidelity, their loyalty to their Government and their Crown, and ask yourself the reason for it; why it is they are proud of a Government that is utterly despotic, that has no parliament, that has no means of guaranteeing to the subject of Russia his personal liberty. Ask the reason for it. It will be answered immediately that the Czar of Russia is the father of a great family, and he takes care of all his children. There is not a nation in this world that can with impunity inflict a wrong upon a Russian citizen—not one. There is not one that would dare to do it.

I wish I could say as much in respect to the citizens of the United States. I wish I could say to-day that our record is free from all impeachment upon this great question, and that while the Star Spangled Banner waves no American citizen has yet been outraged in his personal rights without having found immediate and adequate redress. But I can not say it. I will presently refer to the facts that prohibit me, and they are very sad, they are very recent, and they come from a country which is close to us geographically, far distant from us in its thoughts and actions respecting the government under which the people live. It is far removed from us, as far as the east is from the west in its form and principles of government, but still so close that we have to stand by and witness the persecution of those people and of our own people when they go to assist them—or even when they do not go to assist them—the persecution of our people upon the sole ground that they are Americans. We stand by in silence and witness these things, as a Government that locks itself behind the bars and doors of privilege and refuses even to tell us what is going on.

Now, I will turn to the inquiry, what the ten years' war cost the Cuban people. I have here before me a pamphlet called Spanish Rule in Cuba; Laws Governing the Island. This pamphlet, on its title page, says it is a "Review published by the colonial office in Madrid, with data and statistics compiled from official records, authorized translation, with additional notes." This is a Government paper, coming from the Government of Spain. On page 41 of the paper is an apology for the present public debt of Cuba, and also a statement of its amount. Will the Secretary do me the kindness to read No. 20?

The PRESIDING OFFICER. The Secretary will read as indicated, if there be no objection. The Chair hears none.

The Secretary read as follows:

CUBA'S PUBLIC DEBT.

Until 1868 the finances of the Island of Cuba were in an exceedingly prosperous condition. For many years there was an excess of revenue over expenditure, although, as has been said before, the Cuban treasury made large contributions to the national treasury. In spite of the fact that the cost of the military expeditions to Mexico and San Domingo was defrayed by the treasury, the deficit at the outbreak of the Cuban revolt in 1868 was only $7,360,000, an insignificant sum in view of the resources of the island. That these burdens were thrown upon the Cuban treasury is not surprising, inasmuch as for many years the Crown of Spain had in Cuba a very costly colony, whose expenses had to be met by subsidies from the colonies of Mexico and Peru.

* * * * * * *

The revenues, in consequence of the revolt, were much reduced, while the expenses rose to huge proportions. Extraordinary taxes were levied, but

they proved insufficient. Loans were obtained first from the Banco Español of Habana and subsequently from other banks. Treasury notes and bank notes guaranteed by the treasury, the latter through the Banco Español of Habana, were issued. The treasury issued bonds guaranteed by the customs dues, and a floating debt for the liquidation of previous expenditures was formed. All these debts were consolidated by the issues of bonds guaranteed by the Cuban treasury to the amount of 620,000,000 pesetas ($124,000,000) in 1886 and to the amount of 222,500,000 pesetas ($44,500,000) in 1890, making a total debt at the outbreak of the present revolt of $168,500,000.

The sources of the Cuban debt being shown, all commentary is unnecessary.

Mr. MORGAN. According to that statement, at the beginning of the present outbreak in Cuba the debt saddled upon that colony amounted to $168,500,000. What was the occasion for it? They make Cuba pay all the expenses for the ten years war. They make Cuba pay the expenses also of the expedition against Santo Domingo, which was carried on during the time of our civil war, which failed and which cost Spain very heavily. Of course the Cuban colony had not anything to do with carrying on that expedition, except, perhaps, that a few Cubans may have gone there and lost their lives in trying to assist the Spanish flag. But that debt is saddled upon them.

Now, more recently they have saddled upon Cuba the expenses of an expedition against Mexico and one against Peru, the latter occurring also during the time of our civil war in the United States. Those various sums of money thus fastened upon the treasury of Cuba amounted to $168,500,000 at the beginning of the present Cuban insurrection or war. Just before the insurrection broke out General Weyler was engaged in the Philippine Islands for a year and a half, I think it was, in killing enough of the natives of that population to bring the balance of them into subjection to the Spanish will, and that expedition cost very largely in money and still more largely in human life. The expense of the expedition against the Philippine Islands has been fastened upon Cuba, an unknown sum yet to come, yet to be placed upon the treasury of that country, and the proceeds of taxation are to be applied to the extinguishment of the interest upon that debt and ultimately the principal.

Now will come the expenses of the present war. What do they amount to? What has Spain spent since February, 1895, or really since September, 1894, for that is the time when she commenced to make her preparations to resist the outbreak. What has she spent upon the present war? She has sent 175,000 troops to Cuba. She has had to import all of her provisions either from the mother country or from other countries. She has derived no supplies from the Island of Cuba—nothing to speak of. What, then, must be the expense of the present war up to this time, with 175,000 soldiers in the field, besides a very large and very expensive navy that she is maintaining there? It can not be less than $25,000,000. More likely it is $50,000,000. If this war continues as long as the former war continued, and there is no likelihood of it stopping short of that unless Cuba shall achieve her independence, a debt will have been incurred in its prosecution by the Spanish Government amounting to fully as much as the whole debt now resting upon Cuba. At the present moment of time the debt resting upon Cuba is not less than $300,000,000 on a million and a half of people. That debt is fastened upon their treasury, and all the taxation that brings money into the treasury is mortgaged for the payment of interest upon the debt. It is not a dollar under $300,000,000, and at the close of the present struggle—if it closed now—it would not be less than $350,000,000.

Now, this book informs us that at the present time the per capita taxation in Cuba is the very small and moderate sum of $24. To think of that! Taking all the old and the young, the rich and the poor, every human being, amounting to a million and a half people, when you come to average the annual taxation among those people it is $24 per annum per capita. No people in the world, of course, can live under such taxation. They take Cuba and separate her from the balance of the Spanish Government on all questions of taxation that they can impose upon her. They incorporate her, however, in the Spanish monarchy upon all other questions—the question of power to hold her as being obedient to the Spanish monarchy, and subject to the rule of the Cortes in Madrid. In the introduction to this book it is said:

Cuba long ago ceased to be a colony. She is now an integral part of Spain. All Spaniards, be they born in the peninsula or in Cuba, may say: "Where Spain has her flag, there is Spain."

Now, if that very majestic declaration is true, why is it that Cuba is separated out from the balance of the Spanish colonies to receive individual and singular taxation in respect of every American enterprise in which Spain is engaged, whether she fails in it or whether she succeeds? Why should the expenses of a war with Mexico, with the Philippine Islands, with Peru, and with San Domingo be saddled upon the Island of Cuba, in addition to the expense of putting down the insurrectionary movements which have several times been conducted in that island? If Cuba is not a colony and is an integral part of the Spanish dominion; if it is now a province of the Spanish Government, why have not Castile and other provinces of that Government been taxed for the purpose of relieving Cuba of the burdens that have come upon the general treasury of the Spanish Government? These facts prove the absolute justification of what the Cubans have been saying to us now for many years, that they are selected out for purposes of oppressive taxation, ruinous and unfair taxation, and yet when they claim that the balance of the Spanish monarchy should share with them in the expense of Spanish enterprise, particularly those of wars with foreign countries, they are replied to with bayonet and sword. They are told that they have not a right to consider any question of taxation that the Spanish Cortes undertakes to impose upon them.

This was one of a number of oppressions that occurred in Cuba that led to the war of 1868–1878. In that war there came forth in its history a perfect exemplification of the whole character of the Spanish monarchy in its relations to the Island of Cuba. The picture, Mr. President, is beyond the power of human description. No man, however powerful he may be with pen or tongue, can give anything like an adequate description of the sufferings that those people endured during that ten years of war.

We have now an object lesson presented in the present history of the struggle in Cuba, which informs us through our public press, without a denial that I have ever seen, day by day of the outrages and wrongs perpetrated in Cuba of the same general character, only they are more flagrant, they are more oppressive, they are less humane and less Christian than they were in that ten years' war.

There is a gentleman in Washington City who has been here a number of years and who is connected with our Government, who was a lawyer by education, born in Cuba, educated there, and was a judge in that colony. He was a participant, however, in the former ten years war, and then came to the United States to practice his profession here, and has several times appeared before the Committee on Foreign Relations in the advocacy of the Mora claim, which we all remember, and has exhibited himself as a learned and an elegant man. At the close of the former war Mr. Dominguez, the gentleman to whom I refer, and who, I believe, is now one of the clerks in the Bureau of American Republics, compiled from statistics which he affirms to be entirely true and reliable a book and printed it. It is called the Book of Blood—a book that was printed in New York in 1873, long before this present outbreak occurred in Cuba. He has obtained the names of as many as he could of the persons who were shot in Cuba during that ten years war. He gives the place of residence and day of execution, and gives a reference to the book or public print in every case to justify his statement. This book has not been referred to heretofore, I think, in the Senate, or, if it has been, it has been very briefly adverted to; but it shows a picture of bloodshed and ruin and destruction and outrage amongst those Cuban people during those ten years, which is characteristic of that Spanish Monarchy, only, from the time of the Duke of Alva down to the present moment. At the same time it is revolting that any civilized nation would permit such a book as that to go unanswered where the facts are stated by a gentleman of very high character—a character that can be vouched for by many of the best citizens of America.

According to that statement thus carefully prepared, giving the names of the different individuals, or, where they were unknown and he could not find out the precise name of the party, giving dates and references to show that the facts were exactly as he states them, the loss to Cuba was 8,517 people destroyed during that war, of whom 7,699 were captured as prisoners and taken during that war in battle, and they were shot after they surrendered. One hundred and ninety-one persons were garroted, 84 were shot by order of courts-martial, 38 were condemned for life in the chain gang at Ceuta, in Africa, and 181 were condemned to shorter terms of imprisonment.

Mr. MILLS. Has he enumerated the number of persons on both sides who were killed?

Mr. MORGAN. Yes, sir. The number of persons who were killed in that war on the Cuban side was over 40,000. The Spanish lost more than that. So that there must have been over 100,000 lives sacrificed in that ten years' war.

Mr. MILLS. Is it a fact that 40,000 people were killed on the battlefield?

Mr. MORGAN. Very likely; but Mr. Dominguez does not go into that matter,

Mr. MILLS. Is that the statement in the encyclopedia?

Mr. MORGAN. That statement is in the encyclopedia, and I have no doubt of its truth.

Of the 250 persons who were transported to the island of Fernando Po, on the coast of Africa, on the 21st of May, 1869, 7 were administrators of sugar plantations, 1 was an architect, 3 were attorneys at law, 3 were brokers, 2 bankers, 10 carpenters, 5 clergymen, 11 clerks of notaries, lawyers, etc., 4 druggists, 3 distillers, 4 engineers, 20 farmers, 2 judges of the peace, 6 lawyers, 4 masons, 4 military officers, 2 mortgage recorders, 8 notaries, etc. Of the 250, 140 were married, 91 were single, and 14 were widowers.

This statement shows that the class of people who were engaged

in that struggle of the ten years' war were not negroes and inferior people. In fact, the negroes were then slaves, and therefore were excluded, the Cubans agreed with the Republicans in Spain that slavery should be abolished, and that was the predicate on which General Grant interfered to get that war stopped; and then the treaty which was made at the time, and which was discussed here—the treaty of Zanjon—contained eight articles of capitulation, none of which have been honestly complied with by Spain since that time.

Mr. President, up to the present time La Discussion, a Spanish paper at Habana, gives the following as to Cuban losses in the present war, a statement extracted from El Heraldo, of Madrid.

El Heraldo de Madrid, referring to a statement published by the minister of war, giving the casualties among the insurgents, makes the following summary for the eleven months of 1895: Twenty-six chiefs or leaders and 1,190 rebels were killed; 4 chiefs and 358 men were wounded, and 218 men were made prisoners.

El Heraldo draws a contrast between the early months of 1895 and the early months of 1896. During January, February, March, and April, 1896, 37 chiefs and 3,005 men were killed, while 12 chiefs and 1,618 men were wounded, and 12 chiefs and 330 men were made prisoners.

The result in favor of four months of 1896 compared with eleven months of 1895 shows a difference in favor of 1896 of 11 chiefs and 1,895 men killed and 8 chiefs and 1,260 men wounded, while 112 prisoners were captured.

That is all I care to read of that article.

That is a very remarkable statement, Mr. President. One hundred and twelve prisoners were captured in the present war, says this authentic statement from Madrid, one of these official organs. That is the most extraordinary reversal of the casualties of war that I think I ever read, and you will observe that in all the accounts that come from Cuba to this country there is no statement made in regard to the number killed in battle; there is no statement of the number of prisoners taken; they are all put down as being killed; but you will find that there are statements made that 100 men were killed and 10 were wounded, or something like that, which means simply that they killed their prisoners. It can not mean anything else.

That statement, put in that Spanish newspaper at Madrid, shows that of the number of men who were fighting only 112 were captured as prisoners. What became of them we do not know. I suppose that they have either come in and yielded their submission to the Spanish Government or joined the army, or else they may have been sent off to prison. We can not tell anything about that.

The first question that arises in the American mind is whether or not that is war. I do not mean war by declaration. The declaration is always the least part of a war. When we were passing upon the French spoliation claims the other day it was objected that those claims were incurred in a period of war, and that argument has been held as to those claims from the time they were first incurred, early in the beginning of our Government, down to the this date, and yet there was no declaration of war between France and the United States at all; but it has been seriously maintained and urged against those claims always that they were the result of warfare, and being the result of warfare our citizens had to submit to the loss, and that we were not amenable to compensate them for losses which occurred in actual war, whether war was declared or not.

What is this war? Is it a mere civil proceeding? Are we to stand here as a Senate and to decide in the face of facts like these that no war prevails in Cuba, that it is a mere insurrection? What is an insurrection? It is an outbreak against the civil authority; and the civil authority is not only left free to deal with it, but only civil penalties administered by the civil authority can be visited upon the men who are engaged in insurrection. That is the law of all civilized countries in the world. It is the civil law and the common law of England; it is the law of nations. When a man is arrested as an insurrectionist, I care not whether he is arrested by the police force or whether it is necessary to call the army in to arrest him, the moment he is under arrest he is amenable to civil trial by civil tribunals and to civil penalties.

How long has it been in the Island of Cuba since the Spanish Government has had the power thus to inflict these penalties upon the people of that island? Sir, they have not had the power since within thirty days of the first outbreak in that island. Their judges were driven from the bench; their authority as a civil power ceased. Civil trial no longer existed in Cuba unless within some of the fortified towns; but as to reaching out the civil power to arrest the perpetrators of the insurrection and try them before the civil courts, that state of affairs has not existed in Cuba since thirty days after the beginning of war.

In that connection, I desire to call the attention of the Senate and the country to the utterances of our own Supreme Court upon that question, which I think ought to be acceptable to everybody, and which, I think, will, when they are considered, probably lead to a very much better understanding of these questions and to less debate and controversy among ourselves as to what the law actually is. In the case of Ford *vs.* Surget, which had reference to the destruction of some cotton which belonged to the plaintiff in the State of Mississippi during the war, quite a large quantity of it—200 bales of cotton which were burned up by a provost-marshal in a certain county under the orders of the Confederate military. He was not a Confederate military officer; he was not in any wise connected with the Confederate government. He was a State provost-marshal. He burned up that cotton, and did it under the orders of the military. The question arose whether he was liable to the owner of the cotton for having burned it, for it belonged to Mr. Ford. Of course, the action was predicated entirely upon the idea that the rebellion was unlawful, that it was not in any sense justifiable, and that the act could not be justified under the laws of the United States. So the Supreme Court held that it could not be justified under the laws of the Confederate States as well. But they go on to say this about it, for they held Surget was not liable for burning the cotton. Mr. Justice Harlan, in delivering the general opinion of the court, says this:

3. The Confederate government is to be regarded by the courts as simply the military representative of the insurrection against the authority of the United States.

4. To the Confederate army was, however, conceded, in the interest of humanity, and to prevent the cruelties of reprisals and retaliation, such belligerent rights as belonged under the laws of nations to the armies of independent governments engaged in war against each other, that concession placing the soldiers and officers of the rebel army, as to all matters directly connected with the mode of prosecuting the war, "on the footing of those engaged in lawful war," and exempting "them from liability for acts of legitimate warfare."

5. The cotton for the burning of which damages are claimed in this civi action was, as to the United States and its military forces engaged in the suppression of the rebellion, not only enemy but hostile property, because, being the product of the soil, and, when burned, within the boundary of the insurrectionary district, it constituted also, as we know from the history of the insurrection it did, "the chief reliance of the rebels for means to purchase the munitions of war in Europe." (Young *vs.* United States, supra, page 39; Mrs. Alexander's Cotton, 2 Wall., 404.) It was therefore liable at the time to seizure or destruction by the Federal Army, without regard to the individual sentiments of its owner, whether the purpose or effect of such seizure or destruction would have been to strengthen that Army or to decrease and cripple the power and resources of the enemy.

Further on he states:

They had the right, as an act of war, to destroy private property within the lines of the insurrection belonging to those who were cooperating, directly or indirectly, in the insurrection against the Government of the United States, if such destruction seemed to be required by impending necessity for the purpose of retarding the advance or crippling the military operations of the Federal forces. Of that mode of conducting the war on behalf of the rebellion no one could justly complain who occupied the position of an enemy of the United States by reason of voluntary residence within the insurrectionary district.

Mr. Justice Clifford goes on to give more at large his views on this subject, and I shall refer to certain extracts from his opinion merely for the purpose of illustrating the argument as applied to this question in various forms by various people at different times. Mr. Justice Clifford concurred in the judgment of the court and delivered the following opinion, of which I shall read only a part:

Parties belligerent in a public war are independent nations; but it is not necessary that both parties should be acknowledged as such in order to the enjoyment of belligerent rights, as war may exist where one of the belligerents claims sovereign rights against the other, the rule being that when the regular course of justice is interrupted by revolt, rebellion, or insurrection, so that the courts of justice can not be open, civil war exists and hostilities may be prosecuted to the same extent as in public war. (Prize Cases, 2 Black, 666; Vattel, 425.)

Further arguing, he says this:

Insurrection may or may not culminate in an organized rebellion, and it may or may not assume such aggressive proportions as to be justly denominated territorial war, the universal rule being that rebellion becomes such, if at all, by virtue of its numbers and the organization and power of the persons who originate it and are engaged in its prosecution. But when the party in rebellion hold and occupy certain portions of the territory of the rightful sovereign, and have declared their independence, cast off their allegiance, and formed a new government, and have organized armies and raised supplies to support it, and to oppose, and if possible to destroy, the government from which they have separated, the world and the law of nations acknowledge them as belligerents engaged in civil war, because they claim to be in arms to establish their liberty and independence in order to become a sovereign state.

A better definition of the present situation in Cuba could not possibly be given than Mr. Justice Clifford gave in that opinion. He proceeds:

History furnishes many examples of war between the government de jure of a country and a government de facto of a seceding portion of the same country; and in such cases jurists hold that other powers are entitled to remain indifferent spectators of the contest, and to allow impartially to both belligerents the free exercise of those rights which war gives to public enemies against each other, such as the right of search, the right of blockade, the right of capturing contraband of war and enemy's property laden in neutral vessels. (Twiss, Law of Nations, 2d edition, section 239.)

Rebellions of the kind, when they become too formidable to be suppressed by the duly constituted civil authorities, authorize the de jure government to blockade the ports within the territory occupied by the insurgents, and to notify the same to foreign powers that the same will be enforced pursuant to the law of nations. Official notice of such a proclamation makes it the duty of foreign nations to conform to the international rules of war in that regard; and the same jurist says that the foreign power must at once decide upon one of three alternative courses of action. It may assist the government de jure as an independent power, or it may assist the insurgents, in either of which cases it becomes a party to the war; or it may remain impartial, still continuing to treat the government de jure as an independent power whilst it treats the insurgents as a community entitled to the rights of war against its adversary. Such a concession is indispensable, as the neu-

tral power will find it impossible to recognize the character of one as a belligerent without recognizing the belligerent character of the other, unless the war is confined entirely within the territory of the contending parties and does not extend in any respect to the highway of nations. (Id., page 500.)

Belligerents engaged in war may exercise the right of blockade, and they may capture contraband of war and enemies' property laden in neutral vessels; and if so, the contest, though it originated in rebellion, must in the progress of events, when it assumes such proportions as to be justly denominated civil war, be recognized as entitling both parties to the rights of war just as much as if it was waged between two independent nations.

* * * * * * *

Other nations, as well as the United States, conceded belligerent rights to the Confederate States, as all admit, which renders it unnecessary to inquire whether the concession was rightful or premature. Matters to be taken into the account in determining such a question, it is said, are whether the insurgents present the existence of a de facto political organization, sufficient in character, population, and resources to constitute it, if left to itself, a State among the nations reasonably capable of discharging the duties of such an organization.

* * * * * * *

Publicists and courts of justice everywhere concur in these sentiments and in certain corollaries which the author deduces from the attending circumstances, to wit, that the common laws of war—those maxims of humanity, moderation, and justice previously pointed out—ought to be observed by both parties in such a conflict. (Vattel, 425.)

For the same reasons which render the observance of those maxims a matter of obligation between state and state, it becomes equally and even more necessary in the unhappy circumstance of two incensed parties in the case of civil war. Should the sovereign conceive that he has a right to hang up his prisoners as rebels the opposite party will make reprisals, as in the example given in the note, and if he does not observe the terms of the capitulations and all other conventions with his enemies they will no longer rely on his word. Should he burn and ravage, they will follow his example, and the war will become cruel, horrible, and every day more destructive to the nation.

War, it is said, may exist without a formal declaration; and the decision of the court is that the laws of war as established among nations have their foundation in reason and tend to mitigate the cruelties and miseries which such conflicts produce. (Prize Cases, 2 Black., 669.) Hence, say the court, the parties to a civil war usually concede to each other belligerent rights, for they exchange prisoners, and adopt the other courtesies and rules common to public or national war; nor is it necessary that the independence of the revolted province or State should be acknowledged in order to constitute it a party belligerent in a war, according to the law of nations; and the reason given for the rule is one of frequent illustration, which is, that foreign nations acknowledge it as war by a declaration of neutrality, of which two examples are given in the opinion of the court from which these rules are drawn: 1. When the United States recognized the existence of civil war between Spain and her colonies. (The Trinidad, 7 Wheat., 327.) 2. When the Queen of England issued her proclamation of neutrality recognizing hostilities as existing between the United States and the Confederate States.

In a further discussion of some of the minor objections which were made on the argument of this case before the court, Mr. Justice Clifford proceeds to answer as follows:

Cotton was the article destroyed, which was the subject during the war of special legislation by each belligerent power. It was treated by the Army, the Navy, and the civil arm of each as possessing extraordinary qualities, and as different from other property, even in the hands of noncombatants. It formed the basis of the credit which the Confederates were seeking to establish abroad for the prosecution of the war. Its retention in the Southern States and withdrawal from market, except when for war purposes, were considered by the Confederate authorities as of vital importance; for it was hoped that its withdrawal from market would hasten a recognition of the independence of the States in rebellion, and the raising of the blockade which was destroying their resources and crippling their armies.

There is a full answer as to the burning of the sugar plantations in Cuba by the rebels and also by the Cubans, for they both participate in those conflagrations, and they do it for the same reason suggested here for the burning of cotton in the Confederate States during the civil war—to deprive both parties or either party of the opportunity of making the cotton in our case and the sugar in their cases the basis of credit with foreign nations.

Governments de facto are described by Mr. Chief Justice Chase as divided into classes; and, after having given a description of two of the classes, he remarks that there is another, called by publicists a de facto government, but which might perhaps be more aptly denominated a government of paramount force. Its distinguishing characteristics as given by that magistrate are as follows: 1. That while it exists it must necessarily be obeyed, in civil matters, by private citizens, who by acts of obedience rendered in submission to such force do not become responsible as wrongdoers for those acts, though the acts are not warranted by the rightful government. Actual governments of this sort are established over districts differing greatly in extent and conditions. They are usually administered directly by military authority, but they may be administered also by civil authority, supported more or less directly by military force. 2. Historical examples are then given of that sort of de facto government, to wit, the temporary government at Castine during the war of 1812, and the temporary government at Tampico during the Mexican war. (United States *vs.* Rice, 4 Wheat., 253; Fleming *vs.* Page, 9 How., 615; The Neustra Senora, 4 Wheat., 502.)

Those were cases where regular enemy governments acquired the temporary possession of territory during war with the country of which the territory so possessed was a part; and this court adverted to that difference in the case under consideration, but decided unanimously that the government of the insurgent states must be classed among the governments of which those are examples. Among the reasons assigned in support of the conclusion were the following: 1. That rights and obligations of belligerence were conceded to it in its military character very soon after the war began, from motives of humanity and expediency. 2. That the whole territory controlled by it was thereafter held to be enemies' territory, and the inhabitants of the territory were held, in most respects, as enemies. And as a final conclusion, the court decided that to the extent of the actual supremacy maintained, however unlawfully acquired, the power of the insurgent government can not be questioned. (Thorington *vs.* Smith, 8 Wall., 11; Halleck, Int. Law, chapter 3, section 21, page 74; United States *vs.* Klintock, 3 Wheat., 150.)

In a case which came up in Pennsylvania Mr. Justice Strong was on the circuit and participated in the trial of it, and concurred in the judgment and gave an elaborate opinion, in which he stated that he could not doubt that those revolting States, confederated as they had been, claiming and enforcing authority as they had done, were to be regarded as a government de facto.

There is the turning point in all of these questions. The question is whether or not there exists in Cuba a government de facto. That is an easy enough question to settle; it is one which every man in Cuba must settle for himself; and it is one that every man going to Cuba must settle for himself; for it is the individual right of every man in this world, when he finds himself in the presence of any government having authority and power to control his actions, to submit his affairs, his person, and even his liberty to the control of that government while he remains there. So, after all, in all of this discussion, which has wandered back and forth over an almost unlimited field, the vital point in the question is always simply this: Does a de facto government exist in the Island of Cuba? If a government de facto does exist there, then, of course, that government is entitled to its belligerent rights, if it has power enough to marshal armies in the field and resources enough to sustain them. Says Mr. Justice Strong:

Two objections to that proposition had been made at the bar: (1) That their claim of sovereignty had been constantly opposed; (2) that their boundaries were uncertain and undefined—

This is the point to which I wish to call particularly the attention of the Senate—

to both of which the judge responded to the effect that neither of the objections was satisfactory; that they were none the less a government de facto because they had had no interval of peaceful existence, nor because the geographical boundaries of the district over which their power is exclusively felt were not well defined.

We remember very well that here in the State of Virginia, out of which territory a sovereign State was carved during the existence of our civil war, the boundaries of authority shifted from time to time by the advance and retreat of the respective great armies which were contending with each other; and the civil power and all other powers had to yield from time to time as either of the armies was present for the purpose of enforcing either the laws of the United States or the laws of the Confederate States, according to their success.

After having commented upon cases of that kind, Mr. Justice Clifford closes his opinion as follows:

Unless the Confederate States may be regarded as having constituted a de facto government for the time or as the supreme controlling power within the limits of their exclusive military sway, then the officers and seamen of their privateers, and the officers and soldiers of their army were mere pirates and insurgents, and every officer, seaman, or soldier who killed a Federal officer or soldier in battle, whether on land or the high seas, is liable to indictment, conviction, and sentence for the crime of murder, subject, of course, to the right to plead amnesty or pardon, if they can make good that defense. Once enter that domain of strife, and countless litigations of endless duration may arise to revive old animosities and to renew and inflame domestic discord, without any public necessity or individual advantage. Wisdom suggests caution, and the counsels of caution forbid any such rash experiment.

In another place in this opinion Mr. Justice Clifford says that the boundaries of the dominion of a de facto government are the boundaries alone of the bayonet. Of course a de facto government can not exist in a precinct, as we call a small political area, or in a county, or, perhaps, even in a province in Cuba; it must extend to that reasonable magnitude where it becomes apparent to the governments of the world that it has military power sufficient, at least, to hold at the present time the occupancy of the territory in question, and to exclude therefrom all the civil powers of the government against which it is making war. Taking that decision as the basis of our action, as the line of demarcation of our authority as a Government, what difficulty can exist in law, as expounded by our Supreme Court, in the recognition of the existence of war in Cuba? None whatever.

But it is said the recognition of belligerency in Cuba does not create that situation. That is very true. We do not create belligerency by recognizing it; neither do we create peace by denying that war exists. It is a question of fact and is so treated by all the great jurists of the world. And it is a question of fact upon which governments may act and individuals may act, the question of fact being whether that government claiming to be such, and organized as such, with civil and military functions and powers, chooses to exercise its authority within a given domain or within any domain that it can protect by its bayonets within the Island of Cuba.

Mr. PLATT. May I ask a question?

Mr. MORGAN. Certainly.

Mr. PLATT. I should like to hear the Senator upon this point: Admitting that a state of war exists there, does that impose any obligation on the Government of the United States to make any declaration about it whatever?

Mr. MORGAN. None at all, unless its own citizens are involved in the question. But I have before me many authorities from our own statesmen and the opinion which I have read also contains authority upon the same proposition, that the penalties of warfare are to be visited upon men who are captured when they make an invasion of a country if that country is engaged in war. To illustrate that, I will suppose that an American citizen, exercising his clear personal right, that everybody concedes, to

leave our shores, would go to Cuba and enlist there in the Spanish army or in the Cuban army. He goes to the Island of Cuba, we will suppose, for the purpose of enlisting in the Cuban army. When he arrives there he is captured off the boat on which he has gone. He is not a member of any expedition, we will say, not having violated our laws in the slightest particular. He is captured off the boat in which he has gone, and he is carried before the civil tribunals, and it is proven by letters in his possession that his object in leaving the United States was to go to Cuba and enlist in the Cuban army. That is a clear case.

Now, this man, still being a citizen, exercising all his rights of citizenship, because he has a clear right to do this, not having forfeited the protection of his flag, not having expatriated himself, not having assumed citizenship to Spain or Cuba or any other country, it is very clear that a case arises, in such a capture as that, between Spain and the United States whether that man is to be tried under the municipal laws of Spain as a rebel, a traitor, or an insurrectionist, and condemned to death, or whether he is to be tried under the international laws and to be treated as a prisoner of war.

Spain has no power to repeal the international laws in respect of our own citizens, unless our citizens go to her territory when she is at peace and violate her laws. But if a state of war exists as a fact and our citizen enlists in the army of Cuba, then the question arises whether that man under the international law is amenable to that law or whether he is amenable to the municipal law of Cuba.

The question is very easily settled. It is a question merely of fact. When the Government of Spain undertakes to execute that man for his act in making this enlistment lawfully, so far as we are concerned, we say to the Government of Spain: "This man left his country in the pursuance of an object and purpose that was not at all in conflict with our laws; he was exercising his individual right of enlistment in a foreign army, which was incomplete until he got there. He was on his way for the purpose of completing that intention, or possibly that engagement, and on the route you have arrested him, and you claim now that you can interpose through a municipal statute, so as to take him and try him as if he were a citizen of Cuba engaged in insurrection.

"So we say to you that the laws of nations protect that man, because war exists in Cuba, and while you have not declared it or admitted it on paper, you have declared and admitted it by every other act that you have performed, and your admissions are ascertained from your acts by the United States Government and not merely by your declarations intended to suppress the force of those acts. What have you done? Why have you got 170,000 people under arms in Cuba? Why is it that you can not visit the interior of that country except in armed bands, and strong ones at that? Why is it that you patrol the whole coast of Cuba with more than 60 war ships? Why is it that you issue proclamations to prohibit the exportation of tobacco to the United States or to any other country? Why is it that you declare the importation of powder and shot or cartridges or guns contraband? Why will you seize ships that are sailing within the 3-mile limit, loaded with contraband articles consigned to some other port not in Cuba at all? Why do you resort to all the great machinery of war and bring to bear in its utmost rigor every power of war, and why do you claim this under the laws of nations? You can not inflict your laws upon the people of the United States except under the laws of nations. Why is it that you claim this right against a citizen of the United States when you are actually at war and yet insist that peace exists in Cuba?"

Mr. President, in a case of that kind, for the protection of our own citizens, for the purpose of having a fair and square understanding with Spain, to avoid any misleading at all in the matter, it is our duty as a government to declare that to exist which the facts prove to exist, to declare that war exists in Cuba, and that so far as we are concerned as a nation we intend to observe a strict neutrality between the belligerent parties. It is very true, sir, we can not create a state of war in Cuba by our declaration, but we can protect our citizens by such a declaration as that, which means simply that they shall have the benefit of the laws of war as they are recognized and declared in the international law, and for the mere offense of going there to enlist in the army of Cuba they shall not be amenable to the pains and penalties of death. By our recognition of any such theory as that claimed in the interests of Spain, which we have too often recognized and which by our silent acquiescence we are recognizing every day, when our citizens are being butchered in the most horrible manner, I fear we will not do our whole duty to our people. Such a recognition has entailed upon the people of the United States penalties that the laws of nations forbid that they shall suffer. If there is one thing that this great Government owes to its people that stands above another it is that when they are outside of the territorial dominion of the United States the laws of nations shall protect them. We have no right to withdraw the protection of the laws of nations from these people.

Now, I will take an American citizen residing in Cuba. He is out in the interior, 50 or 100 miles from Habana, and he has a sugar plantation there. Gomez and Maceo come on and they include him in their lines, and they instruct some of their provost-marshals to burn that man's sugar plantation. Then I will bring the man who burned the sugar crop before the Supreme Court of the United States, try him upon the very same declaration that was filed in the case of Ford *vs.* Surget, and ask a judgment of the Supreme Court of the United States whether that provost-marshal is liable to this American citizen for having burned his cane. The Supreme Court of the United States would say, "No; he is not liable." Why? Because the Cuban Republic there, under President Cisneros, assisted by the armies of Maceo and Gomez, all holding regular commissions, a regular organization, had included this man's plantation in their lines. He was grinding sugar, he was contributing the strength of his product to the Spanish power. They forbade him to do so. He did not cease. They burned his plantation. Nobody is liable for that. Why? Because the Cisneros government at that place and at that time was a de facto government and supported by military power. How did it happen to be a de facto government and supported by military power? It was because it makes no difference what the declaration as between Cuba and Spain might be, the court would find the public fact at that time to be that war existed there, for if war did not exist there and only insurrection, then there might be a ground for holding that this man was liable to the person whose plantation he had burned. Whenever it is proven that actual war existed in that country, that de facto government had the power and the right as a government to order the destruction of the sugar plantation, when it is destroyed the man is simply without remedy.

So in respect to a person visiting Cuba from the United States, I care not what he carries there. If he is captured while war exists in Cuba, he is captured just as a man would be who runs a blockade. He is not a pirate because he sails on a vessel that has arms and ammunition in it; and after he lands he is neither a rebel, nor an insurrectionist, nor a traitor. The most that can be said against him is that, war being flagrant in Cuba, this man has violated a blockade, if a blockade exists, or what is equivalent to it, some decree or ordinance of the military government of Cuba that such munitions shall not be landed upon that island except in ports of entry.

Now, the Government of the United States can not claim to be even a decent Government; no, sir, it can not claim even to be decent and respectable amongst the nations of this earth if it stands by and sees its citizens, when captured under such circumstances, and in the presence of the fact that war exists in Cuba, condemned to death for a violation of some local ordinance in the Island of Cuba.

So I answer the honorable Senator from Connecticut [Mr. PLATT] our duties are only to our own people. They must be confined to our own people. But there is a sufficient reason for making this declaration of the fact that exists in order that Spain and the balance of the world may understand that so far as our people are concerned, when they leave our shores in any of these expeditions, whether they are justified by our laws or not justified by our laws, it makes no difference to Spain. She has got nothing to do with the execution of our laws. But whether or not they are justified by our laws, the moment when men, in their expeditions, who leave our coast sail outside of the 3-mile limit they are placed under the protection of the laws of nations, of which we are bound to guarantee them the advantages and benefits; and if they go to Cuba and find war existing there, and carry something that either by military order or by actual blockade is excluded from that island, and they are captured in the effort to get in, their offense under the law of nations amounts to a violation of blockade contrary to the laws of war, and they are amenable to no punishment whatever except such as may be inflicted under the laws of war upon prisoners captured in battle or with arms in their hands.

Mr. President, I hope the Senate will excuse me for making some little reference to myself in this business, because, unfortunately for me, I have been arraigned and held up to the country as being very anxious that a war should take place between Spain and the United States, and that this has been the motive and purpose of all I have done on this subject. I have attempted on frequent occasions to disclaim this, and I want to prove now by the record exactly how the matter stands.

I am not averse to war with Spain if she, in the pursuit of her abominable despotism in the Island of Cuba, continues to make it an offense against the civilization of this age and against all principles of humanity and Christianity. If she wishes to wage a war which is intolerable in the sight of God and man, I can not say that I object. I think it is a misfortune that we are drawn into those circumstances in which we find ourselves obligated by respect to our own ancestry, and our traditions and our own love of the great principles of the Republic in which we live, not to stand by and see a people massacred, brutally tortured, in an island

which is only 90 miles from our shores, under the pretext of suppressing insurrection and rebellion, when we know that what they are doing is open and public war, and that it is a war of extermination.

I do not deny my sympathy with the Cubans, but as an American citizen and as an American Senator I confine my action in this business entirely to the duties, the strictly constitutional duties, of the Government of the United States toward our own people, and I have done so from the beginning. It devolved upon me by the action of the Committee on Foreign Relations, contrary to my expectations entirely, that I should take charge of a resolution which was reported here of which I was not the author. In explaining my attitude toward this question and somewhat in a sense of apology for a previous report that I had made, I stated to the Senate that that subject commenced to be urgent upon the Committee on Foreign Relations on the first day of the present session of Congress in the form of petitions, resolutions, and memorials from all quarters of the country, from public associations, from private individuals, from churches, from legislatures, from boards of trade, until the piles of petitions and memorials got to be simply enormous upon the desk of the committee.

Resolution after resolution was sent down to us from this Chamber that we would proceed to inquire into these matters and make report upon them. We still delayed action. Every member of the committee, I believe, felt a strong sense of responsibility if we delayed action, until finally the period arrived when we thought it would not be respectful to the Senate or to the people to maintain our silence any longer. We took up that great pile of petitions and memorials to consider them and the resolutions predicated upon them. I said to the gentlemen of the committee: "We have been a long time here assisting Spain in holding Cuba as a conquered province by the rigor of the laws we have passed and the perfect fidelity of their execution. It has cost us a great deal of money. It has cost us some human lives. It has cost us some vexation and trouble on various occasions. Sometimes the American heart was so wounded by what took place in Cuba while we were standing guard to keep our people from going there and assisting the men who are striking for freedom as that it was almost impossible that any appeal could reach them and stop them from breaking over the restraints of the law and going there to relieve those suffering people."

I said, "The moment we turn our face in the opposite direction, the moment the Committee on Foreign Relations makes a report, it makes no difference how mild, in the direction of expressing even sympathy with the Cuban people, we will find that Spain will seek occasion for war against us. Perhaps she may be glad of the opportunity to lose this colony, which is slipping from under her grasp in the sunlight of our present civilization, and she may prefer to lose it at the point of the sword when the United States is her antagonist rather than to surrender it into the hands of Gomez and Maceo and Cisneros, whom she classes as vile rebels. But whatever may take place, whenever we make the least demonstration of sympathy from this committee in favor of Cuba, you may rely upon it that we shall not escape without a war." Not that I wanted it, Mr. President, but that I saw that it would be unavoidable. There is not a gentleman on this floor to-day who is not conscious in his heart that if the war continues five years longer with the same atrocities that have attended it for the last few months it has been waged the United States can not possibly keep out of it. Our people will force us into it in spite of all we can do. I therefore said, "I accept the situation on entering upon the consideration of these resolutions." But what had I done before that? I had prepared the following resolution, which I think the world will call now an exceedingly mild resolution on this question, and I had brought it before the committee:

Resolved by the Senate (the House of Representatives concurring), That the present deplorable war in the Island of Cuba has reached a magnitude that concerns all civilized nations to the extent that it should be conducted, if unhappily it is longer to continue, on those principles and laws of warfare that are acknowledged to be obligatory upon civilized nations when engaged in open hostilities, including the treatment of captives who are enlisted in either army; due respect to cartels for exchange of prisoners and for other military purposes; truces and flags of truce; the provision of proper hospitals and hospital supplies and services to the sick and wounded of either army.

Resolved further, That this representation of the views and opinions of Congress be sent to the President; and if he concurs therein that he will, in a friendly spirit, use the good offices of this Government to the end that Spain shall be requested to accord to the armies with which it is engaged in war the rights of belligerents, as the same are recognized under the laws of nations.

When I brought that resolution before the committee, on their first consideration of it they rejected it and I laid it aside. I had accompanied it with the statement of the facts that justified Congress in going at least as far as that resolution went. They laid it aside. On further consideration they passed a resolution at the next meeting very much stronger, and one to which I shall call attention a moment later. But they concluded that they would not report the stronger resolution. The committee laid it aside. They then took up the resolution which I had offered. I did not offer it in committee, but it was taken up, and when it was taken up it was passed in committee, and I was directed to report it; and I did so. At the time I reported it I said to the committee, not to the Senate, that I was apprehensive that the resolution would receive a rather cold reception from the Madrid Government; that they would regard it as an evidence of weakness on our part that, if we took ground on the subject at all, we did not take stronger ground than that.

When the resolution was reported here it was but a day until the cable brought back the response of Spain to it. They decried it as something unworthy of their consideration, a mere effort on our part, they said, to get the President of the United States to exercise his good offices with Spain in order to get the Spanish Government to recognize these outrageous robbers and traitors there as belligerents when they were nothing but murderers and assassins and robbers. That was the temper of the Spanish press. That was the temper of the Spanish Government also in response to my resolution.

The committee therefore toned up a good deal, and the next resolution which they ordered me to report (and that is how I came to be in charge of the next resolution) was this:

Resolved by the Senate (the House of Representatives concurring), That, in the opinion of Congress, a condition of public war exists between the Government of Spain and the Government proclaimed and for some time maintained by force of arms by the people of Cuba; and that the United States of America should maintain a strict neutrality between the contending powers, according to each all the rights of belligerents in the ports and territory of the United States.

That resolution was then taken up. It was amended upon the motion of the Senator from Pennsylvania [Mr. CAMERON], who desired, also, that the President of the United States should exercise his influence or his good offices—I forget the language precisely—with a view to getting Spain to recognize the independence of Cuba. That brought on a debate in the Senate which lasted for more than a month, in which there was considered, as we thought, every possible phase of the Spanish and Cuban question. At the end of that debate there were only five members in one House and seven in the other who voted against the resolution. That fixed the attitude of this body in respect to Spain.

Now, what were we doing then? Were we expressing an idle, academic opinion, or were we treating of the affairs of a great nation and of a possible complication between this Government and Spain? Mr. President, according to my view of the subject, a more solemn declaration was never made by the Congress of the United States than that which passed finally, I believe, on the 6th day of April. It is true that it expresses no more than an opinion; but an opinion is enough upon any question of the political relations between the United States and a foreign Government. This is the political department of the Government of the United States. Let that proposition be controverted as much as it may, and it is answered by one single fact, although it might be answered by a thousand. That fact is that the Congress of the United States has the power to repeal a treaty with a foreign Government entered into by the President and ratified by two-thirds of the Senate, and no power but the political power of a Government can do that. The power of the Congress of the United States to vacate and annul and repeal a treaty, as was done in respect to our French treaty, and the Supreme Court of the United States sustained it, can be nothing else than the supreme political power in a Government.

So the Congress of the United States, in the exercise of that one single power on that one occasion, demonstrated, with the sanction of the Supreme Court of the United States, that it is the political power of the United States. Being such an expression of opinion by an almost unanimous vote of both Houses of Congress to the effect that war exists between the Government of Spain and the Government proclaimed and for some time maintained by force of arms by the people of Cuba, it is a statement of a fact from which we at least can not recede, and which no man in this Government can disobey without denying to the political power of the Government its supremacy upon questions affecting us and foreign nations.

Then we go further and say:

That the United States of America should maintain a strict neutrality between the contending powers, according to each all the rights of belligerents in the ports and territory of the United States.

That is not a mere opinion, or if you count it such it is such a statement of an opinion by Congress that amounts, like every other opinion which is crystallized into a law enacted by these two bodies, to a conclusive declaration of a fact.

Can we repeal that? Can we deny it? Can we refuse to act upon it with justice and honor to ourselves? We deferred to the supposed attitude of the President of the United States in putting the resolution in this form. We did not concede that the President of the United States, when we passed a joint resolution in the form prescribed by the Constitution by a two-thirds vote, would have the right to disregard it, because in doing so he might consult some supposed prerogative power that lies hidden somewhere in his bosom, not in the Constitution of the country. We never dreamed of such a thing, but out of deference to the

President, and in order that the departments of this Government might be as a unit in their attitude toward foreign powers, as they must always be if we do our duty, we expressed it in the form of an opinion, leaving him to deal with the question in such manner as might be most agreeable to him, but not waiving our right nor abdicating our duty to take this subject up and carry it on further.

Why did the President of the United States, after he had sent Mr. Blount to Hawaii and got his report, and after he had sent Mr. Willis there with propositions of which Congress knew nothing at the time, to be submitted to Liliuokalani and afterwards to the government of Mr. Dole, the republican government, refer that question to Congress if he had the supreme, executive power, without our assistance or consent, to do all that he desired to do through the instrumentality of Mr. Blount and Mr. Willis? That precedent stands there to debar the President from the assertion of any exclusive power on his part, in virtue of prerogative rights or other rights, to interfere and to prevent the Congress of the United States from considering a question which is very much like that in some of its aspects, the question that involves the matter of the existence of war in Cuba, and its effect upon the legal status of our people.

In the further progress of this matter in the debate in this body it has been asserted, contrary to the record, upon the authority of some newspaper man who felt it to be his privilege, I suppose, to abuse the truth, that I had risen upon the floor of the Senate and made harsh and unpleasant remarks about the Queen of Spain, something that never entered into my mind. I referred to the Queen Regent merely in connection with her speech from the throne, in which she claimed that the President of the United States, fortunately for Spain, as she thought, was in controversy with the Houses of Congress and in controversy with the people of the United States in respect of their sentiments as they had expressed them about Spain. That is all I said and the only incident that I referred to. That lady, we have cause to know, those who know anything of her at all (I do not know her personally), is a woman of almost unexampled virtue, of very high character, and while she has perhaps less to do with the government of Spain than Victoria has with the government of Great Britain, still she is entitled as Queen Regent, and in virtue of the regency that her womanhood gives to her, to the utmost possible respect, and so every American Senator will treat her, and speak of her, and regard her. If the Queen of Great Britain and the Queen Regent of Spain and the Queen of Italy and the Queen of Greece and the Empress of Germany could meet in the Island of Cuba and witness some of the things done in the name of the royal power upon innocent women and children, little babies in their mothers' arms shot to death by brutal soldiery, you would find that the Christian characteristics of these great and noble women would rise into the majesty of a power that the scepters they yield would be unequal to, and they would strike to death a power in Cuba which enables any man like Weyler to inflict these wrongs upon suffering humanity.

Would to God that the Queen of Spain could be there to see, if the delicacy of her nature could permit it for one moment, the brutalities that are inflicted in her name upon the poor and suffering women and children of Cuba. Then we would probably have no repetition of this thing in the remaining years when we are to stand by, according to present appearances, idle and mute, and witness the continued repetition of these brutal acts in that island so near to our shores. I wish those ladies were there. I wish they knew; I wish they could see it. They would lay their silken hands upon the arms of the brutal soldier who now wields the sword of Spain in Cuba and they would tell him in the name of God and humanity and Christianity to forbear his evil deeds toward those people.

When we took this attitude here in the Senate and passed this resolution it was to be supposed that the Spanish Government would not regard it as an act of hostility. They had no right to regard it as an act of hostility. The resolution was not intended as a hostile act. On the contrary, we commissioned the President of the United States, so far as our consent should give him authority or should persuade him, to go to the Government of Spain and to suggest to that Government some means at least for the pacification of Cuba, which we hoped might extend to its independence. We could not suggest that our President should approach the Government of Spain without suggesting in the same breath that he should do it in a friendly spirit. We did not order him to take the ships down there, and the soldiers, and rectify these things, but that he should go on with his diplomatic representations to the Government of Spain and there lay the whole subject before them for consideration. So the umbrage which Spain took at us for the passage of the resolution was something premeditated on her part. It was the attitude of a man who desires that somebody shall insult him in order that he may get an opportunity of replying or making some resistance. That is the situation.

What then took place, Campos, who is said to be a very valiant soldier and a very able statesman, a Castilian, however, in whom the Castilians in Spain have great interest, was withdrawn from Cuba, not because he had been an inefficient soldier, not because he had not personal courage, for he has a great deal more apparently than his successor, not because he was not true and loyal to his Crown, for which he was fighting, not because he had no influence in Cuba, for he has more influence there than any other living Spaniard. He was commander-in-chief during the preceding war and at the close of it. Cisneros and Gomez and Campos were the men who reconciled Cuba at the end of that great ten-years' struggle. So Campos was withdrawn from Cuba for no reason personal to himself. He was withdrawn for one of two reasons, and Spain can take her choice between them. He was either withdrawn so that there might be sent there Weyler, who, in the exhibition of his cruelty recently in his warfare against the people of the Philippine Islands, had shown that his war was a war of extermination, or else because the Castilians in Spain saw that the hour of fate had arrived, that Cuba was to be lost to the Spanish Crown, and they did not want a Castilian to surrender it. These Castilians have a good deal to do in Spain besides taking care of Cuba. These and other very brave and very competent and very splendid men in Spain during the existence of the previous ten-years' war had dethroned the monarchy and set up a republic in Spain, and that spirit is just as alive in Spain to-day as it was then, and it may be that they want leaders there now who can represent the real people of Spain in their efforts to get a government that is as liberal and as free as their neighboring Republic of France.

Campos did not leave Cuba because he was incompetent and inefficient. He either left it because of the reasons to which I refer now of a political nature existing in Spain or else because the policy of that Government had so changed that Campos could no longer preside over its armies and control them, but it needed some man whose hand was still red with the butchery of extermination in the Philippine Islands to go there. They did not pick a Castilian to go there. They did not choose a man for whom they care anything. They chose a man who would inflict upon those people such cruelties and barbarities of war as have never before been heard of.

Mr. President, it seems that the resolutions that have passed here have been made a pretext for changing the mode of warfare in Cuba, and the outcome of it is of so serious and important a character that I feel it due to the people of this country that the facts that have transpired since that declaration was made should go into the records of Congress, that they may know the ground upon which we have been acting and that we have not in the least degree been influenced by personal motives in our action, but that we have been driven even into the mild position we occupy now by the existence of facts and circumstances that are absolutely undeniable.

Many of our leading journals in the United States have sent their best men, the best men they could select, to Cuba to investigate these subjects, and while the Spanish Government in Cuba has shut them out, with the most extreme care, from all chances of observation, they have with their great enterprise—and I thank them for it, for I am proud of it—penetrated into the truth of matters in Cuba. They have come back here and with one voice over their own signatures they have presented the facts to the people of the United States through the great leading journals on the Pacific and Atlantic coasts and in the South and in the North. Who has risen to challenge the truth of a single statement made by them? When Estrada Palma or some other man representing Cuba here (for I do not know any of those gentlemen at all; I never saw one of them that I know of; I have never had any communication with any of them) came forward in a publication in which he presented the case of the Cubans to the American people and the American Congress, Mr. de Lôme, the minister of Spain, came in with another publication in the newspapers, in which he made the counter representation and undertoook to make an assault upon members of this body for words uttered in debate. That matter has all been gone through, and I do not propose to repeat any part of it at all, but Mr. de Lôme has been here from that time until this, a most vigilant, persistent, active representative of his Government. No man could have been more vigilant than he has been. Here have come these various representations, over the signatures of honorable gentlemen, published in the papers of the United States, and he has made no denial of any of them in the public press or anywhere else. He found the press open enough to him to be able to make an assault even upon Senators. It has always been open to him for any statement he had to make contrary to the statements of these different gentlemen. He has made none. He has made no denial. The fact is there can not be any denial. Some of these witnesses have been before the Committee on Foreign Relations and have been sworn and have testified to their verity.

Under such circumstances I will refer to these different statements, giving the names of the men who make them, and read a

few extracts from each one to show that the characteristics of this war at the present day are just what they were in the ten years war as they were portrayed in the Book of Blood that Mr. Dominguez published and put before the country.

Mr. President, before proceeding to lay before the Senate the statement from the journalist to whom I have just alluded, I will read an extract from Mr. Hamilton Fish, when he was Secretary of State, as to his opinion about the Spanish character in the conduct of the last war:

On the 7th the public journals announced the execution on the 4th of four persons who had been captured on the vessel, one of whom was represented to be an American, who is said to have entered the military service of the insurrectionists in Cuba, and who claimed to hold a military commission from the insurrectionary authorities and to have been in actual military service on the island.

The execution, as it is called, of those persons was forced on with indecent and barbarous haste, and in defiance of all humanity and regard to the usages of the civilized world.

It was perpetrated in advance of the knowledge of the capture reaching Habana or Madrid, and it would seem to have been thus precipitated in cold blood and vindictiveness to anticipate and prevent the interposition of any humane restraints upon the ferocity of the local authorities from the Government at Madrid or its representative in Habana.

This is but another instance in the long catalogue of the defiance of the home Government by those intrusted with authority in Cuba, and adds another page to the dark history of bloody vengeance and cruel disregard of the rules of civilized war and of common humanity which the military and other officials in Cuba have but too frequently made part of the history of Spain's Government and of its colony.

Again he says, writing to the same minister, Mr. Sickles:

While writing this instruction a telegram from Mr. Hall mentions that Habana papers of this morning published a statement, apparently from official sources, that the captain and 36 of the crew of the *Virginius* and 16 others were shot on the 7th and 8th instant.

Such wholesale butchery and murder is almost incredible; it would be wholly incredible but for the bloody and vengeful deeds of which Cuba has been the theater. No government deserves to exist which can tolerate such crimes. Nature cries aloud against them. Spain will be loud and earnest in punishing them, or she will forfeit her past good name.

That is a strong declaration, Mr. President; that is stronger than any that has been made on the floor of the Senate.

No government deserves to exist which can tolerate such crimes. Nature cries aloud against them. Spain will be loud and earnest in punishing them, or she will forfeit her past good name.

If the seizure of the *Competitor* had occurred at Santiago de Cuba or any other place remote from Habana and those prisoners had been captured out of the reach of telegraphic communication, they would have been executed before Mr. Ramon O. Williams, our consul-general, could have interposed his objection, or before our Government could have been informed of the sentence of that naval court-martial. It is only by good fortune that these men escaped so as to have this question relegated to the Government at Madrid and to have their lives preserved until that Government shall hereafter decide upon their fate, either under the present trial or some future trial.

Mr. President, in view of those declarations of our Government, with which Spain seems to have put up without demur or protest—Spain seems to have little care of what the world thinks of her so she succeeds in her purposes—after such declarations as that made in the official communications of the Government of the United States to the Government of Spain, we are to be excused, to say the least of it, if we follow the events of the present war in Cuba and see whether or not by comparison this war is more humane than the preceding war. I affirm upon the evidence which I shall put in this record that it is far from being so humane as the preceding war.

Mr. Weyler was only a subordinate in the former war, and he even had to justify himself in the explanation of his conduct in that war upon the ground that he was a subordinate and had to obey superior orders. Now he is the general in chief, fresh from the slaughter in the Philippine Islands. He plunges his crime-stained sword into the bosoms of women and little children in the Island of Cuba for the purpose of exterminating those people; for, say what else you will about Weyler's policy, it concentrates and it focalizes itself in one single proposition, which is, that the people of Cuba in rebellion need not to be subjugated—that is not the point—they must be exterminated to that degree that hereafter they can not engage in revolt. We have passed that age in the civilization of this world when a war of extermination can be waged against any race of men. Here in the United States we have had to submit to barbarities from the uncivilized Indians from time to time, more or less aggravated in their conduct by the conduct of white men who came in contact with them; but who, when their fury was excited, lost control of themselves, or else came back to their original instincts of savagery, and committed all kinds of depredations that human or devilish ingenuity could suggest. But we have not exterminated those people when we had it in our power. Geronimo, the great Apache, who has slain his hundreds of women and little children, is now a free man upon the Apache Reservation. After we had captured him and put him in Pensacola and afterwards at Mount Vernon, in Alabama, with the people by whom he was surrounded, we gave him the advantages of living with his own family, and the man became so subdued by our example and by our treatment of him that we have got confidence enough in him now to turn him loose upon the Apache Reservation. A more perfect devil incarnate never existed than Geronimo. The Government of the United States instead of exterminating that terrible band allowed them to live and has brought them, even, by the constraints of Christianity, into that condition now that they are worthy to be trusted upon a reservation as free people.

Spain, on the contrary, does not hesitate and has not hesitated, under the orders of Weyler—whether he admits it or not makes no difference—to exterminate the Cubans. The fact is that where Spain goes through her beloved province, the Queen of the Antilles, the Gem of the West, she goes with butchery of every kind and kills in the neighborhood of every place where battles are fought all that she finds there alive and counts them as rebels who have been killed in action. That accounts for the fact, and that alone accounts for the fact, that in the reports I have read here to-day from Spanish authorities of the results of their battles they put down 212 men as being captured when all the balance, it was said, were killed out of thousands. That accounts for it; and they count these women and children and old men whom they kill in the neighborhood of the scenes of their conflicts as persons killed in battle.

These are not false accusations. I am putting these things upon the records of the Senate, and I am doing it under the responsibilities of my regard for reliable proof, and also my regard for the character of the men who have given us this information. I name them; I spread the facts upon these records. Now let Spain come forward and deny them or disprove them. She has not denied the Book of Blood written by Mr. Dominguez, to which I referred in the opening of my remarks. She can not do it. The names of those people who sleep in their graves now, with the date of their execution, the prisoners shot after they had been captured in war, are still upon the records of the world, and Spain is advised of it, and has been since 1873, by that book which was then printed and which has been circulated everywhere in Spain as well as in the United States, and she has never found any reason for denying the fact. She can not justly deny what our American correspondents have sent to the newspapers here.

Great stress has been laid upon the fact that this Cuban Republic did not have a local habitation. Very early in this controversy the Senate was put in possession of a pamphlet by the Secretary of State, which contained the statement of the Cuban cause, which came from the accredited minister of the Cuban Republic to the Government of the United States. That pamphlet contains the constitution of the Republic of Cuba, and shows that its capital is at Cubitas. It contains the whole story of the constitutional organization. It contains the statutes which have been enacted by their legislature, reaching to the personal relations, such as marriage and the like, and the levying of taxation, showing that the government, to the extent of its ability—and that is very wide, wide enough for a provisional government; for the government is provisional, and so claims to be—to the extent of its ability is conducting all civil jurisdiction, through tax collectors and judges and prefects and subprefects, who collect a sort of tax in kind, and have it delivered into the hands of the army and also into the hands of the Cuban soldiers.

Mr. President, at an earlier stage in the discussion of the Cuban question I laid before the Senate a very interesting statement of Captain Mannix, who visited the capital of the Republic at Cubitas, and I think some merriment was had at the idea of these Cubans assembled at the top of a mountain, with their capital at a place where they could be run out or smoked out at pleasure, and undertaking to continue their little Republic up there in the woods and amongst the rocks. Those gentlemen who are merry over that subject have forgotten, I have no doubt, that at one time we lost the Capitol of the United States, standing where we are now, by British forces who came from the Chesapeake Bay, and they forgot to reflect that it is not the location of a central place for the capital nor the strength of that situation nor the grandeur of the structures that constitutes a real capital. However, Cisneros and his Government remained there, and they had a large collection of military stores and some troops to defend them. So on a very recent occasion, I think it was the 26th of May, the whole power of the Spanish Government in Cuba was directed to the capture of the capital at Cubitas, and Dr. Portuondo, who, I believe, is secretary of the interior, writes a letter, the substance of which is given in the Philadelphia Press of Saturday, June 6, as follows:

A second letter tells of the preparations that had been made for several weeks by the Spanish commander in Puerto Principe, General Mella, with the idea of attacking and capturing the naturally fortified rebel capital. Several thousand troops, in addition to the 6,000 already within the province, were mobilized at the city of Puerto Principe, and eight batteries of artillery were placed on the two roads which lead to the south from Cubitas Mountain. General Mella evidently expected that the rocky heights could be ascended from the north, such force as the rebels had at hand could be easily

defeated, and the officers of the rebel Government would seek safety in flight via either one of the narrow roads leading in the direction of Porto Santa Cruz.

Without waiting to attack with his entire force, General Mella sent Brigadier-General Arloso ahead with 2,600 infantry and 400 cavalry to storm the outposts at the foot of Cubitas Mountain, 7 miles from the headquarters of the Government.

The total Cuban force at Cubitas numbered less than 1,000 men, but the supply of arms and ammunition was ample, and a few light cannon were advantageously placed among the huge rocks far up on the mountain side.

ARLOSO'S DEFEAT.

General Arloso left the city of Puerto Principe on May 26, and on the 28th was encamped near the Paso Marti, named in honor of the late Cuban President. He did not attempt an attack that night, but on the morning of the 29th the Cuban guns began a fire and he ordered a forward movement. For two hours the first encircling ridge of the mountain protected the troops, but when Arloso's force reached the second plain a fierce fire from the rocky ramparts above withered his columns and he ordered a hasty retreat. Many of the Spanish dead and wounded were borne away by their comrades, but over a hundred were left among the rocks and chaparral on the second plain.

On the morning of the 30th Arloso moved in the direction of Puerto Principe and a second attack is not expected by President Cisneros. The latter viewed the one-sided battle from the summit of Cubitas and, the letter declares, is much elated over the telling victory.

Cubans in this city acquainted with the natural strength of Cubitas Mountain declare that the entire Spanish force now in the Island of Cuba could not capture the rebel capital, and especially since a sufficient supply of arms and ammunition is stored there.

Now, I suppose that the argument against the locality and the permanency of that capital has disappeared, and at the same time those gentlemen who made a point upon the Republic that it had no permanent capital must now reverse their opinions and concede at least that this action at Cubitas has established the capital there until more power is brought by the Spanish Government than they have been able as yet to direct against that post for its conquest.

After Congress took up this question in February the following facts were laid before the people by our newspaper men:

The first article from which I read is from the Evening Star of April 28, 1896.

The next is a letter from Mr. Grover Flint, April 20, 1896.

The next is Mr. James Creelman's letter of April 30, 1896.

The next is a letter from Mr. Frederick W. Lawrence to Secretary Olney, which has already been published in the RECORD.

The next is Mr. Sylvester Scovel's letter on the 23d and another on the 28th of May.

The next is a letter of Arthur E. Houghton, of May 31, 1896.

The next is a letter in the New York World, June 3, 1896.

The next is a letter of Owen Melton, of June 6.

I desire to incorporate these letters in the RECORD. I do not intend to print the entire body of these letters. That would make the RECORD too voluminous in that particular for the importance of the subject, but I will extract and put into the RECORD, with the permission of the Senate, those points in the letters which show directly the character of the controversy that has been carried on in Cuba.

Now, why do I do this? These papers have been printed. They have been circulated in the United States. A great many people are familiar with the facts recited in our newspapers. But it will be seen that these are statements over the signatures of responsible men. They give time and place; they give all the circumstances which they narrate. They state either upon their personal observation or from conversation with persons who are the important participants, the various scenes which are enumerated and described.

Now, I want Spain to have an opportunity of disabusing the public mind in the United States as to these facts. She can come out through her ministers or through any authorized agent and deny these statements and make any explanation that she desires to. The Senate of the United States and the House have been cut off from an opportunity of having exact information upon these questions. We have not sent any commission to Cuba to make inquiry. In fact, we could not do it without giving offense to Spain. We have not been permitted, except under the censorship of the press, to obtain information from that island in regard to the progress of the war and the character of the war. These correspondents have gone there and written over their signatures to their respective papers. One of them has testified to the truthfulness of statements and he is a very honorable gentleman and a very enlightened one. The statements made by Mr. Lawrence alone, according to his sworn testimony, would be sufficient in the absence of all other proof to establish the horrible character of the war in Cuba. His testimony has already been printed in the RECORD. But incident after incident, fact after fact, in regard to the slaughter of American citizens and noncombatant Cubans are spread out in detail in these statements, and I desire the permission of the Senate to incorporate them in my remarks.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alabama?

Mr. COCKRELL. What is the request?

The PRESIDING OFFICER. That certain letters of citizens of the United States in Cuba may be incorporated in his remarks. The Chair hears no objection, and it is so ordered.

The matter referred to is as follows:

[From the Evening Star, April 28, 1896.]

The Cuban representatives in Washington have received from trusted sources in the island a detailed report of the outrages that have been committed by the Spanish soldiers since General Weyler has become convinced that President Cleveland does not intend to interfere in the present war or extend to the Cubans the recognition of their rights as belligerents which Congress recommended should be done.

The detailed account of recent Spanish outrages is a terrible indictment, as a perusal of its twenty counts will show.

It is as follows: "The column of the Spanish Col. Ricardo Vicuna, shot, in the village of Corral Falso, province of Matanzas, Don José Rogue (not the insurgent officer of that name) because he would or could not tell him where a wounded insurgent was hidden whom Vicuna wished to kill.

"A week ago Gen. José Maria Aquirre routed the infamous Spanish General Melquizo (the assassin of Delgado), and as a revenge for his defeat at Melquizo ordered twelve defenseless men to be shot at the plantation of Rafael Fernandez de Castro. A child of 13 years of age escaped, but was followed by a sergeant of the guerrilla. Finding himself so closely pursued, the boy defended himself by throwing a stone, which struck the eye of the soldier, and such was the pain inflicted that he fell from his horse. At that same moment three other guerrillas arrived at the spot, actually making mince meat of that unfortunate boy with their machetes.

"The sergeant is in the hospital and will lose the eye. The explanation he gives for the loss is that he was hurt by a wire fence.

DETAILS OF DELGADO'S TREATMENT.

"You may have read the case of Delgado, but you are probably ignorant of details. The column of the sanguinary and cowardly Melquizo arrived at the plantation of Delgado, in Bainoa. They took him out of his house, together with seven other men. When Melquizo found out that Delgado was an American citizen he slapped his face several times, although his arms were bound behind his back. Immediately a volley was fired at them. When they fell to the ground another volley was fired. Thinking they were dead, they searched their pockets, and noticing that Delgado's pulse beat, they struck him twice with their machetes, once on the head and once on the neck. Of the eight men six were killed. Of the two who escaped Delgado is one, but he is not able to use his legs. The other one has had an arm amputated. It would be an excellent idea to have Delgado taken to the United States to give an idea of the state to which he has been reduced by those whose victories are only on paper.

MURDER AND ROBBERY.

"The mayor of Corral Falso, Province of Matanzas, Antonio Rodriguez de Rivera, with the aid of his bravos, Marcos Diaz, Santiago Sosa, and Francisco Hermano, violently took out of their houses at night Don Leon Brabo, José Agustón Alonso, Don Celestino Armas, and a colored man 70 years old, called Catin, and in the cruelest manner killed them, throwing their corpses into a sugar-cane field on the plantation 'Sta. Felomena' of Leandro Soler.

"Lieuts. Antonio Fernandez Bonilla and Luciano Cassio, with their guerrillas, killed some defenseless men with the avowed object of robbing them of 350 head of cattle, which they afterwards sold. This deed raised such scandal that the governor of Matanzas, Porset, denounced these two men to the military authorities, but they are still at their posts at the head of their forces and continue their murders and robberies.

"Luciano Cassio is well known as a horse thief, having often been before the authorities in Matanzas for crimes of this nature.

"Fernandez Bonilla is the owner of a livery stable in Pueblo Nuevo, Matanzas City, and, helped by Cassio, he steals the Indian corn from the barracks and hides it in his stable to sell it later. This is a lucrative business. He also is one of the contractors for the Bailen bridge.

AFRAID OF GOMEZ.

"The Spanish general, Bernal, was in Macuriges, a few miles from where the great Dominican (General Maximo Gomez) was encamped, and as he was not very anxious to meet him he marched the other way. As he passed the plantation 'La Flora' of José Sainz, whose nephew, Ynocencio Aguirre, gave him the information that Gomez was near, he accused him of being a disloyal Spaniard because he wished to deceive him. On arriving at La Guira he also insulted a captain of marines and the mayor of the town because they repeated to him the same information, which was true. After losing a great deal of time he went to the place he had been told of and there insulted another officer because he had not given him information about the insurgents. The outcome of all this was that he did not fight the great Dominican. But as he found himself in a difficult position to give to General Weyler his reason why he had not fought with Maximo Gomez he invented an infamous calumny, which resulted in the imprisonment of Ynocencio Aguirre, a Spaniard, who had often fought against the insurgents in 'La Flora.' He was imprisoned in San Sererino Castle in Matanzas. General Weyler has not dared to punish General Bernal. He only changed his zone of operation.

"Geraldo Gutierrez, a Spaniard, proprietor of the plantation 'La Reforma,' was threatened with death by the Spanish colonel, Luis Molina, because he did not approve of the murder of honest workmen on his plantation. Molina was furious. To revenge himself he burned 200 huts of the tenants of the above-named gentleman. This destruction by fire Molina attributed to the insurgents in his official reports, adding that he had in that encounter destroyed the insurgent camp. All this Señor Gutierrez said publicly in Matanzas.

PROTS'S HORRIBLE REVENGE.

"The column of Colonel Vicuna burned the cane fields of the Spaniard Don Jose Suris, and killed the overseer of the plantation. The excuse he gave for this act was that 'he thought the owner was a Cuban.'

"On the 29th of February the Cuban general Maceo routed the Spanish general, Prots, between the plantations 'La Perla y Ponce' (Guamacaro), in the Province of Matanzas. The killed on the Spanish side were 200. The panic among the routed was such that they abandoned their wounded, who were taken care of by the Cuban surgeons. In his flight General Prots passed through the plantation 'Diamante,' and there he avenged his defeat by assassinating peaceful peasants, the following among them: Don Francisco Lautana, of over 70 years of age. Don Antonio and Don Francisco Diaz were violently taken from their houses and killed with the machete. Don Locano Diaz was able to escape this butchery by running to a cane field, to which the Spaniards set fire with the object of burning the fugitive, which, fortunately, did not happen. A short distance from the house the soldiers assassinated Don Antonio Dominguez, and threw his corpse in the burning cane field. The same fate was meted out to Damazo Gonzales, Jeronimo Linares, and an unknown colored man. Among the shot was Don Manuel Montes and four other men, who were in his house; also a lady 76 years old, who was killed so that she might not give an account of this horrible deed. All this was witnessed by a neighbor, who escaped by hiding.

OTHER OUTRAGES.

"Don Ferarando Aguiar, a young man 26 years old, a brother of the district school teacher of Torneguin, in El Roque, province of Matanzas, was in-

famously assassinated on the 9th of February, for which purpose they took him out of his house at night.

"General Aldecoa arrested and insulted Don José Ferreandez, a Spaniard, mayor of La Cidio, province of Matanzas, simply because he did not allow the troops to rob the peaceful citizens of that town.

"General Bernal arrested and sent to the town of Guira de Macurijes 53 pacific men from the district of Manuel Diaz and ordered them to be beaten in the face. The authorities to whom these men were delivered afterwards set them at liberty because nothing was found inculpating them in any crime.

"The mayor of Santa Ana, province of Matanzas, slept all of one night with his feet in the stocks because he refused to allow the troops to commit outrages in his town.

"Four days ago, among the wounded in the encounter of the Spaniards with the party of the Cuban chief José Maria Aguirre was the Spanish chief Sotomayor, and while receiving treatment in the station of Bainoa there arrived a passenger train from Matanzas filled with Spanish soldiers, who brought along a mulatto as prisoner, whom the neighbors guaranteed as to his innocence and loyalty to the Government. But the sanguinary Sotomayor said: 'At a very bad hour has he come; he will pay me some of what the others (rebels) owe me. These pains (from the wounds) I will not suffer unrevenged! Soldiers, you already know what to do!' The soldiers took away the unfortunate mulatto and behind a clump of bushes a short distance away they removed him from the sight of the passengers. What happened there no one knows, except that the passengers saw that the soldiers returned without their prisoner and that they came back wiping their bloody bayonets.

WEYLER'S SECRET ORDERS.

"Lieutenant-Colonel Marquis de Mendigorria, of the Wadro's battalion, who operates in the district of Vuelta Abajo, before leaving for his post, said, in Habana, that General Weyler had given them secret orders to clean out the pacific Cubans wherever found in their marches, and to do it without any scandal.

"The forces which garrison Pinar del Rio City, and which operate in the immediate vicinity of said city, not being brave enough to meet General Maceo, nor even the small band of Roberto Bermudez, who has not abandoned for one single day the road of Coloma, in order to prevent the passage of Conroy, has committed one of the many deeds which have been imputed to the Cubans. They left Pinar del Rio in a strong column, and many of them thought they would have a battle. The result of this march was the total destruction by fire and sacking the estate La Guabina, near Pinar del Rio City. The family Tincheria, owners of the above estate, arrived in the city in the greatest misery possible. All obeyed the proposition to revenge themselves because two young men, members of this family, had left to join the liberating forces. Recent arrivals in Pinar del Rio relate that, besides the above, they arrested a young man named Tincheria, and that he is a prisoner in the barracks even after taking advantage of one of the proclamations of amnesty of General Weyler.

"Without explaining, nor even indicating the cause of arrest, Dr. Antonio B. Zanetti, a Swiss citizen, was detained in Habana the same day that he was to sail for France; he was a passenger en route from Mexico.

HORRORS OF THE MORRO.

"The horrible Morro prisons are not now sufficient to contain so many unfortunates who are unjustly deprived of their liberty. In a room 76 paces long by 12 broad are locked up 132 persons. Consider the situation of these unfortunates, who can hardly move in such a damnable hole. This room is an underground one, and it is with difficulty that either the light or the fresh air reaches it. The dampness is so great that both the floor and walls are always wet. To these 132 persons only 30 gallons of water to drink are given every twenty-four hours. Even though they should drink it up before the next allowance they are not given any more. One day a prisoner who had fever asked for a little more water from the officer of the guard, and this brute answered: 'And you rebels in the field, would you have given water to any prisoner?' As if the good treatment which Spanish prisoners receive at the hands of the insurgents was not perfectly well known. The unfortunate prisoners in the Morro are suffering an epidemic of dysentery, and it is not known if it be due to the ignorance of the resident surgeon or to the refined vengeance. The only medication administered are drops of perchloride of iron in a little water; this without any change of treatment. The food is that of the common soldier, and badly cooked, without change of locality, refusing to isolate sick prisoners from that mortiferous humid atmosphere, to take them to a hospital, saying, as a pretext, that the hospitals are only for the soldiers. All this was witnessed by a reporter of the New York Journal, who was able to mix up with the crowd on one of the visiting days. It would be advisable to have the press proclaim this, so that the people may see what methods Weyler chooses to 'clean out' the Cubans.

"It is now several days that Dr. Mariano C. Artis has been detained and 'incomunicado.' He is a highly esteemed public man, owner of the 'Central Narcisa' en Yaguajay.

"He is in the Castillo del Principe fortress. No one can imagine the motive for his imprisonment, because Artis is a man whom even the Spaniards assure and guarantee that he has not meddled in the revolution or anything else."

Letter of Grover Flint, dated April 20, 1896, in the New York World:

IN CAMP WITH GENERAL LACRET, NEAR BOLONDRON,
CUBA LIBRE, *April 20.*

Satisfaction at the appointment of Fitzhugh Lee is intense throughout the country, in the rebel ranks as well as in the villages and on the plantations. Cubans and Americans believe that the affairs of this unhappy country will now be represented fairly to the Government at Washington, which, they say, will be a departure from the custom which has hitherto prevailed.

Nine noncombatants were killed near Bolondron yesterday. The troops could not catch a party of insurgents they were after, and turned on the country people.

A sample of the general corruption in the Spanish ranks came to my notice yesterday.

Two officers of Lacret's staff sent a pacifico to Bolondron to buy them two palm-leaf hats and a package of cigars. The price of the hats is $4 each everywhere. The pacifico arranged with a Spanish sergeant, who bought the goods in the town, took $8 apiece for the hats and a corresponding percentage for the cigars, knowing they were for insurgents, and smuggled them out through the lines in the coffin of a dead man who was carried to the cemetery outside of the town for burial.

Unarmed men flock to us from every town, begging to be enlisted. In cases where they are in personal danger at home they are taken, and form the army of "impedimenta" that is such a handicap on our movements. If there were arms enough an army of 50,000 men could be put in the field here in Matanzas Province inside of a week.

SPANISH TROOPS WORK DESTRUCTION.

Nine houses have been burned by Spanish troops within a league of our camp in the last three days and as many families made destitute. I rode by the ruins of one house this morning and found a poor woman and her two sons, partly naked, digging for some iron tools among the ashes. The woman told me that the Spaniards had stolen everything they possessed because a party of insurgents had camped on the place the day before. Three of the houses where we have encamped in the last week have been sacked and burned by troops after our departure. Smoke of burning houses is seen on all sides.

Captain Bertrand, son of Colonel Bertrand, of the Spanish army, who is one of Laeret's officers, and who has just come from the North, tells me that two days ago nine pacificos were executed outside of Habana.

Significant of the terror that reigns everywhere, is the case of José de Armas, who has been an American citizen since 1874. On February 15 Vicimar's column passed by his hacienda, the Finca Manjuarier, in Pedrosa, near Volondron, stole 200 head of cattle, 120 horses and mules, all his personal clothing and goods, killed his pigs and poultry, and burned house and outhouses, causing him a loss of $30,000. De Armas has been strictly neutral, but so great is his fear of the troops that he has remained hidden in the woods for two months, dependent on friends and former employees for food. At my suggestion he wrote to the consul at Matanzas, stating his case. He had not done so before, fearing, as a naturalized citizen, that no attention would be paid to his complaint.

At the Finca del Cierno, in this district, yesterday, I saw Juan José Nicolai, a French citizen, and his wife, who told me that on the 10th instant Valdeas's column entered the estate, forced open drawers and desks, ransacked private papers, and stole books, clothing, plate, jewelry, and cooking utensils. Nicolai and his wife, old, gray-haired people, say that they were threatened with death and treated with gross insults by the soldiers. These are cases that come directly to my notice. Others are too numerous to mention.

A PATRIOT HOSPITAL CAMP.

I have been down in the south of Matanzas Province. Where the pastures and cane fields end, and the palm forests and swamps of the south shore begin, is a hospital camp, where the wounded insurgents from all parts of this military district are sent. For a league before you get there you must follow a blind trail over porous, gray limestone, rich with red soil in its crevices and pockets. Here banana trees, pineapples, and the malanga plant, which serves the peasants for bread, grow between the rocks so bountifully that opportunities for ambuscades make it a dangerous country to penetrate. Beyond in the forests is the hospital, a safe little nook and well guarded against the Spaniards, who would enter to bayonet the sick and wounded if they dared.

Dr. Francisco Hernandez, a graduate of the University of Madrid, is physician in charge, and his pretty young wife assists him as a trained nurse. Mrs. Hernandez is a type of the brave Cuban women who have sacrificed every comfort of life for the Cuban cause. She has just returned from the field, where, since December, she has accompanied her husband, riding on her sidesaddle, with Maceo's staff, in every battle the fighting Cuban general has had in the past three months.

A CUBAN CLARA BARTON.

Like most heroines, Mrs. Hernandez is diffident and little inclined to talk about herself. I found her in a hut, built of palm branches, in the camp among the swamps, fighting mosquitoes and tearing lint for the wounded. She is above the medium height of women, well proportioned, with dark hair, dark, honest eyes, and an almost timid manner.

"Do you ever feel nervous under fire?" I asked her.

"Ah, no, señor," she replied; "I feel no fear; because I know one only falls when the time comes—so I couldn't feel frightened, and it makes no difference whether the firing is near or far way. Then I have my duties to attend to, which makes a difference. The first time I was under fire I did feel a strange fascination and interest, and then somebody was wounded near me, and I went to attend him."

"Have you ever seen any of the atrocities that the troops inflict on the country people?" I asked.

"No," said Mrs. Hernandez; "we were always on the march, and the troops followed us killing many poor people and burning houses. I knew of one very sad case, however.

"General Maceo and our staff camped with a very good and kind family at Lomo del Gato. There was an old man and his young married daughter, who had lately become a mother. She was a very sweet woman, and her husband, I think, was with the insurgents. After we left, the Spaniards came and our scouts brought in stories from the country people of what they did there.

SHOT A BABY IN ITS NURSE'S ARMS.

"They entered the house of our kind friends, sacked it and cut the old man down with machetes. They killed an old negro servant and two mulatto farm hands, and left their bodies by the road unburied. The daughter was in the room when they killed her father, and she tried to rush between them and the old man. They cut her about the right arm, which she raised before her face, and wounded her with thrusts of bayonets. The nurse ran to the door and held up the little baby before her, begging for mercy. A soldier, standing outside, shot the infant dead. The daughter refused to be cared for by a Spanish surgeon, but they put her in a shed—for they had fired the house—near by, and the regimental surgeon ordered quicklime put on her wounds. She died from shock and pain.

"This is the story the peasants tell in Lomo del Gato. You hear such stories all over the island—I believe it is all true, though it seems incredible that people could act so nowadays."

I asked Mrs. Hernandez if there was no less exposed place for her than at Maceo's side in action.

"There is no other place to go, even if I wished," she answered. "Our headquarters is the saddle, and at night we stop wherever we happen to be. Then, you know, I am not here for my own comfort."

At night Mrs. Hernandez sleeps like any Cuban soldier, in a hammock between two palm trees, or under the porch of some cottage. She is never fatigued, she says, because she has too much to do. As for the men, they bless the ground she walks on.

She has been in Maceo's hardest battles. She was at Paso Real, where General Luque was wounded and his column driven back before a charge of 2,000 of Maceo's cavalry. At Rio Hondo she was in the first ranks of the skirmishers, who accounted for 54 Spaniards in three hours and laid their bodies side by side on the highroad. At Maralitos and Jesus Mazareno she rode tirelessly under an all-day shower of lead, when the insurgent army engaged three Spanish columns. She was at Jaruco, when the town, after a short siege, was sacked and burned. It was here that the troops entered after the insurgent forces had retired, shot down 17 noncombatants, whom they dragged from their houses, and sent 13 more to the dungeons of Morro.

Letter of James Creelman, dated April 30, 1896, in the New York World:

[Copyright, 1896, by the Press Publishing Company, New York World.]

[Special from a staff correspondent.]

HABANA, CUBA (via Key West, Fla.), *April 30.*

I have personally investigated the deaths of the following peaceful white men, who were shot without trial at Campo Florida, near Habana, on the afternoon of April 3:

Margarito Zarzas, aged 24 years, single, blacksmith and carpenter.

Ramon Castelianos, single, aged 33 years; poultry dealer.
Joaquin Medina, aged 45 years, married, farmer.
Camilo Cejas, aged 25 years, single, fisherman.
José I. Cejas, aged 28 years, married, fisherman.
Manuel Martinez, aged 38 years, married, farmer.
Domingo Lugones, aged 35, single, native of Montevideo, Uruguay.
Jesus Ochoa Rodriguez, 25 years, single, blacksmith.

Between April 13 and 22 the following peaceful inhabitants were taken from their homes and shot on the Fierabras road, between Campo Florida and Minas:

Margarito Verole, a farmer's boy, 14 years old.
M. V. Collina, aged 44 years, married, merchant.
J. Caballin, aged 45 years, married, merchant.
Benigno Galloso, aged 40 years, single, farmer.
A son of Galloso, aged 25 years, single.
Eduardo Sardenes, aged 37, married.
Cruz Ferrer, 42 years, married, farmer.
Inocente Rabell, 40 years, married, cheese maker.
Florencio Rabell, 35 years, single, cheese maker.
Basilio E. Rubio, 46 years, married, farmer.
Eleno Guerra, 33 years, married, farmer.

The victims were all white. Their bodies were thrown into a huge sugar boiler, which lies half buried on the roadside on the land owned by J. Cabrera.

Here is a list of white men shot without trial in the same neighborhood, opposite the Jesus Maria grocery store, on the Arango estate:

Martin Sosa, single, farmer.
Andres Guillama and his assistant, both married and farmers.
Francisco Diaz and son, farmers.
Leonardo Llerena, farmer.
Luz Guttierrez and son, farmers.
Caridad Reys, farmer.
Francesco Ferrer, farmer.
Benito Bueno, farmer.
Julio Hernandez, father of 12 children, farmer.
Abelardo Cartaya, farmer, and three others whose names I can not ascertain at present moment.

Most of these were taken from their plows. The following noncombatants were also shot without trial and thrust into the sugar boiler on the highway to Minas:

Mr. Macho, a mulatto, 71 years old.
Timoteo Ceferino, son of the foregoing, aged 17.
Castellanos, 35 years, married, arrested on his way to Habana market.
Matias Darias, arrested on his way home after selling his goods.
Juan Machina, married, farmer.

ASSASSINATION.

The shock which cracked the massive walls of the palace Tuesday was the first answer of the Cuban nation to the Spanish campaign of massacre against unarmed peaceful inhabitants in the interior.

A member of the patriot organization in Habana prepared a dynamite bomb some weeks ago and offered to destroy the captain-general with his own hands. But the leaders refused to sanction the plan, even as a war measure. With Maceo in the west, keeping 50,000 Spanish soldiers out of the main field of war, with Gomez marching westward toward the entrenched and cannon-crested trocha at the head of a large force carrying six pieces of artillery, and with Calixto Garcia commanding the insurgent forces in the East, where the recruits are drilled and organized, the friends of free Cuba believe they can drive the Spaniards into the sea without resorting to assassination.

BUTCHERIES.

But horrible stories of butchery have been brought here by responsible men from all parts of the island.

As I have made an honest and impartial investigation, I can no longer keep silent about the appalling crimes which cry out to the civilized world for intervention. I have refused to believe that Spanish soldiers were deliberately exterminating the male population of the country districts, but I must yield to the evidence of unimpeachable eyewitnesses. The situation is horrifying, unspeakable almost. It can not be possible that General Weyler knows the facts. He seems to be a brave and intelligent officer, and he has won his high place by brains and energy. With the heavy responsibility of the war resting on him, he could have no intelligible reason for ordaining barbarities which swell the ranks of the insurgents by thousands and drive hundreds of old men, women, and children into the larger towns and cities to be a burden to the Government.

MURDER, NOT WAR.

I prefer to believe that the captain-general has been deceived by officers in the field, who are killing noncombatants indiscriminately and reporting victorious engagements with insurgent troops. Everywhere the bread winners of Cuba are fleeing in terror before the Spanish columns, and the ranks of life are being turned into ranks of death, for the Cuban who has seen his honest and harmless neighbors tied up and shot before his eyes in order that some officer may get credit for a battle, takes his family to the nearest town or city for safety, and then goes out to strike a manly blow for his country.

If Mr. Cleveland could have heard the terrified Cuban women trooping with their children into Gunabacoa yesterday asking me whether the United States would allow Spain to slay the whole population, their appeals might not have been in vain. What could I say to the wretched fugitives? Who can read the President's mind? I know that he is not indifferent, for there is abundant evidence that he is investigating the question here through private and indirect sources.

FACTS FOR PRESIDENT CLEVELAND.

But his informants have so far dealt only with the economic question and the possibility of framing a scheme of peace that will be pleasing to Spain. I have seen copies of many of the letters read by the President, and so far as the economic aspect of the great struggle is concerned, he has had the advice of experienced and responsible men, most of them favoring annexation to the United States. But while the President and Secretary of State are immersed in the abstractions of the commercial problem the insurgents are turning the island into a waste of ashes, and the Spanish soldiers are slaughtering noncombatants wholesale against every rule of civilized warfare.

It is not the captain-general's fault. He is overwhelmed with work in the palace. The world has seldom witnessed such a war. He can not be everywhere. His reputation for harshness makes the relatives of the victims fearful of approaching him lest they, too, may meet the fate of others.

Witnesses of these butcheries from the country shrink and grow silent when they are questioned. They are dumb with fright. I have only succeeded in getting them to talk by convincing them that their names will not be revealed at present. In every case I have been careful to ascertain the reputation of the witnesses for truthfulness.

Senor de Lôme, the Spanish Minister at Washington, would believe the facts in spite of himself if he had the evidence now in my possession. Nor have I confined my investigations to the peasants. Educated planters tell the same story, those of them whose positions will permit them to speak about the subject at all.

SKIRMISHES TURNED INTO BUTCHERIES.

Within an hour I have talked with one of the most conservative plantation owners on the island, and he told me that laborer after laborer has been gathered up on his estate within the last three weeks and shot on the roadside without trial of any sort. In every case newspaper reported skirmishes with the insurgents, and this in the closing days of the nineteenth century.

I have been in the neighborhood of Campo Florado, a village a few miles east of Habana. This has been the scene of almost incredible crimes, committed by the Spanish troops and recorded as military victories.

The highway leading from this district to Guanabacoa is crowded with fugitives in ox carts and on foot, principally women and children. They report almost daily murders by the Spanish soldiers. Night before last 14 inoffensive men were tied up and shot just outside of Guanabacoa. The sentries on the limits of the towns refused to allow any outsider to go where he is likely to witness the work of the firing squads. Guanabacoa is packed with bewildered and half-starved country people. Many of them sleep in the streets.

Two days ago a Cuban woman who fled from the town in terror gave birth to a child on the porch of a grocery store. The massacre of noncombatants at Campo Florida began on April 3, and since that time about 800 men have gone to the insurgent army from a district 15 miles in circumference. Most of them were armed, but a few joined the patriot forces with nothing but heavy sticks.

About a hundred quiet and inoffensive men have been shot without trial in the neighborhood of Campo Florida. Their neighbors were helpless to save them. Those who fled for protection to the Cuban ranks were led by the rebel chief Valencia to Balondrone, in the Province of Matanzas, and will join the forces under Gomez. Several unarmed peasants were shot without trial at Guanabo, near Campo Florida, six or seven days ago, and the soldiers did not take the trouble even to bury them. I have talked with a farmer who saw dogs and vultures eating the bodies.

A SURVIVOR'S STORY.

Here is the statement of an eyewitness: "These eight men (whose names are first given at the head of this dispatch) were arrested on April 1 and 2 by Lieutenant Sequi, assisted by two soldiers and a municipal guard, who has since been hanged by the insurgents. They were all innocent, hardworking people. I saw the soldiers tie their arms and take them to the police station. Margarito Zarzas, who was arrested just after he had completed a coffin for a woman, was dragged to the station with a rope around his neck. I was told that the prisoners were beaten, but I did not see that. Next day the nine prisoners were marched to a small fort made of loose bricks on a hill overlooking the railway track. I heard that they were to be put on a train at 1.30 o'clock in the afternoon and carried to Habana, and I went to the track to see my neighbors depart. As I approached the railway I saw Lieutenant Sequi and two soldiers hurrying toward the little fort on horseback.

"When I advanced I could see a double rank of Spanish soldiers of the Princesa Battalion stretching from the foot of the hill on which the fort stands across the track to a small gully about 7 feet deep. Beyond the gully is a large cedar tree, and between them was a freshly dug trench. It made my blood run cold. I knew what the trench was for. To the right of the gully was a line of soldiers. Presently I saw the two Cejas brothers leave the fort surrounded by soldiers. They were taken across the track between the double ranks and down into the gully out of my sight. Then I heard a volley fired in the gully. I ran home and ordered my wife to conceal the children and lock the doors of my house.

"The screaming of the prisoners in the fort, who had heard the volley, induced me to approach the track again. This time I saw Domingo Lugonez and Margarito Zarzas brought down the hill. They were tied together. Lugonez was crying. I could hear him scream again and again: 'For the sake of your own mothers don't kill me! Have pity on me! Oh, my good mother, my poor mother! For God's sake don't kill me!'

"The prisoners were driven into the gully and again I heard a volley. After that I stayed with my children. We could hear other volleys as each of the prisoners was taken out and shot. Then the train arrived from Habana, and just before it reached the village I heard two quick volleys and two single shots. That day I left the place with my family. The troops were killing all my neighbors.

"The orders are given by the military commandant of Minas, whose name is Narciso de Fondesviela. This is a plain statement of the facts. On the next day the official reports declared that the Spanish troops at Campo Florida had ambushed a body of insurgents and killed 10 of them without losing a man.

"Four days ago the soldiers shot José Flores, a married farmer, and Feliciano Sosa, married, carpenter, 38 years old, and also threw their bodies into the boiler. Since then the troops have been forced to dig a trench for the corpses, and the odor from the decaying bodies in the boiler prevents them from going near it."

I have confined my dispatch to one little farming district close to Habana. The same stories reach me from all parts of the island. But I have set down nothing without investigation. Imagine the scenes in the interior. No wonder foreign correspondents are not allowed to accompany the Spanish columns and are nearly all bottled up in Habana.

I take no sides in this war and have no wish to harm the Spanish name. Many of the royal officers are men of fine character. But it is time to let the world know that America has an Armenia almost within sight of her shores.

In spite of reports to the contrary, I have high authority for saying that the Pope regards the insurgents as legitimate belligerents, and not as bandits. General Maceo has sent word by a priest to the Bishop of Habana, Manuel Santander y Frutos, that he would respect and protect all priests. The Cuban leader also assured the bishop that he was a good Catholic and would remain a faithful son of the church.

The bishop has also learned that Lacret, the rebel leader, recently entered a church in the country and prayed before his soldiers. The rebels entered Cardenas in disguise on All Saints' Day and mingling with the crowd in the cemetery lit candles and knelt at the graves in prayer.

WHAT WILL CLEVELAND DO?

The main Cuban army under Gomez has printing press and official newspapers. I can not say that there is any obtainable evidence to support the claim that the Cubans have a regular civil government with a fixed abode and fixed territory, but I can say that the insurgents are growing in power; that they do not as a rule molest noncombatants and respect the rules of civilized warfare. I can also say that the general massacre in the country districts is stirring the blood of Cuban property owners who have hitherto held aloof from the struggle, and that unless a change occurs within a few weeks some of the most important men on the island will be found in the field fighting against the Crown of Spain.

President Cleveland has never yet failed to show his American blood on proper occasions. If he will appoint a commission and send it to Key West, hundreds, nay thousands, of persons will leave Cuba to bear witness to the facts.

The widows and orphans of the freshly slain pray for American protection, even at the Cathedral altar, where the baptized flag and cannon representing Spanish dominion stand facing the tomb of Columbus.

Letter of Sylvester Scovel, dated May 23, 1896, in the New York World:

CUBANS RETURN GOOD FOR EVIL—SPANISH SPY LIBERATED BY INSURGENTS IN THE FACE OF BEATING AND MURDER OF THEIR FELLOWS.

[Special correspondence of the World.]

NEAR GUANAJAY, PINAR DEL RIO, CUBA, *May 23.*

Outrages continue in this district.

A Spanish column beat two men May 20 and severely injured a boy with carbine strokes.

Another Spanish column killed in cold blood on the 21st, and in his own house, a peaceable laborer wholly unconnected with the insurgents.

To-day (the 23d) the insurgents of the same district, with full knowledge of the maltreatment of their fellows, set at liberty a Spanish prisoner who admitted that he was a spy.

These events have taken place within a few miles of each other. The trial, confession, and liberation of the Spanish spy I heard and saw. In proof of the Spanish outrages I submit written evidence, besides having interviewed many other eyewitnesses thereto.

It must be understood that the witnesses with whom I have talked, and especially those who have signed their names or made their marks, have done so at the risk of their lives.

The officers of the columns mentioned will surely hear from Habana in consequence of the World's exposure of their acts, and, unless restrained by the fear of further disclosures, are very likely to take Spanish vengeance upon all who have been seen to talk with the World correspondent. In this event I have arranged for the news to be sent to the Habana correspondent of the World, so that the public may still be kept informed as to the results of an indiscreet word in Cuba.

The signatures naturally can not be reproduced or the names be printed. For this the "pacificos" accepted the promise of the World, with the proviso that the proof shall be open to the inspection of the State Department at Washington.

BOY BEATEN WITH A CARBINE.

The following is a translation of the simply worded account of the injured boy's father. It was taken down in Spanish, word by word, afterwards read to the man, and then signed by him. It is also witnessed:

"COFFEE PLANTATION, SAN FRANCISCO,
"JURISDICTION OF GUANAJAY,
"*Province of Pinar del Rio, May 21, 1896.*

"By these presents I declare that yesterday, in the morning, on the approach of the column of Colonel Francis from Mariel to this place, La Merced, they spoke to my son, 18 years old, asking where the insurgents were, and when he answered that he did not know, one of the soldiers, in the presence of his chief, struck him five or six times with the barrel of his carbine, leaving him very badly injured. My son suffers much to-day.

"A part of the column went to the house of my neighbor, Domingo Guanche, and asked him if he knew where was the insurgent 'hospital of blood' in the 'Manigua.' On his answering that he did not know, an officer beat him with a cane which he carried, afterwards making him act as a guide.

"Coming again to my house, the troops asked me if I knew of a hospital. I said I knew that there was one in Mariel and another in Guanajay, and then they beat me with a cane."

(Duly signed and witnessed; original document in Spanish in possession of the World.)

Both men mentioned—the lad's father and his neighbor—bear the marks of a severe beating with a heavy stick.

The boy is seriously injured. He can not use his arms, and one of them feels as if it were broken. His back is badly strained, and he may be permanently crippled. The carbine used was evidently heavy and swung with great force. The boy will be certainly disabled for months, perhaps for life.

The insurgents aver that on the 20th there were no parties in the vicinity of La Merced. In this case the boy answered truly that he did not know. However, he would probably have answered the same if he had known. I asked him how he felt. He said:

"It is nothing. It is for Cuba."

In connection with the reported Spanish massacre of wounded Cubans, the query of the officer about a "hospital de sangre," or place where some dozen or so badly wounded might be found, is terribly significant.

The answer of Domingo Guanche is what is to be expected in respect to his countrymen wounded in fighting for his freedom and theirs.

The signer of the statement says naively, "And then they beat me with a cane." They naturally would be a little angry in view of the fact that the two hospitals mentioned are full of their own comrades. The Cuban showed some sense of humor and much nerve in this answer.

SLASHED FOR FUN, THEN SLAUGHTERED.

The other case, that of murdered José Dominguez, is a plain outrage without palliation. The man was sitting by the open window, his child on his lap, when one of the guerrillas in mere wantonness leaned out of his saddle and slashed him on the arm.

Whether Dominguez was foolish enough to protest or whether the sight of blood aroused the inborn man-devouring instinct of the Spanish lion, I do not know. But it is certain that then the infantry took him from the house and killed him.

The following statement, signed by six villagers, is given literally in their own words:

"TOWN OF BANES, *May 23, 1896.*

"We, with our signatures, do declare that the resident of Banes, D. José Dominguez, was killed by the Spanish troops in the town street of San Pedro about 8 o'clock in the morning of the 21st day of the present month, while sitting in his house by the window. They gave him a machete cut on the arm and then took him from the house and killed him, inflicting eleven bayonet strokes and leaving him covered by a jagua; for they said he was an insurgent.

"We further declare that he was an honest man and a laborer and had nothing to do with the war, nor had he dealings about it with anyone. Neither had he arms or ammunition in his house, and all that has been done to him was unjust.

"An injustice has also been done to us and other honorable neighbors. The troops—the column of San Quintin—took from the houses clothes, books, and whatever they wished.

"For justice we give this letter in Banes on the above date."

Every one of the signers is likely to prove his veracity with his life.

I also talked with many others of the villagers, and without exception all emphatically stated that Dominguez had absolutely nothing to do with the insurrection more than having a cousin in the rebel ranks. It is not even likely that the soldier who first cut him knew this. The whole thing is plainly a killing out of sheer love for it.

The murdered man leaves a widow and four children. The widow has moved from Banes.

The "jagua" mentioned as being put over the body was a slab of palm bark, evidently placed there as a satirical intimation that so much burial would be quite sufficient for a Cuban.

INSULT ADDED TO INJURY.

Not satisfied with the actual killing, I have found in each of the Spanish outrages I have seen the same attempt to insult and desecrate the most dear and sacred feelings of the living Cubans.

That these do not in their frenzied anger retaliate upon the many Spanish prisoners they take is as wonderful as it is praiseworthy. It is a question, though, whether the Cubans can contain themselves much longer. Already the rank and file are demanding retribution, and it need surprise no one should they take it. Even the officers feel that their consistent and persistent curbing of their men's natural desire for revenge has done them no practical good, and that had they from the first retaliated in kind perhaps Spain might have been forced to humane treatment of Cubans.

I said to an intelligent sergeant: "Yes, but think of the good effect your moderation is having on the people of the United States."

"What good has it done us?" he asked. "Has the American Government recognized us or done one thing toward preventing Spain from wholesale murder?"

PUZZLE IN POPULAR GOVERNMENT.

I answered, of course, that although the Government might be a little slow in moving, the people of the United States have much sympathy for the Cubans and their cause. This seemed to puzzle him a little. After a moment he said:

"Why, I thought the United States was a Republic."

"It is," said I.

"I don't see how it can be," he retorted, "for certainly the government of a republic must carry out the wishes of the people. You say the people of the United States wish to help us. Then why don't their Government do it?"

I could not answer him.

Dominguez was buried by a friend shortly after his death. While engaged in digging the grave in the cane field he was shot at by another passing column.

The grave can hardly be distinguished from the surrounding partly cut sugar cane, except for the prickly cactus bushes placed upon it to guard the body from desecration by the "auras" or vultures, that are plentiful in Cuba.

The group of Cubans is just of the appearance of the average small party of district revolutionists.

SPANISH SPY SET FREE.

In sharp contrast to the beaten men, the injured boy, and the murdered Dominguez killed by twelve separate cuts, is the treatment by the Cubans of the Spanish spy, Juan Martinez. He was set at liberty before he was asked to write or declare anything, and the request for the letter which follows was made by the World correspondent:

"ENCAMPMENT EL FRANCES, *May 23, 1896.*

"By the present document I declare that on the 18th of the present month I was made prisoner in the courtyard of the sugar estate San Gabriel by two members of the fuerzes libertadores de Cuba, commanded by Commandant Baldomero Acosta, and that during the time I have been kept in the camp I have received good treatment and have been surrounded by cares and attentions and have been looked at with respect.

"I declare, also, that I was captured in possession of arms and ammunition in country dress, and that in military law I am considered as a spy.

"I admit that the Cubans have the right of life over me, and that in setting me free I think very highly of their generosity.

"Signatures of Spanish spy and witnesses."

The man was trembling with joy. His letter shows it. He was hardly "surrounded by cares and attentions" any more than lurk in the muzzles of a couple of carbines, but the poor devil evidently tried to get even with his generous captors by generous praise.

The man admitted to having been sent to locate the Cuban camp near San Gabriel, and he has been set free to go where he will—even with a safe conduct that will pass him through the insurgent lines to his home in safety.

Acosta has done well. Instead of killing one Spaniard he has made one Cuban, or at least a friend to the Cubans, for if ever there was a grateful man this was he. He had reason to be. Beyond taking his arms and cartridges the Cubans did nothing to Martinez, exacted no promise from him other than not to again bear arms against them.

The quotation "fuerzes libertadores de Cuba" means "the liberty forces of Cuba." This term is always used by the revolutionists in speaking of their soldiers.

With the beating, injuring, and killing of absolutely inoffensive "pacificos" on one side and the most generous surrender even of military rights for humanity's sake on the other—the former the strong, the latter the weak—why should the United States hesitate to stop the reign of terror on this island at her gates.

Letter of Sylvester Scovel, dated May 28, 1896, in the New York World:

[Special correspondence of the World.]

MARIEL, PINAR DEL RIO, CUBA,
May 19 (via Key West, Fla., May 28).

Three sickening cases of post-mortem mutilation I saw to-day, so beastly, so indecent, no Apache could have conceived anything equal to it.

Playa Salade is on the north coast of Cuba, about 15 miles east of here. Forty armed and 20 unarmed Cubans were camped there last night under command of Rufino Orra, a subofficer of Baldomero Acosta, the Cuban chief of the district on the north coast from Mariel to Habana. There was aguardiente (brandy) in camp, a woman was visiting the officer in charge, and there was no guard. In fact, it was the most loosely conducted "outfit" I have ever seen, even among the small parties of insurgents in Cuba. For his actions the commanding officer has been severely disciplined. General Gomez or General Maceo would have had him shot.

In justice to the Cubans in the field I must say that this sort of thing very seldom happens. Indeed, morality in camp and well-posted guards are two of their most shining virtues.

The camp was also very badly situated, with the sea on one side and flat, open ground on the other three, the only cover in case of sudden retreat being sparsely scattered bushes.

In some way the Spaniards were informed as to the location of the camp, and before daybreak to-day the regular infantry battalion of San Quintin, 800 men, and the volunteer cavalry of the guerrillas of Miro, 300 horses, left headquarters at Punta Brava for Playa Salade, arriving just at daybreak. Without warning or a call for surrender the 1,100 Spanish soldiers poured

nickel-cased bullets into the groups of sleeping men and the three or four rude bough tents. The storm of bullets should have killed six times 60 men.

The dazed Cubans could not reach their horses, so they scattered on foot. The 300 guerrillas then charged the fleeing groups. The cavalry charge alone ought to have finished the business. Will it be believed when I state positively that only four Cubans were killed and half a dozen slightly wounded? Yet such is the fact.

This little occurrence merely adds to the evidence of every engagement of this war that the modern rifle and ancient drill tactics do not work well together, at least with Spanish forces.

The victorious troops then proceeded to capture the woman as their only prisoner.

The Spanish officer commanding wrote his official report, and the men began to amuse themselves with the four dead rebels. I saw what was left of these poor bodies immediately after the troops had left for Punta Brava.

The skulls of all were split to pieces down to the eyes. Some of these were gouged out. All the bodies had been stabbed by sword bayonets and hacked by sabers until I could not count the cuts; they were almost indistinguishable.

The bodies had almost lost semblance of human form. The arms and legs of one had been dismembered and, laced into a rude attempt at a Cuban five-pointed star, were satirically placed on the breast of the limbless form.

The tongue of one had been cut out, split open at the base, and placed on the mangled forehead in a ghastly likeness to a horn. Fingers and toes were missing.

All the bodies were further mutilated and again arranged in a manner so indescribably repulsive as to prevent description.

Two of the mouths were split back to the angle of the jaw so as to give an untellably ghastly grin to each mangled face.

And the ears of all were missing. These could not be found and I was forced to the conviction of what I had often heard, but never believed, that the Spanish soldiers habitually cut off the ears of the Cuban dead and retain them as trophies. Our Indians were more cleanly than this.

During General Campos's time I only saw three dead Cubans after Spanish treatment. They were at Seiba del Agua and were mutilated, but not so horribly as those of to-day.

It is the certainty of post-mortem mistreatment that makes the Cubans so careful about removing and burying their dead, as already described in the World. To see these poor minced-up bodies, to note the bestial indecency of the details, to think that it had all been done but a few moments ago by the well-disciplined soldiers of a supposedly civilized nation, to know that it could not have been done except by the consent of the Spanish officers and "gentlemen," all combined to create such a maddening feeling that the most moderate pencil in the world would have to go hunting for terms strong enough to tell it.

If the plain people of New York could have seen those four proofs, irrefutable proofs, of Spanish barbarity, word would go to Washington so strong that Grover Cleveland would have to do something, and do it quickly.

The Cubans, on the other hand, have always treated their prisoners well, and they have taken many more than have the Spanish, official reports to the contrary notwithstanding.

I have just received a Habana paper containing an account of this very affair of Plaza Salado. The sheet has as strong a Cuban tendency as the Government press censorship will permit, so it may be taken for granted that the actual official report is even more of an elaborate fancy. The article is better than common. It has the names and the date correctly given.

However, it gives the Cuban dead found on the field as 17. As 4 from 17 leaves 13 there seems to be room left for argument. Fifteen dead horses are also said to have been encountered. There were 7 by actual count. One slight wound is admitted. As the 60 Cubans must have fought pretty sharply to have got away so well it is quite evident that somebody must have been hurt whom the official report forgot.

The report is a fair sample of all of its species, big and little. Scale everything but names, dates, and places down about 90 per cent and you are somewhere near the truth and a little on the Spanish side of it.

The Cubans are as a rule nearly as bad, although denied the benefits of steady practice in mailing official reports, as it takes about a month to get a courier from this end of the island to the government in Puerto Principe.

From here heavy firing has been heard from the trocha almost every night. It is supposed by the insurgent leaders that General Maceo is making a demonstration upon Guanajay in preparation for an attempt at crossing this military line.

It is actually much more of an obstruction, especially to cavalry, than any of its predecessors, and the weak points have been closed. However, the general belief among the insurgents is that General Maceo can cross when he will.

All talk about the longed-for belligerent rights. Whether or not in the letter of the law the Cuban insurgents deserve such a recognition, surely in the name of humanity alone there is more than sufficient cause for intervention.

It is the Cubans' hope. It must come sooner or later. Why not now?

—

MORE HORRORS IN CUBA—NEW SPANISH BUTCHER IN CIENFUEGOS MURDERS HELPLESS FARMERS.

Señor Buenaventura Carbo, who for many years has been secretary of the American consulate in Cienfuegos, is now with friends in Brooklyn. Mr. Carbo was suspected of sympathizing with Cuba's cause and was in consequence exiled. His story of Spanish outrages adds more proof to the accusation against Spain of dreadful brutality.

"Eugene Pelletier," said Mr. Carbo, "who was employed on the plantation of Antonio Reguera, is registered on the books of the American consulate in Cienfuegos as an American citizen. Last November he was arrested on suspicion and thrown into the filthy Spanish jail in Cienfuegos, from which he was only recently released.

"The terror of Santa Clara is the guerrilla troop of Luis R. Yzquierdo, who was formerly a clerk in the custom-house at Cienfuegos. He is known now as the 'monster.' On April 2 his troop came upon a party of Cubans repairing a cottage in Lagunilla and shot José Quintana, Matias Soto, Manuel Roque, and Philomeno Hernandez, who were in the party.

"At Manacas, on May 16, José Cardoza, a farmer, and two of his negro servants were hacked to pieces with machetes by Yzquierdo's orders. They were suspected of being friendly to the Cuban cause."

Letter of Arthur E. Houghton, dated May 31, 1896, in New York World:

[Copyright, 1896, by the Press Publishing Company, New York World.]

[Special cable dispatch to the World.]

MADRID, SPAIN, *May 31.*

The Madrid Government has lately called the attention of the other European powers to the alleged cruel and inhuman mode of warfare adopted by the Cuban insurgents.

Complaint is made specifically of the use of dynamite to blow up railway trains (those carrying passengers as well as freight) and sugar mills, and of the use of explosive bullets in fighting.

The European Governments have instructed their consuls in Cuba, it is stated authoritatively, to report promptly and fully upon these allegations.

WANT CUBANS REGARDED AS PIRATES.

Spain hopes some action will be taken to declare the Cuban insurgents pirates and malefactors, unworthy the sympathy of any civilized nation.

General Weyler has ordered the Spanish authorities in Cuba to continue to grant relief and rations during two months to distressed inhabitants who have taken refuge within the Spanish lines, but the families and relatives of insurgents will not only be refused relief and rations, but will be immediately expelled from the Spanish lines, which will make them heavy incumbrances upon the rebels during the rainy season.

COMPETITOR SENTENCE LIKELY TO BE UPSET.

As soon as the papers in the *Competitor* case reach Madrid by mail—they are expected about June 4—they will be submitted to the supreme court of naval appeals.

The impression in official circles is that the sentence of the Habana court-martial is certain to be annulled on the ground that it is in violation of the treaty of 1877, and that the case will be sent to an ordinary court-martial for trial, subject to the stipulations of that treaty.

Letter in the New York World, June 3, 1896:

[Special correspondence of the World.]

SANTIAGO, CUBA, *May 25.*

The guerrillas of the Spanish Colonel Tejeda are the terror of Songo, Dos Caminos, San Luis, and Palma Soriano. Within the last few days they have assassinated more than twenty men, women, and children. Among the most brutal murders is mentioned that of an old man, 70 years of age, named Luluto Sanchez, who lived a few miles from Songo, with his wife, Clara, aged 62. A company of the guerrillas appeared at the Sanchez house on the morning of the 21st and inquired if the insurgents had passed there. The old man answered that neither he nor his wife had seen any. The captain of the guerrillas then ordered that husband and wife should be tied to a tree. By his further orders some of his soldiers put out their eyes and afterwards killed them with machetes.

Another instance of barbarity was the murder of a mother, two grown daughters, and a little child named Garcia, whose only crime was that the husband of the former was in the field with the insurgents. This family lived in the neighborhood of Dos Caminos. Twenty guerrillas, under a sergeant, went to the place, and, after insulting the mother, assaulted the younger ones, and then killed all of them and set fire to their house.

The Spanish Lieutenant-Colonel Molina, with two companies of regulars and the guerrillas of Caney, 300 men in all, had an engagement yesterday in Loma Villalon and Retiro (Caney Zone) with 700 insurgents under the brothers Quintana. The fight lasted two hours. The Spanish had 20 killed and 67 wounded, and the rebels 8 killed and 14 wounded. Among the Spanish wounded was Lieutenant Vazguez, very seriously.

On the 18th the Spanish Captain Imbert attacked the rebel camp San Andres (Guantanamo), and after a hard fight dislodged the insurgents, who left 10 killed and 15 wounded, besides two guns and plenty of medicine and provisions.

Six hundred Spanish under General Rey had an encounter in San Ramon (Manzanillo) on the 17th) with Leader Tamayo and his party of 800 men. The rebels obtained a complete victory over the loyals, who suffered a loss of 1 captain and 30 soldiers killed and 95 wounded.

The Spanish General Gasco, at the head of 1,000 men, met 1,400 insurgents under Puyals in Mavagual (Bayamo) on the 18th. The Spanish column was convoying 80 mules and 20 wagons laden with ammunition and provisions. The insurgents lay in wait and opened a fearful fire on the Spanish vanguard, driving it back in disorder on the main body. As a result of the battle the rebels took the entire convoy with the exception of 6 wagons and 10 mules. This engagement is one of the most serious that has taken place in this province for some time. Some of the Spanish officers attribute their defeat to cowardice on the part of General Gasco. The Spaniards lost 1 commander, 1 captain, and 90 soldiers killed, and 195 wounded. The rebels had 1 captain and 28 men killed and 60 wounded.

On the 17th the rebel leaders Pepito, Rodriguez, and Miguel Escalona, with 150 men, attacked the fort at the village of San Pedro (Holguin), defended by a lieutenant and 50 soldiers. After a fight of half an hour the Spaniards surrendered with their arms and ammunition. They had 10 killed and 18 wounded, among the latter being the lieutenant. The rebels had 2 killed and 3 wounded.

Small-pox has increased considerably in this city, and has appeared in the town of San Luis. Yellow fever is increasing also, on account of the heavy rains which have fallen within the last few days.

—

[Special correspondence of the World.

MACAGUA, NEAR COLON, PROVINCE OF MATANZAS, CUBA, *May 10.*

Reports have reached here of a number of recent unwarranted murders and outrages by bands of Col. Louis Molina de Olivera's Spanish guerrillas.

Belisario Nodarse, of this town, relates the particulars of a fiendish attack upon a Cuban woman.

"The guerrillas of Colon," Mr. Nodarse says, "while on their way to Calimete, stopped at the house of Mateo Martinez, a native of the Canary Islands, who had been forced to enlist in a body of insurgents under the command of Juan Pablo Jabio.

"The Spaniards stopped at his house and the officer in command inquired from Senora Martinez the whereabouts of her husband. 'Indeed, I can't tell,' she replied.

"'I'll make you,' said the Spaniard, and he proceeded to tear off her clothing. He then questioned her anew, and receiving no answer from the woman, who was crying hysterically, he unsheathed his sword and fell to cutting and slashing his victim, until her blood covered the floor and she fainted in a corner. Her shrieks and entreaties only served to provoke the brutal laughter of the soldiery."

Mr. Nodarse says he laid the facts in writing before Colonel Molina. The chief replied by sending a squad to arrest and shoot the complainant. His brother, Bruno, a tobacconist, heard of the order in time to inform Belisario. The brothers fled and joined the rebel force of Clotilde Garcia.

Colonel Molina left his headquarters a few days after the attack on Senora Martinez and marched his troops south to effect a junction with General Melguizo's corps. The Spaniards were attacked and forced to retreat by a Cuban band. In making a detour to avoid the Cubans, Colonel Molina's command arrived at a shanty occupied by an old farmer, his two sons, a daughter-in law, and three grandchildren. An eye witness of the tragedy says:

"At the approach of the soldiers the men took refuge in the jungle, carrying off the two oldest children, and only the daughter with her baby remained in charge of the house. She hoped her sex and the sight of a child but six months old would protect them from harm and spare the house.

"Colonel Molina halted his command by the roadside and, dismounting, walked into the house,

"'Where are the men?' he demanded. 'I have been fired upon by your people at Artoyito, and I intend to send a detachment to surprise them at camp to-night, so I need guides. Where are the rascals that live here?'

"'They are out, sir,' was the trembling response.

"'Are they? Well, you will guide a squad of my men to their hiding place and bring them quick. No trifling.'

"'I have not the least idea where they can be,' sobbed the woman.

"'Haven't you? Very well. Ho, there! a corporal and four men.'

"As the platoon entered the cabin Molina pointed to her and said:

"'Pull out that rebel hag and shoot her!' The mother and child were dragged some 25 feet from the hut and the squad moved away a few paces.

"'Will you speak now?' the Colonel demanded.

"'For God's sake, I don't know!' cried the woman, who was nearly dead with terror.

"'Then fire!' ordered Molina.

"With a convulsive movement the woman tried to shield the child with her own body, but the merciless bullets did their work.

"The baby was not killed outright, and one of the soldiers, moved by a sort of barbarous pity, crushed the little one's skull with the butt of his rifle. The bugle sounded 'Fall in.' Molina, after setting fire to the hut, coolly mounted his horse and gave the word 'March.'

"The three men returned after a while, looked silently on the dismal scene, and walked off in the direction of Arenas. After intrusting the two remaining children to a relative, they joined the insurgents, and Fabio, the Cuban commander, says they fight more like demons than like men."

In one of the outskirts of San José de los Ramos and about 3 miles from the village there is a small place called Barrio de Oliva. It consists of a schoolhouse, a grocery store owned by Mr. Oliva, the dwelling of the Hernandes family, cane planters of that neighborhood, three or four palm-thatched huts and a small house occupied by Frederico Fuentes. Fuentes had two large cane fields.

One corresponds to the "Espana" sugar plantations owned by Senora Fulneta, wife of the Spanish minister, Romero Rabledo. The other field is attached to the state "Alava," belonging to Heredros de Fulneta. Fuentes's family consisted of himself, a married daughter named Arcadia, and his son-in-law.

Fuentes had had a dispute with the lieutenant detached by Colonel Molina to garrison San José. The particulars, according to a friend of Fuentes, were as follows:

As he went around one of his cane fields he found an immense quantity of cane trampled down and spoiled. Next day while out at his other field (that of the state Alava), he saw a foraging party enter and proceed to cut fodder for their horses. Perhaps he would have submitted to the intrusion, but he soon perceived that the soldiers instead of cutting off the top stalks, which is the part eaten by cattle, proceeded to destroy the cane just for the fun of the thing.

He approached and remonstrated, but the sergeant ordered him to "shut up," adding that almost anything was too good for a cursed rebel.

Fuentes went to the town and complained to the lieutenant in command of the garrison. The officer flew into a rage and ordered him out of his presence, threatening to use a horsewhip. Fuentes told him he intended calling on Colonel Molina and reporting what had happened.

The command was a few days later ordered to advance and protect the plantation "Espana," which the insurgents had announced they would burn.

As they approached Barrio de Oliva the guerrillas sacked a tavern known as the Noy, indulging freely in spirits. On entering the place the lieutenant marched directly to Fuentes's home and made the two men walk out. He accused them of harboring an insurgent chief named Maza. Fuentes knowing the cause of the accusation thought it useless to defend himself. The officer then bade the soldiers punish them as they deserved.

A score of machetes flashed and in a few moments the prisoners were a mass of blood and rags. A drunken fancy seized the murderers. Cutting off the heads of their victims they hung them to the key of the grocer's door, while the horror-stricken neighbors looked on without daring to interfere. Only under cover of night were the ghastly remains removed and buried.

A resident of the town of Cascajal says one of Moliana's guerrilla bands recently left Barrio de Mostacilla and was marching to "Reglita," the sugar plantation of Señor Sardinas, for the purpose of escorting a train of pack mules. As the guerrillas approached the town of Cascajal they passed the farm of a Cuban named Garcia, whose two brothers were in the insurgent force under Dimas, which was operating in the district between Recreo and Roque.

A portion of this force occasionally camped near Garcia's house, and he was then visited by his brothers. When the guerrilla band arrived, however, the insurgents were not in the neighborhood. Garcia was alone in his house, his brother-in-law, who lived with him, having gone to San José de Ramos.

The lieutenant commanding the guerrillas rapped loudly upon Garcia's door and then entered, followed by a sergeant and two privates.

"Where are the insurgents encamped?" the lieutenant demanded of Garcia.

"I really don't know," the man replied.

"Tie him to that chair" the officer commanded, and the soldiers lashed Garcia securely.

"Now will you tell me where your brothers are?" the lieutenant angrily inquired.

"I can't say. I have not seen them," Garcia tremblingly replied.

"Ha! I know they slept here last night, but since your eyes seem to be useless, I will relieve you of them. Pull them out," the officer cried, turning to his soldiers.

The sergeant thrust the point of his bayonet under each of the unfortunate man's eyes and burst them out, despite the agonizing screams of the victim.

As they left the house the lieutenant jokingly remarked that the next time Garcia would be able to say truthfully that he "had not seen the insurgents."

Letter of Owen Melton, dated June 6, 1896:

[Special dispatch to the Press.]

KEY WEST, FLA., *June 6.*

A letter has been received from Owen Melton, the young American captured on the schooner *Competitor*, in which he describes the barbarities practiced by Spaniards on prisoners confined in Morro Castle and Fort Cabanas. He says in his letter, which is dated Havana, June 3:

"The world will never know the barbarities that are perpetrated by the Spaniards on the suspects confined in Morro Castle and Fort Cabanas. They are being tortured and shot without trial almost daily.

"On May 30 Faustino Padron, a boy 16 years old, was captured in the outskirts of Habana by Spanish guerrillas and lodged in the Cabanas. It was suspected that the boy had been in communication with the insurgents.

"To make Padron confess, he was stripped and suspended by the arms. Then a Spanish lieutenant whipped the boy on the bare flesh with a rawhide whip.

"Padron's back, shoulders, and breast were soon a bleeding pulp and he was shrieking in agony. Then the officer asked Padron if he had done certain things, and in his awful pain the boy would scream:

"'Yes; oh, yes.'

"This was then written as the boy's deposition, to be read before the 'Consejo de Guerra,' when he shall be tried for rebellion. It is not likely, though, that the boy will ever be tried, as death will prevent. He spits blood and can not live long.

SIGNIFICANT VOLLEYS.

"Such things are of daily occurrence in the Cabanas. At night volleys of musketry are frequently heard. The next day the prisoners know what these volleys meant when they miss the faces of well-known prisoners.

"In the Cabanas there are nearly 700 prisoners and from ten to fifteen are crowded in a cell. A prisoner on first entering a cell is confronted by a nauseating odor, but after a few days he becomes accustomed to it.

"Were it not that the Cubans are acclimated, the mortality would be great. As it is, the Spanish sentinel who passes to and fro in front of the cell doors, frequently takes the fever and dies in four or five hours.

"Scarcely a day passed but some of the guards die with the yellow fever, yet it is very rare that a Cuban prisoner dies with the fever.

AMERICANS IN THE PRISON.

"There are several Americans in Fort Cabanas, among them the Americans captured with the schooner *Competitor*. Part of these are in one cell and part in another.

"Julio Sanguilly is also imprisoned there. He is given a separate cell and treated with some little difference by the Spanish officers in charge, yet the condition of many of the prisoners is extremely pitiful. Numbers of them have been found at their homes suffering from wounds and have been dragged away and thrown into the dungeons at Fort Cabanas.

"There is one man whose arm has been amputated close to his shoulder and who has a serious wound on his head. He is slowly dying of blood poisoning without hospital treatment.

"Already he is a mere skeleton. His sunken face is blotched with spots. As he is driven out into the prison yard by the guards, in a line of other prisoners, he staggers and reels like a drunken man. In a few days his body will be carried out.

SEVENTY-FIVE IN A CELL.

"The prisoners in Moro are mostly 'pacificos,' that is people who were captured at their homes on suspicion of sympathizing with the insurgents.

"These prisoners are kept in six large vaulted cells. There are from 75 to 115 in a cell. The cells are filthy and damp and the prisoners are given nothing to sleep on, so that unless they are fortunate enough to have money or friends they are compelled to sleep on the damp, filthy, stone floors.

"There are some men of note in Moro, among them being Ascua, who was Maceo's guide in western Cuba. Also Rafael Castro, known as 'El Inglesito,' or 'the Little Englishman,' whom the Spaniards would have shot but for the English consul's interference. He is an artist and a young man of fair complexion and dark eyes, with long, gracefully curling hair.

"Every night when his companions become quiet in their hammocks or on the reeking floor he hangs his canvas on the prison wall and paints.

"God help the man who falls into the hands of the Spaniards."

Mr. MORGAN. Now, I have with these remarks and these proofs closed my discussion of this question on the present occasion with one or two exceptions. A gentleman appeared at the instance of the Committee on Foreign Relations and was sworn and testified under oath before the honorable Senator from Minnesota [Mr. DAVIS] and myself as a subcommittee. This gentleman is Dr. Diaz, of Cuba. I desire to incorporate his testimony, also, because it is sworn testimony, along with the other. But I wish to make a remark about Dr. Diaz before I do that, which will indicate to the Senate the importance, I think, of having the statement of this man spread in the RECORD.

Dr. Diaz was a captain in the Cuban army during the ten-years war, or for about two years of that war. He is a man of good family evidently, born in Cuba, at Guanabacoa, a few miles distant from Habana, perhaps only 2 or 2 miles, and was educated in a special school in Habana and also in the University of Havana, where he took his degree as doctor of medicine. The war came on. He joined with the rebels and was appointed a captain. Being cut off from his command on one occasion, he endeavored to escape. He and two of his companions who were cut off with him went off into a little peninsula that extended out to sea, and there they were guarded by the Spaniards, who came up through the dense thickets on the outside but did not come within.

Dr. Diaz and his companions escaped. One died at sea before they were picked up. The others became unconscious. He was then taken aboard an American ship and, after being transferred to another ship at Key West, he came to New York, where he had friends. He was there taken sick, and, under the ministrations of a friend, a lady in the hospital, he became a convert to the Protestant religion. He then studied with Dr. Hunter for four years, I think it was, in the city of Philadelphia, and was taught divinity. He then became a manufacturer of cigars in New York or in some way became connected with the manufacture, being a reader to those there employed. Then he went to Key West, and there he joined the Southern Baptist Church. He was then ordained by the Southern Baptist denomination and appointed a missionary to Habana. He has succeeded there in establishing very valuable property, worth probably three or four hundred thousand dollars, including a church, seven church schools, a church hospital, a church cemetery, and he has 2,700 communicants in his church in the city of Habana and various churches on the outside. When this war came up he concluded it was his duty to contribute all he could to the Cuban people and the Spanish people through Christian benevolence.

He took sides with neither. He came to the United States and was appointed the vice-president of one of the Red Cross associations, which he took to Cuba and established there, with the consent of General Campos, to whom he applied, and he speaks of General Campos in very high terms. He established forty of these outlying hospitals, some in the Cuban country and some in the country held under the Spanish authority. He testified that

he was strictly impartial. He took no part whatever in any belligerency or in giving information or anything of the sort. His travels through Cuba to attend to these different hospitals, where he attended more than 2,000 of these Spanish soldiers, of course familiarized him with the situation of the two armies and of the country, and his testimony based upon this predicate of information is very interesting indeed. He is a man evidently of high education, a surgeon as well as a physician, and performed operations upon several of those persons, and witnessed various transactions in Cuba which he detailed. With this preface in regard to him, without saying anything more, but believing he is a man of very high character—in fact, of unimpeachable character—I ask leave to incorporate his testimony also.

The PRESIDING OFFICER. If there be no objection, such will be the order of the Senate.

The testimony referred to is as follows:

STATEMENT OF REV. A. J. DIAZ.

A. J. DIAZ was duly sworn.

By Senator MORGAN:

Q. What is your name?
A. A. J. Diaz.
Q. What is your age?
A. Forty years.
Q. Where were you born?
A. I was born in the city of Guanabacoa.
Q. How far is that from Habana?
A. About 2 or 3 miles.
Q. Where were you educated?
A. I was educated partly in the Island of Cuba and partly in the United States.
Q. At what school?
A. First I was at the institute, as we call it, in Habana, then went to the university in Habana.
Q. When you came here where did you go?
A. When I came here I was educated by Dr. Alexander Hunter, of New York, a private teacher.
Q. Educated in your profession as a doctor of medicine?
A. No, sir; as a minister.
Q. Well, were you ever educated as a doctor of medicine?
A. Yes, sir; I was educated in Habana.
Q. Did you get your degree?
A. Yes, sir; I got my degree there, and my diploma as a doctor has been registered here in the State of Georgia, too.
Q. Did you commence practicing your profession in Cuba?
A. Very little. At that time I was quite young, and the last revolution was started, and then I joined myself in that revolutionary army.
Q. Who did you serve under?
A. I served with the Cuban party.
Q. Under whose command?
A. Under the command of Julio Funes.
Q. How long did you serve in that army?
A. I served in that army for nearly two years.
Q. Did you have any rank?
A. Yes, sir.
Q. What was it?
A. I was appointed by them as a captain.
Q. Did you have a company under your command?
A. Yes, sir.
Q. When that war closed, what became of you?
A. Before the war closed I was appointed to find some place for our people. We knew very well if they got hold of the Cubans they would kill them. Knowing that, I threw myself into the sea, drifting on a log, in the hope of reaching some place of security, but the current was strong and drove us away. That was in the nighttime, and the next day we found ourselves in a vessel which picked us up.
Q. Where did they take you to?
A. They transferred us to a schooner that was bound to New York, and I went to the city of New York.
Q. How long did you remain in New York?
A. I remained in New York for nearly five or six years.
Q. What were you doing while you were there?
A. At first I was employed in the cigar business. Then I commenced to read to the factories there, employed as a reader, and then I commenced to do some missionary work.
Q. You became a minister?
A. Yes, sir.
Q. What church did you join?
A. The Baptist Church.
Q. Did you join that church in New York?
A. No, sir.

By Senator DAVIS:

Q. Are you now an ordained minister of the Baptist Church?
A. Yes, sir.
Q. How long have you been so?
A. For nearly six years.

By Senator MORGAN:

Q. Where were you ordained?
A. I was ordained in the city of Key West, Fla.
Q. You belong, then, to the Southern Baptist Church?
A. Yes, sir.
Q. After you were ordained did you return to Cuba?
A. Yes, sir; I returned for that purpose to the city of Key West. I was called by the council to the city of Key West, and was ordained there and returned the next week.
Q. Then I suppose you became a missionary of the Southern Baptist Board to Cuba?
A. Yes, sir.
Q. Well, when you got to Cuba did you establish a church there?
A. The church had been already established.
Q. And you were appointed to it?
A. Yes, sir.
Q. What progress have you made in your denominational growth there?
A. Very good.
Q. About how many communicants have you there?
A. I have about 2,700 who have been baptized in the last eight years.
Q. In the city of Habana?
A. Yes; and I organized a Baptist hospital for the poor. I organized seven free schools, where we have over 1,500 children; we educate them; and also have a cemetery. We can not bury our Protestant people in the Catholic cemetery. They do not allow us to bury them there.

By Senator DAVIS:

Q. In whose name is the title to all this property?
A. In the name of Dr. Tichenor, the corresponding secretary of the Home Mission Board.
Q. He holds it as trustee for the mission board?
A. Yes, sir.

By Senator MORGAN:

Q. Where does Dr. Tichenor belong?
A. In Atlanta, Ga.
Q. What would be about the value of that property you have in Habana?
A. The church itself is worth about $140,000. It is a very nice piece of property. The hospital we have is worth about $20,000, and the cemetery—well, we can not say what it is worth, but it brings to the board an income of $6,000 or $7,000 a year.
Q. You have property, then, in San Miguel, also belonging to the church?
A. Yes, sir.
Q. What is the value of that?
A. About $2,000.
Q. How many churches have you organized outside of San Miguel and outside of Habana in the country?
A. We have different missions, but never organized different churches. We have missions at different places. A preacher will go to one for one or two months for a meeting and then move away to another.
Q. How many ministers are employed in the Baptist denomination?
A. About 24 missionaries.
Q. Are there any of those remaining in Cuba now, or have they left?
A. None remain except the women missionaries.
Q. The men have all had to leave?
A. Yes, sir.
Q. Why have they had to leave?
A. Well, they have been persecuted in one way or another by the Government and have had to leave.
Q. They have all left?
A. They have all left and come to the United States.
Q. You speak of free schools you have established there. Are there any free schools within your knowledge in Cuba sustained by the Spanish Government?
A. Yes; there are some.
Q. How many?
A. A great many, but kept in a very bad condition; they do not teach anything.
Q. Are they under ecclesiastical control?
A. Yes, sir.
Q. The Catholic Church?
A. Yes, sir.
Q. Who supplies the funds?
A. The Government.
Q. I was reading the other day, from a Spanish author, a statement to the effect that the annual taxes upon the people for the support of the Catholic Church in Cuba amounted to about $600,000. Is that correct?
A. I think it is more than that. I think it is about $1,500,000 or $2,000,000.
Q. This book I was reading from was written ten or fifteen years ago.
A. The bishop of Habana gets about $18,000 a year.
Q. And the archbishop how much?
A. He gets about the same.
Q. The archbishop of Cuba and the bishop of Habana get about $18,000 each?
A. Yes, sir.
Q. Well, have you been much over the country in Cuba?
A. Yes, sir; I have been in a great number of places.
Q. When did this war that is existing now in Cuba commence?
A. It broke out about the 29th of February, 1895.
Q. After that war broke out were you visiting over the Island of Cuba in different places?
A. Yes, sir; in behalf of the missions. When the war broke out I did not know exactly what to do. As a captain of the army on one side, and as a minister of the Gospel on the other side, I was a little troubled myself, but I concluded to take no part in the insurrection, but just to help both parties, and then I organized what we call a White Cross Society. It is a society based on the Red Cross Society of Geneva, for the purpose of treating both sides.
Q. You mean to assist them medically and charitably?
A. Yes, sir; and at the same time I sent a letter to President Cleveland to notify him that we were going to do that kind of work, and Mr Gresham answered the letter, saying that they had nothing to do with the matter, but were very much pleased with that thought and encouraged us, but they said they had nothing to do with the Geneva Cross. So our Government was notified that we were going to take part in that movement for a sanitary purpose.
Q. Well, the Spanish Government, then, became one of the parties to the Red Cross Society; that is, to the treaty by which they had certain rights?
A. Yes, sir.
Q. And you were not violating any public law by organizing that society?
A. No, sir; nor private either.
Q. And you say you had determined not to take part with either party in the political struggle that was going on there?
A. Yes, sir.
Q. Have you kept to that resolution faithfully?
A. Yes, sir.
Q. And you have not taken part?
A. I have not taken part on either side.
Q. In any way?
A. In any way; just helping the wounded and sick, that is all.
Q. Well, did you visit the United States recently before you were expelled?
A. Well, I generally visit the United States once or twice a year. I must come to the Southern Baptist Convention when they have a meeting and give my report, and then they have some association or State convention, and then they call me. So I came to the United States last year twice or three times, to the Southern Baptist Convention, which met in Washington, to the Florida State convention, and to the Home Mission Board's meeting.
Q. Well, both visits you made were for the purpose of attending Baptist conventions?
A. Yes, sir; that is all.
Q. You did not come here on a political mission?
A. No, sir.
Q. And had nothing to do with politics or with the war?
A. Nothing to do with it.
Q. What did you do as a member of this sanitary corps, as a physician, in treating the sick and wounded of both parties?
A. We made a by-law and we gave that by-law to the Government of Spain in order that they might approve it, and so they did. They approved it, and the second article says we have the right to constitute neutral camps in or-

der to just take care of the sick and wounded; and while Mr. Campos was there everything was all right, because Mr. Campos conducted the warfare in a civilized way, and we had no trouble about it. We organized about forty delegations to take care of all sick and wounded. We have treated there about 2,000 Spanish soldiers, but as soon as Mr. Weyler came he ordered us to stop, not to take care of the insurgents by any means, only take Spanish troops, who were the only ones we had any right to take care of.

Q. Then did you cease to take care of the insurgents?

A. Yes, sir; I did not want to break any law, right or wrong. I did not want to interfere with any of them.

Q. Now, as a White Cross director, did you have a right to go into the ranks of the enemy?

A. Yes; cross the lines any time I pleased.

Q. You went out to the camp of the rebels?

A. Yes, sir.

Q. Did you make frequent visits to them?

A. Not frequent visits; but when I went to inspect a delegation, sometimes I found them in my way. Sometimes, as military operations required, they stopped me and kept me for two or three or four days, and then I stopped there; and if they had something to do in the medical line I did it—made surgical operations.

Q. You are a surgeon?

A. I am a surgeon; yes, sir.

Q. Now, these delegations you speak of, I suppose they were scattered about through Cuba?

A. Yes, sir; in the Province of Pinar del Rio, the Province of Habana, and provinces of Matanzas and Santa Clara.

Q. How many delegations did you have in all?

A. Nearly 40.

Q. And how many people would be engaged in each delegation?

A. About two or three directors and several nurses. Sometimes they have women.

Q. Who supported these delegations?

A. We supported them.

Q. Do you mean the White Cross?

A. Yes, sir; the White Cross Society.

Q. Where did you get the money to do it with?

A. Part I collected from the members of the church and part we got by contributions of the people.

Q. Did the Spanish Government contribute anything to it?

A. No, sir; never contributed a cent.

Q. Now, then, it was in visiting these delegations about through the different parts of Cuba that you had the opportunity to see what was going on in both armies?

A. Yes, sir.

Q. Now, you visited the rebel army—I call it that—the Cuban army in Pinar del Rio?

A. Yes, sir.

Q. When did you go there the last time?

A. The last time I was in Pinar del Rio was on the 13th of March. [Reading from paper.]

"I went to the town of Caimito for the purpose of leaving medicines, bandages, etc. On arriving there I was informed that there were two wounded children at the farm known as Saladriga. I went to their assistance."

Q. Now, just stop right there, because I am going to read that paper over to you presently. I am getting at preliminary facts. When you were at Pinar del Rio did you see Maceo?

A. I saw Valdespino, and Maceo also.

Q. About how many troops did Maceo have with him?

A. Well, really, I could not tell you because of the way they appeared; the way they came was an immense crowd of people all riding on horseback. It was a large crowd. I could not exactly tell how many.

Q. You had no statement of the number?

A. No, sir.

Q. Well, would you say it was a strong army?

A. Very strong.

Q. Did he have any artillery with him?

A. I did not see any.

Q. How were they armed?

A. A great many of them were well armed and the balance of them all had the machete.

By Senator DAVIS:

Q. Would you say he had some thousands of men under his command or only a few hundreds? Give some idea.

A. Oh, I think he had some seven or eight thousand men.

Q. You saw them?

A. Yes, sir; I saw them.

By Senator MORGAN:

Q. Did he have a permanent camp there?

A. Well, they were moving around. Sometimes they stay in one place fifteen or twenty days and then move to another.

Q. Well, when you saw him had he made the attack on the city of Pinar del Rio?

A. No, sir; he was just going in the direction.

Q. And that fight occurred afterwards?

A. Afterwards; yes, sir.

Q. What did you gather to be the result of the fight he had in Pinar del Rio—what did you find out or gather to be the result of it?

A. Well, I asked them, you know, what they intended to do in Pinar del Rio, and they said they were just going on, take possession of the principal towns, and Maceo was appointed as commander of that province.

Q. He was assigned in command of the Province of Pinar del Rio and is there now?

A. Yes; he is there.

Q. Well, after that was over they had other battles—that of Bahiahonda?

A. Yes, sir.

Q. Do you know anything about that battle?

A. It was the one where the Alphonse XII Regiment was destroyed. It is reported the whole regiment, about 1,000 soldiers, were destroyed, and but 14 or 15 were left. They threw themselves into the water and got a small boat and went out in the bay, and the current brought them to the city of Habana, which is about 60 miles from that place.

Q. Do you think your information about that is correct, that the whole Spanish battalion was destroyed?

A. Yes, sir.

By Senator DAVIS:

Q. Was it a battalion?

A. Yes, sir; a battalion.

By Senator MORGAN:

Q. Did Maceo capture Pinar del Rio?

A. I do not know; I heard that.

Q. How long did he hold it?

A. I presume he held it about two or three days.

Q. Was this fight you tell about before or after the capture?

A. I think it was before the capture. I know that is true because of this: There was published in the paper that the colonel will be tried by court-martial because he did not go to the point where the regiment was.

Q. That is another column?

A. That is another column; yes, sir.

Q. Did you see Gomez when you were out there? When did you see him last?

A. About two months ago.

Q. Where did you see him?

A. I saw him in the Province of Habana.

Q. How far from the city of Habana?

A. I saw him in Bainoa.

Q. How far from Habana?

A. About 35 miles.

Q. Did he have his forces with him?

A. Yes, sir; an immense force.

Q. How many thousands do you suppose?

A. I think he had about 10,000 men.

Q. What was the condition of his health?

A. Pretty good. He had only a little abscess on one of his legs from an old wound, but he has recovered from that and is all right.

Q. He is an old man, is he?

A. He is an old man, about 72 years of age.

Q. Did you talk with him?

A. Yes, sir; he asked me several questions and I answered.

Q. Did you tell him about the condition of the Spanish forces and all that?

A. No, sir; he knew he had no right to ask such questions as that.

Q. What did you think of the appearance of his army; did they look as if they were strong?

A. Very strong.

Q. Well armed?

A. Well armed and in good health.

Q. Have you been personally with any other army in Cuba?

A. Yes, sir; Mr. Aguirre's.

By Senator DAVIS:

Q. When?

A. Just two weeks before they put me in prison.

Q. When did you leave Cuba? Give me the date.

A. I think it was before the 1st of May.

Q. How long before?

A. Just a day or two.

Q. Now, how long was it before you were arrested that you saw the force of Aguirre you mentioned?

A. Fifteen days.

By Senator MORGAN:

Q. Where did you find Aguirre?

A. They found me. I was down there attending a man. While I was amputating his arm the insurgent forces came around the little tent I had for that purpose, and while I was operating I found myself among the insurgents; and he came there and just looked at what I had been doing and kept everybody away and did not molest us at all.

Q. You were not in his camp then?

A. No, sir.

Q. Did you talk with Aguirre?

A. After I got through with the operation; yes, sir.

Q. Did he speak of his affairs?

A. Yes, sir; and I knew partially of them down there.

Q. You knew the people?

A. Very well; a great many of them had been in my congregation.

Q. Now, what class of people did that army consist of?

A. The best class of young men in Habana, generally.

Q. You mean the Province of Habana?

A. No; the city.

Q. Aguirre's command consists mostly of city boys, does it?

A. Yes, sir.

Q. How many were there?

A. He had at that time about 2,000; that was his escort.

Q. He had others?

A. Oh, yes. He had in the province 10,000 or 15,000 men, scattered all over the Province of Habana in different camps.

Q. Now, what kind of people did the army of Maceo appear to be?

A. Very fine people, too; white people; doctors, lawyers, druggists.

Q. Intelligent people?

A. Intelligent people.

By Senator DAVIS:

Q. What kind of people were the private soldiers in Maceo's army?

A. Well, they have some colored people, too—many—and they have some of these intelligent people as private soldiers, a great many of them people who do not want any rank; just wanted to be soldiers, just to do that in the democratic line to encourage others.

By Senator MORGAN:

Q. Now, these people you saw in Gomez's army, did they appear to be men who were farmers and persons living in the country—respectable people?

A. Yes, sir.

Q. White people?

A. Yes, sir; as well as negroes.

Q. Was that the case in Aguirre's army, too?

A. Well, Aguirre had more white people.

By Senator DAVIS:

Q. What proportion of negroes and whites in Maceo's army?

A. Well, one-third negroes.

Q. Are the negroes and whites in separate companies and regiments, or are they all mixed up together?

A. Well, I do not know very well, but, as I say, they mingled.

Q. In the same organization?

A. The same organization.

By Senator MORGAN:

Q. Now, in traveling there, did you go to Cubitos?

A. No, sir; my organization did not reach as far as that.

Q. How far is that from Habana?

A. Cubitos is in the central part of the island. It is in the Province of Camaguay.

Q. It is up in the mountains, is it?

A. Yes, sir.

Q. Do you know Mr. Cisneros?

A. Yes, sir.

Q. Do you know where he was?

A. Yes, sir; I know where he was. Cisneros has about twenty of the princi-

pal men of the city of Habana with him. I inquired for him and was told he was at that place, Cubitos.
Q. That is his capital?
A. That is his capital.
Q. Is that a place of difficult access?
A. Very difficult. Bartolo Masso is the general up there, with about 10,000 men to protect the government.
Q. Now, I understand that the military arrangement among the Cubans is that a general is assigned to certain provinces?
A. Yes, sir.
Q. Maceo to Pinar del Rio?
A. Yes, sir. Aguirre to Habana, Sanchez to Santa Clara, Roloff to Santo Espiritu, and Calisto in Camaguay; and then in the eastern part of the island is José Maceo.
Q. So that is the military disposition?
A. Yes, sir; men command generally in the province, and then they have subdivisions. They have, for instance, brigades in each province.

By Senator DAVIS:

Q. Gomez is commander in chief over all?
A. Yes, sir.

By Senator MORGAN:

Q. And that is the military organization?
A. Yes, sir.
Q. Let us know something about the civil organization. Did you meet any civil officers?
A. Yes, sir; Mr. Portuondo.
Q. What is his office?
A. He is secretary of the interior.
Q. He belongs to the general government of the Cuban Republic?
A. Yes, sir.
Q. I want you to speak of the local officers, the prefects and subprefects. Do you know anything about them?
A. Yes, sir.
Q. What is a prefect?
A. He is the man in charge to find supplies for the families of insurgents in every place there.
Q. Sort of a commissary?
A. Yes, sir; if the families need something to eat, for instance, he brings food, cattle, etc.
Q. Takes care of the families of the men in the army?
A. Yes, sir; and if the men are sick or wounded, the prefects take care of them.
Q. They take care of the sick and wounded and subprefects have smaller districts?
A. They have smaller districts.
Q. Now, who are the tax collectors there?
A. There are tax collectors, too; I know, personally, Mr. Menocal.
Q. A cousin of our Menocal here?
A. A brother, I think.
Q. Is he a tax collector?
A. Yes; they divide themselves into different places and collect all the revenue.
Q. Do they collect revenue from the people?
A. Oh, yes. Sometimes they have no place to put the money. Sometimes Gomez has mules loaded with money—going from one place to another with money.

By Senator DAVIS:

Q. Do they collect supplies in kind?
A. The prefects do; but these are the tax collectors.

By Senator MORGAN:

Q. Do the people of Cuba voluntarily and freely pay taxes to the Cuban government, or are they forced to do it?
A. No, sir; they freely do it. They pay taxes where the Cubans have no control over it.

By Senator DAVIS:

Q. Now, over this territory, have the Spanish any tax collectors?
A. Not one.

By Senator MORGAN:

Q. Have they any judges?
A. Not one.

By Senator DAVIS:

Q. Any civil officers at all?
A. No. In the larger towns is the only place. In the smaller places they have nothing of the kind—no mayors, no aldermen.

By Senator MORGAN:

Q. Do these various civil officers have offices in any one place, or are they roving around?
A. No; they are roving around.
Q. Have they established headquarters?
A. Well, sometimes they do for one, two, or three months, and then they move around. That depends on the persecution of the Spanish.

By Senator DAVIS:

Q. Do they keep records or written accounts.
A. Yes, sir.

By Senator MORGAN:

Q. Now, how are the mass of the Cuban army received by the population living in the towns in the country? Are they received cordially or as enemies?
A. Every time they approach any town all the people come out with flags and welcome them. That is natural. The majority of those boys belong in those cities. They can not be received in any other way.
Q. How do they receive the Spanish, on the other hand?
A. Well, there is great excitement when the Spanish troops approach the cities. The people are afraid, and they do not feel safe, because they know the Spanish come in and sack the towns and break the houses and take possession of them, and violate women, and do horrible things. Of course, the people are scared. The soldiers take possession. I saw this case in Managua: Soldiers took possession of a house; the ladies screamed out, and the soldiers commenced to search the bureaus and everything there, and the men came and reported that there were some soldiers sacking that house, and the men said, "I can not say a word about it, because they are all officers."
Q. Did you see this yourself?
A. I saw that myself; I was there.
Q. Did they offer any violence to women?
A. Well, the women ran away. I do not know what became of them. I was sitting there with my brother in the drug store when these things occurred.
Q. Now, you have described how the armies of both contending parties are received by the people of the country.
A. Yes, sir.
Q. Is your description of that true as far as you know? Without any specification, is it true generally?
A. Yes, sir.
Q. It is generally true?
A. Yes, sir.
Q. Do you know of a town or village in Cuba where you could say that the people were hostile to the Cuban cause?
A. Natives?
Q. Yes.
A. Not one. The whole country has risen up in arms—men, women, and children.
Q. So you regard the attitude or situation with the Cuban people as being one of general hostility to Spain?
A. Yes, sir.
Q. And is that hostility intense?
A. Past expression. One day I heard General Rui say, "Everything here is against us. The air we breathe is against the Spanish people in Cuba."
Q. How do these Cuban armies maintain themselves; upon what do they subsist, and how do they get it?
A. Well, they use goats and chickens, and all the tropical fruits, and yams and sweet potatoes, and things that grow wild, and in some places farmers plant for the insurgents; so they never trouble themselves about what to eat.
Q. They have an abundance?
A. Yes, sir.
Q. How long do you think the country can stand that? Will it wear out, and after a while the people starve?
A. No; people who live in the country are all right. They can stay there for twenty years if they want to, with plenty to eat. Now the misery is among the people of the cities.
Q. Why?
A. Because they have no resources. They have no money or anything, and insurgents are not allowed to grow anything in cities where the Spanish troops are, and they have nothing to eat.
Q. They are in a starving condition?
A. Yes, sir.
Q. About the destruction of the crops there; has it been very extensive; that is, the sugar cane?
A. Very.
Q. Is the Cuban army alone responsible for that destruction?
A. Not the Cuban army alone. The Spaniards do that, too. They set on fire the sugar plantations of Mr. Delgado and others. Part of the city of Managua has been destroyed by the Cubans and the other part has been destroyed by the Spanish troops.
Q. What for?
A. Well, the mayor of that town, Mr. Christo, is a lawyer. They had a battle and 75 houses were burned, and in a month or two Mr. Christo, the mayor, joined the rebels; and he is a wealthy man, for he has different houses and plantations, and so forth, down there. As soon as he went with the rebel army the Spanish troops set on fire all the houses owned by him. So that part is destroyed by the Spaniards and part by the Cubans.
Q. Is sugar cane an element of subsistence among the Cubans and their horses?
A. Yes, sir.
Q. Now, I want to ask you something about the condition of this Spanish army and Cuban army as to diseases. You have yellow fever in Cuba?
A. Yes, sir.
Q. Does it attack the Cubans?
A. No, sir; not a bit.
Q. Why not?
A. Because they are acclimated.
Q. Does it attack the Spaniards?
A. Oh, yes; fearfully.
Q. Now, take a body of 1,000 soldiers in the season, how many would you expect to find sick out of that number?
A. Nearly all of them.
Q. As much as that?
A. Yes; nearly all of them. Nearly all get sick, and about 50 or 60 per cent will die.
Q. You do not mean they all get yellow fever?
A. Yes; that is the principal thing, and dysentery.
Q. And what else?
A. Ulcers.
Q. I wish you would describe those ulcers. Are they syphilitic?
A. Yes, sir; in many cases they are syphilitic.
Q. How is the large majority of cases; is that so?
A. Yes, sir.
Q. State what is the extent of that disease among the Spanish soldiers?
A. Well, nearly about 60 or 70 per cent.
Q. They get sick in that way?
A. Yes, sir.

By Senator DAVIS:

Q. Infected with syphilis?
A. Yes, sir: but they are corrupt people, you know.
Q. Do they bring it with them from Spain or acquire it in the island?
A. Well, they bring it from Spain and acquire it in the island, too, because this is the custom they have; they do not do it now. As soon as they landed they put their guns to one side to have a good time and hunt for women, and of course with that kind of women you know in what condition they are generally.

By Senator MORGAN:

Q. What is your opinion as to the number of Spanish troops now in Cuba?
A. I think they have in Cuba only about 70,000 or 80,000 soldiers. I do not think they have more than that.
Q. How many have come there since this war broke out?
A. Nearly 150,000 or 180,000.
Q. What has become of the balance of them?
A. Well, a great many of them have been killed, and many of them have joined the rebels.
Q. Joined the rebels?
A. A great many of them; yes, sir.
Q. Well, how about those who have died in the hospitals from disease?
A. Yes, some have died of disease.
Q. What proportion of the people who have been lost—would you say that half or more than half have died of disease or battles?
A. Well, not many in battles; more of disease than of battles. The difficulty with the Spanish soldiers is that when they are brought from Spain and reach Cuba they are not allowed to speak to anybody. They have a guard, and as soon as soldiers are landed they are sent to the interior in order that they shall not speak to anyone. The Spanish people in Spain deceive these young men—tell them they are going to fight negroes, etc. The

officers are not real officers, but sergeants made captains and corporals and privates made lieutenants. That is the kind of soldiers they have in Cuba, showing they do not know what kind of men they are to meet. They are told that all the Cuban army is negroes, and here they find them white, and hear hurrahing for freedom and for republicanism, and say, "Well, I am a republican myself. If I had known that, I would not fight against them."

By Senator DAVIS:

Q. Were you expelled from the Island of Cuba?
A. Yes, sir.
Q. Why?
A. By the Spanish authorities, Mr. Weyler.
Q. When?
A. On the 30th day of last April.
Q. What reason did he give for expelling you?
A. I do not know yet.
Q. Did any of your fellow-missionaries leave about the same time?
A. They left before me.
Q. How many of them?
A. Three ministers.
Q. How many from all the missions?
A. The others, about six or seven.
Q. Now, after you and the other missionaries and the ministers left what became of the church and hospital property?
A. All has been abandoned.
Q. Do you know who has taken possession of it?
A. Yes; some of the members have taken possession of it.
Q. Have the Spanish authorities taken possession of the church?
A. Not that I know of.
Q. Have the other churches and denominations got hospitals in Cuba?
A. Yes; the Episcopalians have them.
Q. Have they been disturbed?
A. Yes, sir.
Q. Has the Episcopalian minister been disturbed?
A. I do not know.
Q. He left?
A. Oh, yes; he left. The general agent of the American Bible Society, Dr. McKean, left the Island of Cuba, too.
Q. Was he expelled?
A. I do not know. They disappear; that is all we know.
Q. What is said to be called the capital of the insurgents?
A. Cubitos.
Q. Is that the seat of government of the insurgents?
A. Yes, sir.
Q. Who is the president?
A. Cisneros.
Q. Where does he hold his office—perform his duties?
A. Right there in Cubitos.
Q. For how long a time has he performed those duties at that place?
A. Well, I think for ten months.
Q. Has he ever been disturbed or fled from the city since that time?
A. No, sir.
Q. Has he a cabinet?
A. Yes, sir.
Q. Who is the minister of foreign relations?
A. Mr. Palma, I think.
Q. Who is minister of the interior?
A. Mr. Portuondo.
Q. Who is the minister of justice?
A. Well, I may know the name but do not recall it.
Q. Well, is there a minister of justice there?
A. Oh, yes; I know they have a cabinet there.
Q. Any more ministers?
A. Yes; they have two or three more.
Q. Now, do those gentlemen, except Palma, live in Cubitos?
A. All there.
Q. Performing their duties?
A. Yes, sir.
Q. Have they ever been disturbed?
A. No, sir.
Q. Have they a legislative assembly?
A. Well, they had one about a year ago when they appointed Cisneros.
Q. Has there been any session since?
A. I do not know whether they have had any session recently.
Q. Have they a printing press?
A. Yes; they have a printing press there. I say they have, because I saw a paper that was published up there. The name of the paper was Cuba.
Q. Is it an organ of the insurgents?
A. Yes; it is an organ of the insurgents.
Q. Is it printed regularly?
A. I do not know. I only saw a copy.

By Senator MORGAN:

Q. Have they a post-office department?
A. Yes; a postmaster-general.
Q. And postage stamps?
A. And postage stamps.

By Senator DAVIS:

Q. How do they carry the mail over the island?
A. Well, they have their own means to carry letters.
Q. In cases of battles do the Spanish troops give quarter or do they take prisoners?
A. In a great many cases they do not give quarter.
Q. How about the insurgents; do they give quarter or take prisoners?
A. Yes; they give quarter and take prisoners and give them an invitation to join the rebel army. If they do not accept it they give them parole.
Q. What do the Spaniards do with the prisoners they take?
A. Kill them.
Q. Is that a universal practice?
A. Yes, sir; universal practice.
Q. Do you mean to say the Spanish butcher their prisoners?
A. Yes, sir.
Q. Universally?
A. Universally; yes, sir.
Q. Are any women fighting in the insurgent ranks?
A. No; they do not fight, but they are with the soldiers, because they are wives or relatives or something, and join the ranks.
Q. What do the Spaniards do with the women when they catch them?
A. Kill them.
Q. Do you mean to say they kill them the same as men?
A. They kill them; yes, sir.
Q. What do they do with the children?
A. Kill them.
Q. Do you mean that to the full extent of what you say, that they kill men, women, and children?
A. Yes, sir.
Q. How do soldiers treat women when they catch them?
A. Oh, insult them.
Q. Do you mean by "insult them" they ravish them; do you know anything of that kind?
A. Yes, sir.
Q. Now, these statements you have made impress me very seriously, and I want to be certain. Am I to understand that in case of an engagement the Spanish troops give no quarter, and that either then or after the engagement they kill every insurgent, man, woman, and child?
A. Well, not the insurgents, because they never have that chance and could not.
Q. No, not the insurgents, but I ask if the Spanish troops do that?
A. They do not do that to the insurgents, because the insurgents never allow them to do that; but the general rule is when they have a battle the insurgents retire and the Spanish troops come in, and any person they find in the neighborhood they kill—men, women, and children, noncombatants.

By Senator MORGAN:

Q. When you were taken as a prisoner you were taken by General Weyler's order, were you—you and your brother?
A. Yes, sir.
Q. You were confined in a house?
A. Yes, sir; we were isolated.
Q. I know; but you were confined in a house?
A. Yes, sir.
Q. How long?
A. Eight days.
Q. During that time were any charges at all presented against you?
A. No, sir; not one.
Q. Did you demand charges?
A. Yes, sir.
Q. Well, are you an American citizen?
A. Yes, sir.
Q. Fully naturalized?
A. Yes, sir.
Q. Got your papers and all?
A. Yes, sir.
Q. How long ago did that take place?
A. About thirteen years.
Q. And you have been known as an American citizen since you have been in Cuba?
A. Oh, yes.
Q. Did Weyler allow you to have any communication with the American consul?
A. No, sir.
Q. He refused it?
A. Yes, sir.
Q. You desired it and he refused?
A. Yes, sir.
Q. And no charges were made against you?
A. No, sir.
Q. Were you required to make a declaration?
A. Yes, sir; they asked me two or three different questions.
Q. And after that, did they release you?
A. Yes, sir.
Q. How long after that?
A. Twenty-four hours, I think.
Q Then you were ordered to leave?
A. Yes, sir.
Q. Leaving on the next steamer?
A. Yes, sir.
Q. And you brought your wife and family with you?
A. Yes, sir.
Q. How many children have you?
A. Two children.
Q. Do the Cubans get any arms and amunition from the villages or people?
A. Yes, they get them from Habana.
Q. How do they get them?
A. Exactly, I do not know the way they manage it, but I know they get all they need. I heard the people talk about that.
Q. The people supply them, of course?
A. Yes, sir.
Q. Do you know whether there is any order of the Spanish Government to prevent the landing of arms or munitions of war?
A. They do not allow any sale of arms in the city of Habana. You do not find in any store any rifles or any of those hunting guns. You do not find anything of that kind in the city of Habana.
Q. The sale of them is prohibited?
A. Yes; as contraband of war. And now I hear the later report is they consider corn as a contraband of war, too.
Q. Well, you raise corn in plenty in the interior of Cuba, do you not?
A. Yes, sir.
Q. How many crops of corn can you raise in a year in the interior of Cuba?
A. Well, horses are contraband of war, too, and the people of Cuba can not have horses. They have to give all the horses to the Government as contraband of war; and now corn is a contraband of war, too. The trade of Habana has been wretched. They have no trade. All grocery stores are empty; nobody spends a single cent in any store. They have no money, and the Spanish people have been going away from the Island of Cuba.
Q. Do you have any paper money at all in Cuba?
A. No, sir; they have silver and copper and gold. I believe the Spanish people in Cuba—those in business—are all in favor of the rebellion, because if the Spanish Government takes possession of the island again they will have to pay the last debt and this additional debt. They have to pay about $35,000 a day, and this is the interest of the debt; but they do not know how much the debt is. They call it $35,000 a day, and every day. They get it from the custom-house.

Senator MORGAN. Now I will read this paper to you.

Senator MORGAN read the paper, as follows:

"*To the honorable Chairman of the Foreign Relations Committee, United States Senate:*

"DEAR SIR: On the 12th day of September, 1895, I received authority from the inspector-general to organize and maintain sanitary delegations at different points throughout the Island of Cuba. I have now in my possession the original copy of said certificate of permission, signed officially.

"The by-laws were approved on November 18, 1895, copy of which I hand you herewith. I would call special attention to article 2 of chapter 1, by which it will be seen I was permitted to constitute neutral camps.

"I, with some other doctors and Christian people, some of whom were

American citizens, organized the White Cross, in conformity with said by-laws.

"While General Campos was in command the rules of civilized warfare were strictly enforced by his orders.

"After General Weyler assumed command we were summoned before him and instructed not to treat or otherwise care for sick and wounded among the soldiers of the insurgents, as we had been permitted to do under the administration of General Campos.

"Since the time General Weyler has been in command we have treated about 700 Spanish soldiers, each case being reported to him, at a cost to us of about $5,000, and before he assumed command we had treated about 1,300 Spanish soldiers.

"During the time General Campos was in command our delegations treated the sick and wounded of both the insurgents and the Spanish alike.

"During the prosecution of this work I have been a great deal out on the fields and have had good opportunities of making observations of the practices and character of the warfare of both armies.

"I have seen the general order issued by Gen. Maximo Gomez, directing that all prisoners captured from the Spanish army should be treated with proper consideration. That first they should be disarmed, then offered an opportunity to join the insurgent ranks. If they declined to do this voluntarily then they must be released without parole and escorted to some point of safety. The same order further directed that Spanish prisoners who were either sick or wounded should be nursed and carefully treated until well when, if they do not desire, voluntarily, to join the insurgent ranks, they must be released and conveyed under military escort to a point of safety. It was also ordered by General Gomez that no women should be molested or interfered with by any insurgent soldiers under penalty of death.

"Those entire general orders are now in force and have been since the beginning of the insurrection. They are very positive and severe penalties are provided for their violation.

"From my personal observation I know these orders have been strictly enforced. I know of one instance where, in the town of Jamaica, an insurgent soldier violated these orders by laying his hands upon a woman with criminal intent. For this offense he was ordered to be shot, and I saw his body after he had been executed.

"I have personal knowledge of this order in regard to the release of prisoners having been complied with.

"At Peralego I saw General Maceo return to General Campos, at Ballamo, about 150 prisoners, and at Camaguani I saw Rego return to the Spanish authorities 100 prisoners.

"I have also had opportunities for observing the methods of warfare and cruelties practiced by General Weyler. It is well known to the residents of Cuba that his record is one of cruelty and blood. I can substantiate the following incidents which have come under my own observation:

"At Menocol farm, near Managua, on the 3d day of February, 1896, I was called to attend a woman who had been shot, the bullet entering her shoulder and ranging down her spinal column. I saw her at 4 p. m. The circumstances as related to me by her husband were as follows:

"He was engaged plowing near his own home and the woman, his wife, was in the field with him dropping the seed. As soon as the Spanish soldiers, under command of General Ruiz, approached in view, they (the Spanish soldiers) commenced firing. Both the husband and wife lay down on the ground, and in that position she was shot. As the husband was lying down he held a small limb of a tree; this was struck with one of the shots. I treated the wound. They were noncombatants, unarmed, and pursuing their legitimate vocation in their own field; their only offense was that they were Cubans. There were at the time no insurgents within 20 miles of them.

"On February 22, 1896, I was present at the city of Punta Braba, where a battle was fought between the insurgents and the Spanish under command of Captain Calvo. The insurgents retreated. The Spanish troops then went to Guatao, a suburb about 2 miles distant. The insurgents were not there and had not been there. The Spanish soldiers at once commenced to shoot private citizens indiscriminately on the streets or in their houses, wherever they found them, until they had killed six or seven men (noncombatants).

"The soldiers then went into different homes and gathered together 17 men; they tied these together two and two, binding their hands and arms together. Among the number was Mr. Ladislao Quintero, an American citizen, who they found in his own home, sick in bed. He informed the captain that he was an American citizen and protested against being molested. Captain Calvo said he wanted him, too, and forced him to go, bound with the others. When they were all tied they were taken out together on the street and commanded to kneel down. After they had done so, then the whole company fired on them by command of the captain. The whole of the 17 were killed, except Mr. Quintero. He was wounded in the left arm and the man to whom he was tied was killed with all the others. This all occurred at 7.30 p. m., on February 22, in the immediate presence of the wives and children of the unfortunate men. Mr. Quintero was about 21 years of age, born in Key West, Fla. The man to whom he was tied, Mr. Pedro Amador, was 17 years of age.

"Mr. Pedro Amador was not killed by the gunshot wound he received, but one of the Spanish soldiers stepped forward to his prostrate body and beat him to death with the butt end of his gun while he was still tied to Mr. Quintero, the American citizen. I was present and saw this entire proceeding. When I returned to Habana I learned that Mr. Quintero was in Morro Castle, a prisoner, where he remained until April 11, without having his wound dressed. On April 11 he was released.

"I am informed by persons in Habana, who have been prisoners in Morro Castle, that there are in this prison as many as 100 prisoners confined in one small room. That in the morning they are furnished with only three pails of water. This is generally used up by 11 o'clock a. m., and they are not allowed any more until the following morning.

"In the case of Mr. Edward Delgado, from Banao, an American citizen who has a claim against the Spanish Government, his papers being on file in the Department of State at Washington, you will find by reference thereto that I was the physician who certified to his wounds. I am familiar with this case, and it is a very aggravated case of extreme cruelty to a private American citizen at his own home without provocation.

"The following is only a few of the many cruel incidents that have occurred while I was present:

"When the military courts inflicted the sentence of perpetual imprisonment in the cases of Messrs. Sabourin, Garcia, and others the captain-general protested against their leniency and asked for the infliction of the death penalty.

"On the 12th of March I was called by the sanitary delegation of our society in the town of Calvario for the purpose of attending to the case of a young man of 19 years, who was wounded in the peaceful pursuit of his business—that of a milk dealer. He was driving into the town in his milk cart when two soldiers fired on him from an ambush without any warning, breaking his right leg.

"I assisted in carrying the man to his home, and then made an examination of his wound and found that the bones of his leg had been fractured in such a manner that amputation was necessary. I found that the bullet used was an explosive one made as follows: An outside covering of copper filled with lead, which results in the copper covering flattening against the lead and scattering it in such a manner as to destroy all surrounding tissues and compound the fractures of the bones.

"On the 13th of March, at the corner of Reina and Aguila streets, Habana, I found a crowd collected around a prostrate man, and, as a member of the White Cross Society, I proceeded to tender him whatever aid was necessary. I found the man dead, and counted and made an examination of his wounds. He had 71 bayonet wounds, 7 of which were through the heart and several through the eyes. He also had 4 cuts with the machete on the head, the skull being fractured into small pieces. The ferocity of the soldiers was also shown by the marks in the sidewalk made by the point of the bayonet after having passed through the prostrate form of the man. The cause of the killing was as follows: The murdered man was in a dry goods store purchasing cloth when two soldiers entered and, after insulting the proprietor, took this man out and killed him in the manner related, saying he was an insurgent. The man had no arms whatever on his person and could not, therefore, defend himself in any way. I wrote out a statement of his wounds and gave it to the judge in the case, who holds a position similar to that of coroner in this country.

"On the 14th of the same month I, as vice-president of the White Cross Society, received a report from the town of Artemisa, telling me that the Spanish troops under Gen. Suarez Inclan had bombarded an insurgent hospital, killing over 50 wounded men who were receiving treatment there, and that the surgeon had been compelled to flee to Habana hidden in a cart. Upon his arrival in Habana he confirmed the report made to me. In Artemisa the ladies of our society had two hospitals, one for wounded Spaniards and one for wounded Cubans, the latter being the one bombarded, as told. The insurgent forces have entered the town of Artemisa several times, but have never disturbed the Spanish hospital, although they could have easily done so if they wished.

"Another insurgent hospital in the town of Paso Real, Province of Pinar Del Rio, was also destroyed by the Spaniards, killing all the wounded inmates. It is reported that at the time of destruction there were about 200 wounded Cubans in it.

"The same thing was done with another hospital in Siguanea, Province of Santa Clara.

"Notwithstanding the proclamation of the captain-general that all those surrendering would be pardoned, Mr. Aleman, who surrendered, and who also had a wound in the hand, was shot a few days later on the plea that his wound showed that he had been fighting.

"In the woman's jail in Habana there is a lady who has been imprisoned for the last six months solely because she is suspected of being in sympathy with the insurgents' cause and because she has two brothers in the insurgent army. There are imprisoned as rebel sympathizers several children, the age of the youngest being 11 years.

"When an armed force approaches any of the interior towns there is great excitement and consternation until it is ascertained whether they are Spanish troops or insurgent forces. If insurgent forces, there is immediate tranquillity, as they do not destroy anything unless there are Spanish forces located there. But if the approaching troops turn out to be Spanish forces there is great confusion and fear, as the Spaniards not only sack the town but steal all they desire and also take all detachable woodwork to be used in building their huts. They destroy everything that comes in their way, take complete possession of the houses, violate women in many cases, and commit nuisances in the middle of the streets. They claim to go into the towns for the purpose of defending them against the insurgents, but on the approach of the latter they take refuge in the houses and do not come out until the town is set fire to by the insurgents for the purpose of driving them out. I have personally seen all this in more than ten cases.

"On the 13th of March I went to the town of Caimito for the purpose of leaving medicines, bandages, etc. On arriving there I was informed that there were two wounded children at the farm known as 'Saladriga.' I went to their assistance, but found they had already received medical treatment. The eldest of these was 1 year and 6 months old, and had suffered a fracture of the right arm caused by a bullet wound. The other was 3 months old, and had suffered a fracture of the lower jaw from a similar cause. I was informed that 2 miles from this place the insurgents had attacked a troop-laden train without success. The Spanish troops left the train to reconnoiter, and took the road on which the insurgents had passed. On this road lived the mother of these two children. Fearing that some harm might befall them, she decided to seek shelter elsewhere. Upon her appearance at the door with two children in her arms she was fired at with the above results. These Spanish troops were under Commander Calixto Ruiz.

"On the 19th of March I went with my brother Alfred to the town of Bainoa for the purpose of attending to Mr. Venancio Pino, 70 years of age, who was wounded at the same time as Mr. Delgado. I found that he had several slight bullet wounds in the head, but his right arm had been horribly fractured, necessitating amputation at the shoulder joint. The bone had been fractured into many pieces, and was caused by a bullet similar to the one in the case of the milk dealer spoken of before.

"On the 8th of April, at the farms near the town of Campo Florida, the Spanish troop under Commander Fondevilla, assassinated Mr. Ramon Castellanos, 19 years of age; Joaquin Medina, 14 years old; José J. Ochoa, 30 years, and a schoolmaster 35 years of age; Domingo Luzans, 36 years; Margarito Zarza, 50 years; Camilo Cejas, 40 years old; Jose Valdes, 14 years old; Manuel Martinez, 40 years old. These were buried at a point between the sugar estate of Tivo Tivo and the town, the Spaniards forcing the victims to dig their own graves before murdering them.

"For the purpose of brevity I will give the number of noncombatants assassinated each day. I have the names and can furnish them if required.

"On the 9th of April, 4.

"On the 15th, between Campo Florida and the sugar estate of Felicia, 10, whose corpses were left without interment.

"On the same day, on the road between Guanabacoa and Bacuranao, 5 persons, 2 of whom were cousins of mine.

"Over 100 persons were shot within a radius of 10 miles and not distant more than 6 miles from Habana, and within a period of fifteen days.

"All of these were noncombatants.

"The case against Julio Sanguilly, the imprisoned American citizen, is purposely delayed, so as to keep him incarcerated,

"In the case of my brother and myself, we were persecuted for the reason that we were American citizens and had charge of American church institutions in Habana.

"During the excitement attending the passage of the belligerency resolutions in Congress two dynamite bombs were placed in the church and exploded while we were holding service, but only resulted in the breaking of glass and causing a panic in the congregation. Our house was searched, but nothing incriminating was found, but we were arrested and imprisoned eight days, being released on the condition that we leave Cuba immediately. I would say that no charges were made against us. We immediately left Cuba.

"Mr. Toledo, an American citizen employed as a Bible distributor by the American Bible Society, was imprisoned in the town of Jaruco, and has mysteriously disappeared, and it is believed that he has been murdered.

"My brother and I are here for the purpose of laying these facts before

your committee and to urge the honorable Senate to either recognize the belligerency of the Cubans or to have the United States intervene for the sake of humanity and civilization. Those are the only methods of putting a stop to these frightful barbarities.

"Yours, respectfully, "A. J. DIAZ."

Senator MORGAN. Do you swear to all that?

A. Yes, sir.

Senator MORGAN. Then please sign it.

The witness then signed the paper.

Mr. MORGAN. I have concluded my remarks. I know very well that at this session, which is about to draw to a close or fall to pieces, I do not know which to call it, the question that concerns the people of the United States so much must be left in the hands only of the Executive. I have no means of forecasting what the Executive action is going to be. I have, however, some convictions as to the powers of the Executive which I think entirely proper to advert to for a moment. I believe that the Executive has the right to recognize the independence of a foreign country, because that is a diplomatic duty. That does not establish independence, but it merely commits our Government to the foreign government in the light that it will exchange with that Government diplomatic relations. Of course he can appoint an ambassador or minister to such government after he has recognized it, but that appointment has to be ratified by the Senate before it is valid. Of course he must get his supplies to support the legation from the consent of the Congress of the United States. So that after all the action of the President in his constitutional function is not entirely independent of the Congress of the United States, even in matters that may be called strictly diplomatic, except so far as he conducts diplomatic correspondence with foreign governments, and with that we have not any right to interfere unless we first get his consent.

The other day I made the point here that under the statute the President of the United States was compelled (section 2001 of the Revised Statutes) to furnish information to the Congress of the United States as soon as possible or as soon as practicable, I believe is the language of the statute, of such instances as have occurred in the case of the *Competitor*, where some of our citizens have been arrested and have been tried by Spanish military court-martial in what they call a time of peace—we know it is a time of war—and have been condemned to death. Those citizens are still in jail, and among the letters that I put into the RECORD is one from one of those men now in jail, certainly a very bright and intelligent man. He went out for the purpose of being the correspondent of a newspaper, and I should say from the way he writes that he is most admirably qualified for that duty.

I have here a letter from Gen. Bradley T. Johnson, who has recently gone to Cuba. I do not know that he went in company with General Lee, but he went about the same time. I will read an extract from what he says in his letter as special correspondent of the Philadelphia Press, dated Habana, June 1, and Key West, June 4, sent by telegraph, I suppose, although I do not know. He says:

UNDERSTANDING WITH SPAIN.

It is reported from Madrid, and generally believed, that the United States and Spain have arrived at an understanding—that the former shall intervene and induce Gomez and Maceo and the Cuban Republic to lay down their arms and accept autonomy on the basis of peace, the United States to be paid for this service with a reciprocity treaty with Cuba, free government in Cuba, and free trade with the United States.

If this is so, Mr. Dupuy de Lôme will have proved himself an able and skillful diplomatist. He has pulled the wool over the eyes of Mr. Olney and made a catspaw of Mr. Cleveland. If the President succeeds in inducing the rebels to lay down their arms on the promise of autonomy, he will deliver them bucked and gagged into the hands of Spain, when home rule will be carried out as was the amnesty of Charles II, after the Restoration, when the amnesty was executed by executing the amnestied.

If, on the other hand, autonomy is refused by the Cubans, the United States will refuse to have anything further to do with them. It is "heads I win, tails you lose," and Mr. de Lôme stands winner in either event.

But the thirty pieces of silver to be paid to the United States for her services will turn into copper. Cuba will produce nothing. It will be a howling wilderness, and she will not be able to buy from the United States, and reciprocity will be a sham, a delusion, and a snare. She will be taxed to her shirt, and have nothing wherewith to buy of the United States. Home rule is impossible.

Spain charges $400,000,000 debt to Cuba—all colonial expenses of the Philippine war, of the last ten years' wars, and of this war. This debt is represented by bonds known as Cuban bonds at 6 per cent, generally held in France and Amsterdam.

SPANISH HOME RULE.

The basis of Spanish home rule must be that Cuba shall pay this debt, $24,000,000 per annum interest to be paid by 1,000,000 whites and half a million blacks. Taxation will necessarily fall on the working men and industrial classes, and the Spanish tariff will raise $24 per capita for every white man, woman, and child on the island; an average family will pay $120 per annum, or two hundred and forty days' wages every year. Two-thirds of the workers' lives will be spent in laboring to pay the Spanish debt.

It is impracticable, it is impossible, it is cruel to load an innocent people and unborn generations with such a burden. The Cubans did not spend the money. It was spent by the Spanish Government. It may be good colonial policy; it is against human nature for colonists to enjoy it. The Cuban Republic has threatened death to anyone who proposes peace on any other terms than that of independence, and Gomez and Maceo are said to have shot men for advocating autonomy. It is, then, interesting to see the flag of truce under which Mr. Cleveland's sword of Joab shall be carried.

AS THE WAR GOES ON.

The war drags along. The captain-general has revoked his embargo on American-owned tobacco, but no tobacco has been planted, and in a year Cuban cigars will be doubled in price. It will be a good thing for Connecticut and Pennsylvania wrappers. The two parties intend that neither shall have the island. They will make it a mass of ruins and a place of waiting, so that nothing shall be left for the conqueror whoever he may be.

Men are killed every day—women, sometimes, too; and the Government at Washington is searching law books to find out a definition of war. It is like the Confederate general at Malvern Hill, who, after 300 guns had been thundering for hours and shaking heaven and earth, turned to his adjutant-general and said in the simplest way—he was deaf as a post—"Major, do you hear anything; I think I hear a noise."

The policy of the Spanish here will be to throw dust in Lee's eyes. I forward a genuine circular of Maceo. It has his autograph. He commands the Cuban troops in Pinar del Rio, the western province of the island. The circular explains itself:

"Republic of Cuba, Invading Army, Second Division, Circular No. 710.

"Being informed of the down spiritedness known to exist in the royal ranks owing to the American intervention in our political affairs, which will shortly terminate this struggle, and the lack of Spain's means to continue the war between the tyranny and this country's right to be free and constitute itself into an independent republic, I have ordered that chiefs of columns will receive and remunerate the suffering Spanish army soldiers who present themselves to our authorities, armed or unarmed, in assurance that they will be better treated in the liberating army, and a promising future can be offered them and their families. And for the purpose of general knowledge, I herewith draft this instrument.

"A. MACEO.

"LA SOLEDAD, *April 23, 1896.*"

The letter is signed by Bradley T. Johnson.

One word in conclusion. I do not pretend to know whether the statement is true that the President of the United States is endeavoring to enter into negotiations with the Spanish Government or between the Spanish Government and the Cubans for the purpose of establishing Cuban autonomy or for any other purpose. I have no other information about it than such as has come through the newspaper agents and correspondents. Gen. Bradley T. Johnson is a man of too much character to risk his reputation upon a statement that has no merit in it at all, that is merely a conjecture. He speaks of facts that are discussed in Habana, and discussed freely, doubtless, because they would not get to his ears unless they were.

The President of the United States may have it in his mind to interfere between Spain and Cuba as he interfered in the Hawaiian Islands between Liliuokalani and Dole. If he has, I hope he will be influenced by counsels of sufficient wisdom to prevent him from undertaking to compromise the United States or to compromit it, I will use that word, by an unauthorized interference in the affairs of a foreign country. If that is what the President wants to do, and if that is the substitute he offers for the simple recognition of the belligerency of these people, which is our right and I think our clear duty, I regret very much that he can not see this question in the milder light in which I have presented it, and see that our duty in this business, if we are to preserve our record as an honorable nation, must be confined to the protection which we should give to our own citizens, and to the facts that are known to exist in regard to the war in Cuba, and to the declaration of our neutrality between the belligerent powers.

From the beginning to this moment I have never thought of the intervention by the Government of the United States with actual force in any of these affairs until the capture of the *Competitor*. But I can not reconcile it to myself that the young man Melton, who writes this intelligent letter, and his colleague there, another American whose name I can not call for the moment, should be loaded with chains inside of a filthy dungeon where a hundred men are confined in a space not so large as one-fourth of this Chamber and where they get 3 gallons of water per day. I can not reconcile it to myself that the President should withhold those facts from Congress. If he should communicate them to us, Congress can authorize him, as he is not now authorized by law, to proceed to use any force that may be necessary for the purpose of taking these people out of unlawful custody, and when I say unlawful custody I mean any custody that is opposed to the laws of nations.

I regret very much indeed that any state of feeling should exist between the President of the United States and Congress which would forbid him for one moment from coming to us in an open, frank way and laying before us the correspondence in regard to the *Competitor*, so that we may determine whether it is a case in which we ought to authorize the President of the United States even to make war for the release of these people. Without our authority he is forbidden by the statute to take any step of that kind. The statute says he may take any action that he sees proper that does not amount to acts of war. I think we are leaving here under circumstances that really distress the public mind in the United States. If we knew the course that the President intended to pursue, the matter might be very different. I trust in God that all that may occur will be done in such a way that Congress can easily reconcile it to itself to come in and support the Executive arm with all its power.

One thing I deprecate more than any other is that any internal schism upon any question whatever should have the slightest effect upon our unity as a nation. Our foreign affairs should be conducted by every Department of the Government as if it were the will of one man. Notwithstanding the distribution of powers between the different Departments, we ought to unite as one man in all we have to do in respect of foreign governments, with no cross

pulling or reluctance on the part of any Department of the Government to sustain the honor and power and integrity of the country and its flag in all foreign countries. I fear we are getting into such a condition now that the President of the United States will not see proper to confer with Congress unless he should do it as in the case of the Hawaiian Islands, for the purpose of getting out of difficulty into which the country had been thrown.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 1 to the bill (H. R. 6614) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897.

The message also announced that the House had passed a bill (H. R. 9409) making appropriations to supply deficiencies in appropriations for expenses of the House of Representatives and other purposes for the fiscal year 1896; in which it requested the concurrence of the Senate.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. TELLER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have been unable to agree.

H. M. TELLER,
W. B. ALLISON,
F. M. COCKRELL,
Managers on the part of the Senate.

WILLIAM W. GROUT,
MAHLON PITNEY,
A. M. DOCKERY,
Managers on the part of the House.

The report was concurred in.

Mr. TELLER. I move that the Senate recede from amendment numbered 201, which is to provide for the transfer of certain District of Columbia funds.

Mr. HILL. What is the amendment?

Mr. SHERMAN. I should like to have the amendment read.

Mr. TELLER. I will read it, if Senators desire it.

Mr. HILL. I should like to know what it is.

Mr. TELLER. I will read it:

Provided, That not exceeding $300,000 of the surplus general revenues of the District of Columbia remaining on the 1st day of July, 1896, shall be transferred to the water fund, to be applied in payment in full of the balance of the principal of the debt incurred for the 48-inch and Fourteenth street water mains, and in part of the principal of the debt incurred for increasing the water supply as provided in the act of July 15, 1882.

When the committee acted upon this matter we were not advised whether there was that amount of money to be transferred. We find there is. Therefore we desire to recede from the amendment.

Mr. COCKRELL. The amendment was to strike out the proviso.

Mr. TELLER. The amendment was to strike it out.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Colorado to recede from amendment numbered 201.

The motion was agreed to.

Mr. TELLER. I move that the Senate further insist upon its amendment and request another conference with the House of Representatives on the disagreeing votes thereon.

Mr. PLATT. What matters are still in disagreement?

Mr. TELLER. There is a large number of amendments, but the real controversy is as to the price that the Government shall pay for gas lamps. There is some controversy about electric lights, but that, I think, is not a very serious one. The price to be paid per gaslight is one matter which is in pretty sharp dispute between the House committee and the Senate committee.

Then, there is the subject of the charities, as to which there is a large number of amendments, which makes it appear to be a good deal, although it is practically only one matter, one principle.

Mr. PLATT. These two subjects are all?

Mr. TELLER. They are the real matters in dispute.

Mr. MILLS. What is the controversy in regard to gas?

Mr. TELLER. The present contract is for $20.50. The House proposes to put it down to $16. The difference has been the point of controversy. We have been trying to arrange the matter between the two branches.

Mr. MILLS. Between $20 and $16.

Mr. TELLER. There is a question whether the lamps shall burn 3,000 hours, as the law now provides, or whether they shall burn 3,732, and there are some other things connected with it. That relates to gas.

With respect to the charities, of course it is understood that the House made a lump appropriation of nearly $100,000, and the Senate distributed it as it had been distributed heretofore; and that is the controversy between the two bodies on that matter.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Colorado that the Senate further insist upon the amendments and ask a conference with the House of Representatives on the disagreeing votes thereon.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate; and Mr. TELLER, Mr. ALLISON, and Mr. COCKRELL were appointed.

Mr. GORMAN. Do I understand that the conference report has been disposed of?

The PRESIDING OFFICER. The report has been concurred in.

Mr. COCKRELL. It can be reconsidered.

Mr. HARRIS. If the Senator from Maryland desires to be heard, I will move that we reconsider the action of the Senate.

Mr. GORMAN. I desire to say only a word on the bill. I understand the conferees have reported a disagreement as to two or three items, including lighting.

Mr. TELLER. Gas lighting and electric lights and the charities are really the matters in controversy.

Mr. GORMAN. I trust the Senate conferees on this bill will not yield any further. There seems to be a disposition on the part of the coordinate branch absolutely to ignore all the recommendations of the Senate on the various appropriation bills. They seem to have come to a frame of mind that the Senate ought not to amend the bills in any substantial way. I understand that so far as it is agreed to our conferees have probably been compelled to give way on the great items that are absolutely necessary for the health and comfort and prosperity of the people of this city.

We have had a refusal to give us additional water supply, with two or three million dollars of the money of the citizens invested by Congress in a tunnel to bring in an additional supply to the city lying there dead and idle. A report of the engineers, under a commission appointed by the Chief of Engineers, is in favor of it, yet I understand we have been compelled to give it up.

Mr. TELLER. Certainly.

Mr. GORMAN. On the other great item, to protect the city with a sufficient number of police, we have been compelled to yield.

Mr. TELLER. I will say that the House made an amendment adding 25, and the Senate added 75. We finally took 25 from the Senate number, making it 50, yielding two-thirds.

Mr. GORMAN. That is done when the number of police is known to be insufficient to cover the territory and to keep the peace with a population that is growing, while a class of people are coming in here who, in many respects, require great looking after. When sister cities near this are compelled to detail their officers to come here and to aid and look after the class of people who naturally come to the Capital, we can not have protection, when the Government pays only a part of the cost and the citizens are amply able and willing to pay their share of it. Neither are we to have proper improvements of the streets.

Now comes the matter of the lighting of the Capitol, the parks, the avenues, and the streets. Two years ago, when I was assigned as one of the conferees on the District appropriation bill, we agreed, after a long conference, to fix a lower rate for lighting this city than any city on the Atlantic Coast. The price stands to-day for lighting lamps lower than in any other city. It was the understanding on my part at that time—and that is the reason I make this statement—that we were fixing the price at so low a rate that it should not be disturbed until there was some change in conditions which made it possible to secure fairly a lower rate. At this session another committee, as was so well stated by the Senator who now occupies the Chair [Mr. FAULKNER], after a thorough investigation, came to the conclusion that the rate we fixed two years ago was lower than it ought to have been; that is to say, the difference between 89 cents and $1 a thousand feet. There now comes from the coordinate branch, after this action of Congress on an appropriation bill two years ago, which was practically the unanimous action of both Houses of Congress on another bill, a demand for another cut, simply because we are dealing with a corporation. I think there is such a thing as fair and honorable dealing with all interests, corporations included, and I trust the conferees on the part of the Senate will not further surrender. We have surrendered on the water question, on the protection of the city, on the improvements of the streets, above all things the schools, and for the sewerage for the health of the city.

I think it is time, Mr. President, that the Senate should assert itself; and, so far as I am concerned, I should much prefer that no appropriation bill whatever should pass at this session of Congress rather than to make a further surrender. It will be, in my judgment, I may say almost disgraceful, if we can not stop this matter at some point.

Then there is the matter of charities. It is proposed by the other branch of Congress that we shall make no provision which can be enforced for the charities to take care of the poor of the District of Columbia and to look after the maimed in hospitals, all because, Mr. President, there has grown up a desire in certain quarters at this session to bring in a religious question in connection with those necessary expenditures. We are threatened daily

at these conferences that Congress will have to remain here, rather than they will give way. I prefer that Congress should remain here until December next rather than that this body shall do injustice to these great charitable institutions which we have fostered and built up and encouraged, and which have conducted their affairs as well as any institutions in this country.

The Senate in its action proposed to continue the appropriations, which have heretofore been satisfactory, precisely as we made them at the last session. We also proposed to appoint a commission to examine the whole question and ascertain whether there is any defect in the management, whether any improvement can be made in the manner of conducting these institutions, as to the number of them, and whether any amount of money which has been appropriated goes to any church. We prohibited the last by express language, as I understand, in the amendment of the Senate, and yet we are held here and threatened that we shall be kept here for an indefinite period unless we surrender. Mr. President, I would remain here. I think it is time for our conferees to notify those who have charge of bills elsewhere that that threat will not intimidate the Senate. Our action is in strict conformity to the law. It is economical; it is just to every interest; it discriminates in favor of none.

I stand by this bill as the Senate has passed it, because it is the law to-day, and the other branch is seeking to change the law. The House which attempts to change the law on an appropriation bill, if the other House objects, must give away. We are in the right, and I trust our conferees will not recede one inch further. It would be, as I have said, almost disgraceful at this stage of the proceedings to do so. Is it possible that religious prejudice will carry us so far that these two great hospitals in the District of Columbia will be deprived of the power to attend the unfortunates who meet with accidents daily upon the streets?

I want to say, Mr. President, that so far as I am concerned the fear of remaining here six months will not drive me from the position which I have taken upon this measure, and I trust it will not drive the Senate.

Mr. COCKRELL. Let the motion be put, Mr. President.

Mr. HARRIS. I withdraw the motion to reconsider the vote by which the conference report was concurred in.

The PRESIDING OFFICER. The motion to reconsider is withdrawn, and the conference report is concurred in.

DANIEL D. JENNINGS.

Mr. TURPIE. I ask unanimous consent for the present consideration of the bill (H. R. 2947) increasing the pension of Daniel D. Jennings, late of Company G, Sixty-fifth Ohio Volunteers.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the name of Daniel D. Jennings, a private of Company C, Sixty-fifth Ohio Volunteer Infantry, and to pay him a pension of $30 a month in lieu of the pension he is now receiving.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 2708) to constitute a new division of the eastern judicial district of Texas, and to provide for the holding of terms of court at Beaumont, Tex., and for the appointment of a clerk for said court.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes; insisted upon its disagreement to the amendments of the Senate to the bill numbered 69 and 70; agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SHERMAN, Mr. CURTIS of Kansas, and Mr. PENDLETON managers at the conference on the part of the House.

ENROLLED BILL SIGNED.

The message further announced that the Speaker of the House had signed the enrolled bill (H. R. 2708) to constitute a new division of the eastern judicial district of Texas, and to provide for the holding of terms of court at Beaumont, Tex., and for the appointment of a clerk for said court, and it was thereupon signed by the Vice-President.

POST-OFFICE APPROPRIATION BILL.

Mr. ALLISON submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 1 to the bill (H. R. 6614) "making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following: "*Provided*, That no post-office established at any county seat shall be abolished or discontinued by reason of any consolidation of post-offices made by the Postmaster-General under existing law, and any such post-office at a county seat heretofore consolidated shall be established as a separate post-office at such county seat: *Provided, however*, That this provision shall not apply to the city of Cambridge, Mass., or Towson, Md.: *And provided further*, That hereafter no station, substation, or branch post-office shall be established beyond the corporate limits or boundaries of any city or town in which the principal office to which such station, substation, or branch office is attached is located, except in cases of villages, towns, or cities of 1,500 or more inhabitants, not distant more that 5 miles as near as may be from the outer boundary or limits of such city or town in which the principal office is located"; and the Senate agree to the same.

W. B. ALLISON,
R. F. PETTIGREW,
CHARLES J. FAULKNER,
Managers on the part of the Senate.

E. F. LOUD,
J. C. KYLE,
GEORGE W. SMITH,
Managers on the part of the House.

The PRESIDING OFFICER (Mr. FAULKNER in the chair). The question is on concurring in the report of the conference committee.

Mr. PLATT. If I understand the reading of that report, it allows a consolidation of post-offices by taking in the smaller offices if they are not more than five miles distant from the outer boundary of the city or larger place. Is that it?

Mr. ALLISON. That is the effect of the report.

Mr. PLATT. To what does the provision as to the 1,500 or more inhabitants apply?

Mr. ALLISON. The provision applies to villages, towns, or cities containing 1,500 or more inhabitants within a radius of five miles from the outer boundary of the principal office.

Mr. PLATT. I do not quite get it yet. If the town or village does not contain 1,500 inhabitants, can it consolidate with the larger office?

Mr. ALLISON. It can not.

Mr. PLATT. So that the larger place is to be consolidated and the smaller place is to retain the post-office. That is very remarkable.

Mr. ALLISON. That may seem very absurd to the Senator, and yet the object is, so far as I can understand it, to confine free delivery to the inhabitants of large cities and to towns and villages of 1,500 or more inhabitants.

Mr. GORMAN. Mr. President, I take it for granted that this conference report will be concurred in; but I understand the change which has been made from the amendment inserted by the Senate in its first proposition—that there should be a separate post-office maintained at every county seat except Cambridge, Mass.—is the addition of Towson, Baltimore County, Md., making that another exception. Otherwise it applies to every county seat in the United States.

Mr. ALLISON. Yes.

Mr. GORMAN. I am aware that the action of the Senate conferees in yielding to the insistence of the House that the small town of Towson, in Maryland, should be added as an exception was brought about by one of the most extraordinary actions on the part of post-office officials which I suppose has ever been witnessed in this country.

The general proposition that every county seat in the United States should have a separate post-office was so perfectly fair that there was scarcely a dissenting vote to the proposition in the Senate, and there ought not to have been elsewhere, but immediately after the passage of that amendment by the Senate the greatest activity that I have ever known to be exhibited by officials of the Government was shown in that case. The agents of the Post-Office Department, the employees who are paid for the purpose of looking after the mails of the city of Baltimore, were sent into that community and publications were made, both over the signatures of the officials and otherwise, that there was an attempt being made to deprive the people of that locality of free delivery, and that if the amendment of the Senate should stand they would be deprived of the luxury of having two or three carriers to deliver letters within the town of Towson. A considerable amount of excitement was created by these post-office officials, and petitions came to the conferees not to deprive them of that privilege, notwithstanding the fact that it was perfectly in the power of the Postmaster-General to continue the free delivery without consolidation. In other words, the postmasters especially interested in having their jurisdiction extended, in order that the receipts of their offices and their salaries might be increased, have been used to misrepresent and mislead the people. It was successfully done, and the conferees on the part of the Senate in this case, as in nearly all others, have had to give way to another branch of the Government.

As to the amendment offered by the distinguished Senator from Florida [Mr. PASCO], I think that was a wise provision as it stood, and that there should not have been any consolidation of these offices outside of a reasonable limit. The conferees in this case have fixed a limit of 5 miles. That will eliminate a great many of the offices which have been consolidated, which come within

my knowledge, and will go very far toward accomplishing the object we had in view, although I should have preferred that it had been confined to the limits of the city itself. I trust that hereafter (and I shall try to make it my business hereafter) we shall take this matter up when we have better opportunity to discuss it and look into it. I do hope that the Post-Office Committees of the two Houses of Congress will in the near future go more thoroughly into the conduct of this great Department and see if we can not have some genuine reform, because that great Department is treated as no other Department of the Government. Lump appropriations are made, and they have had, practically, liberty to do as they please with the sixty or seventy million dollars that we have appropriated.

Mr. CULLOM. Ninety million dollars.

Mr. GORMAN. Ninety-odd million dollars we have appropriated. There ought to be some restraint upon these officials, who in this case (it is true in small matters) have acted in a manner which I think does not tend to the promotion of confidence in the way in which that Department is conducted, and if its power through the agents of that Department and its appointees as postmasters can be used to a greater extent, as I know they have been used in a smaller way, it would be an abuse that would disturb the harmonious relations of the different departments of the Government.

Mr. PASCO. Mr. President, I realize the difficulties surrounding committees of conference in the disagreeing votes upon appropriation bills during the last hours of a session, and I am not disposed to resist the adoption of the present report, though it does not go as far in the direction which the Senate went as I wish it had gone. I hope, however, that the scheme of consolidating post-offices in districts will receive some check, and that there will be opportunities in the future to bring back the post-offices of the country in this regard to the plain meaning and intention of the law.

In my judgment, there is no statutory foundation whatever for any authority to consolidate post-offices located in different cities or towns. I shall not go over that argument again, as I presented it, I think, fully and at length in the remarks I made about the time the amendment was adopted some two months ago. Authority was given by an act approved in 1847 for the establishment of branch post-offices, but there never has been any authority, unless it has crept in by some recognition in appropriation bills, for the establishment of stations and substations. Those words have been adopted by the Department. They are not in the statutes. They are not in any legislation passed by Congress; and the Department has no more right to change these names than it has to change the names of counties to provinces or States to districts. The nomenclature is a part of the law and there is no direct authority in the law for the establishment of stations or substations. The only authority of this character under the law is for branch post-offices, and they may be established only within the delivery of the original office. The law never contemplated that a post-office should be discontinued and the delivery of another office extended over the same ground. Here we have around Boston the city office spread out to take into its delivery neighboring cities, towns, and hamlets, and covering more than 60 square miles of territory, far beyond the intention of any law that was ever enacted by Congress.

The people around Boston have been a great deal disturbed in consequence of this amendment. I have received a great many communications with reference to it. But the disturbance has, I believe, largely grown out of the publication of a letter from the Postmaster-General, which I understand was sent to the committee of conference on this bill to advise them, to guide them in their duties in coming to this agreement. I do not know whether there is any precedent for assistance of this sort coming from a departmental officer. The letter was published in the city of Boston. I did not suppose that any such letter existed at the time, but I made inquiry and found the original letter in the committee room and compared it word for word, and it is exactly as published in the Boston Herald in a communication from this city. I am not going to read the entire letter, but I shall read one paragraph, which contains a statement which is certainly unfounded; but coming from so high an authority, it is not strange that those who are interested have become disturbed and alarmed by the amendment. It says:

> At Cambridge and other places adjoining Boston, involving a population of nearly 200,000, they have been enjoying station service for twenty years, and if the Pasco amendment prevails these stations, together with the station established at the University of Virginia, as substation of Charlottesville, substations at Quincy, Ill., at the Soldiers and Sailors' Home, also several others, would be obliged to go back at once to fourth-class offices.

That very remarkable statement comes from the present Postmaster-General, and I can not understand how he could have fallen into such an error.

Mr. CULLOM. What is the office in Illinois?

Mr. ALLISON. Quincy.

Mr. PASCO. I have not the date of the letter. It was published in the Boston Herald on April 15. I compared the words of the letter as published with the original and they are alike. I will give the actual situation in a little while. I submit the article from the Boston Herald to be inserted as a part of my remarks:

PASCO AMENDMENT PROSPECT—HOPE NOW THAT IT WILL BE EITHER MODIFIED OR REJECTED—PROTESTS POURING IN AND THEY HAVE WEIGHT—SENATOR GORMAN, WHO OPPOSES POST-OFFICE CONSOLIDATION, WAITED UPON PERSONALLY—THE POSTMASTER-GENERAL'S LETTER.

[Special dispatch to the Boston Herald.]

WASHINGTON, D. C., *April 14, 1896.*

The prospect of securing such action from the conference committee on the post-office consolidations already made as to permit them to remain, if not to provide for the further extension of the system, are improving. It now seems likely that the Pasco amendment, forbidding the establishment or maintenance of such consolidations outside of the limits of cities or towns, will be materially modified, if not rejected entirely. Senator ALLISON is so busy with other appropriation bills that he will probably not have time, he says, to have a meeting of the conference committee on the Post-Office bill this week.

Meanwhile protests against the Pasco amendment are coming in, and they are having weight. Besides the letters and telegrams which are coming from residents in metropolitan postal districts which would be unfavorably affected by the incorporation of the Pasco amendment in the law, delegations of prominent citizens from all the stations in the metropolitan postal district of Baltimore have been here to see Senator GORMAN personally, and to impress upon him their desire to have the Pasco amendment changed, if it can not be defeated, so as to permit consolidations within a convenient radius of large cities, and they left feeling that they had made an impression on the Maryland Senator, who is, of course, the leader of the opposition to the consolidation scheme. The letter of Postmaster-General Wilson, addressed to the conference committee, and referred to in these dispatches last night, states the case so well that it seems desirable to give it in full. Its contents are as follows:

"The appropriation for service of the Post-Office Department to cover the fiscal year ending June 30, 1897, will, I am informed, be taken up by a conference committee of the Senate and House at an early date. The amendment offered by Senator PASCO provides as follows: 'That nothing herein contained shall authorize the establishment or maintenance of any station, substation, or branch post-office beyond the limits of any city or town in which the principal office to which such station, substation, or branch office is attached is located.'

"For the good of the service, I sincerely hope this amendment shall not prevail. There are many reasons why it should not. The establishment of stations up to and beyond the corporate limits of cities is of gradual growth and for the improvement of the postal service, and there are many communities adjacent to cities which, except for the invisible corporate line dividing them, would be as one city. The people outside the corporate limits of the principal town or principal place, in numerous instances, have important business interests and large investments, and feel that they are entitled to better postal facilities, and they should have them if the appropriation would warrant the extension of the service. This manner of extension has gone on for a number of years.

"At Cambridge and other places adjoining Boston, involving a population of nearly 200,000, they have been enjoying station service for twenty years, and if the Pasco amendment prevails these stations, together with the station established at the University of Virginia, as substation of Charlottesville, substations at Quincy, Ill., at the Soldiers and Sailors' Home, also several others, would be obliged to go back at once to fourth-class offices. In this event the postmaster's salary would be derived entirely from box rents and the cancellation of stamps, the maximum being $999; free delivery would necessarily be abolished; it would exclude the allowances for rent, fuel, and light, and miscellaneous items, which includes canceling machines, telephones, safes, etc., until such time as the Post-Office Department could be informed as to the receipts of the office and the population served. As the postmaster's salary is fixed upon the basis of the gross receipts for the four quarters preceding the adjustment, and after adjustment the new status does not become effective until the first of the ensuing quarter, it would require fifteen months before they could be assigned to another class.

"If the word 'maintenance' is struck out of the amendment, that would improve the situation, but, in my judgment, only to a limited extent. It would avoid the trouble of establishing post-offices, etc., referred to above, but, with the word 'maintenance' left out, the Post-Office Department would be prevented from establishing stations in future, which, to my mind, would be injurious to the service. For instance, New Haven has within its corporate limits one independent post-office 3 miles distant from the main office, while outside the corporate limits, but extending up to the corporate line, so that a stranger does not know when he goes from one to the other, there are three or four independent communities having independent offices, which post-offices are only 2¼ miles distant from the main office, being nearer than the independent office within the corporate limits. There is no reason, in my judgment, if the appropriation will warrant it, why these outside independent offices should not have the same postal privileges as the independent offices inside the corporate limits; in fact, the same postal privileges as at the main office.

"The amount appropriated by Congress for clerk hire to cover the fiscal year ending June 30, 1897, is so conservative that the power of the Postmaster-General to consolidate post-offices is limited in such manner that I fear I can not even abolish all the post-offices within the corporate limits of various cities throughout the Union, there being now within the limits of various cities 249 independent offices.

"If it is the desire of Congress to restrict the extension of the service and the improvement that will necessarily follow therefrom, I would suggest that it be confined to a limit of 5, 10, or 15 miles from the corporate limits."

Attached to the Postmaster-General's letter is a table showing the principal facts about the service in the metropolitan postal districts now established, including the following for the Boston district:

Stations and substations.	Population served.	Number of clerks.	Number of carriers.	Allowances.		Miles from office.
				Rent.	Clerks.	
Station E, Cambridge	15,887	9	23	$1,240	$7,100	3.25
Station F, Cambridgeport	41,218	7	22	1,100	5,600	2.50
Station H, Chelsea	31,295	7	20	1,850	5,800	3
Station M, East Cambridge	13,967	3	5	560	2,400	1.75
Station P, North Cambridge	10,447	3	6	500	2,600	4.75
Station R, Revere	7,437	2	7	450	1,400	5.25
Station U, Somerville	52,193	8	33	1,200	6,300	3
Station X, Winthrop	4,192	2	4	420	1,300	5.50
Substation 2	4,192	1	.....	.....	300	2.25
Substation 4	.....	1	.....	.....	400	2.75
Substation 7	.....	1	.....	.....	400	5.25
Substation 8	.....	1	.....	.....	300	3.25

This statement has support in a speech made by the Senator from Massachusetts [Mr. LODGE] a few days ago when this subject was before the Senate upon the consideration of a former conference report upon this bill, and I was surprised that he, knowing the community as well as he does, understanding the postal laws as well as he does, should virtually have indorsed this statement. I will read what he said in his few remarks made on the 1st of June. I regret that he is out of his seat to-day, but this matter can not be postponed. It is found on page 5950 of the RECORD, and is as follows:

There are no less than 157,786 persons now served from the Boston city-post-office who are not within the municipal limits, who under this amendment will be thrown out of that service and forced back on fourth-class post-offices and the service greatly deteriorated thereby.

Cambridge is one of the places enumerated further on at the close of the Senator's remarks.

It is also mentioned in the letter of the Postmaster-General. The city of Cambridge contains four stations, designated in the foregoing statement as stations E, F, M, and P. Those stations used to be four independent post-offices in my days when I was a student at college there. The population of the city at the present time is over 80,000 people, according to a recent enumeration, a larger city than Harrisburg, Pa.; and we are told by the Postmaster-General and by the Senator from Massachusetts that this large city will be made a fourth-class post-office if "the Pasco amendment" shall be continued in the bill without any change. Surely this statement was made in haste and without due consideration.

The population of the city is as intelligent as that of any other city in the Union. It is a university city and it is a county seat; and the people there are entitled to the very best postal service possible. Under no conditions could their office be reduced to the position of a fourth-class post-office. They are entitled to a first-class office. The population and the receipts of the post-offices or stations within the city limits justify the very best possible service that can be given to them, but they have been allowed to suppose from this letter of the Postmaster-General and from the remarks that have been made here in the Senate that their present postal facilities depend upon the defeat or modification of this amendment. The principal office—now Station E—became a Presidential office in 1849, forty-seven years ago, and it is now entitled to be a Presidential office, and under this amendment there could be stations at East Cambridge, Cambridgeport, and North Cambridge.

I understand a great many letters have been received here in reference to this amendment. I have received some myself. One or two are from my old classmates. They have come, many of them, from strangers. Some of them are opposed to this amendment, owing to this danger which they apprehend, that they will lose their postal facilities. But I have letters from some very intelligent people; one here from the publisher of the Grand Army Record, another from an officer of the Massachusetts Total Abstinence Society, and a good many from intelligent citizens in Boston and Cambridge, all approving of the amendment and hoping that it will be continued in the bill in the language in which it was originally adopted.

But, Mr. President, our conferees, I have no doubt, have done as well as they could, and it seems at present that this reform can not go on any further at the present time. The amendment has been shorn of a great deal of its strength, but I hope with the Senator from Maryland [Mr. GORMAN] that the time will come at another session when we shall be able to devote more time to this subject and when the amendment can be carried out in the shape in which it passed the Senate by a very decided majority upon a yea-and-nay vote during the present session.

The subject is a very important one. It seems to me that it is very undesirable that post-offices should be consolidated under the plan which has been going on for some time in the Department, originating long before the present Postmaster-General commenced his service, and for which the present Administration is not responsible. This practice has crept gradually into the law without any intention on the part of the legislative department that such a system of things should ever be established; and the indications are, from publications that have reached me, that a desire exists to extend the system a great deal further by establishing postal districts and discontinuing existing post-offices.

There is one feature of this matter that has not been considered. The matter was comparatively new to me when I first brought up the amendment. I had never given the subject any great consideration and I was not well informed in reference to it. I found, however, that a great many of my brother Senators on both sides of the Chamber were but little better off in the way of information than I was myself. But there is one point worthy of consideration in the future. The law requires that every postmaster shall give a bond for the conduct of his office; but there is no law that I have found which requires the clerks to give bond when they go out to take charge of these stations in cities where perhaps there may be, as at Cambridge, a population of 80,000 people. If I am correct, and I believe I am, there is no officer under an official bond in charge of the Cambridge office. These clerks are in charge of post-offices, and the intention of the law that every postmaster shall be bonded is avoided and can not be carried out under this arrangement. I understand that the postmaster of the principal office is responsible under his bond, but that is not the intention of the law. A postmaster in another city ought not to have this burden placed upon him.

Mr. President, I will not say anything further upon this matter to-day. It is an important and interesting question, and the future will give us further opportunities to consider it and bring about such reforms as Congress may think proper. I am opposed entirely to this system of consolidation. I gave my reasons at some length when the amendment was adopted. I am in favor of the restoration of every station and substation beyond the limits of the city or town where the principal office is located to its former position as an independent office. I hope we shall see the time when the present system, which has crept into the law, as I have already remarked, without any proper authority, will be entirely discontinued, and the post-office system will be restored as it used to be, with each office under its own postmaster, a bonded officer, and each community enjoying its own post-office.

The PRESIDING OFFICER. The question is on the adoption of the report of the committee of conference.

The report was concurred in.

HOUSE BILL REFERRED.

The bill (H. R. 9409) making appropriations to supply deficiencies in appropriations for expenses of the House of Representatives, and other purposes, for the fiscal year 1896, was read twice by its title, and referred to the Committee on Appropriations.

ELIZA SANDFORD.

The PRESIDING OFFICER laid before the Senate the bill (S. 1189) granting a pension to Eliza Sandford, returned from the House of Representatives at the request of the Senate.

Mr. GALLINGER. I move that the Senate recede from its disagreement to the amendment made by the House of Representatives, and agree to the same.

The motion was agreed to.

CONTEMPTS OF COURT.

Mr. HILL. I have given notice on several occasions that I desire to call up for consideration the bill (S. 2984) in relation to contempts of court. I should like to ask that it be taken up now.

Mr. PLATT. I hope the Senator from New York will not ask that it be taken up now. It is very late.

Mr. HILL. I will not ask the Senate to proceed with its consideration this evening, but I desire to have it taken up so that we may know what the unfinished business is to be for to-morrow.

Mr. PLATT. Does the Senator want to displace the unfinished business?

Mr. HILL. No one desires to speak upon the immigration bill, and it is not expected to pass at this session.

Mr. CHANDLER. I have an understanding with the junior Senator from Maryland [Mr. GIBSON], who I do not see in the Chamber, that the immigration bill will not be pressed in his absence. Therefore I shall be very willing myself to allow it to be temporarily laid aside, in order that the exceedingly meritorious bill which the Senator from New York has in charge may be taken up. I wish the Senator from Connecticut would let it come up. It might be passed within half an hour.

Mr. PLATT. The Senator from New Hampshire is facetious at times, and at times he is severe. This is one of his facetious times. I think the Senator from New York ought not to ask to take up the bill to-night with such a thin Senate present.

Mr. HILL. I think we ought to know what is to be the unfinished business for to-morrow. I have given way on several occasions, as the Senator from Connecticut knows, and I think I am entitled to have the bill considered. If the Senate does not want to pass it after it hears the arguments it may vote it down. I trust he will make no objection to the bill being taken up and made the unfinished business. I shall not ask to proceed further with it this evening.

The PRESIDING OFFICER. Does the Chair understand the Senator from New York to move that the Senate proceed to the consideration of the bill?

Mr. HILL. I will first ask unanimous consent. I hope my friend the Senator from Connecticut will not object.

Mr. PLATT. I do not think that this bill, which is an important measure, ought to be taken up now, and I move that the Senate adjourn.

Mr. SMITH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from New Jersey?

Mr. HILL. I am desirous of having this bill taken up, not for the purpose of discussing it to-night, but so that it may be made

the unfinished business. I shall have to call for the yeas and nays on the motion to adjourn.

Mr. SMITH. Will the Senator from Connecticut yield to me?

Mr. CHANDLER. I suggest that the bill be taken up to-morrow immediately after the routine morning business.

Mr. HILL. Of course I am entirely willing to do that. The Senator from Connecticut seems to be fighting it by every technicality. That is all.

Mr. PLATT. I am not fighting the bill by every technicality, but I do not want the bill taken up here to-night, and I do not know what we may want to take up to-morrow morning.

Mr. HARRIS. Will the Senator from Connecticut consent that the bill may be taken up for consideration after the routine business to-morrow morning, or immediately after the reading of the Journal to-morrow morning?

Mr. PLATT. That is precisely what I can not assent to, because I do not know what business the Senate may want to transact to-morrow morning.

Mr. HARRIS. Mine was an innocent question, and it is answered.

L. ROBERT COATES & CO.

Mr. SMITH. I ask the Senator from Connecticut to withhold his motion for a moment, that I may ask for the consideration of a bill. On behalf of the senior Senator from Maryland [Mr. GORMAN], who is absent in conference committee, I ask unanimous consent for the present consideration of the bill (S. 1583) for the relief of L. Robert Coates & Co., of Baltimore, Md.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. HARRIS. Let the bill be read for information, subject to objection.

The bill was read; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to consider it.

The bill was reported from the Committee on Claims with an amendment, in line 6, after the words "sum of," to strike out "$6,000" and insert "$5,273.30"; so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to L. Robert Coates & Co., of Baltimore, Md., out of any moneys in the Treasury not otherwise appropriated, the sum of $5,273.30, in full of the bill of said firm for steel plates furnished for and which were used in the construction of the United States light-house steamer *Zizania*.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EXECUTIVE SESSION.

Mr. HAWLEY. Will my colleague permit me to move an executive session?

Mr. PLATT. I will withdraw the motion to adjourn for that purpose.

Mr. HAWLEY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened.

PERSONAL EXPLANATION.

Mr. GIBSON. Mr. President, I desire to have the RECORD corrected with reference to an expression on the part of the Senator from New Hampshire [Mr. CHANDLER] as to my absence this afternoon. Whatever arrangement he may have had with reference to calling up the immigration bill I do not know, but I wish it distinctly stated that it was not owing to my absence that the Senator did not call up the bill, for I was present.

Mr. CHANDLER. Mr. President, when I said I did not desire to proceed with that bill during the absence of the Senator from Maryland, I did not mean that he was out of the city. I only meant that he was for the moment out of the Senate Chamber; that he was accidentally in the cloakroom for the moment. I know that there is no Senator more punctual in attendance and more faithful and zealous in the discharge of those public duties in which he interests himself.

Mr. HALE. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 43 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, June 9, 1896, at 12 o'clock meridian.

NOMINATION.

Executive nomination received by the Senate June 8, 1896.

CONSUL.

Richard M. Bartleman, of Massachusetts, to be consul of the United States at Malaga, Spain, vice David N. Burke, nominated and confirmed as consul-general at Tangier, Morocco.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 8, 1896.

PROMOTIONS IN THE ARMY.

Artillery arm.

Lieut. Col. Francis Luther Guenther, Fifth Artillery, to be colonel.

Maj. William Sinclair, Second Artillery, to be lieutenant-colonel.

Capt. Edward Field, Fourth Artillery, to be major.

First Lieut. Harry Reuben Anderson, Fourth Artillery, to be captain.

Second Lieut. Wilmot Edward Ellis, Fifth Artillery, to be first lieutenant.

POSTMASTERS.

Alexander M. Brownley, to be postmaster at Franklin, in the county of Southampton and State of Virginia.

William F. Rooney, to be postmaster at Waltham, in the county of Middlesex and State of Massachusetts.

HOUSE OF REPRESENTATIVES.

MONDAY, *June 8, 1896.*

[*Continuation of legislative day of June 6, 1896.*]

The recess having expired, the House was called to order by the Speaker at 10 o'clock a. m.

INTEREST OF INDIAN TRIBES IN VIRGINIA BONDS.

Mr. SHERMAN. Mr. Speaker, I present a resolution of inquiry, with a report from the Committee on Indian Affairs. It is a privileged resolution.

The Clerk read as follows:

Resolved, That the Secretary of the Treasury be, and he is hereby, requested to report to Congress what steps, if any, have been taken by the Treasury Department to collect or procure a settlement of the principal and interest of certain State bonds and stocks the ownership of which was assumed by the United States under authority of the Indian appropriation act of August 15, 1894, and upon which the United States has since paid interest to the several Indian tribes interested; and what efforts, if any, have been made to procure payment of the bonds of the original State of Virginia taken over under said act and now amounting to $1,400,000, of which sum, under the constitution of the State of West Virginia, an equitable proportion was to be assumed and provided for by the new State.

Mr. SHERMAN. I ask for a vote upon the resolution, Mr. Speaker.

Mr. KEM. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. KEM. If it be in order, I desire to raise the point of no quorum.

The SPEAKER. Perhaps the gentleman can raise it when the question of a vote comes.

Mr. KEM. I did not hear.

The SPEAKER. Perhaps the gentleman can raise it when the question of a vote comes.

Mr. KEM. I presumed I could, but desire to raise it now if it is in order.

Mr. SHERMAN. I ask for a vote upon the resolution.

The SPEAKER. The matter can be developed by a vote.

The SPEAKER proceeded to put the question.

Mr. RICHARDSON. Mr. Speaker, I would like to understand something about this resolution. It is not privileged, as I understand it.

Mr. SHERMAN. I will say to my friend that a part of the funds of these Indians were invested——

Mr. KEM. A parliamentary inquiry.

Mr. SHERMAN (continuing). In bonds of the State of Virginia.

Mr. RICHARDSON. What I want to inquire about this is, is it just introduced?

Mr. SHERMAN. It is simply a resolution of inquiry.

Mr. RICHARDSON. And simply introduced now?

Mr. SHERMAN. It is a privileged resolution; just a resolution of inquiry.

Mr. RICHARDSON. Has it been considered by any committee?

Mr. SHERMAN. It has been considered by the Committee on Indian Affairs and reported back favorably.

Mr. RICHARDSON. Unanimously?

Mr. SHERMAN. Yes, sir; it has been reported unanimously.

Mr. RICHARDSON. All right.

The SPEAKER. The question is on agreeing to the resolution.

The question was put; and the Speaker announced that the ayes seemed to have it.

Mr. KEM. No quorum.

The SPEAKER. Does the gentleman ask for a division?

Mr. KEM. Division.

The House divided; and there were—ayes 70, noes none.

Mr. KEM. No quorum.

The SPEAKER. The gentleman raises the point of no quorum.

Mr. SHERMAN. I move a call of the House.

The motion was agreed to.

The roll was called; when the following-named members failed to respond:

Acheson,	Fenton,	Loudenslager,	Robertson, La.
Adams,	Fitzgerald,	Maddox,	Robinson, Pa.
Aitken,	Fletcher,	Maguire,	Royse,
Aldrich, Ala.	Foote,	McCall, Mass.	Rusk,
Allen, Utah	Foss,	McCleary, Minn.	Russell, Ga.
Anderson,	Fowler,	McClellan,	Sauerhering,
Apsley,	Gamble,	McClure,	Settle,
Atwood,	Gibson,	McCormick,	Shannon,
Baker, Md.	Gillett, Mass.	McCreary, Ky.	Shaw,
Baker, N. H.	Hadley,	McEwan,	Shuford,
Barham,	Hall,	McLaurin,	Skinner,
Barrett,	Halterman,	McRae,	Smith, Ill.
Bartlett, Ga.	Haney,	Meiklejohn,	Smith, Mich.
Bartlett, N. Y.	Harris,	Meyer,	Snover,
Beach,	Harrison,	Miles,	Sorg,
Belknap,	Hatch,	Miller, Kans.	Spalding,
Bennett,	Heiner, Pa.	Milliken,	Sparkman,
Black, N. Y.	Hendrick,	Milnes,	Spencer,
Boutelle,	Henry, Conn.	Miner, N. Y.	Steele,
Bowers,	Hermann,	Mondell,	Stephenson,
Brosius,	Hicks,	Money,	Stone, W. A.
Brown,	Hilborn,	Morse,	Strait,
Catchings,	Hitt,	Moses,	Strode, Nebr.
Cockrell,	Howard,	Murphy,	Swanson,
Colson,	Hubbard,	Murray,	Towne,
Cooper, Fla.	Huff,	Neill,	Tucker,
Corliss,	Hulick,	Newlands,	Turner, Va.
Cousins,	Hull,	Noonan,	Updegraff,
Cowen,	Hutcheson,	Northway,	Wadsworth,
Cox,	Hyde,	Odell,	Walker, Va.
Crisp,	Johnson, Cal.	Ogden,	Warner,
Crowley,	Johnson, Ind.	Owens,	Washington,
Crump,	Kyle,	Patterson,	Watson, Ind.
Culberson,	Latimer,	Perkins,	Wellington,
Danford,	Lawson,	Phillips,	White,
De Armond,	Lefever,	Pickler,	Wilson, Ohio
Denny,	Leisenring,	Price,	Wilson, S. C.
De Witt,	Lewis,	Quigg,	Woodard,
Dinsmore,	Linton,	Raney,	Woodman,
Dolliver,	Livingston,	Ray,	Woomer,
Ellett,	Lorimer,	Reyburn,	Yoakum.

The SPEAKER. The doors will now be closed and the absentees will be called.

The doors were accordingly closed; and the Clerk proceeded to call the absentees.

Mr. JOHNSON of California (when the name of Mr. BARHAM was called). Mr. Speaker, my colleague, Mr. BARHAM, is absent by leave of the House.

Mr. JOHNSON of California (when the name of Mr. BOWERS was called). Mr. Speaker, my colleague, Mr. BOWERS, also is absent by leave of the House.

Mr. HEMENWAY (when the name of Mr. HATCH was called). Mr. Speaker, my colleague, Mr. HATCH, is detained at home by sickness, and I ask that he be excused.

There was no objection, and it was so ordered.

Mr. HENRY of Connecticut (when the name of Mr. TUCKER was called). Mr. Speaker, the gentleman from Virginia, Mr. TUCKER, is detained by illness, and I ask that he be excused.

There was no objection, and it was so ordered.

Mr. BISHOP (when the name of Mr. LEISENRING was called). Mr. Speaker, Mr. LEISENRING was called out of town by an accident on Saturday evening, too late to ask leave of absence. I ask that he be excused.

The SPEAKER. If there be no objection, the gentleman from Pennsylvania [Mr. LEISENRING] will be excused.

Mr. KEM. I object, Mr. Speaker.

The question being taken, Mr. LEISENRING was excused.

Mr. STRONG (when the name of Mr. WILSON of Ohio was called). Mr. Speaker, my colleague, Mr. WILSON, is detained at home on account of sickness, and I ask that he be excused.

The SPEAKER. If there be no objection, the gentleman from Ohio [Mr. WILSON] will be excused.

Mr. KEM. I object.

Mr. STRONG. I move that my colleague, Mr. WILSON of Ohio, be excused.

The question being taken, the Speaker declared that the ayes seemed to have it.

Mr. KEM. I ask for a division.

The House divided; and there were 120 ayes.

Mr. KEM. No quorum, Mr. Speaker.

The SPEAKER. The Chair hoped the gentleman from Nebraska had learned that a quorum is not necessary on a call of the House. [Laughter.]

Mr. DINGLEY. Mr. Speaker, I desire to offer the resolution which I send to the desk.

Mr. KEM. I rise to a parliamentary inquiry. I desire to know if there is a quorum present.

Mr. DINGLEY. It does not require a quorum for the consideration of the resolution which I have offered.

Mr. KEM. I desire to ask if it is not impossible to do business without a quorum.

The SPEAKER. The Chair will state to the gentleman from Nebraska that it is competent under the Constitution of the United States to do certain business without a quorum.

Mr. KEM. Then I wish I could amend the Constitution of the United States.

The SPEAKER. The Chair did not understand the gentleman's observation.

Mr. KEM. I only expressed a wish that I had the power to amend the Constitution of the United States.

The SPEAKER. There are certain things which are providential. [Laughter.]

Mr. SHERMAN. I ask unanimous consent that the gentleman be given that power. [Laughter.]

Mr. PAYNE. I object. [Laughter.]

Mr. DINGLEY. Mr. Speaker, I call for the reading of the resolution I have sent to the desk.

The resolution was read, as follows:

Resolved, That all leaves of absence heretofore granted to members of the House, except such as are granted on account of sickness of a member or sickness in his family, be revoked.

Mr. MCMILLIN. Pending that, Mr. Speaker, I would like to ask the gentleman from Maine whether he does not think it would be well to leave this matter in its present position until we see what course will be taken by the Senate within the next two hours? It is possible that if they pass the appropriation bill which we sent them last Saturday it will not be found necessary to call members back from their homes.

Mr. DINGLEY. The difficulty that we have had for two or three days in maintaining a quorum, with the knowledge that members are hourly leaving the city, compels us to take some such action as this resolution proposes.

Mr. MCMILLIN. I did not know but we might get along without it if the Senate should take certain action within the next two hours.

Mr. DINGLEY. I think no harm will come from the adoption of the resolution.

The resolution was unanimously agreed to.

Mr. DINGLEY. Mr. Speaker, I offer another resolution which I send to the desk.

The resolution was read, as follows:

Resolved, That the Sergeant-at-Arms telegraph to absent members and inform them the House has revoked all leaves of absence except where such absence is on account of sickness of a member or sickness in his family, and that their immediate presence is required at the daily sessions of the House for the purpose of transacting public business.

The resolution was adopted.

Mr. BABCOCK. Mr. Speaker, I desire to say, on behalf of my colleague, Mr. SAUERHERING, that I am in receipt of a letter from him stating that he has been called away by sickness in his family. I wish this fact to appear in the RECORD, and I ask that he be excused.

There was no objection, and it was so ordered.

Mr. DOCKERY. Mr. Speaker, I do not know whether or not leave of absence has been granted my colleague, Judge DE ARMOND, but will state that a few days since he was called home by the illness and death of a brother, and if leave has not been granted, I ask that he now be given indefinite leave of absence.

The SPEAKER. The Chair is informed that the gentleman's colleague, Mr. DE ARMOND, is not on the list of members who have been excused.

Mr. DOCKERY. Then I ask that he be excused, for the reason I have stated.

The SPEAKER. Without objection, the gentleman from Missouri, Mr. DE ARMOND, will be excused.

Mr. KEM. I rise to a parliamentary inquiry. Under the rule are not all gentlemen who have been excused on account of sickness of themselves or their families excused anyhow?

The SPEAKER. Not those that have not been excused. [Laughter.]

Mr. DOCKERY. But my colleague, Mr. DE ARMOND, has not, it seems, been granted leave of absence heretofore, and I am advised that he left to attend the funeral of a brother.

Mr. KEM. That may be true in this case. But other gentlemen have risen in their places and made personal excuses for gentlemen who have already been excused. I submit that the rule covers all such cases.

There being no objection, Mr. DE ARMOND was excused.

Mr. HENRY of Connecticut. I ask that the gentleman from Virginia, Mr. TUCKER, be excused on account of sickness.

There being no objection, Mr. TUCKER was excused.

Mr. HAINER of Nebraska. Mr. Speaker, last Friday my colleague, Mr. STRODE, informed me that he had received a letter announcing the sickness of his wife. I understand he left the city on Saturday, and I presume it was on that account. If he is not excused, I now ask that he be excused.

The SPEAKER. The gentleman's colleague has not been excused.

Mr. HAINER of Nebraska. Then I ask that he be excused on the ground stated.

There being no objection, Mr. STRODE of Nebraska was excused.

Mr. HOPKINS. I ask leave of absence for my colleagues, Mr. LORIMER and Mr. FOSS, on account of sickness in their families.

The SPEAKER. The gentleman from Illinois, Mr. LORIMER, has already been excused. Is there objection to excusing the gentleman from Illinois, Mr. FOSS, on account of sickness in his family?

There being no objection, Mr. FOSS was excused.

Mr. JOY. I ask that my colleague, Mr. HUBBARD, be excused on account of illness in his family.

The SPEAKER. Without objection, the gentleman from Missouri, Mr. HUBBARD, will be excused.

There was no objection.

Mr. BAILEY. I have been informed that my colleague, Judge ABBOTT, is detained at his home sick. I ask that he be excused.

There being no objection, Mr. ABBOTT was excused.

Mr. BRUMM. I have just been informed that my colleague, Mr. BROSIUS, left the city sick, and is now detained at his home by sickness. I ask that he be excused.

There being no objection, Mr. BROSIUS was excused.

Mr. DINGLEY. As we have now present more than a quorum of members, I move that all further proceedings under the call be dispensed with.

Mr. MCMILLIN. How many members are present?

The SPEAKER. One hundred and ninety.

The motion of Mr. DINGLEY was agreed to.

STATE BONDS OWNED BY THE UNITED STATES.

The SPEAKER. The question recurs on the resolution reported by the gentleman from New York [Mr. SHERMAN], which the Clerk will again read.

The Clerk read as follows:

Resolved, That the Secretary of the Treasury be, and he is hereby, requested to report to Congress what steps, if any, have been taken by the Treasury Department to collect or procure a settlement of the principal and interest of certain State bonds and stocks, the ownership of which was assumed by the United States under authority of the Indian appropriation act of August 15, 1894, and upon which the United States has since paid interest to the several Indian tribes interested; and what efforts, if any, have been made to procure payment of the bonds of the original State of Virginia taken over under said act and now amounting to $1,400,000, of which sum, under the constitution of the State of West Virginia, an equitable proportion was to be assumed and provided for by the new State.

Mr. MCMILLIN. From what committee does this resolution come? How does it come before the House?

Mr. SHERMAN. It is a resolution of inquiry, coming before the House on the report of the Committee on Indian Affairs.

The resolution was agreed to.

On motion of Mr. SHERMAN, a motion to reconsider the last vote was laid on the table.

DEFICIENCIES.

Mr. CANNON. I move to suspend the rules and pass the bill which I send to the desk.

The Clerk read as follows:

A bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for the expenses of the House of Representatives, and for other purposes, for the fiscal year 1896.

Be it enacted, etc., That the following sums, or so much thereof as may be necessary, be, and the same are hereby, appropriated out of any money in the Treasury not otherwise appropriated for the objects hereinafter expressed, for the service of the fiscal year 1896, namely:

HOUSE OF REPRESENTATIVES.

For compensation and mileage of Members of the House of Representatives and Delegates from the Territories, $25,000.

For miscellaneous items and expenses of special and select committees, $12,000.

CAPITOL BUILDING.

For the care of the Capitol Grounds in repairing damages to trees, foliage, and planting made necessary by recent storms, $900.

TREASURY DEPARTMENT.

That the Secretary of the Treasury be, and is hereby, authorized to credit the appropriations for the "Revenue Cutter Service, 1896," with a portion of the unexpended balance, not exceeding $9,000, of the appropriation for said service for the fiscal year ending June 30, 1895, and a portion of the unexpended balance, not exceeding $11,000, of the appropriations for the refuge station at Point Barrow, Alaska."

Mr. RICHARDSON. I ask for a second.

Mr. CANNON. I ask that a second may be considered as ordered.

Mr. RICHARDSON. I do not object to that.

The SPEAKER. Is there objection to considering a second as ordered?

Mr. KEM. I object.

The SPEAKER. Objection is made.

The SPEAKER appointed as tellers Mr. CANNON and Mr. RICHARDSON.

The House divided; and the tellers reported—ayes 181, noes 1.

So a second was ordered.

Mr. CANNON. Mr. Speaker, I will say but a word in explanation of this bill.

It is made necessary by the seating of additional members and for their pay and mileage during this Congress, $25,000 for the balance of the fiscal year.

Miscellaneous items and expenses for session of select committees, $12,000. Gentlemen who have kept track of the business of the House know that there has been a considerable expenditure in that direction, and it is absolutely necessary to meet the demand for the balance of the fiscal year.

For care of the Capitol Grounds on account of the recent storms, $900.

This is a proper and necessary expenditure for the purpose of keeping these grounds in proper order and repairing the damage done by recent storms. If it is not appropriated the ordinary regular force will have to be discharged for the balance of the fiscal year and work suspended on the grounds.

The next item in the bill is an expenditure making a certain amount of money available for the Revenue-Cutter Service, which is the amount of the unexpended balance of the last fiscal year, and the amount unexpended for the refuge station at Point Barrow, Alaska, also for the Revenue-Cutter Service. It becomes necessary on account of the expenditure for the fitting out of the expedition to Bering Sea.

It will be seen, therefore, that all of these are items immediately required and absolutely necessary, which makes it important that this bill should pass without delay.

Mr. RICHARDSON. Mr. Speaker, I believe that this is the first time in the history of Congress, as far as my observation goes, that it has been found necessary to pass a special deficiency bill to provide for the expenses mentioned by the gentleman from Illinois for contested seats and for the pay of new members seated during this Congress.

Mr. CANNON. Oh, no; it has been done at every session of Congress.

Mr. RICHARDSON. A special appropriation bill passed for the purpose of paying members seated during the session?

Mr. CANNON. Oh, well, you may call it a special appropriation or not, but this provision is always made in some of the bills.

Mr. DOCKERY. This grows out of the increase of the meager majority on the other side. [Laughter.]

Mr. RICHARDSON. I suppose it grows out of the additional members seated by this House.

Mr. CANNON. I ask a vote.

The question being taken on the motion of Mr. CANNON to suspend the rules and pass the bill (two-thirds voting in favor thereof), the motion was agreed to.

COMMITTEE ON APPROPRIATIONS.

Mr. CANNON. Mr. Speaker, I desire to pass the following resolution, which I think I can do by unanimous consent.

The SPEAKER. The resolution will be read.

The Clerk read as follows:

Resolved, That the Committee on Appropriations, or such subcommittees as they may designate, are hereby authorized to sit during the vacation for the purpose of considering and facilitating the business of the committee in advance of the next regular session; to be convened at such time as the chairman of said committee may order.

Mr. CANNON. This is the usual resolution.

The SPEAKER. Is there objection to its consideration?

Mr. KEM. I object.

Mr. CANNON. I move to suspend the rules and pass the resolution.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the resolution adopted.

PENITENTIARY MILITARY RESERVATION, FORT LEAVENWORTH.

Mr. BRODERICK. Mr. Speaker, I move to suspend the rules and pass House bill No. 8383, with the amendments authorized by the committee. They are incorporated in the bill which I send to the desk.

The SPEAKER. The bill will be read.

The Clerk read as follows:

Be it enacted, etc., That the Attorney-General is hereby authorized and directed to select on the military reservation at Leavenworth, Kans., within limits hereinafter described, a site for the erection of a penitentiary and other buildings, wall, and workshops for the employment of United States prisoners, with such improvements as he may direct in connection with the completion of the several buildings; said penitentiary to be of a capacity to accommodate at least 1,200 convicts, and to be situated on said grounds and within the following boundary lines: Beginning at a point at the northwestern intersection of Grant and Logan avenues, thence north 72° west, more or less, 4,500 feet, more or less, to a stone in the field north of the Government farm barn; thence due west 1,500 feet, more or less, to the north side of Logan avenue; thence along said avenue and its prolongation to the western boundary of the military reservation; thence south along said line to the southwest corner of said reservation; thence east along the south line of said reservation to the pike leading north from the city of Leavenworth to the post of Fort Leavenworth; thence north along said pike to the point of beginning; and that these grounds thus described shall be, and hereby are, set apart from the contiguous military reservation for United States penitentiary purposes and assigned to and placed under the care and control of the Attorney-General as a United States penitentiary reservation: *Provided*, That when the said United States Penitentiary shall be occupied and applied to the purposes contemplated by this act the buildings and grounds within the said military reservation of Fort Leavenworth that were transferred from the Department of War to the Department of Justice, in accordance with the provisions of the act of Congress approved March 2, 1895, shall be restored to the control of said Department of War: *Provided further*, That this prison reservation shall be open for military tactical purposes when such purposes do not interfere with the discipline of said prison.

SEC. 2. That the Attorney-General shall employ an architect skilled in the construction of penitentiary buildings, who, with the warden of the existing

penitentiary, shall prepare plans, specifications, and estimates, and submit them to the Attorney-General for approval.

SEC. 3. That upon the approval of plans and estimates the Attorney-General is authorized to incur the expense necessary to construct the penitentiary buildings thus approved, and for this purpose shall employ the labor of the convicts in the present United States Penitentiary at Fort Leavenworth that can, under proper guards, be used on the necessary stone, brick, and wood work and in the manufacture of lime on the reservation until the completion of the same, and shall use all the equipments for carrying on work that are in the possession of the present United States Penitentiary building, including the sawmill and shops equipped for working in iron, stone, brass, and wood, with the use of the animals and wagons there belonging to the United States for hauling material, and other necessary transportation; and said prison shall have the right to quarry stone for prison purposes in any of the quarries on the Fort Leavenworth Reservation: *Provided*, That no expense shall be incurred under this act until an appropriation is made with which to commence the buildings.

SEC. 4. That the cost of employing an architect and of building said penitentiary, workshops, and improvements thus authorized shall not, exclusive of the prison labor, exceed the sum of $150,000, of which no more than $50,000, or so much thereof as may be necessary, shall be expended in a fiscal year.

The SPEAKER. The question is on suspending the rules and passing the bill.

Mr. McMILLIN. In order to have an explanation of this bill, I demand a second.

Mr. BRODERICK. I ask that a second be considered as ordered.

The SPEAKER. The gentleman asks that a second be considered as ordered. The Chair hears no objection.

Mr. BRODERICK. The gentleman from Tennessee [Mr. McMILLIN] asks an explanation. In 1891 Congress provided for three Federal penitentiaries. One was to be located west of the Rocky Mountains and two east. No appropriation was made for the purchasing of the sites or the establishing of the prisons, and no prison was established under that act until a year ago, when the Fifty-third Congress converted the old military prison at Fort Leavenworth into a civil United States penitentiary. That took effect and the change was made on the 1st of last July. The military prisoners were kept in an old building that was erected there for commissary stores more than forty years ago. It is wholly unsuitable for a penitentiary. The building is situated inside the garrison; and it is not desirable by either the Department of War or the Department of Justice that it should remain there. The prison and the small yard inclosing it are under the control of the Department of Justice, while the military post and reservation are under the control of the War Department.

Now, the two Departments have agreed upon a new site. They have agreed to remove the prison from the garrison over into a corner of the military reservation, on Government land, where the site does not cost the Government a dollar. This site is agreed upon by the two Departments, so there is no difference of opinion in relation to it. The site is located about a mile and a half from the garrison, so that the government of the military post will not conflict with the government of the penitentiary or the authorities of that institution. This arrangement is agreeable to all concerned.

Mr. SAYERS. Will the gentleman allow me a question?

Mr. BRODERICK. Yes, sir.

Mr. SAYERS. I do not object to the bill. I wish an explanation in regard to it. As I understand, the proposition is to transfer certain buildings that are on a particular portion of the military reservation to another portion.

Mr. BRODERICK. No; they will rebuild; but this does not provide any appropriation. There is not a dollar to be expended under this bill or until the appropriation is made. But the most important thing in this bill is the authorizing of the employment of the prison labor in quarrying stone, which is plentiful on the military reservation.

Mr. McMILLIN. Does not this bill carry $150,000?

Mr. BRODERICK. No, sir; this bill carries no appropriation. It provides that the prison labor may be employed anywhere on the reservation in quarrying stone, in excavating for walls, and in doing such things as may be done preparatory to the erection of a building, without the expenditure of any money.

Mr. SAYERS. This bill has the approval of both the War Department and the Department of Justice?

Mr. BRODERICK. Yes. I have a letter here from the Secretary of War, in which he suggests an amendment in relation to the boundaries of the proposed site. That amendment has been made, and is incorporated in the bill that has been read, so that both Departments are satisfied with and approve this arrangement.

Now, if there are no questions, and if no gentleman desires to say anything, I will ask for a vote; but if any gentleman desires to speak I will yield to him.

Mr. McMILLIN. Mr. Speaker, I find this in section 4:

That the cost of employing an architect and of building said penitentiary, workshops, and improvements thus authorized shall not, exclusive of the prison labor, exceed the sum of $150,000, of which no more than $50,000, or so much thereof as may be necessary, shall be expended in a fiscal year.

Mr. BRODERICK. Yes; I will explain that.

Mr. McMILLIN. Now, is not that an appropriation of $150,000, limited only by the condition that there shall be only $50,000 expended each year?

Mr. BRODERICK. No; the gentleman will see——

Mr. McMILLIN. It is very peculiarly worded, and I ask the gentleman's own construction of it.

Mr. BRODERICK. At the close of section 3 there is a provision to which I call the gentleman's attention. It is as follows:

Provided, That no expense shall be incurred under this act until an appropriation is made with which to commence the buildings.

That is at the close of section 3. So that there is positively no appropriation carried in this bill—not a dollar.

Mr. HENDERSON. It is carefully guarded so as to prevent an appropriation being made; and the Committee on the Judiciary would not agree to it until it was amended so as to prevent that in this bill.

Mr. McMILLIN. So as to prevent an appropriation?

Mr. HENDERSON. So as to prevent an appropriation. After that it was unanimously agreed to.

Mr. McMILLIN. It provides for the employment of architects. How can they be employed without an appropriation?

Mr. BRODERICK. They can not be employed until an appropriation has been made.

Mr. McMILLIN. Then this is mere brutum fulmen.

Mr. BRODERICK. They may be employed when an appropriation is made.

Mr. McMILLIN. Then it is a bill for the erection of a penitentiary which does not erect a penitentiary?

Mr. BRODERICK. It is a bill providing the means by which certain preliminary work can be done without expense to the Government.

Mr. ELLIS. It is for the employment of the convict labor.

Mr. BRODERICK. These prisoners are there without anything to do. They are kept in their cells and have to be taken out and marched over the grounds to give them exercise. The warden wants work for them.

Mr. McMILLIN. Now, right there, I want to ask the gentleman whether this is not a change of the method of keeping prisoners from that adopted in past years. Heretofore we have made our contracts, as I understand it, with the penitentiaries of the States to take care of the prisoners and keep them employed; but it seems now that we are providing them with fans instead of hammers.

Mr. SAYERS. Mr. Speaker, if the gentleman will allow me. The last Congress passed an act by which the military prison at Fort Leavenworth was transferred to the Department of Justice, so that civil prisoners, convicts of the civil courts, might be confined in that prison.

Mr. McMILLIN. Is there any other prison of that kind?

Mr. SAYERS. None, I believe.

Mr. McMILLIN. Then that is a departure.

Mr. SAYERS. I will say to the gentleman that it is not a departure.

Mr. McMILLIN. It was a departure last year.

Mr. SAYERS. It was not a departure last year.

Mr. McMILLIN. That is what I was trying to get at.

Mr. SAYERS. If the gentleman from Tennessee will examine the laws passed in the Fifty-first Congress he will find that there is an act which provides for the construction of three military prisons.

Mr. McMILLIN. Three military prisons.

Mr. SAYERS. No, not three military prisons; three civil prisons.

Mr. BRODERICK. If the gentleman will permit. The act of the Fifty-third Congress converted this prison at Fort Leavenworth into a civil penitentiary.

Mr. SAYERS. So as to save the expense of constructing the three prisons.

Mr. BRODERICK. It was regarded as one of the three.

Mr. McMILLIN. Mr. Speaker, I demanded a second on this bill because I wanted to have an explanation of it, and let the House understand the necessity for it before it was acted upon. I will ask, as I have not had time to examine it, to have the report read in my time, so we can see the additional grounds that may be presented there.

The report (by Mr. BRODERICK) was read, as follows:

The Committee on the Judiciary, to whom was referred the bill (H. R. 6178) to establish a site for the erection of a penitentiary on the military reservation at Fort Leavenworth, Kans., and for other purposes, have had the same under consideration, and report to the House a substitute therefor.

The United States Penitentiary at Fort Leavenworth, Kans., was formerly a national military prison. The change was made about a year ago, and there are now about 600 prisoners confined therein. The penitentiary is situated inside the military post, and consists of old buildings, constructed over forty years ago, to be used for quartermaster's stores. These buildings are wholly unsuited and inadequate in every sense for a large modern prison. Beyond this, the prison, with a small prison yard, are now under the control of the Department of Justice, while the grounds surrounding the buildings are under control of the War Department.

The proposition now is to establish a site in the southwest corner of the Fort Leavenworth Military Reservation and about 2 miles from the garrison and return the old building to the control of the War Department. Both the military authorities and the Department of Justice approve this measure.

Your committee therefore recommend that the substitute here reported do pass.

Mr. McMILLIN. I will ask the gentleman in charge of the bill how long the situation that he describes there has existed, wherein these prisoners, instead of having something to do, have to be taken out and marched about for exercise.

Mr. BRODERICK. Under the old rule there were workshops in which the military prisoners were worked in the manufacture of such articles as were needed in the prison; but under the transfer that was made a year ago there was not specific authority to work these prisoners; so that from July last this condition has existed. While it is provided in the act making the transfer that they may be worked, not outside of the reservation, yet there is not specific authority to manufacture anything, and the Attorney-General says in his report, which I have here, that the authority was not deemed sufficient to put the prisoners at work in the shops; so that they have had very little or nothing to do. Now, we ask to have authority to put them to work quarrying the rock, which is inexhaustible on the reservation, and in excavating for this building, and they can do a hundred thousand dollars' worth of work for the Government this summer that will not cost one dollar. [Cries of "Vote!" "Vote!"]

Mr. TERRY. I just desire to say that I think this a necessary and proper measure. It was fully considered by the Committee on the Judiciary, and I hope there will be no objection to its passage.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and in the opinion of the Chair, two-thirds voting in favor thereof, the rules were suspended and the bill was passed.

INVESTIGATION OF FUR-SEAL FISHERIES.

Mr. DINGLEY. Mr. Speaker, I move to suspend the rules and pass the following Senate joint resolution (S. R. 155) to authorize a scientific investigation of the fur-seal fisheries.

The Clerk read as follows:

Resolved, etc., That the Secretary of the Treasury be, and is hereby, authorized to expend, from any moneys in the Treasury not otherwise appropriated, a sum sufficient to provide for the employment of persons to conduct a scientific investigation, during the fiscal years 1896 and 1897, of the present condition of the fur-seal herds on the Pribilof, Commander, and Kurile islands in the North Pacific Ocean and Bering Sea, said amount not to exceed for both said years the sum of $5,000.

The Secretary is also authorized to employ a stenographer in connection with this investigation at a rate of compensation not exceeding $1,500 per annum, and to pay his compensation and expenses out of any moneys in the Treasury not otherwise appropriated.

The President is authorized to detail, for the purposes of assisting in this investigation, any officer or officers or employees of the United States Government, their actual expenses and the expenses of the person or persons employed under the preceding paragraph to be paid by the Secretary of the Treasury out of any moneys in the Treasury not otherwise appropriated.

The President may detail a vessel of the United States for the purpose of carrying out this investigation.

Mr. DINGLEY. This joint resolution has been unanimously reported by the Committee on Ways and Means, and approved by the Treasury Department.

The SPEAKER. The question is on suspending the rules and passing this bill.

The question was taken, and, in the opinion of the Speaker, two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

SALMON FISHERIES OF ALASKA.

Mr. KNOX. Mr. Speaker, I move to suspend the rules and pass the bill S. 2022.

The Clerk read as follows:

A bill (S. 2022) to amend an act entitled "An act to provide for the protection of the salmon fisheries of Alaska."

Be it enacted, etc., That the act approved March 2, 1889, and entitled "An act to provide for the protection of the salmon fisheries of Alaska," is hereby amended and reenacted as follows:

"That the erection of dams, barricades, fish wheels, fences, or any such fixed or stationary obstructions in any part of the rivers or streams of Alaska, or to fish for or catch salmon or salmon trout in any manner or by any means with the purpose or result of preventing or impeding the ascent of salmon to their spawning ground, is declared to be unlawful, and the Secretary of the Treasury is hereby authorized and directed to remove such obstructions and to establish and enforce such regulations and surveillance as may be necessary to insure that this prohibition and all other provisions of law relating to the salmon fisheries of Alaska are strictly complied with.

"SEC. 2. That it shall be unlawful to fish, catch, or kill any salmon of any variety, except with rod or spear, above the tide waters of any of the creeks or rivers of less than 500 feet width in the Territory of Alaska, except only for purposes of propagation, or to lay or set any drift net, set net, trap, pound net, or seine for any purpose across the tide waters of any river or stream for a distance of more than one-third of the width of such river, stream, or channel, or lay or set any seine or net within 100 yards of any other net or seine which is being laid or set in said stream or channel, or to take, kill, or fish for salmon in any manner or by any means in any of the waters of the Territory of Alaska, either in the streams or tide waters, except Cook Inlet, Prince William Sound, Bering Sea, and the waters tributary thereto, from midnight on Friday of each week until 6 o'clock a. m. of the Sunday following; or to fish for or catch or kill in any manner or by any appliances, except by rod or spear, any salmon in any stream of less than 100 yards in width in the said Territory of Alaska between the hours of 6 o'clock in the evening and 6 o'clock in the morning of the following day of each and every day of the week.

"SEC. 3. That the Secretary of the Treasury may, at his discretion, set aside any streams as spawning grounds, in which no fishing will be permitted; and when, in his judgment, the results of fishing operations on any stream indicate that the number of salmon taken is larger than the capacity of the stream to produce, he is authorized to establish weekly close seasons, to limit the duration of the fishing season, or to prohibit fishing entirely for one year or more, so as to permit salmon to increase: *Provided, however*, That such power shall be exercised only after all persons interested shall have been given a hearing, of which hearing due notice must be given by publication: *And provided further*, That it shall have been ascertained that the persons engaged in catching salmon do not maintain fish hatcheries of sufficient magnitude to keep such streams fully stocked.

"SEC. 4. That to enforce the provisions of law herein, and such regulations as the Secretary of the Treasury may establish in pursuance thereof, he is authorized and directed to appoint one inspector of fisheries, at a salary of $1,800 per annum, and two assistant inspectors at a salary of $1,600 each per annum, and he will annually submit to Congress estimates to cover the salaries and actual traveling expenses of the officers hereby authorized and for such other expenditures as may be necessary to carry out the provisions of the law herein.

"SEC. 5. That any person violating the provisions of this act or the regulations established in pursuance thereof shall, upon conviction thereof, be punished by a fine not exceeding $1,000 or imprisonment at hard labor for a term of ninety days, or both such fine and imprisonment, at the discretion of the court; and, further, in case of the violation of any of the provisions of section 1 of this act and conviction thereof a further fine of $250 per diem will be imposed for each day that the obstruction or obstructions therein are maintained."

The SPEAKER. The question is on suspending the rules and passing this bill.

Mr. RICHARDSON. Mr. Speaker, I think we ought to have some explanation of the matter.

Mr. KNOX. Mr. Speaker, this bill has been unanimously approved by the Committee on Territories of the House and also of the Senate. It has also passed the Senate after full consideration and after a hearing of all persons who are interested in the salmon fisheries of Alaska. The bill results from the law that was passed by the Fiftieth Congress, which was rather crude and general in its provisions, and provided for a further inspection of the fisheries, in order that there might be subsequent legislation.

Now, the substantive proposition of this bill provides for the protection of salmon, so that they may reach their spawning grounds, in order that they may not be exterminated by the fisheries that are now going on. The sanctions of the bill are the appointment of inspectors by the Treasury Department, and authority being given to these officers to remove any such traps or dams as tend to the destruction of salmon, and a provision for the punishment of parties who violate the law. Hardly any more important bill can be passed this session than one to prevent the destruction of those vast fisheries, which are a great source of food supply not only to the people inhabiting Alaska but to all the people of the United States.

Mr. DINGLEY. If the gentleman will pardon me, Mr. Speaker, I simply desire to add my testimony to what he has already presented as to the absolute necessity for the passage of this bill in order to protect these important and valuable salmon fisheries.

Mr. LOUD. I will say, Mr. Speaker, that this bill has been submitted to the men who are interested in this industry on our coast, and that no objection is made to it by any of them.

Mr. KNOX. Let me add that the bill has the entire approval of the officials of the Treasury Department.

The rules were suspended and the bill was passed.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed without amendment the bill (H. R. 5280) for the relief of George W. Freeman.

The message also announced that the Senate had passed with amendment the bill (H. R. 2708) to constitute a new division to the eastern judicial district of Texas and to provide for the holding of terms of court at Beaumont, Tex., and for the appointment of a clerk for said court; in which the concurrence of the House was requested.

The message also announced that the Senate had passed the bill (S. 3141) granting a pension to Rachel Kern; in which the concurrence of the House was requested.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, the bill (S. 3141) granting a pension to Rachel Kern was taken from the Speaker's table and referred to the Committee on Invalid Pensions.

DAMAGES BY EXPLOSION.

Mr. ALDRICH of Illinois. Mr. Speaker, I move to suspend the rules and pass the bill which I send to the desk.

The bill (S. 1205) was read, as follows:

Be it enacted, etc., That the sum of $15,845.23, being the sum found just by a board of officers convened at Chicago July 17, 1894, under Special Orders No. 72, issued by command of Major-General Miles, of the Department of the Missouri, which sum is recommended by him, with the concurrence of the Major-General commanding the Army, be, and the same is hereby, appropriated, to pay the awards of said board, according to the following schedule, as set forth in their report made on November 3, 1894, and published in Senate Executive Document No. 21, third session Fifty-third Congress, to wit: P. J. Ryan, $1,307; Charles R. Cave, $1,840.61; Edward C. Huling, $742.26; Jacob R. Custer, $717.83; Herman Lehman, $829.75; Herman Grossman, $770; Phillip W. Raber, $1,848.99; F. A. Devlin, lessee, $160; Samuel B. Foster, $1,690.50; Amelia H. Dodge, $1,495.81; Frederick A. Howe, $893.06; Hellen Palmer, $946.75; James Wright, $1,213.68; W. H. Godair, $258.04; J. W. Morrison, $47.77; Mrs. J. E. Ellen,

$25; W. W. Morrill, $50; Silas H. Finch, $54.39; David Mayer, lessee, $45; Howlin Horgenroth, $125; H. N. Stephens, lessee, $12.55; John W. Byers, $105.33; Edward D. Murray, $100; Arthur W. Allen, $99.15; Emilie J. Smity, trustee, $19; T. A. Keene, $50; Hannah Sullivan, $40; Armory Warehouse Company, $18; W. F. Horn, agent, $25.91; Alice York, $305; total, $15,845.23.

Mr. RICHARDSON. Mr. Speaker, I demand a second.

The SPEAKER. Without objection a second will be considered as ordered.

There was no objection.

Mr. ALDRICH of Illinois. Mr. Speaker, this bill provides for compensating the parties who were injured by the explosion of a caisson in Grand Boulevard at the time of the parade by the regular troops during the summer of 1894, about the time of the riots in Chicago. The claims were proved up by the War Department and were transmitted to the House and the Senate by General Miles and Secretary Lamont. This bill was reported by both the House and the Senate committees unanimously, and it has passed the Senate, no objection having been made to it. The claims have been duly attested and their validity is unquestioned.

Mr. CANNON. Is there a written report accompanying the bill?

Mr. ALDRICH of Illinois. There is a report accompanying the bill.

Mr. RICHARDSON. I have sent for the report, but it seems that it can not be had.

Mr. CANNON. Will my colleague allow me to read this report, which is very brief?

Mr. ALDRICH of Illinois. Certainly.

Mr. RICHARDSON. Is it a printed report?

Mr. CANNON. It is. I will read it:

The Committee on Military Affairs, to whom was referred the bill (S. 1205) for the relief of persons who sustained damages by the explosion of an ammunition chest of Battery F, Second United States Artillery, July 16, 1894, having fully considered the same, recommend that it do pass.

House bill 3562, precisely similar to this bill, was favorably acted upon by the Committee on Military Affairs, and Report No. 398 made to the House.

Mr. RICHARDSON. I would like to ask the gentleman from Illinois how the Committee on Military Affairs got jurisdiction of these claims? This seems to be purely a case of claims, and I do not see how the Committee on Military Affairs can have obtained jurisdiction of it. This is certainly as much a claims bill as any bill to pay claims under the Bowman Act, or to pay French spoliation claims or depredation claims.

Mr. HOPKINS. If the gentleman will permit me, I will explain that. This is a matter that was under the supervision of the military authorities in Chicago, and that was investigated by order of the Secretary of War——

Mr. RICHARDSON. But how does that give the House Committee on Military Affairs jurisdiction to consider these claims?

Mr. HOPKINS. Well, I think it would naturally go before the Committee on Military Affairs.

Mr. McMILLIN. Will the gentleman please indicate what rule of the House would send these claims to the Committee on Military Affairs?

Mr. HOPKINS. I could, but I would not impeach the intelligence of the gentleman from Tennessee to that extent, for he has served here too long not to know all about it.

Mr. McMILLIN. You might increase the respect of the House for your own intelligence if you gave the information. I have never seen any such rule.

Mr. HOPKINS. Well, I am sorry for the gentleman.

Mr. McMILLIN. It does not exist. The gentleman from Illinois can not laugh off a matter of this kind. No such authority exists.

Mr. HOPKINS. Now, the gentleman from Tennessee and I will not get into a quarrel or split hairs over the question of what committee has control of this subject.

Mr. RICHARDSON. But you split hairs every time we bring up a claim on this side.

Mr. HOPKINS. Oh, no; I do not. I have been traveling with the gentleman from Tennessee on claims.

Mr. PAYNE. I suggest, Mr. Speaker, that it does not make any difference, so far as the motion before the House is concerned, whether the Committee on Military Affairs had jurisdiction originally over this matter or not. What the House wants to know now is, whether a committee of the House has thoroughly examined these claims and reported them favorably—this being a motion to suspend the rules and pass the bill. I agree with the gentleman from Tennessee that the Committee on Military Affairs would not have jurisdiction of this subject under the rules; but the bill having gone to that committee for consideration, and that committee having the intelligence to investigate it, and having investigated it and reported this bill unanimously, I do not see that, for the purposes of this motion, it makes any difference whether the committee had original jurisdiction or not.

Mr. McMILLIN. But my friend from New York and my friend from Illinois will admit that whatever committee properly had jurisdiction of the subject, that committee had a duty to perform, namely, to give the House full information, by its report, as to the character and validity of the claims.

Mr. PAYNE. Let me suggest further in that connection that the Committee on Military Affairs reported the House bill, accompanied by a very elaborate report, going into the question fully; but afterwards the same matter was referred to the Senate committee, and they made the brief report which has been read by the gentleman from Illinois [Mr. CANNON], referring to the first report, which, as I have said, gives full information on the subject.

Mr. McMILLIN. I was going by the report which the gentleman from Illinois read, containing, it seems, all the information which the Committee on Military Affairs has given us.

Mr. HOPKINS. The gentleman from Tennessee is under a misapprehension on that point. I hold in my hand a report of the Committee on Military Affairs under date of February 17, 1896, containing all the correspondence and an itemized statement of all the damages allowed by the committee—a report covering 17 pages in all. I trust that will entirely satisfy my friend from Tennessee.

Mr. CANNON. I have in my hand the report of the House committee—Report No. 398—the document I believe to which my colleague [Mr. HOPKINS] refers. It is apparently very complete, and undertakes to ascertain the damages from the explosion of a caisson in the streets of Chicago. I do not find, however, from a hasty examination of the report, any statement bearing one way or the other upon the liability of the Government for damages in this case. I do not find that the question whether there was negligence is canvassed. I find nothing to show whether, if this transaction were made the basis of a suit against a private party, the parties bringing the suit would be entitled to recover.

Now, there are many questions, it seems to me, presenting themselves for the consideration of the House in connection with this matter. First, was the Army of the United States rightfully there at the time of the explosion under orders that the superiors were authorized to issue? If so, and the accident resulted under such circumstances, is there any principle of law or equity requiring the United States Government to pay the damages? It is upon that exact ground that I desire to hear from my colleague, because I have not given this claim any attention. It is for only $15,000; and sooner than spend time upon it in prolonged discussion at this stage of the session I might prefer to favor the appropriation, especially (if I may be allowed the remark) as it seems to be an appropriation for citizens of my own State. But the question in my mind is whether the Government, without proof of negligence on the part of its agents, should pay for damages which could not be prevented or foreseen. Was the Government in fault?

Now, let me say a word in regard to the Ford's Theater disaster. It was ascertained in that case that the employees of the Government, the superintendents and others, were guilty of gross negligence; and in good conscience, exercising our discretion along the line of right and justice, we have made appropriations to remunerate in that case the injured or their families. Now, if it appears in the present case that the agents of the Government were careless—if there was negligence to such a degree that the Government through its agents was at fault, then it seems to me we can safely afford to pay the damages. But unless there is somewhere shown some shortcoming on the part of the Government through its agents, then the query with me is—and I submit it with great respect—whether we can afford to make the precedent which the passage of this bill might establish. My own inclination would be, as I said before, to pay the damages, the amount being so small; but I want to call attention to the issue involved, so that the House may proceed understandingly in the premises.

Mr. ALDRICH of Illinois. Mr. Speaker, there seems to be some question about the circumstances under which this parade took place. I have here a copy of the general orders of General Miles convening the court of inquiry to pass on these claims. There never was any question about the liability of the Government for the payment of these damages. The order reads——

Mr. GROSVENOR. On what ground is the Government liable?

Mr. HOPKINS. That is what my colleague is going to state.

Mr. ALDRICH of Illinois. I am about to read the general order of General Miles explaining the purpose for which this court was convened.

Mr. GROSVENOR. But my question is as to the liability of the Government.

Mr. ALDRICH of Illinois. On July 17, 1894, the day following the disaster, General Miles issued the following order:

HEADQUARTERS DIVISION OF THE MISSOURI, *July 17, 1894.*

A board of officers to consist of Maj. E. B. Williston, Third Artillery; Major Randolph, Third Artillery; Captain Grimes, Second Artillery; Captain Capron, First Artillery; Captain Taylor, Fourth Artillery; First Lieutenant Hoyle, Second Artillery, will convene at Camp Miles, Chicago, at 2 p. m this day, or as soon thereafter as practicable. The board will investigate and make a report upon the explosion of a caisson of Light Battery F, Second

Artillery, while on a practice march through the streets of this city on the 16th instant. A full and exhaustive examination will be made of everything bearing in any way upon the question before it. The board will sit without regard to hours.

By command of Major-General Miles.

It will thus be seen that a recognition of the justice of this claim was made at once by the War Department through its commanding officer at Chicago, and orders were given that the amount of damages should be ascertained and reported to the general commanding.

That report and finding were made and forwarded to the Secretary of War, who in turn submitted the same to the Senate and House.

The claims are reasonable and just, and too much delay has already ensued about their payment. It is conceded here that if the damages had resulted while the troops were in action that some doubt of the Government's liability might exist, but the situation was entirely different. As General Miles says, the troops were out on a "practice march." The riots were over, but the troops had not been ordered away. They were out for exercise and display. The committees of the Senate and House have both given their unanimous approval to the bill, and I ask for a favorable action from the House thereon.

The actual damage done was much in excess of the amounts called for in the bill. All the glass—much of it heavy plate—in the neighborhood was smashed; doors were blown in and cracked; interiors suffered severely; much of fine furniture and ornaments were badly damaged if not actually destroyed. The wreck was something awful.

Mr. GROSVENOR. What I want to get at is this: This claim, as I understand, can proceed only on the ground that there was negligence on the part of the Government through its agents. Now, as I recollect, there was profound mystery, which lasted for many months—and which, indeed, has never been solved—as to what really caused that explosion. Will the gentleman state before he sits down what act of negligence on the part of the agents of the Government caused this explosion or whether it was not, in point of fact, an accident which no man could have provided against by ordinary prudence?

Mr. HOPKINS. When this caisson exploded in a crowded street under the circumstances shown, is there not a prima facie case against the Government?

Mr. GROSVENOR. Negligence is never to be inferred; it must always be proved.

Mr. ALDRICH of Illinois. There had been an examination of this caisson and its contents on the day immediately preceding the explosion. Unquestionably the caisson was defective.

Mr. POWERS. Does the committee report that there was any negligence on the part of any Government employee?

Mr. HOPKINS. The committee reports in favor of allowing the claim.

Mr. PARKER rose.

Mr. ALDRICH of Illinois. My friend from New Jersey [Mr. PARKER], a member of the committee, can explain the matter.

Mr. MITCHELL. What necessity was there for carrying ammunition on the occasion of a practice parade?

Mr. PARKER. That is just the point. There had been riots in the city of Chicago; but that city was then peaceful. There was no necessity, so far as I can see, for carrying ammunition in a caisson through the crowded streets of Chicago on the occasion of a practice parade; and what is more——

Mr. RICHARDSON. Does the gentleman say that this accident occurred during the riots in Chicago?

Mr. PARKER. No, sir; but it was after the troops had gone there.

Mr. RICHARDSON. How long was this after the riots?

Mr. PARKER. Not very long; but it was after all disorder had ceased. There was a practice march of the military through the streets.

A MEMBER. While the troops were in the field?

Mr. ALDRICH of Illinois. This was before the troops had left the city, but after the riots. They were exercising.

Mr. RICHARDSON. But they were there to suppress the riots.

Mr. PARKER. They had been there for that purpose, and they had not taken their leave. The riots, however, were over.

Mr. RICHARDSON. I am trying to find out how long subsequently this was to the riots?

Mr. PARKER. It was shortly after the suppression of the riots.

Mr. RICHARDSON. What do you mean by "shortly after"? How long a time—one week, one hour, or one day?

Mr. PARKER. It was after all violence had ceased and there was no good in trundling the cannon through the city, especially with the caissons filled with explosive ammunition.

Mr. HOPKINS. And there was no occasion for the march, anyway.

Mr. PARKER. None whatever.

Now, it is a well-settled principle of law as against any person, any individual or corporation, that the taking of dangerous implements, explosives of any kind, through a city or through a crowd is held to be negligence per se. It is not so, I admit, as to the Government. But we have established precedents for the payment of such claims in the past. Of course such a claim as this can not be entertained except by the authority of Congress; but at this very Congress a similar case was considered. A man was engaged at a post on the Delaware River shooting at a target, and there was carelessness exhibited in allowing another man to come within range of the shooting, and he was thereby injured. Payment was made in that case. I think damages were awarded to the extent of about $5,000.

In such a case as this, where a great number of buildings were injured and where some persons were seriously hurt, it was deemed a matter of right—that it was entirely proper for the Government to bear the expense. In other words, that the expense should fall upon the Government, and not upon these individuals.

The recommendation of the general commanding is in the following words:

HEADQUARTERS DEPARTMENT OF THE MISSOURI,
Chicago, Ill., November 8, 1894.

Respectfully forwarded to the Adjutant-General of the Army for consideration by the War Department, recommending that the Congress be asked to make an appropriation to cover the damages passed upon by the board.

NELSON A. MILES,
Major-General, Commanding.

Now, this, as a matter of course, is for Congress to determine; but that the Government of the United States should suffer its private citizens, under such circumstances, to lose by an explosion occurring on a mere practice march by an artillery company carrying deadly explosives through the streets of a crowded city does not seem to be fair or equitable in any sense of the word.

Mr. POWERS. I understand the gentleman to say that it was an exhibition on the part of the Government of negligence per se to have explosives of this character on a march of that kind?

Mr. PARKER. I say it would be an exhibition of negligence per se for an individual under such circumstances to undertake to transport explosives through the streets of a crowded city; not for the Government. But in this case it was an unnecessary thing to do, for these troops were not in the line of duty and there was no need for carrying this ammunition through the streets.

Mr. POWERS. They are carried nine hundred and ninety-nine times out of a thousand times with perfect safety, are they not?

Mr. PARKER. That may be.

Mr. POWERS. And if there is but one chance in a thousand of any injury resulting, does the gentleman think that exhibits negligence per se?

Mr. PARKER. I say that it is dangerous and is prohibited by law for private citizens to carry dangerous explosives in a crowd like that.

Mr. GARDNER. In response to the suggestion of the gentleman from Vermont that such explosions are not liable to occur more than once in a thousand times, he should not overlook the fact that it is not customary, either, in time of war for artillery and ammunition wagons to be trundled over the cobblestones of a city. Their operations are generally out on the country roads, or at least away from the streets of cities.

Mr. PARKER. That is correct.

Mr. RICHARDSON. Mr. Speaker, I think this bill ought not to pass. In the first place, the bill has never been considered by the appropriate committee of this House. The Committee on Military Affairs has no more to do with the subject-matter of this bill than the Committee on Ways and Means has, or the Judiciary. In the next place, there are no grounds shown on which the liability of the Government to pay these claims can be based.

What are the facts? It seems that there was an investigation of some kind made in reference to the matter, but there is nowhere in all of this report—and I ask the attention of the gentleman from Illinois to the fact—no statement that there was any negligence on the part of any person on the part of the Government, or any officer of the Government, even if that made the Government liable.

It seems that there were conditions existing which made it necessary to have a military force in Chicago. There had been a condition of riot in that city, and it was necessary to have the soldiers there and it was necessary to have the ammunition there. The Government is not responsible for damages done by the soldiers under such circumstances. The principle has never been laid down—it was not laid down during the late civil war—that the Government is liable for damages done by the Army, or any portion of the Army, in the suppression of rebellion.

Damages are a necessary incident of war. There was a state of war in Chicago, sufficiently so at least to require that the soldiers of the Army of the United States should be called on to suppress the disturbance. If that condition existed, if it was necessary to suppress it by military force, and the damage thereby resulted, there is no principle on which the Government is made liable. There has been no investigation of the facts. There is no report here showing the facts as to how this thing occurred or

showing negligence on the part of an officer or any soldiers of the Government. And it seems to me to be a very bad precedent to permit the Committee on Military Affairs to usurp the jurisdiction of the Committee on Claims or Committee on War Claims of the House, and submit reports, without submitting any facts whatever showing how the loss occurred, or the disaster occurred, and what the responsibility of the Government is in reference to the matter, or what damages resulted therefrom. For myself I do not think the bill ought to pass. The Secretary of War does not recommend the passage of this bill.

I yield to my colleague from Tennessee as much time as he desires.

Mr. McMILLIN. Mr. Speaker, the principle that is involved here is very important, although the amount is not exceedingly large. If you presuppose that the Army was rightly in its place, and that the evolutions which were in progress were proper, then you establish the principle of paying the inevitable and accidental casualties which resulted from that situation.

It has been the policy of the Government heretofore to pay to those of its citizens whose property it took and consumed the value of that property when they made out their claims and sought for payment; but in this case you propose, not to pay for property taken and used in the necessary employment of the Army, but to pay the accidental damages from an explosion that could not be avoided.

Now, in order that the House may see what kind of claims I embrace in this statement, let us look to the report that has been called to my attention by the gentleman in charge of the bill. On page 6 of the report you find an item in favor of Jacob R. Custer for $717.83. Turning to pages 5 and 6 you will find an itemized account. I will not take the time of the House to read all the account, but there are some items that I think it would be well for the House to hear, in order to understand what sort of demands are made against the Government and what sort of liabilities we are assuming. The very same principle, if laid down in connection with the late war, would bring hundreds of millions of dollars of claims against the Government.

Estimate of the cost of repairs yet to be made.

This is an estimate of repairs yet to be made, expenditures that have not been paid for by Mr. Custer:

For scraping and polishing 2 tables and 1 chair (mahogany), cut by falling window glass	$25.00
For scraping and polishing window sills, cut by falling window glass	20.00
For 12 window shades for front windows	14.23
For setting marble slabs at washbowls and bathrooms	15.00
For cleaning house and furniture	50.00
For repairing ornamental glass (front) door	5.00
For scraping and polishing hard-wood floor in parlor	50.00

Then, on the preceding page of the same report, I find the following items:

T. F. Strong, carpenter	$16.90
J. P. Prendergrast, roofer	5.25
Burley & Co., 2 cups and saucers	3.00

And a scrub woman has been paid $1.50. So it goes. On the pages of this report will be found other similar itemized accounts of claims of various citizens which we are called upon to pay. For one I do not admit the liability of the Government. For one I will not vote to pay, because the liability, in my estimation, does not exist.

Mr. RICHARDSON. I yield to the gentleman from California [Mr. Loud].

Mr. LOUD. Mr. Speaker, if, after due investigation by a proper committee or by a proper court, the Government was adjudged to be liable in this case, I should readily give my assent to it; but a very casual examination of the items in this bill shows that an estimate of more than double the original cost of new goods is provided for in this bill.

This is establishing a very dangerous precedent. I want to call the attention of the House to the fact that if this bill had come regularly before the House in any other manner except under suspension of the rules I think the point of order would have held good against it that this bill should have been considered first by the Committee on Claims. Now, of course those on the other side have said that the Committee on Claims are not more competent to judge of the merits of a case of this character than the Committee on Military Affairs; but the Committee on Claims are appointed with the object in view of their peculiar fitness for considering cases of this kind. Having served on that committee myself for four years, I know that that committee establish a line of precedents and follow it as carefully as the human mind can during their whole session. When they have established one precedent, that precedent is well known in that committee.

Now, I will say on behalf of the Committee on Post-Offices and Post-Roads that, while during this session and previous sessions many claims have been presented to that committee for robberies of post-offices, we have invariably referred these bills back to the House with the request that they go to the Committee on Claims, which committee has always considered bills of this character. I do not think it would be wise for the House, especially under the conditions under which this bill is brought before the House to-day, to pass the bill. True, it is but a small amount of money; but it is establishing a precedent. The gentleman from New Jersey [Mr. Parker], I think, brought up the case of a vessel destroyed near New York Harbor by a battery under command of an army officer. That case came before the Committee on Claims and was presented to me, and I believe I made the report. That vessel was destroyed by a shell from a cannon at target practice, not in time of war or riot, and the vessel was more than 2 miles from the proper course of that target.

These troops were in Chicago in the performance of their orders. They were there suppressing riots. Perhaps the riots had been suppressed a day or two preceding, but they were there under orders, and you might just as well hold United States troops responsible for damages done on their return from a battlefield after a battle had been fought as hold the United States responsible in this case, and I hope the House will not pass this bill, because it would establish, as I believe, a dangerous precedent.

Mr. RICHARDSON. I yield five minutes to the gentleman from Massachusetts [Mr. Walker].

Mr. WALKER of Massachusetts. Mr. Speaker, it seems to me this is an exceedingly dangerous precedent. It seems to me, furthermore, that even if the judgment of the House should be favorable to the consideration of this claim when all the facts were before it, yet that the claim has not been investigated in a proper manner, and a report presented here, giving us such facts as would justify us in voting for it. If any claim has ever been presented to this House that ought to be sent under the Bowman Act to the Court of Claims it is this claim. We can not by any means justify ourselves in suspending the rules and passing a claim of this kind. There are thousands and hundreds of thousands of dollars owed to citizens where there is not the slightest doubt as to what is due them. They have been adjudicated by the Court of Claims and unanimously approved by House committees, but we have not sufficient facts before us to justify us in ordering the payment of this claim.

I want to emphasize, furthermore, Mr. Speaker, what the gentleman from Tennessee [Mr. Richardson] has said. Chicago herself is responsible for the condition of things that justified the Army in being there. I want to say again that it was a part of the duty of the Army, being there, to exhibit the majesty, the power, the dignity, and the lawful authority of the United States in being there. The marching of these troops through the streets of Chicago not only before but after these riots was as necessary a part of the duty of the Army in suppressing those riots and in preventing future riots as any act they did there. This can not be said to be exceptional in the duty of those troops. The United States should not be called upon to pay simply because the troops were moving after the riots had been suppressed. Furthermore, from all the facts that appear here, apparently the streets of Chicago were in a condition that would subject the city to liability for any accident that might occur either to United States troops, United States carriages, or the carriages of private citizens, or any vehicle or person going through the streets. If this bill ought to be paid, the responsibility belongs to the city of Chicago and State of Illinois to pay it and not to the United States.

Mr. RICHARDSON. I yield the remainder of my time to the gentleman from Ohio [Mr. Grosvenor].

Mr. HOPKINS. How much time has the gentleman? He seems to have been yielding about forty minutes out of twenty.

The SPEAKER. The gentleman yields two minutes to the gentleman from Ohio.

Mr. GROSVENOR. Mr. Speaker, I want to call attention to one or two of these items which are to be paid by the Government, without any assurance that there was negligence on the part of anybody or any local official. On page 11 of this report you will find $101.75 as actual money paid out by the person setting up the claim, Mrs. Helen Palmer, and then comes this singular statement:

Estimates by tradesmen and owner of work, etc., yet to be done:	
George Parker, plastering, repainting, general repairing	$1,500
Miscellaneous carpenter and mason work	15
W. P. Nelson Company, repapering	310
Window shades	25
Gas globes broken	5
Removing, relaying, and cleaning carpets	90
Cleaning floors, windows, woodwork, etc	45
Repairing lawn	25
Rent of house for three rooms during progress of repairs	600

All of which is an estimate for work in the future, to be paid for, and this item of rent for three rooms, when the work hereafter is to be done. There is not a shadow of liability even alleged against the Government. There is no negligence by the Government or anybody else. The Government was in the discharge of its duty, doing just what it had a right to do. An accident happened without anybody's fault—an accident which nobody has ever been able to explain—and this charge is made. It is a singular

precedent. It is going beyond any claim that we have ever seen presented in the House.

Mr. MITCHELL. Was there any reprimand by the Government of the officer in charge of these troops?

Mr. GROSVENOR. No, sir; nobody could be censured. It is a very thankless thing to prevent the passage of a bill like this, but it is establishing a precedent that will come back to give us a great deal of trouble in the future if we should pass a bill of this kind.

Mr. HOPKINS. Mr. Speaker——

Mr. RICHARDSON. How much time have they consumed on the other side?

The SPEAKER. The time of the gentleman from Tennessee is consumed.

Mr. RICHARDSON. How much has been used on the other side?

The SPEAKER. The other side has eight minutes.

Mr. ALDRICH. I yield five minutes to my colleague, Mr. HOPKINS.

Mr. HOPKINS. Mr. Speaker, I am a little surprised at the position assumed by the gentleman from Massachusetts [Mr. WALKER]. What his private grievance is against the city of Chicago I know not——

Mr. WALKER of Massachusetts. Mr. Speaker——

Mr. HOPKINS. I decline to be interrupted.

Mr. WALKER of Massachusetts. I call the gentleman to order.

Mr. HOPKINS. This must not be taken out of my time.

Mr. WALKER of Massachusetts. I rise to a question of order.

The SPEAKER. The gentleman will state it.

Mr. WALKER of Massachusetts. My point is that it is not within the parliamentary right of a gentleman to charge me, when I am attempting to discharge my public duty, with having a private grievance against the city of Chicago. I have none. I have about as much property there as the gentleman has.

Mr. HOPKINS. If he disclaims having a grievance against that city I withdraw the remark.

Mr. WALKER of Massachusetts. No; I would not descend to disclaim having a private grievance until the gentleman should prove it in some form or other, and by parliamentary practice he should be required to withdraw the charge.

The SPEAKER. The gentleman will proceed in order.

Mr. HOPKINS. I simply inferred from the line of remarks indulged in by the gentleman from Massachusetts that he must have some private grievance, because he submitted to the House no public reason why this claim should not be paid. I want to say that the gentleman from Tennessee has presented the fact here that some claims in his section have not been paid, and therefore this claim of Chicago should not be considered. Such considerations are unworthy to be presented to the intelligent members of this House. The only question for us to consider is whether these claims are legal, proper, and just. If so, they should be paid. I want to call the attention of the House to the fact that the parties who have incurred these losses, amounting to about $15,000, are not responsible in the least for the condition of affairs that existed in the city of Chicago and called for the presence of the Federal troops. They are not responsible for the action or the nonaction of the governor of the State on that occasion. They are not responsible for the administration of that city by the mayor.

Mr. QUIGG. May I ask the gentleman a question?

Mr. HOPKINS. I can not yield in my five minutes. These parties are innocent, unoffending citizens of Chicago who have been injured by the action of the Federal authorities, to the total of the items set forth in this bill. Let us look for a moment and see who should sustain this loss. No lawyer will contend for a moment that under the circumstances the city of Chicago is responsible to the parties for these losses.

Mr. RICHARDSON. Will the gentleman permit a question?

Mr. HOPKINS. I can not be interrupted. I say, Mr. Speaker, no lawyer will contend that the city of Chicago is responsible for these damages, nor will any lawyer contend that the State of Illinois should be held responsible; so that if the General Government does not come to the rescue these people will lose the amounts set opposite their names in this bill. And for what reason? Simply that the United States Government troops might have a holiday. That is all. The commanding general, Major-General Miles, in his order says that this was a practice march. It was not a march for the purpose of disciplining the people, or for the preservation of order, or for any purpose for which the troops were sent to Chicago. That purpose had become a thing of the past, and there was no more reason why there should be a practice march of the troops upon that occasion than there is now for the commanding general at the neighboring fort here to bring over his troops and march them around this building.

Mr. COOPER of Wisconsin. And this explosion occurred at least 3 miles from the scene of the riots?

Mr. HOPKINS. Yes; as the gentleman from Wisconsin suggests, the scene of this explosion was more than 3 miles from where the riots had taken place. It was in a thickly populated portion of the city, and this military show passed through there, as I have stated, under conditions that were entirely unwarranted or at least uncalled for.

Gentlemen say there is no legal liability. I desire to impress upon the members of this House that the Federal authorities were guilty of negligence in having a caisson that was loaded go over the streets in that part of the city. The gentleman from Minnesota [Mr. TAWNEY] suggests further that the very fact that the commanding general who had ordered this practice march ordered a court of inquiry, had an estimate made of the damages that were sustained by these parties, and recommended compensation is evidence that he, who was on the spot and familiar with all the facts, understood that the Government of the United States had been guilty of negligence.

The SPEAKER. The time of the gentleman has expired.

Mr. HOPKINS. I ask for two minutes more.

There was no objection.

Mr. HOPKINS. Another thing that I desire to impress upon members is that these facts were all presented to the Secretary of War. Now, we know from experience as members of this House that none of the great Departments of the Government recommend the payment of claims in cases where there is no liability upon the part of the Government. We know that they never make recommendation to Congress for the payment of such claims unless full and fair investigation has satisfied them that the claims are just, and that there is a liability on the part of the General Government. We start out, then, in this case, first, with the fact that Major-General Miles, who was present and saw the dreadful catastrophe and the damages resulting from the explosion, called a court of inquiry, made an investigation, and recommended to the Secretary of War that these claims be paid; second, we find that the Secretary of War, after these estimates had been made, went over them carefully and recommended to Congress that the claims be paid; and third, we have a report from the Committee on Military Affairs of this House, who make the recommendation contained in their report. I may say, in passing, that that is a committee which in point of intelligence, discretion, and ability will compare with any committee of this House, and they unanimously report that in their judgment the General Government is liable and that these claims ought to be paid.

Now, Mr. Speaker, I trust that the members of this House will not do such an injustice to these people in the city of Chicago as to deny them payment of the sum of $15,000, as estimated in this report, by way of compensation for the damages resulting to them from that explosion, and I trust this bill will go through the House without even a division. I call for a vote.

Mr. TERRY. Mr. Speaker, I ask for the yeas and nays on the motion of the gentleman to suspend the rules and pass this bill.

The yeas and nays were ordered.

The question was taken; and there were—yeas 87, nays 105, not voting 161, present 1; as follows:

YEAS—87.

PRESENT—1.

Dalzell.

So (two-thirds not voting in the affirmative) the motion to suspend the rules and pass the bill was not agreed to.

The following pairs were announced:

Until further notice:

Mr. ALDRICH of Alabama with Mr. MOSES.

Mr. LEISENRING with Mr. TUCKER.

Mr. HICKS with Mr. LITTLE.

Mr. WHITE with Mr. SPARKMAN.

Mr. ROYSE with Mr. TURNER of Virginia.

Mr. HITT with Mr. WASHINGTON.

Mr. WILLIAM A. STONE with Mr. LAWSON.

Mr. COLSON with Mr. KENDALL.

Mr. FOOTE with Mr. HUTCHESON.

Mr. MEIKLEJOHN with Mr. CROWLEY.

Mr. BARHAM with Mr. KYLE.

Mr. JOHNSON of Indiana with Mr. COX.

Mr. TRACEY with Mr. MCRAE.

Mr. SMITH of Michigan with Mr. BERRY.

Mr. TOWNE with Mr. WILSON of South Carolina.

Mr. SNOVER with Mr. MADDOX.

Mr. BOWERS with Mr. MINER of New York.

Mr. COUSINS with Mr. LIVINGSTON.

Mr. FOSS with Mr. MCLAURIN.

Mr. HEATWOLE with Mr. DINSMORE.

Mr. STEELE with Mr. MCCLELLAN.

Mr. SPALDING with Mr. SPENCER.

Mr. STEPHENSON with Mr. NEILL.

Mr. GILLETT of Massachusetts with Mr. COWEN.

Mr. MCCALL of Massachusetts with Mr. DE ARMOND.

Mr. PICKLER with Mr. MILES.

Mr. JENKINS with Mr. DENNY.

Mr. DALZELL with Mr. CRISP.

For this day:

Mr. MCCLEARY of Minnesota with Mr. RUSK.

On this vote:

Mr. NORTHWAY with Mr. MEREDITH.

Mr. LOUDENSLAGER with Mr. SHAW.

Mr. WOOMER with Mr. YOAKUM.

Mr. CANNON with Mr. SORG.

Mr. MCCALL of Tennessee. I desire to state that my colleague, Mr. BROWN, is detained from the House on account of sickness.

The result of the vote was announced as above stated.

ELECTION CONTEST—ALDRICH VS. UNDERWOOD.

Mr. DANIELS. I desire to call up the contested-election case of Aldrich *vs.* Underwood, from the Ninth Congressional district of Alabama.

Mr. TAWNEY. I rise to a parliamentary inquiry.

The SPEAKER pro tempore (Mr. PAYNE). The gentleman will state it.

Mr. TAWNEY. Mr. Speaker, this is the legislative day of Saturday, and we are proceeding under a rule adopted at the beginning of this legislative day for the consideration of matters under motions to suspend the rules. I submit that this election case can not supersede the order of business under the special rule adopted by the House at the beginning of this legislative day.

The SPEAKER pro tempore. The special rule under which the House is now operating is, as the Chair understands, not different in its effect from the standing rule with regard to suspension of the rules on certain Mondays of each month. The question of the right of a member to his seat has always been held to be one of the highest privilege. The gentleman from New York [Mr. DANIELS] is in order.

Mr. MCMILLIN. I raise the question of consideration upon this election case.

The SPEAKER pro tempore. The gentleman from Tennessee [Mr. MCMILLIN] raises the question of consideration. The Chair thinks the first thing in order will be the reading of the resolutions reported from the Committee on Elections which the gentleman from New York [Mr. DANIELS] desires to call up.

Mr. MCMILLIN. I am entirely willing that they should be read; but I do not want to waive my right to raise the question of consideration.

The SPEAKER pro tempore. The gentleman will be recognized as raising that question.

The Clerk read as follows:

Resolved, That Oscar W. Underwood was not elected a member of the House of Representatives from the Ninth Congressional district of Alabama for the Fifty-fourth Congress, and is not entitled to a seat therein.

Resolved, That Truman H. Aldrich was elected a member of the House of Representatives from the Ninth Congressional district of Alabama for the Fifty-fourth Congress, and is entitled to a seat therein.

The SPEAKER pro tempore. On the resolutions just read the gentleman from Tennessee raises the question of consideration. The question is, Will the House now proceed to the consideration of these resolutions?

The question being taken, there were—yeas 55, nays 64.

The SPEAKER pro tempore. The noes have it; and the House refuses to consider the resolutions.

DELIVERY OF CERTAIN IMPORTED PACKAGES AND PARCELS.

The SPEAKER pro tempore (Mr. PAYNE) laid before the House a bill (H. R. 6259) to expedite the delivery of imported parcels and packages not exceeding $500 in value, with amendments by the Senate. The amendments were read at length.

Mr. DALZELL. Mr. Speaker, I move that the House concur in the Senate amendments.

Mr. TURNER of Georgia. I would be glad if the gentleman from Pennsylvania would give some explanation as to the character of the Senate amendments. I was not able to catch the amendments from the reading of the bill.

Mr. DALZELL. Mr. Speaker, I will say in reply to my friend from Georgia that there are two matters substantially covered by the amendments, one of them defining more particularly than the House bill the character of packages that are contemplated by the legislation proposed.

Mr. TURNER of Georgia. What is the character of packages?

Mr. DALZELL. Well, there is a provision that makes it absolutely impossible for these packages to contain merchandise, for instance, bought for the purpose of resale. The other is that the appraisal shall not be made on the wharf, as provided in the House bill, but in the regular way. The amendments are both at the suggestion, I understand, of the Secretary or Assistant Secretary of the Treasury. In all other respects the bill is substantially as it passed the House.

I move, therefore, to concur in the Senate amendment.

The motion was agreed to.

LAWS RELATING TO AMERICAN SEAMEN.

Mr. PAYNE. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 6399) to amend the laws relating to American seamen, with the amendments recommended by the Committee on Merchant Marine and Fisheries.

The SPEAKER. The bill will be read with the amendments.

The bill was read, as follows:

Be it enacted, etc., That section 4516 of the Revised Statutes be, and is hereby, amended so as to read as follows:

"SEC. 4516. In case of desertion or casualty resulting in the loss of one or more seamen the master must ship, if obtainable, a number equal to the number of those whose services he has been deprived of by desertion or casualty, who must be of the same grade or rating and equally expert with those whose place or position they refill, and report the same to the United States consul at the first port at which he shall arrive, without incurring the penalty prescribed by the two preceding sections."

SEC. 2. That section 4520 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4520. Every master of any vessel of the burden of 50 tons or upward, bound from a port in one State to a port in British North America or the West India Islands, or to a port in any other than an adjoining State, except vessels of the burden of 75 tons or upward, bound from a port on the Atlantic

to a port on the Pacific, or vice versa, shall, before he proceeds on such voyage, make an agreement, in writing or in print, with every seaman on board such vessel, except such as shall be apprentice or servant to himself or owners, declaring the voyage or term of time for which such seaman shall be shipped."

SEC. 3. That section 4522 of the Revised Statutes be, and is hereby, amended so as to read as follows:

"SEC. 4522. At the foot of every such contract to ship upon such a vessel of the burden of 50 tons or upward there shall be a memorandum in writing of the day and the hour when such seaman who shipped and subscribed shall render himself on board to begin the voyage agreed upon. If any seaman shall neglect or omit to render himself on board the vessel for which he has shipped at the time mentioned in such memorandum without giving twenty-four hours' notice of his inability to do so, and if the master of the vessel shall, on the day in which such neglect happened, make an entry in the log book of such vessel of the name of such seaman, and shall in like manner note the time that he so neglected to render himself after the time appointed, then every such seaman shall forfeit for every hour which he shall so neglect to render himself one-half of one day's pay, according to the rate of wages agreed upon, to be deducted out of his wages. If any such seaman shall wholly neglect to render himself on board of such vessel, or having rendered himself on board shall afterwards desert, he shall forfeit all of the wages or emoluments which he has then earned."

SEC. 4. That section 4526 of the Revised Statutes be, and is hereby, amended so as to read as follows:

"SEC. 4526. In cases where the service of any seaman terminates before the period contemplated in the agreement, by reason of the loss or wreck of the vessel, such seaman shall be entitled to wages for the time of service prior to such termination, but not for any further period. Such seaman shall be considered as a destitute seaman and shall be treated and transported to port of shipment as provided in sections 4577, 4578, and 4579 of the Revised Statutes of the United States."

SEC. 5. That section 4529 of the Revised Statutes be, and is hereby, amended so as to read as follows:

"SEC. 4529. The master or owner of any vessel making coasting voyages shall pay to every seaman his wages within two days after the termination of the agreement under which he shipped, or at the time such seaman is discharged, whichever first happens; and in the case of vessels making foreign voyages, or from a port on the Atlantic to a port on the Pacific, or vice versa, within twenty-four hours after the cargo has been discharged, or within four days after the seaman has been discharged, whichever first happens; and in all cases the seaman shall, at the time of his discharge, be entitled to be paid, on account of wages, a sum equal to one-third part of the balance due him. Every master or owner who refuses or neglects to make payment in manner hereinbefore mentioned without sufficient cause shall pay to the seaman a sum equal to the amount of two days' pay for each and every day during which payment is delayed beyond the respective periods, which sum shall be recoverable as wages in any claim made before the court; but this section shall not apply to the masters or owners of any vessel the seamen on which are entitled to share in the profits of the cruise or voyage."

SEC. 6. That section 4530 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4530. Every seaman on a vessel of the United States shall be entitled to receive from the master of the vessel to which he belongs one-third part of the wages which shall be due him at every port where such vessel shall unload and deliver her cargo before the voyage is ended, unless the contrary be expressly stipulated in the contract; and when the voyage is ended every such seaman shall be entitled to the remainder of the wages which shall then be due him as provided in section 4529 of the Revised Statutes."

SEC. 7. That section 4547 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4547. If the master against whom such summons is issued neglects to appear, or, appearing, does not show that the wages are paid, or otherwise satisfied or forfeited, and if the matter in dispute is not forthwith settled, the judge or justice or commissioner shall certify to the clerk of the district court that there is sufficient cause of complaint whereon to found admiralty process; and thereupon the clerk of such court shall issue process against the vessel. In all cases where the matter in demand does not exceed $100, the return day of the monition or citation shall be the first day of a stated or special session or court next succeeding the third day after the service of the monition or citation, and on the return of process in open court, duly served, either party may proceed therein to proofs and hearing without other notice, and final judgment shall be given according to the usual course of admiralty courts in such cases. In such suits all the seamen having cause of complaint of the like kind against the same vessel may be joined as complainants, and it shall be incumbent on the master to produce the contract and log book if required to ascertain any matter in dispute; otherwise the complainants shall be permitted to state the contents thereof, and the burden of proof of the contrary shall be on the master. But nothing herein contained shall prevent any seamen from maintaining any action at common law for the recovery of his wages, or having immediate process out of any court having admiralty jurisdiction wherever any vessel may be found, in case she shall have left the port of delivery where her voyage ended before payment of the wages, or in case she shall be about to proceed to sea before the end of the ten days next after the delivery of her cargo or ballast."

SEC. 8. That section 4556 of the Revised Statutes be, and hereby is, amended so as to read as follows:

"SEC. 4556. If the first and second officers under the master or a majority of the crew of any vessel bound on any voyage shall, before the vessel shall have left the harbor, discover that the vessel is too leaky or is otherwise unfit in her crew, body, tackle, apparel, furniture, provisions, or stores to proceed on the intended voyage, and shall require such unfitness to be inquired into, the master shall, upon the request of the first and second officers under the master or such majority of the crew, forthwith apply to the judge of the district court of that judicial district, if he shall there reside, or if not, to some justice of the peace of the city, town, or place for the appointment of surveyors, as in section 4557 provided, taking with him two or more of the crew who shall have made such request; and any master neglecting or refusing to comply with these provisions shall be liable to a penalty of $500."

SEC. 9. That section 4557 of the Revised Statutes be, and hereby is, amended to read as follows:

"SEC. 4557. The judge, or justice, or consul, or consular agent, or person who may discharge the duties of consul, if in a foreign port, shall, upon such application of the master or commander, issue his precept, directed to three persons in the neighborhood, the most experienced and skillful in maritime affairs that can be procured. It shall be the duty of such surveyors to repair on board such vessel and to examine the same in respect to the defects and insufficiencies complained of, and they shall make report to the judge, or justice, or consul, or consular agent, as the case may be, in writing, under all their hands or the hands of two of them, whether in any and in what respect the vessel is unfit to proceed on the intended voyage, and what addition of men, provisions, or stores, or what repairs or alterations in the body, tackle, or apparel will be necessary; and upon such report the judge, the justice, or consul, or consular agent shall adjudge and shall indorse on the report his judgment whether the vessel is fit to proceed on the intended voyage, and, if not, whether such repairs can be made or deficiencies supplied where the vessel then lies, or whether it is necessary for her to proceed to the nearest or most convenient place where such repairs can be made or deficiencies supplied; and the master and the crew shall, in all things conform to the judgment. The master or commander shall in the first instance, pay all the costs of such review, report, or judgment, to be taxed and allowed on a fair copy thereof, certified by the judge or justice. But if the complaint of the crew shall appear upon the report and judgment to have been without foundation, the master or commander, or the owner or consignee of such vessel, shall deduct the amount thereof, and of the reasonable damages for the detention, to be ascertained by the judge, or justice, or consul, or consular agent, out of the wages of the complaining seamen."

SEC. 10. That section 4558 of the Revised Statutes be, and hereby is, amended to read as follows:

"SEC. 4558. If after judgment that such vessel is fit to proceed on her intended voyage, or after procuring such men, provisions, stores, repairs, or alterations as may be directed, the seamen, or either of them, shall refuse to proceed on the voyage, he shall forfeit his effects on board and any wages that may be due him."

SEC. 11. That section 4559 of the Revised Statutes be, and hereby is, amended to read as follows:

"SEC. 4559. Upon a complaint in writing, signed by the first, or the second and third officers and a majority of the crew, of any vessel while in a foreign port, that such vessel is in an unsuitable condition to go to sea because she is leaky, or insufficiently supplied with sails, rigging, anchors, or any other equipment, or that the crew is insufficient to man her, or that her provisions, stores, and supplies are not or have not been during the voyage, sufficient and wholesome; thereupon, in any of these, or like cases, the consul, or a commercial agent who may discharge any duties of a consul, shall cause to be appointed three persons, of like qualifications with those described in section 4557, who shall proceed to examine into the causes of complaint, and they shall be governed in all their proceedings and proceed as provided in section 4557."

SEC. 12. That section 4561 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4561. The inspectors in their report shall also state whether, in their opinion, the vessel was sent to sea unsuitably provided in any important or essential particular, by neglect or design, or through mistake or accident; and in case it was by neglect or design, and the consular officer approves of such finding, he shall discharge such of the crew as request it, and shall require the payment by the master of one month's wages for each seaman over and above the wages then due, or sufficient money for the return of such of the crew as desire to be discharged to the nearest and most convenient port of the United States, or by furnishing the seaman who so desires to be discharged with employment on a ship agreed to by him. But if, in the opinion of the inspectors, the defects or deficiencies found to exist have been the result of mistake or accident, and could not, in the exercise of ordinary care, have been known and provided against before the sailing of the vessel, and the master shall, in a reasonable time, remove or remedy the causes of complaint, then the crew shall remain and discharge their duty. If any person knowingly sends or attempts to send or is party to sending or attempting to send an American ship to sea in such an unseaworthy state that the life of any person is likely to be thereby endangered, he shall in respect of each offense be guilty of a misdemeanor, unless he proves that either he used all reasonable means to insure her being sent to sea in a seaworthy state, or that her going to sea in an unseaworthy state was, under the circumstances, reasonable and justifiable, and for the purpose of giving that proof he may give evidence in the same manner as any other witness."

SEC. 13. That section 4564 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4564. Should any master or owner of any merchant vessel of the United States neglect to provide a sufficient quantity of stores to last for a voyage of ordinary duration to the port of destination, and in consequence of such neglect the crew are compelled to accept a reduced scale, such master or owner shall be liable to a penalty as provided in section 4568 of the Revised Statutes."

SEC. 14. That section 4566 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4566. If the officer to whom any such complaint in regard to the provisions or the water is made certifies in such statement that there was no reasonable grounds for such complaint, each of the parties so complaining shall forfeit to the master or owner his share of the expense, if any, of the survey, and shall be liable to forfeit to the Marine-Hospital Service a sum not exceeding one week's wages."

SEC. 15. That section 4568 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4568. If, during a voyage, the allowance of any of the provisions which any seaman is entitled to under section 4612 of the Revised Statutes, except for any time during which such seaman willfully and without sufficient cause refuses or neglects to perform his duty, or is lawfully under confinement for misconduct, either on board or on shore; or if it shall be shown that any of such provisions are, or have been during the voyage, bad in quality and unfit for use, the seaman shall receive, by way of compensation for such reduction or bad quality, according to the time of its continuance, the following sums, to be paid to him in addition to and to be recoverable as wages:

"First. If his allowance is reduced by any quantity not exceeding one-third of the quantity specified in the agreement, a sum not exceeding 50 cents a day.

"Second. If his allowance is reduced by more than one-third of such quantity, a sum not exceeding $1 a day.

"Third. In respect of bad quality, a sum not exceeding $1 a day.

"But if it is shown to the satisfaction of the court before which the case is tried that any provisions, the allowance of which has been reduced, could not be procured or supplied in sufficient quantities, or were unavoidably injured or lost, or if by reason of its innate qualities any article becomes unfit for use and that proper and equivalent substitutes were supplied in lieu thereof, the court shall take such circumstances into consideration and shall modify or refuse compensation as the justice of the case may require."

SEC. 16. That section 4572 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4572. Every vessel bound on any foreign voyage exceeding in length fourteen days shall also be provided with at least one suit of woolen clothing for each seaman, and every vessel in the foreign or domestic trade shall provide a safe and warm room for the use of seamen in cold weather. Failure to make such provision shall subject the owner or master to a penalty of not less than $100."

SEC. 17. That section 4581 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4581. If any consular officer, when discharging any seaman, shall neglect to require the payment of and collect the arrears of wages and extra wages required to be paid in the case of the discharge of any seaman, he shall be accountable to the United States for the full amount thereof. The master shall provide any seaman so discharged with employment on a vessel agreed to by the seaman or shall provide him with one month's extra wages,

if it shall be shown to the satisfaction of the consul that such seaman was not discharged for neglect of duty, incompetency, or injury incurred on the vessel. If the seaman is discharged by voluntary consent before the consul, he shall be entitled to his wages up to the time of his discharge, but not for any further period. If the seaman is discharged on account of injury or illness, incapacitating him for service, the expenses of his maintenance and return to the United States shall be paid from the fund for the maintenance and transportation of destitute American seamen."

SEC. 18. That section 4582 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4582. Whenever a vessel of the United States is sold in a foreign country and her company discharged, it shall be the duty of the master to produce to the consular officer a certified list of the ship's company, and also the shipping articles, and besides paying to each seaman or apprentice the wages due him, he shall either provide him with adequate employment on board some other vessel bound to the port at which he was originally shipped, or to such other port as may be agreed upon by him, or furnish the means of sending him to some such port, or provide him with a passage home, or deposit with the consular officer such a sum of money as is by the officer deemed sufficient to defray the expenses of his maintenance and passage home; and the consular officer shall indorse upon the agreement with the crew of the ship which the seaman or apprentice is leaving the particulars of any payment, provision, or deposit made under this section. A failure to comply with the provisions of this section shall render the owner liable to a fine of not exceeding $50."

SEC. 19. That section 4583 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4583. Whenever on the discharge of a seaman in a foreign country by a consular officer on his complaint that the voyage is continued contrary to agreement, or that the vessel is badly provisioned or unseaworthy, or against the officers for cruel treatment, it shall be the duty of the consul or consular agent to institute a proper inquiry into the matter, and, upon his being satisfied of the truth and justice of such complaint, he shall require the latter to pay to such seaman one month's wages over and above the wages due at time of discharge, and to provide him with adequate employment on board some other vessel, or provide him with a passage on board some vessel bound to the port from which he was originally shipped, or to the most convenient port of entry in the United States, or to a port agreed to by the seaman."

SEC. 20. That section 4596 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4596. Whenever any seaman who has been lawfully engaged, or any apprentice to the sea service, commits any of the following offenses, he shall be punishable as follows:

"First. For desertion in any foreign port, by forfeiture of all or any part of the clothes or effects he leaves on board and of all or any part of the wages or emoluments which he has then earned.

"Second. For desertion in a port of the United States, by forfeiture of all or any part of the clothes or effects he leaves on board and of all or any part of the wages or emoluments which he has then earned.

"Third. For neglecting or refusing, without reasonable cause, to join his vessel or to proceed to sea in his vessel, or for absence without leave at any time within twenty-four hours of the vessel's sailing from any port, either at the commencement or during the progress of any voyage, or for absence at any time without leave and without sufficient reason from his vessel or from his duty, not amounting to desertion or not treated as such by the master, by a forfeiture of his wages of not more than two days' pay.

"Fourth. For quitting the vessel without leave after her arrival at her port of delivery and before she is placed in security, by forfeiture out of his wages of not more than one month's pay.

"Fifth. For willful disobedience to any lawful command, by forfeiture out of his wages of not more than four days' pay or, at the discretion of the court, by imprisonment for not more than one month.

"Sixth. For continued willful disobedience to lawful command or continued willful neglect of duty, by forfeiture, for every twenty-four hours' continuance of such disobedience or neglect, of either a sum of not more than twelve days' pay or sufficient to defray any expenses which have been properly incurred in hiring a substitute, and also, at the discretion of the court, by imprisonment for not more than three months.

"Seventh. For assaulting any master or mate, by imprisonment for not more than two years.

"Eighth. For combining with any others of the crew to disobey lawful commands, or to neglect duty, or to impede navigation of the vessel or the progress of the voyage, by imprisonment for not more than twelve months.

"Ninth. For willfully damaging the vessel, or embezzling or willfully damaging any of the stores or cargo, by forfeiture out of his wages of a sum equal in amount to the loss thereby sustained, and also, at the discretion of the court, by imprisonment for not more than twelve months.

"Tenth. For any act of smuggling for which he is convicted, and whereby loss or damage is occasioned to the master or owner, he shall be liable to pay such master or owner such a sum as is sufficient to reimburse the master or owner for such loss or damage; and the whole or any part of his wages may be retained in satisfaction or on account of such liability; and he shall also be liable to imprisonment for a period of not more than twelve months."

SEC. 21. That section 4597 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4597. Upon the commission of any of the offenses enumerated in the preceding section an entry thereof shall be made in the official log book on the day on which the offense was committed, and shall be signed by the master and by the mate or one of the crew; and the offender, if still in the vessel, shall, before her next arrival at any port, or if she is at the time in port, before her departure therefrom, be furnished with a copy of such entry, and have the same read over distinctly and audibly to him, and may thereupon make such a reply thereto as he thinks fit, and a statement that a copy of the entry has been so furnished, or the same has been so read over, together with his reply, if any, made by the offender, shall likewise be entered and signed in the same manner. In any subsequent legal proceedings the entries hereinbefore required shall, if practicable, be produced or proved, and in default of such production or proof the court hearing the case may, at its discretion, refuse to receive evidence of offense."

SEC. 22. That section 4600 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4600. It shall be the duty of all consular officers to reclaim deserters and discountenance insubordination by every means in their power, and where the local authorities can be usefully employed for that purpose, to lend their aid and use their exertions to that end in the most effectual manner. In all cases where seamen are apprehended the consular officer shall inquire into the facts and proceed as provided in section 4583 of the Revised Statutes; and the officer discharging such seaman shall enter upon the crew list and shipping articles and official log the cause of discharge and the particulars in which the cruel or unusual treatment consisted, and subscribe his name thereto officially. He shall read the entry made in the official log to the master, and his reply thereto, if any, shall likewise be entered and subscribed in the same manner."

SEC. 23. That section 4612 of the Revised Statutes is hereby amended by striking out the scale of provisions and substitutes in Table A, and in place thereof inserting the following scale of provisions and substitutes to be allowed and served out to the crew during the voyage:

	Sunday.	Monday.	Tuesday.	Wednesday.	Thursday.	Friday.	Saturday.
Water ..... quarts..	6	6	6	6	6	6	6
Biscuit ..... pounds..	½	½	½	½	½	½	½
Beef, salt ..... do....	.....	.....	1½	.....	1½	.....	1½
Pork, salt ..... pound..	.....	1	.....	1	.....	1	.....
Flour ..... do....	½	.....	½	.....	½	.....	.....
Canned meat ..... do....	1	.....	.....	1	.....	.....	.....
Fresh bread ..... pounds..	1½ pounds daily.						
Fish ..... pound..	.....	.....	.....	.....	.....	1	.....
Potatoes or yams ..... do....	1	1	1	1	1	1	1
Canned tomatoes ..... do....	½	.....	.....	.....	.....	½	.....
Pease ..... pint..	.....	.....	½	.....	.....	½	.....
Beans ..... do....	.....	½	.....	½	.....	.....	.....
Rice ..... ounces..	.....	6	.....	.....	.....	.....	6
Coffee (green berry) ..... ounce..	½	½	½	½	½	½	½
Tea ..... do....	½	½	½	½	½	½	½
Sugar ..... ounces..	3	3	3	3	3	3	3
Molasses ..... pint..	½	.....	½	.....	½	.....	.....
Dried fruit ..... ounces..	3	.....	3	.....	3	.....	.....
Pickles ..... pint..	.....	½	.....	½	.....	½	.....
Vinegar ..... do....	.....	.....	½	.....	.....	.....	½
Pepper ..... ounce..	½	½	½	½	½	½	½
Mustard ..... do....	½	½	½	½	½	½	½
Salt ..... do....	½	½	½	½	½	½	½
Corn meal ..... ounces..	.....	4	.....	.....	.....	4	.....
Onions ..... do....	4	.....	.....	.....	4	.....	4
Lard ..... ounce..	1	1	1	1	1	1	1
Butter ..... do....	1	1	1	1	1	1	1

SUBSTITUTES.

One pound of flour daily may be substituted for the daily ration of biscuit or fresh bread; 2 ounces of desiccated vegetables for 1 pound of potatoes or yams; 6 ounces of hominy, oatmeal, or cracked wheat, or 2 ounces of tapioca, for 6 ounces of rice; 6 ounces of canned vegetables for one-half pound of canned tomatoes; one-eighth of an ounce of tea for three-fourths of an ounce of coffee; three-fourths of an ounce of coffee for one-eighth of an ounce of tea; 6 ounces of canned fruit for 3 ounces of dried fruit; one-half ounce of lime juice for the daily ration of vinegar; 4 ounces of oatmeal or cracked wheat for one-half pint of corn meal; 2 ounces of pickled onions for 4 ounces of fresh onions.

When the vessel is in port and it is possible to obtain the same, 1½ pounds of fresh meat shall be substituted for the daily rations of salt and canned meat; one-half pound of green cabbage for one ration of canned tomatoes; one-half pound of fresh fruit for one ration of dried fruit.

"The foregoing scale of provisions shall be inserted in every article of agreement and shall not be reduced by any contract, and a copy of the same shall be posted in a conspicuous place in the galley and in the forecastle of each vessel."

SEC. 24. That section 10 of chapter 121 of the laws of 1884, as amended by section 3 of chapter 421 of the laws of 1886, be, and is hereby, amended to read as follows:

"That it shall be, and is hereby, made unlawful in any case to pay any seaman wages in advance of the time when he has actually earned the same, or to pay such advance wages to any other person, or to pay any person other than an officer authorized by act of Congress any remuneration for the shipment of seamen. Any person paying such advance wages or such remuneration shall be deemed guilty of a misdemeanor, and upon conviction shall be punished by a fine not less than four times the amount of the wages so advanced or remuneration so paid, and may be also imprisoned for a period not exceeding six months, at the discretion of the court. The payment of such advance wages or remuneration shall in no case, excepting as herein provided, absolve the vessel or the master or owner thereof from full payment of wages after the same shall have been actually earned, and shall be no defense to a libel, suit, or action for the recovery of such wages. If any person shall demand or receive, either directly or indirectly, from any seaman or other person seeking employment as a seaman, or from any person on his behalf, any remuneration whatever for providing him with employment, he shall for every such offense be liable to a penalty of not more than $100.

"(b) That it shall be lawful for any seaman to stipulate in his shipping agreement for an allotment of any portion of the wages which he may earn to his wife, mother, or dependent relative.

"(c) That no allotment note shall be valid unless signed by and approved by the shipping commissioner. It shall be the duty of said commissioner to examine such allotments and the parties to them and enforce compliance with the law. All stipulations for the allotment of any part of the wages of a seaman during his absence which are made at the commencement of the voyage shall be inserted in the agreement, and shall state the amounts and times of the payments to be made and the persons to whom such payments are to be made.

"(d) That no allotment except as provided for in this section shall be lawful. Any person who shall falsely claim to be the wife, mother, or dependent relative of a seaman under this section shall for every such offense be punishable by a fine not exceeding $500 or imprisonment not exceeding six months, at the discretion of the court.

"(e) That this section shall apply as well to foreign vessels as to vessels of the United States; and any master, owner, consignee, or agent of any foreign vessel who has violated its provisions shall be liable to the same penalty that the master, owner, or agent of a vessel of the United States would be for a similar violation: *Provided*, That treaties in force between the United States and foreign nations do not conflict: *Provided further*, That this section shall not apply to yachts, pilots' boats, fishing or whaling vessels.

"(f) That under the direction of the Secretary of the Treasury the Commissioner of Navigation shall make regulations to carry out this section."

SEC. 25. That section 3 of chapter 421 of the laws of 1886, approved June 19, 1886; sections 4531, 4532, 4533, 4534, and 4609 of the Revised Statutes, and so much of chapter 97 of the laws of 1895, approved February 18, 1895, as relates to allotments, are hereby repealed.

SEC. 26. That this act shall take effect three months after its passage.

The SPEAKER. Is a second demanded?

Mr. RICHARDSON. I demand a second.

Mr. PAYNE. I ask unanimous consent that a second be considered as ordered.

Mr. OWENS. I object.

The SPEAKER announced the appointment of Mr. PAYNE and Mr. RICHARDSON as tellers.

The House divided; and there were—ayes 70, noes 1.

So a second was ordered.

Mr. PAYNE. Mr. Speaker, at the end of fifteen minutes I shall be glad to have the Chair notify me, as I desire to reserve five minutes of my time.

This bill grows out of the agitation that has been in existence for several years past with respect to the condition of the American sailor and his relation to the master of the vessel. There have been innumerable complaints from both sides, and there has been much investigation, and great efforts have been made to arrive at the truth of the complaints.

Our laws regulating the relation of sailor and master are very antiquated, most of them being one hundred years old; and in regard to many of them their antiquity is about the only thing that recommends them. A great deal of abuse has grown out of the enforcement of these laws.

In the early part of this season the gentleman from California [Mr. MAGUIRE] introduced a number of bills relating to the subject; and later on a number of others were introduced by my colleague, Mr. LOW, and I introduced a number myself at the request of parties who were much more familiar with the subject than I was. The Committee on Merchant Marine and Fisheries began early the investigation of the question. I think we have spent on an average two or three days of each week up to the time the bill was reported to the House, and we have given this time and attention for the purpose of getting at the truth of the matter so as to report a bill intelligently to the House and one on which the House might act intelligently. The result of our deliberation was to request a representative of the maritime interest of the city of New York, and the Commissioner of Navigation, representing the seamen, to come together and try to formulate a bill covering the ground of the various bills of which I have spoken. The result of that deliberation was the introduction of the bill H. R. 6399—the bill now before the House for consideration—originally introduced by myself by request, and referred to our committee. The committee have reported a number of changes in this bill; but all of them in the effort to perfect the bill and all tending to ameliorate the condition of the American sailor and at the same time to deal justly with the interests of every man who has any money invested in American vessels.

Our laws at present provide that after a sailor has made a contract to go to sea, if he chooses to violate that contract and does not go he is liable to be arrested and put in jail for a period of six months; and the limit of the imprisonment is not in the discretion of the court. The same imprisonment is fixed upon the sailor if he violates the contract by deserting at any period or any time before the period of his enlistment in the service of the merchant marine expires. This thing is an anomaly in our laws. There is no other class of contracts, agreements, or engagements where imprisonment is the punishment for a violation of their provisions; and the committee thought, after due care and deliberation, that no such punishment ought to be inflicted; that no punishment looking to imprisonment should be inflicted for a violation of a contract. It was claimed, on the other hand, that it was very important that the seaman should fill his engagement in order that the vessel might leave her port at the appointed time. So it is important that a railroad train shall start out of a depot, in order that that train may make its time and meet its engagements; and yet it has never occurred to any American legislator to try to put it into the law that a man who violated his contract with a railroad company should be liable to imprisonment for such violation, although his violation prevented the railroad train from starting out of the depot. So the committee have stricken out of this bill every vestige of imprisonment for violation of a civil contract, and have so reported to the House.

Another source of great evil, of which the sailors complain as well as the vessel owners, is what is known as the allotment system, by which a seaman, when he makes his engagement to go on a voyage, may allot a certain portion of his wages in payment of debt, and to any person. Allotments in the coastwise trade were virtually abolished by a bill passed in 1895, but they may still be made in the foreign service. The evil that grows out of this system of which the sailor complains is this: Of course when Jack goes ashore, and is freed from the responsibilities and risks of the voyage, he is quite apt to fall into the hands of some land shark. It may be a boarding-house keeper; it may be what is known as a "crimp," a man who makes it his business to hire out crews to the master of a vessel; it may be the keeper of a saloon; and invariably, almost, the sailor gets into debt. When he comes to ship for a voyage the boarding-house keeper is on hand demanding that he have security for his pay. Well, he ought to be paid. If Jack owes anything for board while he is on land of course he ought to arrange to have the boarding-house keeper paid, and if there was nothing in it but this, if it was simply to pay the man who furnished him his food and necessary shelter, no harm would arise from the arrangement. But a bill for liquor is frequently included, or by an arrangement with the crimp there is included an item of five or ten dollars to pay the shipping agent for obtaining the employment. Now, the sailor is obliged, when he makes the engagement, is compelled by the circumstances, to sign an allotment note to cover not only the real honest claim against him, but also these bogus or trumped-up claims, because the shipping agent is all powerful. He is all powerful with the sailor, and he is all powerful with the master. He cuts both ways. So the sailor is cheated out of his hard earnings by reason of this allotment system.

Mr. QUIGG. Will the gentleman allow me a question? Does this bill abolish the crimping system as such?

Mr. PAYNE. The bill passed a year ago attempted to abolish that.

Mr. MAGUIRE. Only in the coastwise trade.

Mr. PAYNE. In the coastwise trade. This bill does not recognize this shipping agent now in any trade, but it goes a step further than that. The mere enactment of a law would not abolish the shipping agent. You can not get him out of the way by that; but we abolish the source from which he gets his pay out of the sailor. It is useless to declare that the sailor shall not make any contract, and shall not be liable to pay anything to these shipping agents for getting him a place, if you still leave the allotment system in vogue, because invariably in the allotment will appear the amount that goes to the shipping agent, and he gets it through the boarding-house keeper and through the clothing merchant. So we have abolished allotments by this bill, have sought to get rid of them altogether, except that the sailor may make an allotment in favor of his father or mother or other dependent relative.

No other allotment is permitted by the bill. It was the judgment of the committee, on first consideration, that it would be a favor to the sailor, and in his interest, to make these allotments extend to savings banks. This is the system in Great Britain, and we thought it a good provision, and that it might encourage the saving of his earnings; but the sailors association and the sailors themselves objected to this, for fear that that might be used as a cover by which the sailors would be compelled to pay this money to the shipping agents, and so we left even the savings banks out, and we permit no allotments under this bill except to father, mother, or other dependent relatives.

Now, those are the two principal features in the bill to alleviate the condition of the sailor. In the bill as presented by the gentleman from California [Mr. MAGUIRE] was a scale of food which was prepared by the sailors themselves. In the bill introduced by the gentleman from New York [Mr. LOW], and also in the bill introduced by me, was a scale of food that was provided by the vessel owners. And I desire to say, in justice to the vessel owners, that the scale of food that was provided by them was more liberal in the supply than the scale which the seamen themselves proposed. But the committee, proceeding with abundant caution, referred both scales of provisions to the Surgeon-General of the Marine Hospital, Dr. Wyman, and asked him to examine them carefully and make such suggestions as he should deem best. The result was that he appointed a board of three eminent men, experts on the subject, who took several days for comparing the scale of food for the Navy with these two scales that were presented, and after taking the matter under advisement, they presented the scale of food which is presented in the bill, except that the committee have added a little in the amount of food and in the daily allowance of water. This board said that this scale of food, if enacted into law and lived up to, would absolutely prevent the appearance of scurvy on any long voyage, and of course that is the prime thing to be considered.

If the members of the House look over the scale they will see that the provisions are liberal in amount, and yet the cost of this scale is no more than the cost of the scale that was presented by the vessel owners themselves. So that this scale of food is practically as agreed upon by the seamen and the vessel owners, revised by the Surgeon-General and his board of skilled assistants. The committee have no doubt that if this scale is adopted and forced into law, with the additional suggestion that we have incorporated in this bill, acting on the suggestion of the Surgeon-General of the Marine-Hospital Service, that this scale of food be posted up conspicuously in the forecastle of every vessel, so that it shall be known alike to the sailor and to the master, that there can be no room for any complaint as to a fair and liberal scale of food for the American sailor.

Now, I say, while these are the important changes made in the present law, there are many minor changes made by the bill which will tend to an amelioration of the condition of the American sailor, changes which I have not time to go over in detail. A provision is made that where the crew find fault with the provisions there shall be a fair examination and determination of the sufficiency of the food and of the character and quality of the food fur-

nished; and in case the food is found sufficient in quality and character the expense comes out of the wages of the sailors who make the complaint, in order that there may be no frivolous complaint; and in case it turns out that it is not sufficient in quality or character or quantity, then a fine is imposed on the master and owners of the vessel, who are responsible for the food provided.

The committee found a difficulty in regard to the provision in relation to leaving a vessel in port, or not going on board according to contract, in applying an adequate punishment. We did not think for a minute that we would still continue the imprisonment of an American citizen for the violation of a civil contract; and still we thought there ought to be some hold upon the sailor, something to make it to his interest to conform to the contract, because we realized that it is highly important to the growth of our American merchant marine that vessels should not be detained in port because the sailors do not choose to perform their contract. And so we put into the bill a forfeiture of the wages, which may be greater or smaller, and a forfeiture of the clothes that the sailor left upon the vessel. Whether some other arrangement can be arrived at, some other provision can be made, which will still be just to the sailor and deal out justice to the masters is a matter for us to consider. Possibly it may lie in this, now in the English law, which provides also, not for imprisonment, but that the master may go and take the sailor wherever he finds him and force him on board the vessel—a provision which has become a dead letter, because it always leads to riots and is never enforced—but whether there can not be some shipping list preserved which shall correctly set forth those sailors who have kept their contracts.

Until I shall have heard some one in opposition I will reserve my five minutes.

Mr. MAGUIRE. If there is anyone who desires to speak in opposition I will yield to him.

Mr. DINGLEY. I desire, not in opposition, to make a few observations.

Mr. MAGUIRE. How much time does the gentleman want?

Mr. DINGLEY. Five minutes will answer my purpose.

Mr. MAGUIRE. Very well.

Mr. DINGLEY. Mr. Speaker, this is a bill which covers a large number of amendments of the shipping laws of the country, some of which are exceedingly important. In part, at least, this bill is certainly in the right direction. There are some provisions in the bill which I think on reflection it would be thought desirable to modify; but in view of the necessity for some legislation in this direction, and in view of the lateness of the session, I shall not oppose the passage of this bill, because I believe that it will be modified in conference. As it is presented to us under suspension of the rules, of course it can not be amended, and when the Senate shall have acted, then, by the action of the Senate and the conferees, doubtless certain provisions in it can be corrected, if such corrections shall seem to be necessary, as I think is the case.

I desire to say a few words in reference to allotments to seamen. This is an old question, and there has been legislation repeatedly to meet the evils which have arisen. Under the shipping act of 1884 allotments were prohibited except to the wife, mother, or dependent relative; and that is precisely what it is proposed by this bill to go back to—to go back to the shipping act of 1884. In 1886, in consequence of the difficulties which had arisen under the shipping act of 1884, it was found necessary to modify the allotment system, which was provided for by the act of 1886, which is now the law of the land, except as modified subsequently in the case of coasting vessels. That provides for allotments not only to the widow, mother, or dependent relative, but also for just debts of a creditor for board and clothing. That is all the allotment that is allowed by the law in force. This law is evaded—there is no doubt at all about that. Under the name of board, especially, a great many things are included that ought not to be.

But we must bear in mind, in dealing with legislation with reference to the sailor as we find him, that he is surrounded by peculiar influences under the boarding-house system. It may be remembered that in 1885, after the act of 1884 had been passed, vessels were held up in many ports in consequence of inability to obtain crews. I remember that at Pensacola a vessel was held up for nearly three months trying to obtain a crew in a fight against the boarding-house keepers who had control of poor Jack. I have no doubt that the rule laid down by the act of 1884 is the correct one, and it is proposed to return to it. The only question is whether it will work practically, and that can be determined, perhaps, only by experience. I think if we had held on to the act of 1884 we should have avoided many of the evils that have since arisen. As to the principle involved, I am in general concurrence with this bill. The allotment system is a bad system, a system by which poor Jack is robbed and the whole marine service deteriorated. There is no doubt at all about that; but whether we can practically go back and entirely abolish it, as was done in the act 1884, I am not certain in view of the experience of 1885. However, I am perfectly willing to try, and I am willing that this bill shall pass with the certainty that certain provisions in it will disappear when the Senate and the conferees shall have acted.

Mr. MAGUIRE. I yield one minute to the gentleman from New York [Mr. MITCHELL].

Mr. MITCHELL. Mr. Speaker, I wish to say in relation to this bill that as far as I have been able to familiarize myself with its provisions they seem to be most admirable. The suggestion has been made that the Senate may possibly make some amendments, and the gentleman from New York [Mr. PAYNE] has suggested that some series of registry lists might be prepared which would be for the advantage of good sailors and of shippers. This suggestion seems most admirable, and I am heartily in favor of it and of the bill and any amendment to it which will promote the interests of the sailors.

[Here the hammer fell.]

Mr. MAGUIRE. I yield three minutes to the gentleman from New Hampshire [Mr. BAKER].

Mr. BAKER of New Hampshire. Mr. Speaker, I suppose that no member of the House not on the committee has been able to examine this bill. There are sections of it which certainly make radical changes. The gentleman from Maine [Mr. DINGLEY] thinks it is well that we should pass this bill, even though he does not approve its provisions, and let it go to the Senate in the hope that the Senate will make it right. I simply make this remark in order to suggest that it appears to me the gentleman from Maine has experienced a recent change of heart with regard to the legislation of the Senate.

I have had barely time to examine the scheme and provisions of this bill which we are assured have been changed for the benefit of the sailor. I am not able so to understand these changes. I find that in biscuit he has been cut off 3½ pounds a week; in salt beef, three-fourths of a pound; in salt pork, three-fourths of a pound; in fish, 1 pound; in beans, one-third of a pound; in dried and canned fruit, 5 ounces; and in various other matters in similar proportion. Now, to offset this, what are the increases? The increases are very small and in rather peculiar items. In the first place I find that there is an increase of 7 ounces in sugar per week, and I presume the increase in sugar has been granted on account of the increase in pickles and in vinegar. [Laughter.] He is given one-quarter of an ounce increase in pickles and three-quarters of a pint increase in vinegar per week, and it is fair to presume that the sugar has been given him to sweeten his increased pickles and vinegar. [Laughter.] Then, to make up the sum and substance of this increase, with the exception of 8 ounces of onions, he is given an increase of 2 quarts of water to wash these things down with. [Laughter.]

Mr. MINOR of Wisconsin. Mr. Speaker, I want to say to the gentleman that this schedule was submitted to the Seamen's Union and the Sailors' Union and to all the organizations that we thought were interested in it, and in every instance they have answered that the ration is better than they have ever had heretofore, and better than they expected from the Fifty-fourth Congress.

Mr. BAKER of New Hampshire. I am sorry that the sailors have not a better opinion of the Fifty-fourth Congress than the gentleman tells us they have, but certainly it has always been supposed, at least among laymen, that the sailor required substantial food, and if the gentleman can state any reason for the cutting down of such articles as beef, beans, and pork, and attempting to offset this by adding a little butter, which it is impossible for any sailing vessel to carry to the tropics without its becoming rancid, I wish he would do so.

Mr. MINOR of Wisconsin. I am unwilling to force upon the sailors what they do not want and do not ask for.

Mr. HENDERSON. But they do ask for this.

Mr. MINOR of Wisconsin. They do not ask for anything except what is contained in the bill.

Mr. HENDERSON. They ask for this bill.

Mr. BAKER of New Hampshire. Have you the schedule which the sailors themselves presented? Was the schedule that you adopted the one which was presented by them, or was it one that was presented by some one interested with the vessel owners?

Mr. MINOR of Wisconsin. We submitted the schedule to the Surgeon-General of the Marine Hospital; he detailed four assistants, and they fixed upon a schedule which they thought admirable and acceptable to the sailors. That was accepted by the seamen and their representatives; and then we increased that.

Mr. BAKER of New Hampshire. But the supervising surgeons probably do not know anything about the practical requirements of the sailor on shipboard, and nothing has been presented to the House from the sailors themselves.

Mr. MAGUIRE. If nobody else desires to speak in opposition to the bill, I will proceed with my own remarks.

Mr. Speaker, although, through the courtesy of the gentleman from Tennessee [Mr. RICHARDSON], I have the privilege of controlling the time of those opposed to the bill, and have endeavored to be fair in distributing it, I am very much in favor of the pas-

sage of this measure. It represents a compromise, as the gentleman from New York [Mr. PAYNE] stated, between the bills introduced by me for the improvement of the condition and treatment of sailors in the American merchant marine, especially in the several particulars which he has mentioned and which I will not take time to repeat. This bill is the result of an agreement reached by mutual concessions between the shipowners and the sailors. It is a great advance over existing laws in the matter of the protection of the American sailor, the improvement of his condition at sea and on land, and the according to him of rights that are common to American citizens in all other trades, callings, and occupations under the American flag.

As the gentleman from New York [Mr. PAYNE] has stated, the sailor has been neglected for a hundred years. I believe that advances far beyond those provided in the bill ought to be made; but as the bill constitutes a great advance over the conditions fixed by existing law, and as it proceeds upon the principle that the sailors in our merchant marine service should, in their personal rights, be placed upon an equality with American citizens engaged in other industrial pursuits, I cordially accept it as a valuable step in the right direction.

By its terms it does away with imprisonment for the violation of civil contracts, and this is a great though tardy concession to their manhood. It sets them free from involuntary servitude in most cases. In this respect it does not go as far as it should, but it goes far enough to justify me in heartily supporting the bill as it has been reported by the committee.

I have neither the time nor the disposition to discuss from my point of view the propositions so ably presented by the gentleman from New York in the brief time at his disposal. I prefer to treat this whole matter as a compromise measure, on which this House should certainly be willing to go as far as the shipowners, through their representatives, have agreed to go. I concur in all that the gentleman from New York has said, and I join with him in urging that, as no harm can come to any interest through the passage of this bill, and as much good will result to the sailor, the blot which for a hundred years has been permitted to rest upon one branch of lawful and honorable labor under the flag of the United States shall be at least partially removed. I trust that every man on this side of the House will give cordial support to the bill.

In closing I wish to say—and under the circumstances it is the only other suggestion I desire to make—that when, in 1892, I was asked to endeavor to secure from Congress (in accordance with views which it was well known that I entertained) legislation for the improvement of the condition and treatment of American sailors, I advised the sailors' union to employ a maritime lawyer, with instructions to draft such bills as would secure the desired improvement of their condition, but upon these lines and these alone: That no proposed change should be contained in any of those bills unless a similar provision was found in successful operation in the laws of some leading maritime country of the world. It was upon that basis that the bills introduced by me were prepared by an able maritime lawyer. In support of every provision, every amendment, every reform incorporated in my bills and in this pending bill the law of some great maritime nation providing for the same immunity or the same care for the sailors in the merchant marine of that country has been cited to the committee, and it has also been shown that such provision of law is in successful operation there.

I am sure that no interest can be injuriously affected by the passage of this act, and that it merely brings the worst of the shipowners and masters in the American merchant marine up to a standard in the treatment of their sailors which has long since been adopted and pursued by three-fourths of the masters and owners in that great branch of American industry. That is all that I desire to say. The bill is a compromise measure and I hope that it will be passed without dissent.

Mr. PAYNE. Mr. Speaker, in reply to my friend from New Hampshire [Mr. BAKER] I wish to say that the great trouble with his speech was that its foundations were not right. The original bill as introduced by myself—a measure gotten up by the Maritime Exchange and the Commissioner of Navigation—had a schedule of food in it which the committee crossed out and put in this new schedule recommended by the Surgeon-General of the Marine Hospital. My friend here compared the schedule of the Marine Hospital with the schedule in the bill, and he thought the schedule in the bill was the present law.

Mr. BAKER of New Hampshire. Will the gentleman allow me?

Mr. PAYNE. No; I have not the time. I will accept the gentleman's apology for not understanding the question.

Mr. BAKER of New Hampshire. And I will excuse the gentleman for not yielding for a correction.

Mr. PAYNE. The present law, for instance, allows 1 pound of bread per day, and 1 pound only. This bill allows half a pound of biscuit per day and 1½ pounds of fresh bread—2 pounds of bread daily. My friend found some fault about the pease and beans. Under the old law there was not a sufficient quantity of these allowed. That law allowed but a third of a pint of pease three days in each week; that is, a pint per week. This allows four-thirds of a pint of pease and beans weekly. We increase the allowance of sugar, the allowance of fish—the allowance all along the line. We provide a liberal scale of provisions. If my friend here sits down every day in the week to a table with as liberal a scale of provisions as that provided in this bill, he is more fortunate than many of his colleagues on this floor.

Mr. HENDERSON. And this schedule, we understand, is acceptable to the seamen.

Mr. PAYNE. Yes, it is acceptable to the seamen, acceptable to the Surgeon-General and his board of skilled assistants, and acceptable, as I understand, to the masters of vessels. It is a liberal bill indorsed everywhere. And my friend from New Hampshire has not shown any reasonable ground of complaint against it.

As I said, Mr. Speaker, this bill is designed to alleviate the condition of seamen. There is no doubt that they need it. There is no doubt there should be some inducement to enable us to get American boys to enter our merchant marine as sailors. We have not many there now, and the class of sailors upon the high seas is not the same class of sailors, I am sorry to say, that we find upon the Great Lakes. On the contrary, on the Great Lakes American boys do become sailors, and experience has shown, as a rule, that the character of young men engaging in that business on the Great Lakes is of a very much higher order—they are a better class of citizens—than those who engage in service on the high seas.

Now, there must be some reason for this difference. It is not the difference of wages on the Great Lakes, but it arises from the fact that they are not restricted by any of these unusual and antequated laws. It has never obtained out there that a seaman shall be liable to imprisonment for not living up to the strict contract into which he enters when he ships. The seamen on the Great Lakes are as free as a man who hires to a railroad company for service on its road or to a private individual for employment of any character. And it has occurred to me, Mr. Speaker, that perhaps the difference in the condition of the sailors on the high seas and those on our Great Lakes grows out of the difference in the manner in which they serve the master of the ships on the lakes; and that the sooner, with conservatism, we get to the goal of relieving the sailor on the high seas from the restriction imposed upon him by these laws, laws that seek to take away his personal liberty, that sap his manhood, the sooner we will elevate the men who become seamen on the high seas.

It is my ambition, and the ambition of the committee, and I think the majority of this House, too, to build up our merchant marine. We can do it by giving them a better class of laws, and thereby producing a better class of sailors, and by going a step further and providing that the imports that come from foreign countries on American bottoms shall come in at a more favorable rate than those that come in on foreign bottoms. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

The question is on the motion to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill passed.

POST-OFFICE APPROPRIATION BILL.

Mr. LOUD. Mr. Speaker, I desire to submit a final report of the conference committee on the Post-Office appropriation bill.

The SPEAKER pro tempore. The Clerk will read the report.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 1, to the bill (H. R. 6614) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"*Provided*, That no post-office established at any county seat shall be abolished or discontinued by reason of any consolidation of post-offices made by the Postmaster-General under existing law, and any such post-office at any county seat heretofore consolidated shall be established as a separate post-office at such county seat: *Provided, however*, That this provision shall not apply to the city of Cambridge, Mass., or to Towson, Md.: *And provided further*, That hereafter no station, substation, or branch post-office shall be established beyond the corporate limits or boundaries of any city or town in which the principal office to which such station, substation, or branch office is attached is located, except in cases of villages, towns, or cities of 1,500 or more inhabitants, not distant more than 5 miles, as near as may be, from the outer boundary or limits of such city or town in which the principal office is located."

And the Senate agree to the same.

E. F. LOUD,
GEO. W. SMITH,
J. C. KYLE,
Managers on the part of the House.

W. B. ALLISON,
R. F. PETTIGREW,
CHAS. J. FAULKNER,
Managers on the part of the Senate.

Mr. LOUD. The statement of the House conferees will explain quite fully the action taken upon this remaining amendment of the Senate.

The statement was read, as follows:

The managers on the part of the House submit the following statement in writing, showing the nature and effect of the Senate amendment retained as amended:

1. Amendment numbered 1 is agreed to with amendments the effect of which is to maintain all consolidations of post-offices that have heretofore taken place except Ellicott City, Md.; prohibits the future consolidation of county seats with other post-offices, and also prohibits further consolidation of any post-offices except within limit of 5 miles, and then said town to be consolidated must have 1,500 population.

E. F. LOUD,
GEO. W. SMITH,
Managers on the part of the House.

Mr. LOUD. Mr. Speaker, I will state for the information of the House that the explanation just read on the part of the managers of the House explains quite fully the situation. The amendment of the Senate as modified retains in statu quo all the consolidation provisions which were deemed advisable in connection with the bill except in the case of Ellicott City, in the State of Maryland, and it prohibits in future the consolidation of post-offices more than 5 miles beyond the corporate limits of any city in which such office is to be consolidated except in cases of towns having a population of 1,500 or more. I am free to say, on the part of the conferees, that we do not believe that the amendment of the Senate should have been put into an appropriation bill. But we have gotten the best out of this that we could, and have satisfied everybody who is interested in this consolidation matter. It is an amendment that could not have gone into the bill in the House, because it is legislation.

Now, if there is nobody who wants any information, I should like about five minutes, if no other conference report is ready to be presented, in order to submit to the House a statement in relation to postal matters.

In view of an apparently growing sentiment in the country for the Government to take control of all means of transportation and transmission, I should like to submit to the House brief statistics of the deficiencies existing in the Post-Office Department for a number of years, in order that the House and the country may ascertain from these figures how economically, how successfully, and how profitably that Department has been managed, and of what great benefit to the people the management of the Post-Office Department is to-day, that they may perhaps take some lesson and apply it to other consolidations that are now pressing upon Congress to be acted upon.

Of course it has always been the policy of the Government to make the receipts of the Post-Office Department meet the expenditures as near as possible. That policy was followed from the foundation of this Government up to 1884. I believe it was the policy then also to enact such legislation as would make the Post-Office Department self-sustaining, but it was a mistaken act of legislation. We find in 1837 the Post-Office Department was self-sustaining, and returned a surplus revenue of over $1,600,000. There was then a deficiency until 1848, and in 1849, 1850, and 1851, when there was a surplus. There was then a deficiency each year until 1865.

The laws have been modified in all these instances after a period when the receipts met the expenditures.

In 1882–83 there was a very healthy surplus in revenues in the Post-Office Department. In 1881 it amounted to more than $1,000,000, and in 1883 to more than $2,000,000.

The following table shows these statistics in detail:

Comparative statement of receipts and expenditures of the Post-Office Department from July 1, 1836, to June 30, 1895.

Year.	Receipts.			Expenditures.	Deficiencies.
	Revenue.	Treasury grants.	Total.		
1837	$4,945,668.21		$4,945,668.21	$3,288,319.03	*$1,657,349.18
1838	4,238,733.46		4,238,733.46	4,430,662.21	191,928.75
1839	4,484,656.70		4,484,656.70	4,636,536.31	151,879.61

*Excess of revenue.

Deficiencies 1837 to 1865, inclusive	$44,972,783.51
Deficiencies 1866 to 1895, inclusive	146,698,869.48
Total	191,671,652.97

In 1883–84 was enacted what was known as the sample-copy law, and the second-class matter rate went to 1 cent a pound. Since that time, contrary to the expectation of Congress—because Congress anticipated that the deficiencies would immediately increase, but that they would almost cease in a few years—the year succeeding the adoption of the law the deficiency was, in round numbers, $3,800,000. The deficiencies have increased, and I want again to call the attention of this House to this fact. The deficiencies have increased from that period to the present with unvarying regularity, until last year they amounted to $10,196,000.

Mr. HILL. Do you think it is due to that law?

Mr. LOUD. Why, there is no doubt about it.

Mr. HILL. Wholly?

Mr. LOUD. Wholly. I have no doubt about that, and if gentlemen would investigate for themselves the class of matter that has been admitted under that law, I do not think any sane man in the world could differ from me on that subject. Now, I have brought here a sample of this stuff—I say stuff—that has gone through the mails under our sample-copy law. Here are some of these publications, the Home Treasure, Augusta, Me.; the Fireside Visitor, Augusta, Me.; the International Farmer and Home Magazine, Augusta, Me.; Trumps, Kansas City; Breeze, Augusta, Me.; Ladies' Home Jewel—you will find that these names are copied as nearly as possible after the names of some of the best magazines in the country—Ladies' Home Jewel, New Haven, Conn.; the Welcome Friend, New York; Hearth and Home. These are only a few. I have 500 of those down in my committee room.

Mr. TRACEY. What is the matter with them?

Mr. LOUD. If any gentleman in this House will go over them carefully he will find this similarity in all, that there is one class of advertising that appears in every one of these journals, and I assert that there is not one of these papers that has over 250 legitimate subscribers. Here are some of the advertisements that permeate this class of stuff to which I have reference and which goes all over the country:

Real lovers' cards. "Tells you how to grow a mustache." "How agents can make $100 a day." "Great book of secrets," etc. You all know what they are.

This is the class of stuff that is going through our mails. If you were to read them all, if you would read the 500 papers which I have down in my committee room, you would find the same class of advertisements in every one of them, and there are firms in this country that issue as high as 50 papers, issued under different names, but all from the same firm. Here is another class. A year

or two ago the gentleman from New York [Mr. QUIGG] brought in a few of the standard works of this country and held them up to show how this was educational. I should like to call the attention of the House to this. This which I have in my hand is a sample, and there is more of that stuff going through the mails than of the class of matter that was presented to this House by the gentleman. I call your attention to this. How would you like to have that go to your fireside, the bosom of your family, your young ladies' institutes?

Mr. QUIGG. Is there not a law on the statute books against transmitting this indecent and obscene literature through the mails?

Mr. LOUD. I know there is; but it is a question whether this is indecent. That is a question to be determined.

Mr. QUIGG. It is in the discretion of the Postmaster-General, is it not?

Mr. LOUD. If gentlemen will sit down in front of me and not get excited, I will show you many more of this higher class educational matter which we are transmitting at a net loss of millions annually. Permit me to say that serial novels are allowed to go through the mails at 1 cent per pound. We ought not to have such matter in there at any price. Still I am willing if they will pay their share. They can not corrupt me, and my own family are past corruptible age.

Mr. QUIGG. I would like to ask the gentleman a question. Has not the Department ruled the Kreutzer Sonata out of the mails, and is not all matter like that, which is probably indecent and obscene literature, ruled out? Why can not the gentleman get all of this stuff ruled out of the mails in that way?

Mr. LOUD. Oh, it is a question whether that is under the law indecent or obscene.

Mr. QUIGG. What kind of books?

Mr. LOUD. Do you claim that Straightout Detective, by "Old Sleuth Hound," is an educational work?

Mr. QUIGG. I do not know anything about it.

Mr. JOHNSON of California. Will my colleague allow me to ask him a question?

Mr. LOUD. Certainly.

Mr. JOHNSON of California. Are you now discussing the conference report?

Mr. LOUD. Certainly; as near as I can.

Mr. JOHNSON of California. Is it a conference report on the passage of a bill that the gentleman has introduced?

Mr. LOUD. The substance of it is this, Mr. Speaker: I was endeavoring to call the attention of the House, and it is the custom for committees, I will say to my friend from California, to speak on matters relating to the Departments over which they have certain supervisory care.

Mr. JOHNSON of California. What I am asking, Mr. Speaker, if the gentleman will pardon me, is this: He has introduced a bill with reference to excluding certain matter from the mails; and I want to know if that is the bill he is now discussing; because if it is, I want to be heard on the matter. I am opposed to his bill, and I want to say something about it when it comes up.

Mr. LOUD. Mr. Speaker, when the gentleman from New York asked me a question, I was about to reply in this manner. He knows as well as any other gentleman on this floor how serial novels are issued. There are a few firms in the larger cities whose business it is to cover novels alone. There are thousands of tons of this printed matter uncovered stored in warehouses. They are assumed to be issued in serial numbers. No. 1 might be one of Scott's novels. No man in the world, not even the publisher of this book, can tell what No. 2 or No. 3 will be. No. 2 may be the book that I have referred to here. No. 3 may be this other. Now, it is impossible for the Post-Office Department to carefully examine every book that is submitted for mailing and that has been admitted to the second-class privilege. You understand all that you have to do is to submit a certain book, say the first number of a series. The gentleman knows that as well as I do. [Cries of "Vote!" "Vote!"]

Mr. HEPBURN. The only change is in the cover.

Mr. LOUD. The only change is in the cover. I would like to ask him if these are educational works: Wicked Nell, Chicago After Dark, Cranky Ann, Irish Mollie, Agnes, Woman's Duplicity, A Lady of Pleasure, etc. This list is full of such names. I do not claim that they are obscene; but when the United States Government is expending $40,000,000 a year for the transmission of these books under the assumption that it is educational matter, I want to call the attention of the House to the fact that it is the merest rot. Now, how does this sample-copy business work? I have in my hand a letter from an advertising agency——

Mr. QUIGG. A parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. QUIGG. Is there anything before the House with reference to second-class matter?

The SPEAKER pro tempore. The gentleman from California presented a conference report. What there is in it the Chair does not know.

Mr. LOUD. I stated when I arose, if there was no other conference report on hand, that I desired to make a few pertinent suggestions relating to postal affairs which might be of some benefit to you. Surely no harm can result.

Mr. TRACEY. I make the point of order that the gentleman is not speaking to the conference report at all, or anything contained in it.

Mr. QUIGG. If this question is to be debated I desire to have an opportunity to take a part in the debate, if there is anything before the House with reference to the matter to which the gentleman is alluding.

Mr. LOUD. The gentleman will have ample opportunity to debate this question if it ever comes before the House.

Mr. QUIGG. If it is not before the House, I make the point of order against the remarks of the gentleman from California.

Mr. LOUD. I am only doing what is customary in this House when the question of a conference report is up.

Now, then, Mr. Speaker, here is a paper called Comfort, which claims to have a subscription list of one million and a quarter. A gentleman sent me a letter in which he states that they do not send sample copies out singly, but send out four at a time, in case one may get lost! I suppose I am not going to detain the House a great while; but I had hoped, Mr. Speaker, that the measure to which I have alluded would have been taken up by this House. It has received, permit me to say to the gentleman from New York and the rest of this House, the highest commendation from the great mass of the press of this country. It has received the commendation of 90 per cent of the people who have given this subject any serious thought.

There are, Mr. Speaker, on the outside, evidently, people who know more about what Congress is going to do than Congress does itself. I will say that this most estimable family journal, or business journal, or magazine, or whatever you may term it, still one of those that go under second-class privileges as educational matter, known as Printer's Ink, I say to every member of this House, every one of whom I suppose gets a copy of it every week—

Mr. CUMMINGS. If the gentleman will allow me, I do not get a copy of it, and have never had a copy of it since I have been here.

Mr. LOUD. Then the gentleman can not know how much useful knowledge he has lost. I saw in this journal two months ago an announcement that the "Loud bill" was dead. I suppose they must have been in possession of information at that time of which no person in this House had any knowledge, but they happened to be in possession of the true and correct information. [Laughter.] Now, here [holding up a publication] is something that I trust the gentleman from New York has received; he says he does not receive Printer's Ink, but I venture to assert that he does get this, and it is no doubt a very useful publication. I have in my committee room a letter from the proprietors of this atlas, in which they protest against the so-called Loud bill because it would prevent them from educating the masses of our people by sending out this work, and they state that up to the time of writing they had sent out through the mails more than 600,000 copies, at a nominal cost of one and a half cents per copy. The publication weighs a little over a pound and a half and they have sent out a little over 600,000 copies, making a million pounds, and the Government has made a loss in transmitting that matter of $75,000, not taking into consideration the cost of handling it. This is, no doubt, a good atlas, but why should the Government lose this large amount of money for the purpose of distributing it through the country?

Mr. BINGHAM. Why should the Government transmit the daily papers through the mails?

Mr. LOUD. Why, I ask, should the Government be at that expense and loss in order that a man who is publishing a farmers' journal in the State of Ohio may be enabled to send out this publication to increase his circulation?

Mr. CROWTHER. Does not that atlas educate the people?

Mr. LOUD. Oh, I will admit, Mr. Speaker, that an atlas does help to educate the people.

Mr. CROWTHER. Well, what is the Post-Office Department for? Is it not for the transmission of educational matter to the people in different parts of the country?

Mr. TRACEY. Mr. Speaker, I make the point of order that the gentleman from California is out of order.

The SPEAKER pro tempore. The gentleman from California is proceeding in order.

Mr. TRACEY. He can not be in order. He is talking about a bill that is not before the House and can not come before it at this time.

Mr. LOUD. Now, let me say to the gentleman from Missouri [Mr. CROWTHER] that if the question confronting this Congress were whether we should appropriate $40,000,000 for the transmission of educational matters which no official of the Government had any supervision over, would the gentleman vote for it?

Mr. CROWTHER. Of course not.

Mr. LOUD. Well, I should say not; but that is the question in a nutshell. If this is for educational purposes, permit me to say

that there is no person in the world who has any supervision over it, and this practice is debauching the mails of the country and the people also.

Mr. MILLIKEN. If the gentleman's argument is correct, that we ought not to transmit through the mails anything of this character, why is it that the Government sustains all over the country little post-offices that do not half pay the cost of running them?

Mr. MAHANY. For the convenience of the people.

Mr. MILLIKEN. Is it because the post-office is established for the purpose of yielding revenue; or, rather, is it not because that Department is maintained for the convenience and for the benefit of the people of this country? I think that if the argument of the gentleman were carried out to its logical conclusion every post-office in the country that does not pay the cost of running it ought to be abolished.

Mr. LOUD. Oh, Mr. Speaker, there is reason in everything. In my opinion it is a beneficent thing to establish and maintain these country post-offices in order to accommodate the people in the thinly settled districts.

Mr. MILLIKEN. Then, if that is the gentleman's view, I will ask him if it is not also a beneficent thing to make the transmission of literature cheap and easy. The gentleman may prefer to read the classics or some other high grade of literature, but there is a great deal of literature which goes out among the people of this country that is to them, perhaps, quite as desirable as the higher literature would be to him, and the loss of which they would feel very keenly, and I am not certain but that the transmission of that literature through the mails—I do not mean anything that is objectionable, but the great mass of our popular literature—I am not quite certain but that the transmission of that literature cheaply through the mails to all parts of the country is as great a beneficence and of as great advantage to the people as the establishment and maintenance of a little post-office in some corner where it does not pay, perhaps, one-fifth of the cost of running it.

Mr. TAWNEY. I wish to ask the gentleman from Maine whether the conferees of the two Houses have agreed upon all matters of difference on this bill? [Laughter.]

Mr. MILLIKEN. I am not one of the conferees, and therefore can not answer that question.

Mr. LOUD. Now, then, I will say to the gentleman——

Mr. QUIGG. As the gentleman from California has mentioned "the Loud bill," I wish to know whether the Loud bill is embraced in this conference report?

Mr. LOUD. If gentlemen had not interrupted me, I should have been through long ago. By these constant interruptions they are simply "prolonging their agony." Now, if you will let me proceed——

Mr. QUIGG. Is not my question a pertinent one, as to whether the Loud bill is embraced in the conference report?

Mr. LOUD. After I get through with the gentleman from Maine [Mr. MILLIKEN] I will perhaps answer the inquiry of the gentleman from New York. I will say to the gentleman from Maine that the measure which I advocate here tends to purify the legitimate press of this country. I believe the legitimate press of the country should have every privilege which it now enjoys. But why the mails of this country should be weighed down with this stuff which no man or woman or child on God's earth wants, I can not see. I believe that every paper in this country should have the privilege of sending its matter to its subscribers—the people who want it—at the present rates.

Mr. BINGHAM. Why? Give us the reason. Why should newspapers go at a cent a pound, being a loss of 8 cents a pound, while letters must pay 32 cents a pound?

Mr. LOUD. Perhaps I should have put my statement in a different way. I will modify it and say that I would be willing to endure, and endure with great patience, the present system in that respect, because we have endured it almost since the beginning of the Government, whether it be right or not. But I believe the same privilege should be extended to the humblest citizen in this land that is extended to the largest and wealthiest proprietor of any newspaper. And permit me to say that so long as you are weighing those mails down with the matter to which I refer and losing $40,000,000 a year you are preventing the great mass of the people of this country from enjoying what is their proper and just right—1-cent postage. [Applause.]

Mr. MILLIKEN. Inasmuch as the gentleman has referred to me, will he allow me to say——

Mr. QUIGG. Will the gentleman yield for a question?

Mr. LOUD. I think I had better finish my remarks. I do not think these gentlemen are enlightening the House; and you have sufficiently embellished my speech, and we had better let the machine proceed.

Mr. QUIGG. All I want to know is whether the Loud bill is in this report.

The SPEAKER pro tempore. The gentleman from California declines to be interrupted.

Mr. LOUD. The gentleman well knows that the bill to which he refers is not in this report.

Mr. MILLIKEN. Why are you talking about it, then?

Mr. LOUD. What I have said on this subject is, I believe, all I want to say. I do not suppose I shall ever again have the opportunity of calling the attention of this House to what I believe to be some of the gross abuses connected with the postal service. Other people may differ with me; that is their right; but when I see what appears to be an abuse, and am placed in charge of a committee whose province it is to deal with such questions, and when after six months of diligent labor and research into the workings of the Post-Office Department I have undertaken to present a bill on the subject, it is most remarkable that any gentleman should be unwilling to allow me to present the subject in this somewhat informal manner, which I adopt because I can not be recognized to present it in a more formal way.

Mr. MILLIKEN. But the other side ought to have an opportunity to reply.

Mr. LOUD. Permit me to say to the gentleman there are occasions when a man must defend himself. This journal here, or whatever you may call it, had said, "LOUD was bought off"; that he had "suppressed the Loud bill." The newspapers of this country have commended this measure; they are unable to ascertain why it should not gain consideration. Some of them have said that I have "laid down on it." In defense of myself, Mr. Speaker, I have been forced to speak. [Applause.] I wish to say that there has never been an hour since this bill was reported to the House that I would not have sacrificed all else to have brought the bill up for consideration; and I will say further that in my opinion this House is doing gross injustice to 70,000,000 people in adjourning without passing this bill.

Now, Mr. Speaker, I am done. [Cries of "Question!" "Question!"]

The SPEAKER pro tempore. The question is on agreeing to the conference report.

The report was agreed to.

MESSAGE FROM THE PRESIDENT.

A message from the President, by Mr. PRUDEN, one of his secretaries, announced the action of the President on bills of the following titles:

On June 6, 1896:

An act (H. R. 8109) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes;

An act (H. R. 8008) defining cheese, and also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of "filled cheese";

An act (H. R. 6994) relating to the sale of gas in the District of Columbia;

An act (H. R. 7578) granting the Flagstaff and Canyon Railroad Company right of way for railroad purposes through the Grand Canyon Forest Reserve in northern Arizona;

An act (H. R. 1109) granting a pension to Elizabeth Marshall;

An act (H. R. 4598) granting a pension to Mary Cray;

An act (H. R. 6111) granting a pension to Elizabeth A. Sargent;

An act (H. R. 6134) granting an increase of pension to Caroline E. Purdum;

An act (H. R. 4724) to increase the pension of Mrs. Mary L. Aleshire;

An act (H. R. 4275) to increase the pension of Mrs. Annis H. Enochs, widow of Gen. William H. Enochs, from $20 to $50 per month;

An act (H. R. 5225) for the relief of Mrs. Elizabeth M. Williams, of Monroe County, Tenn.;

An act (H. R. 3229) for the relief of Hannah Newell Barrett;

An act (H. R. 6293) to increase the pension of Peter Rafferty;

An act (H. R. 7334) granting an increase of pension to William T. Applegate;

An act (H. R. 6132) granting an increase of pension to Thomas M. Scott;

An act (H. R. 3007) granting an increase of pension to Michael S. Pettit;

An act (H. R. 3033) to increase the pension of Elizabeth T. Beall, widow of Benjamin L. Beall, late colonel First United States Cavalry;

An act (H. R. 2602) for the relief of Solomon Hyams;

An act (H. R. 3857) granting a pension to Thomas Brewer;

An act (H. R. 2373) granting a pension to Elvin J. Brown;

An act (H. R. 3395) granting a pension to Carrie H. Greene;

An act (H. R. 4283) granting a pension to Delia A. Marsh;

An act (H. R. 5175) granting a pension to Nancy Gentry;

An act (H. R. 468) granting an increase of pension to Mrs. H. J. Kiernan;

An act (H. R. 5792) granting an increase of pension to Mrs. Julia A. Jameson;

An act (H. R. 1734) to increase the pension to Ann Catherine Hull;

An act (H. R. 3578) granting a pension to Elmira E. Dustin;

An act (H. R. 2006) to increase the pension of Harriet C. Gregg; widow of Col. and Bvt. Maj. Gen. John Irvin Gregg, from $30 to $50 per month; and

An act (H. R. 3582) to remove the charge of desertion now standing against Henry H. Bailey.

NOTE.—The following bills having been presented to the President May 25, 1896, and not having been returned by him to the House of Congress in which they originated within the time prescribed by the Constitution, have become laws without his approval:

An act (H. R. 4383) granting a pension to Gen. William H. Morris;

An act (H. R. 2042) to increase the pension of Wilbur F. Cogswell; and

An act (H. R. 3337) amending the act of June 8, 1880, entitled "An act to authorize the President to appoint an officer of the Navy or the Marine Corps to perform the duties of Solicitor and Judge-Advocate-General, etc., and to fix the rank and pay of such officer," and for other purposes.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had still further insisted upon its amendments to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, numbered 64, 69, and 70, disagreed to by the House of Representatives, had agreed to the further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes; had still further insisted upon its amendments numbered 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, 195, and 201, disagreed to by the House of Representatives; had agreed to the further conference asked by the House of Representatives on the disagreeing votes of the two Houses thereon, and had appointed Mr. TELLER, Mr. ALLISON, and Mr. COCKRELL as the conferees on the part of the Senate.

A further message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed without amendment the bill (H. R. 9404) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes.

A further message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed without amendment joint resolution (H. Res. 195) to pay the officers and employees of the Senate and House of Representatives on the day following adjournment.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the amendment of the Senate numbered 97 to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes.

ORDER OF BUSINESS.

Mr. DRAPER. Mr. Speaker, I move to suspend the rules and pass Senate bill 2306, to amend Title LX, chapter 3, of the Revised Statutes, relating to copyrights.

The bill was read at length.

The SPEAKER pro tempore (Mr. DALZELL). It appears that the original bill, the subject-matter of the motion of the gentleman from Massachusetts, is not at the desk; and in the meantime the Chair will recognize the gentleman from Montana [Mr. HARTMAN], who desires to submit a motion.

THE NORTHERN PACIFIC RAILROAD COMPANY.

Mr. HARTMAN. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H. Res. 190) to facilitate the reorganization of the Northern Pacific Railroad Company; to secure to actual settlers the right to purchase, at a price not exceeding $2.50 per acre, the agricultural lands within its grant, and to prohibit said company or any successor company from giving, by consolidation, sale, or other corporate action, control of its railroad to any corporation, company, person, or association of persons owning, operating, or controlling a parallel or competing railroad, with the amendments recommended by the Committee on the Judiciary.

The joint resolution was read, as follows:

Resolved, etc., That the purchasers of the railroad property of the Northern Pacific Railroad Company, which may at any time hereafter be sold at judicial sale in any suit or suits for the foreclosure of any of the mortgages heretofore executed by said company thereon, may organize anew by filing in the office of the Secretary of the Interior, and in the office of the secretary of state of each State through or into which said Northern Pacific Railroad or any of its branches may run, a copy of the deed or deeds conveying said railroad and property, with a certificate, signed by them, setting forth the name adopted by them, the names, number, and residences, respectively, of its directors, and a copy of any plan of reorganization adopted by said purchasers or pursuant to which such purchase shall have been made. Upon filing such certificate such purchasers, their associates, successors, and assigns, shall, by the the name specified in said certificate, possess the franchise to be a corporation with the same limitations and powers as the Northern Pacific Railroad Company, and shall be subject to all the obligations and duties heretofore imposed by Congress upon said company, and may acquire and hold any property and branches of the Northern Pacific Railroad Company: *Provided*, That nothing in this resolution shall be held to revive any right heretofore forfeited by the Northern Pacific Railroad Company, or to extend to said purchasers at said foreclosure sale any other or different rights than those heretofore granted to said Northern Pacific Railroad Company; and it may acquire and construct additional branches or feeders, not parallel or competing with the line of said railroad or any of its branches, in any State as authorized by the laws thereof; and it may from time to time issue bonds, secured by mortgage, subject to all existing obligations of the Northern Pacific Railroad Company to the United States upon its tangible property and franchises or otherwise, not exceeding in the aggregate the sum of $190,000,000, and $25,000 additional per mile for railroad hereafter constructed, the interest on any of which bonds shall not exceed 4 per cent per annum, and stocks, preferred or common, not exceeding in the aggregate $155,000,000, of which amount not exceeding $75,000,000 may be preferred, but the preference of the preferred stock as to dividends shall not exceed 4 per cent per annum: *Provided*, That except such stock as shall be issued for property acquired under such foreclosure proceedings, no additional stock shall be issued, except for money, labor, or tangible property at its actual cash value, to the par or face value of the stock, which may be common stock or preferred stock, or both, as may be authorized at stockholders' meetings; and any stock issued contrary to the provisions hereof shall be void; and that any such mortgage shall be filed and recorded in the office of the Secretary of the Interior and in the office of the register of deeds of each county through and into which said railroad or any of its branches may run, as sufficient proof and notice of its legal execution and effectual delivery and of the lien thereby created: *Provided*, That such successor company, its successors and assigns, and any purchaser of lands at such foreclosure sale under such mortgages heretofore executed by said company, other than bona fide purchasers for actual settlement and cultivation, shall sell to any applicant therefor, for purposes of actual settlement and cultivation by such applicant, in tracts of not less than 40 nor more than 160 acres each, at a price not exceeding $2.50 per acre, any agricultural land lying more than 1 mile from said railroad and then unsold, heretofore granted by Congress to the Northern Pacific Railroad Company and acquired by purchasers at said foreclosure sale as aforesaid: *Provided*, That any lands acquired by said successor company situate in Minnesota or North Dakota, east of the Missouri River, lying more than 1 mile from said railroad, shall be so sold to any applicant therefor, for purposes of actual settlement by such applicant, in tracts of not less than 40 nor more than 160 acres, at a price not exceeding $5 per acre; and said company may reserve to itself, its successors and assigns, in the sale of any lands applied hereunder, all coal necessary for use in the maintenance and operation of said railroad which may be found therein and open for mining prior to such foreclosure sale, and the right to take therefrom gravel for its own uses: *Provided, however*, That said company shall have the right to reserve from sale hereunder, and to otherwise dispose of, such tracts or bodies of arid lands as it shall deem necessary or advisable for use in any way in promoting and developing irrigation, through companies or associations organized under and subject to the laws of the States in which such lands are situated: *And provided further*, That neither the Northern Pacific Railroad Company nor such successor corporation, its successors or assigns, shall consolidate its stock, or the stock at any time by it held in any subsidiary corporation, with, or sell, convey, or lease said railway, or by other corporate action give control or management over and of the same to any corporation, company, person, or association of persons whatever without the consent of Congress; and any contract entered into by said successor company in violation of the provisions hereof shall be null and void, and may be enjoined at the suit of the United States or any State in which said road or any part thereof is situate in any court of competent jurisdiction: *And provided also*, That nothing herein contained shall be construed as making any additional grant of lands to such successor corporation, or a waiver of any right of the United States now existing to enforce any forfeiture of lands heretofore granted to the said Northern Pacific Railroad Company, or as in any manner affecting the vested rights of any settler or settlers on any of the lands heretofore granted to the Northern Pacific Railroad Company, or of any purchaser or purchasers of any such lands from said company, or to extend to any purchasers at said foreclosure sale, or any subsequent foreclosure sale under the mortgages hereby authorized, any other or different rights than those heretofore granted to said Northern Pacific Railroad Company: *And provided further*, That all debts, demands, and liabilities due or owing by said Northern Pacific Railroad Company, which were contracted, accrued, or incurred in any State or Territory through or into which its line of railroad or any of its branches extend, to any resident thereof, for ticket or freight balances, or for work, labor, material, machinery, fixtures, and supplies of every kind done, performed, or furnished in the repair, equipment or operation, construction, or extension of said railroad or branches, and all liabilities by said railroad company in the transportation of freight and passengers, including damages for injuries to employees or others, and to property, which accrued, or upon which suit has been brought and is now pending, or upon which judgments against said railroad company have been rendered and remain unsatisfied in any such State, within twelve months prior to any appointment of a receiver for said Northern Pacific Railroad Company by any United States court, and all liabilities on appeal, or supersedeas, or cost bonds, or in garnishment proceedings, without regard to the date of such bonds, together with all debts and liabilities which such receiver may have incurred in operating said Northern Pacific Railroad and its branches, including claims for injuries to person and property, shall be paid by such reorganized company; and judgments rendered thereon against such receiver, and remaining unsatisfied, shall have full force and effect against such reorganized company, and be enforced by execution or other proper final process directly against such reorganized company and its property, and shall be a prior lien thereon: *And provided further*, That if the holders of bonds secured by the first mortgages of the Northern Pacific Railroad Company shall surrender their bonds

and accept in lieu thereof bonds or stock or both from the purchasers at such foreclosure sale then said first mortgage shall be held to be extinguished: *And provided further*, That in every case of failure of the title to any lands conveyed or contracted to be sold by said Northern Pacific Railroad Company any and all rights of such purchaser or his assigns, in respect of such land, or in respect of the failure of such title, or in respect to the liability of said Northern Pacific Railroad Company on said contracts for the sale of lands, shall survive and may be enforced against such successor company with the same force and effect and in the same manner as against the Northern Pacific Railroad Company; and such successor company, upon making compensation for such loss of title or failure to comply with the conditions of such land contracts, shall be subrogated to the rights of such purchaser in respect of the lands for which such compensation shall have been made: *And provided further*, That the reorganized railroad company provided for in this resolution shall, for all purposes of judicial jurisdiction, be held and deemed to be a citizen and corporation of the respective States into which its line of railway, or any branch or spur thereof, may extend, or in which any such corporation may conduct or carry on any business, and the service of process upon such corporation may be made according to the laws of the respective States in which suits shall be brought. And it being the purpose and intent of this resolution to authorize the creation of a corporation for railroad rather than for land-owning purposes, it is provided further that all lands herein referred to should be sold from time to time when a reasonable price is offered therefor; and if, after five years from the date of the passage of this resolution, it shall be ascertained by any court of competent jurisdiction, subject to the right of appeal, that any of such lands, except such as may rightfully be reserved by said newly organized corporation, under the provisions hereof, for which a reasonable price, to be determined by the Secretary of the Interior, has been offered, shall be held or reserved, first, by such newly organized corporation; or, second, held by any other corporation, person, persons, or association for the use or benefit of such newly organized corporation; or, third, held by any corporation or association in which any stockholder, officer, or member of such newly organized corporation shall be a member, officer, or stockholder; or, fourth, held by any stockholder, officer, director, or member of such newly organized corporation, then such land, or any part of it, so held or reserved shall immediately revert to the United States; and such holding or reservation may be ascertained in a suit by any person asking to make preemption, homestead, or cash entry of any tract or tracts of such land; and such person, if successful, shall be entitled to take the contested land according to the entry made; but no forfeiture under the third subdivision above shall take place provided the stock in the newly organized company, on account of the ownership of which a forfeiture might be worked, shall be forfeited and canceled on the books of the company as soon as a knowledge of such ownership reaches the president or board of directors of the said newly organized corporation; and the power to make such forfeiture and cancellation and appropriate the stock is hereby conferred on the said newly organized corporation.

SEC. 2. That stockholders in said successor corporation shall possess the same rights, privileges, duties, and obligations in respect to the management of the business affairs of said corporation as were enjoyed and possessed by the stockholders of said original Northern Pacific Railroad Company. The time and manner of holding elections for officers and directors of said successor corporation, the number of said directors, and the making of by-laws and transferring and voting stock shall be the same as existed under the original act incorporating said Northern Pacific Railroad Company and any and all acts amendatory thereto.

SEC. 3. That Congress shall at all times have the power to alter, amend, or repeal this resolution.

Mr. QUIGG. I ask a second, Mr. Speaker.

Mr. HARTMAN. I ask that a second be considered as ordered.

Mr. RICHARDSON, Mr. TERRY, and others demanded a second.

The SPEAKER pro tempore. In the absence of objection, a second will be considered as ordered.

Mr. KEM. I object.

Mr. PAYNE. Who objected? [Laughter.]

The SPEAKER pro tempore. The gentleman from Nebraska [Mr. KEM].

The SPEAKER pro tempore announced the appointment of Mr. HARTMAN and Mr. QUIGG as tellers.

The House divided; and the tellers reported—ayes 51, noes 1.

So a second was ordered.

The SPEAKER pro tempore. The Chair will recognize the gentleman from Montana [Mr. HARTMAN] to control the time in support of the proposition, and the gentleman from New York [Mr. QUIGG] in opposition.

Mr. HARTMAN. Mr. Speaker, I will ask the Chair, at the expiration of five minutes, to notify me, as I desire to yield a portion of the time to which I am entitled to the gentleman from Minnesota [Mr. TAWNEY].

Mr. Speaker, the Northern Pacific Railroad Company was organized by a charter granted by the Congress of the United States on the 2d day of July, 1864. It had a land grant among other things accorded to it by that Congress. Subsequent legislation of the Congress of the United States gave to that company the right to mortgage the lands and franchises and the railroad property of the corporation. Pursuant to that authority four mortgages were executed. Three of these mortgages have been foreclosed and that property is to be sold on the 25th day of July under the foreclosure. The purpose of this resolution is to enable the purchasers of that property, at the foreclosure sale, to take it as a Federal corporation. We are very desirous that this authority shall be granted. Every Senator and member of Congress from every State through which the line or any of the branches of the road runs are in favor of granting this right to the purchasers of the property.

A MEMBER. How many States are affected?

Mr. HARTMAN. Seven; the States of Minnesota, Wisconsin, North Dakota, Montana, Idaho, Washington, and Oregon. We are a unit on this question.

In addition to that, sir, I desire to read from the testimony taken before the Judiciary Committee to show that those who are interested in the property of the company are also in favor of the passage of this bill. Mr. Morrowitz, the attorney for the reconstruction company, in response to an inquiry submitted to him by Judge Strong, made the following answer:

There has been actually deposited over 99¼ per cent of all the bonds; 95½ per cent of all the preferred and 90 per cent of all the common stock.

So that the property interests of this great corporation, you will observe, are practically unanimous on this question. Now, as to the merits of the pending bill. I desire to say briefly that there are a number of reasons why we, as representatives of our respective constituents in the States I have named, desire the passage of this bill. First, if it is not passed within the time I have specified, then this company must organize under a State charter and purchase on the 25th of July this property and operate it under a mere State charter. There are many reasons why we do not want a State charter granted, the principal one of which is that we do not want to take the chances of the legislature of any State giving such a broad and unlimited freedom to this company as to give them rights which will be abused by them at the expense of the people of these several States.

Mr. Speaker, there are a number of reasons why it is essential that this bill should pass in addition to those which I have stated. First, this road has been operated under a Federal charter for nearly thirty-two years. The courts in our respective States have succeeded in establishing the precedents defining the rights, duties, and obligations of the road to the people and of the people to the road. Every lawyer here knows that it is a desirable and essential thing to peace and prosperity in a community that there be a settled line of judicial precedents. We do not want to have to commence to pioneer again in the matter of judicial determinations of some of the provisions of some State charter which may be granted to this successor corporation. Now, again, there is another reason. We have a very wholesome restriction here compelling the successor corporation to sell all its agricultural lands more than a mile from the railroad to settlers at a maximum price of $2.50 per acre. That is compulsory.

I will now reserve the balance of my time, and ask that some one who opposes the bill may occupy some of the time, after which I will yield to the gentleman from Minnesota [Mr. TAWNEY].

Mr. QUIGG. Mr. Speaker, twenty minutes' debate, as I understand it, is allowed on a measure under a motion for a suspension of the rules. I hold in my hand a statement on the part of J. Pierpont Morgan and others as to what it is proposed to do when Congress shall have passed this bill. I observe by that statement that we are talking about 4,706 miles of railroad, extending halfway across this continent. I observe that we are talking about land that comprehends 43,000,000 acres, and I notice that we are going to pass a bill, or else not, under a suspension of the rules, with twenty minutes' debate on a side, which changes the conditions under which $400,000,000 of other people's property are to-day owned. I notice that that is to be done in a bill of ten pages, which I wonder how many gentlemen in this House have read.

Now, Mr. Speaker, it seems to me that this is not a proper bill to come up under these circumstances, and under a proposition to suspend the rules and pass it. I have looked into the bill a little. I have not had time to look into it much. I observe that in place of $380,000,000 of stock and bonds now existent upon this property it is proposed that there shall be $345,000,000 of stock and bonds issued by the new corporation. I observe also a provision that certain debts, demands, and liabilities due and owing by the Northern Pacific Company, which were contracted in any State or Territory through which the road extends, and to any resident thereof, for certain purposes, are to be paid by this other corporation, but not much seems to be said in the bill about the debts and liabilities that are due to the residents of other States. I observe, too, that any judgment against the existent corporation is good, according to the terms of this bill, provided the suit has been brought within twelve months prior to the appointment of a receiver for the corporation.

Mr. TAWNEY. Will the gentleman permit an interruption right there?

Mr. QUIGG. Yes. Of course the gentleman is going to speak in his own time in a few minutes.

Mr. TAWNEY. Yes; but will you consent to strike out that limitation of one year?

Mr. QUIGG. I think it ought to be stricken out.

Mr. TAWNEY. The proposition of the reorganization committee was that there should be no limitation at all as to the length of time when the debt or the liability was incurred. That provision was put in by the Judiciary Committee, I think, by mistake, because they simply incorporated that provision of Judge Caldwell's order appointing the receiver relating to the payment of debt. If you will strike it out there will be no cause of complaint.

Mr. QUIGG. With pleasure. I shall offer an amendment to the bill as to this whole subject of debt in a moment. Now, you see, Mr. Speaker, by the admission of the gentleman, a member of

the committee that brings this bill here, you have got something in it with regard to other people's property that ought not to be there. Now, I say that, in my belief, there is a good deal in this bill that ought not to be there. I believe that this bill is another game of freeze-out, and I propose to illustrate it by a statement of facts with reference to one of the feeder lines owned by this corporation.

There is a corporation in the State of Washington known as the Seattle, Lake Shore and Eastern Railroad. It owns 240 miles of railroad. This corporation was bought by the Northern Pacific Railroad in 1890. The Northern Pacific took its stock and wrote on the back of the bonds that they pledged this land grant and all their property and franchises for the payment of this $5,500,000 worth of bonds. Now, the Northern Pacific defaulted on those bonds. They have not been paid. The Seattle Company has brought suit and has recovered a judgment, and an order of sale has been made and the road has been sold, but the judgment is not satisfied. Now, the bondholders of that corporation have to-day some equities in these assets. Perhaps when this bill passes they may have some; but when all the bonds and all the conditions of ownership have been changed, when a new corporation has been created, into the lap of which all these assets are swept by this bill, I apprehend that the difficulties which the Seattle Company have thus far experienced in the collection of their debt will be considerably increased.

Mr. SKINNER. Will the gentleman from New York submit to one question?

Mr. QUIGG. Yes.

Mr. SKINNER. Has this bill been referred to the Department of Justice; and if so, will you be kind enough to tell the House what the Department of Justice thinks about it?

Mr. QUIGG. I do not know where the bill has been referred. I have no doubt the gentleman from Minnesota [Mr. TAWNEY] can explain when he speaks, but I should rather the time were not taken away from me.

Mr. TAWNEY. You know it was referred to the Judiciary Committee and reported by the Judiciary Committee to the House.

Mr. QUIGG. The point I make against this bill is that this is not the time and this is not the way in which to pass it. The gentleman says that if this is not done the railroad would have to content itself with a State charter, and that such a charter will not be so good for the people that live out in his country. Well, it seems to me that the people who live in his country, where this charter will be liable to be obtained, ought to be able to take care of their own rights. And whether they are or not, what passes to this new corporation when the property has been sold? Why, there passes the property that is covered by the mortgage, and that mortgage is on all the property and rights of property of all kinds and descriptions, real, personal, and mixed, including its franchise as a corporation. The gentleman says that this bill is simply to maintain the conditions now existant under the charter of this company granted to them by the United States. That franchise goes with the rest of its property to the owners of the mortgage bonds or to the purchasers when it is sold.

Mr. FAIRCHILD. Will the gentleman allow me to ask him a question?

Mr. QUIGG. Yes.

Mr. FAIRCHILD. Is it not a fact that there has been a decision of the court that the charter or franchise does not go with the mortgage unless the law originally granting the charter and providing that the franchise could be mortgaged also provided a mode for exercising the right of sale and transfer?

Mr. QUIGG. I do not know what the decisions of the courts are. This whole property is now in the courts, and this bill is a proposition to get it out, with twenty minutes allowed for debate on each side under a suspension of the rules.

Mr. FAIRCHILD. Well, then, will the gentleman from New York allow me to call his attention to a case in which there was such a decision?

Mr. QUIGG. No; I will not.

Mr. HARTMAN. Well, I will put it in in my time.

Mr. QUIGG. I do not want to be discourteous to my colleague; but I have not the time.

Mr. FAIRCHILD. It is only about two lines; but there is a great deal of meat in it.

Mr. QUIGG. This corporation is now being sued in a great many ways and under a great many circumstances, and I want these Seattle, Lake Shore and Erie bondholders to have their day in court.

I intend to present at the proper time, Mr. Speaker, an amendment to the bill on this subject of property and debts; but I do think that this bill ought to be defeated; that this is no time and no place, and these are not the circumstances under which to pass it. I reserve the balance of my time.

Mr. HARTMAN. Mr. Speaker, I yield eight minutes to the gentleman from Minnesota [Mr. TAWNEY].

Mr. TAWNEY. Mr. Speaker, the principal objection urged by the gentleman from New York against the passage of this joint resolution is the fact, as he states, that we have not sufficient time to consider it; that it involves matters of such vast importance that we can not give to them that consideration which they deserve. I grant you, Mr. Speaker, that so far as time is necessary for a clear understanding of the various provisions and purposes of this resolution there is much force in this suggestion; but the friends of this proposed legislation are not responsible for the lack of time for its consideration.

Now I wish to emphasize one fact in regard to the extreme importance of action by Congress at this time upon this resolution. The Northern Pacific Railroad Company, as the gentleman from Montana and the gentleman from New York have said, was authorized by a joint resolution, passed in 1869, to mortgage all of its property, including its franchise; but under decisions of the Supreme Court of the United States, the first being in the case of the Memphis Railroad Company against the Commissioners (12 U. S., 696), it is held that the provision of this joint resolution which authorizes the company to mortgage its franchise is inoperative. The language of the court in that case is this:

A franchise to be a corporation is not subject to sale and transfer unless made so by the statute which provides the mode for exercising it.

So it is with this statute. It makes no provision for exercising the right to transfer the franchise, and is therefore inoperative.

That is the reason this proposition is now before the House. There is no provision of that kind in the joint resolution of 1869. The purchasers of the property of the Northern Pacific Company at the foreclosure sale which occurs on the 25th of next month will, therefore, not obtain that which the mortgagor or railroad company had originally mortgaged under the joint resolution to which I have referred. Therefore, in order to obtain that which Congress originally intended the purchasers at a foreclosure sale should possess, they have come here and asked that this franchise be extended to them, and that they be given the right to incorporate under the original charter of the Northern Pacific road.

Now, the importance of this to the people of the States through which the road passes is one of great magnitude. I want to call the attention of the House to the fact that unless this authority is given them the purchasers of this property will take the property at the foreclosure sale on the 25th of next month absolutely free from every condition; and in order to avail themselves of its benefits and to operate their road they will be obliged to incorporate under State authority. What will be the effect of this upon the titles to land which is now held by settlers all along the line of that road from Lake Superior to Puget Sound? Remember that that road has enjoyed a munificent land grant 40 miles in width in Minnesota and Wisconsin and 80 miles in width west of Minnesota, extending to Puget Sound. The greater part of that land grant has been sold to actual settlers. The Government of the United States has since discovered that some of these lands have been erroneously certified, and is now seeking to cancel those certifications. Whenever in the future the title of any of that land fails, unless the condition which we impose in this joint resolution is made a part of the right of the purchasers to incorporate under Federal authority, those settlers will have absolutely no protection and will have no recourse against anybody for the damages which they may sustain by reason of the failure of their title.

I have here a letter received from a gentleman in the State of North Dakota, in which he says that in 1893 he purchased from the old Northern Pacific Railroad Company a section of land. In his contract of purchase there is a guarantee that when he shall have performed the conditions imposed upon him by that agreement he should have a warranty deed of the land free from all liens up to the date of the contract. For almost ten years before that purchase of this land it was taxed, and all other lands in the State of North Dakota owned by the company were during that time likewise taxed. The company resisted the tax on the ground that under the laws of North Dakota their land was exempt, the company paying a gross-earnings tax, but the Supreme Court of the United States has held the lands taxable. That gentleman has performed every condition of his contract and he has applied for his deed, a warranty deed, but instead of that they offer him a quitclaim deed. Why? Because they know that before they can give a warranty deed they must pay up the taxes for all these previous years.

Now, if the purchasers of this property incorporate under State laws, then every man who has a contract for the purchase of land will have to go and pay the taxes himself or else lose his property; and this gentleman says that his is not an isolated case, but that there are hundreds of them in the State of North Dakota, and I am informed that there are hundreds of them in the States farther west where the lands have been similarly taxed.

Mr. WATSON of Ohio. I desire to ask the gentleman a question for information. Does the Northern Pacific Railroad Company desire this bill passed?

Mr. TAWNEY. The Northern Pacific Railroad Company is insolvent and has nothing to do with it, and I do not know whether they desire it or not.

Mr. WATSON of Ohio. Who is it that wants the bill passed?

Mr. TAWNEY. The prospective purchasers of this property at the foreclosure sale.

Mr. WATSON of Ohio. Who are they?

Mr. TAWNEY. The bondholders, creditors, and settlers.

Mr. DOOLITTLE. And the people of the States through which the road passes.

Mr. TAWNEY. Yes; and the people of the seven States through which the road runs.

Mr. HARTMAN. Without exception.

Mr. TAWNEY. Without exception, as the gentleman from Montana remarks. This joint resolution has been considered by the Judiciary Committee, and they have put into it every condition that is essential to protect the rights of the settlers in these States, and also the rights of the bondholders.

Mr. LACEY. Will the gentleman yield for a question?

Mr. TAWNEY. I will.

Mr. LACEY. Is not the main object of this bill to get away from the State courts and compel the people of those States to go into the Federal courts every time they have occasion to litigate with this company?

Mr. TAWNEY. There is a condition in this joint resolution which makes the purchasers of this property, when they incorporate under this law, subject to the jurisdiction of the State as citizens.

Mr. HARTMAN. That is correct.

Mr. TAWNEY. And the proposed prospective purchasers have consented to that condition. There is also a condition which compels the reorganized company to pay all judgments of record against the Northern Pacific Company for personal injuries, for labor, and for other claims which I can not enumerate.

Mr. FAIRCHILD. Will the gentleman yield for a question?

Mr. TAWNEY. Yes, sir.

Mr. FAIRCHILD. Is it not a fact that this bill is the result of an endeavor to comply with the desires of the prospective purchasers of the property on the one side and of the settlers along the line of railroad in the several States on the other side, and does it not succeed in doing so?

Mr. TAWNEY. That is exactly the case.

The SPEAKER pro tempore. The time of the gentleman from Minnesota has expired.

Mr. HARTMAN. Mr. Speaker, I reserve the balance of my time until the gentleman from New York [Mr. QUIGG] closes.

Mr. QUIGG. I yield three minutes to the gentleman from Arkansas [Mr. TERRY].

Mr. TERRY. Mr. Speaker, it is impossible in the brief time assigned to me to bring forward many of the objections that might be urged against this bill. The original act incorporating this Northern Pacific Railroad Company granted to it a belt of land 80 miles wide through the Territories and 40 miles wide through the States, extending from ocean to ocean, an empire in itself. The real object of the present bill is to enable the reorganized company to take all that vast domain, to buy it in a lump, whereas the mortgage under which the corporation is foreclosed was by the act of Congress required to stipulate that the land should be sold in small tracts. I read from a proviso in the act authorizing the mortgage, which says that—

> The lands shall be sold at public sale at places within the States and Territories in which they shall be situated after not less than sixty days' previous notice, in single sections or subdivisions thereof, to the highest and best bidder.

Mr. TAWNEY. Will the gentleman permit a question?

Mr. TERRY. I can not. The gentleman must recognize that in three minutes I can not spare any time for questions.

Mr. TAWNEY. I wish to ask the gentleman whether he did not, as a member of the Judiciary Committee, accept the bill with certain amendments which he proposed and which were adopted by the committee and are in the bill?

Mr. TERRY. I can not yield. I would be glad, if I had time, to answer any question. Now, Mr. Speaker, these lands have gone forward to sale under the act. The settlers or others who desired could, under the provision, have bought these lands in small tracts; but when you get this bill through those lands will be sold in a body to this new company. As a member of the Committee on the Judiciary I endeavored to put upon the bill some amendments, and did succeed in putting on two important amendments, one in regard to jurisdiction and the other in regard to certain debts. Still the bill is not one that should be passed here under suspension of the rules. Right at the heels of the session it was brought before the Judiciary Committee, and now to pass it here without any opportunity to discuss it—I can only get three minutes. Mr. Speaker, is my time out?

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. TERRY. I am an "object lesson" to show that we can not discuss it. [Laughter.]

Mr. QUIGG. I yield the gentleman from Ohio three minutes.

Mr. WATSON of Ohio. Mr. Speaker, this bill is something like the bill which the House refused to pass a few days ago. I do not know what the sense of the House is at this time upon this joint resolution, but I hope that when the vote comes upon its passage the House will not hesitate to defeat it.

Mr. TAWNEY. I hope the gentleman will give some intelligent reason for that.

Mr. WATSON of Ohio. If the gentleman will not interrupt me, I will proceed to do so. There are three reasons, Mr. Speaker, why, in my opinion, this joint resolution ought not to pass. The first and chief objection is that it bears upon every line of it the burden of suspicion by coming before this House within fifteen hours of our final adjournment.

Mr. TAWNEY. Who is responsible for that; the friends of the resolution?

Mr. WATSON of Ohio. When you tell me that this Congress undertakes to pass a joint resolution reorganizing a great transcontinental railway line after twenty minutes' debate on a side and then adjourns within ten hours after that, I say it puts a burden on this Congress that it does not want to assume.

Mr. TAWNEY. I do not think the gentleman will scare anybody.

Mr. WATSON of Ohio. Will the gentleman please keep quiet? There is another reason; and I call the serious attention of the House to this matter. This railroad was organized under an act of this Congress. You propose to reorganize it under a simple joint resolution. If you will take the trouble to examine into the dignity and legal force and binding effect of an act of Congress you will find it is much stronger and of much more force than a simple joint resolution. I have not the time now to read the authorities on that subject, but if the gentleman from Minnesota, who seems to be very much amused at my talk, will look at page 535 of the Manual he will get some information on that subject which he does not seem now to have, and which, I think, will greatly benefit him. I also call the gentleman's attention to the Constitution of the United States on this subject, and I lay down the general proposition, without having time to sustain it by authority, that you can not rehabilitate and call back to life by a joint resolution a company that was originally created under an act of Congress. There are other serious objections, Mr. Speaker, which I have not time to mention.

[Here the hammer fell.]

Mr. QUIGG. I want to ask the gentleman in charge of this bill whether he will agree to strike out, on page 7, in lines 5 and 6, the following words:

> Within twelve months prior to any appointment of a receiver for said Northern Pacific Railroad Company.

Mr. HARTMAN. I will. I have no objection to that at all.

The SPEAKER pro tempore (Mr. DALZELL). The Chair will state that pending the present motion there can be no change made in this bill except by unanimous consent.

Mr. QUIGG. I understand that; I am going to offer a proposition in a moment. I want to ask the gentleman further whether he will agree to change the bill by inserting after the word "brought," in line 21, page 8, the following:

> *And provided further*, That nothing in this resolution shall be held or construed to impair or in any manner affect the rights of any unsecured creditors of the Northern Pacific Railroad Company or to change or impair the lien of any judgment or demand, if otherwise effective, against any property of said company not embraced in prior and superior liens or passing to the purchasers at such foreclosure sale.

Mr. HARTMAN. I have no objection at all to that amendment.

Mr. QUIGG. I ask unanimous consent that those changes be made in the bill.

The SPEAKER pro tempore. The gentleman asks unanimous consent that the bill now pending shall be changed by inserting the amendment which will be read.

The Clerk read as follows:

> On page 7, beginning in line 5, strike out the words "within twelve months prior to any appointment of a receiver for said Northern Pacific Railroad Company."
>
> In page 8, after the word "brought," in line 21, insert "*And provided further*, That nothing in this resolution shall be held or construed to impair or in any manner affect the rights of any unsecured creditors of the Northern Pacific Railroad Company, or to change or impair the lien of any judgment or demand if otherwise effective against any property of said company not embraced in prior and superior liens or passing to the purchasers at such foreclosure sale."

Mr. HARTMAN. I accept those amendments.

The SPEAKER pro tempore. Is there objection to the proposed amendments? The Chair hears none, and the amendments are agreed to.

Mr. QUIGG. Mr. Speaker, the acceptance of these amendments does not, I regret to say, make this bill in my judgment a proper bill to be passed. [Laughter and cries of "Oh!" "Oh!"] I think that the gentlemen who are "oh-oh"-ing will admit with me that the

United States Government has sufficiently contributed for one year to the income of Mr. Morgan without the enactment of this resolution, and that, indeed, a bill brought in here on the pretense that we can not grant a revival of the original Northern Pacific charter without ten pages of new legislation changing the conditions under which enormous properties are owned ought not to pass.

Gentlemen say that the only reason they bring this bill here is because there is a judicial decision——

The SPEAKER pro tempore. The time of the gentleman from New York [Mr. QUIGG] has expired.

Mr. QUIGG. And that is another reason the bill ought not to pass—because "the time of the gentleman has expired." [Laughter.]

Mr. HARTMAN. Mr. Speaker, I yield one-half minute to the gentleman from Wisconsin [Mr. JENKINS].

Mr. JENKINS. I ask unanimous consent to insert this amendment in the bill.

The SPEAKER pro tempore. The Clerk will read the amendment.

The Clerk read as follows:

Strike out, in line 5, page 7, after the word "State," the following:
"Within twelve months prior to any appointment of a receiver for said Northern Pacific Railroad Company by any United States court."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin to so amend the bill?

Mr. HARTMAN. I have no objection, but as a matter of fact this has been stricken out already.

Mr. QUIGG. I object, for it has been stricken out.

The SPEAKER pro tempore. Objection is made.

Mr. QUIGG (continuing). But I withdraw my objection at the request of gentlemen around me.

The SPEAKER pro tempore. Is there further objection?

Mr. BAKER of Kansas. I object.

Mr. HARTMAN. I yield one-half minute to the gentleman from New York [Mr. DANIELS].

Mr. DANIELS. Mr. Speaker, within the short time allotted to me all I can say to the House in reference to this resolution is that it proposes to put into the hands of a new corporation that it is intended to create precisely the property rights of the old one, and nothing more, and that in the State of New York and the other States generally laws have been enacted for the same purpose. They do not go to the legislatures in those States to provide for reorganization of these corporations under such circumstances; but it is done, as a matter of course, under the general law, and in New York dozens of corporations have been reincorporated by the trustees after purchasing the franchises and property of a mortgaged company, and no word of complaint has ever been made as to the regularity or legality of the proceedings.

There seems to be nothing more in this bill than is contained in the laws of the State of New York on this subject, or the laws of the State of Ohio, and I presume of other States, that provide not for the reconstruction of such companies by the legislature, but for the purchasers to be permitted to reorganize under a general statute.

[Here the hammer fell.]

Mr. HARTMAN. I yield two minutes to the gentleman from Washington [Mr. DOOLITTLE].

Mr. DOOLITTLE. Mr. Speaker, if it were not for a sense of duty to my constituents and the people throughout those States, residents of the States through which this road passes, I would say nothing regarding this measure. I know what the sentiment of the people of the State of Washington is, and that it is and will be practically unanimous in favor of the passage of this resolution.

Now, something has been said here regarding the scope of the measure, and that it should never have come here as a joint resolution. It was referred to the Judiciary Committee of this House as a simple resolution, and that committee offered amendment after amendment, and attached these amendments to this resolution until its scope was so enlarged that it appears as now presented to the House.

The people residing in the various States through which this road passes know that the law under which it was built and chartered—the franchise that gave it life in the first place—made it a military road and under Federal authority, so that in case of war and the necessities of war in this country it might be one of the great highways for the transportation of troops and military supplies along that line. It is a line situated so far north—so near the northern boundary of our country—that in case of war its use as a road for carrying military supplies and the transportation of troops would be very great and important.

Now, should it be operated under a State charter, what right would the Federal Government have to it for such purposes? That is a matter for the members of this House and for Congress—patriotic as all are to-day—to expressly consider and determine.

This resolution does not grant to the Northern Pacific Railroad Company, or the successors of that corporation, any additional right, powers, or property. It takes away power they have heretofore enjoyed, and it limits the price of the agricultural lands which are sold along the line of the road to a much lower price than that at which they are now offered. This limitation is greatly in the interest of the settlers of these States and of the people who would in a short time, when, as we hope, prosperity returns again to this country under a wiser rule than exists at present, purchase these lands; and the removal of present restriction will be a great advantage to these States. Their prosperity will be greatly enhanced by reason of having enacted into law this provision.

But, Mr. Speaker, there are so many reasons why this resolution should be passed at once that it seems to me no gentleman who understands the question involved can see his way clearly and intelligently to vote against it; and I hope it will be passed with a good, round majority.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. TAWNEY. Let me ask the gentleman if the limitation is not put at $2.50 per acre as the price of the land?

Mr. DOOLITTLE. It is, under this resolution. The price is limited to $2.50 an acre where lands have been held at ten and fifteen dollars an acre.

Mr. McEWAN. The gentleman says the price is reduced to two dollars and a half an acre; but is it not a fact that a part of these lands are to be sold at $5 an acre?

Mr. TAWNEY. Oh, that refers to lands in Minnesota and the east.

Mr. POWERS. I wish to inquire of the gentleman——

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. HENDERSON. Let us have the regular order.

Mr. HARTMAN. I yield one-half minute to the gentleman from North Dakota [Mr. JOHNSON].

Mr. JOHNSON of North Dakota. Mr. Speaker, there are essentially three parties in interest to this question. First, the people of the United States at large, represented by the Government; second, the creditors who are about to purchase this property, or in a broader sense I might say the owners of the property; and third, the millions of people living along the line of that road. First, the people of the United States are giving nothing additional. This is not a land grant. We are giving no additional rights, no additional lands, no additional property from the Government to the road. The owners of the property, the creditors of the Northern Pacific Railroad Company, are substantially united in asking for this legislation. The land grant of that road gave them in fee simple the title to an empire of territory in the district which I represent. They own every other section of land in a strip 80 miles wide and 400 miles long, through my district. The people living in that State and in that strip are substantially united in asking this legislation. They will reap decided advantages and benefits from the passing of this resolution.

Mr. QUIGG. Mr. Speaker, how much time was yielded to the gentleman?

Mr. JOHNSON of North Dakota. One-half minute. Please do not take any of that half minute.

Mr. QUIGG. The time of the gentleman expired a minute and a half ago.

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. HARTMAN. Mr. Speaker, I desire only to submit a few remarks in closing the debate. How many minutes have I left?

The SPEAKER pro tempore. The gentleman has five minutes remaining.

Mr. POWERS. If the gentleman will yield to me, I wish to make an inquiry.

Mr. HARTMAN. I will yield to the gentleman.

Mr. POWERS. I wish to inquire whether this bill contemplates giving to the new corporation any other rights than they would get by the foreclosure of their mortgage?

Mr. HARTMAN. Not one. Not a single dollar in money or property is accorded to the successors of the corporation, and nothing else except the franchise to be a corporation.

Mr. POWERS. Is it necessary that they have this resolution passed in order to give them a franchise to be a corporation, in virtue of a large number of decisions of the courts to that effect?

Mr. HARTMAN. It is.

Mr. POWERS. Then why does anybody object to the bill?

Mr. HARTMAN. I do not know. I want to read three lines which were read before, but which I am afraid many members did not hear, from a decision of the Supreme Court of the United States in the case of the Memphis Railway Company *vs.* Douglas, 112 U. S., 609. The court said:

The franchise to be a corporation is not the subject of sale and transfer unless made so by a statute which provides a mode for exercising it.

That is the sole and only reason why it is absolutely necessary for them to come in here and ask Congress to pass this resolution. And, in addition to that, I want to say that we have some very

salient restrictions imposed upon this company. Among others, it can not, under the resolution, consolidate with any competing line. It is compelled to make its prices at $2.50 per acre to settlers upon these lands lying 1 mile from a railroad. It is compelled to carry out every warranty of title which was made by the old Northern Pacific Railroad Company, which has failed. It is compelled, in addition to that, to carry out every contract made by the old Northern Pacific Railroad Company with settlers for the purchase of land. Without that, Mr. Speaker, if they organize under a State charter, such as they will organize under if the gentleman from New York [Mr. QUIGG] prevails here, none of these settlers will have any protection whatever in their dealings with the old company. I know a large number of men in my State whose title has failed who have purchased of the Northern Pacific, and if the gentleman from New York [Mr. QUIGG] succeeds in defeating this bill, these men will have no recourse.

Now, I want to say a word or two about this "spook" that he brings up from Seattle. I know something about that. The very contract upon which that claim is founded is decided by Judge Hanaford of the United States court to be ultra vires, and there has been no appeal from that decision. It stands there to-day, and upon that contract, declared to be ultra vires, the gentleman bases a claim and says to the American Congress, "I will hold up this legislation and defeat the rights of every one of the settlers along this line and all other interested parties because my claim, founded in ultra vires, is denied recognition." And we accept his amendment, and yet even now he is not willing to come in and support our bill to protect these people who have valid, bona fide, honest claims, not decided by any court to be invalid. He proposes to prevent them from having their claims saved, because his people along the Seattle road, in the State of Washington, have an invalid claim, so decided by the court and no appeal having been taken from that decision.

Mr. TAWNEY. Is it not a fact that the Seattle and Lake Shore road are in exactly the same position as every other unsecured creditor of the Northern Pacific?

Mr. HARTMAN. Of course, admitting for argument's sake that this claim is valid, it stands in the same shoes with every unsecured creditor.

Mr. TAWNEY. Is there anything in this resolution that affects in any degree the existing rights of any unsecured creditor against the property of the Northern Pacific?

Mr. HARTMAN. There is not. And further I assert as a legal proposition that Congress has no right to divest any man of a vested right and could not if it tried.

Now I ask for a vote.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Montana [Mr. HARTMAN] to suspend the rules and pass the bill.

Mr. TERRY. I call for the yeas and nays.

Mr. CHARLES W. STONE. I understand that the motion is to pass the bill with the amendments.

Mr. HARTMAN. Yes; I wish to include the amendments—to pass the bill as amended.

The SPEAKER pro tempore. The gentleman from Arkansas [Mr. TERRY] demands the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Montana [Mr. HARTMAN] to suspend the rules and pass the bill as amended.

Mr. HARTMAN. A parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. HARTMAN. There were certain amendments proposed and incorporated in the bill by the committee. Is it necessary to take a vote first upon the adoption of those amendments?

The SPEAKER pro tempore. No; the bill before the House is the bill as amended by unanimous consent and such amendments as were originally incorporated.

Mr. LACEY. Were not the amendments which were proposed by the committee read by the Clerk as a part of the bill which we are now voting upon?

The SPEAKER pro tempore. The Chair so understands. The question is on suspending the rules and passing the bill as amended.

The question was taken; and there were—yeas 149, nays 55, not voting, 150; as follows:

YEAS—149.

The following additional pairs were announced:

Until further notice:

Mr. MILNES with Mr. STRAIT.

Mr. PITNEY with Mr. DOCKERY.

For this day:

Mr. HUBBARD with Mr. CLARKE of Alabama.

Mr. HILBORN with Mr. CULBERSON.

Mr. LOUDENSLAGER with Mr. SHAW.

Mr. WOOMER with Mr. YOAKUM.

Mr. NORTHWAY with Mr. MEREDITH.

On this question:

Mr. ANDREWS with Mr. ABBOTT.

Mr. GROSVENOR with Mr. MCMILLIN.

Mr. LEFEVER with Mr. ALLEN of Mississippi.

Mr. BLACK of New York with Mr. DINSMORE.

Mr. COOK of Wisconsin with Mr. SORG.

Mr. SPARKMAN. Mr. Speaker, I am paired with the gentleman from Illinois, Mr. WOOD. I withdraw my vote.

Mr. DOCKERY. Mr. Speaker, I have been absent on a conference committee and find that I am paired with the gentleman from New Jersey, Mr. PITNEY. I desire to withdraw my vote. If he were present I would vote "no."

The SPEAKER pro tempore. On this question the yeas are 149, the nays 55. Two-thirds having voted in favor thereof, the rules are suspended and the joint resolution is passed.

LEAVE TO PRINT.

Mr. HENDERSON. Mr. Speaker, I offer the following privileged report from the Committee on Rules.

The Clerk read as follows:

Resolved, That for the remainder of this session, and for ten days after its close, leave is given to Representatives and Delegates to print remarks in the RECORD.

Mr. HENDERSON. I ask for a vote on the resolution.

The resolution was agreed to.

PERSONAL PRIVILEGE.

Mr. JOHNSON of California. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER pro tempore. The gentleman will state it.

Mr. JOHNSON of California. Mr. Speaker, in an issue of the San Francisco Examiner, a newspaper published in San Francisco, on the 1st day of June, 1896, and only received by me last evening, occurs a most malicious, false, and slanderous misrepresentation of my action as a member of this House with reference to what is known as the "California mineral-land bill." It has not been my custom during life to reply in any manner to attacks made upon me by newspapers, but this is so flagrant a violation of the decencies that should govern between men, and the publication is so destitute of truth, as is well known to the man who wrote it, and the man who published it, one William R. Hearst, who would not dare as an individual to say to me on the streets what he cowardly says through the columns of his newspaper, that I feel it but right to reply to it somewhat, even at the risk of taking some of the time of this House.

He says I have not favored or sought to pass what is known as the "mineral-land bill"; that I have proved traitor to the interests of my district and my own State. He misrepresents and misstates every action I have taken in reference to the bill. He says that I was forced to introduce the bill, which is untrue. I introduced the bill exactly as it was given to me by the California State Miners' Association when another California member declined to introduce it; and when they desired to amend it, I introduced the bill as amended. I endeavored to secure its passage, and I may say without egotism, in answer to this lying charge of this man Hearst, that had it not been for my exertions this bill never would have passed this House, and I can refer to the gentleman from Tennessee [Mr. MCMILLIN], who was opposed to the bill, in proof of that assertion. He then says that the bill went to the Senate and was amended, which is true.

I had nothing to do with the amendment. I opposed the amendment of the bill. I stated that if it was amended it would have difficulty in getting through the House, because I realized the ability of the distinguished gentleman from Tennessee [Mr. MCMILLIN] and knew that he would make strong opposition to it. But the bill was amended in the Senate (it having applied only to California) by adding to it jurisdiction over the State of Oregon, or part of it, thus increasing the expense and the amount appropriated. The bill then came back to the House, and this liar, through the columns of his paper, says that it was amended in the Senate and did not pass the House through my fault, and his language is as follows:

If Congressman JOHNSON had sincerely wished to pass that bill for the benefit of the miners of California his course was clear. As the author of the bill he should have gone to the chairman of the committee from which the bill came and asked him to move that the House do not concur in the Senate amendment. The chairman surely would have made the motion. That would have sent the bill into conference and given it a right of way which Speaker REED in his most Czar-like mood could not deprive it of. The conference could have reported in favor of the amendment, the bill would have come up as soon as the appropriation bills were out of the way, and it might now have been a law.

But no; Congressman GROVE L. JOHNSON quietly let that bill go back to committee. Tirey L. Ford, the miners' representative, was lulled into a sense of security and came back to San Francisco. Then Speaker REED, acting, according to Senator WHITE, at the behest of Collis P. Huntington, refused to let the measure come up for consideration. As JOHNSON had let the bill go back to committee instead of sending it into conference, it had no rights or privileges over any other bill, and it was the easiest thing in the world for Speaker REED to kill it off.

Now, I have to say in reference to that that every member of this House knows that when that bill was amended in the Senate, increasing expenditure, creating new offices, and putting upon the bill something which was not germane to the original, and when it returned to this House it was absolutely necessary under the rules that it should go either to the Committee of the Whole House on the state of the Union or to the Public Lands Committee. If it had gone to the Committee of the Whole House on the state of the Union the trumpet of the Archangel Gabriel would have been needed to resurrect it on this floor. I went to the chairman of the Public Lands Committee and asked him what was the best way. He said that under the rules the bill with a Senate amendment could not be called up for concurrence and could not be called up for nonconcurrence; that it either had to go to the Committee of the Whole House on the state of the Union, and there sleep the sleep that knows no waking, or else go to the Public Lands Committee, where it had a majority of friends.

It went there under the rules of the House, and the chairman of the committee, Mr. LACEY of Iowa, is present and knows that I speak in that regard the exact fact—it went to that committee and they reported it favorably, but, owing to the rules, the Speaker was obliged to hold that it was not a privileged matter, and therefore we had no right to bring it before the House. The Speaker of this House knows that I have bothered him in season and out of season about this bill. I have been to him at the Speaker's desk, I have been to him in his private room, I have met him in the corridors, and have asked and begged and implored him to allow the bill to come up, but he could not see his way to let it come up except in the regular manner under the rules.

When that bill came back from the Senate the gentleman from Nebraska, Mr. KEM, had already engaged in that warfare which has denominated him the assistant Speaker of this House [laughter] and was making objection to the consideration of all bills by unanimous consent. I knew no way to silence Mr. KEM except to kill him, but I had not money enough to pay the fine if I did that, though perhaps I would have been justified in doing it under the circumstances. [Laughter.] I could not bring up the bill by unanimous consent, and the lying author of this article in this lying, blackmail newspaper knew that as well as I do, yet he attempts to say that I have not been in favor of the bill, when every member of the Public Lands Committee knows that I have made myself a perfect nuisance to that committee in asking and urging them to take it up and pass it through the House, and I am sure that all the members of that committee would sign a letter to that effect.

But this slanderer, not content with that, goes further and attempts to say that I interfered with this bill before I was a member of this House. Not content with having attacked our honored Speaker, whose life, whose record, and whose character as a man and the work he has done for the American nation are a sufficient answer to the slanderous attack of this blackmailing newspaper—not content with attacking him and myself, this slanderer goes on to say in connection with a matter that took place at the last session of this Congress and in connection with another member, what I am now about to read:

Two years ago, when an effort was being made by Caminetti and other California Congressmen to have California included in the Idaho-Montana Act, and when things reached a pass where unanimous consent was required to get the matter up, HEPBURN of Iowa objected and objected again. He could not be argued, cajoled, or browbeaten out of his position. It was deemed strange that a man from Iowa should be so set in his opposition to a measure which particularly concerned California.

But who sat with HEPBURN as his guest? Who lunched and dined and rode with him? Who was his particular friend at that critical juncture? Who was seemingly his adviser?

GROVE L. JOHNSON.

Now, at the last session of Congress, when that bill came up, I was not a member. I did not know Mr. HEPBURN of Iowa. I never lunched with him; I never rode with him; I never wined him (I am a teetotaler and could not); I never dined with him; I was not his guest; he was not my guest. He never objected to the consideration of the bill, as I am informed. That is simply a bald, naked lie, worthy of the man who edits and publishes that paper, and uttered with the intention of injuring me, when I never laid a straw in his way; and the only wicked thing I know of in my life that I could be called to account for with reference to him was that I was at one time his attorney and saved him from damages in a court of justice. [Laughter.]

So far as the bill of last session was concerned, the whole trouble connected with that bill was, as I am informed by the gentleman from Montana [Mr. HARTMAN], the author of the bill, because my predecessor did not keep his bargain with him in reference to the bill. I was not a member. I influenced nobody. I could not. I did not know anybody scarcely, much less Mr. HEPBURN, whom I am now proud to claim as my friend.

I beg pardon of the House for having taken so much time upon this matter. But the miners of my district are numerous. I may be charged with having done this or that in my life; but no mortal man ever truly accused me of breaking my word to any human being, living or dead. I always keep my promises, whether made before or after election. And in this matter I have been true to my promises, true to the interests of my constituents, true to the interests of the miners. And the liar who published that article knew it when he wrote it and published it. [Applause.]

Mr. MAGUIRE. I do not want to interfere with the gentleman's statement at all; but as he has mentioned Mr. Hearst by name and denounced him in very severe terms, I want to know whether he is not aware that Mr. Hearst is residing in New York, and probably never knew anything about this article?

Mr. JOHNSON of California. Mr. Speaker, the rule of law, as the gentleman knows, is that if a man publishes a newspaper, if he calls himself the editor and publisher of it, he is responsible for everything that appears in the paper.

Mr. MAGUIRE. I am not raising the question of his legal responsibility.

Mr. JOHNSON of California. He is responsible for everything

that appears in the newspaper. This paper is published by W. R. Hearst; and if the coward desires to take advantage of the fact that he does not live in San Francisco, but in New York, let him do so. I hope the gentleman from San Francisco [Mr. MAGUIRE] does not propose to indorse any of the statements contained in that letter.

Mr. MAGUIRE. I am not discussing those statements, Mr. JOHNSON.

Mr. JOHNSON of California. I am speaking of that man in that way for this reason: It is the most wicked thing on earth for a man who publishes a newspaper to attack some one, and then turn round and say, "You must not mention my name, because I did not write the article." In the name of God, if he does not want to have his name mentioned, why does he assail other men, better men than he ever dared to be; and if my colleague [Mr. MAGUIRE] is so jealous of this man's character and feelings that he does not want his name mentioned, why has he not prevented him from attacking other people?

Mr. MAGUIRE. I have no control over him; but I say, with regard to this article, that it is not fair to mention and attack Mr. Hearst in this way, when the probability is that he never heard of that article and never saw it.

Mr. JOHNSON of California. I think it is fair, for this reason: That newspaper has attacked me; and I do not believe in this shielding of one's self behind the name of a newspaper. That newspaper is his. He is the man who is responsible for it; and he ought to be responsible for it. When the time comes in these United States that a man can shelter himself behind the name of his newspaper and say he is not personally responsible for what appears in that newspaper, the end of government, the end of decency, the end of protection to individual rights, will have been reached.

Mr. MAGUIRE. I admit Mr. Hearst's legal responsibility.

Mr. LACEY. I should like to ask the gentleman from California a question. In his remarks he has referred to the difficulty of getting this bill up. Is it not true that the Department has opposed the bill on the ground that the expense would run up very high, estimating the expense at over a million of dollars? Has there not been difficulty in getting recognition because the bill created a large number of offices and involved a very heavy expenditure of money?

Mr. JOHNSON of California. That is true, and that is the reason why, when the additional expense was put on this bill, it required the bill to go to a committee—either the Committee on Public Lands or the Committee of the Whole. So far as the question of expense is concerned, I do not think it amounts to anything. When a thing is right it ought to be done, even if it does cost a great deal of money.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, had further insisted upon its amendments numbered 69 and 70, disagreed to by the House of Representatives, had asked a further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL as the conferees on the part of the Senate.

A further message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had receded from its disagreement to the amendment of the House to the bill (S. 1189) granting a pension to Eliza Sandford, and had agreed to the same.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6614) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897.

ENROLLED BILLS SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolutions of the following titles; when the Speaker signed the same:

A bill (H. R. 9404) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes;

A bill (H. R. 6259) to expedite the delivery of imported parcels and packages not exceeding $500 in value;

A bill (H. R. 5280) for the relief of George W. Freeman;

Joint resolution (S. R. 155) to authorize a scientific investigation of the fur-seal fisheries;

A bill (S. 2022) to amend an act entitled "An act to provide for the protection of the salmon fisheries of Alaska";

A bill (H. R. 6614) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897;

A bill (S. 1189) granting a pension to Eliza Sandford;

A bill (H. R. 2708) to constitute a new division of the eastern judicial district of Texas, and to provide for the holding of terms of court at Beaumont, Tex., and for the appointment of a clerk for said court;

Joint resolution (H. Res. 195) to pay the officers and employees of the Senate and House of Representatives on the day following adjournment; and

Joint resolution (S. R. 155) to authorize a scientific investigation of fur-seal fisheries.

EASTERN JUDICIAL DIVISION OF TEXAS.

Mr. COOPER of Texas. Mr. Speaker, there is a bill on the Speaker's table, with Senate amendments, that I ask to have laid before the House.

The SPEAKER pro tempore laid before the House the bill (H. R. 2708) to organize a new division of the eastern judicial district of Texas, and to provide for the holding of terms of court at Beaumont, Tex., and for the appointment of a clerk for said court.

The bill and the Senate amendments were read at length.

Mr. COOPER of Texas. I move that the House concur in the Senate amendments.

The motion was agreed to.

CONFERENCE REPORT INDIAN APPROPRIATION BILL.

Mr. SHERMAN. Mr. Speaker, I desire to submit a conference report on the Indian appropriation bill.

The SPEAKER pro tempore. The report will be read.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 64, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That the Secretary of the Interior be, and is hereby, directed to withhold any further distribution and payment out of the money derived from 35 per cent of the judgment in favor of the Old Settler or Western Cherokee Indians against the United States in the sum of $300,386.31, set apart for the payment of expenses and for legal services justly and equitably payable on account of the prosecution of said claim until otherwise authorized by law."

And the Senate agree to the same.

On amendments numbered 69 and 70 the committee of conference have been unable to agree.

J. S. SHERMAN,
CHARLES CURTIS,
GEO. C. PENDLETON,
Managers on the part of the House.

R. F. PETTIGREW,
H. M. TELLER,
F. M. COCKRELL,
Managers on the part of the Senate.

The statement of the House conferees was read, as follows:

Statement of House conferees to accompany conference report No. 6 on Indian appropriation bill.

The Senate conferees recede from amendment 64 with an amendment. This amendment is identical with the one contained in conference report No. 5 presented to the House on Saturday. It simply leaves the matter of the payment of the so-called Old Settlers' claims for future settlement.

On amendments 69 and 70 the conferees were unable to agree.

Mr. SHERMAN. Mr. Speaker, I move that the House further insist on its disagreement to the remaining amendments, numbered 69 and 70, and agree to the conference asked by the Senate on the disagreeing votes of the two Houses.

Mr. DINGLEY. Before that question is submitted, will the gentleman please state the points of disagreement?

Mr. SHERMAN. The only disagreement now is on the sectarian schools.

Mr. DINGLEY. That is all that remains?

Mr. SHERMAN. That is all that remains.

The motion was agreed to.

The SPEAKER pro tempore announced the appointment of Mr. SHERMAN, Mr. CURTIS of Kansas, and Mr. PENDLETON as conferees on the part of the House.

CONTESTED ELECTION—ALDRICH VS. UNDERWOOD.

Mr. DANIELS. Mr. Speaker, I desire again to ask the House to take up for consideration the contested-election case of Aldrich *vs.* Underwood. This case is in such condition that it will require no great length of time to dispose of, and it is extremely important that action should be had upon it and the case disposed of promptly.

Mr. McMILLIN. Mr. Speaker, I have not been able to hear what the gentleman has stated.

The SPEAKER pro tempore. The gentleman calls up the contested-election case of Aldrich *vs.* Underwood.

Mr. McMILLIN. Against that I raise the question of consideration.

I make the point of order, Mr. Speaker, that the motion is not in order. This question has been decided once to-day adversely by the House, and that precludes its being called up for consideration again during this legislative day.

Mr. DANIELS. This is a question of the highest privilege——

The SPEAKER pro tempore (Mr. DALZELL). The Chair will have to overrule the point of order of the gentleman from Tennessee. It is entirely competent to call up a contested-election case, which is a matter of the highest privilege, at this time; and the Clerk will report the resolutions submitted by the Committee on Elections.

The Clerk read as follows:

Resolved, That Oscar W. Underwood was not elected a member of the House of Representatives from the Ninth Congressional district of Alabama for the Fifty-fourth Congress, and is not entitled to a seat therein.

Resolved, That Truman H. Aldrich was elected a member of the House of Representatives from the Ninth Congressional district of Alabama for the Fifty-fourth Congress, and is entitled to a seat therein.

The SPEAKER pro tempore. The gentleman from Tennessee raises the question of consideration, and the question is, Will the House now proceed to consider this case?

The question was taken; and on a division (demanded by Mr. MCMILLIN) there were—ayes 72, noes 64.

Mr. MCMILLIN. Yeas and nays, Mr. Speaker. But I will call for tellers first. Perhaps that will preclude the necessity for the demand for yeas and nays.

Mr. WALKER of Massachusetts and Mr. GROUT demanded the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 131, nays 68, not voting 155; as follows:

YEAS—131.

So the House determined to consider the case.

The Clerk announced the following additional pairs:

Until further notice:

Mr. WILSON of Ohio with Mr. RUSK.

For this day:

Mr. GROSVENOR with Mr. MCMILLIN.

On this question:

Mr. WHITE with Mr. PRICE.

Mr. HICKS with Mr. ABBOTT.

Mr. HARTMAN. I desire to submit a parliamentary inquiry as to my right to vote.

The SPEAKER pro tempore. The gentleman will state it.

Mr. HARTMAN. I think I was in the Hall when my name was first called. I was either in the Hall or in the cloakroom when my name was called the second time. Am I entitled to vote? I should like very much to vote, if I can.

The SPEAKER pro tempore. The Chair thinks the gentleman is not entitled to vote.

The result of the vote was then announced as above recorded.

ORDER OF BUSINESS.

Mr. GROUT. Mr. Speaker, I desire to present a conference report.

The SPEAKER pro tempore. The gentleman from Vermont——

Mr. OWENS rose.

Mr. DANIELS. I move to reconsider the last vote, and I move to lay that motion on the table.

Mr. MCMILLIN. And on that I demand the yeas and nays.

The SPEAKER pro tempore. The Chair will state that prior to either the gentleman from New York [Mr. DANIELS] or the gentleman from Kentucky [Mr. OWENS] or the gentleman from Tennessee [Mr. MCMILLIN] rising, he had recognized the gentleman from Vermont [Mr. GROUT] for a conference report.

Mr. MCMILLIN. I only want to reserve all rights that might otherwise be sacrificed.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed without amendment the bill (H. R. 2947) increasing the pension of Daniel D. Jennings, late of Company G, Sixty-fifth Ohio Volunteers.

The message also announced that the Senate had receded from its amendment numbered 201 to the bill (H. R. 5210) making appropriations to provide for expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes, had further insisted upon its amendments, had asked a further conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and had appointed Mr. TELLER, Mr. ALLISON, and Mr. COCKRELL as the conferees on the part of the Senate.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

The SPEAKER pro tempore. The Clerk will report the conference report submitted by the gentleman from Vermont [Mr. GROUT].

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have been unable to agree.

WM. W. GROUT,
MAHLON PITNEY,
A. M. DOCKERY,
Managers on the part of the House.

H. M. TELLER,
W. B. ALLISON,
F. M. COCKRELL,
Managers on the part of the Senate.

Mr. GROUT. I move the adoption of the report.

The SPEAKER pro tempore. The question is on agreeing to the conference report.

The question was taken.

The SPEAKER pro tempore. The Chair is in doubt.

Mr. GROUT and Mr. McMILLIN demanded a division.

The SPEAKER pro tempore. The Chair will suggest to the gentleman from Vermont that there is no necessity for agreeing to this report.

Mr. McMILLIN. Mr. Speaker, what has become of the motion for a division that I made?

The SPEAKER pro tempore. The Chair is of the opinion that there is no necessity for the House to pass upon this question. It is merely a report for the information of the House.

Mr. McMILLIN. The gentleman from Vermont [Mr. GROUT] made a motion. The Chair entertained it, and put it to the House. The House was dividing, and on that division we demanded a count.

Mr. PITNEY. For the sake of delay.

Mr. McMILLIN. But the parliamentary situation can not be changed.

A MEMBER. Withdraw the report.

Mr. McMILLIN. The Chair has entertained a motion. The House was dividing, and the Chair can not have the House recede without giving the division that was demanded.

Mr. GROUT. Let me ask the gentleman from Tennessee——

Mr. McMILLIN. Debate is not in order on this motion.

Mr. GROUT. Then what are you debating it for?

Mr. McMILLIN. I was stating the parliamentary situation, and not debating it.

The SPEAKER pro tempore. The Chair will hear the gentleman from Vermont on the parliamentary situation.

Mr. McMILLIN. If the gentleman rises to a parliamentary inquiry, of course he is in order.

Mr. GROUT. Mr. Speaker, I rose to an inquiry which I chose to address the gentleman, and that was to ask——

Mr. McMILLIN. I am not debating the question.

Mr. GROUT. Then I call the gentleman to order.

The SPEAKER pro tempore. Will the gentleman from Tennessee withhold for a moment? Whatever rights he has will be recognized by the Chair.

Mr. GROUT. If it is in order, Mr. Speaker, I withdraw the motion which I made, and will submit another.

Mr. McMILLIN. I object to the withdrawal, because the House was dividing at the time.

The SPEAKER pro tempore. The Chair holds that the gentleman can withdraw the motion.

Mr. McMILLIN. And from that ruling of the Chair I appeal.

The SPEAKER pro tempore. The Chair declines to entertain the appeal.

Mr. McMILLIN. Then we are at our rope's end, of course. There are rulers left, even if there are no rules. [Great confusion on the floor.]

The SPEAKER pro tempore. The House will be in order.

Mr. TERRY. I always understood a man had a right to appeal from a decision of the Chair.

The SPEAKER pro tempore. And the Chair has a right to decline to entertain the appeal, and the Chair has done so.

Mr. TERRY. Well, the Chair has no such right under the rules. He can do it arbitrarily, but not by right.

Mr. PITNEY. I should like to know what is the parliamentary status of the conference report, if no motion has been made in regard to it?

Mr. TERRY (speaking at the same time). This is your judicial fairness that you talked about at the beginning of this session.

Mr. HARDY. No; this is our busy day. [Laughter.]

Mr. TERRY. Your busy day! Where is your fairness that you prated about at the beginning of the session?

Mr. PITNEY. The inquiry which I submitted was, what is the status of the conference report, which reports a total disagreement? I want to make a motion concerning it.

The SPEAKER pro tempore. For the present the motion has been withdrawn.

Mr. PITNEY. The conference report, as I understand it, was not withdrawn, but the motion in regard to it was withdrawn. I want to ask what is the status of the conference report?

The SPEAKER pro tempore. The parliamentary situation is that a motion to insist or recede is in order.

Mr. PITNEY. I desire to offer a motion.

Mr. McMILLIN. Mr. Speaker——

Mr. GROUT. Mr. Speaker——

Mr. SWANSON. As I understand, the report has not been withdrawn. The request that was made by the conferees or the motion simply has been withdrawn in respect to the report of the conferees.

The SPEAKER pro tempore. The motion is withdrawn.

Mr. SWANSON. As I understand it, this is a report by the conferees. Is it not read for consideration?

The SPEAKER pro tempore. The report was made, the Chair will state, for the information of the House. It is the motion with respect to the report that has been withdrawn. The Chair is now prepared to entertain the motion of the gentleman from New Jersey [Mr. PITNEY].

Mr. GROUT. Mr. Speaker, I move that the House further insist upon its disagreement to the Senate amendments and ask for a conference.

Mr. PITNEY. Pending that, I desire to move that the House recede from its disagreement to one of those amendments and agree to the same with an amendment which I will send to the desk to be read; and upon that I desire to be heard.

Mr. RICHARDSON. I rise to a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. RICHARDSON. I submit that the first motion, that of the gentleman from Vermont [Mr. GROUT], to adopt the conference report, is first in order; and then a motion to recede, as I understand the rules, is in order.

The SPEAKER pro tempore. There is no conference report to consider. The Chair has already stated to the House that the gentleman from Vermont made a report to the House for the information of the House, and made a motion with respect to the report, which he subsequently withdrew. The gentleman from Vermont now moves that the House further insist on its disagreement to the Senate amendments and agree to a conference. Pending that, the gentleman from New Jersey [Mr. PITNEY] moves that the House recede from certain of its disagreements, which the Clerk will now report.

The Clerk read as follows:

Resolved, That the House recede from its disagreement to Senate amendment No. 99 to the bill H. R. 5210, and agree thereto with an amendment as follows: In lieu of the matter struck out by said amendment insert the following:

"*Provided further*, That the service of electric lighting in those streets and places west of Rock Creek now lighted by arc lights, and necessary extensions of said service, shall be let, after due advertisement, to the lowest responsible bidder, but no contracts shall be made for such lights at a price exceeding $100 per lamp per year for each arc light of candlepower equal to or greater than that now furnished; and

"*Provided further*, That the Commissioners of the District may, under such reasonable restrictions as they may prescribe, authorize any existing electric-light company, organized under the laws of the District of Columbia, to maintain and use its existing poles and lines and extensions thereof, either overhead or underground, in places outside of the fire limits of the city of Washington, and by underground conduits only inside the said fire limits, such lines not to be extended in any part of the District of Columbia except in that portion of the same lying west of Rock Creek.

"*Provided further*, That from such lines as may be maintained or established under authority of this act electricity for lights and power shall not be sold to any consumer at rates exceeding 87 per cent of prices charged generally in the city of Washington for such lights and power on the 1st day of January, 1896; and

"*Provided further*, That the District fire-alarm and messenger service may be established along the overhead or underground lines hereby authorized to be maintained and constructed, without charge for pole rent or conduit rent to the District."

Mr. RICHARDSON. I make the point of order against this amendment.

The SPEAKER pro tempore. The gentleman will state his point of order.

Mr. RICHARDSON. Why, it is not germane to the pending proposition and the matters that are in controversy, as I understand it. I am not very clear about it at present, as I have not a copy of the pending amendment; but it occurs to me——

Mr. PITNEY. I will show the gentleman a copy.

Mr. RICHARDSON. But it occurred to me that it certainly does not relate to matters in controversy between the two Houses. There has been no disagreeing vote of the two Houses upon the matter involved in the proposed amendment. The conferees can only consider matters about which the two Houses have disagreed. I think it will not be contended that this amendment is confined in its language or its spirit to a matter about which the two Houses have disagreed; and if not, it certainly would not be germane for the conferees to enter upon the consideration of the questions which are raised by this amendment. The matters have not been in conference.

Mr. GROUT and Mr. PITNEY. They have.

The SPEAKER pro tempore. The Senate amendment to which the House disagrees, and from which disagreement it is now proposed to recede, relates to electric lighting and the method of the letting of the contract for electric light. The proposition is to recede from the disagreement of the House to that amendment with an amendment. The question raised by the gentleman from Tennessee is whether or not the suggested amendment is germane. The subject-matter of the Senate amendment and the subject-matter of the proposed amendment to the Senate amendment is electric lighting. They both relate to the methods by which contracts shall be let for electric lighting, and it seems to the Chair that the proposed amendment is clearly germane.

Mr. PITNEY. Now, Mr. Speaker, if there is no opposition to this motion of mine, I do not wish to spend much time about it. I think the proposition may be understood after a very few words of explanation. That part of the bill as passed by the House of Representatives which was stricken out in the Senate

by the amendment numbered 99 is found on page 26 of the last print of the bill, and is as follows:

Provided further, That the entire service of electric lighting authorized under this appropriation shall be let, after due advertisement, to the lowest responsible bidder therefor: *Provided further*, That no contract shall be made for electric arc lighting at a price exceeding the rate hereinbefore specified.

It seems to be impossible to obtain the consent of the Senate conferees to this proposition as it stands.

The substitute which I have asked the House to adopt, and to instruct its conferees to recede from the disagreement to the Senate amendment provided this amendment is adopted, proposes to let so much of the electric-lighting service as is in the territory west of Rock Creek, after public advertisement, to the lowest bidder, leaving so much of the territory as is east of Rock Creek under the appropriation bill as it passed the House. The propriety of this amendment is perfectly apparent, but if any gentleman desires to controvert it, I will spend sufficient time to meet his objections. The fact is that for the greater part of the District of Columbia there is at present only one electric-lighting company, and that is the United States Electric Light Company, which lights the city of Washington and a very small portion of the territory west of Rock Creek. The company has been adjudged by the supreme court of the District, under a very peculiar situation of the statute law, to have a monopoly of the electric lighting of the District, in this wise: It has been decided that the Commissioners of the District of Columbia, either under their general powers by virtue of the organic act of the District or by virtue of any subsequent statute—and I believe all the statutes relating to electric lighting have been included in appropriation bills from the time of the first electric lighting until the present—have no power to grant to any electric-lighting company the right to extend its wires to any place or in any direction in the District. The result of that decision is that the United States Company, having first occupied the field, practically has a monopoly of electric lighting in this District.

With regard to the territory west of Rock Creek, the situation is this: The United States Company have very few lamps there. They do not seem to desire and they have repeatedly refused to extend their service into other parts of that territory. They were asked at one time by the Commissioners to light the old Aqueduct Bridge which crosses the Potomac River. Their wires ran immediately past the terminus of the bridge, but they declined to extend them over the bridge and put lights upon it. They have also declined numerous requests from citizens of that region to give them electric lights, either in houses or for public purposes. In the meantime there were two little plants in the suburbs, one at Georgetown and one at Eckington, which did a local business, but not to the exclusion of the United States Company.

The Potomac Light, Heat, and Power Company came into the District, purchased the plants at Georgetown and at Eckington, reorganized, erected a new plant, and have invested in that way $380,000 up to the present time for the purpose of lighting those parts of the city and of the District that were not covered by the United States Company, and for the further purpose of furnishing light and power to the electric traction companies, expecting at the same time to compete with the United States Company for the lighting of the city generally. They made that investment, erected their plant, and strung their wires in reliance upon the power of the Commissioners of the District of Columbia to grant them permits. They had a right to so rely, because the Commissioners were then, from year to year and from time to time, granting to the United States Electric Lighting Company similar permits for a similar purpose under, as was supposed, the general power which the Commissioners possessed by virtue of the organic law of the District.

When the Potomac Company applied for these permits, after having put their money into the plant, after having entered the field, the United States Electric Company by themselves and with the aid of two citizens, taxpayers, whom they procured to join with them for the purpose, applied to the courts for an injunction to restrain the Potomac Company from stringing its wires, and to restrain the Commissioners from granting them a permit to do so. It was then developed, under a construction of the law from which I personally dissent—but which, at any rate, has been adjudged to be the law of the District—it was ascertained by the decision of the supreme court that there was no power reposed in the Commissioners of the District by virtue of the general organic law of the District to grant these permits, and that the appropriation bills under which they had acted did not grant them the power.

What was the result? An injunction—in fact three or four injunctions—were obtained restraining the Commissioners from permitting the Potomac Company, and restraining the company from stringing their wires, from raising their poles, or operating their plant. Now, if that law applies to the Potomac Company, it applies with equal force and effect to the United States Company; the same power which the Commissioners had to grant permits to the one company existed with regard to the other. In consequence of this state of the law, the whole northwestern part of the District lying west of Rock Creek, including a large amount of territory already built up or being built up, is without electric light except to the extent of a few lights which the United States Company in one part and the Potomac Company in another part are at present supplying. Unless we grant relief in the manner suggested by my motion, there can be no change of the law at this session of Congress, and the citizens and property owners in that territory will be without relief for a long time to come.

More than that, the Potomac Company, having invested this large sum of money in a new and improved plant, relying in good faith upon the right of the Commissioners to exercise the powers which they had been in fact exercising for years—the Potomac Company, after making this investment, find themselves bound hand and foot. They can not stretch a line of electric wire from their plant to the lamps already erected and waiting to be lighted. More than that, there are traction companies which depend upon electricity for their power, and which had intended to obtain that electric power from the Potomac Company. Those companies are now unable to get their power from this new and improved plant, and are dependent, as I understand, upon one little plant, so that they can not adequately carry on their business by reason of a deficiency of electric power.

The amendment which I have proposed is intended to permit the District Commissioners to let, upon competition, so much of the lighting business as lies west of Rock Creek, and to grant permits for underground conduits only so far as the fire limits extend. Beyond those fire limits they may give permits for overhead construction as well as underground.

Mr. RICHARDSON. In order to make this amendment effective, do you not have to change existing law; and I ask you as a fair-minded man whether that is not contrary to our rules, and whether such an amendment would not be out of order?

Mr. PITNEY. The point of order upon this conference report and upon this proposed amendment has been decided, but I will say to the gentleman——

Mr. RICHARDSON. The gentleman said the point of order was not well taken.

Mr. PITNEY. I hope when the gentleman asks me a question he will permit me to reply to it without interruption.

Mr. RICHARDSON. I will, if the gentleman will answer the question.

Mr. PITNEY. When this District of Columbia appropriation bill was reported to the House from the Committee on Appropriations it contained a provision requiring the electric-lighting service of the whole District to be let upon competition, and incidentally it gave to the Commissioners, in addition, the power to grant the right to lay down conduits and string wires. That part was struck out on a point of order, against my protest and argument, upon a decision from which I can not now appeal. I apprehend, therefore, it is the law of this House that such a provision would be out of order on an appropriation bill as reported by a committee to the House, because it changes existing law, but it is not out of order on a conference report, and this motion is not out of order; the proposed amendment now being germane to a matter which is in difference between the House and the Senate and that matter of difference having been referred to a conference committee.

Mr. RICHARDSON. I understand your contention to be——

Mr. PITNEY. I do not desire to debate the question of order any further.

Mr. RICHARDSON. You have not answered my question.

Mr. PITNEY. I am addressing myself to the merits of the proposition. If you will confine your inquiry to the merits, I will answer.

Mr. RICHARDSON. But you are asking by this amendment to change existing law, are you not?

Mr. PITNEY. I ask the gentleman whether he is going to ask questions for the purpose of consuming time?

Mr. RICHARDSON. I am not doing so. I am asking questions to get at the merits of this controversy.

Mr. PITNEY. If there is any further inquiry pertinent to the merits, I will answer it.

Mr. McMILLIN. Allow me to ask a question. The gentleman has referred to some extraordinary or peculiar decision whereby only one company has the power to furnish electric light in this District. I want to know why such a monopoly is given and why the monopoly is respected?

Mr. PITNEY. That monopoly does not happen to be respected by me, and has not been, and I have attempted to break it up. That is the very purpose of the amendment I have offered.

Mr. McMILLIN. You propose to break it up in the suburbs, but it lives still in the city.

Mr. PITNEY. Well, that is the very best we can do at this

time. If the gentleman has a better proposition to make, he can make it.

Mr. DOCKERY. Will the gentleman yield to me for a moment?

Mr. PITNEY. Certainly.

Mr. DOCKERY. In further answer to the question of the gentleman from Tennessee, I may say that the electric monopoly is not the only one that has flourished in this District. There is a gas monopoly in this city full fledged and with ample powers. Recently a bill was passed reducing somewhat the profits received by this company for furnishing gaslight to the citizens and the Government, but I understand the claim is now made by the company that the bill not only includes the cost of gas furnished to public buildings in the city, but also applies to the street-lighting service. I am glad to say, however, that our friend, the gentleman from Wisconsin [Mr. BABCOCK], and the gentleman from Tennessee [Mr. RICHARDSON] both insist that that claim is not warranted by anything that occurred in the conference committee or by the terms of the law itself.

I had no knowledge that my colleague [Mr. PITNEY] was to offer this instruction to the committee of conference, but I heartily indorse it. This electric light company has unrelentingly pursued its honorable competitor in this District. It is employing, to use a homely but very expressive phrase, the "dog in the manger" policy. The United States Electric Company can not go into the territory covered by the amendment of the gentleman from New Jersey, under a decision of the supreme court of the District, neither can the other company, but the old company proposes to keep out the new company from the territory not now occupied except in a very limited way.

I hope the House will stand by the amendment of the gentleman from New Jersey. I think it is entirely proper and opportune and is in the interest of the people of the District and against the existing monopoly.

I may say further that the committee would perhaps have been able to agree in the conference just closed but for the fact that the contention is made for a larger compensation for lighting the streets than the conferees of the House thought was warranted. The recent bill which became a law by the approval of the President on yesterday reduces the cost of gas in public buildings—and I desire to thank the gentlemen from Tennessee and Wisconsin for what they have accomplished—reduces the cost of gas used in public buildings. The House conferees desire to make a corresponding reduction in the cost of lighting streets. That is the issue in part which is now delaying an agreement, which I hope, however, may be accomplished at the next meeting of the conferees.

Mr. ALLEN of Mississippi. Will the gentleman yield for a question?

Mr. DOCKERY. Certainly.

Mr. ALLEN of Mississippi. I just want to ask, if this District is dominated by a gas monopoly and by an electric monopoly——

Mr. DOCKERY. And by a telephone monopoly.

Mr. ALLEN of Mississippi (continuing). And a telephone monopoly, had we not better cease talking about adjournment, and suspend the rules and break up the monopoly here before we leave this District? [Applause.]

Mr. DOCKERY. The suggestion of the gentleman from Mississippi is very timely, and I wish some arrangement could be made to accomplish this result. But there is a coordinate branch of the Government which sometimes indulges in lengthy debate——

Mr. ALLEN of Mississippi. Then let the responsibility rest on the other branch of the Government.

Mr. PITNEY. I ask a vote on the amendment.

The SPEAKER. The question is on concurring in the Senate amendment with the amendment which has been read.

The question was taken; and on a division (demanded by Mr. TERRY) there were—ayes 126, noes 1.

Mr. TERRY. I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 178, nays 1, not voting 175, as follows:

YEAS—178.

So the motion to recede and concur in the amendment of the Senate with an amendment was agreed to.

The Clerk announced the following additional pairs:

On this vote:

Mr. HENDERSON with Mr. MONEY.

Mr. SMITH of Illinois with Mr. BANKHEAD.

The result of the vote was then announced as above recorded.

Mr. OWENS. I move to reconsider the vote.

Mr. PITNEY. As only one gentleman has voted in the negative, I raise the point of order that that motion is dilatory.

The SPEAKER. The rules of the House require the Speaker to refuse dilatory motions, and a vote of 178 to 1 would indicate that the House had made up its mind on the subject.

Mr. OWENS. It is such a good thing that I want to clinch it. I do not want it to get away.

The SPEAKER. Perhaps the time spent in clinching it would be lost time.

Mr. GROUT. I move that the House further insist upon its disagreement to the other amendments and agree to the conference asked by the Senate.

The SPEAKER. The question is on insisting on the disagreement to the other amendments and agreeing to the conference.

The question was taken; and on a division (demanded by Mr. OWENS) there were—ayes 97, noes 1.

Accordingly the motion was agreed to.

The SPEAKER. The Chair appoints the same conferees.

And then, on motion of Mr. DINGLEY (at 6 o'clock p. m.) the House took a recess until to-morrow, Tuesday, June 9, 1896, at 10 o'clock a. m.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from Mr. W. J. Glenn, the Doorkeeper of the House of Representatives, transmitting, in accordance with the act of August 7, 1892, a report of the sales of waste paper made since the commencement of the first session of the Fifty-fourth Congress, amounting to $360.01—to the Committee on Accounts, and ordered to be printed.

A letter from Mr. W. J. Glenn, the Doorkeeper of the House of Representatives, transmitting a list of property belonging to the United States, and under his charge as Doorkeeper, in the various committee and other rooms of the House June 8, 1896—to the Committee on Accounts, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS.

Under clause 2 of Rule XIII, Mr. GRISWOLD, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill of the House (H. R. 7781) to provide an American register for the barge *Black Diamond*, reported the same without amendment, accompanied by a report (No. 2275); which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

By Mr. MARSH, from the Committee on Military Affairs: The bill (H. R. 8888) to grant an honorable discharge to Christopher C. Cummins. (Report No. 2272.)

By Mr. PICKLER, from the Committee on Invalid Pensions: The bill (H. R. 4854) granting an increase of pension to John P. Thomas. (Report No. 2273.)

PUBLIC BILLS, MEMORIALS, AND RESOLUTIONS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. GROSVENOR: A bill (H. R. 9410) providing for the printing of the censuses of 1790 and 1800—to the Committee on Printing.

By Mr. HYDE: A bill (H. R. 9411) to provide for the examination and classification of certain lands in the State of Washington—to the Committee on the Public Lands.

By Mr. ELLETT: A bill (H. R. 9412) to pay the Richmond Locomotive Works its claims for damages and losses incurred in the construction of the armored battle ship *Texas*—to the Committee on Claims.

By Mr. ANDREWS: A bill (H. R. 9432) providing for the coinage of domestic silver, and for other purposes—to the Committee on Coinage, Weights, and Measures.

By Mr. SOUTHWICK: A bill (H. R. 9433) to purchase of J. B. Lyon the United States Red Book, and for other purposes—to the Committee on Appropriations.

By Mr. BOUTELLE: A joint resolution (H. Res. 199) providing for a commission to contract for finishing the historical frieze in the Rotunda of the Capitol—to the Committee on the Library.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of papers relative to the claim of Sade M. Kleine, widow of Louis P. Kleine; and the same were referred to the Committee on Military Affairs.

PRIVATE BILLS, ETC.

Under clause 1 of Rule XXII, private bills of the following titles were presented and referred as follows:

By Mr. CALDERHEAD: A bill (H. R. 9413) granting a pension to William Hoffner, of Junction City, Kans., late of Company B, Fifty-fifth Pennsylvania Infantry—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9414) to pension Sylvester D. Mitchell, of Salina, Kans., late of Company I, Thirteenth Illinois Cavalry—to the Committee on Invalid Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 9415) allowing an increase of pension to Dr. William O. Torsey, late assistant surgeon, Eighteenth Missouri Infantry—to the Committee on Invalid Pensions.

By Mr. CURTIS of Kansas: A bill (H. R. 9416) granting an increase of pension to Peter B. Phillips—to the Committee on Invalid Pensions.

By Mr. GROSVENOR: A bill (H. R. 9417) granting a pension to U. S. Daniels—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9418) for the relief of John Q. Armitage—to the Committee on Military Affairs.

Also, a bill (H. R. 9419) granting a pension to Henry H. Alcorn—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9420) for the relief of Craven W. Clowe—to the Committee on Military Affairs.

Also, a bill (H. R. 9421) for the relief of Andrew J. Sayre—to the Committee on Military Affairs.

Also, a bill (H. R. 9422) granting a pension to Agnes Jenkins—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9423) for the relief of William Lyons—to the Committee on Military Affairs.

Also, a bill (H. R. 9424) granting a pension to Lawrence C. Power—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9425) for the relief of Stephen McNamara—to the Committee on Claims.

Also, a bill (H. R. 9426) to correct the military record of Theodore Winters—to the Committee on Military Affairs.

Also, a bill (H. R. 9427) granting a pension to Horace Barstow—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9428) granting an honorable discharge to Alva A. Miller—to the Committee on Military Affairs.

By Mr. PEARSON: A bill (H. R. 9429) to complete the military record of Louis A. Horton, late a private in Company F, Sixth Regiment Indiana Cavalry Volunteers—to the Committee on Military Affairs.

By Mr. RUSSELL of Connecticut: A bill (H. R. 9430) to correct the military record of Capt. James H. Latham—to the Committee on Military Affairs.

By Mr. WASHINGTON: A bill (H. R. 9431) for the relief of Christopher Powers—to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BELL of Colorado: Protest of citizens of Colorado against any measure looking to military training in public schools—to the Committee on Education.

Also, remonstrance and petition of citizens of Crested Butte, Colo.; also of Council No. 64, American Protective Association, of Breckinridge, Colo., for the removal of the Marquette statue from the Capitol—to the Committee on the Library.

By Mr. BLUE: Petition and remonstrance of 90 citizens of Johnston County, Kans., against the continuance of the Père Marquette statue in the Capitol—to the Committee on the Library.

By Mr. DALZELL: Two petitions of sundry citizens of Allegheny County, Pa., in favor of House bill No. 260, to increase the pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. GROSVENOR: Papers to accompany House bill granting a pension to U. S. Daniel—to the Committee on Invalid Pensions.

Also, papers to accompany House bill granting a pension to Henry H. Alcorn—to the Committee on Invalid Pensions.

Also, papers to accompany House bill granting a pension to Agnes Jenkins—to the Committee on Invalid Pensions.

Also, papers to accompany House bill granting a pension to Lawrence C. Power—to the Committee on Invalid Pensions.

Also, papers to accompany House bill granting a pension to Horace Barstow—to the Committee on Invalid Pensions.

Also, papers to accompany House bill to correct the military record of Theodore Winters—to the Committee on Military Affairs.

Also, papers to accompany House bill for the relief of John Q. Armitage—to the Committee on Military Affairs.

Also, papers to accompany House bill granting an honorable discharge to Alva A. Miller—to the Committee on Military Affairs.

Also, papers to accompany House bill for the relief of William Lyons—to the Committee on Military Affairs.

Also, papers to accompany House bill for the relief of Andrew J. Sayre—to the Committee on Military Affairs.

Also, papers to accompany House bill for the relief of Craven W. Clowe—to the Committee on Military Affairs.

Also, papers to accompany House bill for the relief of Stephen McNamara—to the Committee on Claims.

Also, papers to accompany House bill No. 9410, providing for the printing of the censuses of 1790 and 1800—to the Committee on Printing.

By Mr. JOHNSON of California: Sundry petitions of citizens of California, favoring the passage of House bill No. 2626, for the

protection of agricultural staples by an export bounty—to the Committee on Ways and Means.

By Mr. LOUD: Sundry petitions of citizens of the States of Georgia and Idaho, asking for favorable action on House bills Nos. 838 and 4566, to amend the postal laws—to the Committee on the Post-Office and Post-Roads.

By Mr. OGDEN: Petition of E. H. Deloach and others, of Ryland, La., opposing the passage of House bill No. 4566, relating to second-class matter—to the Committee on the Post-Office and Post-Roads.

Also, petition of Marie Eliza Payne, praying that her claim No. 18511 of the Southern Claims Commission may be referred to the Court of Claims under the Bowman Act that it may be tried along with No. 18524, already there—to the Committee on War Claims.

By Mr. OVERSTREET: Petition of W. C. Johnson and 96 other citizens of Indianapolis, Ind., in favor of House bill No. 260, to increase the pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. PUGH: Papers to accompany House bill No. 6636, to correct the military record of John W. Kincaid—to the Committee on Military Affairs.

Also, papers to accompany House bill No. 6637, favoring a pension to Martin Cassady—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 6638, to pension Moses Lower—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 6640, to correct the military record of James Jones—to the Committee on Military Affairs.

Also, papers to accompany House bill No. 6641, to grant a pension to Daniel F. Danner—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 6642, to correct the military record of Jeremiah Hunt—to the Committee on Military Affairs.

Also, papers to accompany House bill No. 7845, for a pension to Oliver Miller—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 6867, for a pension to Eli Dean—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 3175, to correct the military record of James H. Jones—to the Committee on Military Affairs.

Also, papers to accompany House bill No. 6379, for the relief of Frank Mott—to the Committee on War Claims.

By Mr. RUSSELL of Georgia: Papers relating to the claim of William J. Tate—to the Committee on War Claims.

Also, papers relating to the claim of Jacob A. Fite—to the Committee on War Claims.

By Mr. TRACEY: Petition of numerous citizens of Hickory County, Mo., requesting the passage of House bill No. 2626, for the protection of agricultural staples by an export bounty—to the Committee on Ways and Means.

Also, petition of citizens of Stockton, Mo., favoring a pension to B. L. Cornwell—to the Committee on Invalid Pensions.

By Mr. WHEELER: Papers relating to the claim of Stephen Harris—to the Committee on War Claims.

By Mr. WILSON of New York: Memorial of citizens of the city of New York, against the unjust acquisition and distribution of wealth—to the Committee on Ways and Means.

SENATE.

TUESDAY, *June 9, 1896.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

On motion of Mr. HILL, and by unanimous consent, the reading of the Journal of yesterday's proceedings was dispensed with.

LANDS AT PORT ANGELES, WASH.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, acknowledging the receipt of a resolution of the 4th instant, directing the suspension of the time for the payment to be made by such persons as have heretofore made due proof according to law of residence and improvements upon lots in blocks 103, 104, 105, 97, 134, 136, 137, 138, 146, 147, 111, and 116 in the town site of Port Angeles, in the State of Washington, and who have not yet completed the purchase of the same from the United States, until the 3d day of March, 1897, when payment shall be made to the receiver of the United States land office at Seattle, in the State of Washington; which was ordered to lie on the table and be printed.

FORD'S THEATER DISASTER COMMISSION.

The VICE-PRESIDENT reappointed Mr. FAULKNER as a member of the Ford's Theater Disaster Commission.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had receded from its disagreement to the amendment numbered 99 of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes; agreed to the same with an amendment, in which it requested the concurrence of the Senate; insisted upon its disagreement to the residue of the amendments of the Senate to the bill upon which the committee were unable to agree; agreed to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. GROUT, Mr. PITNEY, and Mr. DOCKERY managers at the conference on the part of the House.

The message also announced that the House had passed the following bills and joint resolution; in which it requested the concurrence of the Senate:

A bill (H. R. 6399) to amend the laws relating to American seamen;

A bill (H. R. 8383) to establish a site for the erection of a penitentiary on the military reservation at Fort Leavenworth, Kans., and for other purposes; and

A joint resolution (H. Res. 190) to facilitate the reorganization of the Northern Pacific Railroad Company; to secure to actual settlers the right to purchase at a price not exceeding $2.50 per acre the agricultural lands within its grant, and to prohibit said company or any successor company from giving, by consolidation, sale, or other corporate action, control of its railroad to any corporation, company, person, or association of persons owning, operating, or controlling a parallel or competing railroad.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolution; and they were thereupon signed by the Vice-President:

A bill (S. 1189) granting a pension to Eliza Sandford;

A bill (H. R. 6614) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897; and

A joint resolution (H. Res. 195) to pay the officers and employees of the Senate and House of Representatives on the day following adjournment.

PETITIONS AND MEMORIALS.

Mr. CAMERON presented a petition of sundry citizens of Pennsylvania, praying for the enactment of legislation restricting immigration; which was ordered to lie on the table.

He also presented a memorial of the Chamber of Commerce of Pittsburg, Pa., remonstrating against the adoption of certain proposed amendments to the interstate-commerce law; which was referred to the Committee on Interstate Commerce.

He also presented a petition of Lackawanna Division, No. 12, Order of Railway Conductors, of Scranton, Pa., and a petition of Mauch Chunk Division, No. 153, Order of Railway Conductors, of Mauch Chunk, Pa., praying for the passage of the so-called Voorhees arbitration bill; which were referred to the Committee on Education and Labor.

Mr. ALLEN presented sundry papers to accompany the bill (S. 2278) making certain persons eligible to the pension list of the United States, and for other purposes; which were referred to the Committee on Pensions.

He also presented sundry papers to accompany the bill (S. 3111) to remove the charge of desertion from the name of George Miller, of Valentine, Nebr.; which were referred to the Committee on Military Affairs.

He also presented a memorial of sundry citizens of Niobrara, Nebr., relative to the proposed change in the Government survey in township No. 32 north, in Knox County, Nebr.; which was referred to the Committee on Indian Affairs.

Mr. BLACKBURN presented a petition of sundry citizens of Kentucky, praying that assistance be given Ona Melton, a native of that State, who was captured on the schooner *Competitor;* which was referred to the Committee on Foreign Relations.

He also presented a memorial of sundry citizens of Louisville, Ky., relative to the Armenian outrages; which was referred to the Committee on Foreign Relations.

Mr. SMITH presented a petition of sundry citizens of Hudson, Monmouth, Camden, Morris, and Sussex counties, all in the State of New Jersey, praying for the enactment of legislation restricting immigration; which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. MITCHELL of Wisconsin, from the Committee on Military Affairs, to whom was referred the bill (S. 2531) for the relief of Elias Breese, submitted an adverse report thereon; which was agreed to, and the bill was postponed indefinitely.

Mr. CAMERON, from the Committee on Foreign Relations, to whom was referred the bill (S. 2071) for the relief of Mary A. Swift, reported it without amendment, and submitted a report thereon.

Mr. GALLINGER, from the Committee on Pensions, to whom was referred the bill (H. R. 4355) to increase the pension of Theresa Peebles, of Jefferson County, Ga., reported it without amendment, and submitted a report thereon.

DEFICIENCIES IN APPROPRIATIONS.

Mr. HALE. I am directed by the Committee on Appropriations, to whom was referred the bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for the expenses of the House of Representatives, and for other purposes, for the fiscal year 1896, to report it with an amendment. I ask that the bill be placed upon its passage.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment of the Committee on Appropriations was, on page 1, after line 7, to insert:

To make the salaries of clerks of Committees on Revolutionary Claims and Corporations Organized in the District of Columbia, from the 1st day of January to the 30th day of June, 1896, at the rate of $2,100 per annum, $860.

The amendment was agreed to.

Mr. BLACKBURN. I desire to submit an amendment to the bill which relates solely to the organization of the two Houses.

Mr. HALE. It relates simply to the organization of one House or the other?

Mr. BLACKBURN. It relates entirely to the organization of one House or the other.

The VICE-PRESIDENT. The amendment of the Senator from Kentucky will be read:

The SECRETARY. It is proposed to add the following:

To enable the Secretary of the Senate and the Clerk of the House of Representatives to pay all officers and employees of the Senate and House of Representatives, including the Capitol police, who were employed on the 2d day of December, 1895, and who have ceased to be employed, a sum equal to one month's pay at the rate they were severally receiving on the 2d day of December, 1895; and a sufficient sum for this purpose is hereby appropriated.

Mr. PEFFER. I wish to inquire of the Senator from Kentucky whether that means an extra month's pay in addition to the yearly salary?

Mr. BLACKBURN. I will state to the Senator from Kansas that it does, but it applies only to those who were on the pay rolls of the two Houses upon the date named, and who have since ceased to be employed. I will say to the Senator further that it has been, I believe, an invariable practice during the twenty-odd years that I have been in Congress to give to those employees whose terms of service had ceased by reason of dismissal an extra month's pay. This has been an almost unbroken practice of Congress.

Mr. PEFFER. I have understood that that has been the practice, and two years ago when a similar measure was pending I objected to it on the ground that I thought then, as I still think, that it is a vicious practice. It is a practice that ought never to have been begun, and the sooner it is dispensed with the better it will be. I think that if these persons are not receiving sufficient compensation for their labor their salaries ought to be raised, but that their regular monthly salary as it is provided in the law or their regular yearly salary as it is provided in the law ought to be sufficient, and that that is all they ought to be paid. We do not give our workmen throughout the country, the men who work for us in a private capacity, an extra month's pay, but we pay them so much per day, so much per week, so much per month, so much per year, and that is the end of it. If it is the effect of this amendment to give an extra month's pay, I object to it.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Kentucky.

The amendment was agreed to.

Mr. PETTIGREW. I offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to add to the bill:

To enable the Secretary of the Senate and the Clerk of the House of Representatives to pay the officers and employees of the Senate and House borne on the annual and session rolls on the 1st day of February, 1896, including the Capitol police and W. A. Smith, CONGRESSIONAL RECORD clerk, for extra services during the Fifty-fourth Congress, a sum equal to one month's pay, at the compensation then paid them by law, the same to be immediately available.

The VICE-PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from South Dakota.

The amendment was rejected.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

REPORT OF THE MONETARY COMMISSION OF 1876.

Mr. HALE, from the Committee on Printing, to whom was referred the resolution submitted by Mr. BUTLER on the 6th instant, reported it with an amendment.

The resolution was read, as follows:

Resolved, That there be printed 3,000 additional copies of Report No. 703, Forty-fourth Congress, second session, known as Report of the Monetary Commission of 1876.

The amendment of the Committee on Printing was, in line 1, before "thousand," to strike out "three" and insert "two"; so as to read "2,000 additional copies."

The amendment was agreed to.

The resolution as amended was agreed to.

BERLIN SILVER COMMISSION OF 1894.

Mr. JONES of Arkansas, from the Committee on Finance, reported the following resolution; which was referred to the Committee on Printing:

Resolved by the Senate (the House of Representatives concurring), That there be printed 5,000 copies of Senate Miscellaneous Document No. 274, Fifty-third Congress, second session, Proceedings of the Berlin Silver Commission of 1894, with index, 3,000 to be for the use of the House of Representatives and 2,000 for the use of the Senate.

BILLS INTRODUCED.

Mr. CAMERON introduced a bill (S. 3271) to authorize the purchase of additional lands for the Gettysburg National Park; which was read twice by its title, and referred to the Committee on Military Affairs.

He also introduced a bill (S. 3272) granting a pension to Hannah Hess; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. ALLEN introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Claims:

A bill (S. 3273) for the relief of the Sanburn Town Company, of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3274) for the relief of the heirs of Fred. R. Kittle, of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3275) for the relief of H. J. Gregory, of the State of Nebraska, and for other purposes;

A bill (S. 3276) for the relief of the heirs of D. B. Thurston, and for other purposes;

A bill (S. 3277) for the relief of the heirs of William Thurston and G. G. Thurston, of Florence, in the Territory of Arizona, and for other purposes;

A bill (S. 3278) for the relief of E. K. Valentine, of West Point, in the State of Nebraska, and for other purposes;

A bill (S. 3279) for the relief of G. G. Thurston, of Florence, in the Territory of Arizona, and for other purposes;

A bill (S. 3280) for the relief of Ella F. Brady, of Oklahoma City, in the Territory of Oklahoma, and for other purposes;

A bill (S. 3281) for the relief of William C. Brady, of Oklahoma City, in the Territory of Oklahoma, and for other purposes;

A bill (S. 3282) for the relief of the heirs of Lewis Sanburn, late of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3283) for the relief of Robert Kittle, of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3284) for the relief of J. H. Stewart, of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3285) for the relief of J. H. Meyer, of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3286) for the relief of N. M. Pilsbury, of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3287) for the relief of Charles B. Veazie, of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3288) for the relief of John Knecktel, of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3289) for the relief of George H. Briggs, of Fremont, in the State of Nebraska, and for other purposes;

A bill (S. 3290) for the relief of B. W. Evits, of Fremont, in the State of Nebraska, and for other purposes; and

A bill (S. 3291) for the relief of Lyon Backey, of Fremont, in the State of Nebraska, and for other purposes.

HARRIS P. HURST.

Mr. GEORGE submitted the following resolution; which was referred to the Committee on Claims:

Resolved, That the Committee on Claims be instructed to investigate and report upon the claim of Harris P. Hurst against the Government of the United States for compensation for the use of certain improvements in ordnance and high-explosive shells covered by a contract made between the Secretary of the Navy and the said H. P. Hurst January 28, 1893, and report

whether the ordnance devices and high-explosive shells for which the said H. P. Hurst now claims compensation were his invention and covered by his applications for patents numbered in said contract or were devised by officers of the United States Navy in public or private employ, and also whether said Hurst is entitled to any compensation therefor, and if so, how much.

CHICKAMAUGA AND CHATTANOOGA NATIONAL PARK.

Mr. PALMER submitted the following concurrent resolution; which was referred to the Committee on Printing:

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound 60,000 extra copies of the report of the Joint Committee on the Dedication of the Chickamauga and Chattanooga National Park; 18,000 copies shall be for the use of the House of Representatives, 6,000 copies for the Senate, 1,000 copies for the National Park Commission to supply the twenty-eight State commissions, and 500 copies for the Secretary of War to supply the governors of the States, and 100 copies for each speaker at the dedication.

COMMITTEE ON PACIFIC RAILROADS.

Mr. MORGAN submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the hearings had before the Select Committee on Pacific Railroads, not heretofore printed as documents, be printed for the use of the Senate.

Mr. MORGAN. I submit a resolution in order to have it referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The resolution was read, as follows:

Resolved, That the Select Committee on Pacific Railroads have leave to sit in the vacation of Congress at such places on or near the lines of said roads as they may designate, to send for persons and papers, and to examine witnesses under oath in respect of the Union and Central Pacific railroads, and as to all matters concerning said railroad companies and their property and the condition and management of the same, and the expenses incurred in the execution of this order shall be paid out of the fund appropriated for the contingent expenses of the Senate.

Mr. HARRIS. I suggest to the Senator from Alabama that the resolution provides for examining witnesses under oath, but does not give the specific power to administer oaths. I think the Senator will modify it if he looks at it.

Mr. MORGAN. The general statute gives that power.

Mr. HARRIS. Very well.

The VICE-PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

PENITENTIARY AT FORT LEAVENWORTH.

The bill (H. R. 8383) to establish a site for the erection of a penitentiary on the military reservation at Fort Leavenworth, Kans., and for other purposes, was read twice by its title.

Mr. DAVIS. That is a bill the passage of which is requested by the Department of Justice and the War Department. I ask unanimous consent that it be placed on its passage. It is very short. It involves the mere transfer of the site of the National Penitentiary, now inside of the barracks at Leavenworth, to a place some 2 miles off on the same reservation.

The VICE-PRESIDENT. The bill will be read for information.

The Secretary read the bill, and, by unanimous consent, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DISTRICT STREET RAILWAYS.

Mr. HARRIS submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2928) to extend the routes of the Eckington and Soldiers' Home Railway Company and of the Belt Railway Company of the District of Columbia, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendments of the House numbered 1, 2, 3, 4, 9, 10, 12, 13, 14, 21, 22, and 23, and agree to the same.

That the House recede from its amendment numbered 26.

That the Senate recede from its disagreement to the amendments of the House numbered 6, 8, 11, 15, 17, 18, 19, 20, 24, and 27, and agree to the same amended so that the sections of the bill shall be numbered consecutively; and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 5, and agree to the same amended as follows: In lieu of the matter proposed to be stricken out amend section 2 so that the said section shall read:

"SEC. 2. That the Eckington and Soldiers' Home Railway Company of the District of Columbia be, and the same hereby is, authorized to lay down and operate a street railway in the city of Washington, D. C., through and along the following named streets and avenues, to wit:

"Beginning at the junction of Eighth and D streets northeast; thence by double track south along Eighth street to C street south; thence by single track, as follows: West on C street south to Seventh street east; thence south on Seventh street east to M street south; thence east on M street south to Georgia avenue; thence northeast on Georgia avenue to Ninth street east; thence north on Ninth street east to C street south; thence west on C street south to Eighth street east."

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 7, and agree to the same amended so that the proviso in question shall read as follows:

"*And provided*, That said Eckington and Soldiers' Home Railway Company shall not have its stock and bonds outstanding at any one time to a greater amount than the actual cost of the construction and equipment of said railway; which actual cost shall be ascertained by the supreme court of the District of Columbia in such manner as the said court shall prescribe."

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 16, and agree to the same amended so that the proviso in question shall read:

"*And provided*, That said Belt Railway Company shall not have its stock and bonds outstanding at any one time to a greater amount than the actual cost of the construction and equipment of said railway; which actual cost shall be ascertained by the supreme court of the District of Columbia in such manner as the said court shall prescribe."

And the House agree to the same.

JAMES McMILLAN,
ISHAM G. HARRIS,
Managers on the part of the Senate.

J. W. BABCOCK,
G. M. CURTIS,
JAMES D. RICHARDSON,
Managers on the part of the House.

The report was concurred in.

IMPORTED PARCELS AND PACKAGES.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution of the Senator from Maryland [Mr. GIBSON] coming over from a previous day.

The Secretary read the resolution submitted yesterday by Mr. GIBSON, as follows:

Resolved, That the bill H. R. 6259 as amended and passed the Senate June 6, 1896, be referred to the Committee on the Judiciary, with instructions to examine the same and report to the Senate whether any of its provisions are in violation of existing treaty stipulations between the United States and foreign nations.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

Mr. PLATT. The resolution relates on the face of it to a bill which had passed the Senate some days before its introduction. It proposes to refer a bill which had passed the Senate to the Judiciary Committee, asking the opinion of the Judiciary Committee upon it. The bill was beyond the jurisdiction of the Senate at that time. It has since passed the House, gone to the President, and has been signed by the President. So I do not think the resolution ought to pass.

Mr. GIBSON. I was not aware of what the Senator from Connecticut has just stated until he made the statement. At the time the resolution was offered my judgment with reference to its being beyond the jurisdiction of the Senate was that it could be yet referred to the Committee on the Judiciary.

The bill to which the resolution referred was passed during my absence on important public business, assigned thereto by the President of the Senate. I had offered an amendment to the bill, but that amendment was not considered; and when I returned I found that the bill had passed the Senate and had gone to the House. The object of the resolution was that the Judiciary Committee should inquire into and determine whether the measure as passed is in contravention of treaty stipulations with foreign powers. In my judgment, it is clearly so; and it occurred to me that it was legislation which would result hereafter in possible embarrassing complications which we ought to avoid. Hence I offered the resolution. If, however, the act has passed to the stage which the Senator indicates, I will not press the subject further upon the attention of the Senate. Under the circumstances, I will withdraw the resolution.

The VICE-PRESIDENT. The resolution is withdrawn.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. PRUDEN, one of his secretaries, announced that the President had on the 6th instant approved and signed the following acts:

An act (S. 3161) amending and extending the provisions of an act of Congress entitled "An act approving, with amendments, the funding act of Arizona," approved June 25, 1890, and the act amendatory thereof and supplemental thereto, approved August 3, 1894;

An act (S. 710) granting a pension to Ada J. Schwatka, widow of the late Lieut. Frederick Schwatka;

An act (S. 148) granting a pension to Catherine Dillon;

An act (S. 804) granting a pension to Mrs. Eleanor Carroll Poe;

An act (S. 1672) granting a pension to Lue R. Brown; and

An act (S. 1420) granting an increase of pension to Elizabeth W. Sutherland.

The message also announced that the President of the United States had on the 8th instant approved and signed the following act and joint resolution:

An act (S. 2169) to regulate mail matter of the fourth class; and

A joint resolution (S. R. 155) to authorize a scientific investigation of the fur-seal fisheries.

BILL BECOME A LAW.

The message further announced that the bill (S. 678) granting a pension to Joseph R. West, brigadier and brevet major general,

United States Army Volunteers, having been presented to the President on May 25, 1896, and not having been returned by him to the House of Congress in which it originated within the time prescribed by the Constitution, had become a law without his approval.

EQUESTRIAN STATUE OF GENERAL SHERMAN.

The VICE-PRESIDENT. The Chair lays before the Senate as a part of the morning business the resolution of the Senator from Colorado [Mr. WOLCOTT] coming over from a previous day. The resolution will be read.

The Secretary read the resolution submitted yesterday by Mr. WOLCOTT, as follows:

Resolved, That the Committee on the Library be directed to inquire into all the facts and circumstances connected with the late award of a contract for the erection, at the city of Washington, of an equestrian statue of Gen. William T. Sherman, and to make report thereon to the Senate at the next session of Congress, with such recommendation as the committee may deem necessary or proper; and the Secretary of War is hereby requested to suspend the execution of the contract for the construction of said monument until such report is received.

Mr. WOLCOTT. Mr. President——

Mr. DUBOIS. I ask the Senator from Colorado if he will accept as an amendment the insertion of the words " of the Senate "; so as to read: "The Committee on the Library of the Senate."

Mr. WOLCOTT. Certainly; " the Committee on the Library of the Senate." It should go in so. I am obliged to the Senator.

The VICE-PRESIDENT. The resolution will be so modified. The question is on agreeing to the resolution as modified.

Mr. WOLCOTT. Mr. President, it is a late hour in the session of the Senate to bring before it any measure or any resolution with the hope that it can be calmly and judicially considered. The suggestion which I have made in this resolution is only that until the winter session of the Senate the further construction of the Sherman monument shall be delayed. In furtherance of the resolution I desire to occupy the attention of the Senate for a few minutes, and in so occupying the time of the Senate I desire to state the case as impartially and as quietly as possible, and without the slightest suggestion as to misconduct upon anybody concerned in the award to the successful sculptor of the construction of the statue.

It does seem to me, however, Mr. President, that a great injury has been done, and that a proper investigation of the subject by the Library Committee will result either in righting the wrong that has been done or in showing to the people of the United States that the conduct in the award and the result that was obtained was the right conclusion of the whole matter.

The Society of the Army of the Tennessee desired very properly and with great patriotism that a monument should be erected to General Sherman in the city of Washington. To accomplish that purpose it raised some $16,000, a sum totally inadequate to accomplish the result. Congress was called upon to aid so worthy a suggestion, and we have appropriated, first $50,000 and then $30,000, until $80,000 has been appropriated by the Congress of the United States to be added to the $16,000 raised by the Society of the Army of the Tennessee, making $96,000, out of which shall be paid the foundation, the pedestal, and the statue, in commemoration of the great public services of General Sherman.

The act which passed Congress appropriating $80,000 was very brief in the powers it conferred, and I will read it:

That the sum of $50,000—

Thirty thousand dollars was afterwards added by a subsequent act, without further comment—

That the sum of $50,000 be, and is hereby, appropriated for the preparation of a site and the erection of a pedestal for a statue of the late Gen. William T. Sherman in the city of Washington; said site to be selected by and said pedestal to be erected under the supervision of the president of the Society of the Army of the Tennessee, the Secretary of War, and the Major-General Commanding the Army, and any part of the sum hereby appropriated not needed for preparation of site and the erection of a pedestal may be used and expended in the completion of said statue of the late Gen. William T. Sherman.

No express provision was made for the statue as separable from the foundation and the pedestal. As a matter of fact, in the cost of the structure the pedestal counts far more than the statue, and the pedestal and the statue are together so closely identified and associated that the selection of one becomes virtually the selection of the other—it is an entirety.

Upon the passage of this act the Society of the Army of the Tennessee sent out its published suggestion for competitive models to be sent for the erection of the statue. The first notice was by publication. It was followed by a circular signed by General Dodge, the president of the Society of the Army of the Tennessee, under date of June 20, 1895, in which, referring to the letter of invitation of March 22, the first invitation to sculptors, he would state—

That having received several letters from sculptors asking for a more detailed statement of the conditions of the competition, the matter was referred to the National Sculpture Society—

Taken from the Society of the Army of the Tennessee even at the preliminary stages of it so far as the suggestions were to be made for the construction of the statue—

was referred to the National Sculpture Society, and after consultation with a number of artists, I submit the following, which will govern the competition.

Then he states the different subjects, which I will incorporate in my remarks, and all of which have to do with the general character of the models, that they must be in plaster, that no drawing would be considered, as to when they should be presented, etc.

Then the circular contains this paragraph, which is all important:

A committee of the National Sculpture Society will pass on the artistic character of the models, and experts in bronze, castings, etc., will aid this committee in arriving at its conclusions.

The models were to be passed upon by a committee of the National Sculpture Society. In furtherance of this circular, which was very properly limited to artists in America and American artists living abroad, 26 models were submitted to this national commission for the statue of General Sherman. The National Sculpture Society were together called upon to appoint a committee of artists to pass upon the different models. A committee of the most distinguished sculptors of the United States, and that includes among them the most distinguished sculptors of the world, met together to pass upon the design. They were to pass upon their artistic merits, upon their general form and construction. They were to pass upon those important matters which artists are so much better qualified to determine than those uneducated in sculpture or in art.

Mr. HAWLEY. I wish to ask a question, if the Senator pleases. Was it committed absolutely to them? They were not to decide the final question, were they?

Mr. WOLCOTT. The Senator from Connecticut heard what I read. He can put his construction upon it. I know he intends to follow me in the discussion of the resolution.

Mr. HAWLEY. I will. I did not intend, though.

Mr. WOLCOTT. If anything I have said will induce the Senator from Connecticut to add light to the subject, I shall be glad to have him follow me. I hope he does not suggest that I am making any misstatement of fact.

Mr. HAWLEY. Oh, no. I am not sure as to the exact terms. Perhaps I missed something in what the Senator submitted.

Mr. WOLCOTT. I will say to the Senator that I read the statement contained in the first law.

Mr. HAWLEY. My impression was that it was only advisory.

Mr. WOLCOTT. I will read again that clause in the first law, and then I will go on:

A committee of the National Sculpture Society will pass on the artistic character of the models, and experts in bronze castings, etc., will aid this committee in arriving at its conclusions.

The committee met and made full and careful investigation. In the invitation that was extended to sculptors to contribute their models a statement was made which will appear in the circular which I will print, but I will state the substance of it. The successful sculptor should receive the award of the monument. It was not to cost, including the foundation and pedestal, more than $90,000, but the statue, the pedestal, and the foundation to be considered together. The next four models in order of merit should each receive $1,000 as a bonus—as a premium for having offered the models. This was given as an inducement to sculptors, inducing them to contribute by holding out the hope to them that although they might not succeed in getting the monument itself, yet that they might receive a sum which would in a measure reward them for the time and effort they had expended.

This committee of artists then met and after due consideration made a report that two models, one of Mr. Bartlett and one of Mr. Niehaus, were the two best models; that they were of great merit, and that they were so equal in merit that this committee of artists preferred that the commission itself should determine which of them should receive the award for the construction of the statue. They then named three other artists who should receive the award of $1,000 each, the unsuccessful one of the two and two others, so as to give them the award of $1,000 each.

This report was duly made by these representatives of the Society of National Sculpture. Following upon that the president of the Society of the Army of the Tennessee called in to consult with him and to pass upon the merits of the statue General Henderson, General Noble, Colonel Cadee, General Howe, and Colonel Jacobson, all good men, all men who knew General Sherman, all members of the Society of the Army of the Tennessee, all people desirous, as everybody has been desirous in this whole matter, of securing the best that could be obtained.

Mr. FAULKNER. Will the Senator from Colorado give me a piece of information about this matter?

Mr. WOLCOTT. Yes.

Mr. FAULKNER. Was the commission to which the subject was referred appointed by an act of Congress or by the Society of the Army of Tennessee?

Mr. WOLCOTT. The commission was appointed by the act of Congress in the language which I have once read and will read again:

That the sum of $50,000 be, and is hereby, appropriated for the preparation of a site and the erection of a pedestal for a statue of the late Gen. William T. Sherman in the city of Washington, said site to be selected by and said pedestal to be erected under the supervision of the president of the Society of the Army of the Tennessee, the Secretary of War, and the Major-General Commanding the Army, and any part of the sum hereby appropriated not needed for preparation of site and the erection of a pedestal may be used and expended in the completion of said statue of the late Gen. William T. Sherman.

Mr. ALLISON. Will the Senator allow me to interrupt him?

Mr. WOLCOTT. If the Senator from West Virginia is through——

Mr. FAULKNER. I understand the commission named in the act of Congress had reference only to the pedestal.

Mr. WOLCOTT. The foundation and the pedestal technically, as I have already said. Now, did the Senator from Iowa have some question to ask?

Mr. ALLISON. That was the suggestion I was about to make. The Society of the Army of the Tennessee selected a committee of its own to erect the statue; and the provision the Senator has read relates only to the pedestal.

Mr. MILLS. Who created the art commission that passed on the question? Was that done by law?

Mr. WOLCOTT. It is plain it would have been wiser to have read the whole circular. As I have once stated, the act of Congress named a commission which should determine upon the selection of a site and the erection of a pedestal, and the surplus of the amount appropriated by Congress was to go toward the payment for a statue, if any sum should remain. The Society of the Army of the Tennessee, having raised $16,000 against the Government's $80,000, then called for the sending in of models for the erection of a statue, the statue to include the pedestal. I will read the whole of it, and then Senators will understand that it is utterly impossible to segregate the statue from the pedestal, and before I get through Senators will see that one is as much a part of the other as would be the horse and his driver.

Mr. MILLS. But I am not talking about either the pedestal or the statue. I am talking about the cultured gentlemen at New York who passed on the question.

Mr. WOLCOTT. That also I have once stated, and it will appear again.

Mr. MILLS. Who appointed them?

Mr. WOLCOTT. Let me read:

FIRST COMPETITION. GENERAL SHERMAN STATUE COMMITTEE OF THE SOCIETY OF THE ARMY OF THE TENNESSEE.

Committee: Gen. G. M. Dodge, president; Gen. J. F. Howe, treasurer; Gen. J. W. Noble, Col. D. B. Henderson, Col. Aug. Jacobson, Col. Cornelius Cadle, secretary.

JUNE 20, 1895.

DEAR SIR: Referring to our circular letter of invitation of March 22, I would say that having received several letters from sculptors asking for a more detailed statement of the conditions of the competition, the matter was referred to the National Sculpture Society.

That is, the artistic society—

and, after consultation with a number of artists, I submit the following, which will govern the competition.

That is, after consultation with these artists, he submitted "the following, which will govern the competition":

As stated in the circular of March 22, a committee of the Society of the Army of the Tennessee, the president of the same society, the Secretary of War, and the Lieutenant-General of the Army have the authority to erect and supervise the construction of an equestrian monument of Gen. W. T. Sherman in Washington, D. C.

The sum of $96,000 has been raised by subscription and appropriated by Congress for the erection of this monument, and you are invited to compete for its erection.

The amount named must cover the entire cost of excavation, foundation, pedestal, equestrian statue, etc., and all expenses incidental to the erection of the monument ready for unveiling, including four awards of $1,000 each, as hereinafter provided.

Reciting that the whole was to be included in the one bid.

There will also be traveling expenses of experts, office expenses, including pay of United States inspector while work is in progress; this will leave $90,000 actually available for the statue, pedestal, etc.

It all being counted as one.

The monument will be placed in one of the United States reservations in the city of Washington, D. C.

The following conditions will be imposed upon all competitors:

All artists competing must send free of expense and risk to G. M. Dodge, president of the Society of the Army of the Tennessee, care of the Secretary of War, Washington, D. C., on or before January 1, 1896, an accurate and elaborate model of their design on a scale of 1 inch to 1 foot; these models must include both the pedestal and equestrian statue.

Nobody was invited to compete separately for a statue, but they were invited to compete for a pedestal and a statue considered together and estimated together in computing the cost.

The contract for the work will be awarded to the artist whose design is deemed best, provided it is considered satisfactory.

To the artists submitting the next four designs deemed satisfactory for so important a work, but whose models have not been accepted, provided so many are found worthy of consideration, the sum of $1,000 each will be paid.

The money awards herein offered will, if awarded, be paid by the committee from the funds subscribed for the monument, within thirty days after the decision has been rendered.

The successful sculptor will be required to enter into contract with the United States for the work and to give bonds in the sum of $25,000 for its successful performance; the contract will provide for payments as work progresses, in such manner as may be agreed upon between the sculptor and the committee, and shall comply with existing laws and regulations of the accounting officer of the United States Treasury.

A full description of the proposed monument must accompany each model submitted, giving exact dimensions of the monument and character of materials to be used, together with such other information as the artist may deem necessary.

Each model must be signed by the full name of the artist. No secrecy will be maintained.

All models must be in plaster.

No drawing will be considered.

All models violating these rules will be rejected.

All models which can not be executed in a first-class manner for the price named in this circular will be ruled out; this question will be determined by experts.

The monument as erected must be the enlargement and completion of the design accepted.

The committee will agree to return all models at the expense and risk of the artist, if so requested; it will not be held responsible for any models not requested to be so returned or not removed within ten days after rendering the final decision.

Only artists and sculptors residing in this country and American citizens residing abroad may submit designs in this competition.

A committee of the National Sculpture Society will pass on the artistic character of the models, and experts in bronze castings, etc., will aid this committee in arriving at its conclusions.

This committee reserves the right to reject any and all designs.

Only such sculptors and architects as are not connected in a business way with any monumental firm or bronze foundry will be allowed to take part in the competition.

All models will be publicly exhibited for two weeks prior to rendering the final decision, but not afterwards.

The successful artist must model his full-sized statue in the United States, and all the stonework and bronze casting must be done in the United States.

G. M. DODGE, *President.*

Copy:
F. W. RUCKSTUHL, *Secretary N. S. S.*

I call attention to this paragraph:

A committee of the National Sculpture Society will pass on the artistic character of the models, and experts in bronze castings, etc., will aid the committee in arriving at these conclusions.

After this direct and straightforward and it was to be supposed final report of this committee of artists appointed by the committee of the Army of the Tennessee themselves in furtherance of the act of Congress, this second circular was sent out, to which I also invite the attention of the Senate, under date of January 21, 1896—this last January. This was sent to all the competing sculptors.

I should say before this second circular was called out there were 26 bids submitted. This society gave the names of the three equally meritorious men who were unsuccessful in securing the award, but who were entitled to the prize of a thousand dollars. The Army of the Tennessee then met, through its officials, and struck from the list the fourth one of the names which these artists had put in there, and promoted from No. 10 on the list of the committee a man entirely out of the competition—took No. 10 on the list and put him up into the fourth place, displacing one of the four which this art committee had selected, and putting him in as one of the four successful persons, and took the award of a thousand dollars from one of these people and gave it to another.

Then this second circular was sent out:

NEW YORK CITY, *January 21, 1896.*

DEAR SIR: The committee, consisting of a committee of the Society of the Army of the Tennessee, the president of the same society, the Secretary of War, and the Commanding General of the Army, as designated in our circulars of March 22 and June 30, 1895—

Which I have just read—

for the selection of a model of an equestrian statue to Gen. William T. Sherman, to be erected in Washington, D. C., met on January 18, at the War Department, and decided that none of the models submitted expressed the character and individuality of General Sherman or treated the subject with sufficient force to warrant the committee to make a final selection.

That was in direct accordance with the powers reserved to the committee when they first sent out their letter.

They also had before them the report of the committee from the National Sculpture Society, and their report reached the same conclusion.

The committee therefore decided to select the four models which, in their judgment, possessed the most merit for further elaboration and development, these being the models offered in competition by the following sculptors: P. W. Bartlett, Carl Rohl-Smith, C. H. Niehaus, and J. Massey Rhind.

They also selected as entitled to one of the $1,000 premiums offered for merit the models submitted by H. K. Bush-Brown, of New York.

The four sculptors who compete for the final judgment of the committee must send, free of expense and risk, to Gen. G. M. Dodge, president of the Society of the Army of the Tennessee, care of the Secretary of War, Washington, D. C., on or before May 15, 1896, their designs completed on a scale of 2 inches to 1 foot.

The first models called for were 1 inch to the foot.

These designs must include both pedestal and equestrian statue.

The contract for the statue will be awarded to the artist whose design is considered satisfactory.

The three unsuccessful artists will receive each the premium for merit of $1,000, mentioned in the circular of June 20, 1895; also $250 each for their additional labor, to be paid them within thirty days after the decision has been rendered.

A full description of the monument must accompany each model submitted, giving its exact dimensions, the kind and character of the material to be used, and a detailed estimate of the cost.

Each model must be accompanied by the full name of the artist.

All models which can not be executed of first-class material in a first-class manner for the sum of $90,000 will be ruled out, and the committee will call in experts to determine whether the monument can be built within the price named.

The monument as erected must be the enlargement and completion of the design accepted.

The committee reserves the right to reject any or all designs.

The models will be publicly exhibited for two weeks from May 15, 1896.

The successful artist must model his full-size statue in the United States, and all the stonework and bronze casting must be done in the United States, and the sculptor receiving the award will have to comply with the other conditions provided in the two circulars of March 22 and June 20 which apply to him.

The sculptor's attention is called to the equestrian group itself, that it must represent the character and individuality of the subject and the likeness of General Sherman.

Such elaboration and development of his model as the artist may deem best will be allowed in the second design.

The location selected for the statue is that portion of the grounds south of the Treasury Department and bounded as follows: On the north by the street immediately south of the Treasury Department; on the east by Fifteenth street; on the south by D street extended, and on the west by the gravel road around the ellipse and the south grounds of the Executive Mansion.

Any further information desired will be given by the president of the committee, Gen. G. M. Dodge, No. 1 Broadway, New York City.

Yours, very truly,

G. M. DODGE, *President.*

Upon the assurances contained in that circular, and resting upon the belief, as they had the right to rest upon the belief, that the committee of artists would pass upon these four models, which were again to be presented for consideration, these artists again prepared their models, doubling the size before required. They furnished these models as requested by the final circular, and then the president of the Society of the Army of the Tennessee and the commission appointed by Congress met, and without consultation and advice, without accepting suggestions from these artists, but, on the other hand, utterly ignoring the committee which they themselves had summoned to pass upon this question, they awarded the contract, not to one of the four whose names had been reported by this committee from the Sculptors' Society, but to this artist No. 10, whom they had boosted up from No. 10 to be one of the four. The artists who had been led to send their models upon the assurance that they would be passed upon by men who were acquainted with the canons of art were quick to send their models again that they might apparently, but, as it turned out, not really, compete. The suggestions and advice which had been asked for by the Society of the Army of the Tennessee were ignored and repudiated, and the Society of the Army of the Tennessee selected a man who had been rejected by these sculptors.

Now, Mr. President, there is no suggestion of any personal misconduct anywhere. It is further to be said that the old soldiers of the Army of the Tennessee who served with General Sherman, if they were satisfied with the likeness and they were satisfied with the statue, should have much voice in its erection. But that is not enough to say.

It is true, Mr. President, that this city contains many monuments and statues and bronzes that are a disgrace to this end of the nineteenth century. It is true that again and again our streets and our public parks are degraded by statues which have no place there, which are the work of artists who have been appointed through favoritism or friendship for the erection of those statues. It is true that if you yield in one instance to the wishes of those who knew the person to whom a monument is to be erected, but who do not pretend to knowledge of art, that in almost every statue to be erected you ignore the canons of a noble art and leave the choice to the uneducated taste of those who knew the person in his lifetime for whom the statue is to be erected. Personal likeness to the original is but one feature. Many statues make no pretense to a personal likeness, for that is not called for or expected. That is the least of the difficulties in the way of a genuine artist, but the thought, the conception, the plan of the monument, which is to symbolize truth in its highest manifestation, is reached by those who study art for a lifetime; and they can teach us, who know nothing about it, to like and enjoy that which, without such education, we would not appreciate or enjoy.

It is true, Mr. President, that the last things that survive of a race are its monuments and its statuary; and if at the end of this nineteenth century we are to leave for the centuries that are to come after us only such horrid examples of art as largely degrade our public parks the estimate which posterity will make of this century will be poor indeed.

Mr. President, we owe it to ourselves, we owe it to art, we owe it to truth, if we invite people who have knowledge upon these subjects to tell us what we shall do, that we shall follow their suggestions. We owe that to ourselves, and to these artists, who never would have competed if they had not supposed that competent judges were to be selected, we owe something.

There is a grave legal question, Mr. President, whether this committee, which called upon artists to bid for a statue and gave them the assurance that the statue would be passed upon by a commission of artists, and then rejected and repudiated the award of the commission—it is a very serious question whether they may not have legal rights which must be considered before a final settlement of this matter.

I say certainly, Mr. President, every instinct of justice, not only to these artists, not only to the city of Washington, which ought to have for so noble and so splendid a general the highest embodiment of art, but every instinct of honor requires, and the interests of the Society of the Army of the Tennessee require, that we should investigate this question, and we should determine whether or not this selection was made fairly and straightforwardly and legally and in good faith before we commit ourselves finally to the erection of this statue. The time which will elapse is but short. What are six months as against the completion of a work of art by proper methods and on proper lines?

Not only that, Mr. President, but we owe it to common justice that this monument shall stand not alone a monument to the courage, the bravery, and the patriotism of General Sherman, but we owe it to ourselves that it shall not as well stand, as it will stand if we do not investigate and ascertain the facts respecting this award, as a monument of injustice, of unfairness, and of bad faith.

I respect the wishes and desires of the old soldiers of the Army of the Tennessee as deeply as can any man. I feel that they themselves must naturally believe that they know the lineaments of the general they followed to victory. I have no doubt that the award made by these officials of the Society of the Army of the Tennessee was made in the interest of what they believed a plan for the best preservation of the memory of General Sherman for all coming time. But I do believe, Mr. President, that we owe it to art and to ourselves that we shall have the best artistic embodiment in this monument, that we owe it to ourselves and to these artists that we do not invite them to contribute under false representations, and if we tell them their work shall be passed upon by their brother artists we shall not rob them of that right which we have promised them.

Mr. ALLISON. Mr. President, I desire to say a few words respecting this resolution and to give the reasons why I shall vote against it.

The first question for us to consider, it seems to me, as to the resolution is our proper jurisdiction over the subject-matter. How is it and by what method was there an inauguration of the project and plan to erect in the city of Washington an equestrian statue of General Sherman? It did not originate in these Halls; it was not an act of Congress. It was an act of the old soldiers of the Republic who had followed General Sherman through four years of war, his comrades and associates in the Army of the Tennessee. At their annual meeting, I think as long ago as 1891—I have not the dates before me—the Society of the Army of the Tennessee resolved that they would erect in the city of Washington, in commemoration of their distinguished commander, an equestrian statue, and that for that purpose they would raise money from their comrades to execute that wish and will. They appointed a committee of five members of that society, and at the head of that committee was Gen. Grenville M. Dodge, a resident of the State of Iowa. He was the successor of General Sherman as president of the Society of the Army of the Tennessee. He was a soldier selected by his comrades as a fit successor to General Sherman, who had had the honor of being the president of that great organization. This committee of five was a committee for the purpose of erecting this statue, and for the purpose of gathering from the old soldiers a sufficient amount of money to erect it.

This was not a new thing in the city of Washington in commemorating distinguished soldiers of the Republic. It had often been done before. That committee entered upon this work. They commenced raising money, and after they had made some progress in that direction they came to Congress and asked Congress to appropriate a sufficient amount of money to erect a pedestal upon which the statue should be placed. They did that in pursuance of a custom which had prevailed for years. There is not, to my recollection, a single statue in this city where Congress has not appropriated a sufficient amount of money to prepare the pedestal for its construction. That is true as to every statue which is found upon the squares and parks of this city. The amount usually appropriated for this purpose has been $50,000. They appealed to the Congress of the United States to provide a pedestal upon which the statue should rest. That appeal was responded to by the two Houses of Congress in passing the joint resolution which the Senator from Colorado [Mr. WOLCOTT] has read. That resolution provided that the United States should appropriate $50,000 for the purpose of providing a pedestal for the statue to be erected by the Society of the Army of the Tennessee; and if by any chance there should be a residuum, after preparing a proper pedestal, the remainder was to be used for the

erection of the statue itself. In other words, the Government of the United States proposed that if $50,000 was not required for the pedestal, the residuum should be a contribution to the Society of the Army of the Tennessee in erecting a statue to this great general.

The years passed on, and it became perfectly apparent that this committee, after one or two intervening annual meetings of the Society of the Army of the Tennessee, that owing to difficulties in raising money, which I need not go into here, these old veterans of the Army of the Tennessee would not among themselves be able to raise a sufficient amount of money to erect a suitable and proper statue of General Sherman. Therefore the Society of the Army of the Tennessee came to Congress and stated before the committees of this body the difficulties in their pathway, and asked from us an additional contribution to aid them in the erection of this statue. They only asked that we should provide $30,000. A suitable statue in memory of that great general would justify this Congress or any other Congress in providing a much larger sum. In an appropriation bill in the Senate there was inserted a provision for $30,000 additional for the purpose of erecting the statue, and that appropriation was in every essential particular an appropriation to the Society of the Army of the Tennessee, and to nobody else. It was a part and parcel of the contribution of the United States to aid the Society of the Army of Tennessee in securing the erection of a suitable statue in this city. That was the situation. They had, after all their efforts, secured contributions only amounting to a little over $16,000, and the residuum left of the $30,000 for a suitable pedestal it was supposed would be sufficient to erect the statue.

Mr. President, every step in the progress thus far has been taken by the Society of the Army of the Tennessee and by its committee. The only control or direction which Congress had in the matter was the control or direction given to it in the joint resolution of 1892, wherein it was provided that a commission consisting of the president of the Society of the Army of the Tennessee, then as now General Dodge, and the Secretary of War and the General of the Army, whoever they might be, when the statute was to be executed. What were they to do? By the terms of the law they were to select a site for the statue, and they were to prepare the pedestal upon which it should rest. The Secretary of War and the General of the Army, so far as any law is concerned, had only this duty to perform, and nothing else.

What occurred afterwards? I thank the Senator from Colorado for placing on the records here the resolutions and the declarations of that great committee. Who composed it? Was it not composed of men who were not only familiar with General Sherman and his deeds but who knew him personally and well? When further appropriations were required for the statue, thus mingling all our appropriations for the pedestal and the statue itself, the Secretary of War and the General of the Army were, by courtesy, added to the committee of the Society of the Army of the Tennessee to deal with this whole question.

What was done? In the first place, they invited models and bids for the erection of the statue, giving ample notice. The details, I believe, have been incorporated in the RECORD by the Senator from Colorado. Having invited those bids, they also invited a committee of artists to do what? Were this committee of artists exercising any official authority in this matter? They were the advisers only of this committee. They were the men who were simply called in, as we call in in our private affairs a friend who may be more familiar with certain features and phases of what we want to do than we ourselves are. There were, as I have been told—and my familiarity with the details of this subject began on yesterday practically—not 26 but 24 models presented. The Senator from Colorado may be right as to the number; but my information is 24. There were 24 models presented for the inspection of whom? For the inspection of this committee. They had no power, and, so far as these papers disclose, they had no desire to transfer their power and authority to anybody; but they did, as was wise and well, take the advice of a committee of the Artists' Association. This Artists' Association, out of those 24 or 26 models, whatever the number may be, discarded all but 4. When the committee having the authority, the power, and the duty in this matter examined those 24 models they discarded practically all of them, because they said none of them—and that was shown in their report—met the expectations and desires of the committee. Therefore they selected 4 men out of those 24 or 26, whatever the number may be, who, to their minds, presented the best model for a statue. They selected those 4, and asked them to enlarge and change their models to suit whom? The artists? Certainly not. They had no authority and no responsibility respecting it. I do not know, and the Senator from Colorado did not state, who this committee of artists were.

Mr. WOLCOTT. I can state them now. They were Augustin St. Gaudens, the famous sculptor of New York; J. Q. H. Ward, and Daniel C. French—all famous sculptors.

Mr. ALLISON. Yes; there were three sculptors—St. Gaudens, Mr. French, and Mr. Ward—all eminent sculptors. These three gentlemen selected a fourth. The Senator from Colorado says they put at No. 10 the model of Carl Rohl-Smith, of Chicago, and they placed Mr. Bartlett, of Paris, France, in the foreground, and selected three others.

When the committee came to the responsibility of dealing with this question they selected four men, who they supposed would be best qualified to meet their just expectations in preparing a suitable statue. The three sculptors of whom the Senator from Colorado speaks were in every sense functus officio; they had performed what they were invited to do; given their advice, which was partly taken, and then this committee undertook to do what they were required to do by the Society of the Army of the Tennessee, and that was to do the best they could in respect to this statue.

They then selected four models, as to which they requested the artists to modify their designs for the statue. When these four models were produced here, is it claimed by the Senator from Colorado that there was any injustice in not reinviting the same men to consider the four models which they had selected from which to make a final choice?

Mr. WOLCOTT. Certainly; that is my contention.

Mr. ALLISON. That is the Senator's contention, and yet it is rumored that one of those artists was an open and avowed enemy of the man who received the contract for this work of art.

Mr. WOLCOTT. Who was he?

Mr. ALLISON. Mr. St. Gaudens, as the newspapers publicly state, was incensed, it is alleged, for the reason that it was claimed that this associate artist of his had used St. Gaudens's likeness of General Sherman in making up his model. Now, the Senator from Colorado says that Mr. St. Gaudens, who had, it is alleged, thus denounced one of those four, should be selected as an impartial critic and judge as to these four models.

Mr. President, the final award was made. It was made by the Secretary of War, by the General of the Army, by Gen. Grenville M. Dodge, by Col. D. B. HENDERSON, by Gen. J. W. Noble, by Colonel Jacobson, and by Colonel Cadee. These were the men who sat in judgment upon the statues. It was their duty so to sit. They had assumed the authority conferred upon them by the Society of the Army of the Tennessee, and impliedly and not really by an act of Congress.

I understand they called each of these artists before them separately to explain in every way the models, and then, without mutual consultation each with the other, without any one of these men knowing the views of the others, they assembled in an office in the War Department, in this city, and at the suggestion of one of their number, merely for the purpose of ascertaining the personal preferences of each as to the merits of the four models, they took a ballot.

Mr. HAWLEY. A secret ballot.

Mr. ALLISON. They took a secret ballot, without consultation with each other, and four of the six gave the award of merit to Mr. Rohl-Smith and two to Mr. Bartlett, residing in Paris.

Mr. WOLCOTT. I do not wish to interrupt the Senator from Iowa, as I dislike to interrupt Senators; but were the Secretary of War and the General of the Army at this meeting?

Mr. ALLISON. They were both there. Having this informal expression, I understand, and I have no writing upon the subject, the award was made to Mr. Rohl-Smith, of Chicago, an artist who may not have international reputation, but who has a reputation where his work has been seen by experts and by nonexperts.

I am not an expert in art. I have not seen any one of these statues, but I take it that the old soldiers of the Society of the Army of the Tennessee, the comrades of General Sherman, when they come to Washington, will desire to see a statue of the man whom they followed through all the perils of war for four long years. Who can be trusted better to know what, after all, is the true art, the resemblance to the man himself and the surroundings that ought to go with the statue, than the men who sat in this controversy. This statue may be imperfect in some of its details of art, and as to that I know not, but here are General Sherman's own comrades. I have described General Dodge, the president of the Army of the Tennessee, upon whom devolved a trust of the most sacred character as president of that organization. Is it to be supposed for a moment that he would not exert every mental faculty he has for the purpose above every other of securing the best obtainable statue of his general in the Army?

Without going into the history of these men, I know that General Dodge followed General Sherman, as his subordinate commander, through nearly all the years of the war. He saw him in every phase. He marched with him from Chattanooga on the 5th day of May, 1864, if that is the year, through all the battles and skirmishes of the campaign of Atlanta, lasting sixty days, until that great stronghold was captured. He was the commander of a division and of an army corps. He was recognized both by

General Grant and General Sherman as one of the ablest generals on all those battlefields. Is it to be supposed that Gen. John W. Noble, who has held the high office of Secretary of the Interior, who is a man of the highest ability and character, would engage in juggling and tricking, as the Senator from Colorado says, with respect to a statue which is to commemorate the name and fame, imperfectly it is true, as any statue would, of that great general of ours who followed the fortunes of our war till the close? Is it to be supposed for a moment—I shall not go into details as to the character and standing of these men—that for some partisanship or by the exercise of favoritism they would betray the trust, as the resolution implies, by juggling with artists for the purpose of helping or aiding a favorite?

One member of the commission who participated in the award is General HENDERSON, of my own city, a man who for sixteen years has held the confidence of his constituents and the confidence of the other House of Congress, who lost a limb in the Army of the Tennessee, who was a gallant soldier, although not of as high rank as General Dodge. Is it to be supposed for a moment that he would go among the old comrades of the Army of the Tennessee, who in my State are almost as thick as the leaves in Vallombrosa, and tell them he has been guilty of a trick in making this assignment to Mr. Rohl-Smith, a distinguished artist? Is it to be thought for a moment that we will degrade these men by a resolution of inquiry, in a matter which is fully under their jurisdiction and not at all under ours, as to their competency and their honesty and their integrity and their ability, and as to whether they have been guilty of tricking an association of artists or any other association of men? Is it to be supposed that we will do this by putting these gentlemen under the ban of a resolution and checking their authority as respects this statue for six long months?

Mr. President, whatever others may do, I shall not vote for any such inquiry or for any such stigma upon the men whom I have described.

Mr. HAWLEY. Mr. President, I am very much obliged to my colleague, the Senator from Iowa [Mr. ALLISON], for he has practically set forth all that needs be said in this matter. I was aware of the fact that the Tennessee Army Commission met, and after a labored, conscientious act of worship, I might call it, in the selection of a statue, took a secret ballot. They found that four of them had united upon the statue of one man, the special merits of whose work in comparison with others they had not even discussed. I felt sore when I heard the Senator from Colorado [Mr. WOLCOTT], while disclaiming any reflection upon these gentlemen, yet use the words "trick," and "favoritism," or "friendship," in connection with them. All of you who have followed favorite leaders know with what feeling the committee of the Army of the Tennessee must have approached their task. They never did anything more seriously or religiously in their lives. They had in their mind's eye the 60,000 men who followed Sherman in his grand march, and the other comrades who had served under Sherman under various other circumstances.

The Senator from Colorado really gave away his whole case when he said that personal likeness is not called for or expected. What, then, is? An ideal soldier?

Mr. WOLCOTT. I said in the preliminary model; I beg the Senator's pardon.

Mr. HAWLEY. I think the Senator is just as much mistaken in applying the remark to the preliminary model as he would be in applying it to the final statue. How could the commission know which to select if the preliminary models did not suggest Sherman? The statue might as well be one of Moses or Napoleon as of Sherman. How were they to make a choice? Simply because of some graceful arrangement of what may be called the architecture of the statue? Undoubtedly the New York gentlemen might have given us quite an artistic design, but would it have been Sherman? I think not. I think they were seeking the ideal soldier.

Imagine, sir, the 60,000 veterans returned to us and marching through Washington as they did just after the war. Imagine them marching by our various statues here and cheering for Thomas, whom they would know at sight; cheering for McPherson and cheering for Scott, until by and by they came to something they did not recognize. They might say, "It is a very pretty work of art"; but "Who the devil is it?" would be the voice of the Army. Put up a statue that is Sherman—bust, shoulders, back, and head, and his whole pose, so that the soldiers would know it a half mile away, and the whole column would give a continuous roaring cheer as it marched by.

There is a mistake which many artists make when they suppose the great mass of mankind have no artistic taste. They have something that answers for it, though not set forth in the language of critics. I say put a half dozen of statues side by side on a street of a great city, leave there a ballot box, and for twenty years let every man who goes by vote, and in the end the true artists and the people, in my judgment, will ultimately elect the greatest work. Why are works of art immortal? Because they touch the common and universal heart. Apply an analogous test elsewhere, and Homer, Shakespeare, Bunyan, and Burns, Raphael, Rembrandt, Beethoven, and the whole glorious company would be the elected of the people, and not of the art critics only. Why? Because there is in the humanity of men of all centuries and places something that responds to the lovable, noble, and grand, in picture or statue no less than in the living form.

No; I want a popular statue in the true sense of the word, not selected by the votes of idiots or of men who hated Sherman, but by the votes of the great mass of the people, and I have not the slightest doubt on earth, without having seen the competing statues, that these five old soldiers, worshipers of Sherman, have selected a statue which the whole Army of the Tennessee marching by would have chosen out of this group.

I will not set even such honorable gentlemen as the three who are on our Library Committee—our friend the Senator from North Dakota [Mr. HANSBROUGH], our friend the Senator from Rhode Island [Mr. WETMORE], and our friend the Senator from Indiana [Mr. VOORHEES]—to "inquire into the facts and circumstances connected with the late award," as the resolution proposes. We have had the record before us, and therein are all the "facts and circumstances" I want, unless it is to be intimated that there was something wrong, ungentlemanly, unmilitary, dishonorable in the conduct of the gallant soldiers and gentlemen of the commission. There was not. That is an absolute impossibility, and you here who know these men at all would stake your lives that the work was done honorably.

No, sir; we do not want a statue of which people can say: "That is splendid, but it is not Sherman; oh, that is a fine, ideal soldier; it might be the ideal of the American general, but it is not old Tecumseh." I shall vote against the resolution, of course.

Mr. MILLS. Mr. President, it seems to me that we would make a mistake in adopting the resolution or in attempting to undo what has been done in obedience to law.

As my friend the Senator from Iowa [Mr. ALLISON] said in the beginning of his remarks, this is an appeal to the wrong jurisdiction. If the law has been violated the courts are open to those parties, and I very much question whether Congress has the right to deprive Smith of this work after it has been awarded to him in terms of law. Congress is a very strong body, but it can not ride over everything. There are courts which can call it to account. Suppose the man who has obtained the award should go into court. Of course he can not sue the Government, for nobody can sue it; but he can sue these parties. If the contract has been disregarded, if they have committed a breach, he can hold them responsible.

The other House of Congress a few years ago undertook to violate the constitutional right of a citizen of the country and to compel him to testify as to a matter about which Congress had no jurisdiction to inquire. He refused to testify. The House of Representatives ordered its Sergeant-at-Arms to incarcerate him. He could not sue the Government, but he sued the Sergeant-at-Arms for violating his rights as an American citizen, and he obtained a judgment of $50,000 against the Government for it.

Mr. MITCHELL of Oregon. Will the Senator from Texas allow me?

Mr. MILLS. Certainly.

Mr. MITCHELL of Oregon. The Senator has stated and reiterated two or three times that a citizen can not sue the Government. If any right exists here at all which has been violated it is a right under a contract, either express or implied, and the man can sue the Government.

Mr. MILLS. We may consent that the Government may be sued.

Mr. MITCHELL of Oregon. It may be done without consent. There is a law.

Mr. MILLS. He can go to the Court of Claims and present something, but it is a fundamental principle in all governments that the sovereignty can not be sued except with its consent. I say that this man has a legal right to compel the performance of the contract against the parties, the commissioners whom Congress has appointed.

But leaving that clear out of view, here comes up another question. Whom should we consult in giving the contract for building the statue of this very great man, a great military chieftain? I have always thought that the families had some interest in it, and while I was a member and chairman of the Committee on the Library I had to decide in two or three cases. I remember to have joined with the Secretary of War and another in awarding the Hancock statue, and I said at the start that the family of General Hancock were the best judges of what was a proper representation of him, and that was my vote. Again I had to decide in awarding the statue of General Logan. I said to Mrs. Logan, here in an adjoining room, "You have a right to be consulted about the

statue that is to represent your husband, as well as the people of the United States, the statue of one of their greatest citizens"; and I said, "My voice shall be to give the award to the man whom you select"; and that was done.

Then I was by law made a member of the committee which had to award the statue to General Grant. The Grand Army of the Republic, I believe, made a contract for a statue of General Grant and sent it to Washington. I said, "I can not accept it unless General Grant's family come here and say they are willing to accept this statue as a representation of the husband and father." When Mrs. Grant came she said it was about as much like her husband as anybody else in the United States, and I think that would have been the judgment of everyone who has ever seen General Grant.

Now, if I had anything to do with this matter, I should say, "Consult the family of General Sherman as well as the soldiers of the Army"; and the very last people whom I would consult on this earth would be a board of self-constituted artists in this country who have arrogated to themselves to know about all the art in the world. I should have said to the venerable brother who has known him from his infancy, "You are a very good judge as to whether this represents truly the features of General Sherman"; and so as to his children. As to the Army of the Tennessee and the soldiers and the subordinates under Sherman who followed him, I would say to them rather than this art commission, "You are the proper judges of the statue that is to represent the great commander of the Army of the Tennessee."

Mr. WOLCOTT. Mr. President, at the outset of the remarks which I made I distinctly and emphatically disclaimed any personal allusions of a derogatory character to the officers of the Society of the Army of the Tennessee who passed upon this statue. Every member of the Senate fully understood what I said. The Senator from Iowa [Mr. ALLISON] understood fully what I said. It suited the fervid character of his defense of General Dodge that he should assume that I had said something of him that was unkind. I did not. I was careful not to do so, for I have no sentiment toward him in connection with the matter or toward any of the officers of the Society of the Army of the Tennessee who passed upon it which could affect their character. The Senator from Iowa understood that, and of course it is unfair that I should be called upon again to disavow it.

Mr. ALLISON. Will the Senator yield to me for a moment? I spoke of the resolution and not of what the Senator said.

Mr. WOLCOTT. The Senator spoke of my speech. I certainly did not do that. It yet remains true that the 26 men who competed for the statue were led to compete by a statement that their models were to be passed upon by a committee of artists, and it is equally true that in the final award of the monument the recommendation of the artists was utterly repudiated and ignored, and the award was made finally without consultation with and the advice of these artists when the different sculptors were assured that the artists would pass upon the models.

My own share in the whole question is unimportant. To me personally the matter is of but slight importance. I was led into its investigation by some inspection of the models and by some information as to the peculiar circumstances which surrounded the award. The character of the three gentlemen, Messrs. St. Gaudens, Ward, and French, who were called upon to pass upon the models is above reproach. No suggestion that the Senator from Iowa can make as to the character of St. Gaudens will be believed by anybody who knows him.

Mr. ALLISON. I make no reflection upon his character—not in the slightest degree.

Mr. WOLCOTT. I understood the Senator from Iowa to adopt a newspaper statement published in a paper in New York and copied into a Washington paper this morning, in which St. Gaudens is alleged to have been governed by malevolent motives and to be a personal enemy of the sculptor who was awarded the contract. The high character and attainments of St. Gaudens can not be smirched. He stands to-day one of the leading sculptors in the world, one of the best minds and most honorable men who have ever graced art in this or any other country.

It is easy enough to say that this was an appropriation by the Army of the Tennessee, but it was not. The Army of the Tennessee raised $16,000 for a statue. The Congress of the United States appropriated $50,000 for a foundation and the pedestal, and then afterwards, when the Army of the Tennessee could not raise money enough to build the statue, the Congress appropriated as follows:

For the completion of the equestrian statue of Gen. William Tecumseh Sherman, $30,000: *Provided*, That the statue shall not be located upon the Capitol Grounds.

There, Mr. President, is $30,000 appropriated by Congress for the statue itself as against $16,000 appropriated by the Army of the Tennessee. After this appropriation was made the Fine Arts Federation of New York, which is an association composed of the National Academy of Design, the New York Chapter of the American Institute of Architects, the Architectural League of New York, the Society of American Artists, the American Fine Arts Society, the Municipal Art Society of New York, the National Sculpture Society, the Society of Beaux Arts Architects, the Mural Painters, and the American Water Color Society, through its president, Russell Sturgis, became interested in the matter, and a petition was sent to Congress, signed, among others, by Russell Sturgis, president; by Mr. Ward, by Mr. C. T. Cook, by Farnhan, by Kunz, by Daniel C. French, by Thomas B. Clarke, by St. Gaudens, and by Olin S. Warner, protesting against this action.

I realize that what I have said will have little weight in the determination of this matter, but I do desire to enter my earnest protest against this method of disfigurement of the city of Washington and to say to the Senate that it will be many a year before these artists, whom the Senator from Texas [Mr. MILLS] says have arrogated to themselves some knowledge of art which other people do not possess, will again interfere with the proposed action of Congress. They were invited here to pass upon this question. They met and they passed upon it, disinterestedly and intelligently and fairly, and their recommendation was brushed aside as if it had been a feather.

Mr. HAWLEY. Will the Senator from Colorado permit me to make a single remark? They were never asked to decide the matter.

Mr. WOLCOTT. The circulars gave every indication of an intent that their action should decide the matter.

It is said, I do not know how truly, that the successful artist includes upon his panel the pictures of the six judges who passed upon the fitness of his statue. The others do not. I know that the action of this body of artists was intelligently and disinterestedly given, and under the terms of the offer should have weight.

The subject is one which Congress should investigate. It is true that the soldiers of the Army of the Tennessee selected some other model. Their judgment should not stand for all time. This monument will stand either to beautify or to degrade the capital city of the country, and an investigation of this matter can do no harm and can bring but brief postponement.

In the interest of what I believe good morals I have introduced the resolution. I shall call for no division upon it. I do not anticipate its passage. But I desire to put upon record the protest of the honorable and high-minded men who were invited to determine as to this work, and whose recommendation was ignored and brushed aside.

Mr. HAWLEY. Just a word, Mr. President. The Senator from Colorado seems to assume that the statue is wholly unworthy because he speaks with apprehension of its disfiguring the capital. Who of us has seen and studied the statue? I have not for one. I should be very glad to do so. But I think that under the circumstances, upon the close examination of all kinds and classes of men, certainly it will be bound to be not a discreditable statue. I should add what the Senator from Iowa [Mr. ALLISON] says to me, that it does not appear that any one of the artists in question has seen the statue as finally adopted.

The VICE-PRESIDENT. The question is upon agreeing to the resolution submitted by the Senator from Colorado [Mr. WOLCOTT].

The resolution was not agreed to.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

The VICE-PRESIDENT. The Chair lays before the Senate the action of the House of Representatives on the District of Columbia appropriation bill, which will be read.

The Secretary read as follows:

Resolved, That the House recede from its disagreement to Senate amendment No. 99 to the bill (H. R. 5210), making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes, and agree thereto with an amendment as follows: In lieu of the matter struck out by said amendment insert the following:

"*Provided further*, That the service of electric lighting in those streets and places west of Rock Creek now lighted by arc lights, and necessary extensions of said service, shall be let, after due advertisement, to the lowest responsible bidder, but no contracts shall be made for such lights at a price exceeding $100 per lamp per year for each arc light of candlepower equal to or greater than that now furnished; and

"*Provided further*, That the Commissioners of the District may, under such reasonable restrictions as they may prescribe, authorize any existing electric-light company, organized under the laws of the District of Columbia, to maintain and use its existing poles and lines and extensions thereof, either overhead or underground, in places outside of the fire limits of the city of Washington, and by underground conduits only inside the said fire limits, such lines not to be extended in any part of the District of Columbia except in that portion of the same lying west of Rock Creek.

"*Provided further*, That from such lines as may be maintained or established under authority of this act electricity for lights and power shall not be sold to any consumer at rates exceeding 87 per cent of prices charged generally in the city of Washington for such lights and power on the 1st day of January, 1896; and

"*Provided further*, That the District fire-alarm and messenger service may be established along the overhead or underground lines hereby authorized to be maintained and constructed, without charge for pole rent or conduit rent to the District."

The VICE-PRESIDENT. The question is on concurring in the amendment of the House of Representatives.

Mr. TELLER. That is a matter of some importance and I think the Senate should understand what it is.

Mr. ALLISON rose.

Mr. TELLER. I do not desire to discuss it. The Senator from Iowa will make a statement to the Senate.

Mr. ALLISON. I do not desire to discuss the amendment at length. The situation as respects the amendment is that the House, after adopting the conference report which has just been read, receded from one of their amendments to which the Senate had disagreed, with an amendment which is, I believe, what has been read at the desk. I have seen that amendment in the RECORD this morning. I am not sure that the RECORD contains what has been read, but the subject-matter of it is one which the conferees on the part of the Senate, I think I may say truthfully, have not the knowledge they should have in order to deal with a matter of so much importance. It is important legislation tacked on, if I may use that word, at the last moment in the House, making new provisions and new arrangements respecting electric lighting in this city. I am told, though I am not certain as to the matter, that this very subject has been under examination and investigation by the two District Committees of Congress during nearly the whole of the session, and that there are now bills on the Calendars of both Houses dealing with the subject. I regret for one that it has been at the last moment and in the expiring hours of the session brought forward in an appropriation bill, where it must be considered, in the nature of the case, imperfectly.

Mr. PLATT. I should like to have the amendment read to which this is an amendment, if it can be found.

Mr. ALLISON. The effect of it is to strike out the words inserted by the House in what is called amendment numbered 99, and insert in lieu thereof the words which have been read at the desk.

The VICE-PRESIDENT. The Chair will state that the question is upon agreeing to the House amendment to Senate amendment numbered 99.

Mr. PLATT. What is Senate amendment numbered 99?

The VICE-PRESIDENT. The amendment will be read.

The SECRETARY. Strike out all after the word "Washington," in line 19, page 17 of the bill, in the following words:

Provided further, That the entire service of electric lighting authorized under this appropriation shall be let, after due advertisement, to the lowest responsible bidder therefor: *Provided further*, That no contract shall be made for electric arc lighting at a price exceeding the rate hereinbefore specified.

Mr. PLATT. That was a part of the original bill.

Mr. ALLISON. It was in the original bill. Those words were stricken out by the Senate, which constituted amendment numbered 99.

Mr. PLATT. And now the House strikes out and inserts.

Mr. ALLISON. This amendment strikes out those words and substitutes other words. It was stated that that could be done under their rules. Of course we can not deal with their rules or modes of procedure.

Mr. PLATT. That is to say, the House technically proposes to amend a Senate amendment?

Mr. TELLER. Yes.

Mr. PLATT. It does not really amend it, but technically and pro forma it says that it amends a Senate amendment by substituting something entirely different.

Mr. TELLER. The House recedes from its disagreement to our amendment with an amendment.

Mr. PLATT. Now, what is the situation in the Senate?

Mr. TELLER. I understand that if the Senate should agree to this amendment it is not a matter for the conference committee. If the Senate disagree to it, then the matter is before the conference committee. That is the parliamentary situation, as I understand it.

Mr. PLATT. What does the chairman of our conferees recommend? Does he recommend that the Senate shall agree to what the House has done or disagree to it and put it into conference?

Mr. TELLER. On that point I do not desire to make any recommendation at all, so far as I am concerned. It is a matter of very sharp disagreement between the members of the Committee on the District of Columbia; it is a matter that has been contested very hotly by citizens of the District, as to the putting up of electric lines on poles, and so forth, and it is a matter that the Senate must determine, as far as I am concerned.

Mr. FAULKNER. I suggest to the chairman of the committee whether it would not be better for the Senate to disagree to the amendment, so as to put it into conference and let the question come up before the conferees of the two Houses, so as to hear the views of those who propounded the amendment as to the propriety of its adoption. I question the propriety, of course, of putting any kind of legislation of this character as new matter on appropriation bills. I should myself be opposed to it on that ground, although I favored a similar bill in substance in the report I made from the Committee on the District of Columbia. It involves the question of overhead and underground wires and other detailed legislation that I think is very important to the District. I do not know exactly what the amendment is. As far as I could catch the reading, it seemed to be somewhat on the line of the bill that we reported. It strikes me the best course to pursue would be to disagree to this proposition and let it go into conference, and then our conferees can make some recommendation to the Senate.

Mr. TELLER. So far as the conference is concerned, we have had this matter under discussion in every phase. In the first place, something similar to this was put in the bill by the committee. It went out on a point of order in the Senate. Then the conferees on the part of the House insisted that we should reinstate it, but the parliamentary situation was such that we had no right to do that, and we declined to do it. But the committee go to the House, and while I suppose it may have been perfectly proper, I did not suppose the House could do it; yet they disagreed to their disagreement and agreed to our amendment with an amendment, and here it is. It raises the whole question whether the Senate is willing now to say that in this outside section of the city, beyond the fire limit, poles may be put up upon which electric wires and telephone wires and other things of that character may be put. There was a very decided protest by the citizens of Mount Pleasant and other sections against the provision the committee of the Senate put in the bill, and that went out on a point of order. For that reason I think the Senate had better deal with this subject, not in a pro forma way, but determine what they want to do with it.

Mr. GALLINGER. Mr. President, it strikes me that perhaps this is as good a time as will present itself for the discussion of the questions involved in this amendment. I am on record as being opposed to this proposition in a bill that is now before the Senate, and I certainly am more strongly opposed to it, if that were possible, when it is proposed that this general legislation shall be incorporated in an appropriation bill.

The matter was before the committee of conference on an amendment made by the Senate striking out certain language which was in the original bill. It went back to the House yesterday on a disagreement. I presume it is competent and proper that we may allude to the other branch of Congress in a matter of this kind. A motion was made that the House should recede from a certain amendment in conference and incorporate an entirely new provision, and that that should be sent to the conference. The point of order was made against it. It was ruled out of order, but not by the Speaker of the House, he not being in the chair at the time. A motion to reconsider was made, and that likewise was ruled out of order, and the amendment thus adopted is sent here for our consideration.

Mr. President, I think we would better talk plainly about this matter. I propose to do so, but shall endeavor not to say anything in connection with it that is not warranted by the record.

For one, I dislike exceedingly to be put in the attitude of criticising the Commissioners of the District of Columbia. It is well known to the Senate that I have not any great regard for the form of government that we have in this District, and I especially have not very great regard for a form of government that gives us three Commissioners, and while the National Government pays one-half of the taxes, no one of the Commissioners is appointed from the territory outside of the District of Columbia unless the engineer officer can be so considered. I say I dislike to criticise the Commissioners of the District in connection with this matter, and yet I apprehend, if it is to be discussed frankly, freely, and openly, some criticism will be necessary.

In reference to this matter, I am going to read from the Washington Times of this morning, and while I am not prepared to say that I indorse every word that I shall read, I do indorse the sentiment of the articles, one of which I find in the news column and the other in the editorial column. The Times says in its news column:

Every member of this Congress knows that there was an old electric-light company in Georgetown which failed in business. Its assets consisted of some old poles, wires, and other things. The purchase of these was made by Messrs. Crosby and Lieb, but it is apparent to any business man that they could not do business satisfactorily or profitably where the old company had failed and gone into the hands of a receiver. It has been stated in this connection that Mr. Crosby was an old friend of Major Powell, and he soon became a business friend of Mr. Truesdell.

The sale of the old electric-light company was effected to Messrs. Crosby and Lieb in November last. It was understood at the time that the field of operations would of course be Georgetown, but the cloven foot became visible by a mere accident.

THAT ECKINGTON PLANT.

Mr. Truesdell had erected an electric-light plant in Eckington to give value to his property there. A great deal of the property had been sold, and it is believed that the electric-light plant having served its purpose was becoming a dead loss to him. It is certain that he desired to sell, from the fact that he offered it to the United States Electric Light Company. Mr. Truesdell's offer was rejected. He then entered into negotiations with Messrs. Crosby and Lieb and succeeded in selling to them the property.

In order that the property could be of any value to Messrs. Crosby and Lieb, as it was confessedly not paying Mr. Truesdell, certain concessions of territory were necessary from the Commissioners, and these were at once forthcoming.

An innocent-looking paragraph appeared in the Times in December reciting

the fact that these gentlemen had been granted a permit by the Commissioners to string wires from Georgetown to Eckington. Whether or not this was a part of the agreement in the sale of the Truesdell plant is not known, but the facts followed each other in logical sequence. This permit was granted in violation of the general law of 1888 against the stringing of overhead wires, and Major Powell admitted on a hearing that such permit was contrary to that law.

The United States Electric Light Company intervened to bring this infraction of the law to a settlement, and the proceedings resulted in a decision by Justice Bingham, which has not been controverted, that the acts of the Commissioners were illegal. It was such a clear case that the Commissioners did not enter an appeal.

HAD OTHER RESOURCES.

To carry out any favors for the Potomac Light and Power Company, then, required the intervention of Congress. The law was declared against the company, but they did not take down their poles or abandon their fight, and solely, it now appears, because there were other strings to be pulled and schemes to be hatched. The whole history of the transaction indicates to most people that the Commissioners were bound to make good some occult agreement with the gentlemen to whom Mr. Truesdell had sold his nonpaying plant.

This view has some ground more than conjecture for its belief from the fact that when the court had decided against the company it was given out that they would shut off the light in Eckington. It was necessary that they should be paid for this work by somebody. The next thing heard of the Commissioners recommended specific sums for the electric lighting of Eckington, which, if realized on, would of course go to the Potomac Light and Power Company. It resulted in the passage of an appropriation of $500 for such lighting.

In the meanwhile the Commissioners, to have certain other strings to their bow, approved of certain bills conferring certain rights on the company, and these have been permitted to slumber for a purpose that is now evident. It was thought that the scheme had been abandoned.

As a last-ditch movement there was an effort made to give the Commissioners power to grant permits to electric light companies, but the true object stuck out several feet when the proposed amendment included one to validate the permits heretofore granted by the Commissioners. This latter clause was an open confession that the "heretofore permits" were absolutely illegal.

The same paper in an editorial used the following language:

The present Congress has shown an unpleasant disposition to be very niggardly in its appropriations for the District of Columbia.

That can hardly be said to be true so far as the Senate is concerned, I think.

The back-door electric legislation successfully rushed through the House of Representatives yesterday adds insult to injury. This amendment, tacked onto the conferees' report on the District bill, will, if finally enacted, foist an irresponsible, illegal, trolley-tainted, dishonorably begotten, monopoly-nursed, and street-disrupting concern on a municipality and a District already suffering too much at the hands of its Congressional guardians. The Times refers to the Potomac Light and Power Company and the passage by the House of the amendment granting it franchise and privileges.

Outside of all questions of municipal welfare, the ultimate success of such outrageously sneaking methods as were used by the official steerers of the scheme seems impossible from the standpoint of parliamentary probity. Since when do conferees originate legislation?

It appears that the Congressional gentlemen whose interests were in the * * * amendment were perfectly willing to recede from their economical ideas on several contested items in the District bill in order that this pet pernicious project might be pushed to a vote. It was then brought into the House at a time when a minority was attempting to filibuster and a majority was attempting to proceed with the business of the day. For the credit of the House as a whole, the vote should not be considered as indorsing the opinion of the majority on the question at issue.

The Times stands for cheap electric light and power, and does not want the District put in the hands of a mammoth monopoly whose tentacles grasp over fifty cities. When the Senate conferees submit the District bill to-day it is to be hoped that this tailpiece of new legislation will again be ruled out of order or voted down, once and for all.

Mr. President, I said a moment ago that I did not accept or approve every word or every expression that is used in the articles which I have read from this enterprising morning daily published in the city of Washington, but I am prepared to say that in my judgment—I may be wrong about it—it presents the question that is now before the Senate in its true light, and that we are as well prepared to-day as at any time to pass upon it.

Mr. President, the United States Electric Lighting Company, which is the established corporation in this city that is furnishing electric light to the people and the Government, so far as I know, has up to the present time conducted its business without any serious fault-finding either upon the part of the citizens of the District or of the Congress of the United States. There have been numerous protests filed; public meetings have been held; hearings have been given by the committees of both branches of Congress, and the matter has been discussed in both Houses in regard to the alleged exactions of the gas company of this District, but, so far as I know, no complaint has ever been urged in Congress or elsewhere against the existing electric lighting company. It may have received more for its product than it ought to have received; it may be a monopoly in the ordinary acceptation of that term; but nevertheless the fact stands that this company has for a long period of years furnished electric light to the people of this city and to the Government, and no fault has been found either with the services it rendered or with the price that it asked or received for its product.

It is well for us that we should keep that matter in mind, and it is well for us likewise in this discussion to remember that the United States Electric Lighting Company, when it commenced business in the city of Washington and for a long number of years afterwards, had an overhead electric system, a cheap and inexpensive system as compared with the modern system that we have in this city now, the wires being placed in underground conduits and the overhead electric-wire system forever abandoned.

In 1890 and 1891, if I remember correctly, the Congress of the United States required this electric lighting company to change its system from overhead to underground wires. The company cheerfully and without hesitation proceeded to do that. It has been suggested in certain quarters—I will not argue that now—that the company, having a charter, having vested rights for a system that had been established for a great many years, might have contested the right of Congress to compel it to change its system. I apprehend the company would have lost if it had made the contention, but the company did not make that contention. It proceeded to put its wires underground, and it did so at a very heavy expense. I think I am correct when I say that the cost of the overhead system of electric lighting is only $219 a mile for construction, while it has been asserted and never contradicted that the cost of the underground electric system is $11,797 a mile. As against $219 a mile for overhead electric lighting, it costs to place the wires in a conduit $11,797.

Now, this company, I am informed, has at the present time 41 miles of wires, and it cost to place those 41 miles of wires under ground $483,677, and in addition to that the company threw away the investment it had made in the overhead system.

I think that when we are dealing with a corporation such as this, that has made this large investment because Congress asked it to make it, that has a very large amount of money invested in its plant, the stock of which is owned by the citizens of the District of Columbia almost exclusively, Congress should hesitate before interfering to destroy the revenues of the company by permitting another corporation to come in and string overhead wires and become a competitor of this established company, and especially so when the new company represents capital outside of the District of Columbia, and which is being backed by very wealthy syndicates (I will not name them, they are known), that are controlling, by a system of monopoly such as the District of Columbia never has suffered from, the electric lighting of a great many cities of the country—I say we should hesitate before permitting legislation, especially to be put on an appropriation bill, that would give these rights to a foreign company, and that would imperil the prosperity and the dividends of this well-established company, which has given such excellent service and which has satisfied the demands of the people of this District and of the Government in the years that have passed.

In addition to the large cost of putting the wires under ground, it must likewise be remembered that the cost of maintenance for an underground system is very much larger than for a system that is erected on poles. I take the figures I find on this point, I will confess frankly, from a publication issued by the United States Electric Lighting Company. They may not be absolutely accurate, but, so far as I know, they never have been controverted. It is shown that to keep in order the item covered by the term "cost of maintenance" of an overhead system it costs $43.80 a mile per year, while the underground system costs $886.22, or $842.42 more than the overhead system.

This company has been called a monopoly. If I were at liberty to read from utterances in a certain other body delivered yesterday, I think I could persuade the Senate that some very startling misrepresentations have been made in this respect. It is said that this company is getting too much for the electric light it is furnishing the city and the Government, and a determined effort is being made to compel the company to furnish electric lighting for a sum very much less than is paid in any other city in the American Union.

I called attention the other day to the fact, and it is well to repeat it, that at the recent national electrical convention held in New York City last month, at which 10,000 electric lighting companies were represented, either by delegates or by letters, it was shown that the average price of the electric arc lights, overhead wires almost exclusively, is 41.7 cents per night, while this company receives only 40 cents by current law, but only actually about 36 cents, because of excess of lamps over appropriations.

Now, it is proposed, on an appropriation bill, not in a bill that has received the consideration of the committees of Congress in the usual way, but on an appropriation bill, to practically charter a new electric-light company in this city with overhead wires to compete to some extent—it may be denied that they will compete, but I assert to some extent—with the existing company, which, in response to the wishes of Congress, made a very large investment to change its system of overhead to underground wires, and which by so doing was loaded with a greatly increased charge by way of interest, cost of maintenance, and so forth.

I assert, and I think every member of this body will agree with me in the assertion, however inconsistent we may be when it comes to the matter of legislation, that an appropriation bill is no place for legislation such as is now before the Senate. This very proposition, or a proposition involving precisely the same principle, was ruled out of the Senate on a point of order only a few days

ago, and now it is proposed to bring it back here by some legislative legerdemain and ask us to adopt it and allow it to become a law.

The Senate may do that, Mr. President, but for one I shall never cast my vote for a proposition that stands as this stands before the Senate, and one which, in my opinion, is not worthy of the serious consideration of this body.

If we are to incorporate a new electric-light company in this District, and that has been proposed, or at least it has been proposed to extend the rights and privileges of an electric-light company which has a quasi incorporation—I say, if that is to be done, let us do it in the regular and orderly way. Let the friends of the measure pass a bill through Congress if they can do so. But I appeal to the Senate not to allow this thing to be done on an appropriation bill. And it is well in this connection to recall to the Senate the fact that a proposition to give these increased privileges to this corporation which is seeking to find a lodgment in the District is now before both Houses of Congress and under consideration. I think I am correct when I say that in the other House the bill has not yet been reported by the committee, while in the Senate it has been reported, a majority and a minority report having been made, and it is now upon the Calendar of the Senate.

So I say if this legislation is to be granted at all, if these rights which this new company seeks are to be acquired, backed as it is by unlimited foreign capital, imperiling, as I believe it does, the existing company, which is owned in the District and the stock of which is held by the people of this District, let it be done in a straightforward, manly way, by passing a bill through both Houses of Congress, and not give them these rights upon an appropriation bill in utter disregard of the rules of this body, and, as I believe, in utter disregard of the rules of the other House of Congress; certainly, Mr. President, in utter disregard, as I look upon it, of the principles of equity and justice which should govern the Congress of the United States in dealing with corporations which have vast sums of money in plants in this District, and which have always responded to every demand of Congress to improve their facilities and to give better service if they were not giving as good service as was required before.

It must likewise be remembered that the United States Electric Light Company, which is the established company to furnish electric lights in the District of Columbia, is absolutely under the control of Congress. It can be commanded to do this or do that, and it has to do it. Their service must be of the best if Congress demands it. Their cost of furnishing lights will be from year to year precisely what Congress fixes upon; and why we should, in the face of that fact, by legislation on an appropriation bill, strike a blow at the interests and prosperity of that company surpasses my comprehension.

Mr. President, I do not care to talk about this matter at great length. I have very decided opinions on the subject, and I am glad to say that only two or three years ago the District Commissioners entertained precisely the same views that I entertain at the present time. I filed a minority report here on the bill which proposed to incorporate this company or to give it these added rights, and I quoted in that report, which I commend to the careful consideration of every member of this body, a written opinion of the District Commissioners against granting similar rights to another foreign corporation which came here two or three years ago and asked to be incorporated. The Commissioners then stood for the interests of the existing company; the Commissioners then said it was bad policy to allow foreign capital to come in here to tear up our streets, to put in electric lighting, whether by underground or overhead systems, and to endanger, as they said, the revenues of the existing company, the stock of which was held by the people of the District of Columbia. They seem to have changed their minds on this matter. I have not changed mine since the time a bill was reported carrying out the recommendations of the Commissioners.

At my request a copy has been placed in my hands of a communication just addressed to the conferees on the District appropriation bill, which covers the matter in controversy so completely that I will take the liberty to read it; and with that what I have to say on this question will come to an end.

This is a communication from the president of the United States Electric Lighting Company; and I think he has made a statement so frank, so honorable, so straightforward that it is well that every member of the Senate who is doing me the honor to listen to me at the present time should have it before him for consideration:

On behalf of the United States Electric Lighting Company and in answer to representations made upon the floor of the House, in consequence of which, as I am informed, the House has agreed to strike out of the bill the paragraph with reference to the advertisement for public electric lighting, etc., found upon page 26, and in lieu thereof to insert the provision heretofore excluded from said bill practically granting a franchise to the Potomac Light and Power Company, I have the honor to submit the following:

1. The claim that the Potomac Light and Power Company is in possession of a plant lying principally west of Rock Creek which supplies territory not now occupied by the United States Electric Lighting Company is not in accordance with the facts. The whole plant of the Potomac Company is entirely an overhead system, and as to that portion of it lying west of Rock Creek, in the city of Georgetown, is and has been at all times paralleled by the underground system of the United States Company. In other words, the United States Electric Lighting Company has a complete and perfect underground system capable of supplying and actually supplying all the demand for either public or private electric lighting wherever in this territory the Potomac Company has the objectionable overhead system.

2. In the construction of the respective plants in this territory the United States Company has expended for every mile of service over $10,000, to $250, or thereabouts, expended by the predecessors of the Potomac Company. The cost of maintenance of the two systems is relatively about the proportion of the above figures.

3. The objectionable overhead plant of the Potomac Company, as has been decided by the courts of the District, was erected in violation of law, and has been so maintained since its erection. Its existence has always been, and is now, in violation of the act of July 18, 1888.

4. The amendment as proposed by the House discriminates in favor of this cheaply constructed and objectionable overhead system, prohibited by law, against the legal and acceptable underground system of the United States Company, which has been constructed at forty times the cost of the other. The amendment, in fact, legalizes an objectionable overhead system, occupying a portion of the city of Georgetown, previously and now covered by the United States Company with underground conduits.

5. There is no portion of the territory in question in the city of Georgetown west of Rock Creek which can not be supplied or is not now supplied by the United States Company by means of these underground conduits.

6. So far as any other portion of the District of Columbia is concerned outside of the territory above mentioned the United States Electric Lighting Company has always extended its service in accordance with law to meet all demands, and stands now ready to extend such service to meet all demands, by the approved and accepted underground system. To effectuate such an extension at Mount Pleasant and Columbia Heights the United States Company has had for months past an application before the Commissioners of the District asking for a permit to extend, at the request of the residents, its underground system into those localities.

Mr. President, I want to emphasize the statement there made. The argument has been used, and the argument will be used, that the existing company refuses to go into the suburbs to give electric light to citizens when they demand and ought to have it. The fact is that there are applications for permits on the files of the District Commissioners to-day to extend the lines of the existing company into certain outlying districts which have not been granted, and which presumably will not be granted so long as the contention that another company shall have the territory is before Congress.

7. Our company has always been willing to occupy and anxious to occupy all the territory in the District of Columbia with its underground system wherever demand was made for lighting by the public.

8. In the establishment of its present plant our company has expended an amount largely in excess of $1,000,000, three-fourths of which has been invested, at the demand of Congress, in its expensive underground system. On the other hand the total investment of the Potomac Company is represented by the purchase of the old Georgetown plant, which we have repeatedly asserted in court and elsewhere, without contradiction, to have cost them but about the sum of $4,700, and the so-called Eckington plant, which we have likewise asserted, without contradiction, to have cost them not to exceed $25,000, if, indeed, this last-mentioned plant has ever been paid for at all.

9. The United States Electric Lighting Company has never had sufficient time before the Appropriations Committee of either House to present the respective rights and equities of the two companies in respect to the question of admitting the Potomac Company to a franchise in the District. Indeed, it has never supposed that that question was a proper matter for legislative action by the Appropriations Committee of either House. The full and courteous hearing extended by the subcommittee of the Senate Appropriations Committee was understood to be limited to the question of the price for public lighting, and not to embrace questions of legislation. As a matter of fact, the Appropriations Committee of the Senate, now called upon to recommend legislation in this regard, has never heard the claims of the United States Electric Lighting Company in that regard.

10. The subject sought to be legislated upon by this amendment is now pending before the House Committee on the District of Columbia unacted upon therein, and it has already been before the District Committee of the Senate, with the result of disagreeing reports, which reports are now before the Senate unacted upon. In this situation of affairs we submit that important legislation of this kind should not be incorporated into an appropriation bill. On the contrary, it should be left to the deliberate judgment and consideration of both Houses of Congress, through the medium of the proper legislative committees.

11. The United States Electric Lighting Company is willing to accept the House figures for public arc lighting, as we have already proposed, providing our company can have a contract for five or more years.

12. The United States Electric Lighting Company stands ready to take off the hands of the Potomac Company at its actual cost to them with interest at 6 per cent to date, and other incidental expenses, all the plant now owned or possessed by said Potomac Company in the District of Columbia, and with proper authority from Congress to light every portion of said District as Congress may direct. It desires to do this through the underground system in every settled portion of the District.

Respectfully submitted.

A. A. THOMAS,
President United States Electric Lighting Company.

Mr. President, this question, it seems to me, is a very simple one. It is whether, when bills are before both Houses of Congress which propose to give a practical charter to a new electric-light company, or at least to give it greatly added privileges and powers, we should permit general legislation of this kind to be placed upon an appropriation bill, and especially so after the matter having been once presented to the Senate was ruled out on a point of order, and which it is now proposed to bring again before the Senate by some sort of legislation, which I confess I do not myself undertake to explain or to understand.

If a matter before a committee of conference can go to either House, and they can strike out a proposed amendment which is properly in conference, and can incorporate a provision of new

law into the bill, and can send that proposition back to conference, why, it seems to me, Mr. President, that the Congress of the United States is absolutely powerless when it puts its business into the hands of conference committees, and that we never can know when either House of Congress takes action upon a proposition in contravention of the rules of the House of which we happen to be members whether or not that same proposition will not be presented to us in some other form, and that we shall be compelled to accept it or reject the conference report. Possibly in the closing days our only relief may be to reject the matter absolutely and thus defeat the bill.

Mr. President, I think if I were a member of that committee of conference—I will not undertake to instruct those distinguished Senators as to their duty in this matter—but I say if I were a member of that committee of conference, before I would permit a proposition of this kind to be forced upon the Senate I would allow the question of electric lighting to go by the board for twelve months; aye, I would let the bill itself fail to become a law.

Mr. HARRIS. Mr. President, I regret that the Senator from New Hampshire has deemed it necessary or even proper to indulge in the criticism he has done upon the Commissioners of the District of Columbia; but I do not think such criticism, even if justifiable or true, both of which I deny, has any material bearing upon the question now pending before the Senate; nor shall I notice that phase of his remarks further than to say that I have served on the District Committee for the last nineteen years; I have known the present Board of Commissioners since the beginning of their respective terms, and one of them for many years before he became a Commissioner; and from the intercourse and knowledge that I have had of those gentlemen I stand here prepared to say that I would trust their integrity and their patriotism as far as I would trust that of myself and my associates on this floor. Like ourselves, they may sometimes commit errors or mistakes; but, I repeat, their integrity of purpose, their fair dealing, and their patriotism I would trust as far as I would that of my associates here.

The questions involved are comparatively simple, and might have been stated in much less time than the Senator from New Hampshire has seen fit to consume. He criticises what he calls the change of opinion of the District Commissioners, referring to some decisions or reports that they have made in former years. Mr. President, if they have changed their opinions upon this or any other question, they do not stand alone in the world in the matter of change of opinion.

The Senator has chosen to read from the Washington Times a long communication and an editorial criticising the Commissioners and discussing this general question. He tempts me to read from a much higher authority than the Washington Times, showing that some other people, and people who hold positions of much greater responsibility and much higher authority than the Washington Times, have also sometimes changed their opinions.

Mr. GALLINGER. I am aware of that, Mr. President.

Mr. HARRIS. On February 3, of the year 1893, the District appropriation bill being pending at the time, I find in the CONGRESSIONAL RECORD the following:

Mr. GALLINGER. I offer an amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 20, line 17, after the word "system," it is proposed to add:

"And said Commissioners are authorized to contract for arc lighting with any electric-light company now organized under the laws of the United States relating to the District of Columbia, and may permit any such company to place its wires under ground in such streets, avenues, roads, and alleys as it may see fit, said wires to be well insulated and in suitable conduits."

Mr. GALLINGER. Mr. President, this amendment relates in one sense to the same subject-matter touched upon by the amendment of the Senator from Florida [Mr. CALL], and yet it will be perceived that it permits a company already organized to do certain things. I desire, in explanation of the amendment, to say that if Senators will go to the Chain Bridge and cross it, they will find on the Virginia side a company with ample capital, which, having constructed a plant and having a water power almost unrivaled, are manufacturing electricity and are lighting the bridge and the road to Georgetown free of expense. They have offered to furnish electricity to light this city and the city of Georgetown for 33⅓ per cent less than is being received by the electric light company which now has the contract.

This is a company, as I said before, amply competent to fulfill every obligation which it enters into, but which is denied the privilege of entering into negotiations even to do what they offer to do at such a reduced rate. We have a monopoly, so far as electric lighting in this city is concerned, which in my judgment would not be tolerated in any other city of the United States.

I trust for that reason, believing it to be for the welfare of the people of this District and believing it to be in the direction of good legislation, that the amendment may be adopted.

There are other comments made by other Senators, and later the Senator from New Hampshire says:

Here is an electric-light company, with ample capital behind it, offering to furnish these lights for $125 a year to the District of Columbia; but they are forbidden to do it because there is a monopoly here which furnishes this light at the exorbitant price which has been named.

If the Senate chooses not to seek this relief for the people of this District I am content. The amendment is before the Senate, and the Senate can do with it just what it pleases.

The Senator from Iowa [Mr. ALLISON] and the Senator from Missouri [Mr. COCKRELL] made some suggestions upon the subject of the amendment, and the Senator from Missouri said:

Mr. COCKRELL. It would give to the District Commissioners the authority to make another contract for $125 a light, when it should be furnished for from $50 to $75.

Mr. GALLINGER. I beg the Senator's pardon. I do not want him to put me in a false attitude. It does not limit the District to $125. I simply suggested that there is a company here willing to do it for that sum.

Mr. COCKRELL. The District Commissioners have power to make a contract for three, four, or five years, and by that time we ought to have a reduction of 75 per cent on the present rates.

Mr. GALLINGER. That is undoubtedly so; and I would suggest to the distinguished Senator from Missouri, who is always fair, that we never shall get any reduction unless we have competition; that we shall never get any reduction until the company to-day at the Chain Bridge, on the Virginia side, with ample capital, is permitted to put its wires in conduits under ground and to have the opportunity of competing, which they have not now under existing laws.

Then the Senator from New Hampshire was earnest in advocating the right of the Potomac Company to compete with the United States Company in the city and out of it, anxious to relieve the people from the exactions of monopoly.

This debate went on, and the Senator from New Hampshire took precisely the ground in 1893 that I have taken since that time, that I entertained then, and that I entertain to-day. He was speaking of this Potomac Company, which originally located its plant on the other side of the Chain Bridge, but subsequently moved up near the Aqueduct Bridge to the edge of Georgetown. Under permits of the District Commissioners, which the District Commissioners understood themselves as being fully authorized to grant and which this company understood the Commissioners as having ample authority to grant, that company has increased its plant. By a statement recently made to me, when I demanded of them a statement of the items of actual expenditure in creating and increasing plant, they showed that they had made actual expenditures and entered into binding contracts that compel them to pay for increasing the plant now under construction, that they have expended and are bound to expend the sum of $380,000, I believe it is. But under these permits that company has not only gone on increasing its plant and preparing itself to carry out this undertaking with the people of the District of Columbia outside the city, but it has, under those permits, erected poles, not in the city, but in the rural districts along the roadways and reaching the houses of rural residents, so that they can furnish power to electric railroads, and they have subsisting contracts to-day with six or eight or more electric railroads running through the rural districts of the District of Columbia.

But in this condition of affairs, and under the fragmentary legislation on appropriation bills in respect to electric lighting and in respect to electric wires, requiring wires in the city to be put under ground, the United States Electric Company, which is the oldest company and which is now furnishing the lights on Pennsylvania avenue and within the city of Washington east of Rock Creek, have constructed conduits and are furnishing lights within that area, under a contract with the District Commissioners, authorized by the various appropriation bills from 1886 down to this time.

There has never been a proposition upon the part of the Potomac Electric Light Company to invade the territory so occupied by the United States Electric Light Company. They have not sought to interfere or to go into that area and compete; but under these permits, which they never doubted the Commissioners of the District had authority to grant, they have gone on and expended $380,000 in the erection of a plant and in the running of single wires some 75 miles, in order to furnish power to rural electric companies and to furnish light to the people resident in the country regions of the District, outside of the city, who have neither gas nor electric light, and are compelled to resort to the coal-oil lamp as the only means of illumination.

In that condition of affairs, availing themselves of this legislation, the president of the United States Electric Lighting Company filed a bill in the supreme court of the District of Columbia seeking to enjoin the Potomac company from turning on its current upon these wires which it had already strung and enjoined them from continuing their improvements, in order to meet their contracts with the people resident in the rural districts outside of the city.

This amendment is intended to authorize the Potomac Electric Light Company to carry on the enterprise that they have thus undertaken, to turn on their currents, and to enable them to carry out their contracts with the people they contracted with to light their residences, and the railroad companies with which they have contracted to furnish power for propelling their cars. This amendment does not provide for a single overhead wire within the city or even within the fire limits, and the fire limits extend much beyond the city limits, but it prohibits a single overhead wire within the limits of the city of Washington, and also within the fire limits, which extend beyond the city of Washington, and wherever this company has occasion to cross any part

of the fire limits this amendment requires them to construct conduits and put their wires under ground, as the other company have been compelled to put their wires under ground within the limits of the city. But in view of the legislation in respect to electric wires, the judge having under consideration this application for injunction, reached the conclusion that the District Commissioners had no authority to grant permits, yet the extension of wires of the United States Company, wherever they have been extended, to the last foot of their extension, has been made under exactly the same permits, granted under precisely the same authority. It occupies precisely the same position as the other company, so far as its work of construction is concerned, Now, here stands this junior company with 70 miles of wire already strung, its poles up in the rural districts, its contracts outstanding for the extension of the plant, and the extension of the wires to furnish electric power to railroads and electric lights to country houses, enjoined from putting on its current and enjoined from extending another foot of wire to carry out those contracts, and that, too, at the instance of the president of the United States Electric Lighting Company.

I grant, so far as I know, that the United States Company has performed its contracts with the city of Washington in a satisfactory manner, and I have no complaint to make of that company except the principle which has prompted it to seek to restrain the other company from going on with its work. I have no disposition to invite the other company, nor does the amendment, nor does the bill I have reported to the Senate authorize the junior company to enter into the territory now occupied and now being lighted by the United States Company, but I think it would be just even to go that far. But the bill reported does not go to that extent. This amendment does not go to that extent. This amendment accomplishes no more and no less than to authorize this company to turn its current on the wires it has already strung and to go on in the performance of contracts it was fairly and fully authorized to make, and that it has made, feeling fully authorized to do so, and to continue its country lines which it has already constructed.

That is the whole question. You not only deprive the junior company of the entire value of its plant by refusing to grant this privilege, but you deprive the great body of the people who live outside of the cities of Washington and Georgetown of the cheap and easy method of lighting up their residences that this junior company is ready to light up and is anxious to light up for them and on terms perfectly satisfactory both to the company and to the residents in the rural districts. That is the whole question.

Adopt this amendment, and then the junior company may go on in the country and string its wires and turn on its current and carry out its contracts with rural railroads and with rural residents. Refuse it, and it is suspended in the air, without authority to do anything, and the people who live beyond the jurisdiction of the present gas company or beyond its mains and service pipes, and beyond the lines extended by the United States Electric Company—and it has extended none, so far as I know in the rural districts—are left deprived of all the comforts and privileges that this extension to the junior company would give.

I do not choose to detain the Senate by a further discussion of the matter, for the whole case rests upon the single point. Wherever they enter not only the city but even the fire limits, far beyond the city—Mount Pleasant has been referred to—the amendment requires them to go under ground, and that is all I understand the people of Mount Pleasant demand. They do not want overhead wires, notwithstanding they are beyond the city limits. I do not care to detain the Senate with further suggestions.

Mr. GALLINGER. I would not detain the Senate a moment longer in the discussion of this question were it not for the fact that the distinguished Senator from Tennessee [Mr. HARRIS] did me the honor to read from the CONGRESSIONAL RECORD the most excellent remarks that I made in connection with a similar discussion some three years ago. I might go into a detailed statement of the reasons that impelled me on that occasion to make an argument in favor of the two young men who were struggling to establish an electric company in the city of Washington and who, as the facts show, lost $75,000 in their effort because Congress would not give them the rights that are sought now to be obtained by their successors, who perchance happen to have back of them two or three large moneyed interests and who propose to come in here to establish a plant in opposition to the United States Electric Light Company.

I do not think that the matter of consistency cuts a very large figure in this case, and I did not quote the opinions of the Commissioners of the District of Columbia because I thought it was to their discredit that they had changed their minds on a question of public concern, but only for the purpose of emphasizing the arguments they then used. I will ask the Senator from Tennessee to be kind enough to tell me the date of the remarks he read from the CONGRESSIONAL RECORD?

Mr. HARRIS. The 3d of February, 1893.

Mr. GALLINGER. On October 21, 1893, the Commissioners sent a communication to Congress in reference to the National Light and Fuel Company, which at that time sought to get certain rights here in opposition to the United States Electric Light Company. In that communication the Commissioners said:

> The Commissioners are of opinion that the existing gas and electric companies have sufficient powers to render all the services for which the company proposed in this bill appears to be intended.
>
> As Congress has power to modify the charters of the existing gaslight companies, all the advantages derived from competition, so far as they are concerned, can be secured by legislation. The Commissioners have included $300,000 in their estimates for appropriations for the fiscal year to end June 30, 1895, to enable them to acquire and extend the systems of electrical conduits in the District, now belonging to private corporations, and to fix rates of rental for their use. If this provision should be enacted the municipal authorities could readily protect the interests of customers of electrical companies operated here.
>
> The laying of a new set of pipes and conduits, as contemplated by the bill, would result in great public inconveniences and expense, and, by adding another underground system to those with which our streets are already overcrowded, increase the embarrassments involved in the treatment of problems concerning subsurface works.

Acting upon the recommendations of the Commissioners at a date subsequent to October 21, 1893—I have not the precise date at hand—the Committee on the District of Columbia, of which the distinguished Senator from Tennessee [Mr. HARRIS] was then chairman, made a report to the Congress of the United States. The Senator says he has always been consistent himself and that the rest of us have been inconsistent.

Mr. HARRIS. The Senator from New Hampshire is wholly mistaken. The Senator from Tennessee said nothing of the kind. The Senator from Tennessee said that the Senator from New Hampshire and others——

Mr. GALLINGER. I will appeal to the RECORD in the morning to determine precisely what was said. The committee made a report, which was a unanimous report, as I remember it. Therein they said:

> In these views of the Commissioners the committee fully concur. There is no doubt whatever that the present gas and electric light companies are the owners of large and extensive plants, abundantly sufficient to supply all the demands of the city and the District for both gas and electric lighting. There is, hence, no necessity whatever for the introduction of new plants or works. Their introduction is not necessary for public or private convenience or use, and under such circumstances the committee are clearly of the opinion that such introduction would be unwise and impolitic.
>
> In addition, your committee were of the opinion, even if further extension of lighting facilities were necessary, that it would be inequitable to companies owning established plants, whose stockholders are mainly, if not entirely, residents of the District, to bring such companies in competition with foreign capital or capitalists organized apparently for the sole purpose of pecuniary profit. We think the true policy would be to encourage the extension, if necessary, of plants already existing, owned, and operated mainly by citizens of the District. Experience shows that the duplication of companies engaged in public and private service of this kind, doing in large part the business of the public, generally results in the formation of combinations and trusts, seldom, if ever, resulting in the advancement of the general welfare.

The Senator from Tennessee was chairman of the Committee on the District of Columbia which reported the bill. He then took very strong ground in favor of permitting the existing company to extend its plant to furnish electric lighting for the city, to be regulated by Congress.

Mr. HARRIS. What member of the committee reported the bill?

Mr. GALLINGER. Senator Martin of Kansas, if I remember it correctly, made the report, in which we all concurred.

I remember very well, and I have only a single word more to say, that when I made the plea for those two young men across the Chain Bridge the Senate decided against it by a very strong vote. Indeed, I think the only vote that the proposition received was my own vote. I thought then that we might with propriety grant further privileges to this weak company. I confess that possibly there was a little sentiment in it so far as I was concerned, as I knew the young men, and I knew they were struggling against adverse circumstances and conditions that probably would swallow up the investment they had made, which has proved to be correct, for, as I said, they lost $75,000 in the enterprise, and the gentlemen who are here backed by foreign capital and foreign syndicates purchased their plant, which cost $75,000, for the sum of $3,500, or thereabouts.

Mr. HARRIS. The Senator will allow me to make one statement?

Mr. GALLINGER. Certainly.

Mr. HARRIS. The Senator emphasizes the fact as to foreign capital. My information is that the great majority of the stock of the junior company is owned by people in the city and in the District, so that so far as that matter may be considered important by anybody the fact is not with the Senator from New Hampshire. It is the other way.

Mr. GALLINGER. My information does not agree with that which the Senator from Tennessee seems to possess. I think if the Senator will investigate a little further he will find that one of the worst monopolies with which this country has ever been

cursed is back of this company. If he does not so find it, he will have sought in vain for information which I think is available to any Senator who will take the trouble to discover it.

Mr. President, I have said all I care to say on this question. I am but a single member of the Senate. I am opposed to the effort that is being made to incorporate, in my opinion, a new electric company in the District which will not be content with the privileges that are proposed to be given it in the appropriation bill. One of the gentlemen connected with the company, in conversation with me, did not pretend to say they would be ultimately content with that. The Senator from Tennessee himself says that in his judgment they ought to come into the city of Washington on an equality with the existing electric light company. Beyond question if these gentlemen get this legislation on an appropriation bill they will be before Congress asking for further legislation, which, of course, Congress can grant or not as it sees fit.

Mr. HARRIS. Will the Senator from New Hampshire allow me to state another fact?

Mr. GALLINGER. Certainly.

Mr. HARRIS. The Senator speaks of incorporating a new company. This company has existed for many years; first, under a Virginia act of incorporation, and secondly, under the laws of the District of Columbia.

Mr. GALLINGER. There is no doubt about that. I may have used a word inadvertently. However, it is giving life to a dead corporation. There is no doubt about that. It might as well not be incorporated as to be incorporated standing as it does to-day, and these gentlemen perfectly understood that fact, I take it, when they made the investment in these two defunct electric-light plants, which are the bases of their present organization.

Having said this much, I shall be content with any disposition the Senate may make of the question.

Mr. HARRIS. A single word, and that is that the junior corporation is only dead because of the selfish interest and action of the other corporation which the Senator from New Hampshire so vigorously sustains.

Mr. GALLINGER. It is dead because of a decree of the supreme court of the District of Columbia.

Mr. HARRIS. Not at all.

Mr. GALLINGER. That is the situation.

Mr. HARRIS. It is prohibited from suspending its wires at this time.

Mr. GALLINGER. It has no legal right to extend its plant.

Mr. FAULKNER. I shall occupy but a moment of the time of the Senate in reference to this matter. I hope that in the discussion which is taking place we shall not be guilty of acting without due consideration upon one question at least. I concurred, my recollection is, with the Senator from Tennessee in reporting from the Committee on the District of Columbia the bill to which he refers, authorizing this company to extend its wires outside the limits of the city of Washington under proper restrictions.

On examining the amendment submitted by the House to the District appropriation bill I find that it is one of the additional evidences furnished to the Senate of the impropriety of putting general legislation on appropriation bills. Almost every limitation, without exception, contained in the bill reported by the Senator from Tennessee, and which I concurred in as a member of the District Committee, is omitted in the amendment submitted by the House in reference to this subject. We in the Senate have been very decided in our action in reference to the whole question of overhead wires and when they should be removed from streets that are being improved, etc. All of those provisions have been carefully guarded in the bill reported by the District Committee; and there are other provisions which I regard as very important, looking to the future interests of the District, in taking charge of the public lighting as a municipal obligation resting upon the city itself. None of those limitations is contained in this amendment.

Now, what I wish to suggest to the Senator from Tennessee, and I think he will concur with me, is that no matter what our views are in respect to agreeing to this amendment (and I am opposed to its being attached to an appropriation bill, though I support the bill reported by the District Committee without any hesitation at all, as I agreed to it in committee) put on by the House under some rule which I suppose no parliamentarian could exactly justify, we should disagree to the amendment, so that it can go to the conferees of the two Houses. Then, having the bill which has been reported from the District Committee, if they deem it proper to agree to the amendment they should put upon it such limitations in regard to the public interests and the public rights as will prevent this company from getting an advantage over the public which if once obtained we could really in my judgment never take from them.

Mr. GEORGE. What advantage could they secure which we could not take from them?

Mr. FAULKNER. I have been in Congress long enough to see that when a corporation once gets a foothold, backed by great capital and great influence, it is very difficult to modify or change the rights which they have obtained under existing law.

Mr. GEORGE. It is not a legal or constitutional difficulty?

Mr. FAULKNER. Not at all. I am speaking in a practical way, and not upon any legal or constitutional question.

Mr. GEORGE. Oh, yes.

Mr. FAULKNER. The Senator from Tennessee was exceedingly careful in the bill which he reported in protecting the rights and interests of the public, and I am satisfied that if this matter goes to a committee of conference, and the committee shall decide to agree with the House amendment, the limitations or the essential ones contained in the bill reported by the Committee on the District of Columbia will be embodied in the amendment. I think that is essential and necessary to the interest of the public.

Therefore I hope the Senate under any circumstances—whatever views we may have, although I say frankly, with no concealment, that I shall vote against putting the amendment on an appropriation bill, because I do not think it proper that it should go upon such a bill, and therefore I am opposed to it—will disagree to the amendment, so that the committee of conference can put on the amendment the proper limitation contained in this bill.

Mr. SHERMAN. My attention has been called to the conference report by persons who are largely interested in what is called Columbia Heights, a new and very important addition to the city of Washington. From the reading of the amendment as proposed it seems to me very doubtful whether the restrictions as to overhead wires applies outside of the city of Washington.

What is the city of Washington? The amendment would not extend, I think, beyond the boundaries or the limits of the city of Washington. I will read it, so that the Senate may understand it. Here is the proviso:

Provided further, That the Commissioners of the District may, under such reasonable restrictions as they may prescribe, authorize any existing electric-light company, organized under the laws of the District of Columbia, to maintain and use its existing poles and lines and extensions thereof, either overhead or underground, in places outside of the fire limits of the city of Washington.

The fire limits have been extended beyond the city of Washington, and there is what is called the Columbia Heights, an addition where there are very large improvements and where there is a very rapid increase of growth. Some of the persons living there are of the opinion that this would therefore allow poles to be erected outside of the city of Washington without respect to the fire limits of the city of Washington. The fire limits of the District of Columbia extend now beyond the city of Washington.

Mr. HARRIS. A good way.

Mr. SHERMAN. And therefore these restrictions would not prevent them from raising poles in that very important portion of the city.

Mr. HARRIS. Wherever they touch the fire limits the wires have to go under ground.

Mr. SHERMAN. It does not say so. It only speaks of the fire limits of the city of Washington. The fire limits of the city of Washington do not extend beyond. It is true they extend beyond certain portions of the city of Washington, but this would not cover what I speak of.

Mr. HARRIS. I think it would. It is meant to do so.

Mr. SHERMAN. I wish to call attention to that point.

Mr. HARRIS. It is intended to cover the entire fire limits.

Mr. SHERMAN. I do not think it does.

Mr. HARRIS. I have no objection to inserting the words "District of Columbia."

Mr. SHERMAN. That ought to be done. The Senator from Tennessee seems to think that this language would prevent them from erecting poles wherever the fire limits have been extended, but it does not so read. The effect of the provision as it now stands simply prevents them from raising overhead poles inside of the city of Washington or within the fire limits of the city of Washington. I am told that the fire limits do not extend to all of Washington, but they do extend through a portion of the District of Columbia outside of the city of Washington. For instance, Columbia Heights, which is being very rapidly and very handsomely built up——

Mr. HARRIS. If the Senator from Ohio will allow me, we have but one set of fire limits in the District of Columbia. I have no objection to amending the amendment by inserting the "District" instead of the "city," if that is satisfactory.

Mr. SHERMAN. That would cover it. It should read "outside the fire limits of the District of Columbia."

Mr. HARRIS. Though that is the precise intent of the amendment as it is.

Mr. SHERMAN. The city of Washington technically extends only to the boundary line, and beyond that is the District of Columbia. Therefore, where the city proper or the government of the District undertakes to fix fire limits outside it is always on account of the existence of a large number of buildings there. With the insertion of the words "outside of the fire limits of the District of Columbia" I have no objection at all to the amendment.

My attention was called to it by persons who are very deeply interested in it, and I desire to call the attention of the committee to it.

Mr. TELLER. Unless some other Senator desires to discuss it, I think the best way to do is to enter a disagreement with the amendment and let it go to conference.

Mr. SHERMAN. There is no objection to that course.

Mr. TELLER. It must be amended, in any shape, before it can be passed. For instance, we should reserve the right to compel the company to take down their poles and to conform to what is the established system here, putting the wires under ground.

Mr. SHERMAN. It should read that it should not be permitted "within the fire limits of the District of Columbia."

Mr. TELLER. The amendment does read as is pointed out by the Senator from Ohio; and that is one of the objections.

Mr. HARRIS. The amendment really confines the operations to west of Rock Creek. It does not touch the Columbia Heights addition really, because it is limited, I think, to west of Rock Creek.

Mr. SHERMAN. It does not say so. That is the trouble. I should like to have it defined. Wherever the fire limits have been extended there should be no poles erected, because that indicates that the locality is very largely built up with residences.

Mr. TELLER. If we reject the amendment the matter will go into conference, I suppose.

Mr. HARRIS. Necessarily so.

Mr. TELLER. I think that is the best way to dispose of it, but I do not desire to cut off any Senator who wishes to speak on the subject.

The PRESIDING OFFICER (Mr. PLATT in the chair). The question is on concurring in the amendment of the House of Representatives.

The amendment was nonconcurred in.

Mr. TELLER. I move that the Senate request a conference with the House on the disagreeing votes on the amendment.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate; and Mr. TELLER, Mr. ALLISON, and Mr. COCKRELL were appointed.

COMPETITION OF ORIENTAL MANUFACTURES.

Mr. TELLER. I wish to have two articles, published in the San Francisco Chronicle, one in December last and the other some time later, in the spring, printed as a document. They are well-written articles by a gentleman by the name of John P. Young, touching the Japanese competition. We have a committee appointed to consider the matter, and these are carefully and ably written articles, and I ask that they may be printed as a document. I do not care to have them printed in the RECORD.

The PRESIDING OFFICER. The Senator from Colorado asks the unanimous consent of the Senate that the two articles which he has designated may be printed as a document. Is there objection? The Chair hears none, and it will be so ordered.

CONTEMPTS OF COURT.

Mr. HILL. I move that the Senate proceed to the consideration of the bill (S. 2984) in relation to contempts of court.

The motion was agreed to.

Mr. HILL. Mr. President——

Mr. MITCHELL of Oregon. Will the Senator from New York yield to me a moment?

Mr. HILL. Yes, sir.

NORTHERN PACIFIC RAILROAD.

Mr. MITCHELL of Oregon. I ask to have laid before the Senate the House joint resolution in regard to the reorganization of the Northern Pacific Railroad Company.

Mr. HILL. I can not yield to take up the joint resolution.

Mr. MITCHELL of Oregon. I have a right under the rules to ask that the joint resolution be laid before the Senate.

Mr. HILL. The Senator can not take me off my feet.

Mr. MITCHELL of Oregon. I will state to the Senator from New York that I will not ask to take the joint resolution up to interfere with him. I simply desire to have it laid before the Senate. I have that right, I will state to the Senator from New York, under the rule. Under the fifth subdivision of Rule VII I have the right at any time that I can get the floor.

Mr. HILL. I have no objection to the joint resolution being laid before the Senate for reference.

Mr. MITCHELL of Oregon. I desire to give notice that as soon as the matter called up by the Senator from New York is disposed of I shall ask the Senate to proceed to the consideration of the joint resolution.

The VICE-PRESIDENT. The Chair lays before the Senate the joint resolution.

The joint resolution (H. Res. 190) to facilitate the reorganization of the Northern Pacific Railroad Company, to secure to actual settlers the right to purchase at a price not exceeding $2.50 per acre the agricultural lands within its grant, and to prohibit said company or any successor company from giving by consolidation, sale, or other corporate action control of its railroad to any corporation, company, person, or association of persons owning, operating, or controlling a parallel or competing railroad, was read the first time by its title.

Mr. MILLS. I object to the second reading of the joint resolution.

Mr. CULLOM. I shall object to the consideration of the joint resolution at the present session. I understand that it is a very important measure, and we have not enough members of the Senate here to justify its consideration.

Mr. HILL. I only yielded, Mr. President, for the formal reading of the joint resolution.

The VICE-PRESIDENT. The second reading of the joint resolution is objected to by the Senator from Texas [Mr. MILLS], which carries it to the table.

Mr. MITCHELL of Oregon. I ask the Senator from New York to yield to me a moment to say a word or two in regard to the joint resolution.

Mr. JONES of Arkansas. I should like to have the Senator——

Mr. HILL. I do not want to get up a discussion, right in the consideration of the contempts bill, in behalf of some private railroad measure.

Mr. JONES of Arkansas. Before the Senator from Oregon asks the Senate to proceed to the consideration of the joint resolution some of us would like to know something about the measure.

Mr. HILL. The Senator from Oregon simply gives notice that after the contempts bill is disposed of he proposes to call up the joint resolution. I think that answers the purpose.

Mr. MITCHELL of Oregon. Then, will the Senator from New York get through with the contempts of court bill as soon as he can?

CONTEMPTS OF COURT.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2984) in relation to contempts of court.

Mr. HILL. Mr. President, I desire to explain the bill.

Mr. CULLOM. May I inquire if the bill comes from the Judiciary Committee of the Senate?

Mr. HILL. Yes, sir; it was reported May 6 last.

Mr. CULLOM. I have a dispatch here which, if it will not interrupt the Senator, I am inclined to ask the Secretary to read. It is in behalf of the bill, if the Senator will allow it to be read.

Mr. HILL. I have no objection.

The VICE-PRESIDENT. The Secretary will read as indicated.

The Secretary read as follows:

[Telegram.]

PEORIA, ILL., *June 8, 1896.*

To Senator CULLOM, *United States Senate:*

More than 800,000 railroad employees in this country have closely watched the course of the "contempt" in this Congress, and fear now that an adjournment will be had without action on the measure. This mass of citizens earnestly appeals to you and others of its friends in the Senate to do everything honorable and consistent toward the passage of the bill, always providing that the right of trial by jury, as originally ingrafted in the bill, shall remain absolute with a defendant. May we hope for success at this time?

E. P. SARGENT,
Grand Master Brotherhood Locomotive Firemen.
ARTHUR,
Grand Chief Brotherhood Locomotive Engineers.
E. E. CLARK,
Grand Chief Order Railway Conductors.
P. H. MORRISSEY,
Grand Master Brotherhood Railroad Trainmen.
W. V. POWELL,
Grand Chief Order Railway Telegraphers.

Mr. HILL. The telegram is all right enough, but it should be stated that the measure is not in the interest of the railroad men of the country any more than it is in the interest of any other particular class. It is in the interest of the whole people. This bill had its origin in a resolution introduced early in the session directing the Judiciary Committee to investigate the whole subject of the administration of the law in reference to the punishment of contempts. The committee proceeded under that resolution to investigate the subject, and the result is the presentation of this bill.

It is only necessary to state in a very few words the precise situation of the law as it now exists in regard to contempts. It is a power that has existed in the courts ever since we have had courts, a power not regulated by statute, but a power that has always been held by the courts to be inherent to their rightful prerogative. Nevertheless, it is subject to regulation by law. So far as our Federal courts are concerned, there is but one statute of any consequence that bears upon this subject, and that statute I will now read:

The said courts—

Speaking of all the Federal courts—section 725 of the Revised Statutes—

The said courts shall have power to impose and administer all necessary oaths, and to punish, by fine or imprisonment, at the discretion of the court, contempts of their authority: *Provided*, That such power to punish

contempts shall not be construed to extend to any cases except the misbehavior of any person in their presence, or so near thereto as to obstruct the administration of justice, the misbehavior of any of the officers of said courts in their official transactions, and the disobedience or resistance by any such officer, or by any party, juror, witness, or other person, to any lawful writ, process, order, rule, decree, or command of the said courts.

Mr. GEORGE. That is the present law?

Mr. HILL. That is the present law; but it provides no manner for the prosecution of the alleged contempt. It does not regulate, limit, or restrict the amount of punishment which may be inflicted in cases where parties are found guilty of contempt. It not only includes the jurors, witnesses, officers of the court, but the language is, "or other person," who is guilty of contempt of court. The existing law does not provide for an informal trial. That is not regulated. Everything rests in the discretion of the court. A party may be summoned upon affidavits to show cause why he should not be punished for contempt of court. He need not be confronted with the witnesses against him under existing law. The affidavits are read and he may have an opportunity to reply to them. He does not see the witnesses. He may be given time to prepare his defense or he may not.

Mr. GEORGE. They are ex parte affidavits.

Mr. HILL. They are ex parte affidavits. There is no cross-examination of witnesses or anything of the kind. In other words, the whole form of prosecution for contempts of court is absolutely vested in our Federal judges.

In the presentation of this bill it was not intended to reflect upon the administration of our Federal judges in any particular case. We have made no report reflecting upon anybody. We simply say that experience has shown that this power may be abused, and therefore it is wise at this time to regulate it and restrict it, to prescribe certain rights that the accused shall enjoy; and that, Mr. President, is the object of the pending bill.

In the first place, we deem it wise to declare that there shall be two forms of contempt. First, we call it direct contempt. We use the words "direct contempt" because the courts have used them in speaking of contempts in their presence and contempts outside. They have themselves in their decisions used the terms "direct contempt" and "indirect contempt." Therefore we define in the first instance what shall constitute a direct contempt. The first we define as follows:

That contempts of court are divided into two classes, direct and indirect, and shall be proceeded against only as hereinafter prescribed.

SEC. 2. That contempts committed during the sitting of the court or of a judge at chambers, in its or his presence, or so near thereto as to obstruct the administration of justice, are direct contempts. All other are indirect contempts.

In other words, in accordance with existing decisions, all those offenses which consist simply in disrespectful behavior in the presence of a court, open resistance to process near the court room, disturbance outside the court room, offenses which bring the administration of justice into disrepute, shall be called direct contempts. All others are indirect contempts.

Permit me to say right here that in regard to direct contempts we do not change existing law. The absolute discretion which is now vested in the courts of the country whereby they can summarily punish without limit is retained. It is not deemed that that power has been or will be abused. It is deemed by the committee that it is essential for the punishment of those offenses which occur in the presence of the court or immediately surrounding the court, that there should still exist absolute power, without limit, vested in our Federal courts. In regard to other contempts it is deemed wise to regulate the procedure and give the accused some rights. Section 3 is as follows:

SEC. 3. That a direct contempt may be punished summarily without written accusation against the person arraigned, but if the court shall adjudge him guilty thereof a judgment shall be entered of record, in which shall be specified the conduct constituting such contempt, with a statement of whatever defense or extenuation the accused offered thereto and the sentence of the court thereon.

Mr. GEORGE. That is direct contempt?

Mr. HILL. That is direct contempt. To that extent the bill does regulate the form of procedure.

SEC. 4. That upon the return of an officer on process or an affidavit duly filed, showing any person guilty of indirect contempt, a writ of attachment or other lawful process may issue and such person be arrested and brought before the court; and thereupon a written accusation setting forth succinctly and clearly the facts alleged to constitute such contempt shall be filed and the accused required to answer the same, by an order which shall fix the time therefor, and also the time and place for hearing the matter; and the court may, on proper showing, extend the time so as to give the accused a reasonable opportunity to purge himself of such contempt. After the answer of the accused, or if he refuse or fail to answer, the court may proceed at the time so fixed to hear and determine such accusation upon such testimony as shall be produced.

So far there can be no opposition whatever to the bill, it strikes me. Then the committee have provided:

If the accused answer, the trial shall proceed upon testimony produced as in criminal cases, and the accused shall be entitled to be confronted with the witnesses against him—

Then comes the provision—

but such trial shall be by the court, or, in its discretion, upon application of the accused, a trial by jury may be had as in any criminal case. If the accused be found guilty judgment shall be entered accordingly, prescribing the punishment.

SEC. 5. That the testimony taken on the trial of any accusation of indirect contempt may be preserved by bill of exceptions, and any judgment of conviction therefor may be reviewed upon direct appeal to or by writ of error from the Supreme Court, and affirmed, reversed, and modified as justice may require.

The provisions of this proposed act do not apply to the Supreme Court, because the Supreme Court has held that it is beyond the power of Congress to regulate the punishment of contempts in the Supreme Court, and it is therefore omitted.

Mr. MILLS. Is trial by jury given by right?

Mr. HILL. I will come to that in a moment.

Mr. PALMER. May I ask the Senator from New York a question?

Mr. HILL. Certainly.

Mr. PALMER. I heard him rather imperfectly. Does the bill provide any punishment or fix or limit the punishment for any direct contempt?

Mr. HILL. No, it does not. It was not deemed wise to go into that, because, while for some offenses it would be very easy to define the proper punishment, in other cases it is a matter of difficulty. Here is an offense where a man is commanded to execute a deed. He refuses to execute the deed. A punishment for three months or six months is no punishment at all. He must, of course, be confined until he signs the deed. There were so many such instances that it was deemed wise not to interfere with the question of punishment. After giving the party a trial in court with an appeal to the highest court in the country that was deemed sufficient to protect his rights.

Now, the committee split upon this question, and I want to state the proposition just as fairly as I know how. The majority of the committee reported the bill so as to provide that when the party is brought before the court he shall have a trial; that there shall no longer be ex parte affidavits. The party shall be confronted with the witnesses against him. Then the bill says:

But such trial shall be by the court, or, in its discretion, upon application of the accused, a trial by jury may be had, as in any criminal case.

In other words, the trial shall be by the court, but the accused may, upon application, request that he may be given a jury trial, and in such cases the court may, at its discretion, grant it. A minority of the committee thought that the party should be of right entitled in such cases to a trial by jury, and that it should not depend upon the discretion of the court. I expect an amendment may be offered here to strike out the words "in its discretion," changing the word "may" to "shall," and that the question will probably be discussed by other Senators. The committee thought it wise to report the bill in this form, although it was equally divided with those who thought the other way. However, in order to expedite the bill it was reported in the form in which I have read it.

Mr. BUTLER. Will the Senator from New York excuse me for a moment?

Mr. HILL. Yes.

Mr. BUTLER. I will state that an amendment has already been drawn and offered by myself covering that point. I will ask the Secretary to read the amendment which I had printed.

Mr. HILL. I should prefer that the Senator would wait until I get through.

Mr. BUTLER. I think it would be appropriate here, inasmuch as it applies here. I did not have it read at the time I offered it. I trust that the Senator will not object to having it read.

Mr. HILL. Very well; I have no objection.

The VICE-PRESIDENT. The amendment of the Senator from North Carolina will be stated.

The SECRETARY. Strike out all after the word "shall," in line 18 of section 4, down to and including the word "had," in line 19 of the same section, and insert:

upon application of the accused, be a trial by jury.

Mr. BUTLER. Now let the Secretary read the clause as it would stand if amended as I propose.

Mr. HILL. I do not think the amendment proposed by the Senator from North Carolina is exactly appropriate to the place in the bill he has indicated. I think the amendment should be——

Mr. BUTLER. I ask the Secretary to read the amendment so as to show how the clause will read if amended.

The VICE-PRESIDENT. The Senator from New York will suspend until the Secretary has read as requested.

The SECRETARY. It is proposed to strike out all after the word "shall," in line 18, in section 4, page 2, as follows:

be by the court, or, in its discretion, upon application of the accused, a trial by jury may be had.

And insert in lieu thereof:

upon application of the accused, be a trial by jury.

So that the paragraph if amended would read:

If the accused answer, the trial shall proceed upon testimony produced as in criminal cases, and the accused shall be entitled to be confronted with the witnesses against him; but such trial shall, upon application of the accused, be a trial by jury as in any criminal case.

Mr. HILL. In case he does not make the application, then I call the Senator's attention to the fact that he has not left any trial by the court. He has stricken out altogether too much. I suggest that all that is needed is to leave in the words "but such trial shall be by the court," and to strike out simply the words "in its discretion," in line 18, and in line 19 change the word "may" to "shall"; so that it will read:

But such trial shall be by the court, or, upon application of the accused, a trial by jury shall be had as in any criminal case.

Mr. CANNON. Will the Senator from New York yield to me for a moment?

Mr. HILL. Yes.

Mr. CANNON. I have prepared an amendment to this measure exactly covering the ground suggested by the Senator from New York.

Mr. BUTLER. If the Senator from Utah will pardon me——

The VICE-PRESIDENT. The Chair will recognize the Senator from Utah in a moment.

Mr. BUTLER. If the Senator from Utah will pardon me, I accept the suggestion of the Senator from New York, and leave in the words "by the court"; so that it will read:

But such trial shall be by the court, or, upon application of the accused, a trial by jury as in any criminal case.

Mr. HILL. That covers it.

Mr. BUTLER. I accept the Senator's modification of my amendment.

Mr. CANNON. Now, if the Senator from North Carolina will pardon me, I desire to present an amendment which I have prepared.

The VICE-PRESIDENT. The amendment of the Senator from Utah will be stated.

The SECRETARY. Amend by striking out of line 18 the words "in its discretion," and in line 19 by striking out the word "may" and inserting "shall."

Mr. HILL. Mr. President, the amendment of the Senator from Utah, which is, I think, substantially the same as that offered by the Senator from North Carolina, covers the precise point, if the Senate concludes that the party should have as a matter of right a trial by jury in case he desires it. That presents the precise question. I shall make no opposition to the amendment. On the contrary, my personal views are in its favor. The question, however, will be discussed by others.

It will, therefore, be seen that the pending bill is a simple measure regulating a method of procedure, which does not now exist, giving the party a right to be confronted by the witnesses, so that he will be no longer tried upon affidavits, and may have a jury trial in case he demands it. In case he does not demand a jury trial, witnesses shall be produced against him. It does not change the discretion vested in the court to punish in any manner to any extent now allowed, not by law, for there is no regulation by law. To provide against any abuse of that an appeal is given to the court which does not now exist. I need not say that it is held by the courts that no appeal lies in any contempt conviction where the court had jurisdiction. That was the reason why no relief could be given in certain notorious cases to which the attention of the country and the Senate has recently been called. The Supreme Court could not refuse conviction because the court had jurisdiction, and under the decisions of our courts there being no express statute authorizing review, it could not be had.

Mr. President, I think it is necessary that there should be a review. For instance, a judge grants an injunction, grants it improperly, grants it without authority. Of course, there can be an appeal from that injunction to a higher court; but in the meantime, although the party may be advised that the injunction is void and that it is beyond the authority of the court or judge to grant it, he must obey the injunction or refuse to do so at his peril.

Bear in mind that under the common law, as it exists, in addition to the punishment under this special proceeding, the party can still be indicted for contempt of court—indicted for a criminal offense. This does not interfere with it at all. This simply regulates and restricts the power of the court in the punishment of cases for contempt, which are regarded as civil or criminal contempts, leaving the punishment by indictment still existing. It does not interfere with that. Therefore the bill is a fair one in any view that can be taken of it. If amended as suggested, giving the defendant still greater rights and liberties under it, even then, in my judgment, it will be a safe and proper bill.

I have consulted with several jurists in regard to the subject, and while I frankly state that some of them think that the accused ought to be given absolutely a right to trial by jury, and think it ought not to be left discretionary with him, I do not think that there is any special or serious objection to it. It is argued that sometimes in great railroad difficulties, where a railroad attorney who all his life has been defending great corporations is suddenly placed upon the Federal bench, the discretion ought not to be vested in him or in any other judge to refuse the right of trial by jury in such cases. Be that as it may, it strikes me that an able and fearless and impartial judge can regulate the trial; can substantially control it. He charges the jury upon questions of law and gives his opinions upon questions of fact. It is claimed by the friends of this bill that it would not be abused, and that conviction would occur where it ought to occur. The right of trial by jury in contempt cases is given in several States of this Union, and it has worked successfully. In the State of Kentucky, the home of my friend [Mr. LINDSAY], a party is entitled to trial by jury where he is charged with contempts such as this. In other States appeals are given to higher courts; and in case no appeal lies from the court having jurisdiction, we propose in this bill to give these few additional rights for the protection of the accused. That is all there is of the bill.

Mr. ALLEN obtained the floor.

PROPOSED EVENING SESSION.

Mr. ALLISON. I ask the Senator from Nebraska to yield to me a moment, that I may ask unanimous consent that at half past 5 o'clock the Senate take a recess until 8 o'clock this evening. There are at least two or three conference reports which will probably not be ready before 8 o'clock, and it is important that they should be considered to-night.

The VICE-PRESIDENT. The Senator from Iowa asks unanimous consent——

Mr. PEFFER. I did not understand the request, Mr. President.

The VICE-PRESIDENT. The Chair will state the request of the Senator from Iowa, which is for unanimous consent that at half past 5 o'clock the Senate take a recess until 8 o'clock this evening. Is there objection? The Chair hears none, and it is so ordered.

Mr. BUTLER. It seems to me that a night session is not necessary after we are here all day and under quite a strain. I object, Mr. President.

The VICE-PRESIDENT. The Chair had submitted to the Senate the proposition of the Senator from Iowa.

Mr. MORRILL. And it was agreed to.

The VICE-PRESIDENT. There was no objection, and the Chair announced that, there being no objection, it was agreed to.

Mr. BUTLER. I intended to address the Chair, but the Chair announced the result so rapidly that I had not an opportunity to do so.

The VICE-PRESIDENT. Upon the Senator's statement that he intended to address the Chair, the Chair will again submit to the Senate the request of the Senator from Iowa that the Senate take a recess at half past 5 o'clock until 8 o'clock this evening.

Mr. BUTLER. I object.

Mr. MILLS. I object. I think we had better meet in the morning; say 10 o'clock in the morning.

Mr. ALLISON. Then I make the motion that the Senate take a recess from half past 5 until 8 o'clock this evening.

Mr. MILLS. I do not want to stay here all night.

Mr. ALLISON. I will say to the Senator that unless the conference reports are ready at an early hour to-night I shall not ask the Senate to remain in session.

Mr. MILLS. We shall not have a quorum here.

Mr. ALLISON. There is a prospect that we may have a report on the Indian appropriation bill, the naval appropriation bill, and the sundry civil bill.

Mr. MILLS. Why not receive them to-morrow?

Mr. STEWART. I do not see any necessity for a night session when we can meet in the morning and consider the conference reports referred to.

The VICE-PRESIDENT. The Chair was unable to ascertain whether the Senator from Iowa submitted a motion.

Mr. ALLISON. I move that the Senate take a recess from half past 5 o'clock until 8 o'clock to-night.

Mr. BUTLER. I suggest the absence of a quorum.

The VICE-PRESIDENT. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allen,	Clark,	Hill,	Pettigrew,
Allison,	Cockrell,	Jones, Ark.	Platt,
Bacon,	Cullom,	Lindsay,	Pritchard,
Bate,	Daniel,	McBride,	Pugh,
Berry,	Davis,	Mills,	Sherman,
Blackburn,	Dubois,	Mitchell, Oreg.	Smith,
Blanchard.	Faulkner,	Mitchell, Wis.	Teller,
Brown,	Gallinger,	Morgan,	Turpie,
Burrows,	George,	Morrill,	Vest,
Butler,	Gibson,	Nelson,	Walthall,
Caffery,	Hale,	Palmer,	Warren,
Cannon,	Harris,	Pasco,	Wetmore,
Chilton,	Hawley,	Peffer,	Wolcott.

The VICE-PRESIDENT. Fifty-two Senators have answered to their names. A quorum is present. The question is on the motion of the Senator from Iowa, that the Senate at half past 5 o'clock take a recess until 8 o'clock this evening.

Mr. BUTLER. I ask for the yeas and nays on that motion.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BLACKBURN (when his name was called). I am paired with the senior Senator from Michigan [Mr. McMILLAN]. I do not know how he would vote on this question if present.

Mr. ALLISON. He would vote "yea" if present.

Mr. BLACKBURN. Then I vote "nay."

Mr. GIBSON (when his name was called). I am paired generally with the Senator from Montana [Mr. CARTER]; but in order to make a quorum I will vote. I vote "yea."

Mr. MITCHELL of Wisconsin (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL], but on a matter of this kind I feel at liberty to vote, and I vote "yea."

The roll call was concluded.

Mr. GALLINGER. I desire to announce that my colleague [Mr. CHANDLER] is paired with the Senator from New York [Mr. MURPHY].

The result was announced—yeas 40, nays 11; as follows:

YEAS—40.

Allen,	Davis,	Lindsay,	Pettigrew,
Allison,	Faulkner,	McBride,	Platt,
Berry,	Gallinger,	Mitchell, Oreg.	Pritchard,
Blanchard,	Gibson,	Mitchell, Wis.	Sherman,
Brown,	Gorman,	Morgan,	Smith,
Burrows,	Hale,	Morrill,	Teller,
Caffery,	Harris,	Nelson,	Vest,
Clark,	Hawley,	Palmer,	Warren,
Cockrell,	Hill,	Pasco,	Wetmore,
Cullom,	Jones, Ark.	Peffer,	Wolcott.

NAYS—11.

Bacon,	Butler,	Mills,	Turpie,
Bate,	Daniel,	Pugh,	Walthall.
Blackburn,	George,	Stewart,	

NOT VOTING—38.

Aldrich,	Elkins,	Lodge,	Shoup,
Baker,	Frye,	McMillan,	Squire,
Brice,	Gear,	Mantle,	Thurston,
Call,	Gordon,	Martin,	Tillman,
Cameron,	Gray,	Murphy,	Vilas,
Cannon,	Hansbrough,	Perkins,	Voorhees,
Carter,	Hoar,	Proctor,	White,
Chandler,	Irby,	Quay,	Wilson.
Chilton,	Jones, Nev.	Roach,	
Dubois,	Kyle,	Sewell,	

So the motion was agreed to.

CONTEMPTS OF COURT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2984) in relation to contempts of court.

Mr. ALLEN. Mr. President, I desire at this time to offer an amendment to the bill, which I send to the desk and ask to have read.

The VICE-PRESIDENT. The amendment offered by the Senator from Nebraska will be stated.

The SECRETARY. It is proposed to strike out all after the first section and the words "but this act shall not affect any proceedings for contempt at the time of the passage thereof," in section 6, and to insert the following:

SEC. 2. That contempts committed during the sitting of the court or of a judge in chambers while engaged in the transaction of the duties of his office, in its or his presence, or so near thereto, by loud and unusual noises or by other means that are calculated to and do obstruct the orderly administration of justice, are direct contempts. All other contempts are indirect contempts.

SEC. 3. That a direct contempt committed immediately in the presence of the court while in session, or of a judge in chambers while engaged in the transaction of the business of his office, by loud and unusual noises or by any other means that are calculated to and do obstruct the orderly administration of justice, may be summarily punished without a written information against the person guilty thereof; but before the accused is punished it shall be the duty of the court or judge, as the case may be, to cause the facts constituting the direct contempt to be stated on the record in full, and if the court or judge shall adjudge the accused guilty a judgment shall be entered of record, in which shall be fully specified the facts constituting the contempt, with a full statement of the facts constituting the defense or the extenuation the accused may make or offer, and the sentence of the court.

SEC. 4. That upon the return of any judicial process by an officer or an affidavit duly filed, which shall contain a full statement of all the facts constituting the alleged contempt as distinguished from legal conclusions or the conclusions of the affiant, charging any person with indirect contempt a writ of attachment, or other legal process under the seal of the court, may issue and such person be arrested and brought before the court; and thereupon a written information under oath, setting forth succinctly and fully the facts constituting the alleged contempt, shall be filed and a certified copy thereof served on the accused before he is required to answer, and an order shall be made fixing the time and place for hearing the charge; and the court shall, on a showing by affidavit of the accused stating the facts as distinguished from the legal conclusions or his own conclusions, extend the time so as to give him full opportunity to defend himself against the charge. After the answer of the accused, or if he shall refuse or fail to answer, the court may proceed at the time so fixed to hear and determine such charge upon such testimony as may be produced in support and rebuttal thereof. If the accused answer the trial shall proceed upon the testimony as in other criminal cases, the burden of proof being on the prosecution, and the accused shall be entitled to be confronted face to face by the witnesses against him, whose names shall be indorsed on the information at the time it is filed and on the copy which is required to be served upon him, and on the request of the accused a trial by jury of the charge shall be had as in ordinary criminal cases. If the accused shall be found guilty of the alleged contempt judgment shall be entered accordingly prescribing the punishment. If he shall be found not guilty a judgment shall be entered to that effect and he shall be discharged, with his costs.

SEC. 5. That the testimony and evidence adduced on the trial of any person accused of direct or indirect contempt shall be preserved by a bill of exception, and a judgment of conviction shall be reviewed upon direct appeal to, or by writ of error from, the supreme court, and affirmed, reversed, or modified as the law and facts may require. Upon the allowance of an appeal or writ of error execution of the judgment shall be stayed upon the giving of such bail as may be required by the court or judge or by any justice of the supreme court, which in ordinary cases of contempt shall not exceed the sum of $1,000.

SEC. 6. That pending the trial or determination of an accusation of direct or indirect contempt the accused shall be entitled to bail until such time as a judgment of guilty shall be entered against him.

SEC. 7. That in all hearings or trials for an alleged contempt the accused shall be entitled to the aid of counsel and shall have the right to testify in his own behalf, but a failure to testify in his own behalf shall raise no presumption against his innocence nor be referred to in any manner during the trial by court, judge, or counsel.

SEC. 8. That the charges or instructions of the court, given to the jury on the trial of any person charged with contempt of court, shall be reduced to writing before being given, and in no case shall any such charge or instruction state or intimate to the jury an opinion on the facts or the weight of the evidence, or what, in the opinion of the court or judge, the evidence proves or tends to prove, and any violation by the court, judge, or counsel engaged in the prosecution of an alleged contempt of the provisions of this act shall ipso facto constitute reversible error.

SEC. 9. That if any person shall be informed against by an individual, corporation, company, or association of persons, either in person or by agent, attorney, or officer, the court, or the judge of the court in which such information shall be filed, must, before causing an attachment or other process to be issued for the arrest of the accused, require such person, corporation, company, or association of persons, as the case may be, to file a bond with two or more sureties who shall be required to justify in double the amount of the bond conditioned that such person, corporation, company, or association of persons, as the case may be, shall and will pay to the accused all damages that he may sustain, not exceeding $10,000, by reason of false imprisonment or malicious arrest and prosecution in such case.

SEC. 10. That the provisions of this act shall apply to all proceedings for contempt in all courts of the United States excepting the Supreme Court.

Mr. ALLEN. Mr. President——

The VICE-PRESIDENT. Before the Senator from Nebraska is recognized, the Chair will state that the amendment submitted by the Senator from North Carolina [Mr. BUTLER] to the bill has not yet been disposed of. The question is upon the amendment submitted by the Senator from North Carolina.

Mr. BUTLER. Mr. President, I suggest that the amendment I offered may go over without prejudice until after the Senator from Nebraska concludes his speech, or until the general discussion upon the bill shall have been concluded.

The VICE-PRESIDENT. Without objection, it will be so ordered.

Mr. ALLEN. Mr. President, I desire to occupy the time of the Senate but a moment to state briefly the difference between the substance of the amendment which I have offered and the bill of the committee.

It will be observed that in the second section of the proposed amendment these words, different from those in the original bill, occur:

That contempts committed during the sitting of the court, or of a judge in chambers while engaged in the transaction of the duties of his office—

Then, in line 4, by the insertion of the words—

by loud and unusual noises or by other means that are calculated to and do obstruct the orderly administration of justice, are direct contempts.

I do not think the bill of the committee sufficiently guarded in its language, and I do not think that a judge sitting in chambers ought to be permitted to himself determine that anything he might decree to be so is a contempt of court. I think it ought to appear upon the record that he is actually discharging judicial duties either as a judge in chambers or in holding a term of court, and that a direct contempt should be such contempt as is committed in his immediate presence by any disorderly conduct in the court room, anything so immediately near the place where the court is being held, such as an unusual noise or something which obstructs the orderly administration of justice. Such a provision should be inserted in the bill and become a part of the law.

Let me say at this time, Mr. President, that I am not in favor of giving to any man unrestrained power. I think the first argument of the tyrant, the first argument of a man who wants to violate his duty in the interpretation or enforcement of a law, is to say that he has discretion in the exercise of judgment. While I recognize the fact that it is essential very frequently to invest in a judge and in other officers the power of discretion, I would reduce that to the minimum; and at all points where it could be guarded, or where the duty could be discharged, without investing the right of discretion, I would withdraw or prohibit the exercise of discretion.

The third section of the amendment which I offer differs materially from the bill of the committee. It provides—

That a direct contempt committed immediately in the presence of the court while in session, or of a judge in chambers while engaged in the transaction of the business of his office, by loud and unusual noises or by any other means that are calculated to and do obstruct the orderly administration of justice, may be summarily punished without a written information against the person guilty thereof; but before the accused is punished it shall be the duty of the court, or judge, as the case may be, to cause the facts constituting the direct contempt to be stated on the record in full—

The committee's bill does not provide this. Then the amendment provides—

and if the court or judge shall adjudge the accused guilty a judgment shall be entered of record, in which shall be fully specified the facts constituting the contempt with a full statement of the facts constituting the defense or the extenuation the accused may make or offer and the sentence of the court.

It is perfectly proper, Mr. President, it is no reflection upon the judge, and it is essential to the rights of the accused to have all the facts stated upon the record which constitute the alleged contempt as well as those facts which the accused may offer in his defense. This measure is therefore more guarded than the measure for which it is offered as a substitute.

Section 4 provides some other safeguards, to the effect—

That upon the return of any judicial process by an officer or an affidavit duly filed, which shall contain a full statement of all the facts constituting the alleged contempt as distinguished from legal conclusions or the conclusions of the affiant, etc.

The bill of the committee simply provides that the accused may be arrested upon legal process, and upon the return of the officer to that process he may be punished. It does not require the filing of an affidavit alleging the statement of facts constituting the alleged contempt as distinguished from the conclusions or the deductions of the affiant.

Then it provides for the issuance of process and the arrest of the accused, and that he may be brought before the court, and when brought before the court "a written opinion under oath, setting forth succinctly and fully the facts constituting the alleged contempt, shall be filed and a certified copy thereof served on the accused before he is required to answer, and an order shall be made fixing the time and place for hearing the charge." I think it perfectly proper that whoever makes the charge of contempt should be required to file an information (it may be in the ordinary form of an information or in the form of an affidavit) setting forth the facts constituting the alleged contempt, and upon that affidavit or upon that information the accused may be arrested and held for trial. But before the court shall put him upon trial he shall have a right to have a certified copy of the information, with the name of every witness who is to appear and testify against him. That is a safeguard required in many of the States of the Union. It is a safeguard which experience has found to be necessary to protect the rights of individuals charged with the commission of an offense.

Then it differs from the committee bill in another respect, to this effect:

And the court shall, on a showing by affidavit of the accused stating the facts as distinguished from the legal conclusions or his own conclusions, extend the time so as to give him full opportunity to defend himself against the charge.

It is not an uncommon thing for a court, in a spirit of anger—for judges are men and have their passions to contend with as other men—to bring a person before it, charged with contempt of court, and without the slightest opportunity to accumulate the evidence in his defense, and, in fact, without the slightest opportunity to defend him at all, adjudge him guilty and either impose the penalty of a fine or imprisonment. If a man is charged by information with contempt of court and given a full opportunity to present the facts constituting his defense, he can very frequently show that he was not really guilty of contempt, because contempt consists largely in insolent and intentional violation of the orders and directions of the court.

Then it provides that—

If the accused answer, the trial shall proceed upon the testimony as in other criminal cases, the burden of proof being on the prosecution, and the accused shall be entitled to be confronted face to face by the witnesses against him, whose names shall be indorsed on the information at the time it is filed and on the copy which is required to be served upon him, and on the request of the accused a trial by jury of the charge shall be had as in ordinary criminal cases.

Not infrequently, in fact in a majority of cases, a man who is arraigned before a court for contempt, if it is an indirect contempt—one committed out of the presence of the court—is arraigned upon affidavits of persons who may or may not, in the discretion of the judge, be called in to testify to the contents of their affidavits. But more frequently the whole issue as to the guilt or innocence of the accused is tried upon affidavits which the experience of any lawyer who has been ten years at the bar satisfies him is of the most flimsy and unsafe character. There has been more perjury committed in this world, in my judgment, in the course of judicial proceedings, by the use of ex parte affidavits than in any other and all other manners. Therefore when a man is charged with the crime of contempt the allegations against him should be specific. He should not only have the right to a trial by jury, because trial by jury is the very essence of our Government, the judgment of one's peers, but he should have the right to have the witnesses come into court and submit themselves to examination the same as in any other case. We are taught that one of the safeguards in the trial of a cause is the right of the accused to confront the witnesses against him face to face, to cross-examine them. Thorough examination and cross-examination of a witness have many times saved an innocent man and demonstrated the falsity of the story he is offering in court. This safeguard, therefore, in my judgment, ought to be inserted in the measure.

Then the fifth section provides—

That the testimony and evidence adduced on the trial of any person accused of direct or indirect contempt shall be preserved by a bill of exceptions, and a judgment of conviction shall be reviewed upon direct appeal to, or by writ of error from, the Supreme Court, and affirmed, reversed, or modified as the law and facts may require.

I know of no provision in the Federal statutes requiring the settling of a bill of exceptions in a case like this.

Upon the allowance of an appeal or writ of error execution of the judgment shall be stayed upon the giving of such bail as may be required by the court or judge or by any justice of the Supreme Court, which in ordinary cases of contempt shall not exceed the sum of $1,000.

I know of no reason why a person who has been charged with and convicted of contempt of court should not have the same privilege to offer bail pending an appeal or the hearing on writ of error that he would have if he were charged with some other offense. The same reason why bail should be given and the same reason why bail should not be excessive in an ordinary criminal case exist with as much force and with as much merit in a case of contempt. This provides a safeguard also against excessive bail in ordinary cases. I think I am clearly within the written history of jurisprudence in this country—I am glad to say the cases are exceptional, but there are cases of the kind—when I say that not infrequently has bail been fixed so high against one who offers it pending an appeal or writ of error that it was impossible for him to give it, and that the order fixing it at that sum was for the express purpose of defeating his right to bail or writ of error.

I skip the sixth section. The seventh section provides for the aid of counsel, and provides also that the accused, if he fails to testify in his own behalf, which he is given the right to do under the amendment, shall not be injured in consequence of any deduction made from that fact, and it prohibits the court or any officer of the court or counsel engaged in the case from making any reference to it during the trial. That provision is in substance, I think, to be found in a majority of the criminal codes of to-day.

The eighth section of the proposed substitute I regard as very important. It provides—

That the charges or instructions of the court given to the jury on the trial of any person charged with contempt of court shall be reduced to writing before being given, and in no case shall any such charge or instruction state or intimate to the jury an opinion on the facts or the weight of the evidence, or what, in the opinion of the court or judge, the evidence proves or tends to prove, and any violation by the court, judge, or counsel engaged in the prosecution of an alleged contempt of the provisions of this act shall ipso facto constitute reversible error.

I look upon the principle of giving charges or instructions to a jury that are oral as one of the most vicious features of our administration of justice. The man who has experience at the bar knows what it means. It means that the emphasis on a word or the change of a sentence occasionally influences a jury, and whatever the judge says, the record should contain his language before the case is submitted to the jury and a verdict taken; and above all things such a judge ought never to be permitted to intimate his judgment of the facts that are being submitted to the jury for their consideration.

I think it is the best opinion in this country now, and it is held to be the rule in most of the States of the Union, that as to whether or not there is any evidence to be submitted to the jury is a question of law, and that when evidence has been submitted, even if it is a mere scintilla of evidence, covering the question—the issues—the probative force of that evidence must be left to the jury, and the jury should be guarded strictly and constantly against insinuations arising in the charges or instructions of the court, and even from the language of the court in making rulings upon its admission.

I go to the last section—the ninth section of the proposed amendment—which I regard as highly important. It provides—

That if any person shall be informed against by an individual, corporation, company, or association of persons, either in person or by agent, attorney, or officer, the court, or the judge of the court in which such information shall be filed, must, before causing an attachment or other process to be issued for the arrest of the accused, require such person, corporation, company, or association of persons, as the case may be, to file a bond with two or more sureties who shall be required to justify in double the amount of the bond conditioned that such person, corporation, company, or association of persons, as the case may be, shall and will pay to the accused all damages that he may sustain, not exceeding $10,000, by reason of false imprisonment or malicious arrest and prosecution in such case.

That is in imitation of certain statutes we have. If a corporation or an individual—and I speak of them upon exact terms of equality—desires to have a person arrested and brought before the court and put upon trial for an indirect contempt, who can offer a reason why that corporation or person should not give a bond to pay the damages that the individual may sustain by reason of imprisonment or false arrest? It is a frequent thing, it is a common thing for a bench warrant or an ordinary order of

attachment to be sent out and an individual brought in and charged with contempt and tried before the court without the intervention of a jury. When he is acquitted, as he sometimes is, he goes out into the world with all the damage possible done to his character and his rights, without any responsibility upon the part of the person who set the prosecution on foot.

I speak of it more particularly as it has reference to certain important events which have taken place in this country within the last two or three years. It has been a common mania since the days of Judge Ricks, in Michigan, four or five years ago in issuing a writ of injunction for Federal courts to issue injunctions under all circumstances almost and on very slight provocation. Who that is familiar with the history of the writ of injunction, who that has learned from the primary law books that it never could be used to restrain the commission of a crime, or to restrain the commission of a trespass, would have thought that that rule would have been overturned by an obscure Federal judge within the last four or five years by the misconstruction of a statute? Since that day it has been a mania, and the moment a controversy arises between certain corporations and their employees that moment their legal advisers are instructed to go before a Federal judge and procure a writ of injunction against the employee and suspend him almost between heaven and earth during the time of his arrest and trial.

Mr. PLATT. Will the Senator from Nebraska allow me with reference to the proposition of law which he has just laid down that we all know that an injunction can not issue to restrain the commission of a crime? That is true. But has it not been held in very many cases that an injunction may issue to restrain the commission of certain acts which acts have been denounced by statute as a crime?

Mr. ALLEN. There may be here and there exceptional decisions of that kind. We have scarcely any rule in this country which does not have its exceptions. But the broad rule has always been, until the innovation was introduced by Ricks, that an injunction could not be issued to restrain the commission of a crime or to restrain the commission of a trespass, unless that trespass was followed by certain known and well-defined damages, and unless the other circumstances authorizing the writ existed, namely, insolvency or inadequacy of legal remedy or something of that kind. But there never has been a time in the history of the common law, there never has been a time in the history of the civil law, from which the equitable injunction has come down to us, there never has been a time in all the history of English or American jurisprudence, when a writ of injunction would issue to prevent the commission of an offense until introduced by Ricks.

A man's character and the reputation of his family are two of the most sacred things to him. Why should the men who are compelled to labor for their livelihood—and labor is honorable—be taken by the throat in consequence of the misconstruction of a statute, and be remediless and powerless against the men or the individual who set the prosecution on foot? If the individual has not been wrongfully prosecuted there is no liability. If he is guilty of the crime with which he is charged the indemnifying bond that may be required to be given is void.

We do not issue an ordinary civil attachment against the property of a man in this country in advance of obtaining judgment against him without requiring the party who sues out the attachment to file with the clerk of the court where the writ is obtained a bond of indemnity. That, I believe, exists in one form or another in every State of this Union. Yet here we will permit this despotism to be exercised over certain classes of our citizens, who in consequence of their lack of financial means are sometimes almost powerless to defend themselves, and we will permit corporations, whose capital aggregates millions of dollars, to use and abuse the processes of the law and bring men before a court or a judge where they are tried without the intervention of a jury, without that shield which is guaranteed by the Constitution to every American citizen, the right of trial by jury. Not only that, but they are deprived of any remedy in damages, which is a very poor remedy at best under the circumstances, against those who have persecuted and who have wronged them.

This is all I desire to say on the measure.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House insisted upon its amendment to the amendment of the Senate numbered 99 to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes; further insists upon its disagreement to the residue of the amendments of the Senate upon which the committee of conference were unable to agree; agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. GROUT, Mr. PITNEY, and Mr. DOCKERY managers at the conference on the part of the House.

RINALDO P. SMITH.

Mr. GORMAN. I ask the Senate to proceed to the consideration of the bill (H. R. 2054) for the relief of Rinaldo P. Smith, of Baltimore, Md. I am compelled to be absent for the balance of the evening. It merely refers a case to the Court of Claims.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Claims with an amendment, to strike out all after the enacting clause and insert:

That jurisdiction is hereby conferred on the Court of Claims to hear and determine the claim of Rinaldo P. Smith, of Baltimore, Md., against the Government of the United States on account of the sale, purchase, or occupation by the Government, through its internal-revenue officers or others, of certain real estate of one George J. Stephens, in Greene County, Va., upon which the late firm of Smith, Ellett & Co., now represented by Rinaldo P. Smith, had a prior lien, and the right of the Government to plead the statute of limitations in bar of said claim is hereby waived: *Provided*, That said claimant file his petition, within sixty days from the passage of this act, in said Court of Claims, either at law or in equity, as he may deem the rights of his case shall require; and the Government shall, upon notice served according to the rules and practice of said court, appear and defend against said suit, and the same shall proceed to final hearing and judgment, with the right of appeal to the Supreme Court of the United States by either party as provided by law.

Mr. MILLS. What committee reported the bill?

Mr. GORMAN. It was reported unanimously from the Committee on Claims.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the Committee on Claims.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The Committee on Claims reported an amendment to strike out the preamble, which was agreed to.

OVERTON HOTEL COMPANY OF MEMPHIS, TENN.

Mr. HARRIS. I appeal to the courtesy of the Senator from New York [Mr. HILL] having the contempts of court bill in charge to allow me to ask unanimous consent to consider a resolution reported by the Committee on Claims in relation to the bill (S. 1666) for the relief of the Overton Hotel Company, of Memphis, Tenn.

Mr. HILL. I yield, not displacing the contempts of court bill.

Mr. HARRIS. The resolution is found in the report of the committee. The bill can be read if any Senator desires it.

By unanimous consent the Senate proceeded to consider the resolution reported by Mr. STEWART, from the Committee on Claims, May 26, 1896, and it was agreed to, as follows:

Resolved, That the bill (S. 1666) for the relief of the Overton Hotel Company, of Memphis, Tenn., together with all accompanying papers, be, and the same is hereby, referred to the Court of Claims in pursuance of the provisions of the act of Congress, "to provide for the bringing of suits against the Government of the United States," approved March 3, 1887, to find and report to the Senate the facts bearing upon the merits of the claim as to the term of occupancy of the said Overton Hotel from the 1st of January, 1863, at which date the said Court of Claims, having determined that the State of Tennessee ceased to be hostile territory and therefore not to be regarded as the seat of war within the meaning of the third section of the Bowman Act (see Neal *vs.* United States, C. Cls. R. 21, page 240), and the rental value of said property during said term of occupancy, and all other facts contemplated by the provisions of said act.

EAST WASHINGTON HEIGHTS TRACTION RAILWAY.

Mr. BLACKBURN. I ask the Senator from New York to yield to me that I may call up a bill.

Mr. HILL. I yield to the Senator from Kentucky, without prejudice to the contempts of court bill.

Mr. BLACKBURN. I ask the consent of the Senate at this time to call up the bill (S. 2840) to incorporate the East Washington Heights Traction Company of the District of Columbia.

Mr. CULLOM. It is a very long bill.

Mr. BLACKBURN. No, it is not. I apprehend that it will cause no debate and meet with no objection. It has been unanimously reported from the Committee on the District of Columbia.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDING AT DETROIT, MICH.

Mr. BURROWS. I ask the indulgence of the Senate to introduce a joint resolution and ask unanimous consent that it may be put upon its passage.

The joint resolution (S. R. 161) authorizing the Secretary of the Treasury to place a bronze tablet or inscription on the Government building now being erected in Detroit, Mich., was read the first time by its title and the second time at length, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be prepared and placed in some suitable position on the Government building now being erected in the city of Detroit, Mich., a bronze tablet or an inscription commemorative of the fact that the said public building is erected on the site of the British Fort

Lernoult, which was surrendered to the United States in 1796; and is also on the site of the American Fort Shelby, which was demolished in 1826: *Provided*, That the cost of such tablet shall be paid from the appropriation already made for the said building.

The VICE-PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DONATION OF CONDEMNED CANNON.

Mr. CULLOM. I ask leave to call up the bill (H. R. 2) disposing of two condemned cannon. It is a bill that I neglected to call up.

Mr. HILL. The Senator from Illinois is aware that a general bill providing for the disposition of condemned cannon has passed both Houses, and has been signed by the President.

Mr. CULLOM. That is true; but this bill passed the other House a long time ago, and it was expected that I would attend to it here. I neglected it, so I ask that it be passed now.

Mr. HILL. It may not be reached by the general law, possibly.

The VICE-PRESIDENT, Is there objection to the present consideration of the bill indicated by the Senator from Illinois?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to supply the First Regiment of Infantry of the Illinois National Guard with two condemned cannon, to be placed at the entrance to their armory at Michigan boulevard and Sixteenth street, Chicago, Ill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THOMAS GUINEAN.

Mr. MCBRIDE. I ask for the present consideration of the bill (S. 525) for the relief of Thomas Guinean, of Oregon.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to Thomas Guinean, of Oregon, the assignee of Bradley S. Hoyt, deceased, of California, $160, paid the United States by Hoyt on account of land entry at Shasta, Cal., and which entry was subsequently canceled.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes.

NAVAL APPROPRIATION BILL.

Mr. HALE. I submit the conference report on the naval appropriation bill, which has been agreed to by the House of Representatives, and ask for its adoption.

The VICE-PRESIDENT. The report will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 39, 42, 43, 44, 45, 46, 47, 48, and 52, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the word "two" inserted by said amendment insert the word "three"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: Insert after the word "one," in line 24, page 49 of the bill, the following: "and not more than one"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: Strike out, in line 3 of said amendment, the word "five" and insert in lieu thereof the word "four"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "*And provided further*, That the Secretary of the Navy is hereby directed to examine into the actual cost of armor plate and the price for the same which should be equitably paid, and shall report the result of his investigation to Congress at its next session at a date not later than January 1, 1897; and no contract for armor plate for the vessels authorized by this act shall be made till after such report is made to Congress for its action;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$6,870,600"; and the Senate agree to the same.

EUGENE HALE,
M. S. QUAY,
A. P. GORMAN,
Managers on the part of the Senate.

C. A. BOUTELLE,
JOHN B. ROBINSON,
AMOS J. CUMMINGS,
Managers on the part of the House.

Mr. SMITH. Mr. President, I desire to say a word in regard to the report which has just been read.

As one of the members of the Committee on Naval Affairs opposed to the provision as to armor plate contained in the previous conference report, I desire to say that as the conferees have now settled the question and it is left with the Secretary of the Navy to take evidence and to be prepared at the next session of Congress to report as to the price which should be paid for armor plate, believing, as I do, that no Department of this Government has been more honestly or ably managed than the Navy Department, and having full confidence in the Secretary, I am fully satisfied and pleased with the result of the present conference.

The VICE-PRESIDENT. The question is on concurring in the report of the committee of conference, which has been read.

The report was concurred in.

Mr. BATE subsequently said: Not recognizing the amendment providing for battle ships by the mere reading of the number of the amendment, I was not aware—and the same is true of other Senators who were near me—of the effect of the approval of the conference report which was submitted by the Senator from Maine [Mr. HALE]. I now understand it involves the question as to the number of battle ships to be constructed. I did not know that at the time the report was read, and I want it understood that I am opposed to that portion of the report, as I certainly would not be willing under present conditions to agree to the construction of any number of new battle ships beyond two. I think the question was not understood by the Senate when it was submitted by the Chair.

The VICE-PRESIDENT. The Chair will again submit the question to the Senate on concurring in the report of the conference committee which was submitted by the Senator from Maine [Mr. HALE].

The report was concurred in.

PROPOSED EVENING SESSION.

Mr. TURPIE. I desire to have the Senate reconsider House bill 1094.

Mr. ALLISON. I ask unanimous consent that the order recently made for a recess this evening may be suspended.

The VICE-PRESIDENT. Is there objection?

Mr. TURPIE. I object.

Mr. ALLISON. One moment. I desire that the Senate may continue in session for such time as it may choose, and then meet at 10 o'clock to-morrow morning.

I desire to say for the information of the Senate that there will be no conference reports in addition to the one which has just been acted upon and the conference report on the Indian appropriation bill, which will be disposed of in a few moments.

The VICE-PRESIDENT. The Chair will submit to the Senate the request of the Senator from Iowa.

Mr. ALLISON. Which is, that at a later hour we adjourn the session until to-morrow morning at a convenient time, say 10 or 11 o'clock, instead of having a night session, which will inconvenience everyone.

Mr. COCKRELL. Say 11 o'clock.

Mr. ALLISON. I will say 11 o'clock, and let us reconsider our action on ordering a recess, so that we can have an adjournment when the pending measures are disposed of.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Iowa?

Mr. WARREN. Do I understand that the mover of the evening session now desires to have it dispensed with and to adjourn until to-morrow?

Mr. ALLISON. That is my request.

Mr. WARREN. I have this to say: I have been here helping to make a quorum for a great many days, and I have a measure, of which I have given notice, which I desire to have considered; and I do not want to have ourselves cut short so as to prevent its consideration. If, however, we are to remain in session to-morrow, there may be an opportunity for its consideration.

Mr. HILL. I suggest to the Senator from Iowa that we now simply rescind the order for taking a recess at half past 5 o'clock, which will not determine as to how long we shall sit this evening.

Mr. ALLISON. That is all I ask.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Iowa that the order for a recess this evening be rescinded? The Chair hears none, and it is so ordered.

INDIAN APPROPRIATION BILL.

Mr. PETTIGREW. I submit a report of the committee of conference on the Indian appropriation bill.

The VICE-PRESIDENT. The report will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate numbered 69 and 70 to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"And it is hereby declared to be the settled policy of the Government to hereafter make no appropriation whatever for education in any sectarian school: *Provided*, That the Secretary of the Interior may make contracts with contract schools, apportioning as near as may be the amount so contracted for among schools of various denominations for the education of Indian pupils during fiscal year 1897, but shall only make such contracts at places where nonsectarian schools can not be provided for such Indian children and to an amount not exceeding 50 per cent of the amount so used for the fiscal year 1895."

And the Senate agree to the same.

R. F. PETTIGREW,
H. M. TELLER,
F. M. COCKRELL,
Managers on the part of the Senate.

J. S. SHERMAN,
CHARLES CURTIS,
GEORGE C. PENDLETON,
Managers on the part of the House.

The VICE-PRESIDENT. The question is on concurring in the report of the committee of conference.

The report was concurred in.

FRANCIS E. HOOVER—VETO MESSAGE.

Mr. TURPIE. I ask the Senate to proceed to reconsider the bill (H. R. 1094) granting a pension to Francis E. Hoover.

Mr. PLATT. Let the bill be read and also the President's message.

The VICE-PRESIDENT. The bill will be first read.

The Secretary read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension rolls, at the rate of $50 per month, the name of Francis E. Hoover, late a private of Company I of the Sixty-fourth Regiment of Ohio Infantry Volunteers, in lieu of the pension now being drawn by him.

Mr. PLATT. Now let the veto message be read.

The VICE-PRESIDENT. The message of the President will be read.

The Secretary read as follows:

To the House of Representatives:

I herewith return without my approval House bill numbered 1094, entitled "An act granting a pension to Francis E. Hoover."

It is proposed by this bill to grant a pension of $50 a month to the beneficiary therein named, who served as a private for about one year and nine months in the Union Army during the war of the rebellion.

I do not understand that it is claimed in any quarter that the present helpless condition of this soldier is at all attributable to his army service. He himself never applied for a pension until after the passage of the law of 1890, providing a pension for those who had served in the Army and are unable to maintain themselves by manual labor on account of disability not chargeable to army service. The committee of the House of Representatives, in reporting this bill, declare "the testimony does not show the disease of the soldier to be of service origin."

The beneficiary is now receiving the largest pension permitted under the law of 1890.

His condition may well excite our sympathy; but to grant him a pension of $50 a month without the least suggestion that his pitiable disability is related to his army service, and in view of the fact that he is now receiving the highest pension allowed by a general law enacted to expressly meet such cases, it seems to me would result in an unfair discrimination as against many thousand worthy soldiers similarly situated, and would invite applications which, while difficult to refuse in the face of such a precedent, must certainly lead to the breaking down of all the limitations and restrictions provided by our laws regulating pensions.

The value of pension legislation depends as much upon fairness and justice in its administration as it does upon its liberality and generosity.

GROVER CLEVELAND.

EXECUTIVE MANSION, *April 25, 1896.*

Mr. PLATT. What has been the action of the House of Representatives?

The VICE-PRESIDENT. The action of the House of Representatives will be stated.

The Secretary read as follows:

IN THE HOUSE OF REPRESENTATIVES, *May 21, 1896.*

The President of the United States having returned to the House of Representatives, in which it originated, House bill 1094, entitled "An act granting a pension to Francis E. Hoover," with his objections thereto, the House proceeded, in pursuance of the Constitution, to reconsider the same; and

Resolved, That the said bill pass, two-thirds of the House of Representatives agreeing to pass the same.

The VICE-PRESIDENT. The question is, Shall the bill pass, the objection of the President of the United States to the contrary notwithstanding?

Mr. PLATT. Mr. President, I should like some explanation of this bill. The President says that this soldier is receiving $12 per month under the act of 1890, and that there is no evidence showing that his disabilities are the result of army service. If that be so, I think it is the first time that we have increased a pension granted under the act of 1890 beyond the amount allowed by that act. I may be mistaken about that, but I wish the chairman of the committee would explain the case.

Mr. TURPIE. Mr. President, the controlling and only disputed question in this case is that of incurrence, whether the disease and disability to which the soldier is now subjected arose from his service in the Army. It is true the first report of the Committee on Pensions upon this subject was very meager, and perhaps sustained everything said in the message with respect to it; but the last report of the committee is a very full one, and I wish simply to read an extract from it.

I will say that the Committee on Pensions of this body have reported the bill unanimously after considering the veto message, and that the House of Representatives has decided nearly unanimously in favor of the bill against the veto.

With respect to the question of incurrence, I will read an extract from the testimony of physicians, and I regard it as very important. No extract from the testimony was put into the first report, which went to the President. The second report contains this extract:

There can be no doubt, at least to my mind, that the causative factor to this diseased condition, rheumatoid arthritis, is to be traced and placed to the exposure incident to military life; the damp ground upon which he slept, the poor food, the mental strain and excitement, produced a poor condition of body, which in after years was unable to resist the ravages of disease, and in this broken-down condition of body this essentially chronic disease found an easy victim.

That is the testimony of Dr. Hoopingarner, one of the principal physicians in Elkhart, Ind. He states the condition of the pensioner under oath, and then the committee go on to state that—

This statement is corroborated by four other physicians residing in Elkhart.

There, then, is the sworn testimony of five physicians that the condition of the soldier is due to his military service, and we should take the facts in the case. He was one year and nine months in the service, during which time he was in three pitched battles, one at Franklin and two other engagements, very severe engagements, perhaps the severest of the war. He made four forced marches. He was in perfect health, of the most sound constitution, and scarcely 18 years old when he entered the service. He returned without visibly suffering anything from the exposures and hardships to which he had been subjected; but everyone knows such exposures and hardships are drafts on the physical constitution which in the future must be honored. Nature avenges herself for such violations of her laws as are compelled by persons engaged in the military service as privates.

This soldier returned, went into his ordinary vocation, and was employed in it for many years. He suffered no disability, and therefore made no application for a pension until after 1890, when this rheumatoid arthritis appeared, to which perhaps he had some constitutional diathesis, but which it is certain that the military service aggravated to an unbearable degree. Now he is totally helpless. He requires the services not only of a third person, but of a fourth and fifth person. He is helpless in bed. He can be only handled by a sheet, which is fastened to cords and pulleys. He can not be touched without suffering exquisite pain. He lives, and that is all. The functions of life remain; real living has disappeared long ago. It is a living death. Any person not an expert, any person not a physician, any person in entire ignorance of medical science would inquire as to this man's history: Was he dissipated in any way; the victim of any vice? He is a man of blameless life; without fault; with no bad habits; with no bad associations; a law-abiding citizen; a moral man—more than moral, yet utterly helpless at this time from physical disease.

If subject to exposure, rheumatism may come upon a person who has never been in the Army, but it does not come without some exposure. He had none. He was a clerk in a drug store. That was his vocation up to the time he was unable to stand behind the counter. Then he would sit. Finally he got so that he could not do that. Then he could not leave his bed. That is the position he is in—he can not leave his bed, can not attend to himself, can not feed himself, can not attend to the ordinary functions of nature.

What, then, is there in the history of the man, except his military service, to which a disease of so fateful a character can be traced? What is there in his habits; what in his custom; what in his indulgences? Nothing, sir. There is but one cause for this disability, and that cause is his military service.

I do not make this argument as against the message of the President. The President has the constitutional right to veto any bill, but we have, as Senators, the constitutional right to consider a veto, to review it, to examine the evidence, to further examine it, and, in the further examination of it, I think any Senator will come to the conclusion that the bill is a meritorious one, and that, although the first report may have and does justify the description of this disability given in the message, the later

and fuller report and evidence justify the passage of the bill. Indeed, the passage of the bill and the payment of the money will be a very small and pitiful compensation for that suffering, that agony, that intense agony, that this man is subjected to day and night in the helpless condition in which he must live if he live many months or years in the future.

Mr. PLATT. I understand from the statement of the Senator from Indiana that the committee are satisfied that the disease from which the man is suffering originated in the service; that its origin may be traced to the service. Not being a physician myself, I should like to inquire of the chairman of the committee, who sits next to me [Mr. GALLINGER], what this disease is, not in medical language, but in common, ordinary language, so that we may understand it.

I desire to say that I have only one question in this case, and that is whether we may fairly believe that the present lamentable condition of this soldier results in any way, directly or even approximately, from his army service? If so, I think we ought to pass the bill over the veto.

Mr. GALLINGER. I will make very hurriedly a statement concerning this case. If one of the pages will kindly pass the photographs I have here around the Senate, Senators will see for themselves this man's condition.

I made the report which is now before the Senate, and I frankly admit in that report that the previous report was unfortunate. I said:

It is to be regretted that the report first made in the case did not specifically set forth in detail the material facts concerning the soldier's military record and the relation of his army service to his present disabilities.

The first report, I will say, was very brief, and upon that report the President had an undoubted right to veto the bill; but, before proceeding further, I will say to the Senator from Connecticut [Mr. PLATT] that he is mistaken when he says that we have not increased pensions under the act of June 27, 1890, beyond $12. We have increased quite a good many pensions, I will say, during the present session of Congress; and of course it is competent for Congress to increase those pensions, and I suppose it is really competent for Congress to pension anybody, whether he has been in the military service or not, or received his disabilities in the service of the Union or not. That is an undoubted right that Congress has if it chooses to exercise it.

I said further:

It will be observed that the report shows that the soldier is bedridden and absolutely helpless, but it also sets forth that "the testimony does not show the disease to be of service origin." Acting upon this latter statement, the bill was vetoed by the President.

When this matter went to the House of Representatives, it became the subject of careful consideration by the Committee on Pensions—and it is a matter which they ought to have attended to in the first place more carefully than they did—and a very lengthy report was submitted; and that report goes to show these facts:

Francis E. Hoover, the claimant, enlisted in Company I, Sixty-fourth Regiment of Ohio Volunteers, in February, 1864, when he was but 16 years of age. Without being acclimated or in any way inured to the hardships of a soldier's life he was at once put into active service with General Sherman, and participated in the battles and skirmishes of that vigorous campaign resulting in the capture of Atlanta. After General Sherman had started on his march to the sea the claimant's regiment was ordered to support General Thomas. Mr. Hoover was with his regiment on that tiresome and perilous march back to Nashville. He participated in the battles of Spring Hill and Franklin, and then in the two days' struggle with Hood at Nashville. He joined in that active pursuit of the remnant of Hood's army, and as a result of his extreme hardships and exertion varicose veins appeared in both of his legs. This condition gave rise to distressing ulcerations. After these ulcers were healed they would remain in that condition but a short time when they would again break out in festering sores. This has continued at intervals ever since his army service. How much of the poison from these festering sores passed into the circulation and was absorbed into the system it is quite difficult to tell; but that much of this did take place is evident from the fact that the ulcers when once healed would not remain so, but would break out again with equal if not greater violence.

It also appears from the statements of the physicians who have examined him that the legs are badly swollen and discolored. They also tell us that structural changes have taken place in the articulation of the joints. This would hardly have been looked for if the blood current had been pure. Had there been no other complications it is quite evident that this disease alone would have ultimately rendered the soldier helpless, and perhaps ere this. But in 1886 he was attacked with rheumatism, from which he never recovered. There were periods of partial relief from the effects of this disease but there were recurrences of the attack, and each time with greater severity. About four years ago this disease assumed a permanent and most distressing form. Every joint in the body became anchylosed—

That is, absolutely stiffened—

He can not now move hand or foot. He has no use of any of the joints of the body.

The spinal column has become perfectly rigid, and there is no power of rotation of the head—it is permanently fixed in one position. He can not turn himself in his bed and would perish with hunger with victuals all around him. A more distressing condition can not be imagined. How much of this rheumatic condition is due to the ulceration of his legs we are not fully prepared to say; but should it be assumed that his rheumatism is an independent disease, having no connection with the ulcerations, still, we are thoroughly convinced that a system so weakened and debilitated by ulcerations, and whose blood current had been contaminated by poisons absorbed from these festering sores, was in a poor condition to resist the attacks of disease, especially one of such prostrating persistence as rheumatism.

We have the testimony of a distinguished physician of Elkhart, Ind., who has personal knowledge of this soldier, to the effect that the disease, in his opinion, is due to his military service, and that opinion, as the Senator from Indiana [Mr. TURPIE] has stated, has been corroborated by four other physicians of repute. The committee add:

With the evidence now before us we think, as we have before stated, that the present disabilities of this soldier are fairly attributable to his army service. We find him in a most pitiable condition, utterly helpless, requiring the attendance of a strong man. He is entirely destitute of all worldly means and has no income aside from the small pittance of $12 per month. This will not support him, much less pay his necessary attendant. All hope of recovery is gone. He has suffered and must continue to suffer untold tortures until death relieves him. He gave the best days of his vigorous youth to his country, and out of his helplessness he asks us for bread and support. If Congress does not give relief, he must go to the poorhouse and there end his days.

In reporting the bill and advising that it should be passed, the objections of the President to the contrary notwithstanding, I did it with the firm belief in my own mind that the terrible disease from which this soldier is suffering can be fairly attributed to his army service. If that were not true it would not deter me from voting to pension this man as proposed in the bill. I hardly think it would deter Congress from voting the proposed pension, but the committee at least believe, and their belief is based upon medical testimony, which, I will say in justice to the President, was not incorporated in the first report made in this case, that this man's disabilities are fairly attributable to his army service, and therefore they think the bill ought to be passed, the objections of the President to the contrary notwithstanding.

The VICE-PRESIDENT. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding? The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BATE (when his name was called). I am paired with the Senator from Utah [Mr. BROWN].

Mr. BLACKBURN (when his name was called). I am paired with the senior Senator from Michigan [Mr. MCMILLAN].

Mr. BURROWS. If my colleague [Mr. MCMILLAN] were present, he would vote "yea."

Mr. BLACKBURN. Then I will withhold my vote. If he were present, I should vote "nay."

Mr. BLANCHARD (when his name was called). I am paired with the Senator from North Carolina [Mr. PRITCHARD].

Mr. CULLOM (when his name was called). I have a general pair with the Senator from Delaware [Mr. GRAY]. I am satisfied that if present he would vote as I will, and I will therefore vote. I vote "yea."

The roll call was concluded.

Mr. WALTHALL. I am paired with the Senator from Pennsylvania [Mr. CAMERON].

Mr. FAULKNER. I am paired generally with the Senator from West Virginia [Mr. ELKINS], but for the purpose of making a quorum I will vote. I vote "yea."

Mr. WALTHALL. I will vote for that purpose. I vote "nay."

Mr. BLACKBURN. For the purpose of making a quorum I will vote, notwithstanding my pair. I vote "nay."

Mr. BURROWS (after having voted in the affirmative). I have a pair with the senior Senator from Louisiana [Mr. CAFFERY]. I voted inadvertently. I do not know whether or not the vote should stand. I understand there is no quorum, and I will permit my vote to stand.

Mr. BLANCHARD. I suggest to the junior Senator from Michigan [Mr. BURROWS] that I am paired with the Senator from North Carolina [Mr. PRITCHARD], who is absent. I understand the junior Senator from Michigan is paired with my colleague [Mr. CAFFERY], who is also absent. I suggest that we exchange pairs and vote.

Mr. BURROWS. That will be entirely agreeable to me.

Mr. BLANCHARD. I vote "yea."

Mr. BURROWS. I am recorded as having voted in the affirmative.

Mr. BLANCHARD. It is understood that the pair of the Senator from North Carolina [Mr. PRITCHARD] and myself is transferred to my colleague [Mr. CAFFERY].

The VICE-PRESIDENT. It will be so noted.

The result was announced—yeas 31, nays 7, as follows:

YEAS—31.

Allen,	Clark,	Hawley,	Pettigrew,
Allison,	Cockrell,	Hill,	Platt,
Bacon,	Cullom,	Jones, Ark.	Smith,
Blanchard,	Daniel,	McBride,	Teller,
Burrows,	Dubois,	Mitchell, Oreg.	Turpie,
Butler,	Faulkner,	Nelson,	Warren,
Cannon,	Gibson,	Palmer,	Wetmore.
Chilton,	Hale,	Peffer,	

NAYS—7.

Berry,	Harris,	Mills,	Walthall.
Blackburn,	Lindsay,	Vest,	

NOT VOTING—51.

Aldrich,	Gallinger,	Mantle,	Sewell,
Baker,	Gear,	Martin,	Sherman,
Bate,	George,	Mitchell, Wis.	Shoup,
Brice,	Gordon,	Morgan,	Squire,
Brown,	Gorman,	Morrill,	Stewart,
Caffery,	Gray,	Murphy,	Thurston,
Call,	Hansbrough,	Pasco,	Tillman,
Cameron,	Hoar,	Perkins,	Vilas,
Carter,	Irby,	Pritchard,	Voorhees,
Chandler,	Jones, Nev.	Proctor,	White,
Davis,	Kyle,	Pugh,	Wilson,
Elkins,	Lodge,	Quay,	Wolcott.
Frye,	McMillan,	Roach,	

The VICE-PRESIDENT. No quorum has voted. The Secretary will call the roll.

Mr. MILLS. I move that the Senate adjourn. We can not do anything without a quorum, and we would be kept here just to try to get a quorum.

The motion was agreed to; and (at 5 o'clock and 40 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, June 10, 1896, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

TUESDAY, *June 9, 1896.*

[*Continuation of legislative day of June 6, 1896.*]

The recess having expired, the House, at 10 o'clock a. m., was called to order by the Speaker.

ORDER OF BUSINESS.

Mr. DANIELS. Mr. Speaker, so much time has been consumed in dilatory proceedings——

Mr. RICHARDSON. Mr. Speaker, I rise to a question of order. A motion was made on yesterday to reconsider. I understand the gentleman from New York is starting out to discuss the election case.

Mr. DANIELS. Yes.

Mr. OWENS. Mr. Speaker, that is not before the House yet.

Mr. MCMILLIN. I suppose that, reserving the rights that existed for reconsideration under the motion that was made, there would be no objection to the gentleman making a statement.

The SPEAKER. The Chair does not know what rights are reserved.

Mr. MCMILLIN. The RECORD shows what rights are reserved.

The SPEAKER. Does the gentleman choose to raise the question of consideration?

Mr. OWENS. That was raised.

The SPEAKER. Was it not voted on?

Mr. OWENS. It was voted on; but a motion to reconsider was made, which is still pending.

Mr. MCMILLIN. I do not know what the purpose of the gentleman from New York is.

The SPEAKER. Very well. If there was a motion to reconsider it is now before the House, if it was recognized, and the question is, Will the House reconsider the vote by which it determined to consider the resolutions?

A MEMBER. Who made the motion?

Mr. HENDERSON. The gentleman from New York [Mr. DANIELS] made it himself, I think.

Mr. MOODY. Judge DANIELS was not recognized by the Chair for the purpose of making the motion. The RECORD will show that he was not recognized.

Mr. DANIELS. I made the motion to lay the motion to reconsider upon the table, and, as I understood it, it was so ordered.

Mr. RICHARDSON. Oh, no. There was no vote taken on it.

Mr. MCMILLIN. There was no vote taken. Pending that, there was a recognition for a conference report.

Mr. DANIELS. I had the attention of the Speaker pro tempore before any action was taken on that subject.

Mr. RICHARDSON. When?

Mr. DANIELS. Yesterday afternoon.

Mr. OWENS. You made a motion to reconsider and moved to table it, but the conference report cut it off.

Mr. MCMILLIN. The conference report cut it off. Pending the vote on that, a conference report was received. The RECORD shows that.

The SPEAKER. The question is on laying the motion to reconsider upon the table.

The question was taken; and the Speaker announced that the ayes seemed to have it.

Mr. OWENS, Mr. RICHARDSON, and Mr. MCMILLIN demanded a division.

Mr. GROW. Mr. Speaker, I call for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 99, nays 31, not voting 224; as follows:

YEAS—99.

Mr. TALBERT. Mr. Speaker, I desire to ask indefinite leave of absence for my colleague, Mr. STRAIT. I have just received a telegram from him in which he states that he is now in bed sick.

The SPEAKER. The Chair thinks it is not in order at this time.

The following pairs were announced:

Until further notice:

Mr. DALZELL with Mr. CRISP.

Mr. ALDRICH of Alabama with Mr. MOSES.

Mr. WILSON of Ohio with Mr. RUSK.

Mr. LEISENRING with Mr. TUCKER.

Mr. WHITE with Mr. SPARKMAN.

Mr. WILLIAM A. STONE with Mr. LAWSON.

Mr. COLSON with Mr. KENDALL.
Mr. FOOTE with Mr. HUTCHESON.
Mr. HICKS with Mr. LITTLE.
Mr. MEIKLEJOHN with Mr. CROWLEY.
Mr. BARHAM with Mr. KYLE.
Mr. JOHNSON of Indiana with Mr. COX.
Mr. TRACEY with Mr. MCRAE.
Mr. SMITH of Michigan with Mr. BERRY.
Mr. TOWNE with Mr. WILSON of South Carolina.
Mr. BOWERS with Mr. MINER of New York.
Mr. COUSINS with Mr. LIVINGSTON.
Mr. FOSS with Mr. MCLAURIN.
Mr. HEATWOLE with Mr. DINSMORE.
Mr. STEELE with Mr. MCCLELLAN.
Mr. SPALDING with Mr. SPENCER.
Mr. STEPHENSON with Mr. NEILL.
Mr. GILLETT of Massachusetts with Mr. COWEN.
Mr. MCCALL of Massachusetts with Mr. DE ARMOND.
Mr. PICKLER with Mr. MILES.
Mr. JENKINS with Mr. DENNY.
Mr. MILNES with Mr. STRAIT.
Mr. PITNEY with Mr. DOCKERY.
Mr. GROSVENOR with Mr. MCMILLIN.
Mr. THORP with Mr. JONES.
Mr. BARNEY with Mr. BUCK, except Underwood election case.
Mr. HITT with Mr. WASHINGTON, except Underwood election case.
Mr. ROYSE with Mr. TURNER of Virginia, except on Tucker-Yost election case.
For this day:
Mr. SNOVER with Mr. MCCREARY of Kentucky.
Mr. STEWART with Mr. SORG.
On this question:
Mr. FENTON with Mr. STROWD of North Carolina.
Mr. DOVENER with Mr. CATCHINGS.
Mr. LEONARD with Mr. BARTLETT of Georgia.

Mr. MCMILLIN. Mr. Speaker, I am paired, I believe, with the gentleman from Ohio, Mr. GROSVENOR. I voted in the negative. I withdraw my vote.

Mr. TRACEY. Mr. Speaker, I am paired with the gentleman from Arkansas, Mr. MCRAE. I voted "yea." I withdraw my vote.

Mr. MCCALL of Tennessee. Mr. Speaker, my colleague, Mr. BROWN, is detained at his house on account of sickness. If it is in order, I want to move that he be excused.

The SPEAKER. The Chair thinks it is not in order just now.

Mr. JENKINS. Mr. Speaker, I desire to say that my colleague, Mr. BARNEY, is detained from the House by sickness.

The SPEAKER. On this question the yeas are 99, the nays 31.

Mr. MCMILLIN. No quorum.

The SPEAKER. The Chair is informed that there are 16 present in addition to that. Under the rule of the House there will be a call of the House, and the Sergeant-at-Arms will proceed at once to bring in absent members.

Mr. DANIELS. I move that there be a call of the House.

The SPEAKER. The Clerk will proceed to call the roll. Each member as he answers to his name may vote upon the pending question, so that it requires another vote upon the pending question. The House will govern itself accordingly.

Mr. BAILEY. I desire to ask if it is not a fact that the rule only requires the absentees to answer or are they brought to the bar to vote? It does not require that those who had previously responded should answer.

The SPEAKER. The Chair thinks it requires all members to answer.

The Clerk shall call the roll, and each member as he answers to his name may vote on the pending question.

Mr. BAILEY. I think that only provides for those who have not answered upon the previous call; otherwise a gentleman who had voted on the other call would be required to vote again.

The SPEAKER. The Chair thinks the only solution as the matter stands is for each member to vote when his name is called, and then when the roll call is finished the absentees may vote. The Sergeant-at-Arms will close the doors, and the Clerk will call the roll.

The Clerk proceeded to call the roll.

The SPEAKER (at the end of the first call). The Clerk will now call the names of members failing to respond to the first call. The Chair trusts that gentlemen who are present and do not vote will announce that they are present, to avoid confusion.

Mr. OWENS. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. OWENS. In view of the request of the Chair to members to announce their presence if they do not vote, I wanted to ask whether they might not possibly be confused with the 16 already counted, or whether those 16 are to be used again in making a quorum?

The SPEAKER. The Chair thinks there will not be any confusion if gentlemen answer that they are present. The Clerk will call the roll.

Mr. JOHNSON of California. Mr. Speaker, is it in order at this time to ask leave of absence?

The SPEAKER. The Chair thinks it is not.

Mr. MCMILLIN. Mr. Speaker, I desire to know if I am recorded?

The SPEAKER. The gentleman is recorded.

Mr. MCMILLIN. I withdraw my vote, being paired.

Mr. DOOLITTLE. Mr. Speaker, I ask that my colleague, Mr. HYDE, be excused for the balance of this session, as he has been ill for some weeks past.

The SPEAKER. The Chair thinks the request is not in order at this time.

Mr. DOOLITTLE. Well, my colleague's illness accounts for his absence on the recent roll calls.

The SPEAKER. On this question the yeas are 126, and the nays are 43. The following-named gentlemen are present:

Mr. APSLEY, Mr. HEATWOLE, Mr. LEISENRING, Mr. TRACEY, Mr. RICHARDSON, Mr. MCMILLIN, Mr. WARNER, Mr. BELKNAP, Mr. FITZGERALD, Mr. JOHNSON of North Dakota, and Mr. DE WITT.

The Chair desires to say to these gentlemen that under a misapprehension he stated a while ago that they could not vote, but they are marked present, and their presence is necessary to constitute a quorum, and under the rule they have a right to vote if they desire to do so.

Mr. JOHNSON of North Dakota. Mr. Speaker, am I not recorded?

The SPEAKER. The gentleman is not recorded.

Mr. JOHNSON of North Dakota. I voted "yea" on the motion to lay on the table.

The SPEAKER. The change will be made.

Mr. WARNER. Mr. Speaker, I was present, but did not vote; I desire to vote "yea."

Mr. WARNER'S vote was recorded.

Mr. DE WITT. Mr. Speaker, I desire to vote "yea."

Mr. DE WITT'S vote was recorded.

Mr. HEATWOLE. Mr. Speaker, I was present, but being paired with the gentleman from Arkansas, Mr. DINSMORE, I did not vote.

Mr. RUSSELL of Georgia. Mr. Speaker, I came in during the roll call, and am present to make a quorum.

The SPEAKER. Does the gentleman desire to vote?

Mr. RUSSELL of Georgia. I vote "nay."

Mr. FITZGERALD. Mr. Speaker, I desire to vote "nay."

Mr. FITZGERALD'S vote was recorded.

Mr. BELKNAP. Mr. Speaker, I desire to vote "yea."

Mr. BELKNAP'S vote was recorded.

The roll call finally stood as follows:

YEAS—131.

The SPEAKER. The Chair announces the corrected vote as follows: Yeas 131, nays 45; present, Messrs. APSLEY, HEATWOLE, LEISENRING, TRACEY, RICHARDSON, HURLEY, MCMILLIN, and HUFF. A quorum being present——

Mr. BOUTELLE. Mr. Speaker, I desire to present a conference report.

The SPEAKER. The Chair desires to state that on the vote on the motion to lay on the table the motion to reconsider a sufficient number of members were present to constitute a quorum. The decision of that question is consequently in the affirmative, and the motion to reconsider is laid on the table.

Mr. MCMILLIN. I rise to a point of order.

Mr. BOUTELLE rose.

Mr. MCMILLIN. I do not wish to lose my right in this matter, but I am entirely willing that the gentleman from Maine shall go forward with his conference report, this matter being held in abeyance until that is entered.

Mr. BOUTELLE. I withdraw the report for the present.

Mr. MCMILLIN. The point of order I desire to make is this: The Committee on Elections No. 1, from which this alleged report purports to come, is constituted of nine members, the following being the members of that committee: Judge DANIELS of New York, Mr. ROYSE of Indiana, Mr. COOKE of Illinois, Mr. LEONARD of Pennsylvania, Mr. MOODY of Massachusetts, Mr. LINNEY of North Carolina, Mr. DINSMORE of Arkansas, Mr. BARTLETT of Georgia, and Mr. TURNER of Virginia. Therefore it takes five to constitute a majority of that committee; and there is not in this case what the rules of the House and its practice require to bring a question before the House and make it privileged—the report of a majority acting in the matter. In support of this statement, I read what purports to be the majority report made by the gentleman from New York [Mr. DANIELS].

The SPEAKER. Is the gentleman's point of order that this case is not to be heard?

Mr. MCMILLIN. Yes, sir.

The SPEAKER. It is too late to raise that, because the House has voted to consider it.

Mr. MCMILLIN. But the House would not vote to consider that which was not a report. This alleged report is signed by only four members of the committee.

The SPEAKER. The House has voted to consider the case, and it is too late now to make the point which the gentleman is trying to raise. If the gentleman had wished to make that point of order, supposing it was tenable, he should have made it before raising the question of consideration——

Mr. MCMILLIN. I did not suppose, Mr. Speaker——

The SPEAKER. Because if the matter was not in order the House could not, if the point were raised, consider it.

Mr. MCMILLIN. But the House does not lose its right to question the validity of a report which purports——

The SPEAKER. Not by voting to consider the case? Certainly it does.

Mr. MCMILLIN. I trust the Chair will indulge me just a moment; I shall be very brief.

The subscribers—

This alleged report begins—

members of the Committee on Elections No. 1, respectfully report that they have heard the argument and considered the evidence presented in the contested election of the Ninth Congressional district of the State of Alabama, wherein Truman H. Aldrich, who was the candidate of the Jeffersonian Democrats and Republicans, is the contestant, and Oscar W. Underwood, who was the candidate of the Democratic party, is the contestee.

That the said district is, and was on the 6th day of November, 1894, when the contested election was held, composed of the counties of Bibb, Blount, Hale, Jefferson, and Perry. And the contests have wholly arisen in precincts in the counties of Hale, Jefferson, Perry, and Blount, the principal contests being in Jefferson County.

The subscribers have carefully considered the evidence and arguments relating to these precincts and the election held therein, and they do decide and find the following facts and conditions to be established, that is to say.

Then it goes on with the balance of the report, which I will not take time to read. It is signed, CHARLES DANIELS, chairman; L. W. ROYSE, EDWARD D. COOKE, FRED C. LEONARD.

This does not purport to be a report of a majority of the committee.

Mr. BAILEY. Will the gentleman from Tennessee allow me a suggestion?

Mr. MCMILLIN. With pleasure.

Mr. BAILEY. As I caught what the gentleman has just read, this does not purport to be the report of the committee, but simply the report of certain members of the committee.

Mr. MCMILLIN. Of four members of the committee. It is not a report.

Mr. BAILEY. That is a proceeding unknown to the rules of the House. The only report that the House can——

The SPEAKER. All that may be true just as alleged, but the House has voted to consider, not the report, but the case.

Mr. MCMILLIN. Then the House is considering, not the report, but the case—ignoring the report?

The SPEAKER. The House as a House has voted to consider the case.

Mr. OWENS. Will the Speaker allow me one suggestion?

The SPEAKER. Certainly; the Chair will allow any gentleman a suggestion.

Mr. OWENS. When the House voted on the motion to consider the case, and not the report, which was privileged, was not that substantially and in fact a motion to suspend the rules and consider the case?

The SPEAKER. Not in the least.

Mr. OWENS. As a matter from the committee, it would have been a matter of privilege.

The SPEAKER. It was a matter of privilege independently of the report of the committee. There are certain cases which have the right of way because the committee in charge of them is permitted to report at any time for consideration——

Mr. OWENS. Yes; but "the committee" did not report.

The SPEAKER. But the right of an election case is higher even than the rules of the House.

Mr. MCMILLIN. When the rules of the House provide for the disposition of a question in the way that the Chair states, or for reference to a committee, we contend that when the matter is referred to the committee under the rules of the House it can only get back to the House by affirmative action of a majority of the members of the committee.

The SPEAKER. That question could have been passed upon had it been raised before the House determined to consider the case.

Mr. MCMILLIN. But it strikes me, Mr. Speaker, that the matter having been in charge of the committee, having been referred to it by the House, that point may be raised at any time.

The SPEAKER. After the House has decided to consider?

Mr. MCMILLIN. At any time before action is taken.

The SPEAKER. The Chair thinks the point of order is not well taken.

Mr. MCMILLIN. I wanted to present the facts and call the attention of the House and of the country to the matter to show that we are proceeding here to consider what is claimed to be a report, but which, under the rules of the House, is not a report of the committee.

The SPEAKER. The Chair thinks that would be an argument as to the merits, but is not sufficient to induce the Chair to overrule the express determination of the House to consider the case.

Mr. DANIELS. Mr. Speaker, I will make one observation in reference to the subject alluded to by the gentleman from Tennessee [Mr. MCMILLIN] before proceeding with the argument of this case, and that is that the minority report is signed by only three members, and we have therefore a majority on the report that is presented to the House by the committee. In addition to the circumstance of the report being signed by four members of

the committee, we have also the cooperation of the gentleman from North Carolina [Mr. LINNEY], another member of the committee, and also, generally, of Mr. MOODY, from Massachusetts, who, however, did not sign the report.

Now, Mr. Speaker, on account of the great delay to which we have been subjected in this matter before the House, I propose to restrict the debate to twenty-five minutes on each side, and at the expiration of that time I will move the previous question. We shall concede to the other side, if they desire it, twenty-five minutes, either to one of the members or to some of the gentlemen on that side who may desire to discuss the question, and at the expiration of fifty minutes I shall demand the previous question, as I have stated, because of the great delay to which the case has been subjected.

Mr. MCMILLIN. The gentleman makes that, I suppose, as an announcement, not as a proposition. The reading of the alleged report could not be had within that time. The time is absolutely inadequate.

Mr. DANIELS. The previous question will be moved at the expiration of fifty minutes.

This case comes before the House for its consideration as a contest growing out of the right of one of these parties to the seat as a Representative from the Ninth Congressional district of the State of Alabama. In the short time in which I shall ask the attention of the House in regard to the case I simply propose to submit to their consideration the leading facts relating to the contest and to show the enormity, by those circumstances which I shall undertake to narrate, of the manner in which this election was carried on in that Congressional district of the State of Alabama.

The first precinct to which I shall direct your attention is the Elyton precinct, a precinct where it was proposed to deduct some 29 votes from the contestee; but on consideration of one member who did not consent to the count so made, the deduction was limited to but 5; and so there is no necessity of going further into that subject, as it will not affect the general result.

At Hillman precinct, in the same county, the polls were not opened at all. This is usually a Republican precinct; there was a small Republican majority in the precinct, and the officers of election refused to open the polls or hold the election at all. This means that certain votes were lost for the contestant to which he would otherwise have been entitled. There is no way of determining what the result of the election would have been, although the proof is that there would have been a Republican majority. The excuse for not opening the polls was that it was a very cold day and they had no means to make a fire. In the Birmingham precincts, two of them, a large number of deputy sheriffs were appointed as officers of election, and they interfered with and arrested persons who were present, which had the effect of intimidating voters and driving them away from the polls, and the result was that the Republicans lost a large number of votes. The pretense on which these arrests were made was that the persons arrested had tickets and were showing the colored people how they should mark their tickets in order to vote the Republican ticket. Here [indicating] is a sample of the ticket they had, showing that it is a mere skeleton or copy of the ticket, and was simply used as a direction to the ignorant voters, indicating to them how to mark the cross on their ticket, or showing where it should be placed. The law of Alabama provides that no person shall have in his possession a ticket or a copy of a ticket that is to be voted on the day of election, under pain of prosecution. This was not a copy of the ticket, but simply a skeleton of a ticket for the purpose of showing the ignorant people where they could mark the ballots for the purpose of voting them. These people were driven to a distance from the polls by these officers and by the prosecutions of the persons who were endeavoring to instruct them as to how to cast their votes.

Here is a ticket [indicating] which was used in this election in Alabama, and it will be seen that it is entirely different from the skeleton ticket which was used to show these ignorant voters how to mark them. We estimate that contestant lost from 60 to 69 votes by this proceeding. There was also quite a distance between the election booth and the room in which the ballot box was located; but we have made no particular point about that, although there was this gross irregularity in this arrangement. We simply ask the deduction of the votes in the two precincts of Birmingham and the number proven to have been lost to the Republican candidate by intimidation caused by the arrest of those persons who were showing the colored voters how to cast their votes.

I come now to the Bessemer precinct, in that district. This precinct was shown as having a registered vote of 1,271. On the evening preceding the election the Democratic officer—sworn to be a Democrat—put into the box the ballots of every voter, and delivered them to the proper officials of election. This box was delivered to Mr. McKinney, the deputy sheriff, the box being then locked. McKinney testified that the locked box was delivered to him with the key tied to the handle. He says he put it in the sheriff's office and locked the door; that there was only one key to the door, and McKinney and a Mr. Matingly were the only persons who used the room. He locked the room and left the ballot box there with the key tied to the handle of the box.

In the morning he went there. The box was heavy the night before, as he says, and it was lighter when he took it up in the morning. It was locked, apparently. The door was locked. The windows were down. He carried the box to the poll. It was understood at the polls before the election was opened that this box had been robbed, and Mr. McKinney says that when he went there and found the box in this condition (and he was probably the person who depredated upon these ballots in this manner) he found evidences of burnt paper in the grate. When the box came to be opened the books were gone. The challengers' oath was gone, and over 2,000 ballots had been taken out of that box and burned in the grate. So when the ballots were brought to the polling place and opened in the morning, there were but 127 ballots in the box, and one of those was spoiled. One hundred and twenty-six were voted.

Mr. Collins, who was a resident of the district there and familiar with all the voters in the locality, testifies that he knows that the night before the election took place word was passed around to the Democrats to be there early in the morning to vote, because the ballots would give out. The Democrats appeared there early in the morning and were taken up the back way, according to the evidence, while others who were there to vote, members of the opposition, were delayed in front until these ballots were all voted—at about half past 8 o'clock—and there were no more ballots to be voted. There were over 2,000 ballots destroyed, and destroyed by the men who had control of the election and the custody of this box, so that the opposition had no means of expressing its sentiments upon the subject of this election through the instrumentality of the ballot box.

Then, in addition to that, these inspectors of the election, who were probably concerned or confederated in the destruction of these ballots, took no measures at all to procure additional ballots, so that the voting could go on, and the matter was finally taken up by two outside men, one a Republican and one a Democrat, who went over to Birmingham, a city about 12 miles distant, to get additional tickets printed. They got them printed and returned to the polls there about 2 o'clock in the afternoon. There was a period of over five hours when there was no voting done, when there were no votes to cast at this election. When they returned there the inspectors were asked to open the polls and go on at once with this election, but they procrastinated in the matter until about half past 2 o'clock, when in answer to a request of Mr. Vaughn to Mr. Jackson that they should open the polls and go on voting, he said, "We will get them open soon enough for you damned Republicans"; so that that was all the satisfaction they got. When the polls were opened, these men who had been there for the purpose of voting had absented themselves, especially the persons who were employed in the manufacturing establishments at Birmingham, and they were justified in absenting themselves because it was announced by two of the managers when the ballots gave out that there would be no more voting, as the votes had given out, and they might as well go home, and they were sent home.

Now, upon this subject there was a paper published in Bessemer—a Democratic paper, the Bessemer Weekly—which commented on this matter very sensibly and very properly, in unmeasured terms, condemning the conduct of those persons who had stolen the ballots in this manner, to deprive the opposition of their privilege of voting. I have not time to read the entire article, but it contains this clause:

> A crime has been committed that should be ferreted out and the perpetrators brought to the penitentiary.
>
> There is not a man in Bessemer worthy of the name of man that approves of this crime or that can look with the slightest tolerance on those who would palliate or excuse it.

This is the language of a prominent Democratic paper, showing that the sentiment of the better portion of the Democratic party in that precinct was opposed to this destruction of ballots and opposed to the excluding of voters from voting in this manner.

It has been said in the minority report that these ballots were probably stolen by the Republicans, but there is not a word of evidence that any Republican knew where these ballots had been deposited. On the contrary, there is evidence showing that no other man knew where they were or how they had been left except this man McKinney, who was one of the managers of this election.

Under these circumstances we claim, while the evidence shows that from four to six hundred votes probably had been lost by the destruction of these ballots, that there should be allowed in this case to the contestant the number of 365 votes, making the number low, for the purpose of keeping it within conservative limits.

A question of a similar character came before the Fiftieth Congress, where Mr. Lacey made a report under somewhat similar circumstances, but where the system of voting was entirely different

from this, in which upon the authority of an election case this language is used:

When a legal voter offers to vote for a particular candidate and uses due diligence in endeavoring to do so, and is prevented by fraud, violence, or intimidation from depositing his ballot, his vote should be counted.

That has received the approval of the House in the case of Niblack *vs.* Walls. The case that we now present to the House is within this principle, for these men did all they could. They were ready to vote, and they were defrauded out of their votes as effectually as though the ballots had been by physical violence taken out of their hands.

Now, passing that, we will come down to the Marion precinct. There is a peculiarity that is found only in the case of this election, as well as this stealing of the votes.

Here is a plan of the court-house. The entrance is through there [indicating], through which the voter had to pass in order to get here where the booths were. Then here is a door passing through the partition to the next room, at the opposite end of the room to where the booths were. Here is the ballot box at the opposite end. Now, then, the voter went in here first, to prepare his ballot, and after he had prepared his ballot and was prepared to go in here, the ballot was taken by Mr. Hurt, a Democratic inspector of that election, and the voter was not allowed to take his ballot through this door and go into the room where the ballot box was; but it was taken from him by this man Hurt, no voter being able to follow him and see what he did with the vote and whether he deposited it or not in the ballot box, and he had no means of knowing whether Mr. Hurt had acted honestly in the matter. Now, Mr. Hurt made a statement to a Mr. Draper, who was a Democratic friend of his, subsequent to this election, when Mr. Draper informed him of the manner in which they managed those things in Mississippi, in which he says they did not manage it that way in the State of Alabama; that they divided their voting place into these two rooms, and then they took the ballots to carry them from one room to the ballot box, and changed them as they went to the ballot box. That is the testimony of Mr. Draper, who is a Democrat according to his own testimony, and Mr. Hurt did not take the stand to contradict it or to contradict the statement; and we submit that the statement is competent for the consideration of the House, because Mr. Hurt was a co-conspirator with the other conspirators carrying on a fraudulent election.

Now, the law of the State of Alabama requires that a room shall be provided by the sheriff for the purpose of carrying on the election, and that the booths should be placed in the room. Then, in addition to that, that when the voter had prepared his ballot he should hand his ballot to the inspector to deposit it in the ballot box. This was all evaded and prevented by the machinery resorted to in this case, and a system of fraud in this matter was created and perpetrated, as in no other election case that has been brought before the attention of this House in the consideration of these cases. The consequence is that there is no reliable evidence that any legal votes were deposited in the ballot box by the persons or under the authority of the persons who gave those tickets to Hurt. A man named Nelms testified that there were 196 Democrats on the polling lists, and he gave their names.

Now, these persons, if they voted there at all, were bound to go into this room and there prepare their vote; and while he knew all these persons, he could not give the name of any of the 196 as persons who passed through this room and prepared their votes there and delivered them for the purpose of voting any ticket at that election. He does not pretend to say that they voted; but he knew their names were on the list. If these men had voted he certainly would have noticed some of them, as he knew their names. He would have noticed them as they passed through this room, and would have given us the name of those whom he recognized; but there is not a word of that kind of testimony. He gives the names of those who are on the poll list, and that poll list was made for the purpose of accommodating those who were interested on this occasion.

Another man, Moore, says that 28 Republicans belonged to a Democratic club, but he does not say that they voted. On the other hand, upon his final examination he said he had reason to suppose a good many of them voted; and that was all he said about this, showing the entire scheme through which this matter was carried on, being a device as completely effective as it could be, by placing the ballot boxes in one room and a place to prepare the ballots in the other, by means of which fraud was successfully perpetrated. As to those ballots, the committee have concluded that they should be entirely rejected. There were 45 votes for the contestant, but they were not accounted for at the polls. Two hundred and twenty votes were found to be there for the contestee, and we have allowed the matter to stand with these entirely taken out of the account.

Now, as to the other precincts, which I will go through very rapidly, there are six of them concerning which no disagreement is made on the part of the contestee, but it is admitted on their part that as to those precincts the election has been substantially as it was claimed to be by the contestant, and that no more votes should be counted than those which the contestant is allowed.

As to the other precincts, six or seven in number, we present further objections. In Gallion beat, and in Greensboro beat, and in Laneville precinct, persons were brought on the stand to swear that they voted for Underwood, colored persons, Republicans apparently, over 200 of them, and the House will see when attention is called to this fact, as it will be presently by my colleague on the committee, that the questions were written out before they were put to these persons, and they were required to answer in the words that had been prepared in advance for that purpose by the individuals who desired their testimony that they had voted for Underwood. For the purpose of showing that these ignorant people—for they nearly all signed with a cross—were induced to swear falsely upon that occasion, I will simply read a few words from the testimony of Mr. Jackson, in which he says that he was approached by one of the managers of the election and asked to swear that he had voted for Underwood. He said:

They wanted me to go in directly after dinner to say I voted, and I told him I could not do that; I was afraid I would injure myself. I told him I didn't know what to say or how when I got there, and he said, "Well, I will tell you what to say."

The evidence of Dickerson is to the same effect. He says that when he told Mr. Collins that he did not know what to swear to Collins said, "Well, we'll tell you," and that he then told Collins he could not recollect all that. That is the testimony to show that these men were corrupting voters—hiring voters to swear falsely for the purpose of sustaining the case of the contestee before this House; and the men who testified under the employment of these persons testified in such a manner that in the Gallion precinct answer after answer was repeated in the very same words by nearly 100 persons.

As to the Uniontown precinct or beat, we cut that out entirely, for the reason that the evidence shows that there were several persons noted upon the list who were at a distance of 7 or 8 miles, one of them 8 miles, from the polls on the election day, and one man's name was placed upon the list who had been dead for over eight years. Upon this subject Mr. Richard Ware testifies that he watched the polls from before they opened in the morning until 3 o'clock in the afternoon and that only 12 persons went in, but there was no vote returned for Aldrich there; showing on the whole face of the proceedings a concocted scheme for the purpose of making a false return, as it was made, and defrauding the other side out of the votes they were entitled to.

In the Five Mile precinct the ballots gave out at 1 o'clock in the afternoon. How they happened to give out no one understood and there was no explanation of it, but after 1 o'clock in the afternoon there were no ballots there and no effort was made to get ballots, and the consequence was that the voters who were ready to vote were unable to do so, having no tickets by which to express their will at the polls. We have found, on the evidence submitted to the committee, that there were certainly 40 votes lost there, but to be within the fair and square rule of safety, we have put the number at 22.

As to the Carthage precinct, there were 32 votes allowed there for Aldrich. Seventy-six persons came in and swore that they voted for Aldrich during the election; but all that we count there is 44 votes to be added to Aldrich.

Now, without going further into detail, what I have already stated illustrates substantially the manner in which this election was carried on in utter disregard of the right of the voters and of the right of the opposite party for the purpose of preventing them from voting at all, or for the purpose of putting their votes in the hands of men to deposit for them.

Mr. PAYNE. Mr. Speaker, I suggest to my colleague that it is desirable to ascertain whether some arrangement can not be made with gentlemen representing the minority by which the debate on this case shall be extended to a certain time, and then the vote be taken.

Mr. MCMILLIN. The gentleman from New York [Mr. DANIELS] announced that at the end of twenty-five minutes on a side he would demand the previous question. I said at the time, on behalf of the contestee, that we thought the time was unreasonably short. However, if we can come to some agreement by which there can be a fair opportunity for a hearing of this case we shall be very glad to do so.

Mr. PAYNE. What does the gentleman suggest as the time that the minority desire for debate under the arrangement?

Mr. MCMILLIN. My judgment would be that we should have two hours and a half on a side.

Mr. DANIELS. We have lost too much time for that.

Mr. PAYNE. That would extend the debate until pretty late in the day. Suppose that two hours were conceded, with the understanding that then the vote should be taken.

Mr. MCMILLIN. I presume I do not betray any confidence when I state that originally the managers of the case for the

majority proposed two hours, but that was rejected by us as too short a time. We still believe that the time is too short in which to dispose of an important question like this, involving the examination of nearly 2,000 pages of record, but we also realize that the situation is now not just exactly as it was then——

Mr. DANIELS. Considering all the time we have lost, I think we ought not to take two hours on a side.

Mr. McMILLIN. Mr. Speaker, I think the gentleman from New York will see, when he reflects calmly upon it, that the amount of time lost in any preliminary proceeding does not affect the question of the amount of time that ought to be given for the discussion of the substantial question at issue.

The SPEAKER. The Chair thinks the easiest disposition of the case would be to agree to two hours' debate on a side.

Mr. McMILLIN. We will accept the proposition for two hours on a side, if that is satisfactory.

Mr. PAYNE. And then it will be considered, when the other side has had two hours for debate, that the previous question is ordered, and we take a vote directly?

The SPEAKER. The gentleman in charge of the case can move the previous question, if he chooses, when the other side has had two hours or any other time, as he may please. It is not necessary to have any agreement beyond what has already been had.

Mr. DANIELS. I wish to say, in addition to what I have already suggested, that on page 14 of the minority report (and this shows the manner in which this report has been made up) it is stated that Mr. John A. Bayloe testified that the colored voters in the district were from four to five hundred and that they were Democrats. There is no such testimony in the record at all. Bayloe's testimony is that the colored vote was from four to five hundred; but not a word was said about the colored voters being Democrats. It is further stated in the minority report that Mr. Hurt, who was so skillful in manipulating these ballots at Marion precinct, was in the employment of the contestant. There is not a word of truth in that statement. He was a Democratic manager at that election, all his sympathies and affiliations being with the other side, and his disposition was to beat the contestant in this election case so far as the vote of that precinct went. That is entirely made out. There is not one fact or circumstance to show that Hurt was a friend of the contestant or in his employ. There is no foundation whatever for that statement.

This minority report in other respects assumes matters that do not appear in any form whatever in the record. It relies upon testimony of the most unreliable character that was brought before the commissioners—the testimony of men who are now before the court—accomplices of these very men who were concerned in carrying on this election in the manner I have stated, for the purpose of retaining the contestee in his seat.

The only reason why I suggested (and of course it is a matter of some embarrassment) that we confine this discussion to so short a period of time is the tactics that have been resorted to on the other side to prevent this case from being considered by the House at all. The statement has been made that they intended to continue these tactics for the purpose of preventing any vote from being reached on this case, the object being to retain the contestee in his seat.

One word further. It has been stated in a morning paper here that there was no report agreed upon by the committee in the first instance, but that all the members of the committee, except one, were in favor of the contestee. That is utterly and absolutely false. There is not a circumstance or a fact which would authorize even an inference of that kind. There was a division among the members of the committee when the vote was first taken; the committee then was not full. A short time afterwards, when it was full, it was finally concluded to reconsider this vote. Upon that occasion there were only three persons (and they were the Democratic members of the committee) who were willing to sustain the right of the contestee to the seat.

I may say, further, that while we have been ready to concede to every Democratic contestee that has come before our committee all the rights and privileges to which he was entitled under the evidence and the law of the case, and have reported in favor of such contestee whenever the evidence and the law would justify us in doing so, there has not been a Democrat among the three who were on this committee who under any circumstances, or at any time, on any occasion, was willing to make the slightest concession to Republican contestants when their cases were brought up for consideration. On the other hand, they have banded together as one man, and whenever any vote has been taken or any suggestion made, no matter what the evidence proved to be, they have voted to sustain the Democratic sitting member under all circumstances.

Mr. TERRY. I wish to ask the gentleman from New York [Mr. DANIELS] whether a great majority of the committee did not at one time agree that the contestee was entitled to the seat?

Mr. DANIELS. They did not at any time.

Mr. TERRY. I have been so informed.

Mr. DANIELS. The information is not correct.

Mr. WILLIAMS. I should like to ask the gentleman a question. Upon that final vote on which, as the gentleman states, nobody except the three Democratic members of the committee voted in favor of the contestee, did all of the Republican members vote in favor of the contestant?

Mr. DANIELS. Yes; substantially.

Mr. WILLIAMS. "Substantially." How many remained quiet without voting at all?

Mr. DANIELS. There were two that did not vote at all. One disagreed as to the computation of certain precincts; another as to the regularity of the proceedings in another precinct. That is all the difference that ever existed in the minds of the committee—all the difference that arose in the committee room on this subject. One of the members who did not sign this report has acquiesced and acted with us, and we hope during the progress of this discussion to have him express his own views before the House.

Mr. HULICK. Are we to infer from the statements of the gentleman from New York that the committee in this case has resolved the doubts in favor of the contestee?

Mr. DANIELS. Yes, sir; right along.

Mr. HULICK. That is what I have understood—that all doubts were resolved in favor of the contestee.

Mr. DANIELS. I can say further that in examining these different precincts no particular theory controlled or influenced the examination on the part of the majority of the committee. Precinct after precinct was examined separately, the result as to each precinct being put down on paper; and when the examination of all the precincts was concluded the matter was turned over to the secretary of the committee, that he might go through and pick out the items and do the footing. No member of the committee did any footing in reference to the results. Whether the result would have come out in favor of the contestant or the contestee, the committee was ready to stand by the footing made by the secretary. When the footing came it turned out that there was a majority of 220 in favor of the contestant, and that, too, without counting the vote in one of the precincts which had by mistake been left out, a precinct in which there was a majority of 13 in favor of the contestant, making the majority 233 votes in favor of the contestant as against the contestee. There was the utmost care and caution exercised in all these investigations for the purpose of avoiding the possibility of injustice. And I can say there was no feeling on the part of any member against the sitting member. On the contrary, all spoke well of him as a man and as a gentleman; and if we could have come to the conclusion to retain him in his seat consistently with the evidence there would not have been (as there was not in the Maddox case) one dissenting vote against that conclusion. But they were driven to the result that was adopted by the full and complete examination given to the matter, precinct by precinct, when they found these were the absolute figures, and that by reason of them the contestant was undoubtedly entitled to his seat.

I may say further, Mr. Speaker, in reference to the article published in the newspaper this morning, to which my attention was called, without going through it, that there is not one important fact so far as this election case is concerned that is true. On the other hand, all of the statements made in reference to the action of the committee are without foundation. It has been written and published on this question to meet the contest before the House for the purpose of improperly influencing or attempting to influence the House or the members of the Committee on Elections in the disposition of this case. And it has been signed by an ex-Congressman who has not given his name and was unwilling to take the responsibility of vouching for the truth of the statement. In fact there is not a material statement in it that is found in the record of the case.

Now, I presume the other side will wish to be heard, and I reserve the remainder of my time.

Mr. UNDERWOOD. Mr. Speaker and gentlemen of the House, I am suffering this morning from a very hoarse cold, and shall consider it a great privilege if I can have quiet in the House while I undertake the discussion of this question. In the discussion of the case I do not wish to reflect upon any member of this committee. I do not wish to reflect upon the members of the House, but I do believe that the report of the majority of the committee has misquoted the evidence, and without intending any reflection on the honorable gentleman from New York [Mr. DANIELS], I hope he will pardon me when I state to this House wherein I believe that the evidence in the case has been misquoted to the House in that report.

Let us consider first the Elyton precinct. That is in Jefferson County. Jefferson County is the county in which the city of Birmingham, Ala., is located—the great iron center of the South. There are men living in that county from one end of the Union to the other who have money invested and property interests there. It is largely constituted of a white population.

This committee charged that the election officers in that county were selected only in the interest of the Democratic party; they charged that the managers of the county and the Democratic officials have not given fair representation at the polling places. I challenge the statement, and I challenge the gentlemen to deny the counter statement that my honorable opponent furnished a list of the persons he desired to represent him as election officers to the probate judge, the clerk, and the sheriff of that county, and that they appointed the men that he selected.

This report says that men were appointed who were weak and unable to look after the interests of my honorable opponent. But again I challenge the gentleman to deny the proposition that Mr. Fountain, the chairman of the contestant's Congressional committee, furnished a list of the men Mr. Aldrich desired to represent him in the election, and that they were appointed as requested by him.

Mr. DANIELS. I did not so understand the testimony of Mr. Lester. I understand from the testimony of this witness that they were ignorant men who could neither read nor write.

Mr. BARTLETT of Georgia. That was in reference to Perry County.

Mr. UNDERWOOD. That was in Perry County; but the same allegation was made there as with reference to Jefferson County. The Republicans furnished a list of their inspectors, except in three of the precincts, and there they refused to furnish them, and their reason for not asking representation in those precincts, they alleged, was because there were no white men acting with your party in these precincts, and that the Republicans would not furnish the names of colored men. Our party gave you representation on all of the election boards where your party asked for representation. That is a fact shown by the record. And the report of the minority of the committee shows the page where you can find the names of the witnesses who testify as to the appointment of these election managers in these various precincts.

Now let us consider this Elyton precinct again. The gentleman from New York says they have resolved all questions of doubt in favor of contestee. Here in this great white county in Alabama, where the contestant had managers of election selected by himself, they say that 19 votes should be rejected. Why? Because there were unfounded challenges. The report admits that. Under the law of Alabama when a voter presents himself for the purpose of casting his ballot if there is any citizen of that precinct who believes he is not a qualified voter he has a right to challenge the vote, and then the voter must either produce some one to identify him and prove that he lives in the precinct or make an affidavit that he is a resident of the precinct.

But the gentlemen say that we required negroes to be identified by white men. If that were true, gentlemen, it would be manifestly unfair and unjust and would have warranted the rejection of this precinct. But I say that the evidence does not show it. On whom do they rely to prove that assertion? They say that a man named Diffey, a colored man, says that colored men were required to be identified by white men. Let us see what Diffey says. You will find it in the record, on page 349. Mark you, they say that this man Diffey says colored men were required to be identified by white men. What does Diffey say? He says:

I voted at Elyton and I am a Republican.

He was their witness.

Q. Did you see the managers of that election refuse to allow any persons the privilege of voting? If so, state how many.
A. I can not say the managers refused them. I know that they were refused and that they stated to me that their vote was challenged. There were about 15.
Q. Do you know whether or not the managers of election in beat 9 in November required the colored people to be identified by any particular persons or class of persons? And if so, state by what persons or class of persons.
A. I could not say that they required any particular class of persons, because I identified one man myself.
* * * * * * *
Q. Did the managers of election refuse to allow any person to vote that you identified that day?
A. No, sir; they did not.
Q. Was there much of a crowd around the polls?
A. No; the crowd was small.
Q. Are you a colored man or a white man?
A. I am a colored man.

Now, I ask you in all fairness, do this committee resolve the doubts in favor of the contestee in this case, when they misquote the evidence in this case in this way?

But this is not all. Diffey says that there were only 15 men challenged. Their own Republican manager says there were about 12. I do not quote him exactly, because I am quoting from recollection. There were 5 colored men put on the stand who said they were challenged. Diffey says he watched all day and there were only 15. This report counts for contestant 19 men by adding to the number that Diffey says he saw the 5 who testified themselves. In other words, they count those men twice.

Mr. DANIELS. I desire to correct the gentleman. The report throws out only 5 votes.

Mr. UNDERWOOD. The gentleman's report says it only throws out 5; but in making up the figures the gentleman will see that the report says they should add to contestant's vote so as to make it 87 in this precinct. Now, the original vote was 68, and when they make it 87 there is added 19.

Mr. DANIELS. No; I will state that this reduction from 19 to 5 was made after the report was first drawn and read to the committee. It was suggested that it should be reduced to 5, and it was reduced, and in the footing which is made by the secretary of the committee the vote is put down at 5.

Mr. UNDERWOOD. I would not say anything in the world for which I have not the figures. If I have made a mistake in what the gentleman says in his report I am glad to be corrected. I do not want to misinform the House. But I will read what the report says:

They all said they were Aldrich men. In this manner there were 5 colored votes unlawfully refused which would have been cast for the contestant. They should be added to his vote, making it 87 in this precinct. There were no such abuses as will justify the exclusion of the vote in this precinct; but it should be increased as already stated.

The returns of the officers show that Mr. Aldrich was allowed 68 votes. Now, how can you add 5 to 68 and make it 87? They make it 87, and if you will add up the computation of the final figures in this case you will find that it requires that 87 to make the footing which they find. If the gentleman has made a mistake in his addition, I am glad he has corrected it.

But they say that we required white men to identify colored men. There is some testimony on that point, and I want to give you the full benefit of what it is. There is just one witness who says that he was told to go and get a white man to identify him. He does not say that the managers told him, but he says that the man challenging his vote told him. There is another witness who says that he was told to get a boss man to identify him; but he says that the man who challenged his vote told him that, not that the managers of election told him.

Now let us see what Mr. Pettyjohn says. He is asked this question, which will be found in the record on page 207:

Q. State if you saw any person that day challenged or not allowed to vote; and if so, what reasons, if you know, were given.
A. I did; the parties were challenged on the ground that they did not reside in the beat.
* * * * * * *
Q. Were there any colored voters identified by colored witnesses that day?
A. There were.
Q. Upon such identification were those voters permitted to vote?
A. They were.

Now, gentlemen, there is your Republican manager. There is the man that you selected to represent your interests, who says that these colored men were allowed to be identified by colored men, and that they were allowed to vote; and yet, in the face of that evidence, this committee brings in a report telling this House and telling the people of the United States, as a reflection on my constituency, that we deprived these colored men of their votes by requiring them to get an impossible or a wrongful identification, when your own man says it is false.

Take the next precinct—the Birmingham precinct. What do they charge here? They do not charge that there was a false return. I will call attention to the fact that the gentlemen selected at this box to represent my honorable opponent were selected by him as they were in the other case. But who were they? One was W. A. Smith, whose father was a Republican governor of Alabama. He is one of the most prominent Republicans in our city, an able lawyer and a man of high standing in our community. He represented them at one box. And the next, C. A. Meisener, a Republican, general manager of a furnace company. At the next box was Mr. R. L. Houston, an appointee of President Harrison as postmaster at Birmingham. At the next box Mr. L. L. Schwartz, a prominent merchant.

Now, with these selections, when my people appointed such men as these to represent the Republican party at these boxes in Birmingham, do you not think it is a slander on those people for this committee to come here in this report and charge them with not giving you fair representation at those boxes? But they say that by reason of arrest and intimidation these voters were driven away from the polls. What is the evidence? The facts show that the Republican managers in this campaign got out a dummy ticket, a dummy identical with the official ballot that was voted, and it was circulated among the voters. Now, in Alabama we work under what is called the Sayre law—it is really an Australian ballot system. The law is an educational qualification to some extent. The law provides that—

Any person * * * who aids or attempts to aid any elector by means of any mechanical device, or any other means whatever, in marking his ballot, or shall print or procure to be printed, or have in his possession any copy of the ballot proposed to be voted, shall be guilty of a misdemeanor, etc.

In the face of that law, the Republican committee in the town of Birmingham printed ballots identical in size—you will find that in Mr. Mothershead's testimony, the testimony of one of the attorneys for the contestant here—a ballot identical in size with the official ballots, with the names on it the same, except that

opposite the name of my honorable opponent was a cross mark. Then they took that to the polls and furnished it to the voters, under instructions to take the dummy ticket into the box, lay it alongside the original ticket, and when they fit the top and the bottom the cross at my opponent's name would fall opposite his name in the original ticket, and they instructed them when they matched these tickets to make a cross mark opposite the place where it occurred on the dummy ticket, which is in clear violation of this law. Why, the gentleman himself, in his report, admits that these men who were arrested were lawfully arrested, and then he says that we made the arrests to intimidate the voters.

Well, how many arrests did we make? In the whole city of Birmingham, a city of 40,000 or 50,000 souls, where 4,000 or 5,000 men were registered, on the day of election there were just 5 men arrested for using these dummy tickets, and I challenge the gentleman to show that there was a single other arrest. This report says that they were arrested and then discharged, leaving the impression on your mind that a fraudulent arrest was made for the purpose of harassing them, when the facts show that they were discharged, and I refer you to the testimony of Mr. Oldham, on a demurrer on the indictment, because the indictment did not show at what election they were using these dummy tickets.

But on what testimony do they seek to throw out these ballots? On the testimony of two men, one a colored man by the name of Simpson. He says that when one of these arrests was made that a crowd of 50 men was around him, and that they scattered and never came back to the polls. Mark you, there were two voting boxes in that beat, and the voters had the privilege to vote at either. Of all the persons who were there he can not name anybody but the man who was arrested, and yet he goes on the witness stand and says that they scattered, and on the testimony of that one witness they count 50 votes for the contestant.

On the testimony of Vincent Tilley they seek to count 9 votes. They do count 9 votes. What does he say? He says that himself and 9 men were put out of line by B. A. Thompson, a deputy sheriff, and prevented from voting. That is on direct testimony. On indirect examination he is asked, "Did you vote at the south side?" and his answer is, "Yes, sir." Gentlemen will find this testimony on page 326 of the record. Mr. Thompson says that he did not put Tilley out of the place at the November election, but that he did put him out at the August election because he was crowding the booths where they were marking the ballots for illiterate voters, and that he merely put him out of line until those men could be voted, to keep him from crowding the polls. Vincent Tilley himself says that he voted on the south side, and on cross-examination he is asked whether the other 8 men that he says were there voted, and he answers that he does not know. And yet, on that testimony, those 9 votes are to be counted for the contestant! Now, I appeal to you gentlemen, in all human fairness, is that resolving the doubts in this case in favor of the contestee, as the gentleman from New York says he did in preparing his report?

As to the Bessemer box, the gentleman from New York says that a Democratic paper wrote an editorial condemning the fraud there. That Democratic paper condemned the burning of those ballots not more than I do, but as I challenged my honorable opponent, so I challenge this committee, I challenge anybody, to say that throughout this whole election from beginning to end I have not done everything in my power to give my honorable opponent a fair election. At this Bessemer box it is true that the probate judge, clerk, and sheriff sent the requisite number of tickets, and it is true that some one went into the sheriff's office that night and burned all of those tickets except 127. Mr. McKinney, the man in charge of that box, was put on the stand by us, and he swore that he had nothing to do with the burning of those tickets, and that he did not know who did burn them.

Mr. DANIELS. The gentleman is mistaken. He does not say any such thing. Mr. McKinney does not testify that he did not know who burned the ballots.

Mr. UNDERWOOD. My recollection is that Mr. McKinney does say that he did not have anything to do with it.

Mr. DANIELS. No, sir; you are wrong there.

Mr. UNDERWOOD. Mr. McKinney was put on the stand and cross-examined, and he says he had nothing to do with it, and if he does not, in so many words, say that he does not know who destroyed the tickets, the gentleman on the other side did not cross-examine him as to whether he knew or not. Probably it was an oversight. But I say there is not a particle of evidence in this case to show, and I challenge the gentleman to produce any evidence to show affirmatively that Mr. McKinney did know who destroyed those ballots, or that he had anything to do with the transaction. We put the Democratic officials, we put the Democratic election officers, we put the manager of my campaign and everybody connected with me in the election on the stand, where they were subject to cross-examination, and they testified that they knew nothing about the destruction of those ballots. What more was possible for us to do? The testimony of contestant utterly fails to connect any Democrat with their destruction.

Now, if my honorable opponent lost votes by the loss of those tickets at that precinct, whether we are responsible for it or not, those votes should be counted for him. But the testimony is that when the ballot box was opened and it was found that there were but 127 ballots in the box the Democratic election officers sent Mr. Tillman to Birmingham to get more tickets, and that the other side sent Mr. Carwile; that those two men went to the probate judge and he furnished them more tickets, and a majority of the witnesses testify that those tickets got to the poll at 1 o'clock. The other witnesses swear that they got there at 2 o'clock; but the uncontradicted evidence shows that during the afternoon the voting at that precinct was slight, and that during the latter part of the afternoon there was full opportunity for everybody to vote who desired to do so. It is true that the evidence shows that when the tickets gave out in the morning there were two or three hundred men around the poll who did not vote, but the evidence also shows that there were two or three hundred men who did vote there in the afternoon.

Mr. Cook, one of the contestant's witnesses, one of the witnesses relied on in this brief to substantiate and make out the contestant's case, "guesses" that there were about 200 men deprived of the opportunity to vote, although he can not name a man of them, and yet this same witness, who can guess with so much facility, states that Mr. Schwabacher, one of the men whose names appeared on the poll list, was a dead man, whereupon we produced Mr. Schwabacher and put him on the stand and he swore that he was and had been alive and present at the polls and had voted.

Now, that is the kind of witnesses they bring to prove their case, men who will recklessly swear that a man whose name is on the poll list is dead when in fact he is alive and has voted. What does Mr. Carwile himself say about these tickets? He says he thinks there were two or three hundred men who did not vote in the morning, but he admits that he is only "guessing." In the first place, they say that we told those voters to leave and that they left, but Mr. Carwile himself says:

Then I went among the crowd—myself and others—and tried to convince the people we would get the tickets. In a short while afterwards—I can not say how long—Mr. Vaughn came with the tickets.

I read from another place in his testimony:

Q. How did you get your estimate that there were three or four hundred men who did not vote on account of lack of tickets?

A. It was an estimate I made up, seeing the men on the street. I suppose you might call it a guess.

"I suppose you might call it a guess!"

Mr. LACEY. How far did they have to go for their tickets?

Mr. UNDERWOOD. They had to go 12 miles for their tickets. There were two "dummy" lines and two railroads. It took about an hour to go and an hour to come back.

Mr. CLARKE of Alabama. How many trains were running?

Mr. UNDERWOOD. The trains ran on each line every half hour.

Now observe how fair the committee has been in considering the evidence in this case. Here is what they say in the report in reference to the managers who were appointed to represent the Republican party:

But these appointees were not the persons whose selection was desired by the combinations opposing the Democrats. They were, on the contrary, inexperienced persons whose good intentions could be readily frustrated by their wily and expert adversaries.

Now, the gentleman from New York will find in Mr. Stile's testimony the list that was handed in by the contestant's chairman; and on that list he will find the name of Mr. Spencer, the Republican election manager at that box. Yet it is claimed that these men—the very men that they selected themselves, as this report says—were not competent to look after the election. But although they had their own election managers, they took the precaution to have every man who voted for my opponent go before a notary public and make affidavit that he voted; and those affidavits are in the evidence. On page 251 of the record you will find the evidence of Mr. Reville, the man who took the affidavits, and the evidence shows that they tallied exactly with the returns.

Now, when they have put every man's name on the poll list that voted for their candidate (and they had the registration lists), is it not strange that they come here claiming 365 votes without being able to produce or to name the men who they say failed to vote for them? Was there ever a case where votes were counted where the men voted without knowing whom they voted for? Was there ever a case where men voted without telling whom they voted for or without somebody else telling? There is no evidence to show that those 300 men who were round the polls in the morning may not have come back in the afternoon and voted. I say that by following the action of the committee in this case you establish a precedent the like of which is heretofore unknown in the history of contested election cases. It is proposed to count

365 votes of men who are absolutely unknown and whom the witnesses for the contestant can not find, can not identify, and can not say whom they voted for.

I admit that there were four or five men—possibly seven or eight—who testify that they came to the polls in the morning, went away, and did not come back again. But outside of those there is not a man of those 365 supposed to have voted for Mr. Aldrich who has come forward and testified that he did so vote or would have so voted; and there is not one of these guessing witnesses who can name any of these supposed voters. Yet you propose to deprive me of my seat in this House, and to deprive my constituents of their right of representation by the man whom they have selected, on such evidence as this; because it requires these 365 votes to change the result (220 the report of the committee says would change the result); and you propose to do this without knowing any of these men whose votes you propose to count, and without any evidence identifying them or showing how they voted or would have voted.

So much for Jefferson County. I must hurry on, as my time is limited; and I want to call attention now for a few minutes to Blount County, where it is said the contestant was not fairly treated. I call attention to the fact that the machinery in that county was in the hands of his party or the party associated with his; it was in the hands of the Republican party and the Populist party. If you will look at the testimony of Mr. Hudson you will find that we furnished a list of men whom we asked to have appointed to represent me at the polls in that county, and that their appointment was refused. It is true that some of the men appointed were Democrats; but as to numbers of others, we did not know whether they were Democrats or not. As to two boxes, which are well known always to give Democratic majorities, the election managers representing my honorable opponent returned those boxes to the county board of inspectors; and those officers threw out the boxes and refused to count them for me. It is true the committee counts those votes for me because I brought forward the voters and proved their votes. But this circumstance shows that the cry of high-handed fraud does not apply alone to the Democratic party; that in the counties where the contestant and his party controlled I was not allowed the representation that I gave to his party in my county; and votes lawfully cast for me were wrongfully rejected.

Furthermore, I want to say that from Pratt Mines beat, in Jefferson County, a return came in unsigned, just as these did in Blount County; but the probate judge, clerk, and sheriff of Jefferson County, the men whom this honorable committee would condemn as conspirators and ballot-box stuffers, counted that precinct, with 300 majority for my honorable opponent, although the representatives of the Republican party in Blount County, under similar circumstances, refused to count the votes for me.

Now let us go to the lower counties. Let us take Marion precinct, where I received 238 votes, which the committee disregard; where Judge Shivers gave our opponents the representation that they asked; where they had Mr. Lester as their representative at the box. It is absolutely true that the booths were in one room and the ballot boxes in the other. But the law merely says that the sheriff shall provide a suitable room in which to conduct the election. Any lawyer will recognize the fact that that provision is merely directory, not mandatory, and that what was done at that precinct did not violate the law and does not make it necessary to throw out the vote, if the election was otherwise fair, merely because the ballot boxes and booths were in two separate rooms.

At that box the testimony shows—Mr. Lester's own testimony—that he was satisfied with the clerks who had been appointed. The law requires not that the voter shall put the ballot into the box, but that the manager shall take the ballot and put it in. That provision of the law was complied with. Mr. Lester, your own man, your own manager, says he went with Mr. Hurt with the vote in his hand, and on almost every occasion he saw him put it into the box. That is what your man establishes by your own proof.

But they say I can not have any votes because I have not proven my vote; that I did not prove that these men were on the poll lists. Now, gentlemen, this poll list is not attacked. It is true the returns are attacked. It is true that the returns were reduced or changed. That is true, but they were not changed in my behalf.

They were changed against me. According to what the witnesses testify was the real vote that my honorable opponent received, they place the number at only 15 votes, but the returns came in giving him 45. It was not, therefore, a change in my favor, but a change in his favor.

But they say that there is no proof that these men voted. Now, mark you, Mr. Lester, your manager, says that 302 men voted. He identifies the poll list. The poll list is not attacked, as I have said. There is nobody who has come forward to challenge the poll list. The poll list was introduced by the contestant himself.

You understand that whenever a man comes to vote in our country he gives his name to the clerk, who writes it down, and the list of voters thus kept is returned to the probate judge with the ballots. Now, here is the certified poll list kept in that manner not introduced by us, but introduced and put in evidence by the contestant himself. He uses other poll lists in the same way to attack other precincts; and yet the honorable committee say that there is no evidence as to who voted at this box. I ask you what better evidence can be furnished than this? Is it not the highest evidence, especially when it is introduced by my honorable opponent himself in support of his case?

Now as to the men who voted. The testimony shows that Mr. Nelms took the poll list in his hand and went over it and was asked various questions, as, for instance, "How did this man vote?" "Do you know this man?" "Is he a Democrat or Republican?" and so on, and he proved the names on that list. And that is legitimate. All the authorities on elections recognize that it is a legitimate way to prove how a man voted. He takes this list and picks out 196 names from the list who he swears voted the Democratic ticket. The poll list proves that they were voters. Mr. Le Vert and Mr. Lester swear that the 302 men whose names were on the poll list cast their ballots. Not all of the names are on the poll list whom Mr. Nelms identified as having voted. He says that 196 are Democrats, and they were Democrats who cast their votes that way all the time. Again, Sterling Moore testified that there was a Democratic colored club in that town with 66 voters in it and that they voted the Democratic ticket. He selects from the names on the poll list 28 men he says voted the Democratic ticket.

Mr. DANIELS. I would be very glad if the gentleman from Alabama would state where and in what part of the testimony he makes that assertion. Sterling Moore says, "I have reason to believe," or something to that effect, that they voted the Democratic ticket.

Mr. UNDERWOOD. Well, of course he could not say absolutely that they voted the Democratic ticket, that he saw them fix the tickets up and put them in, for he could not have been able to do that under the law. He could not swear absolutely that he knew it, but he swears that he has reason to believe it, that there are reason which induce him to believe it, and in this particular instance he swears that these men belonged to a club that was well known to have been organized and was working for me. Now, if that is not good ground for basing a reason for belief upon, I should like to know what is.

Mr. CLARKE of Alabama. And did not the committee give 365 votes at Bessemer to the contestant simply on the opinion or belief that if they had cast their vote they would have voted for the contestant, without any testimony at all as to how they voted?

Mr. UNDERWOOD. Yes; and as my friend from Alabama says, they gave my honorable opponent 365 votes at Bessemer, where they could not name a single voter, and with no testimony to show even a reasonable belief as to how they would have voted.

Mr. CLARKE of Alabama. And simply on the opinion of somebody that they would have so voted.

Mr. UNDERWOOD. It was simply guesswork. But they were organized in a club at Marion, and this man who knows them says he believes these men voted for me and gives the reasons for that belief, which reasons are fully embodied in his testimony contained in this record.

Now, gentlemen, all I have to say is that if you count these votes for me that I prove in Marion precinct, they elect me, and I say you can not, under any rules of evidence, disregard them.

But as my time is almost exhausted, let me hurry on to Greensboro precinct. In that precinct they put a colored man on the stand who watched the polls, and he testifies that 183 men entered the polling place. They admit that in these precincts they ordered the Republicans not to register and not to vote. That evidence is not contradicted, that that was the order of the executive committee. Now, this man admits that he saw 183 men enter this polling place, and he says that there were other doors by which others could enter. I only got 238 votes there. He admits 183 by name, names the men and tells who they were. Well, now I prove the votes of 51 other men on that poll list. I put 39 of them on the stand themselves. I proved the votes of the others by other witnesses, which made me prove every vote I received in that precinct.

Mark you, there was an admission of 183. Add the 51 which I prove, and I have proved every vote in that precinct except 7 or 8. I put the election managers on the stand and they swear that the vote was honest and straight. Yet this committee rejects that precinct and refuses to take the testimony of those witnesses whom I put on the stand. They are white men. Here is Mr. Lawson, a prominent banker; here is Mr. Massey, the head of the college; here are prominent merchants, farmers, and preachers in this list. If you will look at the minority report on page 12 you will find the men who were put on the stand, with the page of the record showing where you can find their testimony. Yet this committee, which, as the honorable gentleman from New York [Mr. DANIELS] says, have resolved all the doubts in my favor,

reject those 51 votes, and say that those 39 white men, lawyers, preachers, merchants, and doctors who took the stand and swore that they voted for me have perjured themselves. Gentlemen, I say are you going to reject the testimony of those 39 men and throw out that precinct on the testimony of this one colored man, who says he only saw 183 men go into that polling place, but admits there were other doors at which they might go in? Or are you going to say that he was simply mistaken, in view of the fact that these men have taken the stand and say on their oaths, subject to cross-examination, that they were there and voted for me? Count that box and you elect me.

Mr. BURTON of Missouri. Are these 51 men in addition to the 183?

Mr. UNDERWOOD. Yes. Of course, it was not necessary for us to prove the votes that they admitted.

Mr. HARTMAN. Is there no other evidence to contradict the evidence of these 39 men except the evidence of this one colored man?

Mr. UNDERWOOD. That is all on that point. Mr. Hobson swears that there are 50 men on the poll list whom he does not know; but we prove all except nine men.

Mr. HARTMAN. And nobody disputes it except this colored man?

Mr. UNDERWOOD. The colored man is the only one.

Mr. DANIELS. I ask the gentleman right here if Mr. Simms, a merchant, did not take an account of the men who went in there, making a memorandum of their names, and did he not state the number?

Mr. UNDERWOOD. That is what I say.

Mr. DANIELS. No; you say there was a colored man.

Mr. UNDERWOOD. Simms is a colored man. He says so in his own testimony.

Mr. DANIELS. He is a merchant.

Mr. UNDERWOOD. But he is a colored man. He keeps a huckster's store there in Greensboro, and I believe Simms swore to the truth. I believe that when he was sitting there all day watching his huckster's stand, some of these men may have passed him. And he admits that there were other doors by which these men might have entered. I do not say Simms swore to a lie, but I say he did not see all these men who went in and who swore that they went in. I say you can not, on that evidence, say these men have sworn falsely, and if you do not say they have sworn falsely, you must count this box, and I am elected.

Mr. LACEY. How much would it amount to?

Mr. UNDERWOOD. It would amount to 238 votes.

Well, now, take Gallion precinct. In that precinct they put some men on the stand who swore that some of my attorneys offered them 75 cents apiece to testify. That was in rebuttal. We had no chance to meet it; but that simply amounts to this: We paid the men who testified, as the law requires that they shall be paid, 75 cents. I have no doubt that when the officer went to summon these men from their fields and their plows, when they told him they could not come; that they did not have time to leave their work, he told them they would get 75 cents to come and testify; but the vote of that precinct where I got 272 votes is rejected on the testimony of one man named Jeffries, who says that he watched the polls all day. There are six reputable white men who say that Jeffries did not watch the polls all day. Jeffries admits that he saw 31 white men and 21 colored men go in there and vote. He admits that the colored Republicans were not voting, and yet this committee only counts, I believe, 38 votes in that box, when their own evidence admits 51.

But, outside of his own admission, we prove by six men that he did not stay there and watch the balance of the day, but that he was in the back room of a store picking a banjo. We put 133 colored men on the stand who swore that they went there that day and voted for me.

Mr. DANIELS. I would like to ask the gentleman a question.

Mr. UNDERWOOD. Certainly.

Mr. DANIELS. I understand you to say that the committee only allow you 38 votes there.

Mr. UNDERWOOD. I think so.

Mr. DANIELS. We allow you 183 votes.

Mr. UNDERWOOD. At Gallion?

Mr. DANIELS. At Greensboro.

Mr. UNDERWOOD. I am speaking of Gallion. At Gallion I think it is 38 votes.

Mr. DANIELS. You are right.

Mr. OWENS. Do I understand you to say that there were one hundred and thirty-odd negroes who swore they voted for you against the Republican candidate?

Mr. UNDERWOOD. Yes, sir.

Mr. OWENS. Was your opponent the Republican candidate?

Mr. UNDERWOOD. Yes, sir; but you understand, gentlemen, that your party told these men not to vote. Our party asked them to go to the polls and vote; and now, when you turn me out in this case and reject this Gallion precinct, you say to the world that these men whom your party is responsible for, having given them the elective franchise, in whose hands you have placed the ballot, that when they go to the polls and swear they voted for a Democrat, because they have sworn that they have voted for a Democrat, they are unworthy of belief. That is the record you make in this case when you reject this Gallion precinct, with these 272 votes, which alone would elect me. Well, now, I can not more fully discuss the details of the testimony; but let us go to Laneville precinct. Now, your witnesses have admitted 63 votes. There were 102 votes cast for me. The Republican chairman, Weems, said that there were more negroes who affiliated with the Democratic party in this beat than in any other beat in the county. They admit 63 votes there. We put on the stand every man whose name appeared on the poll list outside of those, and they swore they voted for me. Here is the strange thing in this case, gentlemen.

The record shows an order—it is printed, and in the record—whereby you told these colored men not to go to the polls and vote. Your own witness, Hylton, who admits 63 votes, but says there were 24 of these colored men, and he says he "believes they are Republicans." Now, on the strength of his testimony that they were Republicans, this honorable committee counts them for my opponent, when these men went to the ballot box and cast their votes against the orders of the Republican party not to vote, when your witnesses admitted that they tried to keep them away from the polls. Is it not fair to presume that they voted the Democratic ticket? But you count them for the Republican ticket. They admitted that they voted, and we put these men on the stand—19 of them were put on the stand—and they swore that they voted for me. Here they are, on page 13 of the record. Gentlemen, you will find the names of 19 of these men who are voted for my honorable opponent by the Election Committee. These men went on the witness stand and testified that they went to the polls and voted against the orders of your party. These 19 men took the stand and swore that they voted for me, and yet——

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. UNDERWOOD. I will ask a little further time from the gentleman who has control of this matter. I believe we have two hours.

Mr. STALLINGS. I yield the gentleman such time as he needs.

Mr. UNDERWOOD. The report of the committee elects my honorable opponent by 220 votes. Now, these men, gentlemen, whom this committee counts for Mr. Aldrich on the statement of your own witnesses went there and voted, and voted against your order, and swore they voted for me, yet the honorable gentleman from New York in writing this report says that these 19 colored men have perjured themselves, and that you should not listen to their testimony, but on the testimony of this man Hylton, who "believed" that they are Republicans, he will count them for the contestant.

Take that record to the country, gentlemen. Take that record and go before the people of the United States and say that you do the fair thing when an election case is presented to this House. I say to you that bold was the man who stole the sacred fire of heaven and hid it in a hollow reed, but not less bold is he who steals the elective franchise from the people of Alabama and hides it in a hollow decision of this House. It is true I regret to lose my seat, but I am not arguing this case for myself. I feel it my duty to my constituents to let the country know on what evidence they are charging my people with fraud. I have not time to go through the rest of this testimony. I have pointed out more than a half a dozen precincts that if you counted would elect me. But I say to you in conclusion that when you decide this case against me you are putting a precedent in the decisions of this House that you will regret in the future. You have put this bitter cup to the lips of the people of Alabama, but I warn you to pause lest some day even-handed justice shall place the poisoned chalice to your own lips. I thank you, gentlemen, for your kind attention. [Applause.]

Mr. STALLINGS was recognized.

Mr. STALLINGS. Mr. Speaker, as I understand the situation, the gentleman on the other side [Mr. DANIELS] has about twenty minutes, and they also have two hours remaining on the side of the contestant. Now, I do not think it is fair that both of the hours allowed to the contestee in this case should be consumed following each other, thus giving the other side more than an hour and a half for their conclusion.

Mr. DANIELS. I will say to the gentleman that probably we shall not occupy the whole of that time.

Mr. STALLINGS. Then, Mr. Speaker, as I understand, there will be only one speaker on the other side after I conclude for the contestee?

Mr. DANIELS. I do not say that; but we are ready to go on now if the gentleman prefers.

Mr. STALLINGS. Under the circumstances, Mr. Speaker, it seems to be necessary for us on the side of the contestee to occupy

our time now. As I understand, under the custom and the rule of the House, it is for the contestant to conclude; but it seems here that the contestant is not only to conclude, but he is to have two hours in which to make the concluding argument.

Mr. DANIELS. We are perfectly willing to go on now. Do I understand from the gentleman from Alabama that he prefers not to go on?

Mr. STALLINGS. I would prefer that the other side should occupy a portion of their time now, and then let me go on.

Mr. DANIELS. Very well; I yield to the gentleman from North Carolina [Mr. LINNEY].

Mr. LINNEY. Mr. Speaker, in my opinion, we do not attach sufficient importance to the investigation of these causes. Upon reflection, I believe that one of the greatest intellectual contests that has ever taken place in this Capitol was the contest in which that trio of immortal Americans took part, Mr. Blaine upon the one side and Senators Thurman and Lamar upon the other, in the other end of this Capitol in 1878. The President of the United States in his message had called attention to the fact that there were complaints in certain sections of the Republic of the placing of corrupt hands upon the ballot box. Following that message the resolutions of the nation's darling, the late lamented James G. Blaine, were introduced in the Senate. Those resolutions provoked a discussion which is justly celebrated for the bringing to bear of eloquence and learning that have never been surpassed in the Senate of the United States. I will read a brief extract from the message of the President of the United States which resulted in the introduction of those resolutions:

It will be for the Congress for which these elections were held to make such examination into their conduct as may be appropriate to determine the validity of the claims of members to their seats. In the meanwhile it becomes the duty of the executive and judicial departments of the Government, each in its province, to inquire into and punish violations of the law of the United States which have occurred.

Here, Mr. Speaker, the attention of this Federal legislative department of the Government is directed to the fact, the important fact, that it is only in Congress that a remedy for stealing votes can be applied. There is no more chance to correct this great evil in the State courts than there is to shoot off the horns of the moon with a popgun. [Laughter.] Why do I say so? I say so because gentlemen on this floor will bear me out in the assertion that in the charges delivered by our judges throughout the various States of this Union, especially throughout the Southern States, you have rarely heard any mention made of election frauds. You hear elaborate arguments presented by our judges upon assaults and batteries, upon forcible trespasses, upon the obtaining of goods under false pretenses, upon forgery, and matters of that sort, but only a line, if even so much as a line, is ever given by the courts to the greatest of all questions, to wit, the right of the suffragan to cast his ballot and to have that ballot counted as cast. [Applause.]

It is refreshing, however, now to know that our judges of the South, and especially of North Carolina, are doing their full duty in this respect. I recollect on one occasion, in a jocose spirit, approaching a judge in my own State, a great and glorious man, and saying to him, "Judge, I will go 20 miles to hear you deliver an elaborate charge upon the crime of laying corrupt hands upon the ballot box." The judge turned to me in the same jocose way and said, "LINNEY, if you will wait until some ragged Radical steals a Democrat's votes, you can hear the charge without walking 10 steps." Of course that was a joke on the part of the great judge; he did not mean it seriously, but it becomes icy logic in many States of this Union, and it means that no adequate remedy for the laying of corrupt hands upon the ballot box is to be found in the courts in the past.

The President of the United States was right in his message. Following that message came the resolutions of Mr. Blaine. Then followed the great discussion between Blaine on the one side and Senators Thurman and Lamar on the other. This biography of Mr. Lamar which I hold in my hand states that when Senator Thurman had concluded his speech there went through the Senate Chamber a murmur that there must be an additional reply to Blaine's argument, and that that great leader of thought in the South, Senator Lamar, was expected to make the reply. He did so; and I want to call the attention of members of this House, and especially of my friends from the Southern States (whom I recognize as being the peers of any people on God's green earth), to the reply of that distinguished leader of Southern thought, Mr. Lamar. I read his language:

No, sir; the doctrine that I stated was that if the right of suffrage be invaded anywhere, or any constitutional right infringed in any quarter or by anybody, it shall be maintained and enforced if necessary by all the constitutional power of the Government.

A noble thought was this suggested by that distinguished leader from the South. In other words, his doctrine was: Better that the constitutional power of this Government shall be exhausted than that the rights of one suffragan shall be infringed upon anywhere in the United States. I recall, Mr. Speaker, a declaration which, if true, was the highest compliment that has ever been paid to any party organization in the United States. I believe it was the late General Sherman who stated in one of his letters that there is no place in the Republican States where a Democrat can not cast his vote and have it counted as cast. If that be so, I repeat it is the highest compliment ever paid to any political organization in this Republic. It ought to be written as a motto across the Republican party flag. Let it be written: "By the Eternal, there shall be no nook or corner in this Republic where any suffragan may not cast his vote and have that vote counted as cast." [Applause.]

This glorious motto manifests such superb patriotism that it will bind all hearts to the flag of the country. Second, it shows a deep sense of justice, which meets the enlightened conscience of the people; and, third, it exhibits superb moral courage, the highest quality of the soul, without which patriotism and justice dwarf into nothing. That party which adopts this motto challenges and commands the respect of all the sober-browed and intelligent men of this and all other countries.

Mr. Speaker, let us examine the evidence in this election case to determine whether the rights of the suffragans in that district have not been denied. I say they have been disregarded and trampled upon. The evidence discloses that in that Congressional district over a thousand suffragans having the right to vote have been deprived of that right.

Mr. MEREDITH. How did the gentleman vote on this case in the committee?

Mr. LINNEY. I will tell the gentleman how I voted. Here is the testimony.

Mr. MEREDITH. Please answer my question.

Mr. LINNEY. I am going to answer it. Here is the testimony. The bulk of it is immense. When the matter first came up I had not read all that testimony nor the half of it. I had heard the discussion before the committee; and I had doubt about the question. I declined to vote while I had that doubt. I voted the first time in favor of the contestee. After that a motion was made to reconsider. Every member of the committee voted for that motion, as I remember. Is not that the fact, I will ask the gentleman from New York?

Mr. DANIELS. Yes, sir.

Mr. LINNEY. There was not a single vote against the motion to reconsider. All the members, including the Democratic members, voted for it. The matter having been held up on the motion to reconsider, every man prepared himself to decide the case as best he could. On a second vote I still doubted and did not vote; neither did the gentleman from Massachusetts [Mr. MOODY], as I recollect. I have since examined that evidence more thoroughly; and the more I investigate it the more thoroughly I am satisfied the contestant is elected; and I will risk the assertion that my friend from Virginia [Mr. MEREDITH], or anybody else in this House, will be as thoroughly satisfied as I am if he will read the testimony as carefully as I have. [Applause.]

Now let me proceed to show some of the iniquities connected with this election. And while I speak with animation, God knows I speak with no hatred or tinge of hatred against anybody. I admire the contestee in this case. He stands in the majesty of a noble piece of God's workmanship, a gentleman who necessarily attracts attention as such, having a considerable amount of personal magnetism, as gentlemen here have discovered. But let me call attention to one thing. In the first place, the report of the minority of the committee itself admits 128 fraudulent votes. The returns show a majority of something over 1,100; and the minority report finds the contestee elected, not by that majority, but by 128 less. So that this case comes before the House tainted with fraud. And if we adopt the doctrine laid down by Chief Justice Pearson, the father of my distinguished colleague on this floor, the case comes to us in an awkward shape, for that distinguished jurist said that one rotten egg thrown into a pudding spoils the whole pudding. [Laughter.] Here I can show you a case worse than that, where there are a dozen dead dogs thrown into the well, destroying the wholesomeness of all the waters of the well. [Laughter.]

Here is one township where there was no election held at all—Hillman beat—a Republican beat, mark you, gentlemen of the House. It had been Republican hitherto. In this election the Jeffersonian Democrats combined with the Populists and the Republicans. That was a trio omnipotent enough to sweep the crippled Democracy from God's green earth. Even if it had not been crippled and had stood as a giant, it would have been vanquished. Here was this combination against the Democracy. Why? More than anything else, because of corrupt methods adopted in elections.

Now, at that beat, a Republican beat, the polls were not opened at all. Why? What excuse did the officers give? "Why," they said, "it was too cold down there in Alabama and they had no fire." What, sir, "too cold in Alabama and no fire"! If they had said that they were afraid of the snakes biting them, or the

alligators, or something of that sort, it would have been much more reasonable. We all know it is never very cold in Alabama. I believe that an election was held at the same time in Maine, where it is a great deal colder than in Alabama—ten times colder, probably. At any rate, it was not too cold in Alabama to hold the election. Yet the excuse given for not opening the polls at that beat was that "it was cold in Alabama and they had no fire." The thunder they had no fire! [Laughter.] Why, sir, they have more sorts of fire in Alabama than in any place in the world. They have the fox fire; they have the common fire you light your cigar with; and if they do not stop stealing votes they will, before this thing is over, have the biggest chunk of hell fire that ever struck the country. [Laughter.] Yet in the face of the intelligent people of this country and before this House that miserable, crooked makeshift and juggle is offered for not opening the polls at that precinct in Alabama, where the vote is Republican.

My friends, my brethren of Alabama, are you not ashamed of it? Let me illustrate this point, and I ask my friend from South Carolina [Mr. TALBERT] to allow me as a piece of pleasantry to use him by way of illustration. If I were called upon to select the bravest man in this House I should select the distinguished gentleman from South Carolina. I have wanted to jump on him once or twice in this House, but I was afraid to do so, and therefore have not attempted it. I believe he would fight a buzz saw; I believe he would fight a rattlesnake through a rail fence and give the snake two bites to start with. [Laughter.] Suppose he and I were to fall out and I were to challenge him or he me and I had the right to select the instruments with which we were to fight. Suppose I should select a double-barreled shotgun and give him a broom straw, would you not think that I was a miserable coward? Certainly. And I would be a miserable, scurvy coward if I were to do such a thing.

Now, what is a fair election? It is a great war of opinion. The Democracy in Alabama challenged the Republican party to this friendly contest, in which the higher qualities of soul and brain were to be exercised. In this conflict of opinion what do the Democrats do? They first pass an election law, which if you will examine it, you will find to be a one-sided law. What else do they do? They require a certain ballot to be voted, and none other, and then they refuse to furnish the ballots, and at one place they refuse to open the polls. Is not that worse than the case I put, of selecting a double-barreled shotgun for myself and giving my friend a broom straw? It is striking below the belt. It is cowardly, and can not be supported or maintained, and will not be, I am sure, by any gentleman who represents the other side.

How will you explain it? It stands absolutely unexplained. There is no attempt to explain it. It is there to-day, and the minority report makes no allusion whatever to it. How many votes did the contestant lose? We do not know. Why? Because there was no return of any election officer or any means of ascertaining how the people would have voted except the mere fact which is recognized, and not questioned, that it was a Republican precinct. Applying in that case the same rules laid down by the English judge that the presumption in all cases is against the spoliator, you would give every vote which is ordinarily cast in that precinct to the contestant.

But the distinguished gentleman from New York [Mr. DANIELS] who makes this report takes no account of it because the polls not being opened the whole thing was a blank in his opinion. The contestant got no benefit from it, but a stab was given to the right of suffrage which, according to Mr. Lamar, should not have been given, if Mr. Lamar told the truth, in the presence of the glittering light and transcendent intellectual genius of James G. Blaine when he confronted him, when he said it is better that the entire constitutional powers of the Republic should be exhausted than that this blot and stain should be on the history of the Republic. Yet it is there unanswered and can not be accounted for.

Now, Mr. Speaker, there is nothing worse than that.

Mr. FAIRCHILD. Will the gentleman allow me to interrupt him for a question?

Mr. LINNEY. Certainly.

Mr. FAIRCHILD. Do you know what vote was usually cast in that precinct?

Mr. LINNEY. No, sir; I do not.

Mr. BARTLETT of Georgia. There has not been an election there for four years.

Mr. LINNEY. Well, that is even worse and worse. Has it been too cold all the time for four years? [Laughter.] I do not believe that that is a good reason for not opening the polls and holding the election. However, I accept the gentleman's statement that that is true. No doubt they would not open them at all if they knew that the vote given would be largely Republican. But, gentlemen, you all know that cold weather was not the reason. My friends, no doubt, will laugh at this when we get away from here.

But let me call your attention to another thing in this matter. I come now to Bessemer Township. That is the big thing in this case. That is the matter about which my friend put a question to the contestee which has not been answered, and never will be until Gabriel blows his horn.

Here is the testimony on that point. Here is the law of Alabama, to which I wish first, however, to call your attention—the steepest statute ever written, I think, on this subject. You must have registration every year to begin with, and you have, I believe, only eighteen days to complete it in. Then after that you have what they call the secret ballot. It is the statutory secret ballot. What else? Then you have the booths, and here is a description of them. In addition to that we have section 14, which provides:

Be it further enacted, That in all elections hereafter held in this State on any subject which may by law be submitted to a vote of the people, and for all or any State, county, district, or municipal officers, the voting shall be by secret official ballots, printed and distributed as hereinafter provided, and no ballot shall be received or counted in any election to which this act applies except it be provided as herein prescribed.

Then they proceed under this most remarkable provision of the law. Just listen to it, gentlemen, while I read it:

SEC. 43. *Be it further enacted*, That any elector who shall, except as herein provided, allow his ballot to be seen by any person, or shall take or remove, or attempt to take or remove, any ballot from the polling place before the close of the polls, or place any mark upon his ballot by which it may be identified, or any person who shall interfere with any elector when inside the polling place, or when marking his ballot, or unduly influence or attempt to unduly influence any elector in the preparation of his ballot, or any elector who shall remain longer than the specified time allowed by this act in the booth or compartment, after being notified that his term had expired, or who shall endeavor to induce any elector to show how he marks, or has marked, his ballot, or aids, or attempts to aid, any elector by means of any mechanical device, or any means whatever in marking his ballot, or shall print or procure to be printed, or have in his possession any copy of the ballot prepared to be voted, shall be guilty of a misdemeanor, and, on conviction, shall be fined not less than ten or more than one hundred dollars, and any ballot marked by the elector for identification shall be rejected.

Mr. WILLIAMS. Will the gentleman allow a question?

Mr. LINNEY. Certainly.

Mr. WILLIAMS. This horrible example that the gentleman has just read to the House of Representatives—after having called the attention of the House to it as a horrible example—I would ask him if it is not substantially contained in the law of every State in the United States which has adopted the Australian ballot system?

Mr. LINNEY. I never saw that feature in any of them.

Mr. WILLIAMS. You had better hunt up the statutes of the various States.

Mr. LINNEY. If they have any such features, they are cruel and unjust. Why do I say so? What harm can there be in a man having a copy of the ballot that he proposes to vote? I suspect the purpose was to furnish an excuse for the numerous arrests that the evidence shows were made, parties being arrested on this charge and in many cases being immediately discharged on the reading of the statute that I have called attention to.

But let me go on and see how this statute operated in this Bessemer precinct. Mark you, no citizen could have his ballot. They must be prepared; and the statute provides that there must be twice as many ballots as there were registered voters. How many registered voters were in that precinct? Here is the roll. There were something over 1,200, if I have counted correctly.

Mr. DANIELS. Twelve hundred and eighty-three.

Mr. LINNEY. Twelve hundred and eighty-three registered voters in that township. How many ballots did they furnish? They furnished only 126 ballots for 1,283 voters. Mark you, certain officers were designated as the proper custodians of those official ballots. Certain officers were designated as the only parties who could prepare them. Any ballot prepared by anybody else, or being in the possession of any suffragan, subjected the suffragan to indictment and to fine, to the penalties that I have read.

The testimony shows that a Democratic officer took the 2,400 ballots and put them in a room. He fastened the room up mighty tight, of course, and he says that he took the key away with him. I call the attention of my friend to the fact that he omits one little circumstance. The testimony fails to show that he locked the door before he took the key. But he took the key away. He had two agents, I believe, or one deputy, at any rate, and that deputy says nothing. He stands mute. He is not introduced. On the morning of election day they go down there to get the ballots. What is the result? Why, he said when he picked up the box, "It is lighter now than it was yesterday"; and there were some ashes near the box. When they opened the box again the ballots were all gone except 126. The testimony further shows that the Democrats rushed in to vote; that in some instances they wore upon their coats a sign of official power. Some of them voted, and as fast as they voted these marks or badges were changed and given to others, and they got in at the back door to vote. Shortly the 126 ballots were exhausted, while there stood outside an immense column of freemen, suffragans, men who, in the language of Lamar, the great Southerner, had a right to vote, and whose right was of such transcendent importance that he said, "Better

exhaust the entire constitutional power of the Republic than allow this crime to be committed." This column of impatient voters stood there awaiting the pleasure of their adversaries to whom had been committed the duty of furnishing them with ballots, which duty they did not perform.

Here is the testimony of one gentleman from Kentucky, who says he is engaged in the liquor business, that he is a Thomas Jefferson Democrat. In the first place he is a Kentuckian, in the second place he loves a good drink of whisky, in the third place he is a Jeffersonian Democrat, and if that does not make him a great man, I should like somebody else to add one other quality which will. I expect, like a great many men in North Carolina, he loves a woman, and that makes him, of course, a grand and noble man. What does he say? He says "I was there at that voting precinct. I voted early, and there stood men in a rage, excited men." I do not say that that is the exact language, but that is the substance of it, that there were men there who were complaining.

At one time a flag was raised, before the voting began, and the announcement was made, "All men in favor of good government and Aldrich come to this flag." They gathered around it in honest, patriotic protest against this outrage upon the ballot box, against that crime that was being perpetrated, against this wholesale high treason, we may call it, that was being perpetrated down there in this land of liberty. For protesting a number of them were arrested—arrested because it was said the statute prohibited it. The statute was brought out and read, and nothing was found in it to prohibit what they were doing, and these men were turned loose. They were laborers from the furnaces, from the farms, and from the factories, gathered there to vote, as they said, for good government. There were no tickets for them to vote. They retired and went away, and either that witness or some other one says the contestant lost between 400 and 500 votes, and he winds up finally by saying he lost 500 votes, and the character of this witness is unassailed.

Mr. WILLIAMS. Who was the witness?

Mr. LINNEY. He is the Kentucky gentleman. His testimony is in the record. Mr. Harney is one witness, but he is not the Kentucky witness. The testimony is so long it is difficult to find and read in full.

Mr. WILLIAMS. Let us get the Kentucky gentleman, the liquor seller.

Mr. LINNEY. You will find the evidence here in this record. Here is Mr. Harney, and there are two or three witnesses after him. You will find, if you will read it, that I have substantially stated the testimony.

Mr. WILLIAMS. The testimony of all three or of just one?

Mr. LINNEY. Oh, they do not all swear to the same thing. If they did, I would think it was fixed up. If gentlemen will read this, they will find I have understated it. But, gentlemen, let me show you something that does not depend upon the testimony of a witness, something that can not lie, something that human evidence can not destroy. It is a piece of natural testimony as true as its great author, the God of the universe. Let me call our friend's attention to that.

Now, here in this precinct there were how many votes? I ask members to look. Only 486 votes on the tally list. That was the number of votes given in this Bessemer precinct, where there is a registry of nearly 1,283, according to my friend. Now, gentlemen, of the list out of that four hundred and odd votes, 27 votes are fictitious; 27 votes cast in the air, representing no living soul. They are coined in the brains of the election officers. Partisan hate, partisan injustice, and rancor coined these names and placed them upon the polling lists. Of course they represented votes, but represented no elector, no suffragan. You have to add that to these 486 votes. Mark you, here are twelve hundred and some odd registered voters, who had been registered within eighteen days and had registered that year. They therefore are entitled to be received. If they each represent a man who registered within eighteen days, you may rest assured that he will vote if he gets a chance.

Now, let us see how many of them voted. You take 486 from the number of registered voters and then strike out these fictitious names that were thrown in there, that were coined for this evil purpose, and it leaves something near 700 men that did not get to vote. Who were they? Were they Democrats? Do you not know that there was not a Democrat among them? Oh, they say, "How do you know?" We ought not to state anything unless we have some evidence to prove it. A member of Congress has no right to do that; even a lawyer in a court has no right to do that unless he has made the proof. Here are 27 fictitious votes. If there is any evidence to contradict it I have failed to see it, and I ask my friend upon the other side, when he comes to this question, to show that it does not exist if he can from this record; and if so, I will join my friend in wiping it out so that it can not longer stand as a blur or a stain, a disgrace and shameful dishonor on our country's history. Wipe it out for the sake of Alabama; wipe it out for the sake of the contestee in this case; and wipe it out in the cause of justice and good government.

Mr. STALLINGS. Will the gentleman say he will stay with me if I do? We got him twice. Will he stick any faster then than he did before? [Applause on the Democratic side.]

Mr. LINNEY. How can a man who has a spark of conscience stick with men with such a record? I do not think that there is any animal that stands upon two legs that could stick, and stick honestly, by such a record as this. [Great laughter.] Strike it out and then go down on your knees in sackcloth and ashes, with Sam Jones by your side, and pray twelve years to save you from hell, and then, perhaps, I will stick with you. [Great laughter and applause.] But not until then.

Mr. WILLIAMS. The gentleman has not answered the question propounded by the gentleman from Alabama.

Mr. LINNEY. Maybe the gentleman can answer it to suit himself, and let me go on.

Mr. WILLIAMS. When once saved will he——

Mr. LINNEY. Now, the gentleman——

Mr. WILLIAMS. You have been saved twice already, as I understand.

Mr. LINNEY. No, he is not saved yet; nor are you, by a long shot. [Great laughter.] The only difference between the gentleman and myself is that I went pretty close to hell and turned back, and you will not turn back. [Great laughter.] You are going on. [Continued laughter.] I think I had the brains to stop before I was destroyed. [Great laughter and applause.]

Mr. WILLIAMS. The difference between myself and the gentleman from North Carolina [great laughter] is that I never admitted that I came pretty near going to hell. [Laughter.]

Mr. LINNEY. I do not believe the devil ever admitted that yet, either. I have never heard of his making any admissions against himself. [Great laughter and applause.] I have never heard of it if it be so. [Continued laughter.] In fact, that character you admire most always said exactly the opposite of what he meant. "He could teach sin the carriage of a saint." Hear him through Milton:

> Oh, sacred, wise, and wisdom-giving plaint,
> Well do I feel thy power within me now;
> Not only to trace things and their causes,
> But to know the ways of higher agents, deemed however wise.

That was the language of the devil, the biggest liar that ever performed in the world. [Great laughter.] But notwithstanding, it was said of an occasion that has done more harm than anything that has ever been known in this world except an election in Alabama. [Great applause.]

Mr. WILLIAMS. The gentleman from North Carolina, perhaps, did not hear what I said when he finished the quotation. I said, "Therefore you quote it."

Mr. LINNEY. I do not think you said much when you said that. [Renewed laughter.] Now, I was asking gentlemen of the House if they thought that one of these 700 or 800 votes that it was admitted were upon that registration list was a Democrat. Of course not. Of course I can not state that positively. I was not there. One witness has sworn to it, and it is supported by the best circumstantial evidence. "A mute witness," as Mr. Townsend says in his book on Circumstantial Evidence.

Now, here is a tally list showing four hundred and some odd votes, including these 27 fictitious votes. The registration list shows twelve hundred and some odd votes. Yet in making up the four hundred odd votes on the poll list they had to steal 27. What was the necessity of stealing 27 when there were so many names on the registration list? If they had taken 27 names of registered voters and returned them as voting the Democratic ticket there would have been opened an avenue by which this iniquity might have been discovered. Therefore they were forced to go outside of the registration books and coin 27 names.

Why, sir, a wolf never steals mutton when he has a ham of mutton beside him, does he? [Laughter.] They tell me that a bear will lie by a dead hog until he is almost destroyed by the decaying touch of time before he will go out and seek new meat. A Democrat in Alabama is not worse than a wolf or a bear, is he? [Laughter.] He would not steal votes outside of the registration list if they could be taken from that list. But the Democrats did steal those votes; nobody denies it. Why did they steal them? Because the registration lists did not furnish the proper material. Else, I respectfully submit as a legitimate argument, they would have taken the names from that list.

Striking out these fraudulent or illegal votes, there are left 700 votes that ought to have been added to the vote of the contestant, whereas that calm, judicial gentleman over there, Judge DANIELS, in his caution, in his conservatism, gave the contestant only three hundred and something over. You did wrong, Judge! [Laughter.] You intended to do right, but you listened, probably, to the arguments of eloquent gentlemen like my friend from Mississippi before you [Mr. WILLIAMS]. Such men seduced you to do wrong. They got you off the track.

Now, gentlemen, adopting another expression of the late lamented Judge Pearson, let me say, "take a fine sight" on this case. Take these two lists. Decide this question upon your oaths in this exalted place, under your responsibility to your conscience and your God. In passing upon this, one of the greatest questions that ever claimed the attention of a legislative body, how can you refuse to count these votes, which are supported not upon the testimony of one man, or two men, or a hundred men, but upon circumstances, natural evidence which is omnipotent in its effect in driving the human mind to accuracy and to a proper conclusion in its search for truth.

So much for that. It is not necessary for me to pursue this question further. The admission of 128 fraudulent votes taints the claims of the contestee in this case. Oh, that it were possible for this contestee to rise to a grand display of patriotism! We see him here a noble young man, a splendid representative of that glorious Southland, my home, where live as noble people as are found anywhere, and where, but for these practices which have recently overtaken them, the prospect for advancement in the scale of civilization, refinement, and power would surpass that of any other region. We have there the highest state of moral and intellectual manhood, untainted by anything except this wicked disposition to place corrupt hands on the ballot box. How does this happen to arise? It arose, gentlemen, by reason of a dread on the part of the South at one time of negro domination. And that was a plausible excuse. I myself have been in sympathy with that very idea. But God knows this corrupt tampering with the ballot box must stop somewhere. It can not go on forever. I say it ought to stop here. This House is the place to stop it; it is the only place where men can be shown that it must stop.

Let us see the result of that spirit in this election. Those who undertook to corrupt the ballot did not cheat the negro. The white men, it seems, were divided. There were the Jeffersonian Democrats, the regularly organized Democrats, the Republicans, and the Populists, representing four separate and distinct lines of thought. The Organized Democracy, unable to get out of the old channels of sin in which they had traveled, resorted to their fraudulent practices in this case; and when they did it, the white men of Alabama, as did the white men in North Carolina, thank God, and in other sections of this country, revolted against such practices. And, sir, in every one of these cases there will be an investigation, I believe, somewhere, in some shape.

But, gentlemen, let us go a little further. I have called your attention to the place where there was no voting done at all; I have called your attention to these shameful practices in Bessemer Township. I want now to call your attention to another township—the township where they voted a dead "nigger"! [Laughter.] What is that township, I will ask the gentleman from New York?

Mr. DANIELS. Union Township.

Mr. LINNEY. Union Township gave the contestee 177 votes, the contestant nothing. That is a strange way of doing business—177 votes on one side and none on the other. It was especially strange in the last election. But the evidence shows that there were 24 persons returned as voting whose names could not be found on the registration book, and who, after the issuing of a subpœna, could not be found in the beat, and one of them had been dead nine years—a negro—and he was returned as voting!

I submit that is wrong. [Laughter and applause.] But my friends over here on this side say it is all right. [Laughter.] I submit as a question of ethics, as a grave and moral question, that it does not come up to the average standard of gentlemen in the South. And we know it will not be indorsed by this House. How does it happen? Let us see if we can ascertain anything about the matter. It was a most awkward piece of—well, call it irregularity. [Laughter.] It was an awkward juggle and makeshift, so thin that even an idiot could see through it. Vote a dead man! not only dead, but dead nine years. [Great laughter and applause.] I do not know where they got the idea from or the suggestion. It is said that a cat has nine lives, but I never heard that they were annual. [Laughter.] It may be that they are for one day only. But here is a negro, after shuffling off this mortal coil, and going to that bourn whence no traveler ever returns, still marching in the columns of the Organized Democracy of the State of Alabama. [Laughter and applause.] And casting a vote, too. [Renewed laughter.] I submit that it is wrong. If he had voted in the township election, it might have done; if he had voted one year after he was dead, it might have done; but what in thunder the man could have been thinking of that put him on the registration list, and voted him after he was dead nine years, I am unable to fathom. [Laughter.]

But what does all of this show, Mr. Speaker? There was some motive back of it all. There is nothing here in the record to tell us how it was done. We can only draw our inferences. It would seem that no reasonable man, a man of ordinary intelligence, fixing up the poll list or registration list, would have committed so awkward a blunder as that. I can only imagine one way, I think, in which it was done. I can give you my own idea of it. I have made a sort of specialty of this business, for I have been suspecting these fellows for a good long time. [Laughter.] And I say in my State I have known from the press and otherwise of six officers, who had been elected according to the returns, who surrendered their certificates of election rather than stand a contested election trial. It must be that in the hurry of the perpetration of these frauds that the old registration books are copied and they forget that men die. Things of that kind do not generally happen in this country. I have seen one case on this floor, from that grand old Commonwealth of Virginia, the mother of States and statesmen, the mother of Presidents, in which the entire committee brought in a report, a unanimous report, if I mistake not, notwithstanding the allegations of fraud and corruption, in favor of the contestant. Who was the contestant?

Mr. OVERSTREET. Mr. Thorp.

Mr. LINNEY. Yes; Thorp, a Republican; a thing that never happened before, from the time this Government was formed down to the present time. This unanimous report was made, so far as I know, in his favor, for the first time in the history of all the contested cases of the Republic where there were allegations of fraudulent methods.

Yes, Mr. Speaker, the time has come when we should make a specialty of these matters. They involve the biggest blow at the Republic and its life. It touches the very integrity of the Republic. War may stride over our country with the crushing steps of the giant. Pestilence and famine may brood over our land with a long and weary visitation, until the skies are brazen and our beautiful valleys give place to parched deserts, a wide waste of unproductive desolation, but yet, Mr. Speaker, the wild flower of peace will bloom again on the field of battle and above the crushed skeleton, and the barrenness of famine will cease. But for moral desolation there is no reviving spring. Let the hand of evil disposed persons, guided by the cankered heart of partisanship, perform its work in despoiling the ballot box and in depriving the suffragans of their legal right at the ballot box, and the end of our Republic is near at hand.

This matter touches the very heart of the Republic. Strike off the end of that finger, and I can survive; cut off a part of my foot, I may survive. The greatest figure in this House, General HENDERSON, stands to-day upon one leg. Cut off the ear, and I can survive; but strike the left ventricle of the heart, decomposition and death immediately follow. You may commit blunders in tariff legislation, and run wild touching the trade relations of this Republic with the other great nations of the world; do wrong in finances—and yet our nation, by reason of its recuperative force, can survive and overcome them all. But when you poison the head spring of national life, when you corrupt the ballot, you strike at the heart of the nation, and political confusion and death follows as surely as death follows if you run a bayonet through the ventricles of the heart, which destroys the life of the human body. [Applause.]

We can not afford to sit silent in the presence of these crimes. Patriotism rises up against them. Honor, decency, self-respect, the demands of justice cry out against them. It is our duty to examine these things carefully, gentlemen, and to correct as far as we may every single instance of an infringement on the rights of the suffragan. Let it be said, as was said in 1878 by Senator Blaine in the Senate, and in his presence by Senator Lamar from the South: "Better, infinitely better, that the constitutional power of this Republic be exhausted than that one suffragan shall have his rights denied him." Better uphold the Ark of the Covenant than to pursue any other line of thought that has claimed our attention. If this nation has any ear to hear or any eye to see or any heart to feel, it is in the ballot. When it is assailed every lawful, legitimate, constitutional power of the Republic ought to be invoked in its behalf.

To you members of the House and to you alone this appeal can be made, because it never can be made in the States. In the great State of New York, when there was an outrage upon the ballot box and murder was committed, Bat Shea paid the penalty, but down in the State of Arkansas, when the noble Clayton fell, and the earth drank his blood, no man to this day has answered for that crime. I agree with the words of Judge Cunningham, who from the bench said, "Do not look for herring when whales are in sight;" but when the blood of Clayton cries from the ground for vengeance no judicial tribunal has been able to make its power felt. Brethren of the South, aid those who favor fair elections; let us determine, by the eternal and by the constitutional power of this Government, to protect the ballot box. By so doing your public conscience will be quickened and you will have the strongest claim to patriotic endeavor. [Applause on the Republican side.]

Mr. STALLINGS. Mr. Speaker, it was not my intention until a few days ago to address the House of Representatives in the contested-election case from Alabama of Aldrich *vs.* Underwood. It is generally known in the House that the three Democratic members

of the committee have unfortunately been unable to give this case their personal attention. The gentleman from Arkansas [Mr. DINSMORE] was seriously hurt ten days ago, and has since been unable to attend on the sessions of the House. The gentleman from Georgia, Judge BARTLETT, who was a member of the subcommittee to whom this case was referred, has been detained at his home by serious illness and only returned this morning. The only other member of the minority of the committee, Judge TURNER, of Virginia, is, and has been for several days, dangerously ill at his hotel in the city. For the above reasons I was selected by the Democratic minority, with the consent of the chairman of the committee, Judge DANIEL, to take charge of the case of contestee on the floor of the House. I therefore did not hear the arguments of counsel either for the contestant or contestee before the committee, nor did I critically examine the evidence in the case or read the briefs of counsel until within the past week.

It will be readily seen, Mr. Speaker, and appreciated, I hope, by members on the floor, that my prior relations to this case place me at a great disadvantage. This record, including briefs of counsel, contains something like 2,000 pages of closely printed matter, and the chairman of the committee, Mr. DANIELS, with his usual partisanship, and now reputed unfairness, when this case was called up this evening gave notice that at the expiration of thirty minutes he would move the previous question, thereby cutting off legitimate debate. The House, at the suggestion of the Speaker, has refused to sustain him in this unfair and unprecedented position, and has by vote allowed me one hour within which to discuss a case in which the interests and the rights of more than 200,000 intelligent and progressive people of Alabama are involved. I make the assertion here and now, without fear of successful contradiction, that in the history of Congress no contested-election case has ever before been called up on the suspension of the rules and notice given by the chairman of the committee that the previous question would be called within thirty minutes, and debate thereby limited to such an unreasonably short time.

The chairman of the committee gives no reason to this House why there should be such unseemly haste in the disposition of this particular case. For ten days he has endeavored to call it up in the closing hours of this session of Congress in the absence of a quorum of his own party, with the press of important legislation incident to the occasion, when members have no time to examine the voluminous record and vote intelligently thereon. On yesterday the House voted against consideration of this case at the present session of Congress, but not satisfied with this expressed disapproval of his course and conduct by his own party associates, he, on the same day, with the persistency worthy of a better cause, again called the case for consideration, which he obtained by a very narrow majority. I did hope, Mr. Speaker, for the good at least of his own reputation, a judge with twenty years' experience on the bench of the superior court of New York, that his unfairness would cease when he knew that his desire to turn out my colleague, which he has evidenced in many ways, would be gratified, but when he gave notice of his intention to call the previous question on thirty minutes' debate, I realized for the first time fully the lengths to which partisanship could be carried.

Mr. Speaker, it will not be expected, I feel quite sure, that I ignore the evidence in the discussion of this case and consume my time in replying to the foul and filthy philippic of the gentleman from North Carolina who has just preceded me [Mr. LINNEY] against assumed unfair elections in the South. I am not unaccustomed to such exhibitions of unwarranted spleen and hatred by a certain class of men who have turned their backs on their own people and their own section. He consumed the time allowed him to discuss the evidence and the rights of the contestee to a seat on this floor in coarse and vulgar vituperation and the dirtiest abuse of his own section ever heard fall from the lips of a white man from the South. If he had not on a former occasion, he has to-day fixed his status on this floor. We are here to discuss the evidence in this case, and to determine the respective rights of the contestee and contestant; we are here to discuss the evidence and the law before the most distinguished jury ever assembled in this or any other country, who have not read the evidence nor heard the witnesses from the stand. In this presence and under these circumstances the gentleman has descended from that high plane that he ought to have occupied, that the occasion demanded, to the low level of a common shyster before a justice's court. I dismiss him and the subject with the statement that there is not a man on the floor of this House who is better prepared to vote intelligently on this case than he was before he heard the gentleman from North Carolina [Mr. LINNEY]. The self-respect of his own constituency, it is hoped, may consign him to that utter oblivion from whence he so recently emerged.

Before I proceed to discuss the evidence in the record and the rights of the contestee to a seat on this floor I desire to assure you, gentlemen of the majority, that no true son of Alabama will plead with you for a seat in this Chamber or ask any consideration at your hands not justified by the evidence contained in the record and the law applicable thereto. We ask—yes, we demand—simple justice and nothing more; that justice which the evidence in the case before this body ought to guarantee to the contestee. There will be no pleading, knuckling, or cringing to a "brutal majority." The victim is ready; his neck is bared; bring on the guillotine and let the foul work of decapitation go on as it has in this House, actuated by partisanship, since the beginning of the session. [Applause.] You have been emboldened in your conduct by the want of that spirit of manhood and dignity which, in my judgment, ought to have actuated every Democratic contestee brought before the bar of the House. We realize, fully realize, that it is your purpose and your intention, judging from your conduct in the past, to unseat the contestee in this case to carry out a corrupt political bargain.

I desire to assure you now, however, that the culmination will not be in Alabama and in the South what you expect. [Applause.] You may put forward your willing tools to arouse the passions and prejudices that unfortunately exist, I fear, in the minds of members on this floor against the alleged nefarious habit of ballot-box stuffing to which the gentleman from North Carolina has referred. This is the same old desperate cry of the men in the South who have deserted their section, their cause, and their best interests, and who are not trusted by the people with any office or honor within their gift. We have heard this for the last quarter of a century, and we expect to continue to hear it. But let me tell you to-day, gentlemen of this House, that the virtue, intelligence, and manhood of the South will continue to control her destinies in the future as they have in the past. [Applause on the Democratic side.] For more than a quarter of a century we have contended against these enemies of the South at home and abroad, who would succeed in the destruction of our property and the overthrow of our institutions. During their régime we heard the tramp of soldiers on our soil, with the ballot box guarded by bayonets, the halls of our legislatures filled with the wicked, the vicious, and the ignorant, hundreds of millions of debt piled upon our people, seats in the United States Senate auctioned off to the highest bidder, with the brave and loyal men disfranchised; but we have stood up against it all and maintained our unequaled culture and refinement and rebuilt the South and placed her on that high plane of advancement and prosperity the like of which no people thus situated ever accomplished in so short a time. [Applause.]

I am warned by the limited time allowed for the discussion of this case that I must proceed to a serious consideration of the testimony disclosed by the record. The Ninth Congressional district of Alabama is composed of the counties of Bibb, Blount, Hale, Perry, and Jefferson. No section of this great country of ours, in my judgment, has more natural advantages or is more highly favored than this district in my native State. The people are educated, refined, manly, honest, and just. They would spurn as unworthy of themselves and their section a wrong even against a Republican. We have the secret or Australian ballot system in Alabama. That I will notice more fully as I proceed with my argument. The counties of Jefferson, Blount, and Bibb are what is known in Alabama as white counties. The population is made up of a large majority of white people. In the counties of Hale and Perry the colored race predominates. As the county of Jefferson is the largest in point of population and wealth, I will notice first the charges of fraud and intimidation alleged to have been perpetrated there. It may be proper for me to say before I proceed further that in only three of these counties are there any contests—the county of Jefferson, in which Birmingham is situated, and the counties of Hale and Perry. The last two are what is known as the "canebrake section" of Alabama. This section is noted for the unsurpassed fertility of its soil, its women for their culture, refinement, and matchless personal charms, and the sons of such mothers could only be honest, manly, and brave, above the charges brought against them by the gentleman from North Carolina [Mr. LINNEY], possessing qualities of heart and mind far superior to anything his imagination has ever pictured. It would be impossible for him, judged by his record, to conceive of men approaching in refinement and all the manly qualities of those of that section. We will take up first the county of Jefferson. In that county out of 40 precincts only 4 are contested.

ELYTON PRECINCT, NO. 9.

In this precinct there were returned for the contestant 68 votes, and for the contestee 190 votes. The objections urged in this precinct are, (1) unfounded challenges, and (2) that colored voters were required to be identified by white men. The report says:

> The persons offering to vote for the contestant were frequently annoyed by unfounded challenges. The challenges themselves can not be made the subject of serious objection, for they were allowed by the laws of Alabama.

If the challenges were allowed by the laws of Alabama, as is admitted by the report, then it is clear that they were not unfounded. Again, if the challenges were allowed by our State laws they are not only not subject to serious objection but are not subject to objection at all. On the face of the report itself it shows that the

officers had the right under the law to make these challenges, and they did make them in pursuance of the statute law of the State. This criticism ought not to have been aimed at the manner in which the challenges were made, but ought to have been made, if at all, against the law itself. But I presume that even this committee, with its many shortcomings, would not undertake, in the privacy of their committee room, to legislate for the people of our State.

We are prepared to stand any criticism that you may make against the laws of Alabama. We are fully competent to make our own laws, to govern ourselves, without any interference or suggestions from you. But let us see whether or not there were any challenges in this precinct not justified by the statutes of Alabama. The evidence in this case shows that the line between precinct 29 and precinct 9 (Elyton) ran through Ensley City, and it was the duty of the officer to see to it that men living in these precincts did not vote at Elyton. There is a large floating population at Ensley City employed at the furnaces and other public works located at this place. Under the law of Alabama voters are permitted to exercise the right of franchise only in the precinct of their residence. It is clearly shown by the evidence that parties only were challenged who lived in Ensley City, and the challenges thus made were not unfounded, and could not have been the subject of objection. Section 29 of the election law of Alabama provides that—

When the right to vote of any person who demands to be permitted to vote is questioned by an elector, the said challenge shall be communicated to the inspectors before the person is permitted to vote, by the sheriff, or some other officer or person in attendance and in charge of admission to the polling place, when his right to vote must be determined as required by law.

Under this section of the law not only the officer in charge of the polling place, but any voter has the right of challenge whenever, in his judgment, the party offering to vote is not a qualified elector under the law. When the challenge is made, the party challenged is carried before the judges of election, and they determine, and not the officer or party making the challenge, whether or not the applicant is a qualified elector. The law provides, in section 33, "that any elector applying to vote who shall declare on oath, which oath may be administered by any one of the inspectors, that by reason of his inability to read the English language he is unable to prepare his ballot, may have the assistance of an inspector, to be selected by the elector or a person to be appointed for that purpose by the inspector of election," etc. In this precinct it is proven by uncontroverted testimony that not exceeding 15 men were challenged during the entire day, and that at least 3 of them lived out of the precinct, and were therefore not qualified electors. The Republican inspector or judge of election, Mr. Pettyjohn, testified that at least one-third of those challenged were permitted to vote, and the others, he says, failed to make the required affidavit or get some one to identify them. No one was refused the privilege of voting who complied with the law by making the required affidavit.

On this evidence 15 votes are added by the committee to the vote of the contestant as returned by the election officers. There is no pretense by the committee that these men were refused to be allowed to vote who complied with the law. It will be seen also by a careful examination of section 29, which I have just read, that the managers or judges of election only are permitted to pass on the qualification of electors. It is not claimed in the record that either of these men so challenged were challenged by the judges of the election. It is perfectly clear from the evidence, as well as the report of the majority of the committee, that these men were properly challenged and not entitled to a vote under the statute laws of Alabama, much less being counted for Mr. Aldrich by this committee.

I will now proceed to discuss the second reason given by the committee why the 19 votes counted for the contestant by them, in addition to his returned vote, should be allowed. The report says:

The votes were refused when offered by colored men, unless they should be identified by white men—

And further—

That J. O. Diffy, a witness for contestant, said that 15 colored men who had their registration certificates were challenged and not allowed to vote unless they could get a white man to identify them.

The only evidence that can be found in the record to sustain this statement is that two colored men swore that they were challenged by the deputy sheriff, and that he said that they must get a white man to identify them. One other witness stated that the deputy sheriff said to him that he must be identified by a "boss man." This is all of the evidence in the record on this proposition. Even admitting that the deputy sheriff made such a statement to these voters would not under our statute law preclude them from the right of casting their ballot. The judges of election, and they alone, can, by section 29 of the law, pass upon the rights of electors to cast their ballot, and it is not even pretended that the managers required any such identification. Mr. Pettyjohn, the Republican inspector, selected by the contestant, and a Northern man, in reply to the following question said:

Q. State if you heard the parties who challenged the colored voters say that they required that said voters be identified by any particular class or race of men.
A. I never heard any expressions to that effect.
Q. Those who failed to vote were refused a vote by the inspector of elections, were they not?
A. Yes.
Q. Were there any colored voters identified by colored witnesses that day?
A. There were.
Q. Upon said identification were those voters permitted to vote?
A. They were.
Q. Was there a voter offering to vote on that day who, having been challenged, produced witnesses, either colored or white, as to his residence in the precinct, or other qualifications as an elector, who was refused a vote?
A. There was no one who knew the precinct; there was none refused a vote who knew the precinct and proved that they resided in that line.

Thus it will be seen, gentlemen, that even the Republican inspector flatly contradicts the statement of these three witnesses, which was all of the evidence produced by the contestant to sustain this allegation, and on which your committee gave to contestant 19 votes never cast. It is impossible for the members of this House to know the evidence in this case. You are compelled to take this report as you find it and pass judgment on statement of facts therein contained. The report, therefore, ought to speak the truth and nothing but the truth, and if it utters a falsehood in one place it should cast grave suspicion on the entire report; so much so that this House ought to investigate for itself and see whether or not it can place dependence upon the statements made. They gravely tell you with every appearance of truth in this report that colored men were required to be identified by white men. If that is untrue, then I can not see how you can afford to make up your minds from its statement of facts. The contestant's own inspector, a man in whom he placed confidence, says that no such requirement was made by the inspectors or anyone else to his knowledge. The contestee puts on the stand the deputy sheriff and a number of other witnesses, all of whom say that there is not a word of truth in the statement made by these three colored witnesses. Again, this report pretends to quote the testimony of one J. O. Diffy, a witness for contestant, and a "spotter" on the ground in his interest, who was at the polling place when it opened and remained until it closed. He says in reply to the following question:

Q. Did you see the managers of that election refuse to allow any persons the privilege of voting? If so, state how many.
A. I can not say that the managers refused them.
Q. Do you know whether or not the managers of the election in beat 9 required the colored people to be identified by any particular person or class of persons? If so, state by what person or class of persons.
A. I could not say that they required any particular class of persons, because I identified one man myself, though the parties who were challenged said that they told them to get some white man to identify them.
Q. How many voters were refused the privilege of voting whom you offered to identify.
A. Not one.

Now, it is clear that the chairman of the committee, who claims to have written this report, has misquoted the testimony of J. O. Diffy when he says that Diffy swore that colored men were not allowed to vote "unless they could get a white man to identify them."

Mr. Speaker, I desire to put the question to the majority on the other side of this Chamber whether or not they are willing to unseat the contestee in this case on a report that it is clear can not be relied on when it comes to stating the evidence of witnesses? This report speaks a falsehood in regard to the testimony of J. O. Diffy and others, and members of this House, who are the jury impaneled to try this cause, will be required to vote to unseat my colleague on evidence not in the record, evidence prepared to order in the committee room on Elections. No reliance can be placed in such a document. But on this statement of the committee, not sustained by the record, but contradicted by it, 19 votes are cast for the contestant. If you give him every vote challenged, which Diffy puts at 15, deducting from the 15 those who voted, which Diffy says are one-third, or 5, and deduct the 3 votes that were proven to reside outside of the precinct then and there, it only leaves 7 men challenged at that polling place who did not cast their ballots; but the committee counts 19 for Mr. Aldrich. I will not discuss this matter further. It is absolutely false upon its face, and I feel that this House is of the same opinion.

BIRMINGHAM PRECINCT, NO. 37.

In this precinct, which is a part of the city of Birmingham, the committee gives to the contestant 69 votes more than were returned for him by the election officers. The grounds of objection to the vote in this precinct and the reasons given for this addition to the vote of the contestant are, first, that electors were arrested at the polls for having "dummy" tickets in their possession, and second, that one Tilley, with 8 other men, were not allowed to vote. The question that arises first is, Was it unlawful for voters outside of the voting place to have in their possession copies of the official ballot? Under the election law of Alabama the ballots are prepared

and furnished at public expense. Section 43 of our election laws says that—

Any person who aids, or attempts to aid, any elector by means of any mechanical device, or any other means whatever, in marking his ballot, or shall print or procure to be printed, or have in his possession, any copy of the ballot prepared to be voted, shall be guilty of a misdemeanor.

It is therefore clear that if any person had on the outside of the polling place any mechanical device to aid an elector in marking his ticket, he was violating the statute laws of the State and was guilty of a crime. Deputy sheriffs are required to be placed at each polling place, with instructions to arrest all violators of the law. It is the uncontroverted evidence in this case that early in the morning parties were on the streets aiding electors in the preparation of their ballots, having in their possession an exact copy of the official ballot to be voted. A copy of this ticket is to be found in the record. The arrests made, 7 in all, in the city of Birmingham during the day, by the officers, were for the reason that parties arrested were showing men how to mark their ballots in the booths with this "dummy" ticket. So far from this being a reason for charging the officers of the election with intimidation, it was carrying out the statute itself in preventing men from violating the law. It surely can not be construed by this House as a reason why 50 votes should be given to the contesant in this case, that the deputy sheriffs arrested men who were openly violating the law, who were afterwards convicted in the courts.

I venture the assertion, Mr. Speaker, that such a reason was never given before for adding to the returned vote of a contestant votes that were never cast. The report says that the election law of Alabama "unreasonably" made it an offense for any person to have in his possession any copy of the ballot proposed to be voted. Again, the chairman of this committee, who has served for twenty years on the New York bench, justified the addition of 50 votes to the contestant's returned vote on the ground that in his judgment the statute was "unreasonable" for making certain acts illegal. This committee, as I have said before, has no authority to make laws for the people of Alabama controlling their elections, but can only construe such laws as they find on the statute book; but because in their judgment it is unreasonable to make it an offense for a person to have in his possession on election day a copy of the official ballot, and because they think the law unreasonable and men were arrested for its violation, they add 50 votes to the returns for the contestant. This position, gentlemen, is utterly untenable; it is absurd, and no man who desires to be fair or honest would contend for such a position on the evidence of one witness who says that he was arrested for this offense and that 50 men left the polling place and did not return.

It is clear from his evidence that he does not know whether these men voted or not, nor does he give the name of a single man of the 50 who he says were intimidated and did not vote for contestant. He further states that he walked twice that day a distance of one and one-half miles to the other box in this precinct, and of course could not tell whether any of these 50 men voted during his absence. There was another box in this precinct at which these men could have voted and may have voted, but it is not even pretended that anyone stayed at the other polling place to see whether they voted there or not. Not one of these 50 men is put on the stand to ascertain whether or not he voted, nor are their names given so that an examination of the poll list would disclose the fact that they did or did not vote. Notwithstanding this fact, the contestant is a gainer by 50 votes if the House sustains the committee and permits this outrage. The second objection is that Vincent Tilley, a colored man, was driven from the polls by Mr. Thompson and that 8 other men left the polling place with him. He says in his testimony that he went to the headquarters of contestant and they told him to go to the other box in the precinct and vote there; he did so, and voted. None of the 8 men claimed by Tilley to have been ejected from the polling place is put on the stand nor are their names given. Tilley says, in answer to the following question:

Q. Did you see them put out?
A. Yes, sir. They said that they did not vote. They then said, "What will we do?" They then went to the hotel to get answer what to do, and they were told to go to the South Side.

This witness, an illiterate colored man, went to the South Side box and voted, and his answer shows that he does not know that the other 8 men did not vote. Mr. Thompson, who was mayor of the city of Birmingham in 1889-90, and was chairman of the Democratic campaign committee in that great county in 1894, and who was at the time chief deputy sheriff of the county of Jefferson, which vouches for his character and standing in Birmingham, says that he did not see the colored man Tilley on that day; that he did not eject him from the voting place in November, 1894; that he was not at this box during the day; that in August he made Tilley stand aside so that illiterate voters could cast their ballots. On this testimony the committee gives to the contestant 9 votes. There is no principle of law or of right that would justify the counting of these votes for the contestant under these circumstances. Under no condition would he be entitled to more than 8 votes, for Tilley swears that he did vote on that day, and voted for Aldrich. But there is no fair-minded man on the floor of this House who will read this evidence, and not come to the irresistible conclusion that Tilley is speaking of the August election and not of the November election.

But, Mr. Speaker, this judge, chairman of this great committee of the House, on evidence like this asks this House to vote that the contestant is entitled in this precinct to 69 votes that were never deposited in the ballot box for him or anyone else. I desire to call your attention again to the fact that when a report is shown to be so unreliable you can not afford to follow it and deprive the contestee of his seat and the people of the Ninth Congressional district of Alabama of representation in this Chamber without an individual investigation of the evidence. The report as to this precinct further says:

The strong probability is that at least 69 colored voters were frightened away by the arrest of others who would have voted for Aldrich.

You are asked to try this case on "probabilities" and not on facts; you are asked to unseat the contestee, because, in the opinion of this committee, it is "probable" that Aldrich lost 69 votes, because the officers of the election obeyed the mandates of the law by arresting 5 parties who were violating its provisions in the presence of the officers.

BESSEMER PRECINCT, NO. 33.

There is only one other precinct in Jefferson County to which I wish to call your attention. In this precinct the contestant received 226 votes and the contestee 230 votes. In this, as in all of the other precincts of the county, a manager or judge of election was appointed at the request of the chairman of contestant's campaign committee. The objection to the election in this precinct, as set up by this one-sided, unfair, and untrue report, is, first, that the Republicans were allowed only one inspector; second, they were allowed no clerk; third, that the ballots sent to the precincts were destroyed the night before the election; and fourth, that the Republican inspector was incompetent, "whose good intention could be readily frustrated by his wily and expert adversaries."

The law of Alabama requires that there shall be three judges at each election precinct and two clerks, and that these judges shall be of opposing political parties. At this polling place the contestant was allowed a manager, and this is all that the law requires. This manager was of his own selection and belonged to the Republican party. I presume from the argument and from the report of the gentleman that it was in his opinion the duty of the Democratic officers in Jefferson County to give to the contestant two of the judges of election, in order that we might satisfy the demands of this election committee. We gave you what the law allowed you, which is more than contestant's friends did for contestee in Blount County when they had the machinery. I desire to assure you now, regardless of what the action of the majority of this House may be, that you will not get in the future any more judges than the statute law of the State provides. There is nothing in the objection that no marker was allowed the contestant at Bessemer precinct.

Section 33 of the law of Alabama provides that—

Any elector applying to vote who shall declare on oath, which oath may be administered by any one of the inspectors, that by reason of his inability to read the English language he is unable to prepare his ballot may have the assistance of an inspector, to be selected by the elector, or a person to be appointed for that purpose by the inspectors of elections.

The law makes no provision for the appointment of one of the clerks or markers from opposing political parties. It is clear from this section of the law of Alabama that if a marker was not appointed for the contestant his interest would be protected by the manager appointed for him, as he is authorized to mark the ballots of illiterate voters of his own party; for it is provided by the law that the illiterate voter has the right to select the manager to mark his ticket of his own political faith. The evidence in the record discloses that the inspector at this polling place marked the tickets of nearly or quite all of the illiterate voters of his own party. The judges of elections appointed at this and other boxes contested in Jefferson County were each appointed at the request of the managers of the campaign of Mr. Aldrich. One of them, Mr. Smith, is one of the most distinguished lawyers in the State of Alabama. Another was Mr. Houston, who was postmaster at Birmingham during President Harrison's Administration, and is a brother-in-law of the present distinguished chief executive of Alabama. The manager at Bessemer box, the evidence discloses, was a man of character and standing in the community in which he lived and far from being an "inexperienced person" whose intentions could be frustrated by his adversaries on that occasion.

If there is any complaint of a want of intelligence, honesty, and integrity, as is intimated in this report, on the part of the judges of election in the precincts contested in Jefferson County, it is the fault of the contestant himself, and not of the contestee or his friends. They were his own selection, his own choice, his own political and personal friends. The evidence of Mr. Stile, the chief clerk of the probate court of Jefferson County, discloses and it is not contradicted in this record, that every Republican

appointment at each of the 40 precincts in Jefferson County was made at the suggestion of the chairman of contestant's committee. At this precinct there were over 1,200 registered voters. The judge of probate of the county, as required by law, prepared and had sent in a ballot box to the voting place on the day prior to the election two ballots for each registered voter. On the morning of the election it was ascertained by the deputy sheriff who had charge of the ballots that during the night some person had entered the office, which he had left locked on the night before, and destroyed all but 127 of the tickets. As soon as this fact was ascertained by the judges of the election two men, a Republican and a Democrat, were immediately sent to Birmingham, on the car which left Bessemer every half hour during the day, for the purpose of securing additional ballots for the accommodation of those who desired to vote for contestant and contestee. These parties telephoned at 11 o'clock from Birmingham that the tickets would be down on the next dummy, at 12.15, and they received the ballots before 1 o'clock. It is claimed in this report that on this account a large vote was lost to the contestant, and the committee propose to give him 365 votes.

They charge further, on the evidence of unreliable persons, that the deputy sheriff in charge of the polling place intimidated the voters, and for this reason the contestant lost a large vote. On page 329, McCrary on Elections, it is said:

Intimidation of voters must always be shown, and allegations and proof upon this subject should always be heard. It must, however, in the nature of things, be a rare case in which votes of persons prevented from voting by force or intimidation can be counted for one or the other candidate as if actually cast. In order that a vote not cast can be counted as if cast, it must appear that a legal voter offered to vote a perfect ballot, and that he was prevented from doing so by fraud, violence, or an erroneous ruling of the election officer.

It is nowhere to be found in this record that any of the 365 voters counted for contestant offered to vote. In this entire record the name of not one man even of the 365 is given who went to the polls who desired to cast his ballot and was prevented from doing so for the want of a ticket or on account of intimidation by the officers.

But, Mr. Speaker, they give to the contestant these 365 votes on the evidence of such witnesses as Z. T. Carwill; and he seems to be the most reliable and trustworthy of any witness for the contestant:

Q. Do you know of any persons who were prevented from voting because they could not get tickets?

A. My judgment is that there must have been three or four hundred men who did not vote on account of the report that there were no tickets. I do not know how many of these were Aldrich men.

Q. How did you get at your estimate that there were three or four hundred men who did not vote on account of the lack of tickets?

A. It was an estimate I made from seeing the men on the streets. I suppose you might call it a guess.

The distinguished chairman of this committee gives to the contestant in this case 365 votes on the guess of this witness. I will venture the assertion, Mr. Speaker, that you may search the records of the contested election cases in this House in the past and no such precedent as this has ever been established. The rule laid down in McCrary on Elections is: "It is a rare case, where votes can be counted for a candidate when they were not cast." Surely it will not be contended that this is one of those rare cases. It is not contended or pretended in this record that there was any fraud in the count of the vote, but because the ballots were not there in the morning, when they arrived at 1 o'clock, and it gave plenty of time for every registered voter to have cast his ballot. In the case of Newcom *vs.* Kertley, it was held that "the votes of two electors who, according to the testimony of several witnesses, would have voted for contestant if the polls had not been closed too soon could not be counted as if cast."

Here is a case in point where the polls were closed too soon and they were thereby deprived of the right of voting, and it is decided that even under these circumstances their votes could not be counted for the contestant. At Bessemer, without giving the name of a single voter who was deprived of the privilege of voting for Mr. Aldrich, the committee counts for him 365 ballots on the mere guess of a single witness. There is but one name that could be applied to an outrage like this–that it is robbery of the contestee and the people of the Ninth Congressional district of Alabama. It is said on page 208, McCrary on Elections:

In order that a ballot not actually cast shall be counted as if cast, it must appear that the voter actually offered to cast it and was prevented from so doing without fault on his part, or, if he does not actually present his ballot to the officers of the election, that he endeavored to approach the polls for that purpose and used due diligence in endeavoring to reach the polls, but was prevented from doing so. Doubtless a rule much more lax than this has occasionally been adopted in legislative bodies, but every departure from this rule as here stated is and must be both erroneous and dangerous.

The evidence can not bring the Bessemer case within the purview of this rule. There is no pretense but that they could have voted if they had remained there until 1 o'clock. There is no pretense that any who offered to vote were refused the right to do so or that any person approached the polls with the intention of voting and the privilege denied. It is not even claimed that the contestee was in the remotest degree connected with the loss of these ballots. It is not even pretended that these ballots were destroyed by his political friends. But, Mr. Speaker, in order to seat the contestant it was necessary to have these votes added to those received, and the committee propose to do so without the warrant of evidence, law, or justice. You may elect in the committee and in this House a Republican member of Congress from the Ninth Congressional district of Alabama, as these members—Republican members of the committee—have done, what the thousands of honest voters in the Ninth district never did and never will do, elect a Republican to represent them in the Federal Congress; but I desire to call your attention to evidence about which there can be no dispute. The total vote of this precinct in November was 456; the total vote in August at the gubernatorial election was 688. There were 232 votes more polled in August than at the November election.

As I have said before, there are 40 voting precincts in Jefferson County, and in every one of these precincts, without a single exception, there was a falling off of the vote from August to November of 40 to 50 per cent. In precinct No. 1, 82 votes were polled in August and 43 in November, a loss of 39. Precinct No. 2, 204 in August and 144 in November, a loss of 60 votes. Precinct No. 21, 1,440 in August and 1,144 in November, a loss of 296 votes. In precinct No. 37 there were 1,647 in August and 1,190 in November, a loss of 457 votes. Precinct No. 38, 132 in August and 69 in November, a loss of 63 votes. Precinct No. 40, 147 in August and 68 in November, a loss of 79 votes. In Precinct No. 33, which is Bessemer, there were 688 votes polled in August and 456 in November, a loss of 232 votes. But the Committee on Elections, after they get through voting in this precinct, increase the vote in November over the vote in August by 139.

There is not another precinct in the county in which there were more votes polled at the November election than in the August election—the vote falling off, as I have said above, from August to November on an average of more than 50 per cent; but still, after the committee are through casting their ballots, in their endeaver to elect a Congressman for the people of the Ninth Congressional district of Alabama, they say this precinct in Jefferson County has increased its vote in November over its vote in August. There is no disputing the proposition that your conduct, Mr. Chairman, in this matter is not only a disgrace to your committee, but a disgrace to this House as well, if they follow the lines you have marked out for them. It does appear to me that even the greed of this committee might have been satisfied with making the vote in Bessemer as much in November as it was at the August election, when a full State ticket was placed in the field by both of the political parties, and every effort was made to poll a full vote.

Does not the gentleman from New York [Mr. DANIELS] think that he has been just a little too liberal in this precinct with the contestant? I challenge him when he comes to reply to explain how it happened that this is the only one of the forty precincts in the county that made a gain in its November vote over its August vote. There is but one way that he can explain it, and that is by honestly confessing that it was not done by the voters at Bessemer, but by the four members of the committee, and charged up to "political exigency" in the interest of contestant. Not because it was believed that the contestant was deprived of 365 votes, not because there was any evidence in the record to justify it, but simply to secure one more Republican seat in this House.

I would like to ask, Mr. Speaker, if there is any more harm in robbing the ballot boxes at the polls in Alabama, as they allege, than to stuff it with illegal and fraudulent votes in the room of the Committee on Elections of this House? [Applause.] The proceeding is so shameful and so disgraceful that it brings a blush of shame even to Republican members on this floor who were members of the famous Fifty-first Congress, for they did stop unseating Democrats in that Congress as soon as they obtained a majority sufficient to transact business.

MARION, PERRY COUNTY.

Mr. Speaker, I now desire to direct the attention of the House to Perry County and the precinct of Marion. I would like to know before I proceed further how much time I have remaining.

The SPEAKER pro tempore. The gentleman has twenty-nine minutes remaining.

Mr. STALLINGS. Mr. Speaker, under the circumstances I will have to hurry along with this discussion if I expect to cover the precincts in the two remaining counties where contests have been instituted and contestee robbed. In the precinct of Marion there were 257 votes for the contestee and 45 for the contestant, as appears from the papers, the election papers, on file in the office of the probate judge when the evidence in the contest was taken. However, the evidence shows beyond any question by both the Republican and one of the Democratic inspectors that the vote returned was 287 for contestee and 15 for contestant. This will not be disputed by the committee. Thirty votes were taken from the contestee and given to the contestant by some one who tampered

with the returns after the inspectors had certified the vote and sent it in. It is important that this House should know, if it is disclosed by the evidence in the case, who it was and at whose instigation this change was made giving to Mr. Aldrich 30 votes more than he actually received at this precinct. There is evidence on this point wrung from one of the political managers of contestant the last day allowed for taking testimony. It required a regular twisting process to get this evidence out of Mr. Mothershed. His recollection on every proposition was clear and distinct until he was asked by counsel about conversations he had with one Mr. Hurt, a manager at this box, and then it was impossible for him to remember the conversations between himself and Mr. Hurt.

I propose to show to this House from the testimony of this witness Mothershed that Mr. Hurt was in the employ of contestant, and beyond question is the man who changed the vote at this precinct:

Q. Do you know H. H. Hurt, in Perry County?
A. I have met him a time or two.
Q. He is a Democrat, is he not?
A. I do not know his politics.
Q. He was one of the inspectors in the November election in Perry County, was he not?
A. Yes, sir.
Q. Did Mr. Hurt ever tell you that Mr. J. W. Worthington, of Birmingham, had agreed to pay him $1,800 if he would hold down the majority in Perry County, to 600 or something like that?
A. No, sir. He told me that he had some business with Mr. Worthington in regard to this last election. I think his language was that he was to get some money if he would guarantee a fair count, or words to that effect.
Q. When was it that you had that conversation with him?
A. My recollection is that it was on the night of the 2d of January.
Q. Didn't he tell you that he had already been paid a part of the money that he was to have, and the balance was still due him on account of that election matter, whatever it was?
A. He told me that he had received some money from the Democrats and the Republicans both.
Q. How much did he tell you that he had received from Mr. Worthington on account of that election matter in Perry?
A. I do not remember the figures. I think he said that it was five or six hundred dollars.
Q. How much did he say was still due him on that transaction, to the best of your recollection, at the time that you talked with him?
A. I don't remember. He told me that he had got some of the managers to change the returns after the election, agreeing to pay them for it, but I do not remember how much.
Q. Was not $1,800, the gross amount that he was to receive from Mr. Worthington for his services?
A. I do not know.
Q. Didn't he tell you that that was about the amount, $1,800 or $2,000?
A. I do not remember whether he did or not.
Q. Is it not your best recollection, Mr. Mothershed, that the amount he named was about $1,800 or $2,000?
A. He was talking a great deal about money matters, or, in other words, he told me that he had money transactions with a lot of men, showing me a lot of letters with assumed names to them, he telling me that some of them were Mr. Aldrich's friends and some of them Mr. Underwood's friends.
Q. Did you talk with him more than once about that same matter?
A. Yes, sir.
Q. Mr. Worthington was an active supporter of Mr. Aldrich in that campaign, was he not?
A. That is my recollection.

There is much more evidence given by Mr. Mothershed on this line, but as it is perfectly clear that Mr. Hurt was in the employ of contestant's friends, and that he received money from them, agreeing in consideration therefor that he would change the election returns in the interest of contestant, I will not quote him further. It is further ascertained from the evidence of this witness and his manner of testifying that he knew all about this transaction. He admits that Mr. Hurt told him that he had procured the services of managers of the election, after the returns had been sent in, to change them in the interest of Mr. Aldrich. If I had the time, Mr. Speaker, I would like to devote a portion of it, at least, to a criticism of the evidence of this witness and the conduct of Manager Hurt in this case. The probate judge of the county in his testimony says—

That not only the vote in this precinct was changed after the returns had been made by some one in the interest of contestant, but also in the precincts of Uniontown, Pope, Walthall, and other precincts, thereby depriving the contestee in this case of at least 400 or 500 votes that had been honestly returned for him.

The papers in this case, together with the evidence of the probate judge, make this so clear that it is not disputed even by the majority who make this report against contestee.

In this report they say that "the contestant would not have been allowed the 45 votes unless he certainly had received them." Such fallacious reasoning as this is ridiculous in the light of the evidence in the record. The contestant proved that he received 14 votes in this precinct, and he was given 15 before there was any tampering with the returns. Mr. Lester, the Republican manager at Marion precinct, testifies that the vote actually returned for the contestant was only 15. Mr. Leverett, on page 153 of the record, also testifies that he placed every ballot in the box, and that the vote was counted as it went in, and that 15 was the number received by contestant at Marion. There can be no question but that at this box the vote of Mr. Underwood was 287 and for Mr. Aldrich 15.

This report of the committee goes on to say: "But the objection to the vote of this precinct is of a different nature." They attempt to dodge the issue at this precinct, for they realize that if the facts in the case were stated in the report as they actually exist this House could not be induced, even with all of its partisanship, to permit this box to be entirely thrown aside. I am not surprised that the chairman of the committee desires to place his objection to the vote in this precinct on a different ground. He knew full well that he had to discard this precinct entirely in order to secure the results that he set out to ascertain. So he says in his report, having the above objections clearly in mind, as is evidenced from the results, that the booths were in one room, while the ballot box and the managers were in another, and on this ground he proceeds to throw out the entire vote of this precinct; nevertheless the contestee has proven by the uncontradicted testimony of Mr. Leverett, the Democratic inspector; by Mr. Lester, the Republican inspector; by Mr. Nelms, the marker, and by the certified poll list, which is made a part of the record in this case, that contestee received 287 votes at this box.

Section 24 of the election laws of Alabama is in the following words:

The sheriff of each county, at the expense of the county, or in case of municipal elections, the mayor or other chief executive officer, at the expense of the city or town, shall provide at each polling place a room or covered inclosure, and in such room or covered inclosure shall provide booths or compartments; one booth or compartment for each 100 or fraction of 100 or 50 electors registered for that election, and each with a shelf or table for the convenience of electors preparing their ballots. Each booth or compartment shall be so arranged that it will be impossible for one elector at a shelf or table in one room to see an elector at another shelf or table in another compartment in the act of marking his ballot.

This section of the election law of Alabama clearly implies that it was the intention of the legislature that the sheriff should furnish a room in which should be placed the booths for voters to occupy while making their tickets. I presume that even this committee would concede that prior to the enactment of this statute there was some place in every voting district where voters cast their ballots. Then this law makes it the duty of the sheriff, in addition to the places heretofore prepared for voting, to prepare rooms or covered inclosures at each of the voting places in which booths should be placed, implying that there should be a different room for the booths from the one in which the voting is done—and this construction is placed on this law in Alabama. At this precinct the booths were placed in the office of the probate judge, which is 24 by 16 feet, filled with furniture, and the ballot box, together with the managers and the paraphernalia of the election, was in a small room adjoining, which was the vault in which books of all the public officers of the county are kept. The object of this law was to secure a secret ballot, and if the booths and the managers and clerks were all in a small room, when a marker was called to mark the ballot of an illiterate elector this secrecy that the law intended to provide could not be had, because the officers of the election could easily hear for whom the illiterate voter instructed the marker to mark his ballot.

It is made a crime by the same statute to disclose who was the voter's choice. The law further provides that all booths shall be vacated when an illiterate voter enters one of them for the purpose of preparing his ballot. If the different sections of this law are construed together, as is the rule in the construction of all statutes, the conclusion must be reached inevitably that it was the intention of the lawmaking power to preserve absolute secrecy in the preparation of the vote of the elector; but the committee insists that a different construction should be placed upon this statute, that the booths should be kept in the same room with the ballot box and managers and clerks of election, and because this is not done they proceed to discard the entire vote of this precinct; nevertheless, contestee has proven the vote cast for him outside of the returns. But this committee ought at least, in all decency, to have some consistency in their rulings. In Jefferson County, in precinct No. 37, at the court-house, they had exactly the same arrangement, the booths being in one room and the ballots deposited in another, but in this precinct there is no effort made to throw out the vote. I desire to ask the chairman [Mr. DANIELS] what is the difference? Why is it that you permit in Jefferson, without protest even, what you prohibit in Marion? I desire, when you come to reply, that you explain this fully to the members of this House, and explain to them further how the findings of the committee can be consistent when you apply one rule of construction in Perry County and another to Jefferson County.

Mr. Speaker, I find the rule on page 272, McCrary on Elections, laid down in clear and unmistakable terms:

To set aside the returns of an election is one thing; to aside the election itself is another and very different thing. The return from a given precinct being set aside, the duty still remains to let the election stand and to ascertain from other evidence the true state of the vote. The return is only to be set aside, as we have seen, when it is so tainted with fraud or with the misconduct of the election officers that the truth can not be deduced from it. The election is only to be set aside when it is impossible from any evidence within reach to ascertain the true result, when neither from the returns nor from other proof, nor from all together, can the truth be determined.

The rule laid down above is that where the returns are set aside it is the duty of the committee to let the election stand if it is possible to ascertain by evidence the actual status of the vote. In setting aside the returns it does not appear that the vote actually cast is to be disregarded. The returns are set aside for fraud or on the ground of the misconduct of the election officers, but the election itself can only be set aside when it is impossible by evidence to ascertain the true results. Here the true result has been ascertained; the managers for both the contestant and the contestee swear to the result; besides this, the contestant himself makes a part of this record a certified copy of the original poll list. Moreover, the witnesses introduced by contestee, Mr. Nelms, Mr. Leverett, and others, prove conclusively that 225 voters—white voters—in this precinct cast their ballots for Mr. Underwood. Disregarding this evidence, disregarding the clear rule of law, the committee lays violent hands on the vote of this precinct, not allowing my colleague a single one even of the votes that he has proven by outside evidence, independent of the returns.

In order that the returns may be set aside, fraud must be established on the part of the officers of the election. Fraud by the election officers has not been proven; but the evidence of Mr. Mothershed clearly shows that after the polls had closed and the returns were made up they were tampered with, evidently by a man who had been a manager of the election. After Mr. Hurt signed and returned to the probate judge the papers showing the result of the election he was no longer an officer within the purview of the law, and any act of his, or confederates of his, after this was the act of outside parties, and not the act of the officers charged with the duty of conducting the election. So his conduct in changing the results, which was a fraud, was the conduct of a private citizen and not of an officer; and the returns can not be set aside for fraud unless it was the act of the manager or officers of the election. The misconduct of Mr. Hurt and his confederates after the election was over was not the misconduct of the election officers. To put any other construction on this rule of law is unwarranted, and this House ought not to permit it. Again, it is said on page 274, McCrary on Elections:

After a vote has been admitted something more is required to prove it illegal than to throw doubt upon it. There ought to be proof which, weighed by the ordinary rules of evidence, satisfies and convinces the mind that a mistake has been made, and which the House can rest upon as a safe precedent for like cases.

In the light of the evidence in this case, I desire to know if it is the opinion of members on the other side of this Chamber that the chairman of this committee has applied the legal rules of evidence in discarding the vote of this precinct. I am ready to admit, of course, that it is very easy to satisfy and convince the mind of the chairman of the committee and his colleagues that a mistake has been made—a fraud perpetrated—because when their minds are so satisfied it means a loss of over 200 votes to the contestee. But I will not consume more time, Mr. Speaker, in the discussion of this legal proposition, when I realize that my words are falling on deaf ears, on the ears of men whose minds are irrevocably made up. We do not expect to convince you, because that would be out of the question; we know what the result is to be, and we are now ready to accept the consequences.

WALTHALL.

In this precinct the vote was changed from 115 to 55, and against the contestee. The contestant examined 13 colored men, each of whom stated that he did not vote. This is practically all of the evidence introduced by him at this precinct. Capt. B. A. Hardy, a man of unimpeachable character and unquestioned integrity, was one of the managers or judges at this polling place. He is a merchant and a planter, an old-time Southern gentleman, whose word in the section where he lives would not under any condition be questioned. In his evidence, on page 708, he testifies that 10 of the 13 men whose names appear on the poll list who swore that they did not vote live on his plantation, and that they did vote on that date; the others, who do not live with him, he says voted on the 6th day of November, A. D. 1894, and voted for Underwood.

Another witness, J. Huggins, states that he saw 5 of these 13 men sitting under the ginhouse while the managers were at dinner, and that they told him that they were waiting to get an opportunity to vote. In the report of the committee they say that the contestee endeavored to prove that the 13 men did vote, and that the evidence to this fact was given by an inspector and another person. Without one word of evidence in the record to sustain it the report gravely says that—

The inspector had other employments engaging his attention during the day, and the other witness differed with him in his evidence. The testimony of the 13 is far the most reliable, and these 13 votes must be deducted from the returns made.

There is no contradiction in the evidence of Captain Hardy and Huggins on the points about which they propose to testify. Captain Hardy testifies that all of the 13 parties voted; Huggins only attempts to testify to seeing the 5 men waiting to vote under the ginhouse. How a judge of twenty years' standing can put such a construction on the evidence of these witnesses is beyond my comprehension. He must know, if he has read the evidence in this case, which I very seriously doubt, that there is no contradiction in the evidence of these two witnesses. Two or three of the witnesses testify that they did not vote. The evidence shows that there were three men in the precinct of the same name, and that they were the men on the poll list, and not the witnesses introduced by contestant. But why waste time in discussing so small a matter as 13 votes? The frauds perpetrated on the contestee by the committee in other precincts so far surpasses this that we dismiss this precinct without further comment.

UNIONTOWN.

I desire to state for the information of this House that there were two reports written in this case. The first report elects the contestant by less than a hundred votes, and only the chairman of the committee could be induced to sign it. All of the members of the committee present and voting when this first report of the chairman of the committee was read for their approval voted that Mr. Aldrich was not elected a member of the Fifty-fourth Congress and was not entitled to a seat therein. Among those voting that Mr. Aldrich is not entitled to a seat on the floor of this House was the gentleman from North Carolina [Mr. LINNEY]. He has changed front at least twice in this case, and his name is not signed to the report of the committee recommending that Mr. Aldrich be seated.

When this report was read the gentleman was then of the opinion that Mr. Underwood was elected a member of the Fifty-fourth Congress, and not Mr. Aldrich, and so stated in the committee room when he refused to sign each of the reports. The first report, gentlemen, did not discard the entire vote at Uniontown precinct, but left 177 votes which it admitted should be given to Mr. Underwood. Now, the report under discussion says that the entire vote should be thrown out. What reliance can be placed in the judgment and findings of men on a given statement of facts, with the evidence in writing before them, who decide one thing to-day and another to-morrow? Can you afford to establish a precedent for the guidance of this House in the future by following the findings of such a committee?

The judge of probate of the county testifies that over 300 votes were originally returned for the contestee, but after Mr. Hurt and his confederates in crime had finished up their dirty work, hired by contestant's manager in Birmingham, the returns only showed 187 votes at this precinct for Underwood. The evidence on which the vote of this precinct is asked to be discarded is of three or four colored men, who state that they did not know any one of the 23 names called over to them, and did not believe them to be residents of the precinct; but on cross-examination they admit that they do not know one-half of the thousand colored voters in the precinct. The rule laid down in McCrary on Elections, on page 261, is—

For the purpose of showing that nonresidents have voted, witnesses are often called to testify that persons whose names appear upon the roll as having voted are not known to them as residents of the county or voting precinct, as the case may be. This kind of evidence is admissible for what it is worth, but it is manifest that its value must depend upon circumstances. If the district or territory within which the voter must reside is large or very populous, and the witness has not an intimate and extensive acquaintance with the inhabitants, the evidence will be of little value, and standing alone, will avail nothing.

This is clear, concise, and can not be misconstrued. The proof in this case does not come up to these requirements, but it appears that the committee not only disregard the clear rule governing such cases, but also every precedent heretofore established in this House. The names of 24 persons were read over to the witnesses in this case and they state, as I have said before, that they are not acquainted with these parties. Seven of these names do not appear on the poll list as having voted at all; therefore the evidence as to these can not have any weight with this House. It certainly shows the unreliability of the report of this committee. The report says further that one Jim Jones swore, as a witness for the contestee, that 7 of the persons named in this list lived in Birmingham. You are asked, gentlemen of the House, to decide that there was fraud at this box because Jim Jones swore, according to the report, that 7 of the men on the poll list did not reside at Uniontown, but resided in the city of Birmingham. If Mr. DANIELS has examined this evidence, and I presume that he did examine the evidence of this witness, because he attempts to quote it in his report, he must have ascertained that this witness did not testify as he is quoted.

On page 708 of the record will be found the evidence of this witness, which is as follows:

Q. What is your name, color, and where do you reside?
A. Jim Jones is my name; I am a black man; I live in Uniontown, Perry County, Ala.
Q. Are you well acquainted with the colored voters of Uniontown beat?
A. Yes, sir; I am very well acquainted with them.
Q. Do you know the following-named persons? If yea, where did they

reside in November last, to wit: Sam. Steel, Earnest Reed, Frank Langsdon, Albert Avery, William Anderson, Willis Carrington, and William Mitchell?
A. I know them all, and they lived here in Uniontown beat at that time.

Here is another of the many misquotations of the evidence in the interest of the contestant. There can be but one solution of the conduct of this great committee of the House, and that is that this misstatement is put in this report for the purpose of securing your support to seat a man who the people of the Ninth Congressional district never did elect. Why should this witness be made to say in this report that the 7 men named over to him lived in Birmingham, when his evidence is so plain that they lived in Uniontown, and were there on the day of election? You can not, Mr. Speaker, place any reliance in a report absolutely reeking with false statements, false charges, vile insinuations, and misquotations of the testimony as given in the record of material facts. They say in this report, which is a key, in my judgment, to a complete solution of the objects and intentions of this committee, that Richard Ware saw 12 colored persons enter the polling place, "And not," says Judge DANIELS, "a single vote has been returned from this precinct for the contestant." Because a "spotter" witness saw 12 colored men enter a polling place he insists that fraud was perpetrated on the contestant because these 12 men's votes were not given to Mr. Aldrich. Such an assertion or statement made by a committee is enough within itself to discredit the entire report, but on such evidence as this the entire precinct, by the last report, is thrown out, and the 177 votes returned for contestee after it had gone through the hands of Mr. Hurt and his coconspirators is discarded. I will waste no more time in discussing the committee's report at this precinct.

HALE COUNTY.

In the limited time allowed me to discuss this case I can not go into the evidence in each of the precincts in Hale County. The committee tampered with the vote of 11 of the precincts in this county, and deduct 522 votes from contestee and add 109 votes to the returned vote for the contestant. In some of these precincts they disregard and set aside the evidence of hundreds of men who swore that they voted for contestee.

I will first take up Laneville precinct, which is a fair example of the conduct of this committee in their dealings with the other 10 contested precincts of this county. There was returned for Mr. Underwood in this precinct 102 votes and for Mr. Aldrich 3 votes. The evidence shows that the polling place was in the rear room of a store, and that there were 2 spotter witnesses at this box, who had 2 other men stationed in the house to report to them who went inside of the voting place. These witnesses have 63 names in all on their list; 37 white Democrats, 24 colored men, and 2 Jeffersonian Democrats, who were white men. They admit that the 37 white men were Democrats and voted for Underwood, but they claim that the 24 colored men, because they were colored, voted for Mr. Aldrich. Of these 24 colored men the contestee introduces 19 of them on the stand, who swear that they voted for him at the November election in 1895. One other, Fielder, whose name is on the list of 24, told the witness, Pearson, that he also voted for Mr. Underwood, and 3 out of the 24 are not on the poll list, and therefore did not vote.

Thus it is seen how absolusely unreliable is the list, together with the evidence of these hired poll watchers of the contestant. The contestee introduces 65 witnesses who say that they voted for Mr. Underwood. Thirty-four out of these 65 were not on the list of the spotter witness, Hilton. As I have already said, contestant's spotter witness admitted and gave the names of 63 persons who voted at this box and swore that no other electors entered the polling place. Of these 24 Republicans—Republicans because they were colored—nine or ten of them swear that they voted for the contestee. By a careful examination of this evidence you will ascertain that Mr. Underwood has proven by 97 witnesses, whose testimony is not even attempted to be impeached, that they voted in the November election in 1894 and voted for Mr. Underwood. Of this number 53 contradict and impeach the spotter witness Hilton when they swear that they voted for the contestee. But notwithstanding this fact that Hilton stands impeached by the managers of the election and by 53 disinterested, uncontradicted witnesses, this committee adopts his evidence as true, and strikes down 65 votes for the contestee at this precinct. He says in the report, in speaking of the testimony of these witnesses, that—

Nearly all answer in the same words, showing that they had been drilled and probably hired to answer as they did.

I desire to call the attention of this House to the questions put to the witnesses at this precinct, for it is perfectly evident that the questions were prepared beforehand, as the same questions were asked each of the 65 witnesses:

Q. What is your name, age, where do you reside, and how long have you so resided?
Q. Did you vote at the 1894 Congressional election in November at Laneville; and if so, for whom did you vote?
Q. Are you a colored man?

These identical questions were propounded to every one of the witnesses examined in Laneville precinct, and because the witnesses answer in the same words the majority of this committee charge that they were drilled and probably hired to answer as they did.

Now, Mr. Speaker, let me call the attention of this House to the questions asked the 76 witnesses examined for Mr. Aldrich at Carthage beat. The questions to each of the 76 witnesses of the contestant are in identically the same words, and are answered almost in identically the same language by each of the witnesses, just as was the case at Laneville precinct of witnesses for the contestee:

Q. What is your name, residence, and how long have you resided there?
Q. No. 2. Do you remember the Congressional election that was held in beat 12 in November, 1894?
Q. No. 3. Did you vote at said election; and if so, who did you vote for?

Now, examine the record, and you will see that the same questions, without the variation of a single word, were put to each of these 76 witnesses, and the answers are almost identical to every question. But in one case, at Laneville beat, from the fact that the questions were alike and the witnesses answered them as they could only do, in practically the same way, this great judge of twenty years' experience states that they had been drilled and probably hired to answer as they did, and refused to count a single one of these votes for contestee, while at Carthage he overturns, discredits, and disregards the returns of the election officers, but counts these 76 colored votes for the contestant. I venture the assertion here and now in this presence, among whom are some of the truly great lawyers of America, that in no contest case, or any other kind of a case, such partisanship, such construction of evidence, was ever exhibited before, showing such utter disregard of all rules of law and construction of evidence; yea, even decency itself. I will not further take up the time of this House discussing this outrage perpetrated not only on the contestee, but against the people of the district who elected him to represent them on the floor of this House.

GALLION BEAT.

I will now, Mr. Speaker and gentlemen of the House, direct your attention to Gallion beat, in Hale County. In this precinct there were 272 votes returned for Underwood. The testimony for he contestant was that of two spotter witnesses and two only—John Jeffries and John Baloe—who were hired by the contestant's friends and sent to this precinct to watch the conduct of the election. These men testify that they arrived at the voting place about 9 o'clock and that one of them took his stand on the front porch of Mr. Collins's store; that he remained there until 3.30 or 4 o'clock in the afternoon, and that he saw 31 white and 25 colored men vote while he was on guard.

This is all of the evidence for the contestant at this precinct. The contestee introduces each of the merchants and the clerks at the village where the voting took place—eight or nine in number; they each swear that they know Jeffries and Baloe, and that Baloe was not at the voting place during the entire day, and that John Jeffries arrived about 11 o'clock and left between 1 and 2; that during the time that he was at Gallion precinct he was in Mr. Collins's store most of the time, amusing himself, as a darkey frequently does, picking his banjo. [Laughter.] John W. Collins, C. W. Collins, J. Wood Collins, and R. W. Collins, who are merchants and planters, swear that Jeffries, even if he had been on the porch of the store, where he claims to have been, could not have seen parties going into the polling place, as a wall of a house would have obstructed his view. But what does an ordinary plank wall amount to when it comes in the way of the vision of one of contestant's hired spotter witnesses? A few of these spotter witnesses, with the aid of some members of this committee on a hunt for Republican votes, can perform miracles even in these times.

Four or five other unimpeached witnesses, who are clerks and merchants in the village, testify, completely corroborating the testimony of the Collinses. If there were no other evidence in this case except the returns of the officers appointed by law to manage this election, I can not see how this House could afford to set aside the returns in this precinct on the statement of this perjured colored witness. I say perjured, for even Mr. DANIELS admits that "entire credit" can not be given to their statements.

But, gentlemen, this is not all. To sustain the returns of honest, upright white men, whose character in the community where they live is above reproach, the contestee introduces 132 colored men, all of whom swear that they voted for Mr. Underwood on that occasion and were members of an Underwood Club. But the chairman of the committee in his report says, in his effort to unseat the contestee and deprive him of the vote of honest men who swear that they supported him:

That the colored people so notoriously vote the other way when they follow their own inclination that it is incredible that these persons swore as they did without being improperly induced to do so by the friends of the contestee.

Mr. Speaker, are we trying this case to-day on what is not credible to the mind of this partisan judge, or are we trying it on the record made up and furnished to this House? Where did Judge DANIELS get his information that all of the colored people in Alabama notoriously vote the Republican ticket? This statement is so absurd upon its face that it is incredible to believe that a man of his age, his character, and his standing would risk his reputation upon such reasoning. He admits that the statements of the spotter witnesses have been overturned; that they have been so conclusively and successfully impeached by nearly 150 men that, in his own words, "Entire credit is not due to the testimony of the two witnesses" who in that manner testified for the contestant.

I have not the time, Mr. Speaker, to take up in regular order the different assertions made in this report in regard to this precinct by this committee and show them up to this House in their proper light. On this kind of evidence, in the very teeth of the sworn statement of the voters themselves, this committee strikes down 234 votes polled at this precinct for contestee. It is conceded, and the proof is made by the contestant himself, which is a part of the record of this case, that the Republican chairman of the State executive committee and the chairmen of the county committees of Hale and Perry sent circulars broadcast over each of these counties in the summer of 1894, instructing and commanding the colored Republican voters not to register; and that they in this way kept the Republicans from registering, and thereby from voting at the election. Hence the colored men who did register in these two counties, as is testified to by A. B. Weems, the Republican chairman of the county committee, were Democrats. He also testifies that there were more colored Democrats in Gallion beat than in the balance of Hale County combined. But, even with the evidence of the contestant showing that these colored people were Democrats and registered as Democrats, the committee says that it is incredible that these men could vote the Democratic ticket, for they notoriously vote the other way.

GREENSBORO BEAT.

I am warned, Mr. Speaker, by the short time still remaining to me that I will have to skip seven or eight precincts in this county where the contestee has been robbed of votes honestly cast for him, fully as bad as in the case in Gallion beat, of which I have just spoken.

I will therefore devote the remainder of my time in calling the attention of this House to Greensboro beat. In building monuments to perpetuate the memory and deeds of great men, or to perpetuate some great historical event, it has been the custom in all ages of the world to put on a capstone to preserve the masonry from the destructive truth of time. In the case of Aldrich *vs.* Underwood the committee has followed the precedents of all ages and of all peoples in one particular at least, by making Greensboro precinct the capstone to the complete infamy of this report.

At Greensboro Mr. Underwood received 238 votes and Mr. Aldrich 5. The town of Greensboro, in Hale County, is the seat of learning of the Methodist Church in Alabama. It is noted for its wealth, for the refinement and culture of its people, and for their high moral ideas. For more than two generations in Alabama the people of this town have been noted for their many sterling qualities, which go to make up that high ideal of manhood. In this precinct there was likewise a colored spotter witness, a fellow by the name of Simms, who, in this report, is called "Mr. Simms, the merchant." He ran a little huckster shop across the street from the polling place, and the evidence shows that he never had as much as $500 worth of goods during his career as a merchant. He testifies that he remained on guard during the entire day, and he saw 183 voters enter the court-house by the front door. He further testifies that there were three other approaches to the polls, namely, through the register's and sheriff's offices and the office of the clerk of the circuit court, and that he does not know and will not undertake to say how many men approached the polls from these three directions. He furnishes a list of the names of the men whom he saw enter the polling place from the front door, and on this list there are 183 names, 177 being the names of white men, residents of the town and vicinity.

There is no dispute in this evidence as to the number of men that Simms saw approach the court-house by the front door; but still this report, with its usual disregard for truth and accuracy, puts the number at 162, when the list furnished by Simms, made a part of his evidence and a part of this record, shows by actual count that there are 183 names thereon. I simply call your attention, gentlemen, to this fact to show you again that it is impossible for this report to have emanated from the mind of the chairman of the committee, or to have been his production. In the most trivial as well as the gravest matters the report contradicts the record. When the contestee came to rebut this evidence by witnesses who could not be impeached he introduced 39 witnesses whose names do not appear on Simms's list, and all of these men swear that they voted on November 6, 1894, and voted for Mr. Underwood. It is important, immensely important, to the people of Alabama at least, to know, and for the country to know, what manner of men are these who testify for the contestee at this precinct. They are the bankers, preachers, lawyers, and merchants of the city of Greensboro. I find that 2 of these 39 witnesses were then and are now professors in the Methodist College at Greensboro. We find that one of them is one of the most distinguished divines in the State of Alabama, a man whose reputation for honesty, integrity, piety, and learning is not bounded even by the limits of his own native State.

This man, Dr. Otts, pastor of the Presbyterian church at Greensboro, testifies that he voted for Mr. Underwood on the 6th day of November; Professor Massey also testifies that he voted for Mr. Underwood, none of these names being on the list "of Mr. Simms, the merchant." The names of all of these 39 witnesses are placed in the brief of counsel for contestee; their testimony may be found in the record in this case, and the contestant himself will not dare get up in this Chamber and state for the information of this House that these 39 men are not the equals or peers in point of intelligence, honor, and integrity, at least, of the members of this committee. Let him say now whether or not these men, who swear that they voted for Underwood at Greensboro, are not of the highest type of manhood in our State.

As I have said before, Mr. Speaker, on this list of 39 names is a banker, 2 ministers, 2 professors, doctors, lawyers, and men in other high avocations in the city of Greensboro. But when they come under the scrutinizing gaze of this unfair and partisan committee the chairman in his report takes occasion to dismiss them and their evidence from this case in the following language. I will first quote what he says about the colored witness, Simms, whose evidence in this case overturns the testimony of the 39 men about whom I have spoken, the judges and clerks of the election, while it does not attempt to contradict them, because Simms himself says that he would not undertake to say who entered through the other three approaches to the polls. The report, in speaking of Simms's testimony, says:

> This witness was evidently an intelligent and observing person, and as he took a list of the names of the persons who went in the court-house door, there is little or no ground for supposing that he was mistaken.

It is evident from the report of the committee that they ignore the fact altogether that Simms also testified that there were other ways of approaching the polls besides the front door of the court-house, the place where he was watching, and that he could not say and would not undertake to say how many entered by the other ways.

The report says, in speaking of the 39 witnesses examined for contestee—

> The 35 or 39 persons examined by the contestee, who were not named by Simms, and swore they voted for Underwood, are not entitled to very much reliance in their statements, for they evidently swore by previous arrangement as to questions to be asked and the answers they should give. These questions and answers are so generally identical as to indicate that they had been arranged before either was sworn, and the persons, with very few exceptions, answered in the same way and used the same words.
>
> The questions and answers betray the fact that a previous coaching process had been used, and that the witnesses' statements, simple as they are, can not be credited. This process extends from page 599 to page 636 of the record. They testified according to the expression of one mind and by which they had been instructed.

I will not undertake, Mr. Speaker, to express the to me natural feelings of disapproval and disapprobation at this language—feelings of resentment and disgust that I can not and would not conceal—aroused by reading the statements in this report in regard to the character and standing of these most estimable gentlemen, residents of Greensboro, Ala. I am fearful, were I to attempt to portray in language these resentments and these feelings, my language might be construed by the present Speaker of the House to be unparliamentary. I will dismiss this matter by stating that it is too contemptible for consideration by any deliberative body, much less this American Congress.

There was no other way, Mr. Speaker, that these witnesses could have answered these questions. They were formal and asked for a statement regarding two facts, namely, whether or not they voted, and for whom they voted. He dismisses this precinct by stating that "the testimony given by the contestee as to the voters in this precinct is quite fragmentary, not impairing the evidence of Mr. Simms, and taking the 178 votes referred to on page 57 of the brief of the contestee from his returned vote of 238 brings him in 60 votes short of the return." Thus the contestee is again robbed of 60 votes more in order that you may add one more to the already unwieldy majority of the Republicans on this floor.

CARTHAGE BEAT.

I will, Mr. Speaker, in conclusion, call the attention of the House to one other of the many inconsistencies that mark this report as a measure of partisan zeal and partisan unfairness never equaled even in the Fifty-first Congress. At Carthage beat, in Hale County, there was no charge of unfairness or of wrongdoing in any way by the managers or judges of election. The injustice done the contestee in this precinct is simply on the construction

of a section of the election laws of Alabama. The returns showed 47 votes for contestee and 32 votes for contestant, and 33 were thrown out by the managers because the intention of the voter could not be ascertained from an examination of the ballot. Seventy-six witnesses testified that they voted for Mr. Aldrich. The managers, who are gentlemen of unimpeachable character, testified and produced as well the ballots that were not counted by them, and these ballots are made a part of the record in this case, and are here for the inspection of the House; and they show on their face that the electors did not make a cross mark, as required by law, opposite either of the names of the candidates, but made the cross at the top of the ballot opposite the words "Official ballot." Section 42 of the election laws of Alabama is in the following words:

SEC. 42. *Be it further enacted*, That if the elector marks more names than there are persons to be elected to an office, or if for any reason it is impossible to determine the elector's choice for any office to be filled, his ballot shall not be counted for such office; but this shall not vitiate the ballot, so far as properly marked, nor shall any ballot be rejected for any technical error which does not make it impossible to determine the elector's choice; and nothing herein shall be construed to prevent any elector from voting for any qualified person other than those whose names are printed on the ballot.

It is evident, gentlemen, that it is impossible to determine from these ballots the elector's choice for Congress. I hold in my hand a copy of the official ballot required by the laws of Alabama. You will see upon examination that if the cross-mark was made on the left of the words at the heading of the ticket, "Official ballot," it was impossible to determine the choice of the elector for a member of Congress from the Ninth Congressional district of Alabama. The statute says that "a ballot thus marked, where it is impossible to determine the elector's choice, shall not be counted for any candidate." Section 407, McCrary on Elections, lays down the rule in the following words:

The intention of the voter can not be proven to contradict the ballot or when it is composed of the paper ballot which he has deposited in the ballot box.

In this case and at this precinct the distinguished chairman of the committee has permitted voters to testify, in the teeth of this rule as well as the statute, that they voted for Mr. Aldrich, and he has counted these 33 ballots for him, besides 2 other ballots which were not marked at all. In the county of Blount there were 10 ballots which the judges of election cast aside without counting, for the reason that the cross mark was made on the right of Underwood's name, instead of the left, as section 42 of the election law provides. In this case the chairman of the committee in his report gravely says that they must be discarded because they were not marked as the law directs, when the law says:

If, for any reason, it is impossible to determine the elector's choice for any office to be filled, his ballot shall not be counted for such office; but this shall not vitiate the ballot so far as properly marked, nor shall any ballot be rejected for any technical error which does not make it impossible to determine the elector's choice.

In this case it was simply a technical error, and the choice of the elector was evident and could not be disputed. I call your attention, Mr. Speaker and gentlemen of the House, to these two cases in order that I may impress upon your minds the want of consistency, much less fairness, on the part of this committee, and the absolute unreliability of their report. There is not a lawyer on this floor, unbiased by partisanship, who would not readily say that the 33 votes given to Mr. Aldrich at Carthage, where the voter had marked the ticket opposite the words "Official ballot," is a wrong or would hesitate for a moment in construing this statute to give the 10 votes in Blount to contestee.

Mr. Speaker, in conclusion I will call the attention of the House to the fact that Mr. Underwood had a clear majority of 1,247 votes, not including those taken from him in Perry County, which, according to Judge Shiver's testimony, exceeded 500. This majority of 1,247 the committee set aside in the manner set out in my remarks, and turned this into a majority for contestant of 196.

But, sir, this Congress is making its record—a record in which, for profligacy in the expenditure of public money, for reckless and blind partisanship, for a total disregard of the needs and necessities of the public service, for a want of capacity to provide for an already bankrupt Treasury, it has far surpassed its only rival, the famous Fifty-first Congress. For your many shortcomings then your party was hurled from power by an indignant and outraged people, and many of your trusted leaders consigned to oblivion from which there will be no awakening

There is an innate fairness in the American people which will rebuke and revenge such profligacy and partisanship as has been witnessed during this Congress. You have already turned out 10 members of this House to make room for their Republican contestants. The eleventh is soon to follow. You can not justify your action in many, at least, of these cases at the bar of public opinion. In Murray *vs.* Elliott you disfranchised an entire city, throwing out without even a semblance of right 20 precincts, including the entire city of Charleston, in order that you might make room for the colored contestant, thereby hoping to hold your colored cohorts in the South in the coming national election.

Justice will follow in the wake of such wrongs; retribution will surely overtake you in your wickedness. [Applause.]

Mr. DANIELS. How much time have I left, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from New York has twenty-two minutes left.

Mr. DANIELS. Mr. Speaker, a very large amount of attention has been given by the gentleman who has just taken his seat [Mr. STALLINGS], as well as by the contestee himself, to the precinct of Elyton, where it is claimed that 19 votes were deducted from the vote returned as cast for the contestee. A correction of that claim was made when the contestee was addressing the House by the statement that the votes deducted there were only 5 in number. It was believed at first that votes should be deducted to the number of 19, in accordance with the statement made by the gentleman on the other side, but when the matter came to be considered before the full committee it was determined that the deduction should be 5 instead of 19. That disposes of so much of the argument on the other side as has been based on Elyton precinct.

Now, as to Bessemer precinct, it is stated here that there was no evidence before the committee relating to the fact that voters there were challenged, and challenged upon a mere pretext, for the purpose of preventing them from voting, and not for the purpose of enforcing the law of the State, and it is claimed that those votes should not be included or considered here. It appears from the testimony that the persons who were challenged, 15 in number, were there with their registration certificates, and they certainly would not have been registered had it not been for the fact that they were entitled to registration as residents of that district and entitled to vote. Their registration certificates, according to the evidence of Mr. Diffay, were in their hands and were produced, but still when these challenges were made the voters were not allowed to vote unless they could secure their identification by white persons.

Mr. BARTLETT of Georgia. Will the gentleman yield for a question?

Mr. DANIELS. I will.

Mr. BARTLETT of Georgia. I want to ask the gentleman if Mr. Pettyjohn, a Republican inspector at that precinct, was not asked whether any one colored person had been refused permission to vote because he was not identified by a white man, and if he did not say that there was not one?

Mr. DANIELS. He testified that there were none that he knew of. His testimony is this:

Q. Did the inspectors of election require the colored voters who had been challenged to prove by white witnesses that they resided in the precinct?
A. There was no special edict to that effect, but that was the general ruling.

Mr. BARTLETT of Georgia. Now, read on a little further. Does not the witness use the expression, "No, not one"?

Mr. DANIELS. He testified that there was no person that he identified who was not allowed to vote, and he did not know of any one's vote being rejected because no white man had identified the voter; but when those men were challenged in this way and were required to produce white men to identify them, they were incapable of complying with that requirement, because the white men declined to appear and sustain their rights, and the consequence was that the voters lost their votes. The statement of Mr. Pettyjohn was that, while there was no special edict to the effect that those voters should be refused permission to vote unless identified by white men, the general ruling was to that effect. These men were challenged upon the pretense that they were not voters. Having certificates of registration in their hands, they were undoubtedly voters entitled to vote at that precinct, yet, owing to the fact that a challenge could be made under the State law, upon that pretext they were excluded from the exercise of their right to vote. So that it is not true, as was stated here in the course of the discussion upon the other side, that men's votes were not rejected because they were unable to secure their identification by white men, because the testimony of Mr. Pettyjohn is that the general ruling was that that requirement was made.

It is also claimed that these arrests on the part of the deputy sheriffs, who swarmed around the precincts in the Birmingham district, were rightly made, because the persons who were arrested had in their possession tickets that resembled the tickets that were voted at that election, and the law has been read to you providing that where a person shall have a copy of a ticket in his possession that is intended to be voted at the election he is guilty of a misdemeanor and subject to arrest and punishment. I have already called the attention of the House to the form of the ticket, or the skeleton of the ticket, that these persons had in their possession for the purpose of endeavoring to instruct the colored voters how to mark their tickets. In order to constitute it a copy of the ticket that was to be voted at the election it was necessary, under the law of the State of Alabama, as it would be without any law, that the names of the candidates should be printed upon the ticket, and that the spaces should be left where marks could be registered by the voter indicating the changes which he desired to make when he came to deposit his ballot in the ballot box.

To constitute a copy of that ticket as it was intended to be voted all those particularities must appear upon the face of the ticket. Here is the ticket which these witnesses had. [Exhibiting a ticket.] There is not a single name upon it anywhere; it is not filled out in any shape whatever; it is nothing more than a mere skeleton. There is simply at the head of the ticket this X mark, showing the place where the colored voter should place his mark if he intended to vote the entire ticket. The men who were receiving this information from the persons who had these skeleton tickets were frightened away by the fact that those men were, many of them, arrested and placed in jail, being afterwards discharged when the voting time was over.

Now, does this look like fairness? Does it look like enforcing or carrying into effect the law of Alabama, making it an offense for a person to have in his possession or to exhibit to others a copy of a ballot which was to be voted at the election? A copy means an entire, complete copy—something which may be made the subject of deception to the voter. There was no possibility of that, because no man in his senses could go to the polls with a blank slip like that and suppose that by means of it he was voting for any candidate who was to be voted for at that election.

It has been stated that Mr. McKinney testified that he did not know who destroyed these ballots at Bessemer precinct. I desire to call attention to a very few answers that Mr. McKinney gave upon this point, for we contend that he was the man who destroyed those ballots. He was the only one who had in his hands the means of entering the room where the ballot box was and plundering or destroying the ballots in the manner in which the evidence shows it was done.

Q. What condition was the box in?

That is, when he received it from Mr. Stiles, who testifies that it had more than 2,400 ballots in it.

A. The box was in the same place where I left it, but much lighter than when I left it.
Q. What was the appearance of the room?
A. There were two chairs against the door when I went in there and signs of paper having been burnt in the grate.
Q. What did you do with the box when you picked it up and saw it was light?
A. I carried it from there to the polls.
Q. Did you know of anybody going into that room that night?
A. I did not know of anybody going in.
Q. Did you know of any plan or hear anybody say anything about stealing the ballots?
A. No, sir.
Q. Mr. McKinney, you were the returning officer, I believe, at that election?
A. Yes, sir.

So that Mr. McKinney is the one man who had knowledge of the fact that the box had been deposited there; he had the key of the door; the windows seem to have been closed when he went there in the morning. What is the inference? That he, having the means to do it, being one of the managers of the election, went there and took out more than 2,000 ballots from that box and ruthlessly burned them in the grate of the sheriff's office.

In the face of such evidence as this there is no use of asking how those ballots were destroyed or by whose agency it was done. There was no possibility of bringing in a mere outsider. The time was too short. No knowledge in regard to where that box was placed was communicated to any person except Mr. McKinney; he was the party who knew where this box was, and had the means of entering that room with the key which he had put in his pocket and then destroying the ballots.

Now, I want to call attention to a few words of the testimony of Thomas Collins upon the subject of the vote of this precinct. He says:

In the November election three-fourths of the voters were for Aldrich. This I know, for I canvassed them, and I know there were three-fourths at least. Aldrich would have carried this beat by 600 majority—

We have only counted in his favor 365—

Aldrich would have carried this beat by 600 majority over Underwood if there had been a free, fair election with enough ballots. I am acquainted with the labor vote. In the national election in November, 1894, the colored voters were for Aldrich to a man. The white labor voters were generally for Aldrich. In my judgment, every white laboring man who had a position was for Aldrich. I was for Aldrich.

Passing down further in his evidence, I read:

On the November election, in 1894, there was a great deal of intimidation by the officers of election. The officers of the city were in charge of the rope, 50 feet from the polling place. Jim Tate, as an officer of the city; George Jones, as an official, shoved back the darkies who wanted to vote the Republican ticket, crowded the white people in under the ropes who wanted to vote for Underwood, and keeping the force of the Aldrich voters back to such a time as the polls would be closed.

Then he says further:

The officials in managing the election came out as soon as the tickets gave out, stated to the voters that the tickets were all gone; that we might as well go home, as there would be no more tickets that day and no more voting, and then the crowds left very angry. * * * I know it to be a fact that word was sent out by the Organized Democrats to have all the Democrats there early in the morning to vote, as the ballots would soon give out. When the polls opened in the morning I was there, and the place in front was all filled up with Organized Democrats according to the understanding that there was only 126 tickets to vote.

That is the testimony of a man who swears positively as to his own knowledge of the circumstances. Now, Mr. Potter testifies in response to questions as follows:

Q. State if there were any irregularities or illegalities at the polls in Bessemer at the November election.
A. I should say there was.
Q. In what way?
A. Voters were driven back by men who had badges on, and police, while others were conducted up through a room to the voting place, and while Organized Democrats were led up back ways, so they could vote, and those badges were changed onto men so as to authorize them to go in and vote.
Q. How many men, in your judgment, were deprived of the right to vote in November by the methods you described, and by the failure of the election officers to furnish voters with official ballots?
A. About 400 or 500; not less than 500.

Now, Mr. Speaker, we do not question in this matter that in some of these three precincts, where so many persons were brought up to swear they voted for Mr. Underwood, that there were some honest men who testified honestly, and that they may have been speaking the truth; but as to the mass, the great majority, as I shall presently show, there is no room for speculation of this character. I have read the testimony of two witnesses who state that there was an attempt to hire them, among others, to go in and vote, and they declined to do so. They also testify that they were to be given information as to what they should testify, if they accepted.

Now, in the case of Gallion precinct there were about 132 men marched in one after the other to be sworn, and I will refer you to some extracts from their testimony to show that, testifying as they did under these circumstances, it is apparent that they were there not to swear looking to the truth of the matters about which they undertook to testify, but, under the austere and sinister influences brought to bear on them by parties who were enabled to exercise control over them at best for the time being, to give such evidence as was required by their managers. There are a few of these witnesses who signed the affidavits they made in their own handwriting; but in nearly all cases it is signed by the witness making his mark, and I desire to read a specimen of the questions and answers given by these witnesses when interrogated on these subjects; and I ask you gentlemen in your experience whether you would be satisfied, when you come to decide a question involving a matter of right in a court of justice, to be willing to rely on testimony shaped in advance and given in this manner? It will be seen that all of these questions and answers are practically the same. Here is the testimony, for instance, of Seaborn Kelly:

Q. Do you remember the 1894 Congressional election; and if so, did you vote at said election in Gallion beat, and for whom did you vote?
A. I remember the Congressional election, and voted in Gallion beat for Mr. Underwood.

Following is the testimony of George Washington:

Q. Do you remember the 1894 Congressional election in Gallion beat, and for whom did you vote?
A. Yes, sir; I remember the 1894 Congressional election, and I voted in Gallion beat, and I voted for Mr. Underwood.

Now we turn over a few pages, omitting a number of witnesses testifying exactly the same way, and at random taking the next witness we find the testimony of Emmett Ashe:

Q. Do you remember the 1894 Congressional election; and if so, did you vote at said election in Gallion beat, and for whom did you vote?
A. Yes, sir; and I voted in Gallion beat for Mr. Underwood.

Again, on the same page, William Willis testifies:

Q. Do you remember the 1894 Congressional election; and if so, did you vote at said election in Gallion beat, and for whom did you vote?
A. I remember the Congressional election, and I voted in Gallion beat for Mr. Underwood.

Turning over a few pages filled with testimony precisely like this, we turn at random to page 536 and find the testimony of George Smith, as follows:

Q. Do you remember the 1894 Congressional election; and if so, did you vote at said election in Gallion beat, and for whom did you vote?
A. Yes, sir; and I voted in Gallion beat for Mr. Underwood.
Attest:

GEO. (his x mark) SMITH, JR.

J. T. COLLINS, JR., *Commissioner.*

And so it goes on, the stereotyped question eliciting answers of the same character and nearly in the same language for more than 99 witnesses, and I will not detain the House to read any more of them; but the mere statement of the fact is suggestive and sufficient.

Mr. Speaker, I claim that it is not within the wit of man to put 90 witnesses on the stand, propound to them the same question, and get precisely, as in this case, the same answer, if the answer is a truthful one. It can not be done, because the experience of man has shown to the contrary. Such matters leave different impressions on the minds of different men. A different impression being made upon their minds the answers are different, when answers are given to such a stereotyped question, a question that was undoubtedly carefully prepared and written out, for identically

the same question is put to all of these witnesses. And it brings us to the statement of the two colored men to whom I have already referred. These were asked to go in and swear with the other persons, and they were to be instructed with the answers they were to give. But they declined.

In the testimony respecting the voters at the Laneville beat we find precisely the same form, except the change made by inserting the name of the precinct which is concerned, and in reference to which the answer was made. We find, for instance, the evidence of Stonewall Scott, page 648:

Q. Did you vote at last Congressional election in 1894 at Laneville beat; and if so, for whom did you vote?
A. I did; I voted for Underwood.

Again, the evidence of Anderson Garner:

Q. Did you vote at the 1894 Congressional election in November at Laneville beat; and if so, for whom did you vote?
A. I did; I voted for Underwood.

Again, on the evidence of Louis Cash:

Q. Did you vote in the 1894 Congressional election in November, 1894? If so, for whom did you vote?
A. I voted, and voted for Underwood.

And so on through a long list of witnesses, from which I have read at random.

It will be seen that all of these answers were made in the same stereotyped form, showing that these people were instructed how to answer the question, as it was promised to the two men who would not go into the enterprise that they should be instructed as to how they should answer also.

Mr. OWENS. Were these witnesses cross-examined at the time?

Mr. DANIELS. Not very much.

Mr. OWENS. But there was an attorney there to cross-examine them.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. DANIELS. I should like to have one moment. I say nothing against these gentlemen of prominence in the State of Alabama who came up and testified themselves and signed their own depositions. They are men of character and standing; but as to these colored voters of whom I have been speaking, they were the persons to whom this criticism refers.

Mr. Speaker, I now move the previous question.

The SPEAKER pro tempore. The Chair understands that no substitute resolutions have been offered. The gentleman from New York [Mr. DANIELS] moves the previous question.

The question was taken; and on a division (demanded by Mr. OWENS) there were—ayes 102, noes 5.

Accordingly the previous question was ordered.

Mr. OWENS. I move to recommit the report to the Committee on Elections No. 1.

The question was taken; and on a division (demanded by Mr. OWENS) there were—ayes 66, noes 93.

Accordingly the motion was rejected.

The SPEAKER pro tempore. The question now recurs on the resolutions offered by the committee.

Mr. BARTLETT of Georgia. I ask for a division of the resolutions.

The SPEAKER pro tempore. The gentleman from Georgia asks that the resolutions be divided. The question will first recur on the first resolution, which the Clerk will report.

The Clerk read as follows:

Resolved, That Oscar W. Underwood was not elected a member of the House of Representatives from the Ninth Congressional district of Alabama for the Fifty-fourth Congress, and is not entitled to a seat therein.

The question was taken; and on a division (demanded by Mr. OWENS) there were—ayes 101, noes 68.

Mr. OWENS. Let us have the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 119, nays 98, not voting 137; as follows:

YEAS—119.

So the resolution was agreed to.

The Clerk announced the following additional pairs:

For this day:

Mr. SNOVER with Mr. YOAKUM.

On this question:

Mr. HICKS with Mr. ROBERTSON of Louisiana.

Mr. GROSVENOR with Mr. COCKRELL.

Mr. MERCER with Mr. POWERS.

Mr. FENTON with Mr. STROWD of North Carolina.

Mr. GROUT with Mr. MEREDITH.

Mr. MAHON with Mr. HALL.

On this vote:

Mr. CANNON with Mr. HARRISON.

Mr. WHITE with Mr. PRICE.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question now recurs on the second resolution, which the Clerk will report.

The Clerk read as follows:

Resolved, That Truman H. Aldrich was elected a member of the House of Representatives from the Ninth Congressional district of Alabama for the Fifty-fourth Congress, and is entitled to a seat therein.

The question was taken on the resolution; and on a division (demanded by Mr. OWENS) there were—ayes 97, noes 87.

Mr. BARTLETT of Georgia. Let us have the yeas and nays.

The yeas and nays were ordered.

Mr. DOCKERY. Mr. Speaker, a parliamentary inquiry. In the event that the pending resolution is disagreed to, will it not have the effect of declaring the seat vacant?

The SPEAKER pro tempore. If the resolution is disagreed to, the House will fail to indorse a resolution saying that the contestant is entitled to his seat.

The question was taken; and there were—yeas 116, nays 107, not voting 130; as follows:

YEAS—116.

The following additional pair was announced:

Mr. HICKS with Mr. LITTLE, until further notice.

Mr. TURNER of Georgia. Mr. Speaker, my colleague, Mr. LAWSON, is detained from the House by illness. I ask that he be excused.

The SPEAKER. If there be no objection, he will be excused.

There was no objection.

Mr. MCMILLIN. Mr. Speaker, this is an important vote, and I ask a recapitulation.

The vote was recapitulated.

Mr. MCMILLIN. Mr. Speaker, I desire to change my vote from "nay" to "yea."

The name of Mr. MCMILLIN was called, and he voted "yea."

Mr. LITTLE. Mr. Speaker, I find I am paired with the gentleman from Pennsylvania, Mr. HICKS. I desire to withdraw my vote.

Mr. FAIRCHILD. Mr. Speaker, I desire to withdraw my vote and be marked as "present."

Mr. BERRY. Mr. Speaker, I am paired with the gentleman from Michigan, Mr. SMITH, on political questions. I doubt whether this is a political question, but I think I ought to withdraw my vote, and do so.

The result of the vote was then announced as above recorded.

Mr. MCMILLIN. I move to reconsider——

Mr. CANNON. Mr. Speaker, I rise to a question of the highest privilege.

Mr. MCMILLIN (continuing). The vote just taken.

Mr. CANNON. I rise to a question of higher privilege.

Mr. DANIELS. I move to lay the motion to reconsider on the table.

Mr. CANNON. I rise to a question of higher privilege. I present a conference report.

The SPEAKER pro tempore. The gentlemen from Tennessee moves to reconsider the vote last taken, and the gentleman from New York moves to lay that motion on the table. Pending that, the gentleman from Illinois rises to present a conference report, which the Clerk will read.

SUNDRY CIVIL APPROPRIATION BILL.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 32, 61, 124, and 161.

That the House recede from its disagreement to the amendments of the Senate numbered 122, 146, and 147, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 109, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "To enable the Government to take official part in the international exhibition to be held at Brussels, Belgium, during the year 1897, $5,000: *Provided*, That no expenditure exceeding this appropriation shall be made or liability incurred, and no person shall be paid salary or compensation therefrom"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 123, and agree to the same with amendments as follows: In lieu of the sum proposed insert "$20."

And on page 67 of the bill, in line 14, strike out the word "six" and insert in lieu thereof the word "five"; and the Senate agree to the same.

The committee of conference have been unable to agree upon the amendments of the Senate numbered 2, 3, 4, 6, 7, 8, 13, 15, 16, and 17.

J. G. CANNON,
JOSEPH D. SAYERS,
Managers on the part of the House.

W. B. ALLISON,
EUGENE HALE,
A. P. GORMAN,
Managers on the part of the Senate.

Mr. CANNON. Mr. Speaker, I ask that the conference report be laid aside temporarily, and that the gentleman from Vermont [Mr. GROUT] may be permitted to ask the House to put the District bill back into conference on a message from the Senate disagreeing to the House amendments.

The SPEAKER pro tempore. Without objection, it will be so ordered.

Mr. KEM. I object, Mr. Speaker.

Mr. CANNON. But this does not require unanimous consent.

The SPEAKER pro tempore. The gentleman withdraws the conference report.

Mr. CANNON. Oh, no.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. GROUT. Mr. Speaker, I move that the House insist upon its amendment to the amendment of the Senate numbered 99, I believe, and also further insist upon its disagreement to the remaining Senate amendments, and agree to the conference asked for by the Senate.

Mr. OWENS. We can not hear the motion.

The SPEAKER pro tempore. The gentleman from Vermont moves that the House insist upon its amendment to the amendment of the Senate, and further insist upon its disagreement to the Senate amendments to the District of Columbia appropriation bill, and agree to a conference.

The motion was agreed to.

The SPEAKER pro tempore. The Chair will appoint as conferees on the part of the House the gentleman from Vermont, Mr. GROUT, the gentleman from New Jersey, Mr. PITNEY, and the gentleman from Missouri, Mr. DOCKERY.

CONTESTED-ELECTION CASE—ALDRICH VS. UNDERWOOD.

Mr. DANIELS. I bring up the motion to lay on the table the motion to reconsider the vote by which the resolution of the committee was agreed to.

The SPEAKER pro tempore. The question is on the motion of

the gentleman from New York [Mr. DANIELS] to lay on the table the motion of the gentleman from Tennessee [Mr. MCMILLIN] to reconsider.

The question being taken on the motion of Mr. DANIELS, the Speaker declared that the ayes seemed to have it.

Mr. MCMILLIN. I ask for a division.

The House divided; and there were—ayes 142, noes 67.

So the motion was agreed to.

SWEARING IN OF A MEMBER.

Mr. DANIELS. Mr. Speaker, I ask to have the oath administered to the gentleman who has just been declared entitled to a seat.

Mr. Truman H. Aldrich appeared at the bar of the House and the oath of office was administered to him by the Speaker pro tempore, Mr. PAYNE. [Applause.]

MESSAGE FROM THE PRESIDENT.

A message from the President, by Mr. PRUDEN, one of his secretaries, announced that the President had approved and signed bills of the following titles:

On June 8, 1896:

An act (H. R. 9404) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes;

An act (H. R. 8469) to authorize the Baltimore and Washington Transit Company, of Maryland, to enter the District of Columbia;

An act (H. R. 4921) to relieve the North Georgia Agricultural College from the payment of $450 for damaged gun;

An act (H. R. 5946) granting an increase of pension to Abraham H. Parker;

An act (H. R. 5279) granting a pension to Jerusha H. Brown;

An act (H. R. 2143) granting a pension to Mrs. Emily M. Van Derveer, widow of the late Brig. Gen. Ferdinand Van Derveer;

An act (H. R. 4888) for the relief of George Hager;

An act (H. R. 4020) granting an increase of pension to Mrs. William Loring Spencer;

An act (H. R. 5258) granting an honorable discharge to John B. Besler; and

An act (H. R. 6259) to expedite the delivery of imported parcels and packages not exceeding $500 in value.

On June 9, 1896:

An act (H. R. 8248) to increase the pension of Mrs. Emily E. Cash.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed without amendment the bill (H. R. 8383) to establish a site for the erection of a penitentiary on the military reservation at Fort Leavenworth, Kans., and for other purposes.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2928) to extend the routes of the Eckington and Soldiers' Home Railway Company and of the Baltimore Railway Company of the District of Columbia, and for other purposes.

The message also announced that the Senate had passed bills and a joint resolution of the following titles; in which the concurrence of the House was requested:

A bill (S. 3269) to pay the Richmond Locomotive and Machine Works its claim for damages and losses incurred in the construction of the armored battle ship *Texas;*

A bill (S. 3150) authorizing the President to appoint Lieut. Robert Platt, United States Navy, to the rank of commander;

A bill (S. 1583) for the relief of L. Robert Coates & Co., of Baltimore, Md.;

A bill (S. 524) for the relief of Avery D. Babcock and wife, of Oregon;

A bill (S. 286) to provide for the purchase of a site for the erection of a public building at Oakland, in the State of California;

A bill (S. 265) extending relief to Indian citizens, and for other purposes; and

Joint resolution (S. R. 138) for the relief of James P. Veach.

A further message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed with amendment the bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for expenses of the House of Representatives, and for other purposes, for the fiscal year 1896; in which the concurrence of the House was requested.

A further message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had disagreed to the amendment of the House to the amendment of the Senate numbered 99, and had still further insisted upon its amendments to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes, numbered 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, and 195, disagreed to by the House of Representatives, had asked a further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. TELLER, Mr. ALLISON, and Mr. COCKRELL as the conferees on the part of the Senate.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, the following Senate bills were taken from the Speaker's table and referred by the Speaker as follows:

A bill (S. 3269) to pay the Richmond Locomotive and Machine Works its claim for damages and losses incurred in the construction of the armored battle ship *Texas*—to the Committee on Claims.

A bill (S. 3150) authorizing the President to appoint Lieut. Robert Platt, United States Navy, to the rank of commander—to the Committee on Naval Affairs.

A bill (S. 1583) for the relief of L. Robert Coates & Co., of Baltimore, Md.—to the Committee on Claims.

A bill (S. 524) for the relief of Avery D. Babcock and wife, of Oregon—to the Committee on Claims.

A bill (S. 286) to provide for the purchase of a site for the erection of a public building at Oakland, in the State of California—to the Committee on Public Buildings and Grounds.

A bill (S. 265) extending relief to Indian citizens, and for other purposes—to the Committee on Indian Affairs.

Joint resolution (S. R. 138) for the relief of James P. Veach—to the Committee on Military Affairs.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. CANNON. Mr. Speaker, I call up the conference report on the sundry civil bill.

The SPEAKER pro tempore. The report has been read.

Mr. CANNON. Let the statement be read.

The statement of the conferees on the part of the House was read, as follows:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government, submit the following written statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report on each of said amendments, namely:

On No. 32: Strikes out the appropriation of $15,000 proposed by the Senate for a light-house at Swan Island, in the Caribbean Sea.

On No. 61: Strikes out the appropriation of $250,000 proposed by the Senate for an additional fire-proof building for the National Museum.

On No. 109: Appropriates $5,000, instead of $35,000, as proposed by the Senate, to enable the Government to take part in the exposition at Brussels, Belgium.

On Nos. 122, 123, and 124: Appropriates $14,000, as proposed by the Senate, instead of $11,500, as proposed by the House, for lighting the Executive Mansion and public grounds, limits the price per lamp in the grounds to $20, and requires that the same shall burn all night.

On Nos. 146 and 147: Appropriates for the Providence and Garfield Hospitals $19,000 each, as proposed by the Senate.

On No. 161: Strikes out the appropriation proposed by the Senate with reference to the accounts of the Soldiers' Homes.

The committee of conference have been unable to agree on the amendments of the Senate numbered 2, 3, 4, 6, 7, 8, 13, 15, 16, and 17, relating to the public buildings at—

Boise City, Idaho;
Camden, N. J.;
Cheyenne, Wyo.;
Fortress Monroe;
Helena, Mont.;
Kansas City, Mo.;
Omaha, Nebr.;
St. Paul, Minn.;
Salt Lake City, Utah; and
Savannah, Ga.

J. G. CANNON,
JOSEPH D. SAYERS,
Managers on the part of the House.

Mr. CANNON. Mr. Speaker, I move that the conference report be adopted.

Mr. HAINER of Nebraska. Mr. Speaker——

Mr. CANNON. I yield five minutes to the gentleman from Nebraska [Mr. HAINER].

Mr. HAINER of Nebraska. Mr. Speaker, as one of the conferees I could not sign the report which has been submitted to the House for its consideration. Gentlemen will have noticed that it makes the old-time appropriations for the two hospitals, Providence and Garfield. These institutions are private, and one, at least, in every sense sectarian. The appropriation is a subsidy—a largesse pure and simple. I have from the commencement opposed the appropriation of any money for any private purpose for any length of time or pretext whatever. I believed that such appropriations are wholly wrong, unjustifiable, fraught with danger, and perfectly inexcusable. I still think so. But the majority of the conferees felt that in order to close out this bill it was necessary to make the concession which is made in the conference report. In these circumstances I did not feel warranted in further prolonging the fight along this line, but permit me to say, gentlemen, that I think that on these questions, whether on this bill or on the District of Columbia bill or on the Indian

appropriation bill, you can not with safety make any compromise whatever, and that whoever makes a compromise is himself compromised in the end. No political party in the United States has in its platform ever expressed itself on the subject but in denunciation of the practice of appropriating public money for private purposes as un-American, unjust, and wholly unauthorized—not for one year nor for six months, but for any length of time whatever.

Having said this much, washing my hands entirely of any compromise which may have been made in this bill or in any other bill, I can go back to my people with the knowledge that I have carried the flag in this fight as a man should, true to his conscience and true to the principles of Americanism, which, though not entirely successful in this Congress, in the time to come certainly will beyond all possible question triumph. On this question, from this Congress and from any other adverse Congress, the appeal will be made to the great American people, who when their hearts and minds are touched, as surely they are being touched and awakened, are always true to the principles upon which their Government is founded.

Mr. SAYERS. Mr. Speaker, as the minority on the conference committee representing the House for the settlement of the matters of difference between the Senate and the House upon the sundry civil appropriation bill, I feel it due to myself and to the House to say that I believe that, unless some compromise of the kind proposed in this report is made, either this session of Congress will be indefinitely prolonged or the sundry civil bill, carrying over $30,000,000 for the support of the Government during the next fiscal year, will fail. I wish further to say to the House that the two appropriations to which the gentleman from Nebraska has referred are not for sectarian purposes. They are for the partial support of two hospitals, and exactly similar appropriations to those here made have appeared in the sundry civil bills for more than ten years past. The Senate in this case restored these provisions to the bill, and insisted upon the amendment. That is all I have to say.

Mr. WILLIAMS. May I ask the gentleman a question?

Mr. SAYERS. Certainly.

Mr. WILLIAMS. Are these institutions private institutions?

Mr. SAYERS. I do not consider them altogether private institutions. They are institutions incorporated for purposes of charity, and Congress has for many years past made appropriations to assist them, the Government not having any such institutions of its own in this District.

Mr. WILLIAMS. I understand that. I understand also that Congress has made provision from year to year to assist various other private institutions, some of them sectarian and some of them nonsectarian——

Mr. SAYERS. They are in another bill, the District of Columbia bill. They have nothing whatever to do with this bill.

Mr. WILLIAMS. But are these institutions that you are speaking of, and that are included in this bill, private institutions?

Mr. SAYERS. In one sense of the word they are private and in another sense of the word they are public, because any person who is poor and needy and sick or infirm can go to either of these hospitals and receive care and treatment.

Mr. WILLIAMS. In other words, are they subject to governmental inspection?

Mr. SAYERS. Every dollar of Government money expended must be accounted for to the accounting officers of the Treasury just as much so as any other public expenditure.

Mr. WILLIAMS. Then there is governmental supervision?

Mr. SAYERS. I so understand, to the extent stated.

Mr. CANNON. One word, and only a word, in reference to this conference report. As this bill passed the House it contained the following provision:

> For the support and medical treatment of medical and surgical patients who are destitute in the District of Columbia, under contract or contracts to be made with responsible and competent persons or institutions by the Surgeon-General of the Army, $38,000, or so much thereof as may be necessary: *Provided*, That no payment shall be made under any such contract except for service actually rendered, for which specific compensation shall be provided under such contract.

The Senate struck out that provision and inserted the following:

> For the support and medical treatment of 95 medical and surgical patients who are destitute, in the city of Washington, under a contract to be made with the Providence Hospital by the Surgeon-General of the Army, $19,000.
> Garfield Memorial Hospital: For maintenance, to enable it to provide medical and surgical treatment to persons unable to pay therefor, $19,000.

It will be noticed that these Senate amendments carry in the aggregate $38,000, the same amount carried by the provision adopted by the House. It will be noticed further that the Senate amendments are similar to the items of appropriation for the current year and many preceding years. It will also be noticed that for Providence Hospital the appropriation is for the treatment of 95 destitute patients, under a contract to be made by the Surgeon-General, while for the Garfield Hospital the provision is "for maintenance to enable it to provide medical and surgical treatment to persons unable to pay therefor."

Now, what has been the practice under this appropriation heretofore? Providence Hospital, the oldest hospital in the District of Columbia, as well as the best equipped and the largest, treats 95 destitute patients by contract with the Surgeon-General, while for the same amount of money Garfield Hospital treats 60 destitute patients. In other words, $19,000 goes one-half further under the contract made with the Providence Hospital by the Surgeon-General than it does at the Garfield Hospital.

When the conference committee met it appeared to the conferees that the result of the House provision would be that if this whole service were given out by contract upon bids the Garfield Hospital and the Providence Hospital, being the two best equipped hospitals for this service, would probably be the only institutions in the District of Columbia competent for such service; and it was perfectly apparent on inquiry that if the provision originally adopted by the House should be enacted Providence Hospital would get the whole contract and Garfield Hospital nothing, because it was frankly admitted that Garfield Hospital, being the younger institution and not so well off as Providence Hospital, could not compete with the latter as to the price to be paid for this service. Hence it was stated, and it appeared satisfactorily to your committee, that this meant the closing of the doors of the Garfield Hospital, that institution having received compensation of this kind from substantially the time of its establishment.

Now, then, although it appeared that under the Senate amendment Providence Hospital would render one-half more service for the same amount of money than the Garfield institution, it was thought that in this great and growing capital city, with both these hospitals equipped and in successful operation, we ought not now and in the future to pursue a policy which would tend to close (as it was positively stated the House provision would do) the doors of the Garfield Hospital. So, after full consideration and investigation, finding that these hospitals are incorporated under legislation of Congress, that they are purely hospitals devoted to the treatment of the sick, that they are legally controlled by their corporators, it seemed to us that no sectarianism arises in connection with this question; that if a man is sick and requires surgical treatment it makes no difference to him or to the Government (the Government not being prepared with a public hospital to treat the indigent sick) whether the patient or the nurse that stands over him sings Salvation Army songs or makes the sign of the cross. At any rate, we believe that this is a public service; that it is not sectarian. There are no public hospitals in the District of Columbia, and sooner than see the destitute go unprovided for we believe that under the conditions now existing the House ought not to insist further on its provision and oppose that of the Senate.

Mr. HAINER of Nebraska. Will the gentleman allow me to suggest——

Mr. CANNON. I do not want to prolong this debate. I will yield for a question.

Mr. HAINER of Nebraska. If, as the gentleman says, Providence Hospital will take care of one-half more patients for the same money than Garfield Hospital will do, then certainly the gentleman can not found the appropriation for Garfield Hospital on any claim that it is the best provision for the relief of the sick, because it appears by the gentleman's statement that more sick persons can be taken care of for a given amount of money at the Providence Hospital than at the other.

Mr. CANNON. What the gentleman says is correct as to to-day and this year and last year. For the same amount of money Providence Hospital has taken care of 95 patients, while Garfield Hospital has taken care of 60. I will grant you that perhaps we could have more patients cared for under the provision as the House passed it. But after all, acting as the common counsel for the District of Columbia, from the wise standpoint of public policy, I agree that the Garfield Hospital should not be compelled to close its doors.

I therefore ask the previous question on the adoption of the report.

The previous question was ordered, under the operation of which the report was agreed to.

Mr. CANNON. I now move that the House further insist on its disagreement to the Senate amendments which are mentioned in the report, and agree to a further conference on the disagreeing votes thereon.

Mr. LESTER. I desire to ask the gentleman whether he includes the amendment numbered 16?

Mr. CANNON. Yes, sir; all of them.

Mr. LESTER. Then I move, Mr. Speaker, that the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same.

Mr. HARTMAN. I move as a substitute that the House recede from its disagreement to the Senate amendment to the public buildings generally and agree thereto.

Mr. LESTER. I accept that substitute.

Mr. CANNON. Well, hardly. We must have a separate vote.

The SPEAKER pro tempore. The gentleman from Illinois demands a separate vote.

The Clerk will read the first amendment, on which a separate vote is asked.

The Clerk read as follows:

For public building at Boise City, Idaho: For continuation of building, $50,000; and the limit of cost of said building and site is increased from $150,000 to $200,000.

Mr. CANNON. If the gentleman from Montana desires to be heard I will yield to him for a few minutes.

Mr. HARTMAN. I only want two minutes.

Mr. Speaker, I only wish to say in respect to this motion that the House has heard before as to the merits of it. Now, we are held here pending the agreement between the conferees of the two Houses on these amendments. One of the special features of the disagreement has been these public-building amendments. In the three States of Montana, Idaho, and Wyoming there is not a single public building within the limits.

Mr. CANNON. If the gentleman from Montana will yield to me for a moment, I will ask to withdraw this report, so that the gentleman from Maine [Mr. BOUTELLE] may submit a report, which is a final agreement on the naval bill.

Mr. HARTMAN. Certainly, I yield with pleasure. I wish to be just as courteous as the gentleman from Illinois, and yield.

The SPEAKER pro tempore. Without objection, the naval bill will be laid before the House now.

Mr. HULICK and Mr. KEM objected.

Mr. BOUTELLE. Before objection is made I wish to state that the enrolling clerk is exceedingly anxious to obtain possession of this bill immediately to compare it.

Mr. CANNON. I withdraw the sundry civil bill temporarily.

The SPEAKER pro tempore. The report on the sundry civil bill is withdrawn.

NAVAL APPROPRIATION BILL.

Mr. BOUTELLE. Mr. Speaker, I offer for immediate consideration the conference report on the naval appropriation bill.

The SPEAKER pro tempore. The Clerk will read the report.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 39, 42, 43, 44, 45, 46, 47, 48, and 52, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the word "two," inserted by said amendment, insert the word "three"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: Insert after the word "one," in line 24, page 49 of the bill, the following: "and not more than one"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: Strike out, in line 3 of said amendment, the word "five" and insert in lieu thereof the word "four"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "*And provided further*, That the Secretary of the Navy is hereby directed to examine into the actual cost of the armor plate and the price of the same which should be equitably paid, and shall report the result of his investigations to Congress at the next session at a date not later than January 1, 1897; and no contract for armor plate for the vessels authorized by this act shall be made until after such report is made to Congress for its action;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$6,870,000"; and the Senate agree to the same.

C. A. BOUTELLE,
J. B. ROBINSON,
AMOS J. CUMMINGS,
Managers on the part of the House.
EUGENE HALE,
M. S. QUAY,
A. P. GORMAN,
Managers on the part of the Senate.

The statement of the House conferees was read, as follows:

Statement to accompany conference report on House bill 7542, making appropriations for the naval service for the fiscal year ending June 30, 1897, etc.:

The House recedes from its disagreement to the Senate amendment numbered 39, providing that not more than two battle ships and three torpedo boats shall be built by one contracting party.

Also, as to amendments 42 to 48, inclusive, providing for the construction of one torpedo boat on the Missouri River, with necessary verbal changes.

Also, as to amendment 52, reducing the appropriation under armor and armament $500,000.

The House recedes from its disagreement to amendment numbered 32, with an amendment providing for three battle ships instead of two.

The House recedes from its disagreement to Senate amendment numbered 40, with an amendment inserting the words "one, and not more than one," seagoing battle ship shall be built on or near the coast of the Pacific Ocean.

The House recedes from Senate amendment numbered 41, with an amendment providing that one battle ship and three torpedo boats shall be built on or near the Pacific coast provided they can be built at an additional cost not exceeding 4 per cent of the lowest accepted bid for the other battle ships and torpedo boats.

The House recedes from its disagreement to Senate amendment numbered 49, with an amendment which substitutes in place of all the provisions in regard to the price of armor plate the following proviso:

"*Provided further*, That the Secretary of the Navy is hereby directed to examine into the actual cost of armor plate and the price for the same which should be equitably paid, and shall report the result of his investigation to Congress at its next session, at a date not later than January 1, 1897; and no contract for armor plate for the vessels authorized by this act shall be made till after such report is made to Congress for its action."

Also, the House recedes from its disagreement to Senate amendment numbered 51, with an amendment adding $500,000 to the appropriations under the head of "Construction and machinery."

Mr. BOUTELLE. Mr. Speaker, it is entirely unnecessary to go into any detailed explanation of this report, which is substantially that which was presented to the House before. It embodies a proposition made to the House conferees by those of the Senate, providing for the construction of three battle ships, and in lieu of all the provisions reported before in regard to the price of armor plate provides that no contract shall be made for any of the armor to be furnished for any of the ships provided in this bill until after the Secretary of the Navy shall have made an investigation of the whole subject-matter of the cost and equitable price of armor, his report to be made not later than the 1st of January to the next session of this Congress.

I move the adoption of this report, it being a final agreement.

The conference report was agreed to.

[The announcement of the result was received with applause.]

INDIAN APPROPRIATION BILL.

Mr. SHERMAN. Mr. Speaker, I present a conference report on the Indian appropriation bill.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate numbered 69 and 70 to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"And it is hereby declared to be the settled policy of the Government to hereafter make no appropriation whatever for education in any sectarian school: *Provided*, That the Secretary of the Interior may make contracts with contract schools, apportioning as near as may be the amount so contracted for among schools of various denominations for the education of Indian pupils during fiscal year 1897, but shall only make such contracts at places where nonsectarian schools can not be provided for such Indian children and to an amount not exceeding 50 per cent of the amount so used for the fiscal year 1895."

And the Senate agree to the same.

J. S. SHERMAN,
CHARLES CURTIS,
GEORGE C. PENDLETON,
Managers on the part of the House.
R. F. PETTIGREW,
H. M. TELLER,
F. M. COCKRELL,
Managers on the part of the Senate.

The statement of the House conferees is as follows:

Statement of House conferees, to accompany conference report No. 7, on Indian appropriation bill:

The House recedes from amendment numbered 70, which is merely a formal amendment, adding the word "further."

To Senate amendment numbered 69 the House concurs with amendments. The amendments are, first, a change of phraseology in the declaration as to the discontinuance of appropriations for sectarian schools. The other amendment provides that in the expenditure of money for contract schools in the next fiscal year, the Secretary shall apportion the same as near as may be among schools of various denominations.

Mr. SHERMAN. Mr. Speaker, this is the final report on the Indian appropriation bill and has to do only with the question of schools. The amendment which is agreed upon in conference has been submitted to very many gentlemen in the House who have heretofore had different views upon the question of the continuance of the schools, and I think it is substantially satisfactory to all of them. The declaration in reference to the discontinuance of schools after the end of the next fiscal year is the same as that in the report which was submitted last Saturday, except a change in phraseology.

In reference to the money to be expended during the next fiscal year the provision is that the money shall be apportioned among the various denominations, as nearly as possible, by the Secretary.

I move the previous question upon the adoption of the report.

The previous question was ordered.

The conference report was agreed to.

[The announcement of the result was received with applause.]

SUNDRY CIVIL APPROPRIATION BILL.

Mr. CANNON. Now, Mr. Speaker, I wish to proceed with the consideration of the remaining amendments to the sundry civil

appropriation bill, and I yield to the gentleman from Montana [Mr. HARTMAN] two minutes.

Mr. HARTMAN. Mr. Speaker, while I shall address my remarks to the subject of the public building at the capital of my own State, I give notice that I intend, if the rules permit it, to make and insist upon my motion as originally made, namely, to concur in the Senate amendments relating to these public buildings as a whole.

Now, as to the public building at Helena. Helena is a city of about twenty or twenty-five thousand inhabitants. It is the capital of the State which I have the honor to represent upon this floor. It has not one single public building in it owned by this Government. It has its full complement of United States offices, including the courts, the marshals, the land office, the post-office, and the collector of customs, with their various employees. The State has already ordered the construction of a million-dollar capitol building. I undertake to say that this amendment is not exorbitant when compared with the expenditures of our own people. We simply ask an appropriation for the continuation of the work, the site having already been authorized, and a one-hundred-and-fifty-thousand-dollar increase in the maximum that the building will ultimately cost. It will make a total of $300,000. I think Uncle Sam can well afford, at the capital of that State, to put up a three-hundred-thousand-dollar building to stand side by side with the one-million-dollar building that the people of that State are going to erect.

[Here the hammer fell.]

Mr. CANNON. I yield a minute to the gentleman from Kansas [Mr. CURTIS].

Mr. CURTIS of Kansas. I desire to move that the House recede from the amendment numbered 2, with the following amendment.

The amendment was read, as follows:

That the Secretary of the Interior be, and he is hereby, authorized and directed to purchase 50 feet of ground, or as much thereof as may be needed, adjacent to the ground now owned by the Government upon which the public building at Topeka, Kans., now occupied as a post-office and other Government offices, is located, at a cost not to exceed $30,000. That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause the public building at Topeka, Kans., now occupied as a post-office and other Government offices, to be enlarged, so as to make a suitable building, with fireproof vaults and elevator therein, for the further accommodation of the post-office and other Government offices, the plans and specifications to be drawn with respect to the present building, so as to furnish to the post-office more room and the better accommodation of the Government offices. The plans, specifications, and full estimation of said building shall be previously made and approved according to law and shall not cost to exceed the sum of $100,000: *Provided*, That said building, so enlarged, shall be unexposed to danger from fire in adjacent buildings by an open space of not less than 40 feet.

Mr. CANNON. Mr. Speaker, I notify the gentleman now that I shall be compelled to reserve the point of order on that amendment, but if the gentleman wants a minute or two I will make the point of order and he can reply to it if he chooses.

Mr. CURTIS of Kansas. I would like to hear what the point of order is, and then I would like to have a minute on the bill.

Mr. CANNON. My point of order is that the amendment covers new legislation or legislation, and is not germane to this amendment and therefore amenable to the rules of the House.

The SPEAKER pro tempore. The Chair is ready to decide the point of order.

Mr. CURTIS of Kansas. If the Speaker's mind is made up there is no use of saying anything.

The SPEAKER pro tempore. The Chair is compelled to say to the gentleman from Kansas that the Chair's mind is made up. The Chair sustains the point of order.

Mr. CANNON. Mr. Speaker, a very brief word in reply to the gentleman from Montana, and the better attention I can have the less time I will consume. These public-building provisions, that by the grace of the Senate are on this bill, legislate to authorize new buildings to the amount of $641,000 and appropriate $385,000, a necessary appropriation if you legislate; but if you do not legislate it is not necessary to appropriate. Now, that gives you the status. It is for the House to say whether it will legislate. I made points of order on this bill in the House because there was no man that under the rules of the House could get an amendment which was legislation on a general appropriation bill, just as I was compelled to make the point of order upon my personal and political friend from Kansas just a moment ago when he offered an amendment which legislates.

Mr. LOUDENSLAGER. Will the gentleman permit a question?

Mr. CANNON. In a moment. If this was a courteous body, and we did everything not by rule but by courtesy, then I should not have made the point of order upon the gentleman from Kansas, but as there are 356 members, there would be 356 courtesies to be extended; and it not being a very good way of legislation anyhow, I was compelled to cut my genial friend out with a point of order.

Mr. HARTMAN. Will the gentleman allow me to ask him a question?

Mr. CANNON. Certainly.

Mr. HARTMAN. As a matter of fact, would the gentleman from Illinois be very bitterly disappointed should the House carry this motion?

Mr. CANNON. I will tell the truth to the House before I get through. [Great laughter.]

Mr. HOPKINS. I ask that my colleague have unlimited time.

Mr. LOUDENSLAGER. Does the gentleman mean to claim that these buildings upon which the present disagreement is reported would require that amount?

Mr. CANNON. The present disagreement, I think, includes $641,000 in new legislation. I am not making objection to it because of the three hundred and odd thousand dollars of appropriation, or the six hundred and odd thousand dollars of legislation. I had just as well be square and honest. I believe that the legislation would be wise. [Applause.] When I have said that, I will go a step further, and say that I believe that $15,000,000 would be equally wise for public buildings. [Renewed applause.] That would include $100,000 for the building at Joliet, in my district. [Laughter.]

Mr. WILLIAMS. Pile it up!

Mr. MILLIKEN. Will my friend allow me to make a suggestion?

Mr. CANNON. Certainly.

Mr. MILLIKEN. Perhaps the Committee on Public Buildings and Grounds will give the gentleman an opportunity during the next session of Congress to show his faith by his works; and I am glad he has testified his conviction.

Mr. CANNON. I have my bill in your committee, and I believe a favorable report has been agreed to; but, unfortunately, when the waters were troubled at another place than this, there was nobody to put my "little William" into this bill. [Laughter.]

Mr. MILLIKEN. Let me say, if the gentleman will permit me——

Mr. CANNON. Yes.

Mr. MILLIKEN. If I have not been thoroughly misinformed, he is one of the gentlemen who would not be anxious to get it out if it had to go out with all the rest.

Mr. CANNON. Oh, well, we are not considering that matter now. [Laughter.] I was not consulted about it. I will say to you again I am not blaming anybody about the action of the House touching public buildings. I am not responsible for that policy. I am not condemning it; and I am not entitled to credit for it, and I am not prepared to condemn it, in the present condition of the Treasury. I had better say, perhaps, to be entirely candid, because I can not be otherwise [laughter]—I mean to say that I do not want to be otherwise—while I am not responsible for it, I approve it.

Mr. HARTMAN. Will you have any objection to having a separate vote on my motion?

Mr. CANNON. We will vote on them one by one. [Cries of "Vote!" "Vote!"] We will vote in a minute. It will save time if you will give me two minutes without interruption, and then we will have a vote. This is the seventh time that this matter has been fought over in the House. Now, if it was legislation that ought to have been had, it would have been wise, under all the circumstances, to have had it the first time, but if the members of this House believe, in view of existing conditions, that this legislation for these buildings ought to be had——

Mr. WALKER of Massachusetts. They do.

Mr. CANNON. If they believe that, and if they can afford to do it, then let them concur with the Senate. If, on the contrary, gentlemen, you do not believe that, if you are still of the same opinion that you have been heretofore, then further insist. "Oh, but," says somebody, "The Senate won't give up and we want to adjourn." Let me tell you what the condition is. This is legislation. We have eliminated everything but this. If the House concurs with the Senate, that is the end of it. That passes the bill and it goes to the President. If the House further insists and the bill goes back to the Senate and the Senate recedes, there is no further conference, that is the end of it. This is legislation. Every provision in it involves and covers legislation, and if the House says "We will not legislate," then, under the invariable rule, there is nothing left for the Senate but to recede, and vice versa. With this statement I am perfectly willing that the House shall vote.

Mr. HARTMAN. But there is no certainty as to the time when they will recede.

Mr. CANNON. Oh, gentlemen, I ask of the House one thing: That you decide this question according to your judgment. Decide it as you think it ought to be decided. Do not decide it because we are going to adjourn to-morrow. Let us not be pressed. Let us decide according to our judgment. I ask for a vote.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Montana [Mr. HARTMAN] that the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same.

The question being taken, it was decided in the negative.

Mr. HARTMAN. I ask for a separate vote on amendment numbered 7.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. CANNON] has asked for a separate vote upon each amendment. The Clerk will report the next amendment.

The Clerk read as follows:

For public building at Camden, N. J.: For construction of building, $25,000: and the limit of cost of said building is increased $125,000.

Mr. CANNON. Mr. Speaker, I yield three minutes to the gentleman from New Jersey [Mr. LOUDENSLAGER].

Mr. LOUDENSLAGER. Mr. Speaker, the question of this public building has been before the House on two or three occasions. This bill came over from the Senate with seventeen separate, different propositions in it. Upon the question of principle, as to whether new legislation shall be enacted in the bill or not, the House has already receded, because it has already voted that there shall be carried in this bill 33 per cent of the original propositions made in the Senate, and it is unfair to the other meritorious propositions that still remain in the bill for the House to say that 33 per cent of favored ones shall pass while others shall be rejected. It is not upon the merits that the attack has been made upon these provisions, but upon principle, and that principle has been broken down by the vote of the House in agreeing to 33 per cent of the propositions placed in the bill by the Senate as to new legislation.

Mr. CANNON. The House understands the matter, Mr. Speaker, and I now ask for a vote.

The question was taken on the motion that the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same, and it was rejected.

The SPEAKER pro tempore. The Clerk will report the next amendment.

The Clerk read as follows:

(4) For public building at Cheyenne, Wyo.: For continuation of building, $50,000: and the limit of cost of said building and site is increased from $150,000 to $250,000.

Mr. HARTMAN. Mr. Speaker, it is very evident that the temper of the House is adverse to agreeing to these amendments, and I therefore withdraw my motion.

The SPEAKER pro tempore. The gentleman from Montana withdraws his motion. The question now is on the motion of the gentleman from Illinois [Mr. CANNON] that the House further insist upon its disagreement and ask a further conference.

The motion was agreed to.

The SPEAKER pro tempore appointed the same House conferees as on the previous conference.

Mr. BABCOCK. Mr. Speaker, I desire to present a conference report.

Mr. LESTER. Mr. Speaker, I desire to say a word with reference to the amendment numbered 16 in this bill.

Several MEMBERS. Too late.

Mr. CANNON. Mr. Speaker, I have no desire to cut off my friend from Georgia, and I will ask unanimous consent to return to amendment numbered 16.

The SPEAKER pro tempore. Without objection, the House will return to the amendment of the Senate numbered 16.

Mr. KEM. There is objection, Mr. Speaker. [Laughter.]

The SPEAKER pro tempore. Objection is made by the gentleman from Nebraska [Mr. KEM]. [Laughter.]

Mr. SAYERS. Mr. Speaker, unanimous consent is not required. The gentleman from Georgia reserved the right to a separate vote upon this amendment.

The SPEAKER pro tempore. A separate vote was asked for, but then the amendment was withdrawn.

Mr. CANNON. I move to reconsider the vote just taken by which the House insisted on its disagreement.

The motion to reconsider was agreed to.

Mr. CANNON. I now move that, except as to the amendment with regard to the public building at Savannah, the House further insist on its disagreement to the Senate amendments and ask for a further conference.

The motion was agreed to.

Mr. CANNON. Now I am willing to yield to the gentleman from Georgia [Mr. LESTER] two or three minutes.

Mr. LESTER. I shall occupy only a few minutes.

Mr. TATE. I rise to this point of order: As the Chair put this question, the House has insisted on its disagreement to all of the Senate amendments except that relating to the Savannah public building. Does not that practically adopt the amendment with regard to the Savannah building?

The SPEAKER pro tempore. It does not.

Mr. LESTER. Mr. Speaker, amendment 16 of the Senate proposes to increase the limit of cost of the public building at Savannah, Ga. The construction of that building was commenced some years ago; it was partly completed, the limit of cost being $400,000. Last summer contracts were let for the completion of the building. Everybody supposed that it was to be finished in marble. The stone foundations had been laid, and one story of the substructure erected. The old site had been changed, involving a loss of about $100,000—that is to say, there is that amount invested in the old site and the incomplete building erected upon it. When it was determined to finish the new building in marble it was found that possibly this could not be done within the limit of cost previously fixed, so alternative bids were invited for completing the work in marble and also in brick. When the bids came in it was discovered that it would be impossible to finish the building in marble within the limit of cost, so the contract was let for the finishing of the work in brick. But if this plan be pursued the building will present an incongruous appearance. Marble is the proper and suitable material; not brick. The Secretary of the Treasury saw the propriety of extending the limit of cost so as to allow the finishing of the building in marble; and it was arranged with the contractor that he should not insist upon his right to go on and finish the structure in brick. He agreed to carry out the contract in marble provided the Congress of the United States should extend the limit of cost to the extent required.

Mr. WALKER of Massachusetts. What is the difference in cost?

Mr. LESTER. One hundred thousand dollars. It is estimated that $500,000 will be required for a marble building, though $400,000 would have been sufficient if $100,000 had not been lost in the manner I have stated. The immediate question is whether Congress desires this building to be completed in brick or in marble.

This question might not demand immediate settlement but for the fact that the contract has been let, and it is the duty of the Government, if it does not wish to change the plan, to permit the contractors to go on, which they have the right to do under their contract. The agreement with the contractor to which I have referred, under which the Government was to have the right to have the building finished either in brick or in marble, extended only to June 1. But the Secretary of the Treasury has made such an arrangement that a few days' delay will not make any difference. The contractor is now insisting that this matter be settled, so that the work may proceed.

Other gentlemen here have been willing that their propositions in reference to public buildings should go over to the next session; and I should be perfectly willing to have this matter take the same course if our situation were the same. But unless Congress now agrees to extend the limit of cost, the work on our public building will proceed under the contract already made, and the building will be finished in brick. Next session will be too late to attend to this matter. The work must proceed at once. No one, I presume, desires that this building should be finished in a style discreditable to the Government. It ought to be a good building; we ought not to allow it to be spoiled, as it will be, practically, if finished in brick. I move, therefore, that the House recede from its disagreement to the Senate amendment and agree to that amendment.

Mr. WALKER of Massachusetts. I should like one minute.

Mr. CANNON. I yield to the gentleman one minute.

Mr. WALKER of Massachusetts. Mr. Speaker, let us lay aside the question of precedent; let us lay aside any consideration as to the dignity of the House which might tempt us to do a wrong, and let us do right. Here is a building which, if erected in brick, will be a discredit to the United States Government for the next century. It ought to be built in marble, and was so designed. At present, as I understand, the Secretary of the Treasury is unable to authorize it to be so constructed, because of the limit of cost. Let us do right in this matter, because we ought to do so. Let us recede from our disagreement to the Senate amendment and adopt it. [Applause.]

Mr. CANNON. Let us understand ourselves on this question. The present limit of cost in regard to this building is $400,000. The gentleman from Georgia [Mr. LESTER] says that unless the limit of cost is enlarged $100,000 this building can not have the outside finished in marble. Well, I will compromise on a building of brick, if I can get it, and save the hundred thousand dollars. I do not desire, however, to oppose the gentleman's proposition in the sense of opposing it upon the merits.

Mr. WALKER of Massachusetts. Does not that remark give the whole case away?

Mr. CANNON. No.

Mr. WALKER of Massachusetts. Well, I think it does. I am here to do right, without regard to any precedent which is not justified by right.

Mr. CANNON. Why did not the gentleman "do right" in reference to these other amendments?

Mr. WALKER of Massachusetts. I did; I voted for the whole of them.

Mr. CANNON. Mr. Speaker, I am ready for a vote.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Georgia, that the House recede from Senate amendment numbered 16, and agree to the same.

The question being taken, there were—ayes 100, noes 64. [Applause.]

Mr. CANNON. Mr. Speaker, I ask for the yeas and nays on that question.

The yeas and nays were ordered.

The question was taken; and there were—yeas 96, nays 91, not voting 167; as follows:

YEAS—96.

So the motion to recede from the disagreement and concur was adopted.

The following additional pairs were announced:

Mr. MCCALL of Tennessee with Mr. OGDEN.

Mr. HARMER with Mr. ABBOTT.

Mr. COOK of Wisconsin with Mr. HALL.

Mr. BELKNAP. Mr. Speaker, I was listening for my name, but momentarily my attention was attracted and I did not hear it when it was called. I should like to be permitted to vote on this question.

The SPEAKER. The Chair is afraid that he can not entertain the request under the circumstances.

Mr. BELKNAP. I bow, of course, to the decision of the Chair.

The result of the vote was then announced as above recorded.

The SPEAKER. The Chair will announce the appointment of the conferees on the remaining amendments.

The Clerk read as follows:

Conferees on sundry civil bill: Mr. CANNON, Mr. HAINER of Nebraska, and Mr. SAYERS.

The SPEAKER. The Chair understands that there is a conference report now on the desk.

Mr. BABCOCK. I ask to call that up, Mr. Speaker.

Mr. HARTMAN. Before that, Mr. Speaker, I move to reconsider the vote whereby the House refused to agree to the Senate amendments to the public buildings, since it is evident that this vote is an indication of the sense of the House on that question.

The SPEAKER. The Chair thinks, the conferees having been appointed, it is now too late to make that motion, unless there be some reason not yet stated to the Chair.

Mr. HARTMAN. If that is the decision of the Chair, of course I bow to it.

The SPEAKER. Of course, if the gentleman states that he rose before anything else was done, after the last vote——

Mr. HARTMAN. I did rise, Mr. Speaker, and was waiting, but did not address the Chair immediately.

The SPEAKER. The Chair thinks, then, that under the rule it is too late to recognize the gentleman for that motion now.

Mr. HARTMAN. Very well.

Mr. CANNON. Mr. Speaker, I would be very glad if we could in some way or other obtain the sense of the House finally upon this matter. The House having voted to concur in this amendment, if it means a change of heart, I have no objection to adopting the same rule with reference to the others. I have only sought to serve the House. I care nothing about it personally. I have no doubt that if the House had nonconcurred or insisted on its disagreement on all these amendments, they being in the nature of legislation, the Senate would have receded, in accordance with universal custom.

Mr. SAYERS. I will suggest to my friend from Illinois——

Mr. CANNON. In a minute. Now, if it is the sense of the House to recede on these other amendments, if there has been a real change of opinion, I have no objection. If it is believed that there has been such a change, I should be glad, in order to save time in these the closing hours of the session to have the House take such steps, by unanimous consent or otherwise, as will register its firm and fixed opinion. I do not want to go on a halfway opinion.

Mr. DOCKERY. I suggest to the gentleman from Illinois that unanimous consent be asked to take the expression of the House.

Mr. CANNON. The gentleman can make the request. I shall not object.

Mr. DOCKERY. I ask unanimous consent that the vote on the other amendments be reconsidered.

The SPEAKER. The gentleman from Missouri asks unanimous consent that the vote on the other amendments be reconsidered. Is there objection?

Mr. KEM and Mr. KIEFER objected.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed without amendment the bill (H. R. 2) disposing of 2 condemned cannon.

The message also announced that the Senate had agreed to the reports of committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to bills of the following titles:

A bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes.

A bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal ending June 30, 1897, and for other purposes.

ECKINGTON AND SOLDIERS' HOME RAILWAY, ETC.

Mr. BABCOCK. Mr. Speaker, I call for the regular order.

The SPEAKER. The gentleman from Wisconsin [Mr. BABCOCK] has the floor on a conference report.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2928) to extend the routes of the Eckington and Soldiers' Home Railway Company and of the Belt Railway Company, of the District of Columbia, and for other purposes, having met,

after full and free conference, have agreed to recommend, and do recommend, to their respective Houses as follows:

That the Senate recede from its disagreement to the amendments of the House numbered 1, 2, 3, 4, 9, 10, 12, 13, 14, 21, 22, and 23, and agree to the same.

That the House recede from its amendment numbered 26.

That the Senate recede from its disagreement to the amendments of the House numbered 6, 8, 11, 15, 17, 18, 19, 20, 24, and 27, and agree to the same, amended so that the sections of the bill shall be numbered consecutively; and that the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 5, and agree to the same amended as follows: In lieu of the matter proposed to be stricken out amend section 2 so that the said section shall read:

"SEC. 2. That the Eckington and Soldiers' Home Railway Company of the District of Columbia be, and the same hereby is, authorized to lay down and operate a street railway in the city of Washington, D. C., through and along the following-named streets and avenues, to wit:

"Beginning at the junction of Eighth and D streets northeast; thence by a double track south along Eighth street to C street south; thence by single track as follows: West on C street south to Seventh street east; thence south on Seventh street east to M street south; thence east on M street south to Georgia avenue; thence northeast on Georgia avenue to Ninth street east; thence north on Ninth street east to C street south; thence west on C street south to Eighth street east."

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 7, and agree to the same amended so that the proviso in question shall read as follows:

"*And provided*, That said Eckington and Soldiers' Home Railway Company shall not have its stock and bonds outstanding at any one time to a greater amount than the actual cost of the construction and equipment of said railway, which actual cost shall be ascertained by the supreme court of the District of Columbia in such manner as the said court shall prescribe."

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 16, and agree to the same amended so that the proviso in question shall read:

"*And provided*, That said Belt Railway Company shall not have its stock and bonds outstanding at any one time to a greater amount than the actual cost of the construction and equipment of said railway, which actual cost shall be ascertained by the supreme court of the District of Columbia in such manner as the said court shall prescribe."

And the House agree to the same.

J. W. BABCOCK,
G. M. CURTIS,
JAMES D. RICHARDSON,
Conferees on the part of the House.

JAMES McMILLAN,
ISHAM G. HARRIS,
Conferees on the part of the Senate.

The SPEAKER. The Clerk will report the statement of the House conferees.

The Clerk read as follows:

The effect of the conference report on Senate bill No. 2928 is as follows:

First, the Senate agrees to all amendments adopted in the House except amendment numbered 7, which provided that said railroad company shall not have its bonds outstanding at any one time to a greater amount than 50 per cent of the actual cost and equipment of said railway, and have inserted in place thereof the usual provision in street railway charters, that the company shall not have its stock and bonds outstanding at any one time to a greater amount than the actual cost and construction of said railway, which cost shall be ascertained by the supreme court of the District of Columbia.

Also amendment numbered 26, which provided for the construction of the Metropolitan Railroad from its present terminus on Connecticut avenue along Columbia road to Eighteenth street.

The House recedes from its amendment to Senate bill and agrees to the construction of a line of road on Eighth street northeast and on C street south to Seventh street east; thence south on Seventh east to M street south; thence east on M street to Georgia avenue; thence east on Georgia avenue to Ninth street east; thence on Ninth east to C south; thence west on C street south to Eighth street east, which is known as the Navy-Yard extension.

J. W. BABCOCK,
G. M. CURTIS,
J. D. RICHARDSON.

The conference report was agreed to.

On motion of Mr. BABCOCK, a motion to reconsider the last vote was laid on the table.

SPECIAL DEFICIENCY BILL.

Mr. CANNON. Mr. Speaker, I desire to move to concur in a certain amendment to the urgent deficiency bill, and to disagree to the second amendment. I ask that the amendment be read.

The bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for the expenses for the House of Representatives, and for other purposes, for the fiscal year 1896, was laid before the House. The amendments of the Senate were read, as follows:

Page 1, after line 7, insert:

"To make the salaries of the clerks to the Committees on Revolutionary Claims and Corporations Organized in the District of Columbia, from the 1st day of January to the 30th day of June, 1896, at the rate of $2,100 per annum, $660."

Page 1, after line 7, insert:

"To enable the Secretary of the Senate and the Clerk of the House of Representatives to pay to all officers and employees of the Senate and House of Representatives, including the Capitol police, who were employed on the 2d day of December, 1895, and who have ceased to be employed, a sum equal to one month's pay at the rate they were severally receiving on the 2d day of December, 1895, and a sufficient sum for this purpose is hereby appropriated."

Mr. CANNON. I move to concur in the first amendment read.

Mr. DOCKERY. What is that?

Mr. CANNON. It is to pay two clerks of Senate committees.

Mr. DOCKERY. I want to express my gratification that the clerk of the Senate Committee on Revolutionary War Claims has finally got his salary increased.

Mr. CANNON. Oh, well, the Senate always get their way about their force. We might just as well concur.

Mr. RICHARDSON. I desire to ask if the gentleman moves to concur in both amendments? If not, I desire to move to concur in the second.

Mr. CANNON. Let us have the vote first on the first one.

The first amendment of the Senate as read was concurred in.

Mr. CANNON. Now, Mr. Speaker, I move that the House nonconcur in the second amendment.

Mr. RICHARDSON. I move that the House concur in the second amendment, and ask to have it reported.

The SPEAKER. The Clerk will report the second amendment.

The amendment was again read.

Mr. CANNON. Now does the gentleman desire to be heard?

Mr. RICHARDSON. I only want to say a word or two.

Mr. CANNON. I yield the gentleman three minutes now, if that will do.

Mr. RICHARDSON. Mr. Speaker, I think that we ought to make this appropriation. These employees were brought here at the beginning of this Congress. They were kept here at work until after the organization some days, I can not tell exactly how many, and possibly the number of days differed in the different cases. Some of them were kept here until after the organization was perfected; and it seems to me it is but fair and just that they should have this extra month's pay. I understand that in many cases that course has been pursued heretofore; in other instances the House has refused to make this appropriation. Now, these men were brought here and put to that expense—the expense of coming—and then they lost their jobs, which was bad enough, and it seems to me it will be but fair and proper to make them this compensation.

Mr. LACEY. Will the gentleman yield to me for a question?

Mr. RICHARDSON. I yield the floor.

Mr. LACEY. I wanted to ask a question either of you or some one else who is in favor of the proposition. These gentlemen who were employees and drew their salaries during the vacation came here on the 1st of December and served a month and got a month's extra pay besides that. This is an additional month's pay to these men who had already drawn vacation salaries as clerks to committees.

Mr. RICHARDSON. Well, possibly it may be so in the case of annual clerks. They had work to do annually or there would not be annual clerks; and it is no argument against the annual clerks, if there was work for them to do; and if there was not, then there ought not to be annual clerks. There are a number of committees that have annual clerks allowed them, and there are others that have only session clerks. Those that have annual clerks have work to do annually, otherwise they would not be annual clerks.

Mr. PAYNE. Does the gentleman know of any clerks to committees that came back here?

Mr. RICHARDSON. I know of one clerk who came.

Mr. PAYNE. I know of several committees the clerks of which did not come back, and yet they got pay to the 1st of January.

Mr. RICHARDSON. There may be such cases as that, but I know of one of my own knowledge, one of the reading clerks, and a very efficient one, in the last House.

Mr. CANNON. Mr. Speaker, I want to say that this is a provision that has not been made for clerks and employees since the Forty-seventh Congress. That was known as the Keifer Congress, in 1881 to 1883. The Republican majority then gave the employees of the Forty-sixth Congress this extra month's salary. It was a Republican House paying the employees of a Democratic House. Our Democratic friends did not reciprocate. It has not been done from that time to the present. Now, this provision was put on the general deficiency bill, and it went off in conference; but the "little joker" jumped up in this bill, put on graciously by a Senate amendment without any request, so far as I know, from any member of the House. The Senate sees fit to let us take a vote upon it, and I suppose we will vote. They are magnanimous——

Mr. RICHARDSON. Before the gentleman gets away from that, I desire to ask him a question.

Mr. CANNON. Let me complete the sentence first. Now, the annual employees that ought to have served up to the time this Congress was organized on the 2d day of December got their annual pay, and the session employees got their extra month's pay at the close of the short session of the last Congress, and that mustered them out. Now, to take the annual employees, when most of them had nine months' vacation without much service, and to pay them an extra month's pay, when the most of them got pay, anyhow, during the month of December, I do not see that we ought to do it. We might have another bond issue to meet it, in part. It seems to me that it is without precedent in later years, and ought not to be adopted; and I hope this House will nonconcur.

Mr. BAILEY. May I ask the gentleman from Illinois a question?

Mr. CANNON. Yes, sir.

Mr. BAILEY. Generally I should be glad to adopt the gentleman's views in matters of this kind, but I have in mind a case where a Senate employee was brought here from his home and was discharged upon a notice of six hours. Now, it hardly seems to me fair and proper that the Government should discharge an employee under those circumstances and discontinue his pay, and I desire to ask the gentleman from Illinois whether an employee discharged under such conditions would draw the pay for that full month?

Mr. CANNON. When was he discharged?

Mr. BAILEY. Within the last thirty days.

Mr. CANNON. This amendment refers to employees who were discontinued last December.

Mr. BAILEY. What I desire to ask the gentleman is whether there is any provision of law under which this employee, discharged on six hours' notice, would be able to get his pay for the full month? I assume that the Government employs persons by the month, and of course an individual who employed a man for a month and discharged him without cause before that time expired would be compelled to pay the full month's salary.

Mr. CANNON. I will say to the gentleman that I have never seen a case or known of the case of a person who was employed by the Senate, or connected with the Senate, that did not "get in his work," whether he was discharged or not. [Laughter.] My friend from Texas need not agonize about anybody who ever was in the employ of the Senate. I say it respectfully.

Mr. RICHARDSON. Mr. Speaker, I wish to ask the gentleman from Illinois whether his memory is not at fault when he speaks of an appropriation of this kind having been made by the Forty-seventh Congress? Was it not by the Fifty-first Congress?

Mr. CANNON. No; it was the Forty-seventh. I think I am not mistaken about it. Now, Mr. Speaker, let us have a vote.

Mr. WALKER of Massachusetts. I ask the gentleman to give me one minute.

Mr. CANNON. Which side is the gentleman on?

Mr. WALKER of Massachusetts. I am going to help you out this time. [Laughter.]

Mr. CANNON. Well, sometimes the gentleman has one effect on the House, and sometimes he has another effect, and I feel a little uncertain, but I will yield him the time. [Laughter.]

Mr. WALKER of Massachusetts. Mr. Speaker, I hope this House will not present the spectacle of such virtuous and rigid economy that it can not appropriate money for the public business and that it can not pay the honest debts of the Government, and yet can actually throw away money in gratuities of the kind proposed here, where there is not the slightest claim, legal or moral, and where the services rendered are paid for at two or three times what they are worth anyway. I think we ought not to go any further in that direction. I think we had better set the example of paying what the Government justly owes, and appropriating for enterprises that the Government ought to enter upon, and I think it is not at all creditable to the House that it should even contemplate voting these gratuities, especially with an empty Treasury, which has prevented the House from having reports from its committees recommending appropriations for public work which we all agree ought to be done.

The Senate amendment was nonconcurred in.

Mr. CANNON. I will not ask for a conference, Mr. Speaker. Let the Senate ask for it if it desires.

OMAHA EXPOSITION.

Mr. MERCER. Mr. Speaker, I move to suspend the rules and pass the bill S. 130, with an amendment recommended by the Committee on Ways and Means, which amendment is incorporated in this bill.

The bill was read at length.

Mr. BAILEY. I demand a second, Mr. Speaker.

Mr. MERCER. I ask unanimous consent that a second be considered as ordered.

Mr. BAILEY. I object.

Mr. MERCER and Mr. BAILEY were appointed to act as tellers on the question of ordering a second.

The House divided; and the tellers reported—ayes 104, noes 2.

Mr. BAILEY. No quorum, Mr. Speaker.

Mr. MERCER. Mr. Speaker, I withdraw the bill.

Mr. BAILEY. I withdraw the point of no quorum.

DISTRICT APPROPRIATION BILL.

Mr. DOCKERY. Mr. Speaker, on behalf and at the request of the gentleman from Vermont [Mr. GROUT], who is not present at this moment, I present a conference report on the District appropriation bill. To save time I suggest that it will be sufficient to read the statement of the House conferees.

The statement of the conferees was read, as follows:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 5210) making appropriations for the government of the District of Columbia submit the following written statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report on each of said amendments, namely:

On Nos. 90, 91, 92, 93, 94, and 95: Appropriates for lighting streets with gas, $150,000, instead of $122,000, as proposed by the House, and $175,000, as proposed by the Senate; limits the cost per lamp-post to $20 a year; requires that the lamps burn all night; strikes out the provisions proposed by the House requiring that the gaslighting shall be let to the lowest responsible bidder therefor, and that the price of gas to consumers be limited to not exceeding 75 cents per thousand feet.

On Nos. 96, 97, and 98: Appropriates for electric arc lighting in the streets, $50,000, instead of $43,600, as proposed by the House, and $59,170, as proposed by the Senate, and limits the cost per lamp to 30 cents per night.

The committee of conference have been unable to agree on the following amendments, namely:

On the amendment of the House to amendment of the Senate No. 99, with reference to electric light and power service in that part of the District of Columbia west of Rock Creek and outside the fire limits of the District;

On No. 100, limiting, as proposed by the House, the price of electric lights and electricity for power purposes to consumers; and

On Nos. 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, and 195, relating to the charities of the District of Columbia.

WILLIAM W. GROUT,
MAHLON PITNEY,
ALEX. M. DOCKERY,
Managers on the part of the House.

Mr. DOCKERY. Mr. Speaker, I yield to the gentleman from New Jersey [Mr. PITNEY], a member of the committee of conference.

Mr. PITNEY. Mr. Speaker, I desire to submit a motion to have this conference report agreed to by the House; and also to give notice that at as early an hour to-morrow as is practicable this subject will be brought before the House with the view of obtaining the instructions of the House of Representatives to its conferees relative to the remaining disagreements upon this bill. I now move that the conference report be agreed to.

The report was agreed to.

ENROLLED BILLS SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

A bill (H. R. 2947) increasing the pension of Daniel D. Jennings, late of Company C, Sixty-fifth Ohio Volunteers;

A bill (H. R. 8383) to establish a site for the erection of a penitentiary on the military reservation at Fort Leavenworth, Kans., and for other purposes; and

A bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes.

PREVENTION OF COLLISIONS AT SEA.

Mr. PAYNE. I move to suspend the rules and pass the bill which I send to the desk.

The Clerk read as follows:

A bill (H. R. 9253) to amend an act approved August 19, 1890, entitled "An act to adopt regulations for preventing collisions at sea."

Be it enacted, etc., That article 15 of the act approved August 19, 1890, entitled "An act to adopt regulations for preventing collisions at sea," be amended to read as follows:

"ART. 15. All signals prescribed by this article for vessels under way shall be given:

"First. By 'steam vessels' on the whistle or siren.

"Second. By 'sailing vessels' and 'vessels towed' on the fog horn.

"The words 'prolonged blast' used in this article shall mean a blast of from four to six seconds duration.

"A steam vessel shall be provided with an efficient whistle or siren, sounded by steam or by some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog horn, to be sounded by mechanical means, and also with an efficient bell. (In all cases where the rules require a bell to be used a drum may be substituted on board Turkish vessels, or a gong where such articles are used on board small seagoing vessels.) A sailing vessel of 20 tons gross tonnage or upward shall be provided with a similar fog horn and bell.

"In fog, mist, falling snow, or heavy rainstorms, whether by day or night, the signals described in this article shall be used as follows, namely:

"(a) A steam vessel having way upon her shall sound, at intervals of not more than two minutes, a prolonged blast.

"(b) A steam vessel under way, but stopped, and having no way upon her, shall sound, at intervals of not more than two minutes, two prolonged blasts, with an interval of about one second between.

"(c) A sailing vessel under way shall sound, at intervals of not more than one minute, when on the starboard tack, one blast; when on the port tack, two blasts in succession, and when with the wind abaft the beam, three blasts in succession.

"(d) A vessel when at anchor shall, at intervals of not more than one minute, ring the bell rapidly for about five seconds.

"(e) A vessel when towing, a vessel employed in laying or in picking up a telegraph cable, and a vessel under way, which is unable to get out of the way of an approaching vessel through being not under command, or unable to maneuver as required by the rules, shall, instead of the signals prescribed in subdivisions (a) and (c) of this article, at intervals of not more than two minutes, sound three blasts in succession, namely: One prolonged blast followed by two short blasts. A vessel towed may give this signal and she shall not give any other.

"Sailing vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above-mentioned signals, but, if they do not, they shall make some other efficient sound signal at intervals of not more than one minute."

SEC. 2. That said act of August 19, 1890, as amended shall take effect at a subsequent time to be fixed by the President by proclamation issued for that purpose.

The question being put, the motion to suspend the rules and pass the bill was agreed to, two-thirds voting in favor thereof.

ORDER OF BUSINESS.

Mr. DINGLEY. I move that the House take a recess until 10 o'clock to-morrow morning.

Mr. LOW. I hope the gentleman will withdraw that for a moment.

Mr. ALDRICH of Illinois. I desire to present a report from the Committee on Accounts.

Mr. RICHARDSON. I move that the House do now adjourn.

The SPEAKER. The Chair suggests that there are one or two matters which ought to be acted upon by the House if convenient, and which, if they cause any debate, will be withdrawn. The transaction of public business at this stage of the session is of course important.

Mr. RICHARDSON. In view of that statement, I withdraw my motion, of course.

Mr. DINGLEY. And I withdraw my motion for a recess. If members will stay here, I will stay with the rest.

Mr. BOUTELLE. I should like to present a small matter which has been recommended by the Secretary of the Treasury and the Secretary of the Navy.

Mr. ALDRICH of Illinois. I have a report from the Committee on Accounts which should be considered in order to close up the business of the session. I doubt very much whether there will be any objection to it.

The SPEAKER. The Chair recognizes the gentleman from Illinois [Mr. ALDRICH] for business from the Committee on Accounts.

ADDITIONAL EMPLOYEES, ETC.

Mr. ALDRICH of Illinois, from the Committee on Accounts, submitted a report; which was read, as follows:

The Committee on Accounts, to whom was referred sundry resolutions, begs leave to report as follows:

The resolution authorizing the Clerk of the House to appoint an additional clerk in his office at an annual salary of $1,800 is disapproved.

The resolution providing for the transfer of George W. Perkins from the special folders' roll at a compensation of $75 per month to the annual roll as assistant foreman of the folding room at a salary of $1,200 is disapproved.

The resolution providing for payment to W. D. Catlett for doing duty in Statuary Hall, in ladies' reception room, at the rate of $100 per month from January 15, 1896, is disapproved.

The resolution authorizing the payment to Robert A. Stickney for services rendered as clerk in the office of the Clerk of the House from January 9, 1896, to the close of the current session of Congress at the rate of $1,600 per annum, is disapproved.

The resolution authorizing the payment of $90 to James Hall for extra services as laborer in the Doorkeeper's department from March, 1895, to November, 1895, inclusive, is disapproved.

The resolution providing that the assistant clerks of the Committee on Invalid Pensions be continued on the roll during the recess of the present Congress is disapproved.

The resolution providing that the clerk of the Committee on Pensions be continued on the roll during recess of the present Congress is disapproved.

The resolutions providing for the employment of fonr additional annual messengers in the House post-office are disapproved.

The resolution providing for allowance of an extra month's salary to each messenger of the House post-office, now on the annual roll, is disapproved.

The resolution providing for the construction of a hoisting apparatus for the use of the folding room of the House at a cost not to exceed $1,000 is disapproved.

The resolution providing for the payment to Ephraim J. Totten for services rendered as clerk in the Clerk's document room during the month of January and fifteen days in the month of February, 1896, at the rate of $1,600 per annum, is disapproved, and in lieu thereof your committee recommends that an allowance of $133.33 be granted said Totten for such services, and submit herewith a resolution to that effect.

The resolution authorizing the Speaker of the House to appoint a committee of five members, who shall be empowered to examine and report to the House upon the plan, practical workings, and management of the National Home for Disabled Volunteer Soldiers at Leavenworth, Kans., and authorizing the expenditure by the chairman of said committee of a sum not exceeding $5,000 for the current expenses of said committee, has been amended by substituting $2,000 for $5,000, and thus amended the resolution is approved.

The resolution authorizing the chairman of the Committee on the District of Columbia to expend not to exceed $150 as compensation for the employment of stenographers and typewriters during the current session of Congress is approved.

The resolution providing for the payment of $33.34 to George W. Strattan as compensation for services performed by him as messenger in the House post-office from November 22, 1895, to December 2, 1895, is approved.

The resolution providing for the payment of $86.64 to Frank Burke for services performed in the stationery room from December 2, 1895, to January 14, 1896, inclusive, is approved.

The resolution providing for the payment to Noah L. Hawk of $300 per annum, from December 9, 1895, to December 9, 1896, in addition to his pay as Capitol policeman, for extra services as acting assistant deputy sergeant-at-arms is approved.

The resolution providing for the payment to Lauretz Olson of $100 as compensation for his services as messenger in the Doorkeeper's department during the month of January, 1896, is approved.

The resolution directing the Clerk of the House to pay to Mary Slater, widow of William P. Slater, deceased, late a folder in the Doorkeeper's department, the expenses of his last illness and funeral, not to exceed the sum of $250, and a further sum equal to his salary for six months is approved.

The resolution of May 25, 1896, authorizing the chairman of the Committee on Enrolled Bills to appoint two additional assistant clerks to the Committee on Enrolled Bills, is approved, and your committee recommend that the compensation of these employees be fixed at $6 per day each, from the date of said resolution to the close of the session.

The resolution authorizing the Doorkeeper of the House to employ one additional laborer for one month, at a compensation of $50, is approved.

The resolution providing for the payment to Daniel J. McKeever for services rendered as an additional page from February 21, 1896, to the close of the current session of Congress, at the rate of $2.50 per day, is approved.

The resolution authorizing the payment of $77.78 to Albert E. Werner for services performed as a messenger in the Doorkeeper's department from January 4 to January 31, 1896, inclusive, is approved.

The resolution authorizing the Clerk of the House to employ for the remainder of the session two bicycle messengers for day and night service between the enrolling room of the Clerk's office and the Government Printing Office, at a compensation of $5 per day each, is approved.

The resolution providing for the creation of the office of assistant janitor of the House, and the appointment of I. B. Jackson to said office, at a salary of $50 per month, is disapproved.

The resolution providing for allowance of an extra month's salary to each messenger of the House post-office is disapproved.

The resolution authorizing the Postmaster of the House to continue the employment of Albert E. Werner as a messenger in the House post-office during the recess of the present Congress is disapproved.

Mr. ALDRICH of Illinois, from the Committee on Accounts, reported favorably the following resolutions:

Resolved, That the chairman of the Committee on the District of Columbia is hereby authorized to expend not to exceed $150 as compensation for the employment of stenographers and typewriters during the current session of Congress, the same to be paid out of the contingent fund of the House.

Resolved, That the Clerk of the House be, and he is hereby, authorized and directed to pay out of the contingent fund of the House to George W. Strattan the sum of $33.34 as compensation for services performed by him as messenger in the post-office of the House from November 22, 1895, to December 2, 1895.

Resolved, That the Clerk of the House be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, the sum of $86.64 to Frank Burke, for services performed in the stationery room from December 2, 1895, to January 14, 1896, inclusive.

Resolved, That the Clerk of the House be, and he is hereby, authorized and directed to pay to Noah L. Hawk the sum of $300 per annum, out of the contingent fund of the House, from December 9, 1895, to December 9, 1896, in addition to his pay as Capitol policeman, for extra service as acting assistant deputy sergeant-at-arms.

Resolved, That the Clerk of the House be, and he is hereby, authorized and directed to pay to Lauretz Olson, out of the contingent fund of the House, as compensation for his services as messenger in the Doorkeeper's department during the month of January, 1896, the sum of $100.

Resolved, That the Clerk of the House of Representatives be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, to Mary Slater, widow of William P. Slater, deceased, late a folder in the Doorkeeper's department, a sum equal to his salary for six months and the expenses of his last illness and funeral, said expenses not to exceed the sum of $250.

Resolved, That the chairman of the Committee on Enrolled Bills be, and he is hereby, authorized to appoint for the remainder of the current session two additional assistant clerks to the Committee on Enrolled Bills, at a compensation of $6 per day each, from May 25, 1896, to the close of the session, to be paid out of the contingent fund of the House.

Resolved, That the Doorkeeper of the House be, and he is hereby, authorized to employ one additional laborer for one month at a compensation of $50, to be paid out of the contingent fund of the House.

Resolved, That the Clerk of the House be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, to Ephraim J. Totten the sum of $133.33 for services performed in the Clerk's document room during the current session of Congress.

Resolved, That the Clerk of the House be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, to Daniel J. McKeever, for services rendered as an additional page from February 21, 1896, to the close of the current session of Congress, at the rate of $2.50 per day.

Resolved, That the Clerk of the House be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, to Albert E. Werner the sum of $77.78, for services performed as a messenger under the Doorkeeper of the House of Representatives from the 4th to the 31st day of January, 1896, both days inclusive.

Resolved, That the Clerk of the House of Representatives be, and he is hereby, authorized to employ, from June 5, 1896, to the close of the present session, two bicycle messengers for day and night service between the enrolling room of the Clerk's office and the Government Printing Office, to be paid each out of the contingent fund of the House of Representatives, at $5 per day.

Resolved, That the Speaker is hereby authorized to appoint a committee of five members, who shall be empowered to examine and report to this House upon the plan, practical workings, and management of the National Home for Disabled Volunteer Soldiers at Leavenworth, Kans., and any specific complaints which have been made as to the workings and management of said Home, and to recommend, by bill or otherwise, what may appear to them to be necessary to insure the most effective, economical, and humane application of the funds annually appropriated by Congress for the support of said Home; and for that purpose said committee is authorized to sit during the sessions of the House and during the recess of Congress at Leavenworth, Kans., to examine said Home, to send for persons and papers, also the books, accounts, papers, and all other matters and things pertaining to said Home and the conduct of any manager or officer thereof, to administer oaths, and to employ such clerical and other assistance as may be required for this work. The Clerk of the House, upon the order of the chairman of said committee, shall advance, out of the contingent fund of the House, such sums as may be required to meet the current expenses for clerk hire and other services, traveling and other expenses, not exceeding $2,000, said amount to be promptly accounted for by proper vouchers duly certified by said chairman.

Mr. ALDRICH of Illinois. Unless some gentleman desires to ask some question in regard to some of these resolutions, I ask that the report be adopted.

Mr. RICHARDSON. I should be glad if the gentleman would make some statement in explanation of the number of increases which are proposed to be made by this report.

Mr. ALDRICH of Illinois. Without going into details, I will state that there is no increase whatever of any consequence. There is, for instance, provision for a laborer who was brought in to do some extraordinary work in an emergency, and who under the report of the committee will receive $50 for one month. There was also the case of an employee to whom notice of his discharge was sent through the post-office; but as the notice went to the Dead-Letter Office, he did not receive it; hence we propose to allow him pay for a fraction of a month during which he did

labor without any compensation. Most of these cases are of that character. The total amount called for in the various resolutions referred to the committee and now reported back is nearly $12,000. The propositions which we approve involve an expenditure of only $1,337—a very small amount in proportion. Most of the resolutions referred to us have been disapproved. Those that have been approved have been sifted very carefully by the committee and are meritorious.

Mr. RICHARDSON. I wish to inquire how the Committee on Accounts obtained jurisdiction of the resolution for an investigation of the Soldiers' Home at Leavenworth, Kans.?

Mr. ALDRICH of Illinois. I presume it came to us because it called for an appropriation from the contingent fund of the House. I understand the resolution was originally sent to the Committee on Military Affairs, by which committee it was favorably reported; but inasmuch as it called for a payment from the contingent fund in order to conduct the investigation, it was sent to the Committee on Accounts. We have recommended that the proposed expenditure be reduced from $5,000 to $2,000.

Mr. RICHARDSON. I simply desired to know whether it was ever referred by an order of the House to the Committee on Accounts.

Mr. ALDRICH of Illinois. Oh, it came to us in the regular order.

The SPEAKER. The Chair thinks it was referred, not in open House, but under the rules.

Mr. ALDRICH of Illinois. That may be.

Mr. DOCKERY. And without the actual knowledge of the Speaker.

The SPEAKER. It is a matter which, of course, if there were any objection, the Chair would not consider privileged. The intention had been to present it to the House under a suspension of the rules.

Mr. RICHARDSON. I did not wish to raise any question of order. My recollection was that there had been some discussion of the matter in the House. I did not know whether it had been formally referred by the House to the Committee on Accounts. That is the reason I made my inquiry.

The SPEAKER. The Chair thought he ought to say that much, because no such precedent ought to be established.

The question is on the adoption of the resolutions submitted by the gentleman from Illinois.

The resolutions were agreed to.

On motion of Mr. ALDRICH of Illinois, a motion to reconsider the last vote was laid on the table.

ORDER OF BUSINESS.

Mr. DINGLEY. Mr. Speaker——

The SPEAKER. The gentleman from Maine.

Mr. BOUTELLE. Mr. Speaker, I offer for consideration a Senate bill which I send to the desk.

The SPEAKER. One moment. The Chair must recognize gentlemen in their order.

Mr. BOUTELLE. I beg pardon. I thought "the gentleman from Maine" referred to myself.

Mr. DINGLEY. I was about to say that I have been notified that if these bills continue the point of no quorum will be made. I desire to avoid that difficulty, and therefore move that the House take a recess until 10 o'clock to-morrow morning.

Mr. RICHARDSON. Mr. Speaker, I do not think the gentleman from Maine ought to make a speech on the motion to take a recess. Surely with the large majority on that side of the House you ought to be able to keep a quorum here.

Mr. DINGLEY. Well, I hope the gentleman from Tennessee will not insist on that point now.

Mr. RICHARDSON. I do not object to the motion; I was only objecting to debate.

Mr. LOUD. If the gentleman from Maine had not made the motion I should have done so myself.

The motion of Mr. DINGLEY was agreed to.

The SPEAKER. Before announcing the result of the vote the Chair desires to announce the following appointments on committees.

COMMITTEE APPOINTMENTS.

By unanimous consent, Mr. COOPER of Texas was excused from further service on the Committee on the Territories.

The following appointments on committees were announced by the Speaker:

Mr. STALLINGS, Banking and Currency.

Mr. COOPER of Texas, Coinage, Weights, and Measures.

Mr. THORP, Railways and Canals and Patents.

Mr. RINAKER, Pacific Railroads and Railways and Canals.

Mr. BROMWELL, Pensions.

Mr. BELL of Colorado, Public Lands.

Mr. KLEBERG, Militia and Public Lands.

Mr. MITCHELL, Patents and Election of President, Vice-President, etc.

Mr. MEYER, District of Columbia.

Mr. MURRAY, Education and Expenditures in Treasury Department.

Mr. GOODWYN, Claims and Reform in the Civil Service.

Mr. MARTIN, Military Affairs.

Mr. TRUMAN H. ALDRICH, Manufactures and Territories.

The result of the vote was then announced; and accordingly (at 7 o'clock and 1 minute p. m.) the House took a recess until 10 o'clock a. m. to-morrow, Wednesday.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. GAMBLE, from the Committee on Indian Affairs, to which was referred the bill of the House (H. R. 8584) confirming the title of mixed-blood Indians to their lands and allowing the same to be alienated under certain circumstances, reported the same with amendment, accompanied by a report (No. 2276); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DRAPER, from the Committee on Patents, to which was referred the bill of the Senate (S. 1897) entitled "An act to establish a classification division in the United States Patent Office," reported the same without amendment, accompanied by a report (No. 2277); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BARTLETT of New York, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 8220) to amend the act approved February 9, 1881, to grant the right of way for railroad purposes through certain lands of the United States in Richmond County, N. Y., reported the same without amendment, accompanied by a report (No. 2278); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. WANGER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the Senate (S. 2334) entitled "An act construing the acts of Congress in relation to the award of life-saving medals," reported the same without amendment, accompanied by a report (No. 2280); which said bill and report were referred to the House Calendar.

Mr. DINGLEY, from the Committee on Ways and Means, to which was referred the resolutions of the House (House Res. Nos. 173 and 189) directing the Committee on Ways and Means to inquire what effect the difference of exchange between gold-standard and silver-standard countries has upon agricultural and manufacturing industries of the United States, and also the effect in our markets of the products of cheap Oriental labor, in compliance with said resolutions submits a report (No. 2279) submitting certain information therein to the House.

PUBLIC BILLS, MEMORIALS, AND RESOLUTIONS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. DINSMORE: A bill (H. R. 9434) for the establishment, control, operation, and maintenance of a national home for disabled volunteer soldiers of the late United States and Confederate armies at Eureka Springs, in the State of Arkansas—to the Committee on Military Affairs.

By Mr. HERMANN: A bill (H. R. 9435) to amend an act entitled "An act to provide for the adjudication and payment of claims arising from Indian depredations," approved March 3, 1891—to the Committee on Indian Affairs.

By Mr. MCMILLIN: A joint resolution (H. Res. 200) proposing an amendment to the Constitution authorizing Congress to levy a tax on the incomes of corporations, firms, and individuals—to the Committee on Ways and Means.

By Mr. WOODARD: A resolution (House Res. No. 419) to print the views of the minority in the contested-election case of C. H. Martin *vs.* J. A. Lockhart—to the Committee on Printing.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills; which were referred as follows:

The bill (H. R. 9374) granting a pension to Eliza Ann Harrington—Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

Papers to accompany the bill for the relief of Daniel F. Donner—Committee on Invalid Pensions discharged, and referred to the Committee on Military Affairs.

PRIVATE BILLS, ETC.

Under clause 1 of Rule XXII, private bills of the following titles were presented and referred as follows:

By Mr. HALL: A bill (H. R. 9436) granting an increase of pension to Robert H. Metcalf—to the Committee on Invalid Pensions.

By Mr. HARRIS: A bill (H. R. 9437) to grant an honorable discharge to Dewitt C. Nash—to the Committee on Military Affairs.

Also, a bill (H. R. 9438) granting a pension to Joseph Harris—to the Committee on Invalid Pensions.

By Mr. KULP: A bill (H. R. 9439) to reimburse M. A. Williams—to the Committee on War Claims.

By Mr. LEWIS: A bill (H. R. 9440) granting increase of pension to Cyrus Allen—to the Committee on Invalid Pensions.

By Mr. RICHARDSON: A bill (H. R. 9441) for the relief of estate of Alice Hardaway, deceased, late of Benton County, Miss.—to the Committee on War Claims.

Also, a bill (H. R. 9442) for the relief of the estate of Susan L. Hardaway, deceased, late of Benton County, Miss.—to the Committee on War Claims.

By Mr. SOUTHARD: A bill (H. R. 9443) for the relief of Frank Wenzel—to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. JOHNSON of California: Petition of citizens of Sacramento, Cal.; also of Grass Valley, Cal., praying that religious publications be given every advantage of the act of Congress of July 16, 1894, in transmission through the mails—to the Committee on the Post-Office and Post-Roads.

Also, petition of R. M. and A. C. Folger, of Bridgeport, Cal., for favorable action on House bill No. 4566, to amend the postal laws relating to second-class matter—to the Committee on the Post-Office and Post-Roads.

Also, petition of citizens of Stockton, Cal., favoring the passage of House bill No. 2626, for the protection of agricultural staples by an export bounty—to the Committee on Ways and Means.

By Mr. LEWIS: Petition of Cyrus Adams, signed by J. J. Ferry and other citizens of Kentucky, for a pension—to the Committee on Invalid Pensions.

By Mr. McCLEARY of Minnesota: Resolutions of the Mankato (Minn.) Board of Trade, opposing House bill No. 8536 and Senate bill No. 2967, proposing amendments to the interstate-commerce law—to the Committee on Interstate and Foreign Commerce.

By Mr. PUGH: Papers to accompany House bill No. 2454, for the relief of Allen Maze—to the Committee on Military Affairs.

SENATE.

WEDNESDAY, *June 10, 1896.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

On motion of Mr. FAULKNER, and by unanimous consent, the reading of the Journal of yesterday's proceedings was dispensed with.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the following bills:

A bill (S. 2783) to establish a life-saving station on the coast of New Hampshire or Massachusetts between the Hampton and the Merrimac rivers;

A bill (S. 2412) to make the city of Santa Barbara, county of Santa Barbara, State of California, a subport of entry;

A bill (S. 2490) to authorize the Secretary of War to improve and maintain the public roads within the limits of the national park at Gettysburg, Pa.;

A bill (S. 2859) changing the time for holding circuit court of the United States at Hartford, in the district of Connecticut, and

A bill (S. 2978) to provide an American register for the steamer *Menemsha*.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to the bill (S. 2928) to extend the routes of the Eckington and Soldiers' Home Railway Company and of the Belt Railway Company of the District of Columbia, and for other purposes.

The message further announced that the House had agreed to the amendment of the Senate numbered 1 to the bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for the expenses of the House of Representatives, and for other purposes, for the fiscal year 1896, and disagreed to the amendment of the Senate numbered 2 to the bill.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes; recedes from its disagreement to the amendment of the Senate numbered 16, and agrees to the same; further insists upon its disagreement to the amendments numbered 2, 3, 4, 6, 7, 8, 13, 15, and 17 to the bill; asks a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CANNON, Mr. HAINER of Nebraska, and Mr. SAYERS managers at the conference on the part of the House.

The message further announced that the House had passed a bill (H. R. 9253) to amend an act approved August 19, 1890, entitled "An act to adopt regulations for preventing collisions at sea"; in which it requested the concurrence of the Senate.

The message also announced that the House had passed a concurrent resolution authorizing the Secretary of the Interior to resume work upon and to issue patents to the Union Pacific Railroad Company without delay to all lands which have been sold by said company to bona fide purchasers, etc.; in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

A bill (H. R. 2) disposing of two condemned cannon;

A bill (H. R. 2947) increasing the pension of Daniel D. Jennings, late of Company C, Sixty-fifth Ohio Volunteers;

A bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes;

A bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes; and

A bill (H. R. 8383) to establish a site for the erection of a penitentiary on the military reservation at Fort Leavenworth, Kans., and for other purposes.

Mr. VEST. A bill has been sent from the other House in regard to maritime regulations. It is very important. A similar bill was unanimously reported by the Commerce Committee of the Senate and is now upon the Calendar. It will not take a moment, I think, to pass this House bill.

Mr. HALE. I call for the regular order. I ask the Senator to wait until the morning business is through.

The VICE-PRESIDENT. The regular order is called for. Petitions and memorials are in order.

PETITION.

Mr. TELLER presented a petition of sundry citizens of Gunnison, Colo., praying for the enactment of legislation to amend the postal laws relating to second-class mail matter, and also to reduce letter postage to 1 cent per half ounce; which was referred to the Committee on Post-Offices and Post-Roads.

REPORTS OF COMMITTEES.

Mr. HALE, from the Committee on Naval Affairs, to whom was referred the bill (S. 3257) donating condemned cannon and cannon balls to the Idaho Soldiers' Home, Boise City, Idaho, reported it without amendment.

He also, from the same committee, to whom was referred the bill (H. R. 7777) to authorize the Secretary of the Navy to furnish condemned cannon to Fort Thomas, Ky., reported it without amendment.

He also, from the same committee, to whom was referred the bill (S. 3234) donating condemned cannon and cannon balls to the Ohio Soldiers and Sailors' Home, Erie County, Ohio, reported it without amendment.

Mr. BERRY, from the Committee on Private Land Claims, to whom was referred the bill (S. 1624) to quiet title and possession with respect to certain unconfirmed and located private land claims in the State of Louisiana, reported it with amendments, and submitted a report thereon.

CIVIL SERVICE AND RETRENCHMENT COMMITTEE HEARINGS.

Mr. GALLINGER, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution submitted by Mr. PRITCHARD April 13, 1896, reported it without amendment, as follows:

Resolved, That the Committee on Civil Service and Retrenchment be authorized to employ a stenographer to report hearings before it, the expense thereof to be paid out of the contingent fund of the Senate, and to have the notes of such hearings printed for the use of the committee.

Mr. GALLINGER. I ask that the resolution be now considered.

The Senate, by unanimous consent, proceeded to consider the resolution.

Mr. GALLINGER. I will state that the Committee on Civil Service and Retrenchment has acted under the resolution and the

expenditure has already been made. The amount involved is very trifling.

Mr. VEST. I should like to know from the Senator from Maine why he called for the regular order upon another bill and now does not demand it.

Mr. HALE. I intend to call for the regular order on everything, and I have asked the Chair to enforce the regular order.

The VICE-PRESIDENT. When Senators request unanimous consent for the consideration of a bill or resolution the Chair submits the request to the Senate. The Chair recognized the Senator from Missouri, but objection was made. The question is on agreeing to the resolution reported by the Senator from New Hampshire.

The resolution was agreed to.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. ALLISON submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 32, 61, 124, and 161.

That the House recede from its disagreement to the amendments of the Senate numbered 122, 146, and 147, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 109, and agree to the same with an amendment as follows: "In lieu of the matter inserted by said amendment insert the following: 'To enable the Government to take official part in the international exhibition to be held at Brussels, Belgium, during the year 1897, $5,000: *Provided*, That no expenditure exceeding this appropriation shall be made or liability incurred, and no person shall be paid salary or compensation therefrom;'" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 123, and agree to the same with an amendment as follows: "In lieu of the sum proposed, insert '$20'"; and on page 67 of the bill, in line 14, strike out the word "six" and insert in lieu thereof the word "five"; and the Senate agree to the same.

The committee of conference have been unable to agree upon the amendments of the Senate numbered 2, 3, 4, 6, 7, 8, 13, 15, and 17.

W. B. ALLISON,
EUGENE HALE,
A. P. GORMAN,
Managers on the part of the Senate.

J. G. CANNON,
JOSEPH D. SAYERS,
Managers on the part of the House.

The report was concurred in.

Mr. ALLISON. I move that the Senate still further insist upon its amendments numbered 2, 3, 4, 6, 7, 8, 13, 15, and 17, and agree to the conference asked by the House of Representatives.

The motion was agreed to.

Mr. ALLISON. In this connection I desire to state that these amendments relate wholly to public buildings. The House having receded by a vote of that body upon one of the amendments, I take it for granted that we shall have no trouble in dealing with the remainder.

By unanimous consent, the Vice-President was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. ALLISON, Mr. HALE, and Mr. GORMAN were appointed.

DEFICIENCIES IN APPROPRIATIONS.

Mr. HALE. I ask that the action of the House of Representatives on the special deficiency appropriation bill be laid before the Senate.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives, disagreeing to amendment of the Senate numbered 2 to the bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for the expenses of the House of Representatives, and for other purposes, for the fiscal year 1896.

Mr. HALE. I move that the Senate insist upon its amendment, and request a conference upon the disagreeing votes of the two Houses.

The motion was agreed to.

By unanimous consent, the Vice-President was authorized to appoint the conferees on the part of the Senate; and Mr. HALE, Mr. ALLISON, and Mr. COCKRELL were appointed.

PREVENTION OF COLLISIONS AT SEA.

The bill (H. R. 9253) to amend an act approved August 19, 1890, entitled "An act to adopt regulations for preventing collisions at sea," was read twice by its title.

Mr. VEST. I ask the Senate to proceed to the consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. VEST. It will be remembered that in 1893 a conference was held between the maritime nations of the world in this city in regard to forming a consistent code of maritime signals. The President of the United States submitted the report of that conference to Congress. While it was pending here, to the surprise of everyone who had any cognizance of the facts, Great Britain objected to the fifteenth article of that report. The result was that the President asked that the report be returned to him and that he be authorized to ask for another maritime conference. That conference was held in this city last week, and the commissioners on the part of Great Britain agreed to the code as it is now presented in this bill to the Senate and as it has passed the House. This code was agreed upon unanimously by all the authorities of the maritime powers, and it has been reported unanimously from the committees of both Houses.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

UNION PACIFIC RAILROAD LANDS.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution of the House of Representatives; which was read:

Resolved by the House of Representatives (the Senate concurring), That the Secretary of the Interior be, and he is hereby, authorized and directed to resume work upon and to issue patents to the Union Pacific Railroad Company without delay to all lands which have been sold by said company to bona fide purchasers: *Provided*, That nothing herein contained shall be construed as waiving any right that the United States may have to declare a forfeiture as to the lands which have not been so sold by said company: *Provided*, That the words "bona fide purchasers" herein contained shall not be held to include all holders of bonds secured by mortgage on such land grants.

Mr. WARREN. The resolution just read contains the same subject-matter as a Senate concurrent resolution which was passed here and sent to the other House. It seems that that resolution was lost, and therefore it appears before us as a House concurrent resolution. I ask for the adoption of the resolution.

The resolution was agreed to.

CHICKAMAUGA AND CHATTANOOGA NATIONAL PARK.

Mr. HALE, from the Committee on Printing, to whom was referred the following concurrent resolution submitted yesterday by Mr. PALMER, reported it without amendment; and it was considered by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound 60,000 extra copies of the report of the Joint Committee on the Dedication of the Chickamauga and Chattanooga National Park; 18,000 copies shall be for the use of the House of Representatives, 6,000 copies for the Senate, 1,000 copies for the National Park Commission to supply the twenty-eight State commissions, and 500 copies for the Secretary of War to supply the governors of the States, and 100 copies for each speaker at the dedication.

BERLIN SILVER COMMISSION OF 1894.

Mr. HALE, from the Committee on Printing, to whom was referred the following concurrent resolution submitted yesterday by Mr. JONES of Arkansas, reported it without amendment; and it was considered by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That there be printed 5,000 copies of Senate Miscellaneous Document No. 274, Fifty-third Congress, second session, Proceedings of the Berlin Silver Commission of 1894, with index; 3,000 to be for the use of the House of Representatives and 2,000 for the use of the Senate.

UNIFORM SYSTEM OF BANKRUPTCY.

Mr. HALE, from the Committee on Printing, to whom was referred the following resolution submitted by Mr. MITCHELL of Oregon on the 8th instant, reported it without amendment; and it was considered by unanimous consent, and agreed to:

Resolved, That 5,000 additional copies each of bill S. 742 and amendment thereto, reported from the Senate Committee on the Judiciary, be printed for the use of the Senate.

MESSENGER AT MALTBY BUILDING.

Mr. GALLINGER, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the following resolution submitted by Mr. PEFFER on the 18th ultimo, reported it without amendment; and it was considered by unanimous consent, and agreed to:

Resolved, That the janitor now employed at the Maltby Building shall hereafter be designated as assistant messenger on the Maltby roll, and the Secretary of the Senate, from and after the 1st day of July, 1896, until otherwise ordered, shall pay said messenger on said roll at the rate of $1,200 per annum.

BILLS INTRODUCED.

Mr. BURROWS introduced a bill (S. 3292) authorizing the appointment of four additional superintendents of the Railway Mail Service; which was read twice by its title, and referred to the Committee on Post-Offices and Post-Roads.

Mr. STEWART introduced a bill (S. 3293) granting a pension to Annie Fowler; which was read twice by its title, and referred to the Committee on Pensions.

Mr. CANNON (for Mr. PRITCHARD) introduced a bill (S. 3294) to amend the military record of Stephen Rice; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. McBRIDE introduced a bill (S. 3295) removing the charge of desertion from the name of Absalom J. Hembree, who served as a private in Troop H, Third Regiment United States Cavalry; which was read twice by its title, and referred to the Committee on Military Affairs.

GOVERNMENT PRINTING OFFICE EMPLOYEES.

Mr. GALLINGER submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Public Printer be, and he is hereby, directed to communicate to the Senate the names of all persons who were employed in the Government Printing Office in the fiscal years (each year separately) 1890, 1891, 1892, 1893, and 1894 who failed to receive their annual leaves of absence during those fiscal years, and the amount due each person for each fiscal year separately on account of such failure.

THE LEWIS RANGE AND POSITION FINDER.

Mr. DUBOIS submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved by the Senate of the United States, That the Secretary of War be directed to furnish to the United States Senate, in addition to the copy of the record of the action of the Range Finder Board and the Board of Ordnance and Fortification in relation to the Lewis range and position finder, which was transmitted to the Senate in response to a resolution of the Senate dated May 18, 1896, a copy of the record of the action taken by the Commanding General of the Army and the Secretary of War in the matter.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the following bills and joint resolutions:

A bill (S. 768) for the relief of James A. Moore;

A bill (S. 3170) to authorize the Butler and Pittsburg Railroad Company to construct and maintain a bridge across the Allegheny River;

A joint resolution (S. R. 27) granting permission for the erection of a monument in Washington, D. C., for the ornamentation of the national capital and in honor of Samuel Hahnemann; and

A joint resolution (S. R. 161) authorizing the Secretary of the Treasury to place a bronze tablet or inscription on the Government building now being erected in Detroit, Mich.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses of certain amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes; insists upon its amendment to the amendment of the Senate numbered 99; further insists upon its disagreement to the amendments of the Senate numbered 100, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, and 195 to the bill; asks a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. GROUT, Mr. PITNEY, and Mr. DOCKERY managers at the conference on the part of the House.

The message further announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 3771) for the relief of Stratton H. Benscoter; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. HULL, Mr. FENTON, and Mr. MCCLELLAN managers at the conference on the part of the House.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 9253) to amend an act approved August 19, 1890, entitled "An act to adopt regulations for preventing collisions at sea"; and which was thereupon signed by the Vice-President.

ORDER OF BUSINESS.

Mr. HILL. If there is no further morning business, I move that the Senate proceed to the consideration of the bill (S. 2984) in relation to contempts of court. The bill was under consideration last evening, and I gave way for the consideration of other matters.

Mr. VEST. I rise to a parliamentary inquiry. To give the exact date, two days ago when 2 o'clock arrived the Senate suspended the further consideration of House bill 4580, a bill of considerable importance to the revenue. I inquire whether that bill would not now be the regular order of business?

The VICE-PRESIDENT. The Chair will state to the Senator from Missouri that the bill indicated by him went to the Calendar at the expiration of the morning hour.

Mr. VEST. I supposed that under the rule it would come up as unfinished business the next day in the morning hour.

The VICE-PRESIDENT. No; there is no unfinished business of the morning hour.

Mr. VEST. Will the Senator from New York have any objection to disposing of that bill now? It will take only a few moments. It is a House bill, and it is very evident that unless disposed of to-day it can not become a law at the present session.

Mr. HILL. I prefer to go on with the contempts bill. I have yielded to nearly everyone, and I prefer to get this bill through. It strikes me that I should not yield now.

Mr. VEST. I shall ask the Senate to consider House bill 4580 as soon as the contempts of court bill is disposed of.

Mr. MITCHELL of Oregon. May I ask the Senator from New York a question? The Senator succeeded in getting his bill up yesterday and it led to a good deal of discussion. Has the Senator any hope at all of being able to dispose of it in a reasonable time to-day?

Mr. HILL. I have no doubt about it, if the friends of the bill will not embarrass it.

Mr. MITCHELL of Oregon. If there is not a reasonable hope that it can be disposed of in the next hour, it seems to me the Senator ought not to insist on bringing it up. There are other matters here that ought to be considered. I am very desirous, if the Senator will allow me——

Mr. HILL. Mr. President——

Mr. MITCHELL of Oregon. I ask unanimous consent to make a statement.

Mr. HILL. I yielded for an hour and a half yesterday for Senators to have local bills passed and bills which they were anxious to have disposed of. It seems to me the courtesy is exhausted. I decline to yield any further.

Mr. MITCHELL of Oregon. I simply ask the Senator from New York, who is always very courteous, and the Senate, to allow me to make a statement not exceeding a minute.

Mr. HILL. Such a statement I of course can not object to.

The VICE-PRESIDENT. The Chair hears no objection. The Senator from Oregon will proceed.

Mr. MITCHELL of Oregon. There is a joint resolution here from the House of Representatives, passed two or three days since, looking to the reorganization of the Northern Pacific Railroad Company, and it is a measure that ought to receive the attention of the Senate. It is not by any means a bill exclusively in the interest of the railroad company, but it is more largely in the interest of the people of this country and of the Government in the proper conduct of the road. It is a road which crosses one-half the continent, and the company was incorporated by a national charter. This is a proposition to keep it under national control, which will not be done unless the joint resolution is passed. The road is about to be sold; judgment has been entered; a sale will be made on the 25th of July; a reorganization of the company will take place, and the control of the road will pass under State organization. The company has already been organized, I understand, under the laws of the State of Wisconsin, and if it is incorporated under the State law the control of this great road, in a great measure at least, if not entirely, will pass away from the National Government. It is of the utmost importance that action be had on the joint resolution.

This proposed legislation has been reported unanimously by the Judiciary Committee of the Senate, a somewhat different measure, I admit, from that passed by the House. It places restrictions upon this company of the most important character, and restrictions that do not now attach to the Northern Pacific Railroad Company. For instance, it compels the new company to sell all its lands outside of a mile distant from each side of the road for $2.50 an acre. That restriction does not now attach to the Northern Pacific Railroad Company. Therefore this is a measure in the interest of the people along the line of the road; it is a measure in the interest of the Government; and in view of the fact that the House of Representatives has passed this joint resolution, in view of the further fact that the Judiciary Committee of the Senate has reported unanimously in favor of action, it does seem to me that we ought to take it up and dispose of it and thus maintain and hold control over this great corporation in the interest of the people, shippers, landowners, and others along the line of the road.

Mr. HILL. Now I ask the Senate to take up the bill indicated by me.

The VICE-PRESIDENT. The question is on the motion of the Senator from New York to proceed to the consideration of the bill (S. 2984) in relation to contempts of courts.

The motion was agreed to.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. TELLER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 92 and 98.

That the House recede from its disagreement to the amendments of the Senate numbered 94 and 95, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 90, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$150,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 91, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$30"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 93, and agree to the same with an amendment as follows: Restore the word "further" stricken out by said amendment; and on page 16 of the bill, in line 9, strike out the word "six" and insert in lieu thereof the word "five"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 96, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$50,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the

Senate numbered 97, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert "30 cents"; and the Senate agree to the same.

The committee of conference have been unable to agree upon the amendment of the House to the amendment of the Senate numbered 99, and upon the amendments of the Senate numbered 100, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, and 195.

H. M. TELLER,
W. B. ALLISON,
F. M. COCKRELL,
Managers on the part of the Senate.

WILLIAM W. GROUT,
MAHLON PITNEY,
A. M. DOCKERY,
Managers on the part of the House.

Mr. TELLER. I am asked by Senators near me to make a statement in regard to the report. The principal matter that has been agreed to is with reference to street lighting—the question of gas. There was considerable controversy over that, and we finally amended the bill so as to pay $20 a street lamp and to burn 5 feet instead of 6. The most of the other amendments are items connected with that provision. For instance, the increase is the increase for the gaslight. Then the other contention was in reference to electric lighting, which the House had put at 28 cents a light. The Senate had put it at 38 cents, and the conferees have agreed upon 30 cents. The matters still in controversy are the subject of charities and the question of electric lighting by means of poles, etc. Those amendments are not disposed of.

The report was concurred in.

Mr. TELLER. I move that the Senate agree to the further conference asked by the House of Representatives.

The motion was agreed to.

By unanimous consent, the Vice-President was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. TELLER, Mr. ALLISON, and Mr. COCKRELL were appointed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, it Chief Clerk, announced that the House had passed the following bills and joint resolutions:

A bill (S. 1767) to provide for subports of entry and delivery;

A bill (S. 3206) to grant a right of way through the new Fort Bliss Military Reservation to the El Paso and Northeastern Railroad Company; and

A joint resolution (S. R. 138) for the relief of James P. Veach.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

A bill (S. 2859) changing the time for holding circuit court of the United States at Hartford, in the district of Connecticut;

A bill (H. R. 2928) to extend the routes of the Eckington and Soldiers' Home Railway Company and the Belt Railway Company, and for other purposes; and

A bill (S. 2978) to provide an American register for the steamer *Menemsha*.

CONTEMPTS OF COURT.

Mr. HILL. Now, Mr. President, I ask that Senate bill 2984 be proceeded with.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2984) in relation to contempts of court.

Mr. WARREN. I ask the Senator from New York if he will yield to me to make a request? I desire to call up the animal-industry bill, and I ask the Senator if he will not submit to an interruption now? I think it will only take the time to read it.

I will say further that I think I must have misunderstood the Senator from New York, because I thought I had an understanding with him that at whatever time a lull occurred between the speeches on the contempts bill he would send me word and allow me to ask the Senate to take up the bill which I have referred to. Last night a number of bills were taken up, and I waited in vain for word from the Senator.

Mr. HILL. If the Senator had asked me last evening when there was a lull, I would have been very glad to have obliged him, but I did not see him in the Chamber. I must now ask the Senate to proceed with the consideration of the contempts bill. After this bill is disposed of I will aid the Senator all I can in the passage of his bill. I do not believe there will be any difficulty about it.

Mr. WARREN. I desire some understanding, because I certainly understood the Senator to say that upon the first interruption he would send me word. I did not leave the Chamber.

Mr. HILL. I submitted to half a dozen interruptions; half a dozen bills were passed. If the Senator from Wyoming had asked me to yield I would have been very glad to oblige him. But this morning it seems to me it is my duty to press the pending bill to passage. I will aid the Senator when this bill is disposed of. There is really but one disputed question involved in the bill, and that is the amendment pending.

Mr. WARREN. I wish to understand the Senator, because I expected some word from him. I did not expect I would have to interrupt him every two or three minutes on the floor, but I supposed that I had some understanding with him whereby I would be notified of the time when he would submit to an interruption.

Mr. PEFFER. Mr. President, before the bill is put to a vote I wish to express my sincere gratification at the introduction of this bill and its report by the Committee on the Judiciary. It is one of that class of cases that the country has been exercised a good deal about during the last year or two, having its origin in the famous strike in Chicago in 1894. I took occasion at that time to express my own views concerning some of the features of that affair, and was criticised severely for it. I am glad that out of what occurred at that time and a short time afterwards in the courts with respect to certain proceedings connected with it the pending bill has been brought forth. By way of showing the interest which I have taken in the matter personally I wish to call attention to the fact that on December 3, 1895, the first bill day of the present session, I introduced a bill, S. 237, entitled "A bill to protect the rights of parties defendant in certain injunction cases." It has but one section, and I will read it:

Be it enacted, etc., That in any case where a writ of injunction issues from a court of the United States, or a judge thereof, to enjoin the commission of an act which is, at common law or by statute, a criminal offense, and where, afterwards, in such case, it is charged that the party or parties defendant has or have committed, or have attempted to commit, or have aided and abetted or encouraged or instigated other persons, or has or have conspired with other persons to commit such act or offense, and where the said party or parties defendant is or are brought before said court or judge to answer the charge in proceedings for contempt, and where the charge is denied by the defendant or defendants, on request, a jury shall be called to determine the fact.

Out of this bill and others of the same character has grown the one that is now before the Senate, and it is very gratifying to all persons who are anxious for this class of legislation to know that so many distinguished lawyers of this body have agreed upon the bill now pending, with the addition that was agreed upon yesterday.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Nebraska [Mr. ALLEN].

Mr. BUTLER. May I inquire if the amendment offered by myself, that went over without prejudice, was not to come up first? There was a distinct understanding in regard to it. Out of courtesy to the Senator from Nebraska [Mr. ALLEN] I withdrew my amendment temporarily.

The VICE-PRESIDENT. The Chair understood the Senator from North Carolina to agree that his amendment should be postponed until the substitute was considered.

Mr. BUTLER. What I meant was that it should be postponed until the Senator from Nebraska had finished his speech; and inasmuch as he had an amendment and I wished to hear what he had to say, I requested, or at least I intended to request, that my amendment should go over without prejudice until after he had finished.

The VICE-PRESIDENT. The Chair will submit to the Senate the amendment proposed by the Senator from North Carolina. The amendment will be read.

The SECRETARY. In section 4, line 18, strike out the words "in its discretion"; and in line 19, strike out the word "may" and insert "shall"; so as to read:

But such trial shall be by the court, or, upon application of the accused, a trial by jury shall be had as in any criminal case.

Mr. BUTLER. Mr. President, I think there can be no objection, seriously made, to the amendment. But if I may be pardoned in this connection, the fact that one of the most important committees of this body in reporting the bill failed to provide for a trial by jury in such cases is, to say the least, very significant. Yes, very significant, when we notice that this bill was reported unanimously and that there is no minority report.

There is nothing to-day that should attract the attention of the American people, barring the financial question, more than the authority which the courts of this country have assumed and built up and hedged around them. I will not call it usurpation of authority, but any man who will take the time and the trouble to read the debates that took place at the time of the adoption of our Constitution, any man who will take the time and the trouble to read the opinions of the most distinguished American citizens, including Thomas Jefferson, including Mr. Madison, and Mason of Virginia, who was a member of that convention, including many of the distinguished men living at that time and who have lived since, will see that not a single one of that class of American citizens who took part in framing and shaping the Constitution according to the majority will of our people at that time had the least idea that the courts of this country should ever have or exercise the authority and power that they have, or rather which they exercise to-day. He will see that they did not suppose that the Constitution gave to a court any such power and authority as it is now exercising and has been for nearly a century. Indeed, it was Thomas Jefferson who called attention to the fact that the Supreme Court and the other United States courts that were then established and have since been established under a clause in the Constitution had gone further than it was

intended they should go or than the strict letter of the Constitution allowed them to go in exercising their authority upon laws passed by Congress and other legislative matters which they have made step by step subject to the Federal judiciary. Indeed, Mr. Jefferson was so impressed with the importance of this matter and the danger which he saw looming up in the future that he conceived it to be his duty not only to call the attention of the country to this fact, but to brand, as he did, the Supreme Court of the United States at that time as the sappers and miners of the Constitution. He called attention to the fact, in public papers that are familiar to us all or should be, that this court, which was intended simply to hear causes between parties, had taken upon itself authority to overrule the legislative branch of the Government.

Mr. President, in order that the attention of Senators and the country may again be called to the exact words of Mr. Jefferson, in which he expressed his opinion of the aggressions of the Federal judiciary and warned the people of this danger in the Constitution, I will read some extracts from his writings.

In a letter to Mr. M. M. Coray, under date of October 21, 1823, Mr. Jefferson said:

At the establishment of our Constitution the judiciary bodies were supposed to be the most helpless and harmless members of the Government. Experience, however, soon showed in what way they were to become the most dangerous; that the insufficiency of the means provided for their removal gave them a free hold and irresponsibility in office; that their decisions, seeming to concern individual suitors, only passed silent and unheeded by the public at large; that these decisions, nevertheless, become law by precedent, sapping by little and little the foundations of the Constitution and working its change by construction before any has perceived that that invisible and helpless worm had been visibly employed in consuming its substance.

In a letter to Judge Roane, under date of September 6, 1819, Mr. Jefferson said:

The nation declared its will by dismissing functionaries of one principle and electing those of another in the two branches, executive and legislative, submitted to their election. Over the judiciary department the Constitution had deprived them of their control. That, therefore, has continued the reprobated system, and although new matter has occasionally been incorporated into the old, yet the leaven of the old mass seems to assimilate to itself the new, and after twenty years' confirmation of the federated system by the voice of the nation, declared through the medium of elections, we find the judiciary on every occasion still driving us into consolidation. * * * For, intending to establish three departments, coordinate and independent, that they might check and balance one another, it has given, according to this opinion, to one of them alone the right to prescribe rules for the government of the others, and to that one, too, which is unelected by and independent of the nation. For experience has already shown that the impeachment it has provided is not even a scarecrow; that such opinions as the one you combat, sent cautiously out, as you observe, also by detachment, not belonging to the case often, but sought for out of it, as if to rally the public opinion beforehand to their view, and to indicate the line they are to walk in, have been so quietly passed over as never to have excited an animadversion even in a speech of any one of the body intrusted with impeachment. The Constitution on this hypothesis is a mere thing of wax in the hands of the judiciary, which they may twist and shape into any form they please. It should be remembered as an axiom of eternal truth in politics, that whatever power in any government is independent is absolute also—in theory only at first, while the spirit of the people is up, but in practice as fast as that relaxes. Independence can be trusted nowhere but with the people in mass. They are inherently independent of all but moral law. My construction of the Constitution is very different from that you quote. It is that each department is truly independent of the others, and has an equal right to decide for itself. What is the meaning of the Constitution in the cases submitted to its action, and especially where it is to act ultimately and without appeal? * * * These are examples of my position: that each of the three departments has equally the right to decide for itself what is its duty under the Constitution, without any regard to what the others may have decided for themselves under a similar question.

In a letter to Thomas Ritchie, under date of December 25, 1820, Mr. Jefferson said:

But it is not from this branch of Government we have most to fear. Taxes and short elections will keep them right.

The judiciary of the United States is the subtle corps of sappers and miners constantly working underground to undermine the foundations of our constitutional fabric. They are construing our Constitution from a coordination of a general and special government to a general and supreme one alone. This will lay all things at their feet, and they are too well versed in English law to forget the maxim, "Boni judicis est ampliare jurisdictionem." We shall see if they are bold enough to take the daring stride these five lawyers (judges) have lately taken. Having found from experience that impeachment is in impracticable thing, a mere scarecrow, they consider themselves secure for life; they skulk for responsibility to public opinion, the only remaining hold upon them, under a practice first introduced into England by Lord Mansfield. An opinion is huddled up in conclave (perhaps by a majority of one), delivered as if unanimous, and with the silent acquiescence of lazy or timid associates by a crafty chief judge (Marshall), who sophisticates the law to his mind by the turn of his own reasoning. A judiciary law was once reported by the Attorney-General to Congress requiring each judge to deliver his opinion seriatim and openly, and then to give it in writing to the clerk to be entered on the record. A judiciary independent of a king or executive alone is a good thing, but independence of the will of the nation is a solecism, at least in a republican government.

In a letter to Archibald Thweat, under date of January 19, 1821, Mr. Jefferson further said:

I am sensible of the inroads daily making by the Federal into the jurisdiction of its coordinate associates, the State governments. The legislative and executive branches may some time err, but elections and dependents will bring them to rights. The judiciary branch is the instrument which, working like gravity, without intermission, is to press us at last into one consolidated mass. Against this I know no one who, equally with Judge Roane himself, possesses the power and the courage to make resistance, and to him I look and have long looked as our strongest bulwark. If Congress fails to shield the States from dangers so palpable and so imminent, the States must shield themselves, and meet the invader foot to foot.

In a letter to Mr. C. Hammond, under date of August 18, 1821, Mr. Jefferson declared:

It has long, however, been my opinion, and I have never shrunk from its expression, that the germ of dissolution of our Federal Government is in the constitution of the Federal judiciary, an irresponsible body, working like gravity by night and by day, gaining a little to-day and a little to-morrow, and advancing its noiseless steps like a thief over the field of jurisdiction, until all shall be usurped from the States and the Government of all be consolidated into one. To this I am opposed, because when all governments, domestic and foreign, in little as in great things, shall be drawn to Washington as the center of all power, it will render powerless the check provided of one government on another, and will become as venal and oppressive as the Government from which we separated. It will be as in Europe, where every man must either be pike or gudgeon, hammer or anvil. Our functionaries and theirs are wares from the same workshop, made of the same material, and by the same hand. If the States look with apathy on this silent descent of their Government into the gulf which is to swallow all, we have only to weep over the human character formed uncontrollable, but by a rod of iron, and the blasphemers of man as incapable of self-government become his true historians.

In a letter to Colonel Nicholas, under date of December 11, 1821, Mr. Jefferson said:

I fear, dear sir, we are now in such another crisis, with this difference only, that the judiciary branch is alone and single handed in the present assaults on the Constitution. But its assaults are more sure and deadly as from an agent seemingly passive and unassuming. May you and your contemporaries meet them with the same determination and effect that your father and his did the alien and sedition laws, and preserve inviolate a Constitution which, cherished in all its chastity and purity, will prove in the end a blessing to all the nations of the earth.

In a letter to William T. Barry, under date of July 2, 1822, Mr. Jefferson said:

We already see the power installed for life, responsible to no authority, advancing with a noiseless and steady pace to the great object of consolidation. The foundations are already deeply laid by their decisions for the annihilation of constitutional States' rights, and the removal of every check, every counterpoise, to the engulfing power of which themselves are to make a sovereign part. If ever this vast country is brought under a single government, it will be one of the most extensive corruptions, indifferent and incapable of a wholesome care over so wide a spread of surface. This will not be borne, and you will have to choose between reformation and revolution. If I know the spirit of this country, the one or the other is inevitable. Before the canker is become inveterate, before its venom has reached so much of the body politic as to get beyond control, remedy should be applied. Let the future appointment of judges be for four or six years, and renewable by the President and Senate. This will bring their conduct at regular periods under revision and probation, and may keep them in equipoise between the General and special Government. We have erred in this point by copying England, where certainly it is a good thing to have the judges independent of the King. But we have omitted to copy their caution, also, which makes a judge removable on the address of both legislative houses. That there should be public functionaries independent of the nation, whatever be their demerit, is a solecism in a republic of the first order of absurdity and inconsistency.

In a letter to Judge Johnson, under date of March 4, 1823, Mr. Jefferson said:

I can not lay down my pen without recurring to one of the subjects of my former letter, for in truth there is no danger I apprehend so much as the consolidation of our Government by the noiseless and therefore unalarming instrumentality of the Supreme Court. * * * For in truth there is at this time more hostility to the Federal judiciary than any other organ of the Government.

In a letter to Edward Livingston, under date of March 25, 1825, Mr. Jefferson wrote:

Time and changes in the condition and constitution of society may require occasional and corresponding modifications. One single object, if your provision attains it, will entitle you to the endless gratitude of society, that of restraining judges from usurping legislation. And with no body of men is this restraint more wanting than with the judges of what is commonly called our General Government, but what I call our foreign department. They are practicing on the Constitution by inferences, analogies, and sophisms as they would an ordinary law. They do not seem aware that it is not even a Constitution formed by a single authority, and subject to a single superintendence and control, but that it is a compact of many independent powers every single one of which claims an equal right to understand it and to require its observance. However strong the cord of compact may be, there is a point of tension at which it will break. A few such doctrinal decisions as barefaced as that of the Cohens happening to bear immediately on two or three of the large States may induce them to join in arresting the march of Government and in arousing the co-States to pay some attention to what is passing to bring back the compact to its original principles or to modify it legitimately by the expressed consent of the parties themselves, and not by the usurpation of their created agents. They imagine they can lead us into a consolidate Government, while their road leads directly to dissolution. This member of the Government was at first considered as the most harmless and helpless of all its organs, but it has proved that the power of declaring what the law is ad libitum by sapping and mining slyly and without alarm the foundations of the Constitution can do what open force would not dare to attempt.

These opinions and warnings of Jefferson are very pertinent at this time. The pity is that all have not paid heed to them for the past half a century. Now, let us see what another great expounder of the Constitution has said. In a speech at Fort Hill, July 26, 1831, Mr. Calhoun said:

No one has been so hardy as to assert that Congress or the President ought to have the right or to deny that if vested finally and exclusively in either, the consequences which I have stated would not necessarily follow; but its advocates have been reconciled to the doctrine on the supposition that there is one department of the General Government which, from its peculiar organization, affords an independent tribunal through which the Government may exercise the high authority which is the subject of consideration with perfect safety to all. I yield, I trust, to few in my attachment to the judiciary department. I am fully sensible of its importance and would maintain it to the fullest extent in its constitutional powers and independence, but it is impossible for me to believe that it was ever intended by the Constitution that it should exercise the power in question, or that it is competent to do so, and if it were it would be a safe depository of the power. Its powers are judicial, and not political, and are expressly confined by the

Constitution to all cases in law and equity arising under this Constitution, the laws of the United States, and the treaties made or which shall be made under its authority, and which I have high authority in asserting excludes political questions and comprehends those only where there are parties amenable to the process of the court.

Next I will put on the witness stand no less a person than Andrew Jackson. Let us hear his view of the province and powers of the Federal judiciary while he was President.

In his veto of the bill extending the old United States Bank, President Jackson said:

The Supreme Court ought not to control the coordinate authorities of this Government. The Congress, the Executive, and the court must each for itself be guided by its own opinion of the Constitution. Each public officer who takes an oath to support the Constitution swears that he will support it as he understands it, and not as it is understood by others. It is as much the duty of the House of Representatives, of the Senate, and of the President, to decide upon the constitutionality of any bill or resolution which may be presented to them for passage or approval as it is of the supreme judges, when it may be brought before them for judicial decision. The opinion of the judges has no more authority over Congress than the opinion of Congress has over the judges; and on that point the President is independent of both. The authority of the Supreme Court must not, therefore, be permitted to control the Congress or the Executive, when acting in their respective capacities, but to have only such influence as the force of their reasoning may deserve.

Mr. President, I could quote on the same line from Benton and dozens of others of the greatest minds that this country has produced, and all to the same effect. I might also quote the resolution introduced in the House by Mr. Draper of Virginia, on February 1, 1831, and the debate on the same, looking to correcting then some of the very evils that we are now considering; but time will not now permit.

Mr. President, in this connection, while we claim that our Government is more representative than that of England, I wish to call attention to the fact that in England to-day their courts can not overrule an act of Parliament. Though a monarchy, though not a representative government in the sense that ours is supposed to be, the courts there have not the authority and do not dare to overrule an act of Parliament. The Parliament is the supreme authority to decide whether or not any act is constitutional or unconstitutional. If an act passed by Parliament is deemed unconstitutional it must be so deemed by a subsequent act of the same body. How is it here? Between the House of Representatives and the Senate, this body consisting of two men from each State in the Union, many of them the peers of any man on the Supreme Court bench, the House of Representatives representing the people from every Congressional district of the Union, there sits another small body of nine men, and that body to-day is the supreme legislative body of America.

Why do I say that? The power to overrule acts of Congress and to make laws by construction is the power to legislate. Yes; the court to-day has the supreme legislative power on cases that come before it. We had a recent example in the case of the income tax. This body and the House, both of which have within their membership as able constitutional lawyers as sit on the Supreme Court bench, passed upon that measure. They passed the income tax because they thought it was constitutional. They, who had taken oaths to support the Constitution, which oaths are as binding upon them as are those of the members of the Supreme Court or the judges of other Federal courts, decided deliberately, after due discussion and consideration, that the income tax was not only proper, was not only justifiable, was not only necessary in order to equalize taxation between the different classes of our people to make the burdens of taxation bear upon all the different classes as nearly evenly as possible, but that it was constitutional, for that is what this body decides every time it passes an act. This body decides whenever it passes an act that it is constitutional just as solemnly and deliberately as the Supreme Court can.

Yet this court, this third legislative house, elected by nobody, representing nobody, under obligations to nobody, accountable to nobody, consisting of nine men with no constituency, arrogates to itself the authority and power to decide that Congress did not know what it was doing. It decided virtually that it was bad legislation, as well as unconstitutional. It took the liberty of lecturing Congress, expressing its opinion as to the wisdom, as to the expediency, and as to the general policy of legislation of that kind.

To-day there is no way to make wealth bear its equal share of taxation under our present methods of levying taxes, due to the decision of the Supreme Court. What is our method of levying taxes to-day? Chiefly by a tariff, supplemented by internal taxes and other very small ways of raising revenue. What is a tariff? Does the tariff equalize the burdens of taxation between the rich and the poor, the high and the low? No. The tariff is, I might say, a poll tax.

In every State in this Union, so far as I know, we have two methods of raising taxes by which the burdens of taxation are equalized between property and the individual. In my State we have first the poll tax. That tax is uniform. It is the same upon the millionaire as upon the pauper. It is a uniform tax, as I say, a tax per head. What do we have in addition? Would it be fair to the people of North Carolina to levy all the taxes for the State government by a uniform tax upon the head of each citizen? It would be manifestly unjust. Then what do we do to equalize taxation? We provide for a property tax, and we were so careful in my State that the parity, to use the modern gold-bug phrase, should be maintained between the tax on property and the poll tax that we provided that the tax on $300 of property should always be the same as the poll tax. In my State we provide not only taxation per head, but then we go to a man's assets, to each man's property, and charge him such a per cent on that property for the protection which he receives from the Government. If he is a millionaire he pays in proportion to the amount of property that is protected by the State government. Is that just? Is that fair? Everybody in my State says it is, and nobody dares to say to the contrary.

If that is just in North Carolina, then why is not the same method of taxation just and proper and right and necessary in raising taxes to support the General Government? Here we have a General Government more expensive than all the State governments put together, and in raising taxes to support the General Government we raise them chiefly by a poll tax. I say poll tax, because under a tariff the poor man with ten children pays as a rule as much taxes as the rich man with one.

I think we will always have a tariff in this country. I am not in favor of wiping it out. I am not a freetrader. I would, however, have the tariff schedules changed. I would have a tariff levied so that it did not discriminate against all the rest of the country for the benefit of one section of the country. I would have a tariff for revenue with the protection coming from it—for protection for somebody always accompanies any tariff—fairly distributed. There are cases where we need protection for certain industries, and I would favor it in such cases. I would have the protection resulting from it fairly and evenly distributed between the various sections of the country and the various industries in each section. But levy a tariff however you may, it is practically a poll tax. How are we to have property owned by men of large wealth, and men of even moderate wealth, bear an equal share of the burdens of government and pay a certain per cent for the protection their property receives from the National Government?

This Congress, in its wisdom, decided that the income tax was one of the fairest, most equitable, and most just methods for doing it, and after this body and the other House so decided, after the great American people had passed upon it, after the will of the people was expressed on that question, the Supreme Court, the third legislative house, representing nobody, responsible to nobody, legislates on the question, and decides how taxation shall be regulated in this country. It decides that we shall not tax property and make it pay its fair share of the burdens of government. It does it in the face of a former decision of the same court, which decided that such a tax was constitutional. The court says it decided it unconstitutional on account of the clause in the Constitution with reference to direct taxes. The copy of the Constitution on my desk puts that part of the Constitution in brackets, and calls attention in a foot-note to the fact that that clause of the Constitution became obsolete after the passage of the fourteenth amendment; and so the American people thought and still believe. But yet this court revives that clause of the Constitution, which was intended simply to apply to the peculiar conditions of slavery, for the purpose of putting all the burdens of taxation on the poor, and leaving those with big means to go scot free—that is, to make the poor man not only pay taxes for his own slight protection, but also for the larger protection for the rich. Every man in this body knows that that clause of the Constitution relating to direct taxes was put in there as a compromise between the slaveholder and the nonslaveholding interest when the Constitution was adopted. That clause of the Constitution has been said to be by numbers of leading jurists absolutely obsolete—to have been superseded—and yet we have such an enterprising third legislative house, which has hedged about it so much authority, and allowed to grow up by traditions and customs, that it revives, as it were, a dead paragraph of the Constitution and takes it as a weapon to strike down this method of taxing property equitably and justly.

Now, we must suffer this outrage or we must amend the Constitution, which is a very slow and difficult process. On the 27th of last December I introduced the following:

Joint resolution to amend the Constitution of the United States relating to direct taxes.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following proposed amendment to the Constitution of the United States shall be submitted to the legislatures of the several States for ratification or rejection, to wit:

"ARTICLE XVI.

"The provisions of the Constitution of the United States relating to direct taxes, and the apportionment thereof among the several States in proportion to the census enumeration, shall not apply to income taxes; but the Congress shall have power to lay and collect taxes on all incomes regardless of the source from which the income is derived or acquired: *Provided, however*, That all income taxes which the Congress may lay and collect shall be uniform throughout the United States."

Mr. President, this amendment must be acted upon by Congress and submitted to the several States and secure a three-fourths ratification from them before the outrageous decision of the court can be corrected, or we must hold a constitutional convention. Hence the court has practically defeated the will of the people, and at the same time committed a great wrong.

But let us return to the income-tax law that was passed by Congress. It was, I admit, only a cowardly makeshift for an income-tax law. It was not a graduated income-tax law, as it should have been, nor did it extend to all the classes of incomes that should be taxed. But it was a step in the right direction. How any fair-minded, honest jurist could object to it, much less declare it unconstitutional, is beyond my comprehension.

The income tax did not attempt to tax property that did not yield a revenue. It did not attempt to tax property like some we have in our State, which makes a man land poor. We have men owning 10,000 acres of land in my State who would be richer if they did not have it. They could scarcely give it away if they tried. They are not making enough from it to pay taxes on it. So the income tax did not propose to tax property that did not yield a revenue. But it related to property that yielded a good revenue and only took a small percentage of the profits that came from such handsome dividend-yielding property, and in this connection I may say it was property that has largely been accumulated from special privileges granted by these very bodies, property and incomes due to discrimination of law against the rest of the country in favor of those who are able to pay such a tax, and those who would only be called upon to pay it for the simple reason that they have property that yields them a magnificent and princely income. Yet this third legislative house, representing nobody, responsible to nobody, with no constituency, arrogated to itself the supreme power to nullify the action of the people's representatives, to nullify the Constitution, for that is what it did, in order to protect those who have princely incomes.

Mr. President, we have an example like this before us; we have before us thousands of examples almost as significant through the last hundred years; we have the example of the case that this bill grew out of, where an American citizen, Mr. Debs, was arrested, tried by the court, and imprisoned without even a hearing before twelve of his peers. Yes, the man was tried by a judge simply, and put in prison without law and in defiance of the constitutional rights of an American citizen. With that example of the Constitution practically overridden in depriving a man of the right to trial by jury, here comes a bill from one of the most important committees of this body, proposing to legalize it. I can not believe but that it was an oversight on the part of the committee. I can not believe but that the committee simply did not notice that it had failed to provide for trial by jury. I can not believe that that committee, in view of the hundred years of dangerous history with Federal courts, could deliberately have brought here a bill to give that court more power, to give to the branches of the Federal judiciary more power, even to the monstrous extent of giving to them the power to imprison an American citizen without a hearing before a jury.

How much further do we have to go until we get back to the period of despotism where the king issues his order and has Mr. A thrown into a dungeon after a farce of a trial before a judge, who is one of his (the king's) puppets? Does not the history of despotisms in the Old World teem with such tyranny, and was not this Government established in defiance of such methods in the Old World, and to give to every man a haven of refuge, as it were, who sought freedom in religious opinions, freedom in political opinions, who sought a place where the free and brave could have such powers and such liberties as the God of heaven intended every upright citizen to have who would obey the decent laws of society? This Government was formed as an asylum, as it were, as a last gathering place, as it were, for men whose souls rebelled against such tyranny and such injustice.

But here is this Government, only a little over a hundred years old, dropping down into the grooves of despotism, putting the liberty of every American citizen at the mercy of a man who is not even elected by the people and who does not have to account to the people for his action. It is monstrous. It brings up the last warning which Thomas Jefferson gave to us that if we hope to preserve our liberties and hope to prevent the courts from arrogating to themselves the power to make this country a despotism, it would be necessary for us to hold a constitutional convention at least every twenty years. He said it was not safe or right or prudent to allow one generation to make a constitution that should stand ironclad for the next, with all the usurpation of power that might grow up under it to pervert it and twist it; that it would be better and safer for the people in their supreme legislative assembly—a constitutional convention—to come together to correct their landmarks, to strike down the hydra-headed monster, despotism, wherever he stuck up his head in the Constitution, and to make the Constitution just; to add to it, if need be, such provisions as were necessary to meet the progress of events; to add to it, if necessary, such amendments and such provisions as were essential to meet new conditions and the developments of society.

George Mason, who seems to have been, next to Thomas Jefferson, one of the clearest-headed men among the founders of the Constitution, wrote a paper warning the people of Virginia not to adopt the Constitution as it stood.

I will now quote from that great statesman, the author of the Virginia bill of rights, from which Mr. Jefferson drew inspiration for the Declaration of Independence. Mr. Mason was a member of the constitutional convention which framed our National Constitution, and refused to give it his support when adopted by the convention. He opposed its ratification by the State of Virginia with great power and intelligence, and in spite of Washington, Randolph, and others came very near carrying his point. During this contest he gave out his reasons in detail against the adoption by the State of Virginia of the Constitution. They were designated at that time as Mason's objections to the Constitution. I will say further that the first ten amendments to the Constitution are largely based upon Mr. Mason's objections. The fourth objection of Mr. Mason to the ratification of the Constitution relates to the judiciary branch of the Government, and is as follows:

> The judiciary of the United States is so constructed and extended as to absorb and destroy the judiciaries of the several States, thereby rendering laws as tedious, intricate, and expansive, and justice as unattainable by a great part of the community as in England, and enabling the rich to oppress and ruin the poor.

Thus we see that Mr. Mason took the position that the Constitution as it stood did not guarantee the rights of the people sufficiently against the encroachments of the Federal judiciary. He warned the people that the Constitution as it stood, he feared, did not sufficiently provide against what might grow into court usurpation, and out of his objections to the Constitution largely grew the first ten amendments, advocated by Jefferson and Mason.

With wonderful foresight he also saw how the Federal judiciary would overshadow and encroach on, if not destroy, the authority of the State courts. And to-day we see this dangerous work in progress. Under the clause of the Constitution relating to interstate commerce the Federal courts have managed to strip the State courts of the power to determine causes between a great railroad corporation and a citizen of said State, or even the State itself. Mr. President, I believe that the States still have a remedy in this matter in spite of the Federal judges. If a railroad is not willing to submit actions to a State court where they operate and receive the protection and favor of the State legislature, then the State can withhold its favor and not allow such corporations to operate in the State. But, Mr. President, if a State should attempt to exercise this last right left it in such matters we do not know but that the Supreme Court would try to have the State arrested for contempt and ousted from the Union without a trial by jury.

I think, Mr. President, that Congress should by legislative enactment, if possible, define and limit the powers of the Supreme and other Federal courts to simply the powers that Jefferson and the other expounders of the Constitution say that they have under that instrument. But, Mr. President, we are to-day in this deplorable plight. Some of the ablest jurists we have tell us that by legislative enactment we can strip the court of some of the powers it has assumed and taken to itself. But suppose this body were to-day to pass a bill limiting the powers of the Supreme Court and pointing out the facts that it has assumed powers not granted to it by the Constitution; suppose Congress should pass such a measure, and suppose the President should sign it, and be merciful enough not to use his veto power, another relic of monarchy, what would happen? Your third legislative house would sit quietly over there, and when you had passed your law, it, with nine men, representing nobody, responsible to nobody, would coolly decide that your act was unconstitutional, because it limited its powers.

There you are bottled, the American Congress bottled, with the Supreme Court holding down the stopper. What can you do? I see but one thing that we can do to correct the evils that now exist by law or by interpretations of courts, and I believe we will have to meet it soon. What is it? I believe it will be necessary to call a constitutional convention through the State legislatures to protect the people of this country against the aggressions of the courts. That is the only way it is possible if the court sees fit to disapprove of what you do. But that is in the future. While we may have to do that, and I think the quicker the better, yet certainly we do not wish to pass any law giving the courts more power than they have. We need a convention to strip and bring them down to where the Constitution and Thomas Jefferson said they should stand. But until we can do that certainly the representatives of the people can never, between their consciences and their God, in duty to their oaths to the Constitution and their pledges to the people, vote for any measure which deliberately increases the powers which the courts already have.

Therefore, we must pass this amendment which I have offered, which guarantees to every American citizen a trial by jury.

The VICE-PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from North Carolina [Mr. BUTLER].

Mr. HILL. I desire to suggest to the Senator from North Carolina that he withdraw his amendment for the present and allow a vote to be had on the amendment submitted by the Senator from Utah [Mr. CANNON], which presents precisely the general question involved.

Mr. BUTLER. What is the amendment submitted by the Senator from Utah?

The VICE-PRESIDENT. The amendment of the Senator from Utah will be stated.

The SECRETARY. In line 18, section 4, it is proposed to strike out the words "in his discretion," and in line 19 to strike out the word "may" and insert the word "shall"; so as to read:

But such trial shall be by the court, or upon the application of accused a trial by jury shall be had as in any criminal case.

Mr. BUTLER. I accept the amendment as an amendment to mine.

The VICE-PRESIDENT. The amendment is accepted. The question recurs on agreeing to the amendment as modified.

Mr. MITCHELL of Oregon. As I understand the effect of this amendment, it is to take from the court the discretion as to a jury trial and to provide an appeal in all cases of indirect contempts. I do not understand the amendment goes to the extent of providing for a jury trial in cases of direct contempts.

Mr. HILL. Direct contempts are not interfered with in any way. The control of that matter will, of course, remain the same as it is now—absolutely at the discretion of the court. It is only as to contempts committed outside of the court, called indirect contempts. Direct contempts may still be punished by the judge the same as formerly.

Mr. MITCHELL of Oregon. The court will, in direct contempts, have exclusive power to try and fix the punishment?

Mr. HILL. The court will still have absolute power in such cases.

Mr. PLATT. Mr. President, I want to call attention not to this bill particularly, only incidentally, perhaps, but I want to call attention to the method of legislating in the closing hours of a session. Here is a bill confessedly of great importance. It is a bill which requires very careful consideration. I desire to preface what I have to say by the distinct declaration that I do not suggest the absence of a quorum of this body; but this bill is being considered, so far as it is considered, by perhaps 20 Senators at times, 15 Senators at times, and there have been times during the discussion this morning when there have not been 15 Senators in their seats; yet we are apparently acting upon a measure of probably as much importance as any matter which has been brought before the Senate and House of Representatives. The measure is regarded as important by its friends. It is of such importance that we had a dispatch here yesterday stating that 800,000 railroad employees of the country were watching with the most intense interest the proceedings of the Senate with relation to this bill.

Well, Mr. President, if 800,000 railroad employees in the country are watching the proceedings of the Senate with intense interest in relation to this bill, they are doing a great deal more than Senators are. Probably half, or nearly half, of the Senators have gone home, or gone to political conventions, or gone elsewhere. I suppose there may be a bare quorum of Senators in the city, but of those a good many are interested in appropriation bills, a good many are packing up their papers to go home, seats are empty, and yet the Senator from New York insists upon considering, under such circumstances and at such a time, a most important measure. Whatever the opinion of Senators may be with reference to the particular bill before us, it is certainly a most important measure; that is agreed to by all, and I want to appeal to the Senator from New York that he do not press for a vote at this time, under these circumstances, upon such a measure as this. It is manifest that the bill can not pass the House of Representatives at this session; it is manifest that if anybody chooses to ask for a vote of the Senate, which shall represent a quorum of the Senate, the bill can not pass this body. It is also manifest that no attention is being paid to this bill by over a half dozen Senators, nor has there been from the time it has been taken up.

I felt, Mr. President, that perhaps it was quite as well to call attention to the practice and method of legislating in the last hours of a session. I think if there are any bills which have been passed by Congress which are open to criticism, it will be found usually that they have passed in the last days or, perhaps, in the last night of the session, when Senators were tired, when members of the House of Representatives were tired, when many of them had gone, when no point of a quorum was being made, and there were not more than ten or fifteen Senators in their seats, and even they inattentive under the circumstances.

Now, I protest, Mr. President, against this kind of legislation on important matters under such circumstances. If there were a great emergency, if it were absolutely necessary in order to the protection of the people that a measure should be passed, that would be one thing; but with another session of Congress to meet in December, and with no great pressing necessity that the Senate should act without consideration upon an important measure of this kind, I do protest against its being pressed to a vote here.

The power to punish for contempt has existed, Mr. President, from earliest times. I am not going to discuss this bill, or the propriety of it, or the wisdom of passing it, or question whether the provisions of it are such as they ought to be, if a bill is to be passed. I am not going to discuss it in a Senate of perhaps 20 people, most of whom are engaged in conversation among themselves so loud that it is almost impossible for me to hear myself talk. I am not going discuss a measure of this importance under such circumstances.

As a member of the Judiciary Committee I did not agree to this report—I desire to say that—not because I am of opinion that the law relating to procedure in contempt cases should not receive the attention of the legislative branch, but because I think this bill is entirely crude, that it has not had bestowed upon it the care and the study which ought to be bestowed upon a bill which attempts to revolutionize the entire practice in equity proceedings in the country. If I had a Senate here that would listen, I should be glad to discuss the bill, but what I do this morning is simply to protest against the attempt to pass a bill of this importance, of this magnitude, under such circumstances.

Now, I will allude to only one thing in the bill as showing how much it needs be reconsidered. Admitting, of course, for the argument, and admitting, I think, fully, that there should be some bill relating to the regulation of proceedings in contempt cases passed, if this bill were to pass and become a law, and a juror or a witness—I will say witness—where a civil case is on trial in a circuit court or a criminal case is on trial in a district court, refused to obey the summons and was brought into court, he would be guilty of an indirect contempt, and if the court undertook to fine him for refusing to obey the summons and absenting himself as a witness on the trial of that case he could demand a jury trial. If the amendment should pass, and, whether he demanded a jury trial or not, if he were fined $10 he could appeal that case to the Supreme Court of the United States. Well, Mr. President, the very statement that I have made, which can not be controverted and will not be controverted, is enough to show that this bill should not pass.

We have limited the jurisdiction of the Supreme Court of the United States, and there can not be an appeal in a capital case from the judgment of a circuit court or a district court to the Supreme Court of the United States. That has to be appealed or go by writ of error to the circuit court of appeals, and yet it is proposed here to give a witness who may disobey the summons of a court or the direction of the judge to appear in court, when the court undertakes to punish him as for contempt, the right of trial by jury and an appeal to the Supreme Court of the United States, when we have just listened to a half hour's denunciation of the Supreme Court of the United States by a Senator who desires to have a bill with that regulation in it passed.

Mr. President, have I not said enough to show that we ought not to act in this matter? There is probably no subject relating to the jurisprudence of this country which is any more intricate than the practice relating to contempts or the law of contempts. There has been practically no attempt at codification of the decisions relative to contempts of court. The trouble with this bill is that it sweeps all contempts, except those which are committed in the presence of the court or so near the court as to interfere with the administration of justice, into the catalogue of indirect contempts, and it makes no distinction between those alleged contempts, which have been the subject of discussion here, and contempts of a minor and lesser character. It might be admitted that the proceedings in the contempts which are complained of ought to be regulated. I do not think that a judge ought to have unlimited and unrestrained power to punish for contempts in such cases as have excited the attention of the country; but you can not have a court, Mr. President, without the power of the court to punish for contempt in certain cases which are not included within the definition in this bill of direct contempts, and a very large proportion of the equity practice of this country depends upon the power of the court to enforce its decrees.

Take the ordinary case of a court which requires a party to a proceeding to pay over money, to deposit money in court during the progress of the trial upon a pending petition. A person may have money in his hands who is utterly irresponsible. The court in an equity case issues an order that he shall pay that money into court pending the progress of the case. He says, "I will not do it." The court brings him in and attempts to fine him for contempt. He says, "I want a jury trial"; and he is entitled to a jury trial if it is an equity case. Then, when he has been convicted by the jury of being in contempt of court, he says, "I

propose to appeal this case to the Supreme Court of the United States." That will stay the execution, and he goes on and keeps the money.

Mr. CANNON. Will the Senator yield to me for a question?

Mr. PLATT. Yes.

Mr. CANNON. Would not the case cited by the Senator from Connecticut be a case of direct contempt?

Mr. PLATT. Not at all, under this bill; and that is the trouble about it. The bill is not understood. What I complain of is that there ought to be a different definition in this bill of direct, indirect, and constructive contempts.

Mr. CANNON. The Senator cited the case of an individual refusing in the presence of the court to obey an order of the court.

Mr. PLATT. Oh, no; not at all.

Mr. CANNON. I understood that to be the Senator's language.

Mr. PLATT. Oh, no. An order to pay money into court is not necessarily made when the person is in court.

Mr. CANNON. The Senator used the language, "If a person was brought before the court and refused to pay the money."

Mr. PLATT. No.

Mr. HILL. That would be an offense in court for which a person could be punished as a direct contempt.

Mr. PLATT. I may have been unfortunate in some of the language I have used; I think the RECORD, however, will show that I did not make use of that language. But this is the language of the bill:

That contempts of court are divided into two classes, direct and indirect, and shall be proceeded against only as hereinafter prescribed.

Now, these are direct contempts:

That contempts committed during the sitting of the court or of a judge at chambers, in its or his presence or so near thereto as to obstruct the administration of justice, are direct contempts. All others are indirect contempts.

Mr. MITCHELL of Oregon. Will the Senator allow me?

Mr. PLATT. Yes.

Mr. MITCHELL of Oregon. Take a case like this: Suppose a juror is summoned to be in court on a certain day to attend to jury duty and he fails to go. A writ is issued and he is brought in for contempt of court for failing to appear as a juror. That would be an indirect contempt, I take it, under this bill, and he would be entitled under the proposed amendment to trial by jury.

Mr. PLATT. Yes, and an appeal to the Supreme Court of the United States.

Mr. MITCHELL of Oregon. Also to an appeal to the Supreme Court of the United States. It seems to me that would be a dangerous obstruction of the administration of justice.

Mr. PLATT. The passage of this bill in its present form is not only a revolution in the equity practice of this country, but is practically abolishing the chancery practice of our courts. I am not complaining at all of the principle of the bill. I am not asserting that there should not be regulations of the practice in the matter of contempts. Our statutes on the subject acknowledge the right of Congress to regulate proceedings in contempt cases. I will read that section of the Revised Statutes:

SEC. 725. The said courts shall have power to impose and administer all necessary oaths, and to punish, by fine or imprisonment, at the discretion of the court, contempts of their authority: *Provided*, That such power to punish contempts shall not be construed to extend to any cases except the misbehavior of any person in their presence, or so near thereto as to obstruct the administration of justice, the misbehavior of any of the officers of said courts in their official transactions, and the disobedience or resistance by any such officer, or by any party, juror, witness, or other person, to any lawful writ, process, order, rule, decree, or command of the said courts.

This bill proposes to put into the list of indirect contempts "the misbehavior of any of the officers of said courts in their official transactions, and the disobedience or resistance by any such officer, or by any party, juror, witness, or other person, to any lawful writ, process, order, rule, decree, or command of the said courts." These are all swept into indirect contempts. I say, Mr. President, that we can not proceed with the equity jurisdiction of our courts without certainly the power to punish officers for misbehavior in their official transactions, and certainly jurors and witnesses for disobedience or resistance to the orders of the court, nor indeed without the power to enforce by fine and imprisonment the refusal to obey a large proportion of the orders which are made by equity courts.

The trouble about this thing is that a contention has arisen in this country over an extreme exercise of this authority, about which there is very intense feeling, and because of this Senators are ready to go and strike down the whole equity jurisprudence of the country.

I made a reference a moment ago to our having limited the jurisdiction of the Supreme Court of the United States. If I understand, and am correct in my recollection, to entitle a person to go to the Supreme Court on a money question the amount involved must be $5,000, or it must be a case in which a constitutional question arises on a law of Congress, or where a question may be certified up from the court of appeals.

In criminal matters we have taken jurisdiction entirely away from the Supreme Court of the United States, except in regard to criminal cases which come up from the Territories for offenses against United States laws. But a case can not come from a State or from a United States district or circuit court in a State to the Supreme Court of the United States even in a capital case. Those cases must go to the court of appeals. But that is not sufficient, apparently, for the purposes of this bill. An appeal from the judgment rendered in a contempt case does not by this bill go to the court of appeals, where a murder case must go, where all cases of money damage less than $5,000 in value must go from the district or circuit court, but must be taken directly to the Supreme Court of the United States. Why? Apparently, if this bill is passed, the Supreme Court of the United States will not have a great deal to do except to attend to appeals in contempt cases; and, as I was saying a moment ago, a very large proportion of the business transacted——

Mr. HILL. Will the Senator allow me a moment?

The PRESIDING OFFICER (Mr. BLANCHARD in the chair). Does the Senator from Connecticut yield to the Senator from New York?

Mr. PLATT. Yes, sir.

Mr. HILL. The question which the Senator suggests as to whether an appeal in cases of conviction of indirect contempts should be taken to the circuit court of appeals direct, and not elsewhere, or should go directly to the Supreme Court of the United States was very carefully considered. Upon that question I conferred with a distinguished member of the circuit court who had had before him some contempt cases of an important character, and he gave it as his opinion to me that it was better that those cases should go directly to the Supreme Court, otherwise the various circuit courts of appeals throughout the United States would establish different decisions upon the question as to what constitutes a contempt, and that it was wiser to take such cases directly to the court of appeals. I do not care about giving the name of the gentleman; but he thought it would be better and wiser in such cases, as a rule, to have the appeal in the first instance go to the highest court, in order that that court might lay down the law as to what constitutes contempt. It was in pursuance, among others, of the suggestion made by this very able judge that we adopted that course. I also submitted it to other judges, who coincided in that opinion. For that reason the course was taken.

Mr. PLATT. Now, I venture to guess—of course I can not assert—that the judge of the court of appeals who advised that the appeal should be taken to the Supreme Court of the United States did not understand the scope of the bill. He did not understand that a witness or a juror who refused to obey the order of the court and was fined for contempt would be entitled under the bill to appeal to the Supreme Court of the United States. I venture to guess that the opinion which was rendered to the Senator from New York upon this subject by the judge of the circuit court or the circuit court of appeals was rendered without knowing what the bill was, and that no one will be more surprised than he when he learns that the Senator from New York has cited him as authority for supposing it was better to appeal a case where there was a ten-dollar fine for contempt to the Supreme Court of the United States than to the circuit court of appeals.

Mr. HILL. I desire to say to the Senator from Connecticut that the judge referred to will not be surprised about it. He had this bill and carefully examined it. I had several consultations with him in regard to it, and upon that very point he was emphatic.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CHAPELL, one of its clerks, announced that the House had passed the bill (S. 1306) to authorize and encourage the holding of a transmissisippi exposition at the city of Omaha, in the State of Nebraska, in the year 1898, and making an appropriation therefor, with an amendment in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

A bill (H. R. 180) to make the city of Erie, Pa., a port of immediate transportion;

A bill (H. R. 7338) for the relief of William H. Scofield, Jacob Brady, James Ketcham, Annie Booth, as administratrix of the goods, chattels, and credits of George W. Booth, deceased, Wilson P. Billar, Ezra L. Waterhouse, Moses C. Bell, George W. Byles, and George A. Scofield;

A bill (H. R. 9123) to prevent forest fires on the public domain; and

A bill (H. R. 9345) to enable certain persons in the State of Mississippi to procure title to public lands.

TRANSMISSISSIPPI INTERNATIONAL EXPOSITION.

Mr. ALLEN. I ask the Chair to lay before the Senate the amendment of the House of Representatives to Senate bill 1306; and I desire to ask unanimous consent that the Senate concur in the amendment made by the House of Representatives.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1306) to authorize and encourage the holding of a transmississippi and international exposition at the city of Omaha, in the State of Nebraska, in the year 1898; which was, on page 5, line 17, after the word "dollars," to insert:

Provided, That no liability against the Government shall be incurred, and no expenditure of money under this act shall be made, until the officers of said exposition shall have furnished the Secretary of the Treasury proofs to his satisfaction that there has been obtained by said exposition corporation subscriptions of stock in good faith, contributions, donations, or appropriations from all sources for the purposes of said exposition a sum aggregating not less than $250,000.

Mr. ALLEN. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

PORT OF ERIE, PA.

Mr. CAMERON. I ask the Senate to take up the bill (H. R. 180) to make the city of Erie, Pa., a port of immediate transportation.

The PRESIDING OFFICER. The Senator from Pennsylvania asks unanimous consent to consider at this time the bill which he has indicated.

Mr. HILL. Without prejudice to the pending bill, it is understood.

Mr. CAMERON. The bill will not lead to debate.

There being no objection, the bill was read twice and considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PAY OF LETTER CARRIERS.

Mr. MITCHELL of Oregon. I ask the Senator from New York to allow the pending bill to be laid aside temporarily for a few moments, to allow me to call up a small bill of only seven lines.

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Oregon?

Mr. HILL. The Senator from Connecticut has the floor.

Mr. MITCHELL of Oregon. I ask the Senator from Connecticut to yield to me. It is a small bill of only seven lines.

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from Oregon?

Mr. PLATT. So far as I am concerned, I will yield. I feel, however, that I am rather under the direction of the Senator from New York.

Mr. MITCHELL of Oregon. I am much obliged to both the Senator from New York and the Senator from Connecticut. I ask the unanimous consent of the Senate to proceed to the consideration of the bill (S. 3058) to increase the pay of letter carriers.

Mr. MILLS. I think that is too large a bill to be considered now. I object to the consideration of the bill.

Mr. MITCHELL of Oregon. I hope the Senator from Texas will not object.

Mr. MILLS. It is a bill of too much importance to be pressed during the last hours of the session.

The PRESIDING OFFICER. The Senator from Texas objects.

Mr. MITCHELL of Oregon. I think the Senator from Texas will not insist on his objection.

Mr. MILLS. Yes, I will.

Mr. PETTIGREW. Mr. President——

The PRESIDING OFFICER. The Senator from Oregon has the floor. The Chair understands the Senator from Texas to object to the consideration of the bill.

Mr. MITCHELL of Oregon. If the Senator from Texas insists upon his objection, of course I can not proceed, but I appeal to the Senator not to object. This bill was reported from the committee of the Senate and a similar bill was reported also in the House.

Mr. MILLS. How much money will it take?

Mr. MITCHELL of Oregon. It will take considerable money, but that is not the most important question. The question is whether we should not do justice by these letter carriers, who are the hardest worked class of people in this country in the public service and get the least pay in proportion.

Mr. MILLS. What committee reported the bill?

Mr. MITCHELL of Oregon. The Committee on Post-Offices and Post-Roads. It was also reported in the House and is on the Calendar there. I hope the Senator from Texas will withdraw his objection.

Mr. HARRIS. To what extent are the salaries increased?

Mr. MITCHELL of Oregon. It advances them about $100 each class; there are three classes. That is all. It is a very small increase.

Mr. MILLS. What will the lowest class get, $800?

Mr. MITCHELL of Oregon. Six hundred dollars.

Mr. MILLS. And then up to $1,000?

Mr. MITCHELL of Oregon. Six hundred dollars, $800, and $1,000, and up to $1,200. I hope the Senator from Texas will withdraw his objection.

Mr. MILLS. I object, Mr. President.

The PRESIDING OFFICER. The Senator from Texas objects to the present consideration of the bill.

BREEDING OF FOXES IN ALASKA.

Mr. PETTIGREW. I ask unanimous consent for the present consideration of Senate bill 2555.

The PRESIDING OFFICER. Does the Senator from Connecticut, who is entitled to the floor, yield to the Senator from South Dakota?

Mr. PLATT. I have no objection.

Mr. HILL. What is the nature of the bill the Senator from South Dakota desires to have considered?

The PRESIDING OFFICER. The bill will be read for the information of the Senate.

Mr. PLATT. I desire to state that I have no objection to yielding for the passage of bills that are important and do not lead to discussion. I feel, however, that I am somewhat under the direction of the Senator from New York, and that he is the one who should be asked to yield.

Mr. MITCHELL of Oregon. I object to the passage of any bill until we dispose of the pending bill.

The PRESIDING OFFICER. The Senator from Oregon interposes an objection.

Mr. PETTIGREW. I will say in regard to the bill I wish to call up that it simply gives authority to the Secretary of the Treasury to lease certain islands in Alaska for the raising of foxes. Some of our citizens several years ago occupied the islands and now have a large number of foxes upon them. They find that they are interfered with by poachers, who kill their property and carry it away. The islands named in the bill are not occupied. Then it provides that other islands may be leased for the same purpose, under the direction of the Secretary of the Treasury. No one lives upon the islands. It interferes with no rights and conveys no title. It seems to me there ought to be no objection to the passage of this measure. I hope the Senator from Oregon will withdraw his objection.

Mr. MITCHELL of Oregon. I withdraw it if the bill does not lead to debate.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Dakota?

There being no objection, the bill (S. 2555) to authorize the Secretary of the Treasury to issue leases of certain islands in Alaska for the breeding of foxes was considered as in Committee of the Whole.

The bill was reported from the Committee on Public Lands with amendments.

The first amendment was, in line 3, after the word "That," to insert "for the purpose of encouraging the propagation of the blue and silver fox"; so as to read:

That for the purpose of encouraging the propagation of the blue and silver fox the Secretary of the Treasury be, and he is hereby, authorized to issue leases to the islands of North Semidi, South Semidi, Ukomok, Long Island, Little Koniushi, Pearl Island, Carlsons Island, Little Naked Island, and Marmot Island, in Alaska, for a period not exceeding twenty years, for the purpose of breeding and domesticating blue and silver foxes; and he may issue leases of such other islands in Alaska for this purpose as may seem, in his opinion, to be in accordance with the public interest; all such leases to be held under such regulations as he may prescribe.

The amendment was agreed to.

The next amendment was to add at the end of the bill the following proviso:

Provided, That persons actually engaged in caring for and domesticating such foxes on any of said islands shall be accorded the preference right to lease the island or occupy the same under such rules and regulations as the Secretary of the Treasury may prescribe, and such lessee shall have the privilege of killing the foxes and disposing of their furs, subject to the rules and regulations aforesaid.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PAY OF LETTER CARRIERS.

Mr. MILLS. I withdraw the objection I interposed to the bill called up by the Senator from Oregon. It seems that he has his heart set on its passage.

Mr. MITCHELL of Oregon. I am obliged to the Senator from Texas. Then I ask that the bill may be considered at this time.

The PRESIDING OFFICER. The Senator from Oregon asks unanimous consent for the present consideration of a bill, which will be stated.

Mr. HILL. Without prejudice to the pending bill?

Mr. MITCHELL of Oregon. Oh, certainly.

The Secretary read the bill (S. 3058) to increase the pay of letter carriers; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration. It provides

that after June 30, 1896, the pay of letter carriers in cities of more than 75,000 population for the first year of service shall be $600; for the second year of service shall be $800; for the third year of service shall be $1,000; for the fourth year of service and thereafter shall be $1,200. And after June 30, 1896, the pay of letter carriers in cities of a population of under 75,000 for the first year of service shall be $600; for the second year of service, $800; for the third year of service and thereafter, $1,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the following bills:

A bill (S. 261) for the relief of Arthur P. Selby;

A bill (S. 1011) for the relief of Capt. James Regan, United States Army;

A bill (S. 2943) to authorize the construction of a bridge across the Warrior River by the Mobile and Ohio Railroad Company;

A bill (S. 2944) to authorize the construction of a bridge across the Cahaba River, in Bibb County, Ala., by the Mobile and Ohio Railroad Company; and

A bill (S. 2945) to amend an act approved August 6, 1888, entitled "An act to authorize the construction of a bridge across the Alabama River."

The message also announced that the House had passed a bill (H. R. 1256) for the relief of Henry A. Webb; in which it requested the concurrence of the Senate.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. PRUDEN, one of his secretaries, announced that the President had on the 9th instant approved and signed the following acts:

An act (S. 1189) granting a pension to Eliza Sandford; and

An act (S. 2022) to amend an act entitled "An act to provide for the protection of the salmon fisheries of Alaska."

The message also announced that the President of the United States had on this day approved and signed the following acts:

An act (S. 2859) changing the time for holding circuit court of the United States at Hartford, in the district of Connecticut;

An act (S. 2928) to extend the routes of the Eckington and Soldiers' Home Railway Company and of the Belt Railway Company of the District of Columbia, and for other purposes; and

An act (S. 2978) to provide an American register for the steamer *Menemsha*.

CONTEMPTS OF COURT.

Mr. HILL. Mr. President, I must insist that the debate shall proceed upon the contempts bill.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2984) in relation to contempts of court.

Mr. PLATT. Mr. President, I do not think there could have been any better illustration of the point I made against attempting to consider legislation of the importance of this measure relating to the proceedings in case of contempt than what has taken place in the Senate during the last ten minutes, I might say what is taking place now, where Senators are talking so loud around me that I can not be heard.

The PRESIDING OFFICER. The Senate will be in order. Senators will please suspend audible conversation.

Mr. PLATT. For the information of the Senate—for I do not think Senators know what has been done in the last few minutes by my yielding goodnaturedly to Senators who desired to pass bills—I will state that we have authorized the lease of some islands up in Alaska for the raising of foxes—blue foxes and silver foxes; we have passed a bill to make Erie a subport of entry, and we have increased the pay of letter carriers as far as the Senate is concerned, thereby taking about $1,000,000 annually from the Treasury of the United States. Now, I venture to say that not ten persons in the Senate knew until I made that statement what had been done in the Senate during the last few minutes; and I think none of them scarcely know that up to that time we were discussing one of the most important questions that has come before Congress and one of the most important questions relating to the administration of our Government.

The PRESIDING OFFICER. The Senator from Connecticut will suspend until order is restored in the Chamber.

Mr. MITCHELL of Oregon (at 2 o'clock p. m.). What is the unfinished business?

The PRESIDING OFFICER. The pending bill. The Senator from Connecticut is recognized.

Mr. MITCHELL of Oregon. I understood that the immigration bill is the unfinished business.

The PRESIDING OFFICER. The Chair understands that the measure now under discussion is the unfinished business.

Mr. MITCHELL of Oregon. When, may I inquire, was the immigration bill displaced? It was certainly made the unfinished business some days ago.

The PRESIDING OFFICER. The Chair will cause the matter to be looked up.

Mr. HILL. The RECORD shows that with the assent of the Senator from New Hampshire [Mr. CHANDLER] that bill was displaced and this bill taken up.

Mr. MITCHELL of Oregon. If this bill was taken up after 2 o'clock, then it would have the effect of displacing the immigration bill.

The PRESIDING OFFICER. The Chair will have the RECORD read.

Mr. HILL. I trust that the Senator, after having been allowed to secure the passage of a million-dollar bill, will not now raise a technical question against the contempts bill.

Mr. MITCHELL of Oregon. Not at all.

The PRESIDING OFFICER. The Secretary will read from the RECORD.

The Secretary read as follows:

Mr. HILL. I move that the Senate proceed to the consideration of the bill (S. 2984) in relation to contempts of court.

The motion was agreed to.

Mr. HILL. Mr. President——

Mr. MITCHELL of Oregon. Will the Senator from New York yield to me a moment?

Mr. HILL. Yes, sir.—*Congressional Record*, June 9, page 6320.

Mr. HILL. I always have to yield to the Senator from Oregon.

Mr. HARRIS. At what hour was that motion made?

Mr. MITCHELL of Oregon. Was the motion made before or after 2 o'clock?

Mr. HARRIS. It was made after 2 o'clock, I understand.

The PRESIDING OFFICER. After 2 o'clock.

Mr. MITCHELL of Oregon. Then the effect would be to displace the immigration bill.

Mr. HARRIS. Unquestionably.

Mr. HILL. The immigration bill is not expected to be passed. The author of it has gone away.

Mr. CULLOM. The Calendar of to-day indicates that the immigration bill is the unfinished business. I know nothing more about it than that.

The PRESIDING OFFICER. The Senator from Connecticut will proceed.

Mr. PLATT. Mr. President, this new interruption of my remarks being over, I trust that I may be able to draw the attention of the few Senators who have thought it their duty to attend the session of the Senate to-day to the bill which was under discussion and to the point which I was making, that a bill of this character ought not to be pressed to a vote under such circumstances. If my recollection serves me through the interval which has elapsed since I was addressing the Senate on this subject, I had adverted to the fact that we had limited the Supreme Court of the United States in its jurisdiction necessarily and properly to cases involving $5,000 value, and to those involving constitutional questions or the construction of some statute law of the United States, and that in criminal cases we had taken away from them entirely their jurisdiction to hear and review the decisions of the lower courts, even in capital cases. And yet here is a bill which proposes to allow an appeal from a district court or a circuit court anywhere in the United States upon a five-dollar judgment of that court inflicted as a punishment for contempt.

The Senator from New York interrupted me to say that he had the opinion of some judge of the circuit court or circuit court of appeals that that is where the appeal ought to go rather than to the circuit court of appeals. If that judge understood what this bill is, the very fact that he thought an appeal in a five-dollar punishment for contempt of a circuit court or district court of the United States should be taken to the Supreme Court of the United States is perhaps an argument why it should not be taken to the circuit court of appeals. I am surprised that in his zeal to pass this bill any Senator should stand here and attempt to defend the provisions of the bill so far as they relate to practice in our courts. The difficulty about it I was proceeding to state. There has been a tendency in courts of late to extend the power of punishing for contempts. It has been carried to a very great length, and some of the recent cases alluded to by the Senator from Nebraska [Mr. ALLEN] yesterday, and the Senator from Kansas [Mr. PEFFER] to-day, have so far excited the attention of the country that it has been felt that there should be some limitation upon the power of the circuit or district courts of the United States to inflict punishment in such cases, and in the zeal to accomplish that purpose they have, as it seems to me, utterly failed to understand the provisions of this bill.

Let us see if I am right or wrong about this matter. I have spoken of the fact that all offenses and disobedience of the orders of the court except those directly within the presence of the court or so near thereto as to interfere with the administration of justice have been swept into this description of indirect contempts. Section 4 of the bill provides that any case except the case of a direct contempt, that is, any misbehavior of the officers of the court outside of the court, any refusal of the officers of the court to

execute the process of the court, unless that refusal be made within the presence of the judge or in the immediate neighborhood of the chamber, a letter written from half a mile away by the sheriff to the judge saying, "I refuse your order to execute your process," is an indirect contempt; and a man is to have a regular accusation filed against him, is entitled to be confronted with his witnesses, his case tried orally, and if the amendment of the Senator from North Carolina prevails he is entitled to have a jury and then to appeal that case from the punishment which is inflicted upon him to the Supreme Court of the United States. Is it possible, Mr. President, that this is insisted upon? Let me see if it is not so. Section 5 provides—

That the testimony taken on the trial of any accusation of indirect contempt—

"Any accusation of indirect contempt." It does not make any difference whether it is before a jury or whether it is before a court, whatever testimony is taken upon the trial—

of any accusation of indirect contempt may be preserved by bill of exceptions, and any judgment of conviction therefor may be reviewed upon direct appeal to or by writ of error from the Supreme Court, and affirmed, reversed, or modified as justice may require. Upon allowance of an appeal or writ of error execution of the judgment shall be stayed upon the giving of such bond as may be required by the court or a judge thereof, or by any justice of the Supreme Court.

This, as it seems to me, is so plain, so palpable, that there can be no Senator found within the walls of this Chamber who as an independent proposition would vote for that provision. Put it in another form, introduce it as a separate bill, and say in case any officer or any district or circuit court in the United States shall refuse to execute the official orders of the judge of such court he shall, when accused of contempt, be entitled to be tried upon an accusation filed in the court, confronted with witnesses, and shall have the right to appeal from the judgment inflicting punishment upon him, even though it be no more than $5, to the Supreme Court of the United States; and tell me whether any Senator within the sound of my voice would vote for such a proposition.

Now, what I have said in regard to this matter applies equally well to a great variety of cases in which, if it was not for the anxiety to regulate the contempt proceedings in these cases where it is supposed that the power has been extended beyond its legitimate and proper office, there is a whole line of cases which it would be admitted it is perfectly proper should be enforced by the process of contempt by the court, district or circuit, without any review; and indeed as to almost all of the instances in which a circuit or district court would use its power to punish for contempt as a method of enforcing its decrees and orders it will be admitted that that power ought to exist and that there was no occasion for any change of the law on the subject. Take, for instance, the order of a court to execute a deed. The case having been tried, the witnesses heard, the party given a full opportunity to make his defense, the court determines that he ought to execute a deed which he has agreed to execute, and orders him to execute it. Will it be claimed that there is any justice in applying the power to punish for contempt for a disobedience of that order? Mr. President, it would not for a moment excite the attention of Senators.

Mr. ALLEN. Will the Senator from Connecticut permit me to ask him a question at this point?

Mr. PLATT. Certainly.

Mr. ALLEN. Suppose the party should refuse or fail to execute a deed, is it not always within the power of the court to direct an officer to execute the deed in the delinquent's name, and does not that deed have the same force that it would have as if executed by the other party?

Mr. PLATT. I am unable to answer the question. The Senator from Nebraska is so much better a lawyer than I am that I will not undertake to question——

Mr. ALLEN. I hope the Senator will not consider that I am trying to establish my equality with him as a lawyer. But I submit to the Senator from Connecticut that it is the law that if a party is directed by decree of court to execute a deed, in case of specific performance or something of that kind, and he fails to do it, the court ordinarily provides in the same decree that on his failure to execute the deed within thirty or sixty days, as the case may be, the sheriff or marshal shall execute the deed in his name, and that deed is just as good as if the party himself executed it.

Mr. PLATT. In that case there would be no doubt, I imagine, about the power of the marshal or the officer to execute the deed. But I supposed that the question which the Senator asked me was in respect to a decree where that direction had not been inserted.

So with regard to all patent cases. I think a very large proportion of the patent practice in this country now depends for enforcement to prevent infringement of patents upon the power of the court to punish for contempt for disobedience of its decree. Here is an infringer of a patent, and the person owning the patent goes into court and asks for a trial. Possibly a preliminary injunction is granted; perhaps not. Perhaps the case is tried. It proceeds to a final decree. The court orders that the infringement cease, and forbids the infringer further to sell or make the article made in violation of the patent. There is no method of enforcing that decree except by punishment for contempt; and yet, the case having been all tried, having been carried, possibly, to the circuit court of appeals, and judgment affirmed there, and remanded to the circuit court for execution, the person refusing still to obey the order of the court is brought in on contempt, and my friend the Senator from Kansas says he should have a jury trial.

It is proposed to try it all over again before a jury, and then he is to have the right of appeal to the Supreme Court of the United States. He can not get his patent suit there in any other way. It is not altogether improbable that, having taken away from the Supreme Court the jurisdiction in patent cases, a person whose case has been decided by the circuit court and the circuit court of appeals may refuse to execute the order of the circuit court for the mere purpose of getting his patent case into the Supreme Court of the United States when now it can not be taken there. I do not know what would come up on the hearing of such an appeal in the Supreme Court of the United States. I do not know whether it would be just the question whether he had refused to obey the order of the circuit court. I presume there would be something more than that. The question whether the decision of the circuit court in relation to the patent suit was right and just would come up. I think it would bring up the whole question.

I am not objecting to the principle which is contended for in the pending bill, but I am objecting to the crude character of the bill and to the fact that it makes no distinction between contempts which are merely the disobedience by a witness or a juror of the command of a court and the contempt which is the disobedience of orders such as were issued in the Ricks and Debs cases. The fault of this bill is that its definitions are not correct. Its division of contempts into different classes is not correct, and it needs more care, more attention, more thought, more study, before it should be passed by this body or by Congress.

I said that I was not going to argue the question involved in this bill before a Senate in which, while I insist again that I am not suggesting the absence of a quorum, there are not 15 Senators at this time. The question whether the power to punish for contempt is a necessary, inherent, integral part of our judicial system and of a court is a great question. I admit that you can regulate it. I deny that you can take it away. Notwithstanding the strictures of the Senator from North Carolina [Mr. BUTLER], I do not believe that the legislative branch can interfere with the judicial branch of the Government any more than it can with the executive branch of the Government.

Mr. BUTLER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from North Carolina?

Mr. PLATT. I do not.

The PRESIDING OFFICER. The Senator from Connecticut declines to yield.

Mr. BUTLER. Then I shall reply to that statement——

Mr. PLATT. The Senator from North Carolina is out of order at the present time.

That we may regulate proceedings in cases for contempt I do not deny; that if there has been any injustice, any tyranny, any interference with the rights of the citizen in the administration of the power of a court to punish for contempt, we ought to interfere, I do not deny. But we ought to be very careful in doing so that we do not go to the extent of taking away from the court one of its essential features, and without which there can no more be a court than there can be a court without a judge.

It is a great question, as I have said. It involves the powers of the different branches of the Government, of the wisdom of the division of those powers into three parts—executive, legislative, and judicial. It involves the greater question how far the people in the United States are to be made to submit to law and to what extent they are to be permitted to run wild and defy the law and defy the Government in all its branches, executive, legislative, and judicial. That question is too large to argue to a half dozen Senators, who are more interested about leasing the islands of Alaska for the raising of foxes than they are about this question; and I only rose for the purpose of protesting against the attempted passage of the bill in the last hours of the session without consideration of its provisions.

Mr. President, the power to punish for contempt is older than the Constitution. It is as old as courts. It is as old as the administration of justice. While there may have been some perversion of this power, such cases do not arise frequently. There is no reason to suppose that naturally any trouble of that kind will occur between now and next fall. In a hundred years and more of constitutional history we have had no serious question of this sort raised. The courts have got along pretty well, the administration of justice has progressed pretty well under the power to punish for contempt. Once in a while a man who is punished for contempt feels that he is oppressed. I have defended cases in which I felt at the time that there had been a very severe exercise

of the power of the court in the punishment inflicted for a disobedience of its orders. I know my clients felt outraged. But as time has gone on and I have looked at it again and referred to the cases as reported, I must confess that I think the courts were right. Cases may arise—I will not say such cases have not arisen—in which the power of the court has been arbitrarily exercised I will not say that such cases have arisen. But it will be found that those cases in this country, with the love of freedom which exists here, are and will be of very infrequent occurrence; and I think it is as likely to be regulated by public sentiment without legislation as by legislation, and ten times more likely to be regulated by public sentiment without legislation than to be satisfactorily regulated by legislation such as is here proposed.

If the Senate were full I should be glad to argue the question. I have glanced at it just enough to indicate the importance of the subject, just enough to indicate how utterly improper it is to attempt to dispose of a question of this sort under the circumstances which now exist in the Senate of the United States.

Mr. MITCHELL of Oregon. Mr. President, I quite agree with the Senator from Connecticut [Mr. PLATT] that the question under discussion is a very important one. The wide range which the debate has taken indicates that very clearly. This is a Senate bill, moreover. Even if passed at this late hour in the session there can be no possible hope of its getting consideration elsewhere. It does seem to me in view of what has been said by the Senator from Connecticut, and of all the facts and circumstances surrounding the case, that it is but a waste of time to continue the discussion of this question to the obstruction of other measures of importance which have already passed the House of Representatives and which ought to be considered by the Senate.

I have not been disposed, as the Senator from New York in charge of the bill knows, to interfere with a reasonable effort on his part and on the part of the Senate to bring this bill to a vote. The Senator from New York in charge of the bill this morning was of the impression that a vote could be reached without any extended debate. The result has shown that he was mistaken, and even now, as it would seem, there is scarcely any possibility, much less probability, that a vote can be reached to-day if we were to continue the discussion from now until midnight.

Mr. HILL. Who is anxious to continue the discussion, I should like to know?

Mr. MITCHELL of Oregon. I shall not make a motion at this point to attempt to displace it, but I will and do make an appeal to the Senator from New York and to the Senate to permit this matter, unless a vote can be had without further debate—of course, if a vote can be had without further debate, all well and good—to be laid aside, and that I may be permitted to move to proceed to the consideration of the House joint resolution looking to the reorganization of the Northern Pacific Railroad Company.

There are, I am aware, on the part of certain Senators, some objections to the joint resolution of the House, and some objections, perhaps, to the joint resolution reported unanimously from the Committee on the Judiciary of the Senate, which has been on our docket here for some time, but I suggest that we permit the matter to come up. Let us counsel with each other, and if amendments are to be proposed to the House joint resolution—and there certainly will be, for I shall propose an amendment myself—let us discuss them and consider them and endeavor to come to some conclusion in regard to the matter.

As I intimated this morning in the few remarks I made, this is a matter not so much in the interest of the purchasers or the men who may become the purchasers of the property as it is in the interest of the people of the communities of the States through which the road runs.

I will state further, if I may be permitted to discuss it on this question, that neither the joint resolution that comes from the House, nor the joint resolution reported by the Judiciary Committee, now on the Calendar, grants any new rights whatever to these people. It grants no new franchises, no new property rights——

Mr. BERRY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Arkansas?

Mr. MITCHELL of Oregon. Not for the present. I will yield in a moment. Neither of the joint resolutions grants any new rights of any kind or character whatever or that are not possessed now by the Northern Pacific Railroad Company; while on the other hand——

Mr. HILL. Does the Senator from Oregon——

Mr. MITCHELL of Oregon. I do not yield now.

Mr. HILL. Does the Senator from Oregon think it fair to take up the time of this bill——

The PRESIDING OFFICER. The Chair asks Senators to address the Chair before interrupting another Senator. Does the Senator from Oregon yield to the Senator from New York?

Mr. MITCHELL of Oregon. Not now. I will yield in a moment. I am not going to talk long, as I do not wish to take up the time of the Senate.

In addition to granting no new rights, various and sundry restrictions are proposed to be thrown around the purchasers of this property, every one of them in the interest of the Government and the people. I will state some of them. I referred to one this morning which compels the new company, if organized under an act of Congress, to sell, at not exceeding $2.50 an acre, all lands outside of a certain limit—a mile distant from the road. Not only that, but the measure, both as sent here by the House and as reported in the Senate, proposes to prevent by legislation any possibility of a combination upon the part of this company or its stockholders and directors with any other company or its stockholders or directors, so as to make a combination with other roads—a matter of vital importance to the people of this country, and especially to the people of the States through which this great line of road runs.

Further, I say the measure is not one simply in the interest of some railroad men, some capitalists. They get the benefit, perhaps. They undoubtedly desire some such legislation. That is all well enough, but if we can hold on to this great property so that it will be under the control of Congress and not allow it to get away from us, to be organized under some State charter, where Congress will have no control, then it seems to me that it is our bounden duty to do it. This resolution, I may further state, provides that the new company shall be responsible for and shall pay all judgments obtained against the old Northern Pacific Company on covenants of warranty, for sales of lands, and for injuries to persons and property.

Now, I shall not take further time. I simply intend to make this appeal to the Senate to take up the joint resolution and discuss it. If there are objections to it, if there are further restrictions that ought to be thrown around it, we will consider them, and if they commend themselves to the good judgment of the Senate we will incorporate them. It is a matter of importance. It is here from the House. We can take it up and dispose of it, it seems to me, within the next few hours. Therefore I make this appeal. If we can get a vote upon the bill now before the Senate of which the Senator from New York has charge, of course I shall be glad, and shall not obtrude to prevent it; but after that I shall ask the Senate to proceed to the consideration of this House joint resolution.

Mr. SMITH. Mr. President, I feel it my duty, in fairness and justice, in view of what the Senator from Oregon [Mr. MITCHELL], who is interested in the joint resolution, has said, to state that in the closing hours of the session my consent can not be obtained for the passage of a measure that involves $400,000,000 and 43,000,000 acres of land which this Government has granted to other companies. To allow them to reorganize without carrying out what some of us believe to be honest obligations, and to hurry the measure through the Senate as it was railroaded through the House day before yesterday, will not be done with my consent.

Mr. MITCHELL of Oregon. Will the Senator from New Jersey allow me?

Mr. SMITH. Certainly.

Mr. MITCHELL of Oregon. So far as I am concerned, I will vote for no joint resolution allowing a reorganization of the Northern Pacific Railroad Company that will of itself interfere with any existing rights or obligations. Whatever rights other parties or third parties have to-day in virtue of contracts or arrangements with the Northern Pacific Railroad Company I do not propose to interfere with. Those contracts stand good against the old company. I would not for one moment think of voting for any proposition that would interfere with any of them. We could not do it if we should desire to do so. The courts would hold that it was ultra vires. Let us get the matter up and discuss it and see what kind of a joint resolution we have here.

Mr. SMITH. My object in rising was to reply to the proposition of the Senator from Oregon, who seems rather to criticise the Senator from New York for consuming time with a bill which, he says, can not possibly pass at this session, and that it is useless to take up time in discussing it.

I will say to the Senator from Oregon that the joint resolution in which he is interested is of as great if not more importance to the people of this country and that it will require at least two or three days for the gentlemen who wish to talk on the subject to be heard. With that fact now known, and in the closing hours of the session, it does not seem to me reasonable or fair for him to ask anyone else to give way, on a measure which others believe is of great importance, to a matter which can not in my judgment be settled at this session.

This is a matter of great importance, one that should not be taken up even for discussion at so late a day in the session. I feel all kindness for the Senator from Oregon, and as he has the joint resolution in charge it is his right and duty to press it, perhaps. I hope he will see, however, that it is beyond question impossible

to engage now in discussion even of a character which would lead to a vote during the present session of Congress, and that the bill now under consideration will be proceeded with.

Mr. BACON. Mr. President, I simply desire to suggest to the distinguished Senator from Oregon [Mr. MITCHELL] that if the matter which he desires to bring to the attention of the Senate is of such commanding and urgent importance there is certainly no reason why the Senate and Congress has not ample time for its consideration. The very fact that gentlemen are willing to adjourn without it is somewhat of comment as to the estimate in which they hold its alleged importance.

I do not depreciate the importance of the measure, and I will say to the distinguished Senator from Oregon that I am ready to remain here, if it is desired, for the purpose of its consideration. I do not think, however, that the consideration of that or any other bill should displace the bill now before the Senate. I do not desire to discuss the pending bill, although I am very deeply impressed with its importance. I have been impressed with the importance of such a measure for many years, in the course of a not inactive practice of the law. I think the lodgment of the power in any one man to determine whether personal liberty shall be taken is something entirely inconsistent with the genius of this age and with the spirit of our institutions. Every other branch of government has been shorn of the power of despotism—the legislative and the executive; but it is a fact that the judicial authority has the same power for despotism and personal tyranny to-day in all practical effect that it had three hundred years ago; and it is time that this legislation should be had.

My experience is not like that of the distinguished Senator from Connecticut [Mr. PLATT]. I have seen instances of judicial tyranny where time has not brought me to the conclusion that the power was wisely exercised. On the contrary, the lapse of time has but deepened the conviction which I had that those exercises of power could be denominated as nothing else than personal tyranny.

Mr. President, it is not simply the fact that one man is clothed with this power which no man ought to have; it is not simply the fact that there never was a man good enough and wise enough to be endowed with the power that judges now have in this regard; but it is the fact that they are frequently called upon to decide these questions when they have personal feelings in the matter. Frequently there is such feeling between the judge and the man whom he punishes, and yet he is judge and jury and prosecutor in the case in which he has this personal feeling.

I do not desire, Mr. President, to add anything to what has been so well said by the distinguished Senator from New York [Mr. HILL] as to the importance of this matter; but whether this bill can become a law at this session or not, I trust it may receive the approval of the Senate before we adjourn.

Mr. HILL. Mr. President, I shall detain the Senate only a few moments in possibly closing this debate. I am not authorized to say, of course, that I shall close the debate, but I trust I may. I speak, not because I think it is necessary, but I think it is due to the distinguished Senator from Connecticut [Mr. PLATT], who occupied so much time, that I should at least refer to a few of his arguments. He said he did not intend to argue the bill, and then proceeded to make all the arguments which could possibly be urged against it. He entered his protest, and with that he said he should be content. We have heard his protest, no one else seems desirous of arguing against the bill, and I do not know why the bill should not be treated the same as all other bills and passed, if a majority of the Senate wishes to pass it.

The bill was reported six weeks ago from the Judiciary Committee. Time and time again I have tried to bring the bill forward. It was crowded out by several other bills; it was crowded out by the bond bill of my friend from North Carolina [Mr. BUTLER]; it was crowded out by the filled-cheese bill in behalf of the great agriculturist from Ohio [Mr. SHERMAN]; it was crowded out by other bills which were here, and I have submitted to it and have assisted in the passage of some of those measures, until now, having been good-natured until the end of the session, I am told that an important measure like this is proposed to be rushed through with empty seats.

Mr. President, some of the most important measures we have ever discussed in this Senate have been discussed in the presence of only a half dozen members. I heard the distinguished Senator from Connecticut discussing the Du Pont case and speaking with only a half dozen Senators in their seats, a great question involving the right of a Senator to a seat; and there are as many Senators listening to this argument and listening to the Senator as usually listen to arguments here.

This bill had its inception in a resolution introduced asking the Judiciary Committee to investigate this subject. I did not introduce that resolution. I was placed upon the subcommittee having it in charge. It was a duty imposed upon me, and I proceeded to discharge it, not in the interest of railroad employees, not in the interest of Mr. Debs, not in the interest of any particular class of people, but simply in the interest of good legislation demanded by the public welfare.

Mr. President, six weeks ago this bill was placed upon our files. It was known that the Judiciary Committee favored it. There was no division in the Judiciary Committee except upon one point. On all the questions raised by the Senator from Connecticut there was substantially no division. The only point involved in the bill was whether it was wise in cases of indirect contempt that there should be a jury trial as a matter of right, or whether the jury trial should be a matter of discretion with the judge. That is all the point there was involved. Six members of the committee thought it wise to leave that matter with the court whether to give a jury trial or not, and five of them thought it was wiser to give the absolute trial by jury to the defendant. But upon the main features of the bill that some relief was demanded, that some legislation should be had upon this great subject of contempt of court, there was no division of sentiment. Therefore the point simply is this, and that is all the point involved in it, whether in cases of contempt which occur out of court, involving a disputed question of fact as to what a man did or did not do, when arraigned in court upon such a question can he ask that he be brought before a jury or must he be arbitrarily tried before a judge alone, who is judge, jury, prosecutor, and substantially executioner? That is the question involved.

In order to have the bill reported I voted with the majority which reported the bill. I see no objection to the amendment offered by the Senator from Utah [Mr. CANNON] by which the right of trial by jury is given absolutely to the defendant.

My friend from Connecticut criticises this bill. It is easy to criticise, and of course he can criticise the bill. I think it was General Grant who once said of a distinguished Senator who criticised one of his messages that of course he criticised the message, and he would criticise anything that he did not write himself. I recollect what was said by David Dudley Field when he was arguing in favor of the revised code in New York and various criticisms were made against the code. It was said that it did not mean this or it did not mean that; it was not perfect and there would be criticisms made of it. He said, in answer to these critics, "It is easy enough to criticise; take the Ten Commandments, and they are all subject to criticism. For instance, here is one of them: 'Thou shalt not bear false witness against thy neighbor.' That is defective; why should it refer to his neighbor? Why not include everybody?" That same criticism would apply here.

Mr. ALLISON. Mr. President——

Mr. HILL. I must give way to general appropriation bills, of course. I have given way to everything else here, and I might as well give way to appropriation bills, though I can not give the pending bill away.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. ALLISON. I ask leave to submit a report from the committee of conference on the sundry civil appropriation bill, with the statement that the conferees are unable to agree.

The PRESIDING OFFICER. The report of the committee of conference will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have been unable to agree.

W. B. ALLISON,
EUGENE HALE,
Managers on the part of the Senate.

J. G. CANNON,
E. J. HAINER,
JOSEPH D. SAYERS,
Managers on the part of the House.

The PRESIDING OFFICER. The question is on concurring in the report.

Mr. DUBOIS. Mr. President, I ask the Senator from Iowa what is the condition now as to the proposed public buildings at the capitals of the new States?

Mr. ALLISON. The sundry civil bill is in precisely the condition it was when the last conference report was made, wherein there was a disagreement as to six or seven public buildings, including all the capital buildings and including three or four other public buildings. Since the last report was made the other House has receded from its disagreement to the public building at Savannah, Ga., and I hope it will follow that good example as to the remainder of the amendments now in dispute.

The PRESIDING OFFICER. The question is on concurring in the report of the committee of conference.

The report was concurred in.

Mr. ALLISON. I move that the Senate still further insist upon its amendments disagreed to by the House of Representatives.

The PRESIDING OFFICER. The question is on the motion of the Senator from Iowa, that the Senate still further insist upon its amendments disagreed to by the House of Representatives.

Mr. SHERMAN. Upon that question I wish to make a remark. It has always been, so far as I know, the custom in the Senate, and also in the House of Representatives as well, where there is a disagreement between the two Houses threatening to defeat the passage of an important appropriation bill—and it is the only true rule that can be applied to such a case—that the House proposing the amendment which is firmly resisted by the other House ought to recede from the amendment. No provision ought to be ingrafted in a law by Congress which has not been assented to by both Houses. Therefore, if there is a particular proposition, for instance, the erection of a public building at any place, the Senate proposing the amendment and the House saying firmly that they will not agree to it, the Senate ought to recede, and the amendment be stricken out. That is the established rule. The two Houses of Congress can only legislate upon the firm rule, adopted by the Houses, that no proposition whatever shall be forced upon the House by the Senate or upon the Senate by the House.

The only way of disposing of these disagreeing votes is for that House to recede which proposes a provision which is firmly resisted by the other. That seems to me the natural and proper course, and rather than have this bill defeated I shall move, if no member of the committee does it, that the Senate recede.

Mr. ALLISON. I hope the Senator will not make that motion, at least not until I have had an opportunity of making a brief statement.

Mr. SHERMAN. Very well.

Mr. ALLISON. Mr. President, the contention on the part of the conferees has been that these Senate amendments involve an enlargement of the limit of cost of these public buildings, and that is true respecting all of them, I believe, but one. The Senate conferees have insisted, inasmuch as the public buildings had been authorized by both Houses, and inasmuch as in nearly all of them progress has been made respecting their construction, and the necessity arising for enlarged appropriation either now or in the future, that this is not legislation within the proper sense of the term, and that we have the right to propose to the other House arrangements respecting public buildings in the course of construction.

In addition to that, however, Mr. President, I believe at each report of the conferees, certainly upon the last two or three reports, the House of Representatives has receded upon public buildings. We had a disagreement yesterday as to these public buildings, and the House receded as to one of the important public buildings without taking a decisive vote upon the others.

Whilst I agree to the general statement made by the Senator from Ohio that the House proposing new legislation must in the end, perhaps, yield to the other House, if that House insists, I take it for granted that the House of Representatives, having now on three different occasions itself, by a vote of the House, violated the principle upon which they claim that these amendments should not be made, will, if another opportunity be given, recede from its disagreement to the amendments of the Senate. Therefore I hope the Senator from Ohio will not make a motion to recede as the conference stands at this moment. The other House having receded from the principle which it has urged as against the Senate amendments on three different occasions, and notably last evening upon a yea-and-nay vote, I think it will likely recede upon the remainder of the public buildings.

Mr. DUBOIS. Mr. President, so far as the public buildings in the capital towns of the new States are concerned, they were granted by the last Congress. There is no reason now why this Congress should not continue the appropriation for them. As the Senator from Iowa has said, the other House has yielded on similar matters not in the new States, but on public buildings; and those of us who have been pressing for the buildings at these capital towns feel as though we ought to have them given us. We feel it so strongly that I can assure the Senator from Ohio that while in my judgment we would beat him upon a viva voce vote, if we did not I should feel it my duty to call for a yea-and-nay vote.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Minnesota?

Mr. DUBOIS. The Senator will excuse me a moment.

I am satisfied that there are enough Senators here to second a motion for a roll call and to gain it. I believe that a majority of the House of Representatives feel that we are right in this matter, and that they are being held up by one or two individuals over there. I am satisfied the House will yield if the Senate will stand firm, and they ought to.

Mr. NELSON. Mr. President, I am very sorry to have the Senator from Idaho threaten us with calling a yea-and-nay vote. It has been whispered around this Chamber for the last two or three days that unless we agree to these public-building matters we shall have to stay here until July next.

Let us look at this question calmly. As I understand it, a year ago, or during the last Congress, an appropriation was made for these public buildings, fixing a limit. Some of them have been commenced and some have not been commenced. These new propositions in the sundry civil bill are simply to enlarge the limit of cost of those buildings: There is no hurry about those buildings; they will keep; and their construction can go on under appropriations already made. At the next session of Congress bills enlarging the appropriations can be passed.

Moreover, there is this about it: Certain Senators in the matter of public buildings are favored, they get their items ingrafted on appropriation bills, and we who are not favored in that same way get nothing at all. Then we are told if we do not go in with this favored class we shall have to sit here until these gentlemen are willing to adjourn.

Mr. CLARK. Will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from Minnesota yield?

Mr. NELSON. I will yield by and by.

The PRESIDING OFFICER. The Senator from Minnesota declines to yield.

Mr. NELSON. A little while ago we had a bill called the filled-cheese bill, which was asked for by the farmers and dairymen of the country. How was that met? A barrel of beer was rolled in upon us [laughter], and some of these gentlemen, who are now so anxious to keep us here simply for the enlargement of two or three public buildings, it seems to me, have time and again resorted to what would be called outside of this Chamber—it might not be polite to say it here—a species of bulldozing. I am willing to go a great way to accommodate Senators, but when they get up here and tell us that unless we do so and so a quorum will be called, which means, under present conditions, that we can not adjourn until at their own will, I think that is carrying this matter too far.

I am aware that I am breaking the rules of the courtesy of the Senate; I have sought to avoid it; but I presume I have broken over the traces; and, if I have, I pray, Mr. President, that you will forgive me. [Laughter.]

Mr. SHERMAN. Mr. President, I think favorably of the policy, and I believe it is right to erect necessary public buildings in the new States and Territories. The people in the Territories and new States are not generally able to erect public buildings with their means, and therefore I always take pleasure in voting and in insisting, to a reasonable extent, upon amendments which have been proposed for the erection of public buildings; but the rule I have already mentioned is a vital one, without which the two Houses can not exist.

In the British Parliament, the House of Commons will not allow the House of Lords to propose amendments upon the question of appropriating money. That is the right of the Commons, the representatives of the people there, and the House of Lords have never been allowed in any case to say whether or not an appropriation should be made for any purpose whatever. Whatever appropriations may be proposed by the House of Commons go to the House of Lords, and are accepted as a matter of course; but here such is not the case. We have equal power with the House of Representatives; we have the power to propose amendments to their bills; we have the power to originate appropriation bills, for they are not in any constitutional sense bills for raising revenue. They are simply bills appropriating money supposed to be in the Treasury.

I remember one striking case where the two Houses were at outs with each other and there was a condition somewhat similar to that which now exists, only at that time public feeling was much more heated than it is now. In 1860 the House of Representatives undertook to reduce as much as possible the appropriations for the support of the Government. Then the war, with the difficulties that came after, was foreseen and everybody was very anxious to prevent any large appropriations of public money, the House of Representatives especially taking the lead. During that session when an appropriation bill came to the Senate the Senate attached an appropriation for the expenditure of half a million dollars for a public building at New Orleans and half a million dollars for a public building at Charleston.

When the bill was returned to the other House with the amendment the House struck out the amendment and insisted upon its action. When a gentleman who I might say is known to you all, by reputation at least, who was then a Senator from Georgia and was a very positive man, met the committee of conference and said to them distinctly that unless the appropriation was made for these two public buildings in the South the appropriation bill could not pass at all, that was promptly resented by the House of Representatives, and upon the meeting of the conferees again the Senate of its own accord receded and took the position, upon the ground that I have stated, that it had no right to force the House to agree to that to which the House was opposed. That was put upon broad national grounds. That is this case. Wherever the Senate of the United States undertakes to force upon the House of Representatives an appropriation it goes beyond the limits of its power. It may insist; it may hold on and continue

debating until probably the House will be wearied; but after all, if the House of Representatives says "no" definitely, the appropriation ought not to be made; and it is equally true that if the House should insist upon an appropriation to which the Senate is opposed, and the Senate says, "We will not agree to that; we are opposed to it; it is wrong," or, "It should not be appropriated at this time," as a matter of course the House would have to recede.

It is only by the adoption by the two Houses of such a rule that we can get along at all with our appropriations. We may insist and insist, but when the time comes when we must choose between the passage or the defeat of an appropriation bill, then, as a matter of course, the House proposing the disputed proposition must withdraw it.

I shall not make any motion at present, in the hope that an agreement may be arrived at by the conferees.

Mr. ALLISON. I move that the Senate still further insist upon its amendments.

The VICE-PRESIDENT. The question is on the motion of the Senator from Iowa.

The motion was agreed to.

ENLISTED MEN IN THE NAVY.

Mr. HALE. A Senate joint resolution has just come from the House of Representatives with an amendment. I ask the Chair to lay before the Senate the action of the House of Representatives.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the joint resolution (S. R. 149) extending the benefits of sections 1426 and 1573 of the Revised Statutes to all enlisted persons in the Navy; which was, in line 9, after the word "Navy," to insert:

And all accounts of paymasters who have made payments to enlisted men, not of the classes named in sections 1426 and 1573 of the Revised Statutes as if they had been included in the provisions of said sections, shall be allowed and passed by the accounting officers of the Treasury as if they had been included in said sections.

Mr. HALE. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

CONTEMPTS OF COURT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2984) in relation to contempts of court.

Mr. PETTIGREW. I move that the Senate proceed to the consideration of executive business.

Mr. HILL. I believe I had the floor, Mr. President, when I was interrupted by a conference report, and I do not yield to anything else at present.

The VICE-PRESIDENT. The present occupant of the chair was out of the Chamber at the time the Senator from New York yielded the floor.

Mr. PETTIGREW. I ask the Senator from New York, then, to let me make the motion.

Mr. HILL. I will do so later if the Senator please, but not now.

I was simply going to say that I have discussed this question all I care to. The bill is a safe one, it has been carefully prepared, and notwithstanding the criticisms of the Senator from Connecticut, it is not a radical departure such as has been stated: but it leaves contempts, so far as a large portion of them are concerned, precisely where they were before. The bill has been considered as much as a bill of this character is likely to be considered, and the Senate is just as competent to vote upon this question now as at any other time.

I resent the suggestion that I am endeavoring to crowd the Senate. The Senate understands this question. It has heard the distinguished Senator from Connecticut, who has ably given his objections to the bill, and I have replied as well as I could during the brief period I have had. I hope we shall now proceed to vote upon the bill.

Mr. PETTIGREW. I move that the Senate proceed to the consideration of executive business.

Mr. HILL. I hope not under the circumstances. I have been crowded out, and it seems to me I should not be asked to yield again.

Mr. PUGH (to Mr. HILL). Call for the yeas and nays.

Mr. HILL. I do not want to call for the yeas and nays, but I hope the Senator will withdraw the proposition. Later on he can renew it.

Mr. PETTIGREW. I am perfectly willing to withdraw the motion to proceed to the consideration of executive business, but I apprehend if I do so a yea-and-nay vote will be called upon the bill now pending before the Senate.

Mr. HARRIS. Let us see whether it will be or not.

Mr. PETTIGREW. I withdraw the motion.

Mr. PLATT. I can not suppose the Senator from New York thinks that this bill can pass without a roll call.

Mr. HILL. We have just passed a bill appropriating $2,000,000 without a roll call; we have passed other important bills without a roll call, and Senators can be placed upon record just the same. The Senator has vigorously asserted his opposition to the bill; it is in the RECORD; and I hope the Senator will not resort to that to defeat the bill. If we want to make fools of ourselves, let us have the opportunity of doing it. The Senate understands the question. We think this is a proper bill. Of course we differ with the Senator. It seems to me we ought to have the bill passed, if the Senate wants to pass it, and then proceed to the consideration of whatever else may come before the Senate.

Mr. PLATT. I move that the bill be postponed until the next session of the Senate.

The VICE-PRESIDENT. The Senator from Connecticut moves to postpone the pending bill until next session.

Mr. PETTIGREW. Pending that motion, I move that the Senate proceed to the consideration of executive business.

Mr. HILL. What is the motion now?

The VICE-PRESIDENT. Pending the motion of the Senator from Connecticut, the Senator from South Dakota moves that the Senate proceed to the consideration of executive business.

Mr. HILL. I hope that will be voted down at present. Later on we can have an executive session.

The VICE-PRESIDENT. The question is on the motion of the Senator from South Dakota.

The motion was not agreed to.

The VICE-PRESIDENT. The question recurs on the motion of the Senator from Connecticut, that the pending bill be postponed until the next session.

Mr. PLATT. I ask for a division.

The Senate proceeded to divide; and there was—aye 1.

Mr. PASCO. I hope the Senator from Connecticut will withdraw his call.

Mr. HARRIS. Does the Senator from Connecticut demand a further count? It will bring results, if it come.

Mr. PLATT. It is not my fault.

Mr. HARRIS. I am not fixing any fault on anybody. I am simply stating a fact.

The noes were 30.

The VICE-PRESIDENT. No quorum has voted. The Secretary will call the roll.

Mr. HARRIS. That is the result, necessarily.

The Secretary called the roll; and, after a little delay, the following Senators answered to their names:

Allen,	Cullom,	McBride,	Sherman,
Allison,	Daniel,	Mills,	Smith,
Bacon,	Davis,	Mitchell, Oreg.	Stewart,
Bate,	Faulkner,	Mitchell, Wis.	Teller,
Berry,	Gallinger,	Morgan,	Turpie,
Blackburn,	Gibson,	Morrill,	Vest.
Blanchard,	Hale,	Nelson,	Walthall,
Butler,	Harris,	Pasco,	Warren,
Cannon,	Hawley,	Peffer,	Wetmore.
Chilton,	Hill,	Pettigrew,	
Clark,	Jones, Ark.	Platt,	
Cockrell,	Lindsay,	Pugh,	

The VICE-PRESIDENT. Forty-five Senators have answered to their names. A quorum is present.

Mr. PETTIGREW. I move that the Senate proceed to the consideration of executive business.

Mr. HILL. I hope that motion will not prevail at present, until this bill is disposed of.

Mr. PETTIGREW. I wish to say that I do not make the motion for the purpose of hindering the passage of the pending bill. I think, perhaps, if we should go into executive session it might facilitate the passage of the bill.

Mr. HAWLEY. An executive session for a few minutes.

Mr. PETTIGREW. For a very few moments only.

The VICE-PRESIDENT. The question is on the motion of the Senator from South Dakota, that the Senate proceed to the consideration of executive business.

The motion was not agreed to.

The VICE-PRESIDENT. The question recurs on the amendment submitted by the Senator from North Carolina [Mr. BUTLER] as modified by the amendment submitted by the Senator from Utah [Mr. CANNON].

Mr. PLATT. What has become of the motion to postpone?

The VICE-PRESIDENT. The Chair will entertain that motion. The Chair inadvertently overlooked the motion of the Senator from Connecticut.

Mr. PLATT. I made a motion to postpone. A division was taken, and no quorum appeared. Now a quorum is present.

The VICE-PRESIDENT. The Chair will put the motion. At the time it was developed that there was no quorum present the Senate was dividing. A division had been called for. Senators opposed to the motion to postpone the bill until the first Monday in December will rise and stand until they are counted.

Mr. PLATT. I have no desire to embarrass the proceedings of the Senate. If I may do so, I will withdraw the call for a division.

The VICE-PRESIDENT. Is there objection? The Chair hears

none, and it is so ordered. The question recurs upon the amendment of the Senator from North Carolina as modified by the amendment of the Senator from Utah.

Mr. PEFFER. What is the present status of the amendment?

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to amend the bill by striking out, in line 18 of section 4, the words "in its discretion," and, in line 19, by striking out the word "may" and inserting the word "shall"; so as to read:

But such trial shall be by the court, or, upon application of the accused, a trial by jury shall be had as in any criminal case.

The amendment was agreed to.

Mr. ALLEN. I desire to withdraw the amendment I offered to the bill on yesterday.

The VICE-PRESIDENT. The amendment submitted by the Senator from Nebraska is withdrawn.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. PLATT. I protest against the passage of an important bill in this way. I ask that the vote be put.

The VICE-PRESIDENT. The Chair submits to the Senate the question on the passage of the bill. Shall the bill pass?

The bill was passed.

ORDER OF BUSINESS.

Mr. MITCHELL of Oregon. I move that the Senate proceed to the consideration of House joint resolution 190, relating to the reorganization of the Northern Pacific Railroad Company.

Mr. PETTIGREW. I move that the Senate proceed to the consideration of executive business.

Mr. MITCHELL of Oregon. I hope not until I get the joint resolution up. Then I shall have no objection.

Mr. TURPIE. I appeal to the Senator from Oregon to allow me to call up a pension bill on which a vote was taken yesterday.

Mr. MITCHELL of Oregon. I yield to the Senator from Indiana to call up a pension bill.

Mr. TURPIE. I ask the unanimous consent to take up the bill (H. R. 1094) granting a pension to Francis E. Hoover.

Mr. MITCHELL of Oregon. That is a veto case.

Mr. TURPIE. Yes, sir.

Mr. MITCHELL of Oregon. I hope the Senator will allow me to make an effort to get up the joint resolution referred to by me first. Then I will yield.

Mr. TURPIE. I appeal to the Senator to allow the roll to be called on this bill. It is the only way it can be passed. There is a quorum now present.

Mr. MITCHELL of Oregon. Very well. With the understanding that I shall not lose the floor I yield to the Senator from Indiana for that purpose.

Mr. TURPIE. I ask that the vote be taken upon the bill indicated by me.

FRANCIS E. HOOVER—VETO MESSAGE.

The Senate proceeded to reconsider the bill (H. R. 1094) granting a pension to Francis E. Hoover.

The VICE-PRESIDENT. The Chair will state that the bill has been read, likewise the message of the President, and the action of the other House thereon. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding? The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BATE (when his name was called). I am paired with the Senator from Utah [Mr. BROWN]. He gave me the privilege, if I saw fit, to vote, but I do not know how he would vote. It is a matter of some importance. If I had the right to vote, I should vote "nay." ["Vote."] I will record my vote in the negative.

Mr. BLANCHARD (when his name was called). I am paired with the Senator from North Carolina [Mr. PRITCHARD].

Mr. BUTLER. I will state to the Senator from Louisiana that my colleague [Mr. PRITCHARD], if present, would vote to pass the bill over the President's veto. So the Senator is at liberty to vote on the bill if he desires.

Mr. BLANCHARD. Then, with that statement from the Senator from North Carolina in behalf of his colleague, I will vote. I vote "yea."

Mr. CULLOM (when his name was called). I am paired with the Senator from Delaware [Mr. GRAY]. Under the circumstances I will take the liberty of voting. I vote "yea."

Mr. MITCHELL of Wisconsin (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL], but I have reserved the right to vote to make a quorum. I vote "yea."

Mr. PASCO (when his name was called). I am paired with the Senator from Washington [Mr. WILSON].

Mr. PUGH (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. HOAR]. I reserved the right to vote to make a quorum. For that purpose I vote "yea."

The roll call was concluded.

Mr. BLACKBURN. I am paired with the senior Senator from Michigan [Mr. MCMILLAN], but I will vote to make a quorum. I vote "nay."

Mr. PASCO. I have authority to vote in order to make a quorum. I understand that my vote is needed for that purpose, and I vote "nay."

The result was announced—yeas 36, nays 9; as follows:

YEAS—36.

Allen,	Cullom,	Jones, Ark.	Platt,
Allison,	Daniel,	McBride,	Pugh,
Bacon,	Davis,	Mitchell, Oreg.	Sherman,
Blanchard,	Dubois,	Mitchell, Wis.	Smith,
Butler,	Faulkner,	Morgan,	Stewart,
Cannon,	Gallinger,	Morrill,	Teller,
Chilton,	Gibson,	Nelson,	Turpie,
Clark,	Hawley,	Peffer,	Warren,
Cockrell,	Hill,	Pettigrew,	Wetmore.

NAYS—9.

Bate,	Harris,	Mills,	Vest,
Berry,	Lindsay,	Pasco,	Walthall.
Blackburn,			

NOT VOTING—44.

Aldrich,	Frye,	Kyle,	Roach,
Baker,	Gear,	Lodge,	Sewell,
Brice,	George,	McMillan,	Shoup,
Brown,	Gordon,	Mantle,	Squire,
Burrows,	Gorman,	Martin,	Thurston,
Caffery,	Gray,	Murphy,	Tillman,
Call,	Hale,	Palmer,	Vilas,
Cameron,	Hansbrough,	Perkins,	Voorhees,
Carter,	Hoar,	Pritchard,	White,
Chandler,	Irby,	Proctor,	Wilson,
Elkins,	Jones, Nev.	Quay,	Wolcott.

So the bill was passed (two-thirds of the Senators present voting in the affirmative).

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House insists upon its disagreement to the amendment of the Senate numbered 2 to the bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for the expenses of the House of Representatives, and for other purposes, for the fiscal year 1896, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CANNON, Mr. HAINER of Nebraska, and Mr. SAYERS managers at the conference on the part of the House.

The message also announced that the House had passed the following bills and joint resolution; in which it requested the concurrence of the Senate:

A bill (H. R. 1256) for the relief of Henry A. Webb;

A bill (H. R. 4538) for the relief of John Keefe;

A bill (H. R. 5482) authorizing the Cleveland Bridge Company to construct a bridge across the Arkansas River between Pawnee County, Okla., and the Osage Indian Reservation;

A bill (H. R. 8321) to authorize the county of St. Louis, in the State of Minnesota, to build or authorize the building of a foot and wagon bridge across the St. Louis River between Minnesota and Wisconsin, at a point near Fond du Lac, in said State of Minnesota;

An act (H. R. 8433) to amend section 4878 of the Revised Statutes, relating to burials in national cemeteries;

A bill (H. R. 9149) to regulate the establishment of submarine telegraphic cable lines or systems in the United States;

A bill (H. R. 119) to protect and administer public forest reservations;

A bill (H. R. 9226) to change the time and places for the district and circuit courts of the northern district of Texas;

A bill (H. R. 9447) to amend section 1 of "An act to amend an act entitled 'An act authorizing the Postmaster-General to adjust certain claims of postmasters for loss by burglary, fire, or other unavoidable casualty,'" approved May 9, 1888; and

A joint resolution (H. Res. 194) extending the scope of the investigations by the Agricultural Department in the matter of the improvement of the public roads.

NORTHERN PACIFIC RAILROAD.

Mr. MITCHELL of Oregon. I ask the Senate to proceed to the consideration of House joint resolution 190, relating to the reorganization of the Northern Pacific Railroad Company.

The joint resolution (H. Res. 190) to facilitate the reorganization of the Northern Pacific Railroad Company, to secure to actual settlers the right to purchase at a price not exceeding $2.50 per acre the agricultural lands within its grant, and to prohibit said company or any successor company from giving by consolidation, sale, or other corporate action control of its railroad to any corporation, company, person, or association of persons owning, operating, or controlling a parallel or competing railroad was read the second time by its title.

Mr. PEFFER. I think the joint resolution is a measure altogether too important to be considered——

Mr. MITCHELL of Oregon. Debate is not in order, I believe.

The VICE-PRESIDENT. Debate is not in order except by unanimous consent.

Mr. PEFFER. I object to the consideration of the joint resolution at this time.

The VICE-PRESIDENT. The joint resolution has been read the second time.

Mr. ALLEN. I rise to a parliamentary inquiry.

The VICE-PRESIDENT. The Chair will state the status of the joint resolution. It has been read the second time, and will be placed on the Calendar.

Mr. ALLEN. I was going to state that yesterday when the joint resolution was read the Senator from Texas [Mr. MILLS] objected to a second reading.

Mr. MILLS. That is correct. The joint resolution takes its second reading to-day.

Mr. MITCHELL of Oregon. I understood that the joint resolution was read the first and second time yesterday.

Mr. JONES of Arkansas. No; it was not.

Mr. ALLEN. A distinct objection was made yesterday to its second reading.

Mr. MILLS. That is correct. So the joint resolution takes its second reading to-day.

Mr. MITCHELL of Oregon. My motion would be in order all the same, I take it. It had to be read the second time, even admitting all that is said to be true, before it could be taken up. Consequently my motion must necessarily be in order.

The VICE-PRESIDENT. The Chair will submit to the Senate the motion of the Senator from Oregon that the Senate proceed to the consideration of the joint resolution. [Putting the question.] The noes appear to have it.

Mr. MITCHELL of Oregon. I call for the yeas and nays.

The yeas and nays were not ordered.

The VICE-PRESIDENT. The motion is lost.

BUREAU OF ANIMAL INDUSTRY.

Mr. WARREN. I move that the Senate proceed to the consideration of the bill (S. 1147) for the establishment of a bureau of animal industry for the inspection of meat products and live stock, suppression and extirpation of contagious and infectious diseases among cattle and live stock, to regulate the transportation of cattle and live stock and prevent the exportation or importation of diseased cattle, live stock, or other animals, and for other purposes.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Wyoming to proceed to the consideration of the bill indicated. [Putting the question.] The noes seem to have it.

Mr. WARREN. I ask for the yeas and nays.

Mr. CULLOM. If I may be allowed to say a word, I am inclined to think there will be no opposition to the bill. It is a very important one, affecting the cattle interests of the country, and I think we can do no better than to consider it while we are here anyway.

Mr. WARREN. I desire to say that I do not wish to discuss the bill to any length. Of course if it leads to extended debate I do not propose to detain the Senate. I have before me a very urgent letter from the Secretary of Agriculture indicating his desire that the bill shall be passed as soon as possible. With the permission of the Senate, I ask that the letter may be read at the desk.

The VICE-PRESIDENT. Without objection, the letter will be read.

The Secretary read as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., June 3, 1896.

DEAR SENATOR: Permit me to remind you that S. 1147, revising the laws under which the Bureau of Animal Industry is working, has not yet been acted upon by the Senate. The condition of the present law makes it very embarrassing for this Department to proceed, as it has been found impossible to inspect all of the exported beef in accordance with the requirements of the present statute. To undertake to enforce this law will destroy the business of many small exporters, and throw the trade entirely into the hands of a few large concerns. If the bill as reported by your committee could be passed it would permit inspection where this is required, and allow the exportation of uninspected meats to countries which are willing to receive it.

Considering the interests involved, and the fact that no serious objection has been raised to this bill, would it not be possible to secure action upon it before adjournment?

Very respectfully, J. STERLING MORTON, *Secretary.*

Hon. REDFIELD PROCTOR,
Chairman Committee on Agriculture and Forestry,
United States Senate.

Mr. WARREN. If I may be permitted, I wish to say that in the Agricultural appropriation act for the fiscal year 1896 a provision was inserted that has not been carried out. The Secretary of Agriculture issued rules according to law, and later on he was compelled to issue an order suspending the operation of those rules, which was really suspending the law. That suspension held good until last March. Then, in the absence of legislation by Congress in the meantime, the Secretary renewed the suspension order, and it holds good until July 1.

I submit to the Senate that we ought not to leave the Agricultural Department hanging in the air in this way. We ought at least to give the moral support that the passage of the bill through this body will give, and I feel quite sure that if it passes here it can pass the other House. The bill takes up the four or five enactments bearing upon this question, smoothes off the rough points of former legislation, puts in the missing links, and makes one measure in a reenactment that can be understood alike by lawyer and layman.

As I said, if the bill should only pass the Senate, it would give the Department of Agriculture moral support that will enable it to provide for the exportation of meat and meat products without each shipload being unduly delayed for inspection. Under the law to-day no clearance can be granted to a vessel on which are cured meats, canned beef, or any product of meat, unless it has a certificate that the live stock from which it was made was inspected upon the hoof. There has not been sufficient appropriations to carry out such an inspection. It has not yet been inaugurated at every abattoir and every slaughterhouse, and it can not be for some time; and the consequence is that we are proceeding contrary to and in the face of the law. It seems to me the bill should be read, and if there is anything in the bill that is wrong we can amend it. If its consideration brings forth honest criticism and opposition which defeats the bill, my duty will have been done. It seems to me the bill should be taken up and considered.

The VICE-PRESIDENT. The Chair will again submit to the Senate the motion of the Senator from Wyoming to proceed to the consideration of the bill indicated. [Putting the question.] The ayes appear to have it.

Mr. MILLS. Let us have the yeas and nays.

The yeas and nays were not ordered.

Mr. MILLS. I suggest the absence of a quorum.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allen,	Daniel,	McBride,	Sherman,
Allison,	Davis,	Mills,	Smith,
Bate,	Dubois,	Mitchell, Oreg.	Stewart,
Berry,	Faulkner,	Mitchell, Wis.	Teller,
Blackburn,	Gallinger,	Morgan,	Turpie,
Blanchard,	Gibson,	Morrill,	Vest,
Butler,	Hale,	Nelson,	Walthall,
Cannon,	Harris,	Pasco,	Warren,
Chilton,	Hawley,	Peffer,	Wetmore.
Clark,	Hill,	Pettigrew,	
Cockrell,	Jones, Ark.	Platt,	
Cullom,	Lindsay,	Pugh,	

The VICE-PRESIDENT. Forty-five Senators have answered to their names. A quorum is present.

Mr. PETTIGREW. I move that the Senate proceed to the consideration of executive business.

Mr. WARREN. I understand a roll call has been ordered upon the pending measure.

Mr. PETTIGREW. No; the yeas and nays were refused.

The VICE-PRESIDENT. The question was raised by the Senator from Texas that no quorum was present. A quorum is present, and the Senator from South Dakota moves that the Senate proceed to the consideration of executive business. That motion the Chair is compelled to entertain. The question is on agreeing to the motion of the Senator from South Dakota.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

Mr. WARREN. I should like to ask what is the parliamentary condition of Senate bill 1147? I understood the Chair to declare that it was before the Senate when the attention of the Chair was called to the absence of a quorum.

The VICE-PRESIDENT. The Chair will answer the inquiry of the Senator from Wyoming. The Chair submitted the motion of the Senator from Wyoming. The motion carried apparently. A demand was made by the Senator from Texas [Mr. MILLS] for the yeas and nays. The Chair called upon those in favor of taking a vote by yeas and nays to rise. Only four Senators rose. At that moment the Senator from Texas made the point of order that there was no quorum present. That was the condition at the time the roll was called.

Mr. MILLS. The question, then, is pending, to proceed to the consideration of the bill?

The VICE-PRESIDENT. That is correct. The Senator from Wyoming desires to make a statement, and by unanimous consent the Chair will hear him.

Mr. WARREN. Mr. President, I simply desire to say that while at another time I should feel entitled to a call of the yeas and nays and to further press this bill, there has been so much opposition to the bill developed upon the other side of the Chamber, that I am convinced that they do not propose to let the bill pass

at this time, nor even be considered; and I therefore withdraw all efforts to get the bill before the Senate, because it is well understood we can not develop a quorum in voting upon the measure when it is within the power of any one or two opposing Senators to break a quorum in the present thin condition of the Senate.

FRAUDULENT BOTTLING OF LIQUORS.

Mr. VEST. I move that the Senate proceed to the consideration of the bill (H. R. 4580) to amend section 3449 of the Revised Statutes of the United States.

The motion was agreed to.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. TELLER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 5210) "making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 100, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, and 191; and agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 99, and agree to the same with an amendment as follows: In lieu of the matter inserted by said House amendment insert the following: ": *Provided*, That the Commissioners of the District of Columbia may, under such reasonable restrictions as they may prescribe, authorize any existing electric light company having overhead wires to maintain and use for a period of eight months, and no longer, its existing poles and overhead wires west of Rock Creek, in places outside of the existing fire limits of the city of Washington and of the District of Columbia; and any such overhead wire system may be extended west of Rock Creek and outside of said fire limits, to continue only for the said period of eight months; and at the end of said period all right or authority hereby conferred shall cease. And the said Commissioners may also authorize any such existing electric light company to construct and use, under such regulations as the Commissioners may fix, conduits for the reception of existing overhead wires within the territory formerly known as Georgetown, and to extend the same by an aggregate of not more than 1¼ miles of conduit in the same territory. And the United States Electric Lighting Company may extend its underground conduits and wires east of Rock Creek, and within the said fire limits, to Mount Pleasant and Washington and Columbia Heights, under such regulations as the Commissioners of the District of Columbia may prescribe"; and the House agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 193, and agree to the same with an amendment as follows: Strike out all after the word "dollars," in line 3, down to and including the word "denomination," in line 6 of said amendment; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 194, and agree to the same with an amendment as follows: On page 40, after line 19 of the bill, insert as a separate paragraph, before amendment numbered 195, the following:

"And it is hereby declared to be the policy of the Government of the United States to make no appropriation of money or property for the purpose of founding, maintaining, or aiding by payment for services, expenses, or otherwise any church or religious denomination or any institution or society which is under sectarian or ecclesiastical control. And it is hereby enacted that from and after the 30th day of June, 1897, no money appropriated for charitable purposes in the District of Columbia shall be paid to any church or religious denomination or to any institution or society which is under sectarian or ecclesiastical control."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 195, and agree to the same with an amendment as follows: In line 15 of said amendment, after the word "denomination," insert: "Or any institution or society which is under sectarian or ecclesiastical control." After the word "extent," in line 22 of said amendment, insert: "Within the limits of the policy hereinbefore declared, and if not, the probable expense of providing and maintaining public institutions for such purpose." Strike out lines 28 to 33, inclusive, of said amendment, and insert in lieu thereof the following: "Said committee is authorized to sit during the recess, and the necessary expenses of the committee, including clerical and stenographic work, shall be paid out of the contingent fund of the Senate and House of Representatives, jointly, on the certificate of the chairman of the committee"; and the Senate agree to the same.

H. M. TELLER,
W. B. ALLISON,
F. M. COCKRELL,
Managers on the part of the Senate.
WILLIAM W. GROUT,
MAHLON PITNEY,
ALEXANDER M. DOCKERY,
Managers on the part of the House.

The VICE-PRESIDENT. The question is on concurring in the report.

Mr. VEST. I wish to say a word before the vote is taken. I will never agree to one portion of the conference report. I shall make no factious opposition, and if a majority of the Senate favor it, as a matter of course at this late stage in the session I shall not arrogate to myself more knowledge and patriotism than all the Senate combined, nor would I delay public business or the adjournment of the Senate if I were able to do so.

But I want to say that that provision, which will be construed hereafter to be a contract on the part of all of us who accede to it, that under no circumstances after the 30th of June, 1897, shall there be any appropriations for any hospital or to any asylum or to any eleemosynary institution of any sort which is under the control or connected with any church—this agreement, as I say, this provision, which will be construed as a contract, is to my mind absolutely inhuman, or may be so. For instance, here is an eleemosynary institution in this District of Columbia, under the control of a Protestant or a Catholic church, for orphan children or for incurables or for the sick and maimed. In the vicissitudes of fortune that church may be utterly unable within six or twelve or eighteen months or two years from now to take care of the inmates. Is Congress to be told then that we have entered into a legislative contract not to assist that institution?

Take an orphan asylum, which I have now in my mind's eye, with 100 little orphan boys picked up here in the streets, without mother or father, who are under the charge of some Sisters of Charity. They would be left to the jails, to the penitentiaries, to the slums, and alleys of this city but for the Christian charity of these pure women. Now, suppose that two years from this time these women or that church, if they are under the control of a church—for the sake of argument I will concede it—are absolutely unable to take care of those 100 little boys? Are they to be turned out? Are they to starve and become criminals?

Take the Providence Hospital here, where the Sisters of Charity are ministering angels to the sick and the maimed. Suppose that in two years they are unable to take care of the people within their doors, are we to allow these poor, sick, unfortunate people to be turned out; and then, if we undertake to give them a pittance out of the public Treasury, are we to be told, "Here is a legislative contract; you can not help them; you have agreed that after the 30th of June, 1897, under no state of case shall you give a dollar"?

Mr. President, I shall not be forced into any such legislation.

Mr. SHERMAN. I should like to ask the Senator if such a stipulation made by this Congress can have any binding force whatever upon a subsequent Congress?

Mr. VEST. I grant that we can hereafter repeal any act of Congress.

Mr. SHERMAN. We can repeal any action, or we can make an appropriation, if we desire, without repealing it.

Mr. VEST. But I commend to the Senator his own argument, made so repeatedly here, as to the parity of the two metals, which was put into the Sherman law, and repeated afterwards when we repealed the purchasing clause of the Sherman law. I have heard him contend again and again that that parity was in the nature of a solemn contract with the creditors of this Government, which we were bound to sustain.

Mr. SHERMAN. In dealing with a question of loans and bonds, etc., I have no doubt that a stipulation of that kind would be binding in public honor, but a mere declaration that Congress will not two years hence contribute to these charities is not worth the paper upon which it is written. If any of us are here then we shall violate it undoubtedly.

Mr. VEST. Then I understand the Senator thinks it is a mere brutum fulmen—that it amounts to nothing.

Mr. SHERMAN. We are using it merely as a way of getting out of a dilemma, and the chairman of the committee so asserts.

Mr. HILL. It is a stump speech.

Mr. VEST. It is worse than a stump speech, because it is impressing the country at large with the idea that we have succumbed to this religious clamor that has been raised and that we have satisfied public sentiment, when we amuse ourselves and wink at each other and say, "Of course we do not mean it; it goes for nothing; it is a pious fraud." Some people out in my country would call it a lie, but I shall not use that unparliamentary language. In other words, as they say out in "the wild and woolly West," "it don't go" when you come to put it in operation. I do not believe in that sort of legislation. I do not believe that we should put something here into an act which either amounts to nothing or which, if we keep it in and execute it, would be absolutely inhuman. I do not propose that any amount of clamor shall drive me into such a thing as that. I shall not stand here and make a factious opposition at all, but I want to put on record my objection to being bound by any such provision as that.

Mr. TELLER. Mr. President, I suppose it will be in the power of the next Congress without any question to act on the judgment of the Congress. I want to say for myself that while I have acceded to this report, I believe, as general principle, it is better that the Government of the United States, when it dispenses charity, should keep control of it and pay it out, although I do not say that I should not use these charitable agencies sometimes, for I would, and, so thinking, I shall feel for myself always, without reference to this provision or any other, justified in voting as the case presented seems to demand.

I want to say to the Senator from Missouri that I do not believe, and it was not the idea on the part of the Senate committee of conference, that we were deceiving the public nor responding to a public sentiment. I do not believe that there is a sentiment amongst the people of the United States that requires that we should withhold the charity of this Government from proper agencies because they may be considered and treated as sectarian. I think this question stands upon entirely different grounds from what the school question does, which has so agitated the public mind.

I want to say to the Senator who objects that we found ourselves in a condition where we either had to prolong, apparently

indefinitely, this session, or we had to agree to something of this character, and we have agreed to it under the stress of circumstances and conditions in which we found ourselves. For myself, I do not understand that by so doing I assert that under no circumstances shall I vote for charities of this kind.

The VICE-PRESIDENT. The question is upon concurring in the conference report.

The report was concurred in.

WILLIAM H. SCOFIELD AND OTHERS.

Mr. HILL. Mr. President, I hope the Senator from Missouri will permit me to call up a bill which came from the House of Representatives a few moments ago, so that I may dispose of it. I am not going to make any factious opposition to his bill.

Mr. VEST. I yield for that purpose.

Mr. HILL. I ask unanimous consent that House bill 7338, which just came over from the House of Representatives, may be laid before the Senate.

The bill (H. R. 7338) for the relief of William H. Scofield, Jacob Brady, James Ketcham, Annie Booth, as administratrix of the goods, chattels, and credits of George W. Booth, deceased; Wilson P. Dillar, Ezra L. Waterhouse, Moses C. Bell, George W. Byles, and George A. Scofield, was read twice by its title.

Mr. HILL. Mr. President, this bill has passed the other House, and a similar bill has been reported from the Judiciary Committee of the Senate and is now upon the Calendar. I simply desire to have the House bill now disposed of.

Mr. SHERMAN. What is the amount involved?

Mr. HILL. About $2,000.

Mr. SHERMAN. It is rather a dangerous precedent to set to discharge sureties on a bond. We have had one or two examples of that kind, and we should be extremely careful in releasing sureties.

Mr. HILL. The House report contains the facts in full.

Mr. SHERMAN. I should like to have the report read. If there are any special circumstances to justify the passage of the bill they ought to be stated.

Mr. HILL. The special circumstances are these, if the Senator will indulge me a moment: The statute requires that when any deficiency occurs in the accounts of a postmaster the Government should notify the sureties, and it should be done in thirty days. It was not done in this instance. A bond was given under which the liability was incurred. Subsequently, without notice to the sureties of the deficiency, a new bond was required and given. The committee held very properly that the sureties had no knowledge of this defalcation, no knowledge of a deficiency in any way, and supposed the accounts were all right. That was the reason the sureties gave the second bond. Under those circumstances it was deemed that the Government ought to relieve them from the last bond and hold them to the other; and that is the occasion for the relief. The very highest equity requires that they should be relieved.

Mr. SHERMAN. From what committee of the Senate has the bill been reported?

Mr. HILL. A similar bill has been reported from the Committees on the Judiciary of both Houses, and this bill has passed the House of Representatives. The other bill is here awaiting action.

The VICE-PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill; which was read.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The VICE-PRESIDENT. In the absence of objection, Senate bill 3229, on the same subject, will be indefinitely postponed.

ST. LOUIS RIVER BRIDGE.

The VICE-PRESIDENT laid before the Senate the bill (H. R. 8321) to authorize the county of St. Louis, in the State of Minnesota, to build or authorize the building of a foot and wagon bridge across the St. Louis River between Minnesota and Wisconsin, at a point near Fond du Lac, in said State of Minnesota; which was read twice by its title.

Mr. NELSON. I ask unanimous consent for the consideration of that bill at this time. The bill has been referred to the War Department and meets with the approval of the Department, and it has also been referred to the Committee on Commerce.

Mr. VEST. I should like very much to proceed with the consideration of House bill 4580, which has been interrupted by other matters.

The VICE-PRESIDENT. The Chair will recognize the Senator from Minnesota subsequently.

Mr. VEST. The Senator can call his bill up after the revenue bill is disposed of. I have had such extraordinarily bad luck with the bill that I should like to get rid of it.

DEFICIENCIES IN APPROPRIATIONS.

Mr. HALE. I submit a privileged report, which will take but a moment.

The VICE-PRESIDENT. The report will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 2 to the bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for expenses of the House of Representatives, and for other purposes, for the fiscal year ending June 30, 1896, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 2.

EUGENE HALE,
W. B. ALLISON,
F. M. COCKRELL,
Managers on the part of the Senate.

J. G. CANNON,
JOSEPH D. SAYERS,
Managers on the part of the House.

The VICE-PRESIDENT. The question is on concurring in the report of the committee of conference.

The report was concurred in.

FRAUDULENT BOTTLING OF LIQUORS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 4580) to amend section 3449 of the Revised Statutes of the United States.

Mr. VEST. The bill was heretofore read for information; the amendment of the committee was adopted, and the hour of 2 o'clock having arrived, the consideration of the bill was suspended.

Mr. BATE. I should like to have the bill read, as well as the amendment upon which we are to act.

The VICE-PRESIDENT. The bill will be read and the amendment will be stated.

The bill was read.

The SECRETARY. Mr. HILL proposes to amend the bill, in line 14, page 2, by striking out the word "and" and inserting the word "or"; so as to read:

Or to be imprisoned, etc.

Mr. HILL. Mr. President, I do not think this proposed legislation is wise, nor do I take much stock in the original statute which this bill proposes to amend, and which I shall read. It is section 3449 of the Revised Statutes:

Whenever any person ships, transports, or removes any spirituous or fermented liquors or wines under any other than the proper name or brand known to the trade as designating the kind and quality of the contents of the casks or packages containing the same, or causes such act to be done, he shall forfeit said liquors or wines, and casks or packages, and be subject to pay a fine of $500.

Mr. President, I think this statute was unnecessary for any purposes of the collection of revenue. Of course, if a person stamps a keg "lager beer" when it contains wine or liquor, that would be a transparent fraud, although he might pay the amount of the tax correctly. But it will be seen that this original statute says that there must not be stamped "any other than the proper name or brand known to the trade as designating the kind and quality of the contents of the bottles, casks, or other packages containing the same."

Mr. MILLS. Will the Senator from New York yield to me to ask for the passage of a bill?

Mr. HILL. The Senator from Missouri has charge of the pending bill.

The VICE-PRESIDENT. The Senator from New York is recognized.

Mr. HILL. The question arose under this statute as to what was meant by the phrase, "other than the proper name or brand known to the trade as designating the kind and quality of the contents of the bottles, casks, or other packages containing the same." The question will arise as to whether one of these packages marked "Old Holland Gin" is properly branded, although the gin is manufactured in this country and although that was a trade-mark which the party had been using for years and years. Is it to be said because he continues the use of that old phrase, "Old Holland Gin," it is necessarily a false statement, and that it necessarily would be implied that it was made in Holland or Old Holland? Questions of that kind arose under this statute, and some prosecutions have been had, more, I think, in the interest of opposition dealers than in the true interests of the Treasury.

Now it is proposed to amend this statute, which I think was in its full extent of doubtful propriety in the outset, by not only making the party pay a fine of $500, as the existing law provides, but also that he shall be imprisoned for six months for the first offense—that he shall pay a fine of $500 and also be imprisoned for six months; so that in case a man continues the use of these old trade-marks, which may be strictly held to imply something different from what the article actually is, he is not simply to be fined but is absolutely to be imprisoned for the first offense. I think that is pretty harsh. In the first place, the question will arise as to the extent of the power of this Government thus to make what are essentially police regulations.

This is not in consonance with the other revenue laws of the nation. Nearly all of them provide simply for fines. This is not to punish smuggling or defrauding the Government. For instance,

take an illustration. Assume that there was a tax upon brussels carpet, which a man must pay, and the statute requires him to use the correct name. Formerly brussels carpet came from Brussels and was exclusively manufactured there. Now brussels carpet is manufactured in this country; but it retains its name and designation. So there is an article called Schiedam schnapps, whatever that is. That is made here, and yet it might be implied from the name that it was something which came from abroad. A question will arise under this statute, as it has arisen before, as to whether a person can be prosecuted under it. The trade-mark protected him; but this statute it is proposed to amend by providing imprisonment for the first offense. The report of the House committee on this bill says:

The Internal Revenue Office reports that the existing statute is inadequate to meet and correct the gross and extensive frauds perpetrated upon the public and upon the revenue by persons engaged in the sale of a great variety of spirituous, vinous, and malt liquors under false and fraudulent brands. To illustrate, but without going into details, the Commissioner of Internal Revenue reports that in many districts lager beer is found upon the market under such names as "hop tea" and "ambrosia," as well as other false designations.

Of course where lager beer is in kegs and is marked "hop tea" and "ambrosia," that is a palpable fraud; and I do not suppose any sort of imprisonment would be objectionable in such cases. But the original statute was broad; and while the committee in reporting this bill have added the words "knowingly and willfully," that language does not tone down the thing much, because the Senate committee have made this amendment to the bill, or the House committee, I do not know which.

Mr. PLATT. The Senate committee reported that amendment.

Mr. VEST. Yes; that was reported by the Senate committee.

Mr. HILL. The Senate committee reported the amendment. The committee realized the fact that it was pretty harsh to condemn a party upon the first offense to imprisonment; and in order to mitigate the situation they have added the words "knowingly and willfully," so that anyone who knowingly and willfully sells or keeps on hand for sale or removes packages that do not contain the proper name of the liquor, etc., shall be liable to the penalty. That does not cover the case I have mentioned. Of course when a person sells Old London gin he does it knowingly and does it willfully, and he claims the right to do it under his own trade-marks which have existed for years. The prosecution under the statute is based upon the idea that in some way or other that is not the proper name of the liquor because it may imply that it was a foreign production.

This bill strikes me as more in the interest of opposition dealers than as a bona fide bill for the protection of the Treasury; but it goes too far. I can not see why a fine should not be a sufficient punishment for the first offense, instead of six months' imprisonment. The reason I make that statement is not that I want to justify persons in evading the statute, but there are delicate legal questions arising and have arisen before, after the original act was passed. It is said that when persons are convicted they will pay the fine promptly. Where a man has had these old trade-marks for years and years people are willing to buy his goods, no matter by what name they are called.

I see no particular benefit to be derived to the public Treasury by the enactment of this bill. I think it will absolutely prevent respectable dealers in New York, St. Louis, Chicago, Milwaukee, and all over the country from raising the question which would arise under these cases, when they will have to go to prison if beaten upon the technical point. That is the reason I object to it. That is the reason that I suggest, with the consent of my friend from Missouri, that it should be left discretionary with the judge as to whether the first offense should be absolutely punished by imprisonment. Prosecution is made, say, against a client of mine upon the ground that some of the articles contained in kegs do not absolutely express the proper names—in other words, might import that they were produced abroad, and I illustrated by "Old Holland Gin" and the other names they have for these and other articles. It has been suggested on my left that the "lager beer" originally came from Germany and that would imply that all lager beer was made abroad. I do not think the bill is correct, and that is all I have to say about it.

Mr. VEST. Mr. President, this bill was drawn by the Commissioner of Internal Revenue and urged upon the committees of both branches of Congress. The Senator from New York says it is a bill which was intended to apply to the question of business of brands or trade-marks. The Internal Revenue Department disclaim anything of that sort, and they say the bill is intended simply to prevent frauds upon the revenue. For instance, the practice obtains of putting a brand or trade-mark upon fine brandies, which bear a duty of $1.80 a gallon, and the brand or trade-mark put upon it is "whisky," which would pay but $1.10 a gallon, making a difference of 70 cents in the tax. Under the old statute when these liquors were put up in bottles and a trade-mark was put upon them it was simply impossible to detect the fraud without opening the package, and when there is a large number of them it is almost impossible to do that.

It was also further found, according to the report of the internal-revenue officer, that the dealers in these goods were willing to pay the $500 fine on account of the enormous profits they made, and it was simply no obstacle at all to this fraud upon the revenue to impose a simple fine. Therefore, the Internal Revenue Department found it absolutely necessary to ask from Congress an amendment to the law so as to add the terror of personal imprisonment in order to prevent these fraudulent practices.

This proposed legislation does not stand upon the same footing as the oleomargarine or the filled-cheese law. My objection to that legislation was that it was the perversion of the taxing power of the Government for police purposes. But here there is no question about the power of the Government to put an excise tax upon liquors. Every civilized country derives a large portion of its revenue, and England derives the largest portion, from an excise tax upon liquors. The constitutional power of taxation unquestionably exists, and no court would say and no lawyer would contend that we did not have the right to pass auxiliary laws to make effective our unquestionable right to collect these excise taxes.

General WHEELER, a prominent member of the Committee on Ways and Means of the House, addressed me the following note:

I inclose you a copy of the House report on House bill 4580, which is an amendment to section 3449 of the Revised Statutes. I am informed that the bill was drawn by the Commissioner of Internal Revenue, and, as shown by the inclosed report, is necessary to protect the revenue.

Since the report was made I am informed on the authority of Mr. Brooks, the special agent of the internal revenue in New York, that he is unable to convict parties violating the existing law, for the reason that the word "bottles" is not included in the present law.

He says that a party arrested for illicit distillation admitted that he had filled 30,000 cases of illicit whisky and branded it at his pleasure gin, brandy, or whatever he desired. Thus not only depriving the United States of the internal-revenue tax, $1.10 per gallon, but also imposing these goods on the public as imported spirits, which should have paid $1.80 per gallon.

There is no matter of trade-mark involved in this, but simply an act to protect the revenue.

This states as clearly as I could possibly do it the object of this proposed law.

Mr. HILL. Take the instance I suggested of gin, old Holland gin. A man is entirely willing to pay the full amount of the tax; yet would it not be argued that that is not under the proper name or brand? The report says they want to reach cases where the implication is that they are imported when they are not imported. That is the object, it is said, that it is sought to accomplish now. I ask the Senator, in such case as that, would it not be claimed that that is the effect of the bill?

Mr. VEST. I admit that one might conjecture hard cases under this and every other revenue law, but we have amended the bill so that any jury must be satisfied that he knowingly and willfully did so. I opposed that amendment, to be frank about it, because I can hardly conceive of a case in which a conviction will ever be had with those words in the law. It is an unusual thing in revenue laws—in fact, it is the exception in this case—to put in the words "knowingly and willfully"; but a large majority of the committee disagreed with me and inserted the words, so that it would be impossible under the case put by the Senator from New York to secure a conviction.

Mr. HILL. If he does it knowingly he does it willfully; he does it because he claims he has a right to do it and he is willing to pay the full amount of the tax.

Mr. VEST. I do not suppose any court would hold in a case of that sort that it was done willfully. But, putting it in the broadest way, if a dealer in liquor deliberately and knowingly puts a trade-mark or brand upon a package or a bottle when he knows it is a falsehood he ought to be punished for it. He must have some object in doing it. He is not doing it for amusement. He is certainly doing it to commit a fraud.

Mr. JONES of Arkansas. And he perpetrates a fraud.

Mr. VEST. And he perpetrates a fraud. The public are entitled to know, when a brand is put on, that the brand or trade-mark properly represents the contents of the package.

Mr. HILL. That, of course, is all right enough where they attempt to substitute one kind of liquor for another kind—lager beer for ale, or ale for whisky, or whisky for brandy, or something of that kind. That is a proposition entirely different from the one I present.

Mr. VEST. Take the case that is mentioned by General WHEELER in this letter as coming from Mr. Brooks, the inspector. Here is a man who says he had 30,000 bottles, into which he put whisky and then put on the trade-mark of gin, brandy, and different sorts of imported foreign liquors. That was a clear violation of law.

Mr. HILL. It was a false statement, and if it is desired to punish a case of that kind—and it ought to be—a statute can be framed to cover it.

Mr. VEST. And this statute is intended to cover it. Under

the old statute he could not be convicted, because it was impossible to do so. This law is intended to cover a case where bottles are fraudulently used.

Mr. HILL. I do not object to that part of it.

Mr. VEST. That is one of the main objects of this proposed legislation. I ask for a vote, Mr. President.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from New York.

Mr. VEST. I hope the amendment will be rejected.

Mr. HILL. If hopes will carry it, Mr. President, I hope it will be adopted.

The amendment was rejected.

The bill was reported to the Senate as amended.

Mr. GALLINGER. Before the matter passes from the committee I should like to ask the Senator in charge of the bill if I understood him correctly to say that the bill was drawn and recommended by the Commissioner of Internal Revenue?

Mr. VEST. Yes, sir.

Mr. GALLINGER. I had intended to offer, and have had printed, an amendment to the bill comprising the text of a bill popularly known as the pure-food bill. I think it is much more important that the people of this country should have pure food than pure whisky or pure gin or pure brandy or any other intoxicating drink. I have been astounded that Congress has not before now passed that bill, which I will not now detain the Senate in having read, as I think it is of the utmost consequence to the people of this country. But I have no desire to obstruct the passage of the pending bill, upon the statement of the Senator from Missouri that the Commissioner of Internal Revenue desires it shall become a law. So I withhold my amendment, and trust that when the pure-food bill comes before the Senate, as I have no doubt it will during the term of the Senator from Missouri, he will interest himself to see that it becomes a law, as well as the bill in which he is now interested.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

COURTS IN TEXAS.

Mr. MILLS. I ask unanimous consent to take up the bill which has just come from the other House affecting courts in Texas. Nobody else is interested in it except Texas people.

There being no objection, the bill (H. R. 9226) to change the time and places for the district and circuit courts of the northern district of Texas was read the first time by its title and the second time at length, and considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ST. LOUIS RIVER BRIDGE.

Mr. NELSON. I ask unanimous consent for the present consideration of House bill 8321.

There being no objection, the bill (H. R. 8321) to authorize the county of St. Louis, in the State of Minnesota, to build or authorize the building of a foot and wagon bridge across the St. Louis River between Minnesota and Wisconsin, at a point near Fond du Lac, in said State of Minnesota, was read the first time by its title and the second time at length, and considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

POTOMAC RIVER BRIDGE.

Mr. DANIEL. I ask the unanimous consent of the Senate to consider the bill (S. 2775) to authorize the Herndon and Aldie Railroad to construct a bridge over the Potomac River at or below the Great Falls.

The Secretary read the bill, and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported from the Committee on Commerce with amendments.

The first amendment was, in section 1, line 7, after the word "or," to strike out "below" and insert "near"; so as to make the section read:

That the Herndon and Aldie Railroad Company, a body incorporated under the laws of the State of Virginia, be, and is hereby, authorized and empowered to construct a bridge and approaches thereto across the Potomac River at a point at or near the Great Falls thereof.

The amendment was agreed to.

The next amendment was, in section 2, line 4, after the word "Company," to strike out "are" and insert "is"; in line 6, after the word "railroad," to strike out "with such conveniences aforesaid," and in line 8, after the word "feet," to insert "including slopes, culverts, and all appurtenances"; so as to make the section read:

That the said bridge may be constructed with a single or with double tracks, and may be provided with such conveniences as may be deemed necessary for railway traffic; and the said Herndon and Aldie Railroad Company is hereby granted the right of way, and may construct said railroad across the land reservation of the United States adjacent to said Great Falls, not exceeding in width 66 feet, including slopes, culverts, and all appurtenances.

The amendment was agreed to.

The next amendment was, in section 3, line 3, before the word "shall," to insert "its approaches and appurtenances"; in line 4, after the word "said," to strike out "structure" and insert "structures and their proposed location," and in line 8, after the word "approval," to strike out "and thereupon"; so as to read:

That the said Herndon and Aldie Railroad Company, before entering upon the construction of said bridge, its approaches, and appurtenances, shall submit to the Secretary of War plans and drawings of said structures and their proposed locations for his approval, and should he approve such plans and drawings he shall at once notify the officers of said Herndon and Aldie Railroad Company of such approval.

The amendment was agreed to.

The next amendment was, in section 3, line 8, after the word "approval," to insert:

That said company, before commencing work on said bridge, its approaches, or appurtenances, shall deposit with the Treasurer of the United States to the credit of the Washington Aqueduct the sum of $5,000, to defray all the expenses that may be incurred by the United States in connection with the inspection of the company's work on the lands of the United States, and any of the company's work that may affect the interests of the United States, and in making good any damages done by said company or its works to any work or land or other property of the United States, and in completing, as the Secretary of War may direct, any of the company's work that the said company may neglect or refuse to complete, and which the Secretary of War may consider necessary for the safety of the Washington Aqueduct and the works pertaining thereto, or for the proper care and preservation of its lands; and the said company or its successors shall also deposit as aforesaid such further sums for said purposes at such times as the Secretary of War shall direct. The said moneys shall be disbursed like other moneys appropriated for the Washington Aqueduct, and whatever shall remain of said deposits after the completion of the works for which they may be obtained shall be returned to said company with an account of the disbursements in detail. The disbursements of said deposits shall, except in case of emergency, be made only on the order of the Secretary of War.

The amendment was agreed to.

The next amendment was, in section 3, line 33, after the word "war," to insert:

Upon compliance with all of the preceding conditions the.

And in line 35, after the word "bridge," to insert "its approaches and appurtenances"; so as to read:

Upon compliance with all of the preceding conditions the said company may proceed to the erection of said bridge, it approaches and appurtenances.

The amendment was agreed to.

The next amendment was to add at the end of section 3:

During the construction and after the completion of said bridge, approaches, and appurtenances, the agents and employees of the company, when on the public lands of the United States in the vicinity, shall be subject to such regulations as may be approved by the Secretary of War.

The amendment was agreed to.

The next amendment was, in section 4, line 8, before the word "That," to insert:

That the said Herndon and Aldie Railroad Company shall not construct any passenger room, ticket office, depot, workshop, water tank, or building on the lands of the United States. That any changes in the bridge, approaches, roadbed, or appurtenances rendered necessary by the construction of any public work of the United States shall be promptly made by the company or its successors without charge to the United States.

In line 15, after the word "within," to strike out "three years" and insert "one year"; in the same line, after the word "within," to strike out "six" and insert "three," and in line 21, after the word "or," to insert "until"; so as to make the section read:

That the said Herndon and Aldie Railroad Company shall not construct any passenger room, ticket office, depot, workshop, water tank, or building on the lands of the United States. That any changes in the bridge, approaches, roadbed, or appurtenances rendered necessary by the construction of any public work of the United States shall be promptly made by the company or its successors without charge to the United States. That the said Herndon and Aldie Railroad Company may at any time make any alterations deemed advisable to be made in said bridge, or such conveniences aforesaid, but must first submit such proposed alterations of said bridge to the Secretary of War, and his approval shall be first had before they shall be made: *Provided*, That the construction of said bridge shall be commenced within one year and completed within three years from the date of the approval of this act: *Provided further*, That nothing in this act contained shall be so construed as to authorize the said railroad company to acquire or occupy any portion of the property right or rights of way of the Chesapeake and Ohio Canal Company without the consent of the owners of a majority of the stock of said company, or until after condemnation proceedings and proper compensation of said Chesapeake and Ohio Canal Company.

The amendment was agreed to.

The next amendment was to insert as an additional section:

SEC. 5. That the right to alter, amend, or repeal this act is hereby reserved; and if construction of the bridge hereby authorized is not begun within twelve months and completed in three years from the approval of this act it shall be null and void.

The amendment was agreed to.

Mr. PLATT. On page 4 there is a reference to "conveniences." Will the Senator from Missouri inform me what "conveniences" are? I ask the Secretary to read the clause to which I have reference.

The Secretary read as follows:

That the said Herndon and Aldie Railroad Company may at any time make any alterations deemed advisable to be made in said bridge, or such conveniences aforesaid.

Mr. PLATT. What are "conveniences"? That word was stricken out in a former place in the bill. I do not know what the conveniences of a bridge are.

Mr. VEST. Some abutment works. If the word was stricken out in a former place it should be stricken out in the succeeding part of the bill.

The PRESIDING OFFICER (Mr. BACON in the chair). Without objection that amendment will be made.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize the Herndon and Aldie Railroad to construct a bridge over the Potomac River at or near the Great Falls."

LOSSES OF POSTMASTERS.

Mr. CULLOM. I ask the Senate to consider the House bill 9447, now on the table.

The bill (H. R. 9447) to amend section 1 of "An act to amend an act entitled 'An act authorizing the Postmaster-General to adjust certain claims of postmasters for loss by burglary, fire, or other unavoidable casualty,'" approved May 9, 1888, was read the first time by its title, and the second time at length.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. HARRIS. May I inquire of the Senator from Illinois what the provision of law is that is proposed to be amended?

Mr. CULLOM. The part of the law that is proposed to be amended is the proviso of an act which limits the sum to $2,000. The House has passed a bill providing that no claim exceeding $10,000 shall so and so. It merely strikes out the word "two" and inserts the word "ten."

Mr. HARRIS. No disbursements are to be made by the Department without the action of Congress?

Mr. CULLOM. This is not a matter of disbursement. It relates to the settlement of claims. For instance, there are four or five cases now before Congress where burglaries have been committed upon post-offices and sums extracted, and the postmaster of the town or place is charged with the amount. If it exceeds $2,000, the account can not be settled without coming to Congress for an act relieving him. For the purpose of giving the Postmaster-General further discretion, the amount is enlarged from two to ten thousand dollars.

Mr. HARRIS. In cases such as these he may adjust the matter and settle it up to $10,000?

Mr. CULLOM. That is all there is in the bill.

Mr. HARRIS. It is a pretty large discretion, but I shall not interpose any objection.

Mr. CULLOM. I consulted with the only members of the Committee on Post-Offices and Post-Roads present, and I am prepared to say that they both approve the provisions of the bill.

Mr. MITCHELL of Oregon. I desire to say that I think this is very wise legislation. I am on two committees, each of which is annoyed from time to time, if that is a proper word to use about legislation, with the bills for relief, simply because the Postmaster-General has not jurisdiction to adjudicate. He has jurisdiction, as stated by the Senator from Illinois, in all cases where the amount does not exceed $2,000. But whenever it runs over that sum—and most cases do—the postmasters must come to Congress for a special bill of relief. There are a number of bills of that kind pending in the Committee on Post-Offices and Post-Roads, and there are some in the Committee on Claims, of which I am a member. I see no reason why the Postmaster-General should not have jurisdiction to adjudicate all of them. This will undoubtedly include all.

Mr. CULLOM. I will state, in addition, that a robbery occurred two or three years ago at the post-office in Chicago, and I think a year or two ago I secured the passage of a bill for the relief of the gentleman who was postmaster at that time. For some reason or other it has been kept back and never has passed the House.

Within a year another robbery occurred, where the safe was broken open, in my own town, and the postmaster was robbed of a very considerable sum of money, stamps, etc. I understand there is another case in New Jersey, one in Kansas, and they are scattered about, and the postmasters are unable to settle their accounts, as they would like to do before they get out of office, on account of the difficulty in getting private acts passed for individual relief. I hope the bill will be passed.

Mr. PLATT. I do not think there is any danger in giving the Postmaster-General power to adjudicate these claims up to $10,000. My observation has been that the Postmaster-General has been exceedingly technical about adjudicating any claims. There are a good many more claims which he does not adjudicate than those he does adjudicate.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

IMPROVEMENT OF PUBLIC ROADS.

Mr. WARREN. House joint resolution 194 in relation to the improvement of public roads is on the table. The same subject-matter has been passed upon by the appropriate committee of the Senate. It is a measure of a few lines, and I should like to call it up and have it passed.

The joint resolution (H. Res. 194) extending the scope of the investigations by the Agricultural Department in the matter of the improvement of the public roads was read the first time by its title and the second time at length.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

Mr. HARRIS. Before the joint resolution is voted upon, I simply desire to say, as I shall not ask for a yea-and-nay vote, which would afford me an opportunity to record my vote, that I should vote against the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, and was read the third time.

The PRESIDING OFFICER. The question is, Shall the joint resolution pass?

The joint resolution was rejected.

Mr. WARREN subsequently said: I desire to move that the vote by which the Senate rejected House joint resolution 194 may be reconsidered and that the joint resolution may be placed on the Calendar.

The PRESIDING OFFICER. If there be no objection, the motion to reconsider will be agreed to, and the joint resolution will be placed upon the Calendar. The Chair hears no objection, and it is so ordered.

STATUS OF MIXED-BLOOD INDIANS.

Mr. ALLEN. I desire unanimous consent to call up for consideration the bill (S. 3051) defining the rights and privileges of mixed-blood Indians under the treaties and statutes of the United States, confirming the title of said Indians to their lands, allowing the same to be alienated under certain circumstances, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. PLATT. I object to the consideration of the bill.

Mr. ALLEN. I should like the attention of the Senator from Connecticut for a moment. This bill met the approval of the Indian Committee, of which the Senator from Connecticut is a member. The report was unanimous, and I hope the Senator will not insist on his objection.

Mr. PLATT. I beg leave to say the report on the bill was not unanimous.

Mr. ALLEN. Very well. Then I will accept the consequences, and endeavor to establish after a while the Senatorial parity as to courtesy.

Mr. PLATT. I wish to reply to the remark of the Senator from Nebraska. The bill is a very important one, and I was not in favor of it in committee. It can not be passed without discussion. It is a bill of very wide scope; and while I do not know that I objected to it when the report was made, I reserved my rights in the committee to oppose the bill.

NAVASSA ISLAND AND SWAMM ISLAND.

Mr. GIBSON. I desire to call up the joint resolution (S. R. 89) directing and authorizing the Secretary of the Navy to appoint a board of three officers of the Navy to proceed to Navassa Island, in the West Indies, and examine and report upon the cost of establishing a coaling station for the United States Government on said island.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which had been reported from the Committee on Naval Affairs with an amendment, to strike out all after the resolving clause and insert:

That the Secretary of the Navy be, and he is hereby, authorized and directed to appoint a board of three officers of the Navy and instruct said board to proceed to Navassa Island and Swamm Island, in the West Indies, and examine and report upon the practicability and advisability of establishing a coaling station for the United States Government on either of said islands.

Mr. HAWLEY. I have a large photograph of the island, showing its whole breadth and length. It has a fine elevation. It is used chiefly for getting materials for fertilizers. There is no anchorage anywhere near there. Deep water goes bang up to steep stone walls. I do not know what they will do with it. The Senator is welcome to have the photograph if it will do him any good, or the Navy Department either. My information comes from a man who has spent years there in charge of the fertilizing works. The photograph comes from him to me.

Mr. GIBSON. The joint resolution has been carefully considered by the Committee on Naval Affairs, and it was decided to report it favorably. There was added, however, an amendment which increases the propriety of appointing the commission. The scope and advisability of the joint resolution are greatly enlarged by the amendment to the original joint resolution, including another island besides Navassa. The sole purpose of the inquiry is to determine which one of these two islands it is the more advisable should be selected as a coaling station for the United States.

Both of these islands are the property of citizens of the United States. The absolute necessity of establishing such a coaling station has been passed upon by the Navy Department. The object of the joint resolution is to enable a committee of three naval officers to visit the two islands and later on to report to the Secretary of the Navy their judgment with reference to the advisability of the enterprise.

Mr. PLATT. I think we ought to have some information on this subject. We do not want to send a naval expedition off to find a place to establish a coaling station unless there is some probability that they can find such a location. We ought to have some information on the subject as to whether there is really a probability that a coaling station for the United States can be established at this island. We do not want to send junketing expeditions from the Navy any more than we do from the Senate. I am quite willing to vote for the joint resolution if there is any probability that we can establish a coaling station there.

Mr. HAWLEY. Mr. President, I have no objection in the world to an investigation (I do not think it will cost very much) by one of the lighter vessels. It can pass around that way with a naval board and look at the island. I only give the Senate the benefit of what I happen to know about it. I think it is twelve or fifteen years since I met the American who had charge of the works on that island, and on one of his occasional visits I afterwards saw him. He gave me various little curiosities. Among others he gave me a photograph of the island, giving a view of the whole island from a distance of two or three miles, and then some views of the buildings and groups of people who worked there, and all that.

I saw, two or three weeks ago, I think, some reference in the papers to the precise matter embodied in the joint resolution, and, as fortune would have it, I met this gentleman himself within a week after that. I asked him, what I thought I knew already, whether there was anchorage around there at any place for a ship to lie, and he said nothing whatever; that they had to go up there in boats. But new modern science has no difficulty in cutting out a hole in the side of an island somewhere. There is no harm in the investigation, anyhow.

Mr. GIBSON. The joint resolution merely provides for an investigation. The question has been thoroughly considered by the committee, and the conclusion, I think, was unanimously reached that the joint resolution should be passed.

Mr. HALE. What is the language in reference to that point?

Mr. GIBSON. I was going to ask that the joint resolution should be again read.

The Secretary again read the joint resolution.

Mr. GIBSON. It will be discovered, I will say in reply to the Senator from Connecticut [Mr. PLATT], that the duties of the commission will be very far from any junketing trip.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the Committee on Naval Affairs.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "Joint resolution authorizing and directing the Secretary of the Navy to appoint a board of three officers of the Navy to proceed to Navassa Island and Swamm Island, in the West Indies, and examine and report upon the practicability and advisability of establishing a coaling station for the United States Government on either of said islands."

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for the expenses of the House of Representatives, and for other purposes.

The message also announced that the House had passed a bill (H. R. 4058) to set apart a portion of certain lands in the State of Washington, now known as the Pacific Forest Reserve, as a public park, to be known as the Washington National Park; in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice-President:

A bill (S. 261) for the relief of Arthur P. Selby;

A bill (S. 1011) for the relief of Capt. James Reagan, United States Army;

A bill (S. 2943) to authorize the construction of a bridge across the Warrior River by the Mobile and Ohio Railroad Company;

A bill (S. 2944) to authorize the construction of a bridge across the Caleaba River, in Bibb County, Ala., by the Mobile and Ohio Railroad Company;

A bill (S. 2945) to authorize the construction of a bridge across the Alabama River by the Mobile and Ohio Railroad Company;

A bill (H. R. 7338) for the relief of William H. Schofield, Jacob Brady, James Ketcham, Annie Booth, as administratrix of the goods, chattels, and credits of George W. Booth, deceased; Wilson P. Billar, Ezra L. Waterhouse, Moses C. Bell, George W. Byles, and George A. Schofield;

A bill (H. R. 9409) making appropriations to supply deficiencies in the appropriations for expenses of the House of Representatives, and for other purposes, for the fiscal year 1896; and

A joint resolution (S. R. 149) extending the benefits of sections 1426 and 1573 of the Revised Statutes to all enlisted persons of the Navy.

DONATION OF CONDEMNED CANNON.

Mr. GALLINGER. There are two small bills on the Calendar, one of which my colleague [Mr. CHANDLER], when he left the city, desired me to call up. The first one is Senate bill 2483, donating condemned cannon to the Soldiers' Home of New Hampshire, and the other donates condemned cannon to a monument association. I ask that the bill (S. 2483) donating condemned cannon and cannon balls to the New Hampshire Soldiers' Home may be now considered.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. GALLINGER. I offer an amendment to be inserted at the end of the bill.

The SECRETARY. It is proposed to add at the end of the bill:

Provided, That the condemned cannon herein mentioned are available for the purposes stated, and can, in the opinion of the Secretary of the Navy, be spared without detriment to the public interest: *And provided further*, That the Government shall not incur any expenses in handling and transporting said cannon.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. GALLINGER. I ask to call up the next order of business on behalf of my colleague. It will take but a moment. It is the bill (S. 2630) authorizing and directing the Secretary of the Navy to donate condemned cannon to the Londonderry Soldiers' Monument Association of Londonderry, N. H.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CLASSIFICATION OF RAILWAY POSTAL CLERKS.

Mr. MITCHELL of Oregon. I ask unanimous consent for the present consideration of the bill (S. 2741) to classify railway postal clerks and prescribe their salaries.

The PRESIDING OFFICER. The bill will be read for information, subject to objection.

The bill was read.

Mr. MITCHELL of Oregon. I desire to make a brief statement in regard to the bill.

Mr. HALE. That bill is too important a bill to pass without being discussed. I have had a great many letters in opposition to it. I must object to its consideration.

The PRESIDING OFFICER. The Senator from Maine objects to the consideration of the bill.

Mr. MITCHELL of Oregon. I understood the bill was taken up by common consent.

Mr. HALE. It was read for information. I was waiting to hear it read.

Mr. MITCHELL of Oregon. Will the Senator allow me to make a statement?

Mr. HALE. Certainly.

Mr. MITCHELL of Oregon. This is a bill originally prepared in the Post-Office Department, which has received the approval and the strong recommendation of every Postmaster-General since 1885. It has received the approval four several times unanimously, I think, of the Committee on Post-Offices and Post-Roads of the Senate, and has twice heretofore passed the Senate. It is a bill, as I have stated, which the Post-Office Department is very desirous

of having passed, looking to the efficiency of the Railway Mail Service.

Mr. STEWART. The same bill?

Mr. MITCHELL of Oregon. The same bill which has just been read; and under the circumstances I hope the Senator from Maine will allow it to be passed.

Mr. HALE. It adds very largely to the expenses of the Government.

Mr. MITCHELL of Oregon. I can state, if the Senator will allow me——

Mr. HALE. Mr. President, I must object.

Mr. MITCHELL of Oregon. Very well.

The PRESIDING OFFICER. The Senator from Maine objects.

PENSIONS TO PAYMASTERS' CLERKS IN MEXICAN WAR.

Mr. VEST. The Senator from North Dakota [Mr. ROACH] requested me to ask for the consideration of the bill (S. 810) to amend the act entitled "An act granting pensions to the soldiers and sailors of the Mexican war, and for other purposes," approved January 29, 1887, which he reported from the Committee on Pensions without amendment; and I make that request.

By unanimous consent the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to so construe the provisions of the act entitled "An act granting pensions to the soldiers and sailors of the Mexican war, and for other purposes," approved January 29, 1887, as to include the surviving paymasters' clerks in the Army as of the same relative rank and grade as pursers' clerks in the Navy, and the surviving paymasters' clerks of the Army, and the widows of those who have died, so as to entitle them to all the rights and benefits given by the act of January 29, 1887, to pursers' clerks of the Navy.

Mr. COCKRELL. Is there a report with that bill?

Mr. VEST. There is a report with it. There are not a half dozen of these cases. They do not amount to anything.

Mr. GALLINGER. There are only four or five of these men left.

Mr. VEST. Only four.

Mr. GALLINGER. Four, I think, is the exact number.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had receded from its disagreement to the amendments of the Senate numbered 2, 3, 4, 6, 7, 8, 13, 15, and 17 to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes, and had agreed to the same.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H. R. 4580) to amend section 3449 of the Revised Statutes.

The message further announced that the House had passed the bill (S. 361) for the relief of Silas P. Keller with an amendment; in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

A bill (H. R. 4058) to set apart a portion of certain lands in the State of Washington, now known as the Pacific Forest Reserve, as a public park, to be known as the Washington National Park;

A bill (H. R. 7500) to grant a pension to Mrs. Keturah Wilson, widow of James Wilson, deceased;

A bill (H. R. 8159) to pension Mrs. Martha M. Gibson;

A bill (H. R. 8250) for the relief of William Gemmill; and

A bill (H. R. 8886) for the relief of Hiram T. Corum and Silas W. Davis, of Oregon.

CEDED INDIAN RESERVATION LANDS.

Mr. ALLEN. There is a little joint resolution on the desk that is a mere formal matter, which I should like unanimous consent to consider at this time. It is very short. In carrying out the provisions of the sundry civil appropriation bill it suspends the operation of the cancellation of certain entries of land, the payment of certain indebtedness for Indian lands, until the provision of the bill which has passed the House and is now on the Calendar can be acted on at the next session of Congress. I should like to have unanimous consent to take up the resolution and have it considered at this time.

The joint resolution (H. Res. 201) extending the time of payments due from settlers and purchasers on all ceded Indian reservations was read the first time by its title and the second time at length, as follows:

Resolved, etc., That the homestead settlers and settlers who purchased with the condition annexed of actual settlement on all ceded Indian reservations be, and they are hereby, granted an extension of one year in which to make payments as now provided by law.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FINAL ADJOURNMENT.

Mr. ALLISON. The Committee on Appropriations instruct me to report back the resolution of the House of Representatives of May 6, 1896, which was referred to that committee, with an amendment, to strike out "Monday, the 18th day of May, at 2 o'clock p. m.," and insert "Thursday, the 11th day of June, at 3 o'clock p. m."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to amend the resolution by striking out "Monday, the 18th day of May, at 2 o'clock p. m.," and inserting "Thursday, the 11th day of June, at 3 o'clock p. m."; so as to make the resolution read:

Resolved by the House of Representatives (the Senate concurring), That the President of the Senate and the Speaker of the House of Representatives be authorized to close the present session by adjourning their respective Houses on Thursday, the 11th day of June, at 3 o'clock p. m.

The PRESIDING OFFICER. The question is upon agreeing to the amendment proposed by the committee.

Mr. STEWART. Mr. President, of course I shall not attempt to delay the adjournment of Congress, but it seems to me worthy of remark that this Congress, coming in as it did with high-sounding promises, has utterly failed to redeem any of them. It has left the country in a most deplorable condition. It has failed to put an end to a policy which means ultimate ruin. We have been for several years borrowing gold to pay interest on borrowed money and to pay fixed charges to foreign countries. During the present Administration two hundred and sixty-two and a half million dollars of bonds have been sold to borrow gold to maintain the gold standard. It has not maintained the gold standard, however, because we are paying a large premium for the gold. On sixty-two and a half million dollars borrowed in February, 1895, we paid $16,000,000 premium, as the President informed us. On the sale of $100,000,000 there was also a large premium paid, or a discount on the bonds, which is the same thing. These were twenty-nine-year 4 per cent bonds, and would have sold for 125 if it had not been for the necessity of paying a premium to buy gold. As we go on, and our credit gets worse and worse, the premium must necessarily be larger and larger.

Our farm products, which we export and upon which we must rely to buy gold and pay for what we import, are depreciating in price in foreign markets year by year as the competition with silver-standard countries increases. See under what disadvantages our farmers labor as against the Asiatics. Take Russia, for example, which is on a silver basis. The Russian farmer has a hundred dollars of taxes to pay and the American farmer has a hundred dollars of taxes to pay. The Russian farmer takes a hundred bushels of wheat to Liverpool and sells it for 60 cents a bushel in gold. He takes that back to Russia, exchanges it for Russian money, and gets $120; pays his hundred dollars of taxes and has $20 with which to buy tea and coffee. The American farmer sells his hundred bushels of wheat for $60 and only has $60 when he gets home. He applies it on his taxes and finds himself $40 in debt. This advantage goes to all the Asiatic and silver-standard countries as against the American farmer. The result is that the Asiatic has money with which to reproduce wheat and it does him some good; he has money with which to reproduce cotton and it does him some good, but the American farmer is left in debt every year, and still we say this must go on and debt must be piled up and there must be no relief.

Nonaction is the order of the day. We passed through the Senate a bill to stop the sale of bonds, which would have required the Executive to obey the law and pay out silver, of which there is an abundance. There are some $30,000,000 of silver coin in the Treasury, and silver coin coming in daily. I am informed that more than half the revenue is paid in silver certificates, which are substantially silver coins, because the Government can convert them into silver coins when they come into the Treasury. We have an abundance of silver coin with which to redeem, and there is no possible necessity for involving the country in further debt.

What remedy for our difficulties have the Republicans of the House of Representatives suggested? They have suggested more taxation; they say all we need is more revenue. When we point out to them that there is a cash balance in the Treasury of available money amounting to nearly $270,000,000, and that one of the embarrassments of the country is this unhealthy surplus, the only remedy proposed by the Republicans of the House, in the bills they have sent to us, was more taxation to increase the surplus and impound more and more money. About $125,000,000, if I recollect aright—over $120,000,000, at all events—of your greenbacks are retired in the Treasury; prices are falling; times are hard, and growing worse; and we are going to adjourn this Congress, for what?

In the New York Sun to-day there is a description of the fight which the Republicans propose. They are to make a fight for what? For tariff. To show the character of the campaign upon which we are about to enter, and for which we are to now adjourn, I will ask the Secretary to read the article from the New York Sun, a gold-standard paper, which appeared to-day.

Mr. GALLINGER. The New York Sun does not speak for the Republican party.

Mr. STEWART. Oh, but it speaks the truth about the Republican party, and I think you had better hear it. I should like to have that article read.

Mr. CULLOM. Is it brief?

Mr. STEWART. It is quite brief.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Secretary read as follows:

WHOM OR WHAT WILL THEY FIGHT?

"The money question," the McKinley men keep on saying, "is a secondary issue, although important. The main issue is the tariff, and the Republican party will make its fight on that."

This sentiment finds repeated expression from McKinley managers and McKinley organs in various parts of the country. It is pronounced so persistently and so emphatically that it must mean something.

What does it mean? What is the tariff issue which is to be the principal issue of the coming campaign? On that issue who is it, or what is it, that the McKinley Republicans expect to fight?
